AMERICAN PHYSICIANS SERVICE GROUP, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2008

(Unaudited)

1.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) and pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. The consolidated unaudited financial statements as of and for the three months ended March 31, 2008 and 2007 reflect all adjustments which are, in the opinion of management, necessary for a fair presentation of the financial position, results of operations and cash flows for the periods presented. These consolidated financial statements have not been audited by our independent registered public accounting firm. The operating results for the interim periods are not necessarily indicative of results for the full fiscal year.

The notes to consolidated financial statements appearing in our Annual Report on Form 10-K for the year ended December 31, 2007 filed with the SEC should be read in conjunction with this Quarterly Report on Form 10-Q. There have been significant changes in the type of information reported and the presentation format in this Quarterly Report as a result of the acquisition of American Physicians Insurance Company (API) effective April 1, 2007, since we effectively became an insurance company for presentation purposes as a result of the transaction. Such changes are disclosed in the notes hereto. Prior year financial and operating data has been reclassified to reflect the format of the financial statements after the acquisition of API.

2.

Management's Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

On an on-going basis, we evaluate our estimates, including our most significant estimates related to: reserve for losses and loss adjustment expenses; death, disability and retirement reserves; reinsurance premiums recoverable/payable; premiums ceded; deferred policy acquisition costs, impairment of assets including the fair value of investments; bad debts; income taxes; and contingencies and litigation. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources.

Although considerable judgment is inherent in these estimates, management believes that the current estimates are reasonable in all material respects. The estimates are reviewed regularly and adjusted, as necessary. Adjustments related to changes in estimates are reflected in the Company's results of operations, or other comprehensive income, in the period in which those estimates are changed.

3.

New Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) 157, Fair Value Measurements. SFAS 157 provides enhanced guidance for using fair value to measure assets and liabilities. Under the standard, fair value refers to the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts its business. SFAS 157 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, SFAS 157 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy.

Effective January 1, 2008, we adopted SFAS 157, *Fair Value Measurements*, for our financial assets and financial liabilities, but have not yet adopted SFAS 157 as it relates to nonfinancial assets and liabilities based on the February 2008 issuance of FASB Staff Position 157-2, *Effective Date of FASB Statement No. 157*, which permits a one-year deferral of the application of SFAS No. 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008. The adoption of SFAS 157 as it pertains to financial assets and liabilities did not have a material impact on our results of operations, financial position or liquidity. We will adopt FAS 157 for non-financial assets and non-financial liabilities on January 1, 2009 and do not expect the provisions to have a material effect on its results of operations, financial position or liquidity. For additional disclosures, see Note 17, *Fair Value Measurements*.

4.

Acquisition

On April 1, 2007, we acquired all of the issued and outstanding stock of API. We considered several factors in determining to acquire API, including the favorable effects tort reform had on the Texas market, our long-term experience managing API's operations, our credibility in the marketplace, the common goals we shared with API's board of directors, the ability to increase API's capital to support future growth after the acquisition and the increased financial strength of the combined entities. The results of operations for API are included in our consolidated results of operations beginning April 1, 2007. The business combination was accounted for using the purchase method of accounting and, accordingly, the purchase price was allocated to assets acquired and liabilities assumed based on fair values at the date of acquisition.. The total purchase price was \$45,167,000 and consisted of 1,982,499 shares of the Company's common stock, valued at a per share price of \$17.635, or \$34,961,000 in the aggregate, \$35,000 in cash paid in lieu of fractional shares of common stock, 10,197.95 shares of preferred stock valued at \$9,179,000, plus costs to complete the acquisition of \$992,000. We are required to redeem at least \$1 million of the preferred stock each calendar year beginning in 2007, until December 31, 2016, at which time all of the preferred stock must have been redeemed. The preferred stock has a cumulative dividend equal to 3% of the outstanding redemption value per year. In

June 2007, we made the first required payment, redeeming 10% of the preferred shares outstanding and paying the dividend.

The following table displays the amount of the purchase price assigned to each major asset and liability of API at the acquisition date, April 1, 2007:

(in thousands)

ASSETS

Investments:

Fixed maturities available for sale	\$ 145,354
Equity securities available for sale	6,851
Other invested assets	1,848
Total investments	154,053
Cash and cash equivalents	9,910
Accrued investment income	793
Premium and maintenance fees receivable	14,647
Other amounts receivable under reinsurance recoverables	1,373
Reinsurance recoverables on paid and unpaid loss adjustment expenses	29,685
Prepaid reinsurance premiums	311
Deferred policy acquisition costs	2,404
Deferred tax assets	4,630
Subrogation recoverables	505
Other assets	358
Total assets	\$ 218,669

LIABILITIES AND SHAREHOLDERS EQUITY

Liabilities

Reserve for losses and loss adjustment expenses	116,227
Unearned premiums and maintenance fees	36,516
Reinsurance premiums payable	253
Funds held under reinsurance treaties	11,112
Federal income tax payable	2,623
Other liabilities	4,507
Total liabilities	\$ 171,238

Purchase Price	45,167
Excess of net assets received over cost to acquire (1)	2,264

Total **\$ 218,669**

(1)

The fair value of net assets acquired exceeded the cost of acquisition. After review it was determined that no intangibles were acquired and that no assets should be reduced below their carrying value, which approximates fair value. Consequently, an extraordinary gain of \$2,264,000 was recognized in the period of the acquisition in accordance with SFAS No. 141, *Accounting for Business Combinations*.

The table below reflects the unaudited pro forma results of operations for the three-month period ended March 31, 2007 of the Company as if the acquisition had taken place on January 1, 2007 including estimated purchase accounting adjustments.

Investments

Available-For-Sale Fixed Maturities. Our entire fixed-income portfolio consists of investment grade securities rated A or higher from any of Standard and Poor's, Moody's or Fitch with the exception of one bond with a fair market value of approximately \$209,000. The following table reflects the composition of our fixed-income portfolio by security rating category of the issuer, as of March 31, 2008 (dollars in thousands). In cases where the rating agencies had a different rating assigned to a security, the classification in the table used the lower rating.

Rating Category	Fair Value	Percentage
AAA / Aaa	\$ 177,199	92%
AA / Aa	7,582	4%
A / A	6,776	4%
Non-investment grade	209	0%
Total	\$ 191,766	100%

Available-For-Sale Equity Securities. Our equity portfolio consists of \$11,614,000 in available-for-sale equity securities as of March 31, 2008. We account for equity securities as available for sale. We utilize two outside investment managers to manage our insurance segment's equity portfolio.

The amortized cost and estimated fair values of investments in fixed income and equity securities at March 31, 2008 are as follows (in thousands):

	Cost or	Gross	Gross	Estimated
March 31, 2008	Amortized	Unrealized	Unrealized	Fair

Corporate bonds	3,451	50	144	3,357

Edgar Filing: AMERICAN PHYSICIANS SERVICE GROUP INC - Form 10-Q

Total fixed maturities	190,134	4,630	2,998	191,766
Equity securities	12,080	620	1,086	11,614
Total fixed maturities and equity securities	\$ 202,214	\$ 5,250	\$ 4,084	\$ 203,380

The securities acquired as part of API were revalued to market value as of the date of the acquisition, April 1, 2007. Of our entire invested assets, including unrestricted cash, agency-backed mortgage obligations, with underlying collateral consisting of GNMA, FHLMC, or FNMA loans comprise 40% of our portfolio; non-agency collateralized mortgage obligations comprise 13% of our portfolio; 29% is comprised of U.S. Treasury, government agency bonds and notes, municipal tax exempt bonds and corporate bonds and the remaining 18% is cash, equities and other invested assets. The majority of the non-agency CMO s in our portfolio have underlying mortgages categorized as

Prime quality loans, and none of our CMO s have underlying mortgages classified as Subprime. However, as of March 31, 2008, within our portfolio there were eight CMO securities with collateral classified as Alternative-A or Alt-A. These Alt-A securities are generally considered to have underlying mortgages with underwriting characteristics that are stronger than Subprime mortgages but less stringent than Prime mortgages. All of our Alt-A securities are investment grade, currently rated either AAA, AA or A and have underlying mortgages with fixed interest rates.

