## CEO's Comments

Mr. Jaime Rivera, Bladex's Chief Executive Officer, stated the following regarding the Bank's results: "Our financial results for the first quarter were a reflection of the favorable dynamics driving our market and our ability to capture its steady growth.

Over the course of the last three months, 2011 GDP growth projections for countries such as the US, Japan, and India, have been lowered. In marked contrast, in the case of Latin America, the IMF now expects growth in 2011 to reach 4.7%, a significant increase over the 4.3% figure published in January. We are thus operating in a market that continues to expand steadily, in spite of some level of concern with regards to inflation and uncertainties in other regions of the world. Along with our growing client reach, this explains our healthy 7% commercial portfolio growth for the quarter, laying the foundation for increasing revenue levels for the remainder of the year.

Just about every financial indicator moved in the right direction during the quarter. Our cost of funds and efficiency improved, deposit balances reached record levels, portfolio quality strengthened, the Asset Management Division returned to profitability, and ROE levels — while still below our target — approached double digit levels. The \$16.3 million profit figure for the quarter contributed to the Bank's strong Tier 1 capitalization, which stands at 19.3%, even as our portfolio has expanded by 47% in the last year.

While we are not alone in the market and competition remains strong, our franchise continues to strengthen as our unique expertise in trade finance and our knowledge of Latin America become increasingly important competitive advantages. We still need to bring our new offices in Lima and Bogota fully on-stream, but expect to do so during the next few months, thus providing us with additional origination capabilities during the second half of the year.

All in all, the results for the first quarter followed from the steady execution of the plans we have set for the Bank: an increasing client base, additional deployment of capital, diversification of revenues, efficient funding, credit discipline and excellence in execution - all as a means of fueling increasing profitability and value." Mr. Rivera concluded.

## RESULTS BY BUSINESS SEGMENT

### COMMERCIAL DIVISION

The Commercial Division incorporates the Bank's core business of financial intermediation and fee generation activities. Net Income includes net interest income from loans, fee income, net allocated operating expenses, the reversals (provisions) for loan and off-balance sheet credit losses, and any impairment on assets.

The Commercial Portfolio includes the book value of loans, acceptances, and contingencies (including letters of credit, stand-by letters of credit, and guarantees covering commercial and country risks and credit commitments).

(US\$ million)	1Q11	4Q10	1Q10
<b>Commercial Division:</b>			
Net interest income	\$20.4	\$20.3	\$15.2
Non-interest operating income (1)	2.1	3.1	2.2
Net operating revenues (2)	22.5	23.4	17.4
Operating expenses	(8.6 )	(9.1 )	(6.8 )
Net operating income (3)	13.9	14.3	10.6
Reversal (provision) for loan and off-balance sheet credit losses, net	(0.3 )	0.6	3.5
Recoveries, net of impairment of assets	0.0	0.0	0.2
<b>Net Income</b>	<b>\$13.6</b>	<b>\$14.9</b>	<b>\$14.3</b>

The Commercial Division's portfolio growth continued in the first quarter, driven by solid demand from large corporations and financial institutions, reaching \$4.8 billion in period-end balances, a 7% increase from the previous quarter, and a 47% increase from the first quarter 2010.

#### 1Q11 vs. 4Q10

Net Income in the first quarter 2011 amounted to \$13.6 million, compared to \$14.9 million in the fourth quarter 2010. The decrease of \$1.3 million in Net Income was mainly the result of the combined effects of: (i) a \$1.0 million decrease in non-interest operating income, mostly attributable to lower commissions from loan commitments, (ii) a \$0.9 million variation in provisions for credit losses as a result of higher commercial portfolio balances, and (iii) a \$0.5 million decrease in operating expenses.

#### 1Q11 vs. 1Q10

Overall Net Income decreased \$0.7 million compared to the first quarter 2010 despite the \$5.2 million, or 34% increase in net interest income as the result of higher average portfolio balances, mainly due to the combined effects of: (i) a \$3.8 million variation in reversals (provision) for credit losses as a result of higher average loan portfolio balances, and (ii) a \$1.8 million increase in operating expenses related to the deployment of a larger sales force and the establishment of new representative offices.

