Siemens in the first quarter (October 1 to December 31) of fiscal 2003

Net income for the first quarter of fiscal 2003 was 521 million, compared to net income of 538 million in the same period a year earlier.

EBIT from Operations was 604 million, up from 487 million in the same quarter of fiscal 2002.

Sales decreased 10% to 18.845 billion and orders decreased 21% to 20.145 billion. Excluding currency effects and the net effect of acquisitions and dispositions, sales decreased 1% and orders decreased 13%. Sequentially, and excluding currency effects and the net effect of acquisitions and dispositions, sales decreased 9% and orders increased 6%.

Net cash from operating and investing activities was a negative 1.137 billion, after a supplemental cash contribution of 442 million to Siemens pension trusts in Germany and the U.K.

For the first quarter of fiscal 2003, ended December 31, 2002, Siemens earned net income of 521 million, including negative 17 million related to its ownership of shares in Infineon Technologies AG. In contrast, net income of 538 million in the first quarter a year earlier included a positive 157 million net effect related to Infineon. Earnings per share for the first quarter of fiscal 2003 were 0.59 compared to 0.61 in the same period a year earlier.

EBIT from Operations in the first quarter of fiscal 2003 was 604 million, compared to 487 million a year earlier. The current period included a net gain at the Power Generation group (PG) of 125 million from the effect of project cancellations, net of certain allowances on inventory. EBIT from Operations also benefited from lower charges for severance programs and asset write-downs, totaling 115 million in the current quarter compared to 147 million in the same quarter a year earlier. Quarterly non-allocated pension-related expense was higher, as expected, at 198 million compared to 63 million in the first quarter of the prior year. Growth in EBIT from Operations was also negatively impacted by currency translation effects.

Table of Contents

Net cash from operating and investing activities for the first quarter of the fiscal 2003 was a negative 1.137 billion. Operating activities used net cash of 685 million, which includes 442 million in supplemental cash contributions to Siemens pension trusts in Germany and the U.K. An additional 377 million in real estate was also transferred to the Siemens German Pension Trust in the first quarter. These contributions bring Siemens supplemental pension funding for the last two quarters to 2.601 billion. Net cash from operating activities for the quarter also reflect a planned, ongoing phase-out of sales of accounts receivable, which resulted in negative 458 million in the current period. Net cash also includes a significant decline in customer prepayments at PG and Transportation Systems (TS). Investing activities used net cash of 452 million in the first quarter of fiscal 2003, and included significantly lower capital expenditures than in the same quarter a year ago. In the same quarter a year earlier, investing activities provided net cash of 393 million, including proceeds of 716 million from the sale of Mannesmann Sachs AG and 556 million from the sale of Infineon shares.

Our first-quarter results are better than we expected, however we stand by the overall outlook which we provided in December, said Siemens CEO Heinrich v. Pierer. The margins of our groups continue to move toward their target ranges specified in Operation 2003.

Operations in the first quarter of fiscal 2003

In the Information and Communications business area, Information and Communication Networks (ICN) continued to address the steep downturn in telecommunications infrastructure investment, particularly by carriers in Germany and the Americas. EBIT of negative 151 million included 24 million of severance charges and 25 million in write-downs of venture capital and other investments. In comparison, ICN had EBIT of negative 124 million in the same quarter a year earlier, when severance charges and asset write-downs totaled 76 million.

Table of Contents

The Enterprise Networks division was profitable and increased its first-quarter EBIT year-over-year, while business volumes declined due to the effects of dispositions and more selective order intake. ICN's Carrier Networks and Services business posted negative earnings on lower business volume compared to the same period a year earlier, but losses were lower than in recent quarters, due to a better product mix driven by software-related contracts. While ICN's overall first-quarter sales of 1.804 billion were 29% lower than a year earlier, approximately ten percentage points of the change resulted from a combination of currency effects and the deconsolidation of its Unisphere Networks, Inc. and Network Systems businesses between the two periods under review. Orders fell 26% year-over-year, to 1.940 billion. The group expects to continue its PACT cost-cutting program in 2003, and to incur associated severance expenses.