Beginning with the three months ended September 30, 2007, we saw a significant and rapid decline in the market value of our Alt-A securities, particularly those with an A rating. In evaluating this decline, we considered the deepening national housing crisis and its potential effects on the underlying collateral and concluded that the decreases in value of our A rated Alt-A securities should be considered to be other than temporary as defined in SFAS 115, *Accounting for Certain Investments in Debt and Equity Securities*. The amount of the pretax charge to earnings associated with this adjustment for the three months ended March 31, 2008 was \$2,644,000. For the year ended December 31, 2007 the total pretax charge to earnings was \$4,566,000. Our total book value in Alt-A securities is \$6,395,000 as of March 31, 2008. While we have the ability to hold all of our Alt-A securities indefinitely, we continue to closely monitor and evaluate these securities and their underlying collateral.

During the three months ended March 31 2007, the Company recognized a \$423,000 impairment of its investment in Financial Industries Corporation (FIC) while no gains or impairment losses were recorded on this investment in 2008. On January 15, 2008, FIC announced that it had entered into an agreement and plan of merger pursuant to which Americo Life, Inc. will acquire FIC. Under the terms of the agreement, FIC shareholders will receive \$7.25 per share in cash. The total transaction is valued at \$74.7 million. The merger is subject to customary closing conditions, including shareholder and regulatory approvals. However, there can be no assurance that the transaction will be consummated on these or any other terms. Our policy in regards to our investment in FIC has been that we will record pretax charges to earnings should the common stock price on the last day of each interim or annual period fall below the adjusted cost basis of our investment in FIC. Since the basis in our investment in FIC common stock at March 31, 2008 was \$5.80 per share and since the stock's fair value at March 31, 2008 was \$6.50, no additional impairment charges have been recorded in 2008. We will continue to monitor and evaluate the situation at FIC including the pending merger.

Gross realized gains and losses on fixed maturity and equity securities included in the statement of operations for the three months ended March 31, 2008 and 2007 were as follows (in thousands):

Gross realized loss		(88)		(423)
Net realized gain (loss)	\$	(54)	\$	(413)
Total net realized gain (loss)	\$	(2,595)	\$	(414)

As a result of our acquisition of API, the Texas Department of Insurance (TDI) required that funds be set aside in an escrow account with a bank to remain until the aggregate remaining redemption obligation of our Series A redeemable preferred stock is less than the amount of the escrow balance, with no withdrawals to be made from this escrow account without prior approval from TDI. To satisfy this requirement, we maintain a fixed income security in escrow in the amount of \$2,500,000 paying 5% interest. This security is included in fixed maturities, available for sale.

At March 31, 2008, investments with a fair market value of \$1,425,000 were on deposit with state insurance departments to satisfy regulatory requirements and these securities are included in fixed maturities, available for sale.

6.

Cash Restricted

Cash Restricted represents cash deposits advanced from a customer for a trade claim transaction that has not closed by the end of the period. At the time of receipt, Cash Restricted and Accounts Payable are increased for an equal amount as no part of this cash is ours until the transaction closes.

7.

Reinsurance

Reinsurance Premiums Ceded. Under our primary medical professional liability reinsurance contract or excess of loss treaty, certain premiums are ceded to other insurance companies under the terms of the reinsurance agreement. These reinsurance agreements provide us with increased capacity to write additional risk and the ability to write specific risk within our capital resources and underwriting guidelines. The excess of loss treaty provides coverage for losses in excess of API's retention of \$250,000 on individual claims and beginning in 2002, \$350,000 on multiple insured claims related to a single occurrence. The 2006 reinsurance contract provides for these same terms with API retaining 10% of the risk above the aforementioned \$250,000 and \$350,000 retention levels. The 2007 reinsurance contract provides for the same terms with API retaining 20% of the risk above the \$250,000 and \$350,000 retention levels. The 2008 reinsurance contract provides for the same terms with API retaining 40% of the risk above the \$250,000 and \$350,000 retention levels. The reinsurance contracts for 2002 through 2008 contain variable premium ceding rates based on loss experience. The ceded premium charged under these contracts will depend upon the development of ultimate losses ceded to the reinsurers under their retrospective treaties. For the three months ended March 31, 2008 and 2007, we recorded favorable development to ceded premiums of \$2,718,000 and \$0, respectively, related primarily to prior year variable premium reinsurance treaties as a result of lower estimated ultimate loss and loss adjustment expenses for treaty years 2002 through 2005. The favorable development reflects reductions in our estimates of claim severity as a result of claim closures at less than reserved amounts. During the quarter ended March

31, 2008, we estimated our ceded accrual rate for the 2008 treaty year to be 14.5% of earned premium.

In addition to an adjustment to premiums ceded, estimates of ultimate reinsurance ceded premium amounts compared to the amounts paid on a provisional basis give rise to a balance sheet asset classified as Other Amounts Receivable Under Reinsurance Contracts or a balance sheet liability classified as Funds Held Under Reinsurance Treaties. Furthermore, each retrospective treaty requires a 24 or 36 month holding period before any premium adjustments or cash can be returned or paid. The ultimate settlement amount is not determined until all losses have been settled under the respective treaties. As of March 31, 2008, API had recorded a balance sheet asset, Other Amounts Receivable Under Reinsurance Contracts of \$107,000 and a balance sheet liability, Funds Held Under Reinsurance Treaties of \$5,311,000, which represent the differences between the estimates of ultimate reinsurance premiums ceded amounts for the 2002 through 2008 treaty years as compared to the amounts paid on a provisional basis.

Reinsurance Recoverables. Ceded reserves for loss and loss adjustment expenses are recorded as reinsurance recoverables. Reinsurance recoverables are the estimated amount of future loss payments that will be recovered from reinsurers, and represent the portion of losses incurred during the period that are estimated to be allocable to reinsurers. There are several factors that can directly affect the ability to accurately forecast the reinsurance recoverables. Many of the factors discussed in Note 8 related to the sensitivities of forecasting total loss and loss adjustment expense reserves also apply when analyzing reinsurance recoverables. Since API cedes excess losses above \$250,000 on individual claims and \$350,000 on multiple insured claims, the trends related to severity significantly affect this estimate. Current individual claims severity can be above or fall below API's retention level over the period it takes to resolve a claim.

Similar to the estimate for reserves, due to the long-tailed nature of the medical professional liability line of insurance, relatively small changes in the actuarial assumptions for trends, inflation, severity and frequency for projected ultimate loss and loss adjustment expense reserves can have a greater impact on the recorded balance for reinsurance recoverables than with most other property and casualty insurance lines. While we believe that our estimate for ultimate projected losses related to loss and loss adjustment expense is adequate based on reported and open claim counts, there can be no assurance that additional significant reserve enhancements will not be necessary in the future given the many variables inherent in such estimates and the extended period of time that it can take for claim patterns to emerge.

Reinsurance contracts do not relieve API from its obligations to policyholders. API continually monitors its reinsurers to minimize its exposure to significant losses from reinsurer insolvencies. Any amount found to be uncollectible is written off in the period in which the uncollectible amount is identified. As of March 31, 2008, all of API's reinsurance contracts were with companies in strong financial condition, and we believe there is no need to establish an allowance for uncollectible reinsurance recoverables. API has not experienced any material problems collecting from its reinsurers.

Unsecured reinsurance recoverables at March 31, 2008, that exceeded 10% of total reinsurance paid and unpaid loss and loss adjustment expenses are summarized as follows (in thousands):

	March 31,
Company Name	2008
Transatlantic Reinsurance	\$ 3,852
ACE Tempest Re USA	\$ 2,221
Swiss Reinsurance	\$ 9,160

Transatlantic Reinsurance, ACE Tempest Re USA and Swiss Reinsurance are A.M. Best rated A+ (Superior).

8.

Reserve for Loss and Loss Adjustment Expense

The reserve for unpaid losses and loss adjustment expenses represents the estimated liability for unpaid claims reported to us, plus claims incurred but not reported and the related estimated loss adjustment expenses. The reserve for losses and loss adjustment expenses is determined based on our actual experience, available industry data and projections as to future claims frequency, severity, inflationary trends and settlement patterns.

