The following discussion should be read in conjunction with the consolidated financial statements and the related notes provided elsewhere in this Form 6-K and with the information, including the consolidated financial statements and related notes, for the year ended 31 December 2006 in BP p.l.c.'s Annual Report on Form 20-F for the year ended 31 December 2006.

BP's first quarter profit was \$4,664 million, compared with \$5,623 million a year ago, a decrease of 17%. This included inventory holding gains of \$303 million in the first quarter of 2007 compared with \$358 million a year ago. Inventory holding gains or losses represent the difference between the cost of sales calculated using the average cost of supplies incurred during the year and the cost of sales calculated using the first-in first-out method.

Net cash provided by operating activities for the quarter was \$8.0 billion compared with \$8.9 billion a year ago.

The effective tax rate on profit of continuing operations for the quarter was 34%; the rate was also 34% a year earlier.

Net debt at the end of the quarter was \$21.8 billion. The ratio of net debt to net debt plus equity was 20% compared with 16% a year ago.

Capital expenditure, excluding acquisitions, was \$3.7 billion for the quarter. Total capital expenditure and acquisitions was \$4.8 billion, which included \$1.1 billion in respect of the acquisition of Chevron's Netherlands manufacturing company. Capital expenditure excluding acquisitions is expected to be around \$18 billion for the year. Disposal proceeds were \$0.9 billion for the quarter.

The quarterly dividend, to be paid in June, is 10.325 cents per share (\$0.6195 per ADS) compared with 9.375 cents per share a year ago, an increase of 10%. In sterling terms, the quarterly dividend is 5.151 pence per share, compared with 5.251 pence per share a year ago, a decrease of 2%. During the quarter, the company repurchased 238 million of its own shares for cancellation at a cost of \$2.5 billion.

The commentaries above and following should be read in conjunction with the cautionary statement on page 11.

Dividends

On 24 April 2007, BP announced a dividend of 10.325 cents per ordinary share to be paid in June. Holders of ordinary shares will receive 5.151 pence per share and holders of American Depository Receipts (ADRs) \$0.6195 per ADS. The dividend is payable on 4 June to shareholders on the register on 11 May. Participants in the Dividend Reinvestment Plan (DRIP) or the DRIP facility in the US Direct Access Plan will receive the dividend in the form of shares, also on 4 June.

Table of Contents

**BP p.l.c. AND SUBSIDIARIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND
RESULTS OF OPERATIONS continued**

EXPLORATION AND PRODUCTION (concluded)

The profit before interest and tax for the first quarter was \$6,054 million, a decrease of 11% over the first quarter of 2006. This included inventory holding gains of \$11 million compared with an inventory holding loss of \$7 million in the first quarter of 2006. The result was impacted by lower oil and gas realizations and lower reported volumes, reflecting the impact of the divestment activity in 2006. In addition, it included higher costs, reflecting the impacts of sector-specific inflation, increased integrity spend and higher depreciation charges. BP's share of income from TNK-BP was negatively affected by lower prices and the adverse effect of lagged tax reference prices.

The result included a net disposal gain of \$603 million, with the most significant item being the gain on the sale of our assets in the Netherlands, which completed on 31 January, and fair value gains on embedded derivatives of \$145 million relating to North Sea gas contracts. The corresponding quarter in 2006 was after a net fair value loss of \$395 million on embedded derivatives.

Production for the first quarter of 2007 was 2,660 mboe/d for subsidiaries and 1,252 mboe/d for equity-accounted entities compared with 2,726 mboe/d and 1,309 mboe/d respectively, a year ago. For both subsidiaries and equity-accounted entities, the decrease primarily reflects the impact of divestments.

During the quarter, we had our first lifting from the Dalia field in Angola, with the field ramping up as planned, and the BTC pipeline celebrated the loading of its 100 millionth barrel at the Ceyhan terminal. In Angola, the Greater Plutonio FPSO has been successfully moored.

We continued our strong exploration track record in Angola with Miranda, our 13th successful well in Block 31, and made the Giza North gas discovery in Egypt.