The Bank's Commercial Portfolio balance reached \$4.8 billion as of March 31, 2011, a 7% increase from the balance as of December 31, 2010, and 47% above the balance as of March 31, 2010. The annual increase was largely attributable to increased demand from the Bank's established client base of corporations and financial institutions. During the first quarter 2011, the Bank disbursed \$1.8 billion in new loans, 8% more than in the fourth quarter 2010, and an increase of \$920 million, (+102%), compared to the same period in the previous year.

On an average basis, the Commercial Portfolio increased 4% in the first quarter 2011 compared to the previous quarter, and 46% from the first quarter 2010.

The Commercial Portfolio continues to be mainly short-term and trade-related in nature. \$3.6 billion, or 75%, of the commercial portfolio matures within one year. Trade financing operations represent 63% of the portfolio, while the remaining balance consists primarily of lending to banks and corporations. Refer to Exhibit VIII for information relating to the Bank's Commercial Portfolio distribution by country and Exhibit X for the Bank's distribution of credit disbursements by country.

#### TREASURY DIVISION

The Treasury Division incorporates the Bank's liquidity management, and investment securities activities. Net Income is presented net of allocated operating expenses, and includes net interest income on Treasury activities and net other income (loss) relating to Treasury activities (12).

(US\$ million)	1Q11	4Q10	1Q10
<b>Treasury Division:</b>			
Net interest income	\$1.0	\$1.1	\$0.5
Non-interest operating income (loss) (1)	(0.3 )	2.4	(1.1 )
Net operating revenues (2)	0.7	3.5	(0.6 )
Operating expenses	(1.6 )	(1.3 )	(2.2 )
Net operating income (loss) (3, 12)	(0.9 )	2.2	(2.8 )
Net Income (Loss)	\$(0.9 )	\$2.2	\$(2.8 )

Liquid assets (8) stood at \$322 million as of March 31, 2011, compared to \$421 million as of December 31, 2010, and \$328 million as of March 31, 2010, as capital markets experience lower levels of volatility.

The Bank's securities portfolios saw modest turnover during the first quarter 2011. The Trading Portfolio as of March 31, 2011 stood at \$45 million, compared to \$50 million as of December 31, 2010, and \$51 million as of March 31, 2010.

The Securities Available for Sale Portfolio as of March 31, 2011 amounted to \$387 million, compared to \$353 million as of December 31, 2010, and \$457 million as of March 31, 2010. The Available for Sale Portfolio as of March 31, 2011 consisted entirely of readily quoted Latin American securities, 68% of which were sovereign and state-owned risk in nature (refer to Exhibit IX for a per country distribution of the Treasury portfolio).

The Available for Sale Portfolio is marked-to-market, with the impact recorded in stockholders' equity through the Other Comprehensive Income Account ("OCI"), which improved to (\$3.8) million in the first quarter 2011, compared to (\$6.4) million in the fourth quarter 2010 and (\$6.3) million in the same period 2010, mainly as the net result of improved valuations of securities and the interest rate hedging instruments associated with these securities.

Funding costs continued to improve as the weighted average funding cost in the first quarter 2011 was 1.09%, a decrease of 8 bps, or 7%, compared to the fourth quarter 2010, and a decrease of 34 bps, or 24%, compared to the first quarter 2010.

Period-end deposit balances stood at \$1.9 billion, an increase of 5% versus the previous quarter, and a 41% year-on-year increase. Borrowings and securities sold under repurchase agreements increased 7% from the fourth quarter 2010 to \$2.6 billion, a 47% year-on-year increase.

1Q11 vs. 4Q10

In the first quarter 2011, the Treasury Division posted a Net Loss of \$0.9 million, compared to Net Income of \$2.2 million in the fourth quarter 2010, mainly due to lower non-interest operating income, mainly associated with lower gains on the sale of securities available for sale.

1Q11 vs. 1Q10

The Division's Net Loss amounted to \$0.9 million compared to a Net Loss of \$2.8 million in the first quarter 2010. The positive variation of \$1.9 million was due to the combined effects of: (i) a \$0.5 million increase in net interest income, (ii) a \$0.8 million increase in non-interest operating income mainly related to valuations of trading portfolio and hedging instruments, and (iii) a \$0.6 million decrease in operating expenses.

ASSET MANAGEMENT UNIT

The Asset Management Unit incorporates the Bank's asset management activities. The Unit's Investment Fund follows primarily a Latin America macro strategy, utilizing a combination of products (foreign exchange, equity indices, interest rate swaps, and sovereign credit products) to establish long and short positions in the markets.