We write medical malpractice insurance policies which have a lengthy period for reporting a claim (tail coverage) and a long process of litigating a claim through the courts and whose risk factors expose our reserves for loss and loss adjustment expenses to significant variability. These conditions subject API's open reported claims and incurred but not reported claims to increases due to inflation, changes in legal proceedings and changes in the law. While the anticipated effects of inflation is implicitly considered when estimating reserves for loss and loss adjustment expenses, an increase in average severity of claims is caused by a number of factors. Future average severities are projected based on historical trends adjusted for changes in underwriting standards, policy provisions and general economic trends. Those anticipated trends are monitored based on actual experience and are modified as necessary to reflect any changes in the development of ultimate losses and loss adjustment expenses. These specific risks, combined with the variability that is inherent in any reserve estimate, could result in significant adverse deviation from our carried reserve amounts. Settlement of claims is subject to considerable uncertainty. We believe the reserves for loss and loss adjustment expenses are reasonably stated as of March 31, 2008.

We recorded \$7,509,000 for losses and loss adjustment expenses for the three months ended March 31, 2008, which included \$9,056,000 for the current accident year, reduced by \$1,547,000 of favorable development for prior report years. The favorable development was primarily the result of loss severity for the 2003 through 2005 report years developing favorably compared to prior period estimates. In addition, the total number of claims closed with indemnity for these report years were less than prior estimates.

9.

Contingencies

We are involved in various claims and legal actions that have arisen in the ordinary course of business. We believe that any liabilities arising from these actions will not have a significant adverse affect on our financial condition or results of operations.

10.

Earnings Per Share

Basic earnings per share are based on the weighted average shares outstanding without any dilutive effects considered. Diluted earnings per share reflect dilution from all contingently issuable shares, such as options. A reconciliation of income and weighted average shares outstanding used in the calculation of basic and diluted income per share from operations follows:

	Three Months	
	Ended	
(in thousands except share data)	March 31,	
	2008	2007
Numerator for basic and diluted income per common share:		
Net income (loss)	\$ 3,380	\$ (95)
Denominator:		
Denominator for basic income per common share -		
weighted average shares outstanding	7,188	2,822
Effect of dilutive stock options and awards	109	-
Denominator for basic income per common share -		
adjusted weighted average shares outstanding	7,297	2,822
Net income (loss) - basic	\$ 0.47	\$ (0.03)
Net income (loss) - diluted	\$ 0.46	\$ (0.03)

11.

Segment Information

The Company's segments are distinct by type of service provided. Comparative financial data for the three month periods ended March 31, 2008 and 2007 are shown as follows:

	Three Months Ended	
	March 31,	
	2008	2007
Operating Revenues		
Insurance services	\$ 17,186	\$ 3,657
Financial services	1,929	5,387
All other	593	(157)
Total segment revenues	\$ 19,708	\$ 8,887
Reconciliation to Consolidated Statements of Operations:		
Total segment revenues	19,708	8,887
Less: intercompany dividends	(76)	-
Total revenues	\$ 19,632	\$ 8,887
Operating Income (Loss):

Insurance services	\$	196
Financial services		19
All other		188
	\$	403

12.

Stock-Based Compensation

We use the Black-Scholes-Merton option-pricing model to determine the fair value of stock-based awards. For the three months ended March 31, 2008, we recorded compensation cost related to stock options of \$155,000 and a related reduction in income taxes of \$54,000. The compensation cost is the total fair value, at date of grant, of stock options that vested during the three month period. No compensation costs were capitalized in the three month period ended March 31, 2008.

During the three months ended March 31, 2008, 32,000 options were exercised with an intrinsic value of \$323,000. We received cash proceeds of \$84,000 and \$209,000 in value through cashless exchanges for these options exercised during the first quarter. Also as of March 31, 2008, there was \$863,000 of total unrecognized compensation cost related to non-vested shares under our 2005 Incentive and Non-Qualified Stock Option Plan ("2005 Stock Option Plan"), which is expected to be recognized over a weighted-average period of 1.5 years.

The 2005 Stock Option Plan provides for the issuance of up to 650,000 shares of common stock to our directors and key employees. A total of 645,000 of these options have been granted as of March 31, 2008 and 5,000 are available for grants. Of those granted, 19,000 shares have been exercised, 360,000 options are exercisable and 267,000 are not yet exercisable. Our previous plan, the 1995 Incentive and Non-Qualified Stock Option Plan, provided for the issuance of 1,600,000 shares of common stock to our directors and key employees. All of the approved options have been granted as of March 31, 2008, 1,286,000 shares have been exercised, 155,000 shares are exercisable and 159,000 options have been canceled. Upon the exercise of an option, we issue the shares from our authorized, but unissued, shares.

No stock options were granted for the three months ended March 31, 2008. Presented below is a summary of the stock options held by our employees and our directors and the related transactions for the three months ended March 31, 2008.

Three Months Ended	
March 31, 2008	
Shares	Weighted
	Average

		Exercise	
			Price
Balance at January 1	813,000	\$	14.24
Options granted	-		-
Options exercised	32,000		9.15
Options forfeited/expired	-		-
Balance at March 31	781,000	\$	14.45
Options exercisable	515,000	\$	12.72

The following table summarizes our outstanding and exercisable options at March 31, 2008:

Stock Options Outstanding				Stock Options Exercisable			
Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value (1)	Average Remaining Contractual Life	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value (1)	Average Remaining Contractual Life
781,000	\$ 14.45	\$ 4,212,000	3.2 yrs.	515,000	\$ 12.72	\$ 3,663,000	2.7 yrs.

(1)

Based on the \$19.84 closing price of our stock at March 31, 2008.

13.

Secondary Stock Offering

On June 19, 2007, we announced that our public offering of 2,100,000 shares of common stock had priced at \$16.50 per share. Of the shares offered, 2,000,000 were offered by us, and Kenneth S. Shifrin, our Chairman of the Board and Chief Executive Officer, offered 100,000 of the 582,554 shares he owned at that date.

Pursuant to the secondary offering, the underwriters of the offering were granted a 30-day period to exercise an option to purchase up to 315,000 additional common shares from us. On July 12, 2007 we announced that the underwriters had exercised their over-allotment option to purchase all of these additional shares of common stock at the public offering price of \$16.50 per share.

Total common shares outstanding increased from approximately 6,819,000 before the sale of the over-allotment option to approximately 7,134,000 afterwards.

Net proceeds received by us from the secondary offering, including the over-allotment, were approximately \$35,000,000 after deducting underwriting, legal, accounting, and publication fees. Of this total, we contributed \$10,000,000 to API to strengthen its capacity to underwrite insurance risks. The balance of the proceeds has been invested primarily in U.S. government and U.S. government agency securities and is available for general corporate purposes including possible acquisitions.

14.

Mandatorily Redeemable Preferred Stock

In conjunction with the acquisition of API we issued 10,198 shares of Series A redeemable preferred stock, par value \$1.00 per share, from the 10,500 shares authorized. Holders of Series A redeemable preferred stock are entitled to cumulative dividends thereon at the rate of three percent (3%) per annum payable on the remaining redemption value per share, in priority to the payments of dividends on the common shares. Holders of our Series A redeemable preferred stock have no preemptive rights and have the same voting rights as the holders of our common stock. The shares are non-certificated and mandatorily redeemable. They will be redeemed ratably at not less than \$1,000,000 per year, with all remaining outstanding shares being redeemed by December 31, 2016. In June 2007, 1,019 shares of our Series A redeemable preferred stock were redeemed for \$1,058,000, which included accrued dividends of \$40,000. In the event of any liquidation, the holders of our Series A redeemable preferred stock receive an amount equal to the remaining redemption value before any distribution is made to the holders of our common stock.

Pursuant to Financial Accounting Standards Board (FASB) Statement No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity* (FASB No. 150), an issuer is required to classify an instrument as a liability if it is issued in the form of shares that are mandatorily redeemable if it embodies an unconditional obligation that requires the issuer to redeem the shares by transferring the entity's assets at a specified or determinable date(s) or upon an event that is certain to occur. The preferred stock's mandatory cash redemption feature coupled with a fixed redemption date and fixed amount requires that it be classified as debt, rather than equity. In addition, the preferred stock dividend has been classified as interest expense. As of March 31, 2008, the fair market value of the Series A redeemable preferred stock was \$8,658,000, based on the outstanding balance of \$9,169,000 discounted at 5.35%.

15.

Minority Interest

The 3% minority interest in Asset Management, a subsidiary within our financial services segment, owned by key individuals within Asset Management, was repurchased by APS Investment Services in the quarter ended September 30, 2007 for a nominal amount.