Since the end of the quarter, we have divested our interest in the Entrada field in the deepwater Gulf of Mexico, and acquired an increased interest in the Badin field in Pakistan in exchange for our ownership interest in the West Texas Pipeline System.

(a) Profit from continuing operations and includes profit after interest and tax of equity-accounted entities.

(b) Refining availability is defined as the ratio of units which are available for processing, regardless of whether they are actually being used, to total capacity. Where there is planned maintenance, such capacity is not regarded as being available. During 2006, there was planned maintenance of a substantial part of the Texas City refinery.

(c) The Global Indicator

Refining Margin (GIM) is the average of regional indicator margins weighted for BP's crude refining capacity in each region. Each regional indicator margin is based on a single representative crude with product yields characteristic of the typical level of upgrading complexity. The regional indicator margins may not be representative of the margins achieved by BP in any period because of BP's particular refinery configurations and crude and product slate.

REFINING AND MARKETING (concluded)

The profit before interest and tax for the first quarter was \$1,129 million compared with \$2,038 million for the same period last year. This included inventory holding gains of \$291 million and \$426 million respectively. Additionally, the quarter's result was after a charge of \$180 million in respect of asset impairments. Last year's result included net disposal gains of \$564 million.

Compared with the first quarter of 2006, our result benefited from a stronger operating environment for both refining and marketing. However, the benefit of higher refining throughput at Texas City during the quarter was more than offset by the impact of operational issues at a number of our other refineries, particularly in the US. In addition, the quarter's result reflects significant IFRS fair value timing effects, lower supply optimization benefits and greater integrity spend.

The refining throughputs for the quarter were 2,232 mb/d compared with 2,022 mb/d for the same quarter last year. The improvement in throughputs was mainly due to the partial resumption of operations at the Texas City refinery. Excluding the Texas City refinery, refining availability for the first quarter of 2007 was 94.6% compared with 96.0% in the first quarter of 2006. Marketing sales were 3,769 mb/d compared with 3,826 mb/d for the corresponding period in 2006, reflecting lower heating oil demand in Europe caused by relatively mild winter weather.

On 31 March 2007, BP completed its acquisition of Chevron's Netherlands manufacturing company, Texaco Raffinaderij Pernis B.V., for \$1.1 billion.

BP agreed to sell, subject to required regulatory approvals, its Coryton Refinery in Essex, UK, to Petroplus Holdings AG for consideration of \$1.4 billion, plus working capital. Furthermore, BP announced its intention to sell its ethyl acetate and vinyl acetate monomer manufacturing units at Saltend, near Hull, UK.

BP announced it had selected the University of California Berkeley, and its partners the University of Illinois at Urbana-Champaign and the Lawrence Berkeley National Laboratory, to join in the previously announced \$500 million research programme to explore how bioscience can be used to increase energy production and reduce the impact of energy consumption on the environment.

Late in the quarter, operational issues at the Whiting Refinery have reduced throughput to around 200,000 barrels per day, about half its capacity, and limited the crude slate to primarily sweet grades. This will continue until we complete the necessary repairs.

US	24	168
Rest of World	127	135
	206	238

(a) Profit from continuing operations and includes profit after interest and tax of equity-accounted entities.

The profit before interest and tax for the first quarter was \$206 million compared with \$238 million a year ago. This includes inventory holding gains of \$63 million in the first quarter of 2006 (there were no inventory holding gains or losses on the first quarter of 2007). Additionally, the first quarter of 2007 included fair value gains on embedded derivatives of \$7 million and a net gain of \$2 million on the sale of assets. The corresponding quarter in 2006 included a fair value loss of \$55 million on embedded derivatives.

The first quarter's result was significantly lower than the same period in 2006, primarily due to a lower contribution from the marketing and trading business, partially offset by strong operating performance from the NGL's business, particularly in Canada, a positive impact in respect of non-operating items and a benefit due to the absence of last year's IFRS fair value accounting charge.