Information and Communications Mobile (ICM) increased its first-quarter EBIT to 59 million from 37 million a year earlier, when the group took severance charges totaling 49 million at the Mobile Networks division. In the current period, the Mobile Phones division contributed EBIT of 52 million on sales of 1.309 billion, up from EBIT of 20 million in the first quarter a year earlier. The division improved profitability with the introduction of new, design-to-cost handsets, and increased sales for the Christmas quarter year-over-year with a record sell-in of 11.0 million phones. The Cordless Products and Wireless Modules divisions also contributed to earnings growth for the quarter. In contrast, continued price erosion and declines in demand led to a loss of 25 million on sales of 1.199 billion at the Mobile Networks division, compared to EBIT of 8 million in the same quarter of the prior year. Due to volume decreases at Mobile Networks, sales for ICM as a whole fell 9% from the same quarter a year ago, to 2.856 billion, and orders dropped 24%, to 2.509 billion.

EBIT at Siemens Business Services (SBS) fell to 12 million from 32 million in the first quarter a year earlier. In a weak market for information technology services, particularly in SBS's important German market, the group's sales fell 14% year-over-year, to 1.267 billion, and orders dropped 27%, to 1.394 billion.

Table of Contents

In the Automation & Control business area, Automation and Drives (A&D) increased its EBIT contribution and EBIT margin compared to the first quarter a year ago, despite a continuing slowdown in capital expenditures in the manufacturing sectors of the U.S. and Europe. EBIT rose to 179 million, compared to EBIT of 173 million in the first quarter of fiscal 2002, and EBIT margin was 9.0%. Sales for the period increased 1% year-over-year, to 1.982 billion, while orders declined to 2.234 billion due primarily to currency effects.

Industrial Solutions and Services (I&S), posted EBIT of negative 33 million compared to positive 2 million in the same period a year earlier. During the current period, I&S incurred 31 million in additional expenses, primarily for severance and payments related to favourable renegotiation of employment contracts. First-quarter sales declined 11% year-over-year, to 929 million, and orders declined 8%, to 1.067 billion.

Siemens Dematic (SD) held EBIT level at 12 million, compared to 11 million in the same period a year earlier. The group's Electronics Assembly Systems division continued to battle the effects of overcapacity in the global telecommunications equipment market, the Material Handling Automation division faced slowing market growth in Europe, and the Postal Automation division was affected by lower demand in the U.S. These factors contributed to a 23% drop in sales, to 622 million, while orders fell 20%, to 612 million. Nevertheless the group's EBIT margin improved by more than half a percent, benefiting from productivity programs and improved project execution.

Siemens Building Technologies (SBT) had first-quarter EBIT of 43 million after charges for severance and plant closings totaling 13 million. While EBIT was lower than the prior-year level of 45 million, SBT improved its EBIT margin year-over-year, in particular with increased profitability at its HVAC Products division. Sales for the quarter declined 8% year-over-year, to 1.206 billion, and orders were down 10%, at 1.254 billion. Approximately five percentage points of the decline in both sales and orders were due to currency translation and deconsolidation effects.

In the Power business area, Power Generation (PG) led all Siemens groups with EBIT of 409 million, a 107 million increase compared to the first quarter of fiscal 2002. Earnings for the current period benefited from a net gain of 125 million from the effect of project cancellations, net of certain allowances on inventory.

Table of Contents

This gain contributed to the rise in first-quarter EBIT margin year-over-year, from 14.2% to 22.9%. Sales for the quarter fell 16% compared to the same period a year earlier, to 1.785 billion. More than seven percentage points of PG's sales decline resulted from currency translation effects and the sale of PG's ceramics business between the two periods under review. Orders of 2.270 billion for the quarter came in below the record-setting first-quarter level a year ago, when PG booked approximately 1.0 billion of orders from two customers in the Middle East. In the current period, PG booked substantial gas turbine orders and also bolstered its growing backlog of service contracts. While PG's order backlog overall declined from 20.1 billion at the end of fiscal 2002 to 18.6 billion at the close of the first quarter, more than half of the net change resulted from currency effects.

Power Transmission and Distribution (PTD) doubled its EBIT to 40 million compared to the first quarter of fiscal 2002, when its Metering business was unprofitable and the group took severance charges totaling 22 million. With the sale of Metering in the fourth quarter of the previous year, and increases in profitability at a majority of PTD's remaining divisions, the group raised its EBIT margin by three full percentage points compared to the prior-year quarter, to 5.0%. The effects of currency translation and dispositions accounted for nearly all of the 20% year-over-year reduction in first-quarter sales, to 802 million. The group's 33% decline in orders, to 1.109 billion, is largely attributable to comparison with the first quarter of fiscal 2002, when order bookings were unusually high at both the High Voltage and Transformer divisions.