16.

Income Taxes

The provision for income taxes is based on amounts reported in the statements of income after exclusion of nontaxable income such as interest on state and municipal securities. Also, certain items of income and expenses are recognized in different time periods for financial statement purposes than for income tax purposes. Thus, provisions for deferred taxes are recorded in recognition of such temporary differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. The Company and its subsidiaries file a consolidated federal income tax return. Consolidated income tax expense is allocated on the basis of each company's income adjusted for permanent differences.

On January 1, 2007, the Company adopted the provision of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48) which clarifies the accounting for uncertainty in income taxes recognized in financial statements in accordance with Statement No. 109, *Accounting for Income Taxes* (SFAS 109). The Company does not believe it has any unrecognized tax benefits included in its consolidated financial statements. The Company has not recognized any interest or penalties in the consolidated financial statements, nor has it recorded an accrued liability for interest or penalty payments.

Our effective income tax rate for the three months ended March 31, 2008 and the three months ended March 31, 2007 was approximately 36.2% and approximately (33.8%), respectively.

17.

Fair Value Measurements

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS 157, *Fair Value Measurements*. SFAS 157 provides enhanced guidance for using fair value to measure assets and liabilities. Under the standard, fair value refers to the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts its business. SFAS 157 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, SFAS 157 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy. Our assessments with respect to assumptions

that market participants would make are inherently difficult to determine and use of different assumptions could result in material changes to these fair value measurements. Effective January 1, 2008, the Company adopted the provisions of SFAS 157 as it relates to financial assets and financial liabilities. The adoption of SFAS 157 did not have a material effect on our results of operations, financial position or liquidity.

Fair value is used on a recurring basis for our equity and fixed maturity, available for sale securities in which fair value is the primary basis of accounting. Fair value for these securities is the market value based on quoted market prices, when available (Level 1) or quoted prices for similar assets or liabilities in active markets or market prices obtained from third-party pricing services for identical or comparable assets (Level 2). Certain assets and liabilities are not actively traded in observable markets with listed prices or quotes and we must use alternative valuation techniques based on independent dealer quotes on the security and our own assumptions and professional judgment to derive a fair value measurement (Level 3). In these instances when significant valuation assumptions are not readily observable in the market, instruments are valued based on the best available data to approximate fair value. This data would consider a risk premium that a market participant would require. We use prices and inputs that are current as of the measurement date, including periods of market dislocation. Typically, during periods of market dislocation, the observability of prices and inputs may be reduced for the instruments we hold. This condition could cause an instrument to be reclassified from Level 1 to Level 2 or Level 2 to Level 3 during any given period.

The following table presents the estimated fair value of our financial instruments as of March 31, 2008 measured at fair value on a recurring basis (in thousands):

<u>Description</u>	March 31, 2008	Fair Value Measurements at March 31, 2008 Using:		
		Quoted prices in active markets for identical assets Level 1	Significant other ob- servable inputs Level 2	Significant other unob- servable inputs Level 3
Financial Assets:				
Fixed income securities, available for sale	\$ 191,766	\$ 12,493	\$ 172,366	\$ 6,907
Equity securities, available for sale	11,614	11,614	-	-
Total	\$ 203,380	\$ 24,107	\$ 172,366	\$ 6,907

A reconciliation of the beginning and ending balances of our financial instruments for fair value measurements made using significant unobservable inputs (Level 3) follows (in thousands):

	Fixed Maturity Securities, Available for Sale
Balance, January 1, 2008	\$ 11,867
Total gains or losses realized/unrealized:	
Included in earnings (or changes in net assets)	(2,581)
Included in other comprehensive income	(169)
Purchases, issuances, and settlements	(2,210)
Transfers in and/or out of Level 3	-
Balance, March 31, 2008	\$ 6,907

The amount of total gains or losses for the period included in earnings attributable to the change in unrealized gains or losses relating to assets still held at March 31, 2008	\$ (2,644)
--	------------

Gains and losses (realized and unrealized) included in earnings for the period are reported in net realized investment gains (losses) as follows:

Total gains or losses included in earnings for the period (above)	\$ (2,585)
Change in unrealized gains or losses related to assets still held at March 31, 2008	\$ (151)

In estimating the fair values for our equity securities and U.S. Treasury fixed maturity securities, since there is an active, readily tradable market value based on quoted prices, we base our estimates on such prices (Level 1 pricing) as of March 31, 2008, or the measurement date. Active markets are those in which transactions occur in significant frequency and volume to provide pricing information on an on-going basis. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant degree of judgment.

For Level 2 pricing if quoted market prices in active markets are not available on the securities we own, fair values are based on the market prices of similar instruments or are estimated using independent pricing services where valuations

are based on industry-standard models such as matrix pricing. Level 2 pricing includes our fixed maturity securities that are valued by our independent pricing service using proprietary models or valuation methodologies. Since fixed maturities other than U.S. treasury securities and certain government obligations do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities based on market inputs including, but not limited to, benchmark curves, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, quoted forward prices, time value, volatility factors, current market and contractual prices for the underlying instrument, and industry news and economic events. The extent of the use of each market input depends on the asset class and the market conditions.

Valuations of fixed maturity securities obtained from independent pricing services are reviewed for reasonableness based upon the specifics of the security, including class, maturity, credit rating, durations, collateral, and comparable markets for similar securities. We may adjust the valuation of securities from these independent pricing services when we believe their pricing does not fairly represent the market value of the investment. When market observable data is not as readily available or if the security trades in an illiquid market, the valuation of financial instruments becomes more subjective and could involve substantial judgment resulting in Level 3 pricing. For example, this may occur in the valuations provided by independent pricing services in their pricing of certain mortgage-backed securities, including our Alt-A securities. The pricing of these securities can be influenced by specific characteristics such as the overall structure of the instrument; default rates; demographic and geographic characteristics of the underlying mortgages; support levels; loan to value ratios; and other specific factors underlying these investments. In order to reflect the fair market value for these securities, we evaluate independent pricing and may adjust these prices based on independent dealer quotes and/or the judgment of the securities professionals in our financial services segment. As of March 31, 2008, we have adjusted all but our one remaining triple AAA Alt-A securities to lower market values from that indicated by independent pricing services based on indications from dealers which we believe is more reflective of the current sales price of these securities and the ultimate realizable value and accordingly, these securities are included in Level 3 pricing. For three months ended March 31, 2008, we recognized \$2,644,000 of realized losses based on Level 3 pricing assumptions on our remaining A-rated Alt-A securities. As March 31, 2008, our AA-rated and A-rated Alt-A portfolio based on level 3 pricing assumptions approximates only 2.0% of our total investment portfolio, including unrestricted cash. See Note 4 to the financial statements included herein for additional discussion regarding our Alt-A write-down.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

For purposes of this Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A), APS, we, our, us and the Company refer to American Physicians Service Group, Inc., together with its subsidiaries, unless the context requires otherwise. The following MD&A should be read in conjunction with the accompanying consolidated financial statements for the three months ended March 31, 2008, included in Part I, Item 1, As well as the audited, consolidated financial statements and notes in our Annual Report on Form 10-K for the year ended December 31, 2007, which was filed with the United States Securities and Exchange Commission (the SEC) on March 13, 2008.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This quarterly report contains forward-looking statements within the meaning of Section 27A of the Securities Act, Section 21E of the Exchange Act and the Private Securities Litigation Reform Act of 1995, about the Company that are subject to risks and uncertainties. All statements other than statements of historical fact included in this document are forward-looking statements.