In March, BP Solar began construction of two mega cell plants, one at its European headquarters in Madrid, Spain and the second at its joint venture facility, Tata BP Solar, in Bangalore, India. Also, we expect to begin construction of a wind power generation project in India and five wind power generation projects in the US, located in California, Colorado, North Dakota and Texas, in 2007. These projects are expected to deliver a combined generation capacity of more than 500 megawatts. During the quarter, China's first LNG terminal at Guangdong (BP 30%) reached the milestone of receiving 1 million tonnes of LNG, which is supplied to power, industrial and residential customers in Southeast China.

FORWARD-LOOKING STATEMENTS

In order to utilize the "Safe Harbor" provisions of the United States Private Securities Litigation Reform Act of 1995, BP is providing the following cautionary statement. The foregoing discussion contains forward looking statements particularly those regarding capital expenditure and the construction of wind power generation projects and their expected combined generation capacity. By their nature, forward looking statements involve risk and uncertainty and actual results may differ from those expressed in such statements depending on a variety of factors including the following: the timing of bringing new fields on stream; industry product supply; demand and pricing; operational problems; general economic conditions; political stability and economic growth in relevant areas of the world; changes in laws and governmental regulations; exchange rate fluctuations; development and use of new technology; the success or otherwise of partnering; the actions of competitors; natural disasters and adverse weather conditions; changes in public expectations and other changes to business conditions; wars and acts of terrorism or sabotage; and other factors discussed in this Announcement. For more information you should refer to our Annual Report and Accounts 2006 and our 2006 Annual Report on Form 20-F filed with the US Securities and Exchange Commission.

US GAAP

In compliance with Item 8.A of Form 20-F, the group has elected to include a summary of the adjustments to profit for the period and to BP shareholders' equity that would be required if US generally accepted accounting principles (US GAAP) was applied instead of IFRS (a US GAAP reconciliation) in its Annual Report on Form 20-F and in its report on Form 6-K for the period ended 30 June. Previously, a US GAAP reconciliation was also included in the group's reports on Form 6-K for the periods ended 31 March and 30 September.

This change in reporting practice is being made in order to shorten the period of time between the announcement of the group's quarterly results and the filing of the applicable report on Form 6-K. Accelerating the filing of these quarterly reports on Form 6-K provides the group additional flexibility with regard to the issuance of securities under existing Registration Statements on Form F-3.

The consolidated financial statements of the BP group are prepared in accordance with IFRS as adopted for use by the European Union, which differ in certain respects from US GAAP. The material differences between the group's IFRS and US GAAP reporting are set out in the Annual Report on Form 20-F 2006 in note 53. Since 31 December 2006 no new significant IFRS to US GAAP differences have arisen.

The group adopted FASB Interpretation No. 48 "Accounting for Uncertainty in Income Taxes" an interpretation of FASB Statement No. 109 with effect from 1 January 2007. Under Interpretation 48, a tax benefit relating to an uncertain tax position is recognized only where it is more likely than not that the tax position, based on underlying technical merits, will be sustained upon examination by tax authorities. The tax benefit recognized for such a position is measured based on the largest benefit that has a greater than fifty percent likelihood of being realized on settlement. Under IFRS, the provisions of IAS 37 "Provisions, Contingent Liabilities and Contingent Assets" should be considered when accounting for uncertain tax positions. IAS 37 says that uncertainties surrounding the amount to be recognized are dealt with by various means according to the circumstances. The approaches suggested include the use of probabilities to determine expected values and a most likely outcome approach. The adoption of Interpretation 48 did not have a significant effect on the group's profit as adjusted to accord with US GAAP, or on BP shareholders' equity as adjusted to accord with US GAAP.

- (a) Operating cash flow is calculated from the starting point of profit before taxation which includes inventory holding gains and losses. Operating cash flow also reflects working capital movements including inventories, trade and other receivables and trade and other payables. The carrying value of these working capital items will change for various reasons, including movements in oil, gas and products prices.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Basis of preparation

The interim financial information included in this Form 6-K has been prepared in accordance with IAS 34 Interim Financial Reporting .