In the Transportation business area, Transportation Systems (TS) delivered EBIT of 68 million, up from 50 million in the first quarter a year ago, and raised its EBIT margin more than a full point, to 6.3%. Sales climbed 12% compared to the prior-year quarter, to 1.080 billion. Orders were higher than sales for the quarter, and included a number of major new projects in Europe, but at 1.100 billion were below the 1.853 billion level TS reached in the first quarter of fiscal 2002, when it booked orders for a high-speed rail link in Holland and an advanced, driverless subway system in Nuremberg, Germany. The group's order backlog stood at 11.2 billion at the end of the current period.

Table of Contents

Siemens VDO Automotive (SV) continued its steady progress since the acquisition of the VDO businesses in fiscal 2001, posting EBIT of 73 million compared to negative 6 million in the same quarter a year ago. Growing sales of SV's innovative diesel injection and navigation systems fueled profitability, as did a group-wide productivity program. Both sales and orders rose 5% year-over-year, to 2.133 billion, despite a 5% adverse affect on volume from currency translation and the sale of the group's Hydraulik-Ring business between the two periods under review.

In the Medical business area, Medical Solutions (Med) was again a leader among the operating groups in EBIT and profitability. First-quarter EBIT rose 16% compared to a year earlier, to 245 million, and EBIT margin stepped up to 13.4%. Med's imaging systems divisions again led the way, with new products making important contributions. Sales rose 3%, to 1.831 billion, despite a negative 7% currency translation effect, while orders remained level at 1.958 billion including a negative 8% currency effect.

In the Lighting business area, Osram continued to deliver solid earnings and margins, with EBIT of 106 million and EBIT margin of 9.4%. In comparison, first-quarter EBIT a year earlier was 78 million and EBIT margin was 7.1%. The group's automotive lighting business was a particularly strong performer. Despite a negative 8% currency translation effect, Osram increased its business volume 2%, to 1.123 billion.

EBIT for Corporate, eliminations was negative 458 million compared to negative 345 million in the first quarter of fiscal 2002. Higher quarterly non-allocated pension expense was a key driver of the difference, rising from a charge of 63 million in the first quarter of fiscal 2002 to a charge of 198 million in the current period. Investment income contributed a positive 35 million compared to negative 24 million in the prior-year period. Included in investment income in the current period is a negative 17 million in equity results representing Siemens' share of Infineon's net loss in the first quarter of fiscal 2003. The equity share of Infineon's net loss in the same quarter of the prior year was a negative 60 million. Corporate items were relatively unchanged, at negative 194 million in the current period compared to negative 201 million a year earlier.

Table of Contents

Financing and Real Estate

Siemens Financial Services (SFS) significantly increased first-quarter earnings before income taxes compared to the prior year, from 42 million to 84 million, on strong performances at the Equipment & Sales Financing division and higher income from investments in Indonesia by the Equity division. Due in part to lower gains on the sale of real estate, Siemens Real Estate (SRE) recorded earnings before income taxes of 55 million, down from 88 million in the same quarter a year earlier.

International trends for the first quarter of fiscal 2003

Orders in Germany were 4.661 billion, down 10% compared to the same period a year earlier. Sales in Germany decreased 5% to 4.204 billion. Excluding deconsolidation effects, sales in Germany edged down 2%. International orders dropped 23% to 15.484 billion year-over-year, while international sales of 14.641 billion declined 12% year-over-year. Excluding currency and deconsolidation effects, international orders slid 15% and international sales decreased 2%.

Orders in the U.S. for the first quarter fell 36% to 3.965 billion and sales dropped 24% to 3.903 billion compared to the prior-year quarter, including negative effects from currency of 8% and 9%, respectively. In Asia-Pacific, first-quarter orders fell 34% to 2.146 billion and sales fell 14% year-over-year, to 2.066 billion, due in part to the deconsolidation of Infineon and currency effects. Excluding the Infineon and currency effects, orders and sales fell 25% and 3%, respectively. While China continued to account for the largest share of sales in the region, contributing 643 million in the quarter, that level was 23% below the same period a year earlier.

Income Statement highlights

Net sales for Siemens worldwide were 18.845 billion in the first quarter, compared to 20.986 billion in the same period a year earlier. Net income for Siemens worldwide of 521 million includes a positive 36 million effect as a result of Siemens' adoption of SFAS 143, Accounting for Asset Retirement Obligations. The Consolidated Statements of Income no longer include a separate column for Infineon, as it was deconsolidated in the prior fiscal year.