You can identify forward-looking statements by the use of words such as may, target, should, could, estimate, predicts, potential, continue, anticipates, projects, forecasts, believes, plans, expects, future and similar expressions which are intended to identify forward-looking statements. Forward-looking statements are based on beliefs and assumptions made by management using currently available information, such as market and industry materials, experts' reports and opinions and trends. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements. In evaluating forward-looking statements, you should carefully consider the risks and uncertainties referenced in Risk

Factors in Part II, Item IA. All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements and risk factors contained in this quarterly report. Forward-looking statements contained in this quarterly report reflect our view only as of the date of this report. We do not have any obligation, other than as required by law, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

The following important factors, in addition to those referenced under Risk Factors in Part II, Item 1A, could affect the future results of our operations and could cause those results to differ materially from those expressed in or implied by such forward-looking statements:

general economic conditions, either nationally or in our market area, that are worse than expected;

changes in the healthcare industry;

regulatory and legislative actions or decisions that adversely affect our business plans or operations;

inflation and changes in the interest rate environment, the performance of financial markets and/or changes in the securities markets;

uncertainties inherent in the estimate of loss and loss adjustment expense reserves and reinsurance; changes in the availability or cost of reinsurance;

significantly increased competition among insurance providers;

potential losses and litigation risk associated with our financial services businesses;

loss of key executives, personnel, accounts or customers;

our ability to renew our existing reinsurance or obtain new reinsurance; and

failure of our reinsurers to pay claims in a timely manner.

The foregoing factors should not be construed as exhaustive and we caution you not to place undue reliance on forward-looking statements, which speak only as of the date of this quarterly report. In addition to any risks and uncertainties specifically identified in the text surrounding forward-looking statements, you should consult with our other filings under the Securities Act of 1933 and the Securities Act of 1934, for factors that could cause our actual results to differ materially from those presented.

Business Overview

We provide (1) insurance services, specifically medical professional liability insurance in Texas and (2) financial services, including brokerage and investment services to individuals and institutions.

Insurance Services. We provide medical professional liability insurance primarily in Texas, where our insurance subsidiary, API, has written business for over 30 years. API is authorized to do business in the States of Texas, Arkansas and Oklahoma and specializes in writing medical professional liability insurance for physicians, dentists and other healthcare providers. We became authorized to do business in Oklahoma during the three month period ended September 30, 2007. API currently insures approximately 4,975 physicians, dentists, and other healthcare providers, the vast majority of which are in Texas. Approximately 97% of API's premiums are written through purchasing groups, which in Texas currently subjects us to less stringent state regulation of premium rates and policy forms. Historically, we operated as the attorney-in-fact manager for API since 1975. In April 2007, we acquired API, thus combining our insurance management experience with an insurance underwriting entity to allow for the increased possibility for expansion into new markets and to assist our efforts for continued growth in existing markets.

Financial Services. We provide investment and investment advisory services to institutions and individuals throughout the United States through the following subsidiaries:

o

APS Financial. APS Financial is a fully licensed broker/dealer that provides brokerage and investment services primarily to institutional and high net worth individual clients. APS Financial also provides portfolio accounting, analysis and other services to insurance companies, banks and public funds. We recognize commission revenue, and the related compensation expense, on a trade date basis.

o

APS Capital. APS Capital is dedicated to the clearing and settlement of trades involving non-securities including syndicated bank loans, trade claims and distressed private loan portfolios. We seek to develop business with clients who trade in distressed markets. We recognize commission revenue, and the related compensation expense, when the transaction is complete and fully funded.

o

APS Asset Management. APS Asset Management, a registered investment adviser under the Investment Advisers Act of 1940, manages fixed income and equity assets for institutional and individual clients on a fee basis. We recognize fee revenues monthly based on the amount of funds under management.

Recent Transactions

Acquisition. On April 1, 2007, we acquired all of the issued and outstanding stock of API. The business combination is being accounted for using the purchase method of accounting and, accordingly, the purchase price has been allocated to assets acquired and liabilities assumed based on fair values at the date of acquisition. The total purchase price was \$45,167,000 and consisted of consideration of 1,982,499 shares of the Company's common stock, valued at a per share price of \$17.635, or \$34,961,000 in aggregate, \$35,000 in cash paid in lieu of fractional shares of common stock, 10,197.95 shares of preferred stock valued at \$9,179,000, plus costs to complete the acquisition of \$992,000. We are required to redeem at least \$1 million of the preferred stock each calendar year beginning in 2007, until December 31, 2016, at which time all of the preferred stock must have been redeemed. The preferred stock has a cumulative dividend equal to 3% of the outstanding redemption value per year. On June 1, 2007, we made the first required payment, redeeming 10% of the preferred shares outstanding and paying the dividend.

Secondary Stock Offering. On June 19, 2007 we announced that our public offering of 2,100,000 shares of common stock had priced at \$16.50 per share. Of the shares offered, 2,000,000 were offered by us, and Kenneth S. Shifrin, our Chairman of the Board and Chief Executive Officer, offered 100,000 of the 582,554 shares he owned at that date.

The underwriters of the offering were granted a 30-day period to exercise an option to purchase up to 315,000 additional common shares from APS. On July 12, 2007, we announced that the underwriters had exercised their over-allotment option to purchase all of these additional shares of common stock at the public offering price of \$16.50 per share. Total common shares outstanding rose from approximately 6,819,000 before the sale of the over-allotment option to approximately 7,134,000 afterwards.

Net proceeds received by the Company from the secondary offering, including the over-allotment, were approximately \$35,000,000 after subtracting underwriting, legal, accounting and publication fees. Of this total, we contributed \$10,000,000 to API to strengthen its capacity to underwrite insurance risks. The balance of the proceeds has been invested primarily in U.S. government and U.S. government agency securities and is available for general corporate purposes including possible acquisitions.

Critical Accounting Policies and Estimates

Except for the following critical accounting policy related to the adoption of SFAS 157, effective January 1, 2008, the accounting policies considered by management to be critically important in the preparation and understanding of the financial statements and related disclosures are presented in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of our Annual Report on Form 10-K for the year ended December 31, 2007.

Fair Value Measurements. In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS 157, *Fair Value Measurements*. SFAS 157 provides enhanced guidance for using fair value to measure assets and liabilities. Under the standard, fair value refers to the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts its business. SFAS 157 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, SFAS 157 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy.

Effective January 1, 2008, we adopted SFAS 157, *Fair Value Measurements*, for our financial assets and financial liabilities, but have not yet adopted SFAS 157 as it relates to nonfinancial assets and liabilities based on the February 2008 issuance of FASB Staff Position 157-2, *Effective Date of FASB Statement No. 157*, which permits a one-year deferral of the application of SFAS No. 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008. The adoption of SFAS 157 as it pertains to financial assets and liabilities did not have a material impact on our results of operations, financial position or liquidity. We will adopt FAS 157 for non-financial assets and non-financial liabilities on January 1, 2009 and do not expect the provisions to have a material effect on its results of operations, financial position or liquidity. For additional disclosures, see Note 17, *Fair Value Measurements*.

The standard describes three levels of inputs that may be used to measure fair value:

Level 1

Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2

Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3

Valuations are developed from unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

When determining the fair value measurements for assets and liabilities required or permitted to be recorded at and/or marked to fair value, we consider the principal or most advantageous market in which it would trade and consider assumptions that market participants would use when pricing the asset or liability. When possible, we look to active and observable markets to price identical assets or liabilities. When identical assets and liabilities are not traded in active markets, we look to market observable data for similar assets and liabilities, independent industry-standard models such as matrix pricing and independent, third-party dealer quotes whose inputs may be less observable than Level 1 pricing. When market observable data is not as readily available, the valuation of financial instruments becomes more subjective and could involve substantial judgment. Certain assets and liabilities are not actively traded in observable markets and the Company must use alternative valuation techniques to derive a fair value measurement. See Note 17 included herein to the unaudited financial statements as of and for the period ending March 31, 2008 for additional discussion regarding the adoption of SFAS 157.

Unaudited Pro Forma Condensed Consolidated Financial Information

We are providing the following unaudited pro forma condensed consolidated financial statements to present a picture of the results of operations of the combined company after giving effect to our acquisition of API, absent any operational or other changes, had API's and our businesses been combined for the periods and at the dates indicated. The pro forma condensed consolidated statements of operations for the three months ended March 31, 2007 are presented as if the API acquisition occurred on January 1, 2007. The unaudited pro forma condensed consolidated financial statements were prepared using the purchase method of accounting. We recognized equity compensation costs of approximately \$1.2 million related to our acquisition of API in the three months ended March 31, 2007, which resulted in a one-time decrease in net income for those three months.