The results for the interim periods are unaudited and in the opinion of management include all adjustments necessary for a fair presentation of the results for the periods presented. All such adjustments are of a normal recurring nature. The interim financial statements and notes included in this Report should be read in conjunction with the consolidated financial statements and related notes for the year ended 31 December 2006 included in BP's Annual Report on Form 20-F filed with the Securities and Exchange Commission.

BP prepares its Annual Report and Accounts on the basis of International Financial Reporting Standards (IFRS) as adopted for use by the European Union. The financial information presented herein has been prepared in accordance with the accounting policies expected to be used in preparing the Annual Report and Accounts 2007, which do not differ significantly from those used for the Annual Report and Accounts 2006.

Note 2 Changes to comparatives

In 2005 the basis of accounting for over-the-counter forward sale and purchase contracts for oil, natural gas, NGLs and power was changed. Certain transactions are now reported on a net basis in sales and other operating revenues, whereas previously they had been reported gross in sales and purchases. This change, while reducing sales and other operating revenues and purchases, had no impact on reported profit, profit per ordinary share, cash flow or the balance sheet.

During 2006, as part of a continuous process to review how individual contracts are accounted for, certain other minor adjustments were identified that should have been reflected in the restatement from gross to net presentation. Though these adjustments are not significant to the group income statement, the amendment has been made to bring the comparatives onto a consistent basis. The comparative figures have been amended to reflect these items as set out below.

	Amended 3 months ended 31 March 2006	Reported 3 months ended 31 March 2006
	(\$ million)	
Sales and other operating revenues		
Exploration and Production	13,918	13,918

BP p.l.c. AND SUBSIDIARIES
CAPITALIZATION AND INDEBTEDNESS

The following table shows the unaudited consolidated capitalization and indebtedness of the BP Group as of 31 March 2007 in accordance with IFRS:

	31 March 2007 (Unaudited) (\$ million)
Share Capital	
Authorized share capital (1)	9,021
Capital shares (2-3)	5,330
Paid-in surplus (4)	10,058
Merger reserve (4)	27,204
Other reserves	2
Shares held by ESOP trusts	(135)
Available-for-sale investments	265
Cash flow hedges	19
Foreign currency translation reserve	4,808
Treasury shares	(22,151)
Share-based payment reserve	766
Retained earnings	58,708
 BP shareholders' equity	 84,874
 Finance debt (5-7)	
Due within one year	11,597
Due after more than one year	12,131
 Total finance debt	 23,728
 Total Capitalization (8)	 108,602
 (1) Authorized share capital comprises 36 billion ordinary shares, par value US\$0.25 per share, and 12,750,000 cumulative preference shares, par value £1 per share.	
(2) Issued share capital as of 31	

March 2007
comprised
19,290,540,097
ordinary shares, par
value US\$0.25 per
share, and
12,706,252
preference shares,
par value £1 per
share. This excludes
1,943,965,179
ordinary shares
which have been
bought back and
held in treasury by
BP, and which are
not taken into
consideration in
relation to the
payment of
dividends and
voting at
shareholders
meetings.

- (3) Capital shares represent the common stock of BP which has been issued and is fully paid.
- (4) Paid-in surplus and merger reserve represent additional paid-in capital of BP which cannot normally be returned to shareholders.
- (5) Finance debt recorded in currencies other than U.S. dollars has been translated into US dollars at the relevant exchange rates existing on 31 March 2007.

- (6) Obligations under finance leases are included in the above table.
- (7) As of 31 March 2007, the parent company, BP p.l.c., had outstanding guarantees totaling US\$20,486 million, of which US\$20,430 million related to guarantees in respect of borrowings by its subsidiary undertakings. Thus 86% of the finance debt had been guaranteed by BP. BP has no material outstanding contingent liabilities. All of BP's debt is unsecured.
- (8) There has been no material change since 31 March 2007 in the consolidation capitalization, indebtedness or contingent liabilities of BP.