The Unit's Net Income includes net interest income on the Investment Fund, as well as net gains (losses) from investment fund trading, other related income (loss), allocated operating expenses, and the Net Income attributable to the redeemable non-controlling interest.

(US\$ million)	1Q11	4Q10	1Q10
<b>Asset Management Unit:</b>			
Net interest income (loss)	\$0.0	\$(0.4 )	\$0.6
Non-interest operating income (loss) (1)	4.6	(0.1 )	(1.3 )
Net operating revenues (2)	4.6	(0.5 )	(0.7 )

Net operating income (loss) (3)	3.8	(1.8 )	(1.7 )
Net income (loss)	3.8	(1.8 )	(1.7 )

<b>Net Income (Loss)</b>	<b>\$3.6</b>	<b>\$(1.6 )</b>	<b>\$(1.4 )</b>

#### 1Q11 vs. 4Q10

The Asset Management Unit recorded Net Income in the first quarter 2011 of \$3.6 million, compared to a Net Loss of \$1.6 million in the fourth quarter 2010. The \$5.2 million quarterly increase was mainly due to a \$4.7 million increase in non-interest operating income attributable to net gains from trading activities in the Investment Fund.

#### 1Q11 vs. 1Q10

The Unit posted Net Income of \$3.6 million in the first quarter 2011, compared to a Net Loss of \$1.4 million in the first quarter 2010, as a result of gains from investments in the Investment Fund, partially offset by net income attributable to the redeemable non-controlling interest.

As of March 31, 2011, the Investment Fund's asset value totaled \$161 million, compared to \$167 million as of December 31, 2010, and \$205 million as of March 31, 2010. For the same dates, Bladex's ownership of the Bladex Offshore Feeder Fund was 94.64%, 88.67% and 78.79%, respectively, with remaining balances owned by third party investors.

The Bank has decided to gradually reduce its exposure in BCGF to its original \$100 million investment, and continues to make redemptions on a sequential basis.

## 1Q11 vs. 4Q10

In the first quarter 2011, net interest income amounted to \$21.4 million, an increase of \$0.4 million, or 2%, compared to \$21.0 million in the fourth quarter 2010. The \$0.4 million quarterly increase was mainly the result of lower interest expense in the Investment Fund.

## 1Q11 vs. 1Q10

Net interest income increased \$5.1 million, or 31%, when compared to the first quarter 2010. This increase primarily reflects:

- (i) Higher average interest-earning asset balances, mainly average loan portfolio balances, which increased \$1.3 billion, or 49%, compared to the first quarter 2010, resulted in an overall increase of \$8.9 million in net interest income. Average volumes of interest bearing liabilities increased \$1.2 billion, or 40%, resulting in a \$1.8 million decrease in net interest income, resulting in a \$7.1 million net increase in net interest income.
- (ii) A \$2.0 million decrease in net interest income as a result of the combined effects of a 18 bps reduction in average yield earned on assets, and a 34 bps decrease in average yield paid on interest-bearing liabilities, both mostly attributable to lower interbank market rates.

The \$5.4 million year-on-year reduction in total allowance for credit losses was the result of lower reserve requirements related to the improved risk profile in the Region.

As of March 31, 2011, the non-accrual portfolio amounted to \$29.0 million, the same level as of December 31, 2010, and compared to \$51.3 million as of March 31, 2010. As of March 31, 2011, principal amounts past due in the loan portfolio remained at \$1.0 million.

Operating expenses in the first quarter 2011 totaled \$11.0 million, a \$0.6 million, or 6%, decrease from the fourth quarter 2010, mainly due to a seasonal variable compensation increase recorded in the fourth quarter 2010. The \$1.0 million, or 9%, year-on-year increase was mostly attributable to higher salary and other employee expenses associated with the higher average headcount in the Commercial Division and the Risk Management area.

The Bank's first quarter 2011 efficiency ratio improved to 40%, compared to 44% in the fourth quarter 2010, and 62% in the first quarter 2010, mostly as a result of increased net operating revenues from the Asset Management Unit and the quarterly variation in operating expenses.

During the first quarter 2011, the operating expenses to average assets ratio amounted to 0.89%, compared to 0.94% in the previous quarter, and compared to 1.06% in the first quarter 2010.