The pro forma adjustments are based upon available information and assumptions that we believe are reasonable. The unaudited pro forma condensed consolidated financial statements are presented for illustrative purposes only and are based on the estimates and assumptions set forth in the notes accompanying these statements, which should be read in conjunction with these unaudited pro forma condensed consolidated financial statements. The companies may have performed differently had they always been combined. You should not rely on this information as being indicative of the historical results that would have been achieved had the companies always been combined or the future results that the combined company will experience. The unaudited pro forma condensed consolidated financial information is not comparable to our historical financial information due to the inclusion of the effects of the API acquisition. The unaudited pro forma condensed consolidated financial statements and the related notes thereto should be read in conjunction with the unaudited consolidated financial statements of the Company for the three months ended March 31, 2007, and the related notes thereto and other information included herein. The unaudited financial statements of API for the three months ended March 31, 2007 are included in the Form S-1 filed by the Company dated June 19, 2007.

Notes to Unaudited Pro Forma Condensed

Consolidated Financial Statements

1.

Basis of Presentation

The accompanying unaudited pro forma statements of operations present the pro forma effects of our acquisition of API through the issuance of common and preferred shares of our stock. The statement of operations for the three months ended March 31, 2007 is presented as though the acquisition occurred on January 1, 2007.

2.

Method of Accounting for the Acquisition

We accounted for the acquisition using the purchase method of accounting for business combinations. We were deemed to be the acquirer for accounting purposes based on a number of factors determined in accordance with GAAP. The purchase method of accounting requires that API's assets acquired and liabilities assumed by us be recorded at their estimated fair values.

3.

Adjustments to Historical Financial Statements for Comparability

Following the acquisition, we are primarily an insurance company and, accordingly, we have reclassified our statement of operations in the unaudited pro forma financial information to conform to GAAP as applied to insurance companies.

4.

Pro Forma Adjustments Related to the Acquisition

Pursuant to our acquisition of API, API became a wholly owned subsidiary of the Company.

At the effective time of the acquisition, April 1, 2007, each share of common stock of API was converted into, and exchanged for, the right to receive the number of shares of our common stock based upon an exchange ratio equal to a purchase price of \$39 million minus the \$9,179,000 agreed-upon present value of the payments authorized by the Texas Department of Insurance that must be made by us to comply with the mandatory redemption features of the API Series A redeemable preferred stock in exchange for the API refundable deposit certificates, divided by \$17.28, divided by the 10,000,000 shares of API common stock. The \$17.28 price was the average closing price of our common shares for the twenty trading days immediately preceding the closing. According to the terms of the merger agreement for the acquisition, the value of our common stock issued in the acquisition was subject to adjustment upwards or downwards by up to 15% based on the closing price of our common shares for the twenty trading days immediately preceding the effective date of the acquisition.

Each share of Series A redeemable preferred stock of API was converted into the right to receive one share of our Series A redeemable preferred stock. The shares of our common stock and Series A redeemable preferred stock issued in the acquisition were subject to a 180-day lock-up period in which the holders of such shares were prohibited from transferring their shares. This lock-up period expired on September 28, 2007.

The purchase accounting and pro forma adjustments related to unaudited pro forma balance sheet and statements of operations as a result of the acquisition are as follows:

(a)

Records the elimination of the revenue component of management fee and sub-producer commissions by the Company, the management fee expense by API and the sub-producer expenses by the Company for the three months ended March 31, 2007.

(b)

Records the elimination of intercompany revenue by APS Investment Services for investment trading fees for managing API's fixed income investment portfolio and records related other comprehensive income at API, change in amortization of bond premium and tax expense. The net effect on retained earnings is \$193,000 for the three months ended March 31, 2007.

(c)

Records commissions expense incurred by API that is currently reimbursed by the Company. There is no reimbursement following the acquisition. The reimbursement was eliminated in our financial statements.

(d)

Reclassifies the salaries, marketing, professional fees and general administrative expenses of the attorney-in-fact

(e)

Records the 3% per annum dividend on our Series A redeemable preferred stock and the imputed interest from recording the liability at fair value.

Results of Operations

With the acquisition of API on April 1, 2007, our consolidated revenue and earnings are now predominately derived from medical professional liability insurance provided through our Insurance Services segment. Prior to April 1, 2007, the historical results of operations of our Insurance Services segment were determined by the management fees we received from API pursuant to a management agreement and the expenses incurred in managing API's operations such as personnel expenses, rent, office expenses and technology costs. The management agreement obligated API to pay management fees to us based on API's earned premiums before payment of reinsurance premiums. The management fee percentage was 13.5% of API's earned premiums. In addition, any pre-tax profits of API were shared equally with us (profit sharing) so long as the total amount of profit sharing did not exceed 3% of earned premiums. When we acquired API, our management agreement with API was terminated and our consolidated results of operations are no longer affected by management fees from API; but, rather our results of operations are now directly affected by premiums API earns from the sale of medical professional liability insurance, investment income earned on assets held by API, insurance losses and loss adjustment expenses relating to the insurance policies API writes as well as commissions and other insurance underwriting and policy acquisition expenses API incurs.

The following table sets forth selected historical financial and operating data for the Company. Our results of operations for the three months ended March 31, 2008 and 2007 includes the historical financial and operating results of the Company prior to and subsequent to the acquisition of API on April 1, 2007. The selected income statement data below for the three months ended March 31, 2008 and 2007, is derived from our consolidated unaudited financial statements which management believes incorporate all of the adjustments necessary for the fair presentation of the financial condition and results of operations for such periods. Equity compensation expense of approximately \$1,200,000 related to our acquisition of API is included in three months ended March 31, 2007 results from operations. Actual financial results through March 31, 2008 may not be indicative of future financial performance. Certain Non-GAAP financial measures are included in the underwriting ratio section table below as these ratios represent insurance industry-specific financial performance measures.

For comparative purposes, we have also included on a pro forma basis the results of operations for the three months ended months ended March 31, 2007 of the Company and API as if the acquisition had occurred on January 1, 2007. Any reference in the MD&A Section below to on a pro forma basis is as if the Company acquired API on January 1, 2007.

(1) Loss ratio is defined as the ratio of losses and loss adjustment expenses to net premiums and maintenance fees earned.

(2) Expense ratio is defined as the ratio of other underwriting expenses and net change in deferred acquisition costs to net premiums and maintenance fees earned.

(3) Combined ratio is the sum of the loss ratio and the expense ratio.

(4) Ratios for Actual 2007 are not applicable since the acquisition of API occurred on April 1, 2007.

The discussion that follows should be read in connection with the unaudited Condensed Consolidated Financial Statements and Notes thereto included elsewhere in this report. For additional information regarding the pro forma results of operations of the Company and API had the transaction occurred on January 1, 2007, respectively, please see Note 4 to the Unaudited Financial Statements.

Three Months Ended March 31, 2008 Compared to Three Months Ended March 31, 2007

Actual

Revenues increased \$10,745,000 (121%) to \$19,632,000 from \$8,887,000 for the three months ended March 31, 2008 compared to the same three month period for 2007. Our income from operations increased \$5,443,000 to \$5,298,000 from \$(145,000) for current year three month period compared to 2007. Our net income increased \$3,475,000 to \$3,380,000 from \$(95,000) for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007. Lastly, our diluted net income per share increased \$0.49 to \$0.46 for the three months ended March 31, 2008 from \$(0.03) for the three months ended March 31, 2007.

Pro forma

Pro forma revenues decreased \$3,528,000 (15%) to \$19,632,000 from \$23,160,000 for the three months ended March 31, 2008 compared to the three months ended March 31, 2007. Our income from operations increased \$1,898,000 (56%) to \$5,298,000 from \$3,400,000 for the current three month period in 2008 compared to the same period for 2007. Our net income increased \$1,122,000 (50%) to \$3,380,000 from \$2,258,000 for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007. Diluted net income per share was \$0.46 for the three months ended March 31, 2008 and 2007, respectively.

The explanations for these changes are described below.

Gross Premiums and Maintenance Fees Written

Actual

Gross premiums and maintenance fees written increased to \$14,736,000 from \$0 for the three months ended March 31, 2008 as compared to the three month period ended March 31, 2007 as a result of the acquisition of API on April 1, 2007.

Pro forma

On a pro forma basis, gross premiums and maintenance fees written decreased \$730,000 (5%) to \$14,736,000 from \$15,466,000 for the three month ended March 31, 2008 as compared to the same period in 2007. The decrease in gross premiums and maintenance fees written was the result of price declines due to soft market conditions offset by increases in the number of policyholders to 4,975 at March 31, 2008 from 4,781 at March 31, 2007.