Table of Contents

Turning to Operations, net sales were 18.688 billion, down from 20.403 billion year-over-year, as significant sales declines occurred at major groups including ICN, ICM and PG. The effects of currency translation reduced net sales from Operations in the current period by 4%. Gross profit margin increased to 27.6%, compared to 27.3% in the first quarter of fiscal 2002, despite higher inventory allowances, particularly at PG. Research and development expense rose to 6.9% of sales, compared to 6.8% in the first quarter a year earlier. Marketing, selling, and general administration expense edged up to 18.4% of sales from 18.3% a year ago. Other operating income (expense) was 197 million, compared to 47 million in the first quarter of fiscal 2002.

Liquidity and balance sheet highlights for the first quarter of fiscal 2003

Net cash from operating and investing activities for the first quarter of the fiscal 2003 was negative 1.137 billion. Operating activities used net cash of 685 million, which includes 442 million in supplemental cash contributions to Siemens pension trusts in Germany and the U.K. An additional 377 million in real estate was also transferred to the Siemens German Pension Trust in the first quarter. These contributions bring Siemens supplemental pension funding for the last two quarters to 2.601 billion. The current period reflects a substantial decrease in other current liabilities due to lower customer prepayments at PG and TS. Reflecting a planned, ongoing phase-out of sales of accounts receivable, the decrease in outstanding balance of receivables sold was 458 million in the current period, compared to a decrease of 86 million in the first quarter of last year.

Net cash used in investing activities was 452 million compared to net cash provided of 393 million in the first quarter of last year. The current period reflects significantly lower cash outlays for capital expenditures compared to the prior year. Proceeds from sales and dispositions of businesses were 52 million compared to 1.272 billion in the first quarter of last year, which included 716 million related to the sale of Mannesmann Sachs AG and 556 million from the sale of shares in Infineon.

Net cash used in financing activities was 995 million. Within that total was 727 million in repayment of debt, including the buyback of 500 million of a 2.500 billion Infineon exchangeable bond. The net change in short-term debt was a reduction of 450 million.

Table of Contents

Total assets decreased to 75.940 billion from 77.939 billion at September 30, 2002 due primarily to currency effects.

Economic Value Added

Siemens worldwide generated EVA of 66 million in the first quarter of fiscal 2003, compared to an EVA of 71 million in the same period a year ago, which included a gain on sales of shares in Infineon.

Siemens CFO Heinz-Joachim Neubürger will hold an English-language telephone conference with analysts on January 23, 2003 at 8:30 a.m. CET. You can follow this conference live on the Internet by going to www.siemens.com/analytscall. A recording of the telephone conference will be available later at the same location.

This press release report contains forward-looking statements based on beliefs of Siemens management. The words anticipate, believe, estimate, forecast, expect, intend, plan, should and project are used to identify forward-looking statements. Such statements reflect the company's current views with respect to future events and are subject to risks and uncertainties. Many factors could cause the actual results to be materially different, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products, lack of acceptance of new products or services and changes in business strategy. Actual results may vary materially from those projected here. Siemens does not intend or assume any obligation to update these forward-looking statements.

(1) October 1 – December 31.

(2) Includes a positive effect of 36 million (or 0.04 per share) due to the adoption of SFAS 143, *Accounting for Asset Retirement Obligations*.

(3) Represents the share of loss from the ownership in Infineon during the respective periods. Beginning December 5, 2001 Infineon is accounted for under the equity method of accounting and is no longer consolidated in the financial statements of Siemens. For fiscal 2002, the amount includes a gain from the sale of Infineon shares.

(4) In fiscal year 2002, Infineon's orders and sales are included only for the approximately two months in which Infineon was consolidated in the financial statements of Siemens.

-
- (1) EBIT is measured as earnings before financing interest, income taxes and certain one-time items. Interest income related to receivables from customers, cash allocated to the segments and interest expense on payables to suppliers are part of EBIT.
 - (2) The income taxes of Eliminations, reclassifications and Corporate Treasury, Operations, and Financing and Real Estate are based on the consolidated effective corporate tax rate applied to income before income taxes. The corresponding figures for fiscal 2002 are calculated based on the consolidated effective corporate tax rate excluding Infineon.
 - (3) As of December 5, 2001, Siemens deconsolidated Infineon. The results of operations from Infineon for the first two months of the fiscal year 2002 are included in Eliminations, reclassifications and Corporate Treasury. As of December 5, 2001, the share in earnings from Infineon is included in Income (loss) from investments in other companies, net in Operations.