Premiums Ceded

Actual

Premiums ceded decreased to \$1,395,000 from \$0 for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007 as a result of the acquisition of API on April 1, 2007.

Pro forma

On a pro forma basis, premiums ceded expenses decreased \$3,802,000 to \$1,395,000 from (\$2,407,000) for the three months ended March 31, 2008 as compared to the same period in 2007. The reinsurance contracts beginning in 2002 through 2008 are variable premium treaties that have various minimum and maximum rates. The actual premium rate will depend upon the ultimate losses ceded to the reinsurer under the related treaty. We, supported periodically by outside consulting actuarial reviews, continually monitor the development of claims subject to reinsurance and adjust premiums ceded for estimated profit sharing provisions based on claims development in the reinsurance layers. The pro forma decrease in premiums ceded of \$3,802,000 is primarily the result of lower estimated ceding rates due to lower estimated loss and loss adjustment expenses for prior treaty years 2002 through 2005. This prior year favorable development in the reinsurance layer resulted in us recognizing \$2,718,000 as a reduction to ceded premiums for the three months ended March 31, 2008. We did not recognize any prior year favorable development for the three months ended March 31, 2007. Additionally, ceded premiums decreased year over year due to the Company retaining 40% of any claim in excess of \$250,000 on individual claims and \$350,000 on multiple insured claims for the 2008 reinsurance treaty. We retained 20% of any excess on the 2007 treaty. We are retaining this additional risk in the reinsurance layer based on decreases in claims and coverage limits since the passage of tort reform legislation in Texas in 2003. In addition, ceded premiums are lower for the current period due to lower earned premiums for the first quarter of 2008 as compared to 2007.

Net Premiums and Maintenance Fees Earned

Actual

Net premiums and maintenance fees earned increased to \$17,354,000 from \$0 for the quarter ended March 31, 2008 as compared to the first quarter of 2007 as a result of the acquisition of API on April 1, 2007.

Pro forma

On a pro forma basis, net premiums and maintenance fees earned increased by \$1,043,000 (7%) to \$17,354,000 from \$16,311,000 for the three months ended March 31, 2008 as compared to the same period in 2007. While written premiums and maintenance fees were down \$730,000 year over year primarily due to rate decreases, the aforementioned favorable development for the prior years reinsurance treaties contributed to the increase in net earned amounts.

Investment Income

Actual

Investment income, net of investment expenses increased by \$2,722,000 (815%) to \$3,056,000 from \$334,000 for the quarter ended March 31, 2008 as compared to the quarter ended March 31, 2007 as a result of a substantial increase in invested assets resulting from the acquisition of API on April 1, 2007 and from capital received from our common stock offering in June 2007.

Pro forma

On a pro forma basis, investment income, net of investment expenses, increased by \$956,000 (46%) to \$3,056,000 from \$2,100,000 for the three months ended March 31, 2008 as compared to the same period for 2007. On a pro forma

basis, cash and invested assets increased by \$43,842,000 (23%) to \$234,033,000 at March 31, 2008 from \$190,191,000 at March 31, 2007 resulting in the increase in investment income. In addition, the increase in invested assets resulted primarily from the use of proceeds of our common stock offering as well as from positive net cash flow from operating activities.

Realized Capital Gains (Loss)**Actual**

Realized capital losses increased \$2,181,000 to \$2,595,000 from \$414,000 for the three months ended March 31, 2008 as compared to the same period in 2007 primarily as a result of other than temporary impairment losses incurred during the current quarter on Alt-A collateralized mortgage-backed securities.

Of our entire invested assets, including unrestricted cash, agency-backed mortgage obligations, with underlying collateral consisting of GNMA, FHLMC, or FNMA loans comprise 40% of our portfolio; non-agency collateralized mortgage obligations comprise 13% of our portfolio; 29% is comprised of U.S. Treasury, government agency bonds and notes, municipal tax exempt bonds and corporate bonds and the remaining 18% is cash, equities and other invested assets. The majority of the non-agency CMOs in our portfolio have underlying mortgages categorized as Prime quality loans, and none of our CMOs have underlying mortgages classified as Subprime. However, within our portfolio at March 31, 2008 there were eight CMO securities with collateral classified as Alternative-A or Alt-A. These Alt-A securities are generally considered to have underlying mortgages with underwriting characteristics that are stronger than Subprime mortgages but less stringent than Prime mortgages. All of our Alt-A securities are investment grade, currently rated either AAA, AA or A.

Beginning with the three months ended September 30, 2007, we saw a significant and rapid decline in the market value of our Alt-A securities, particularly those with an A rating. In evaluating this decline, we considered the deepening national housing crisis and its potential effects on the underlying collateral and concluded that the decreases in value of our A rated Alt-A securities should be considered to be other than temporary as defined in Statements of Financial Accounting Standards No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. The amount of the pretax charge to earnings associated with this adjustment for the three months ended March 31, 2008 was \$2,644,000. There was no adjustment made for the three months ended March 31, 2007. In November 2007, we sold one of the AA rated Alt-A securities with a book value of approximately \$1,100,000 and recorded a modest loss. In January 2008, we sold two AAA rated Alt-A securities with a book value of approximately \$2,100,000. We recognized a modest gain on the sale of these securities. Our total book value in Alt-A securities was \$6,395,000 as of March 31, 2008. In April 2008, we sold the remaining AAA rated Alt-A security at a modest loss resulting in 7 remaining Alt-A securities with a book value of approximately \$6.2 million. While we have the ability to hold all of our Alt-A securities indefinitely, we continue to closely monitor and evaluate these securities and their underlying collateral. We will continue to consider opportunities to reduce our position in Alt-A securities if we determine that it prudently reduces our exposure to further declines that may be considered other than temporary.

The following table reflects the composition of our Alt-A securities as of March 31, 2008 after the other than temporary impairment (dollars in thousands):

Rating Category	"Book" Value	Fair Value	% of Portfolio (Fair Value)
AAA	\$ 164	\$ 164	0.1%
AA	3,508	1,997	0.8%
A	2,723	2,723	1.2%
Total	\$ 6,395	\$ 4,884	2.1%

The loss recorded in the first quarter of 2007 represented a write-down of our investment in Financial Industries Corporation (FIC) common stock, having previously resolved that declines in FIC 's stock price will be considered to be other than temporary . Our policy in regards to our investment in FIC is that we will record pretax charges to earnings should the common stock price on the last day of each interim or annual period fall below the adjusted cost basis of our investment in FIC. In the first three months of 2007, that charge totaled \$423,000, calculated by multiplying the total number of FIC shares we own of 385,000 by the change in our adjusted cost basis in FIC common stock at December 31, 2006 of \$7.60 per share and its adjusted cost basis at March 31, 2007 of \$6.50 per share. On January 15, 2008, FIC announced that it has entered into an agreement and plan of merger pursuant to which Amerigo Life, Inc. will acquire FIC. Under the terms of the agreement, FIC shareholders will receive \$7.25 per share in cash. The total transaction is valued at \$74.7 million. The merger is subject to customary closing conditions, including shareholder and regulatory approvals. However, there can be no assurance that the transaction will be consummated on these or any other terms. Our policy in regards to our investment in FIC is that we will record pretax charges to earnings should the common stock price on the last day of each interim or annual period fall below the adjusted cost basis of our investment in FIC. Since the basis in our investment in FIC common stock at March 31, 2008 was \$5.80 per share and since the fair value of the stock at March 31, 2008 was \$6.50, no additional impairment charges were recorded in 2008. We will continue to monitor and evaluate the situation at FIC including the pending merger.

Pro forma

On a pro forma basis, realized capital losses were \$2,595,000 for the quarter ended March 31, 2008 versus a loss of \$288,000 for the prior year quarter. The increase in losses for the current quarter is primarily due to other than temporary impairment charges of \$2,644,000 offset by other net gains of \$49,000 in the current quarter, resulting from fair market value declines in our investment in Alt-A collateralized mortgage-backed securities. For the 2007 quarter, we incurred realized losses primarily on our investment in FIC of \$423,000 offset by net pro forma gains of \$206,000 related to API 's sales of investments. Both of these realized investment losses are discussed above under actual results.

Management Services Revenue

Actual

Prior to the acquisition of API, the historical results of operations of our Insurance Services segment were determined by the management fees we received from API pursuant to a management agreement and the expenses incurred in managing API 's operations. In conjunction with the merger with API on April 1, 2007, our management agreement was terminated as of March 31, 2007 and as such is no longer included in our consolidated results of operations. Management Services revenue decreased by \$3,624,000 to \$33,000 from \$3,657,000 for the three months ended March 31, 2008 compared to the 2007 quarter. As a result of our acquisition of API, we recorded management fee revenue including the contingent management fee only through the quarter ended March 31, 2007.

Financial Services Revenues

Actual

Our Financial Services revenue decreased \$3,492,000 (66%) to \$1,800,000 from \$5,292,000 for the three months ended March 31, 2008 compared to the three months ended March 31, 2007. APS Financial, our broker/dealer, derives most of its revenue from transactions in the fixed income market, in both investment and non-investment grade securities. Commission revenue at APS Financial was down by \$3,018,000 (66%) driven by various factors,

including the extremely poor credit market conditions resulting from the well-publicized issues in the mortgage lending markets, and the resulting inclination of investors, including a major client, to remain inactive. The same general market conditions affected the combined revenues derived from our investment banking divisions and bank debt/trade claims entity, APS Capital. The latter's revenue declined \$444,000 (88%) to \$60,000 from \$504,000. In general, all debt asset classes performed poorly during the quarter and traded at historic wide spreads compared to the treasury market.

Pro forma

On a pro forma basis, Financial Services revenue decreased by \$3,186,000 (64%) to \$1,800,000 for the three months ended March 31, 2008 from \$4,986,000 for the three months ended March 31, 2007. The same reasons for the decline in actual revenues above also explain the differences in pro forma comparative revenues.

Loss and Loss Adjustment Expenses

Actual

As a result of the acquisition of API on April 1, 2007, loss and loss adjustment expenses increased to \$7,509,000 from \$0 for the three months ended March 31, 2008 compared to the same quarter for 2007.

Pro forma

On a pro forma basis, loss and loss adjustment expenses for the three months ended March 31, 2008 decreased by \$3,662,000 (33%) to \$7,509,000 from \$11,171,000 for the first quarter of 2008 compared to the first quarter of 2007. The decrease on a pro forma basis is the result of lower accident year loss and loss adjustment expense and higher favorable development on prior year losses in 2008 as compared to 2007. For the three months ended March 31, 2008, current accident year loss and loss adjustment expenses totaled \$9,056,000 based on 89 claims reported and prior year losses developed favorably by \$1,547,000 as a result of reductions in our estimates of claims severity, principally the 2003 through 2005 report years. For the three months ended March 31, 2007, current accident year loss and loss adjustment expenses were \$11,171,000 based on 103 claims reported and there was \$35,000 of unfavorable development on prior years. The positive effects of 2003 tort reform in Texas on claim frequency and average claim severity has resulted in continued favorable development of reserves and improved claim development patterns. API has favorably settled a number of post-tort reform claims from the 2004 and 2005 report years at below the reserved amounts. However, even though reported claims have decreased by 14 claims in the first quarter of 2008 compared to the same period in 2007, we continue to accrue our current accident year losses conservatively based on increases in policyholder count from 4,781 as of March 31, 2007 to 4,975 as of March 31, 2008.

We continually review and update the data underlying the estimation of the loss and loss adjustment expense reserves and make adjustments that we believe the emerging data warrant. Any adjustments to reserves that are considered necessary are reflected in the results of operations in the period the estimates are changed. As of March 31, 2008, we continue to reserve at the upper end of the reserve range.

Other Underwriting Expenses and Net Change in Deferred Acquisition Costs

Actual

Other underwriting expenses increased to \$2,604,000 from \$0 for the three months ended March 31, 2008 compared to the comparable three months of 2007 as a result of the acquisition of API on April 1, 2007.

Pro forma

On a pro forma basis, other underwriting expenses decreased by \$626,000 (19%) to \$2,604,000 from \$3,230,000 for the three months ended March 31, 2008 as compared to the same period in 2007. Other underwriting expenses consist primarily of commissions to agents, premium taxes and other general underwriting expenses related to managing our

Insurance Services segment. The pro forma decrease of \$626,000 for 2008 is mainly attributable to higher stock-based compensation expenses and legal and auditing fees incurred during the three months ended March 31, 2007 as a result of the acquisition of API. On a pro forma basis, the net change in deferred acquisition costs, which is comprised of the change in deferred and amortized commissions paid to agents on new and renewal business and deferred and amortized premium taxes, decreased for the three months ended March 31, 2008 by \$48,000 to \$93,000 from \$141,000 for the comparable period in 2007 due to new costs capitalized exceeding the amortization of prior deferred expenses.

Management Service Expenses

Actual

Prior to the acquisition of API, the historical results of operations of our Insurance Services segment were determined by the management fees we received from API pursuant to a management agreement and the expenses incurred in managing API's operations. In conjunction with the merger with API on April 1, 2007, our management agreement was terminated as of March 31, 2007 and as such is no longer included in our consolidated results of operations. Thus, as a result of the merger, insurance management services expenses decreased to zero in the three months ended March 31, 2008 compared to \$3,823,000 during the same period in 2007. Insurance services expenses were recorded only through the quarter ended March 31, 2007.

Financial Services Expenses

Actual

Our Financial Services expenses decreased \$1,867,000 (42%) to \$2,570,000 from \$4,437,000 for the three months ended March 31, 2008 compared to the same period in 2007. The primary reason for the current year decrease is a reduction of commission expenses on bond and trade claim transactions of \$2,003,000 (67%) to \$982,000 in 2008 from \$2,985,000 in 2007 resulting from the decline in trading activity and associated commission revenues mentioned above. In addition, incentive compensation costs decreased \$221,000 (100%) in the first three months of 2008 as a result of the net loss before incentive compensation in 2008 compared to net income before incentive compensation of \$1,166,000 in 2007. Legal and professional expenses were also higher for the three months ended March 31, 2008 by \$387,000 (535%) to \$459,000 from \$72,000 due primarily to costs incurred related to two ongoing legal disputes.

General and Administrative Expenses

Actual

General and administrative expenses increased \$786,000 (102%) to \$1,558,000 from \$772,000 for the three months ended March 31, 2008 compared to 2007. The increase in general and administrative expenses in the current year includes higher salaries of \$158,000 or 89% resulting primarily from our hiring a President and Chief Operating Officer and in April, 2007 in addition to adding a new Treasurer position in November of 2007; higher accrued incentive compensation of \$176,000 or 133%, due primarily to higher net earnings resulting primarily from the acquisition of API in April 2007; higher board fees of \$355,000 or 509% resulting from deferred compensation awarded to board members as a result of record earnings in 2007 as well as due to a greater number of directors and increased fees paid to each non-management board member for their service to the Company; and higher legal and professional fees of \$76,000 or 91% resulting primarily from increased financial audit fees accrued as a result of our becoming a much larger, more technically complex company since the acquisition of API. Partially offsetting these increases was a decrease in other compensation expense of \$149,000, or 92% resulting from deferred compensation awarded to officers and key employees in the first three months of 2007 but not in 2008.

Minority Interest

The 3% minority interest in Asset Management, a subsidiary within our Financial Services segment, owned by key individuals within Asset Management, was repurchased by APS Investment Services in the third quarter of 2007 for a nominal amount.

Liquidity and Capital Resources

The primary sources of our liquidity for the three months ended March 31, 2008, are funds provided by insurance premiums collected, net investment income, recoveries from reinsurers and proceeds from the maturity and sale of invested assets. In addition, we received a federal income tax refund for over-payment of estimated 2007 federal income taxes, the result of estimated payments being calculated on an annualized basis and that amount being higher than was actually earned in 2007. The primary uses of cash are losses from insurance claims, loss adjustment expenses, operating expenses, the acquisition of invested and fixed assets and reinsurance premiums.

Cash Flows. Our total cash and cash equivalents balance at March 31, 2008, was \$29,074,000, an increase of \$10,683,000 (58%) in the current year as cash provided by operating activities more than offset net cash used in investing and financing activities. Our cash flows provided from operating activities totaled \$14,508,000 for the current year on the strength of reinsurance reimbursements totaling \$6,450,000 and from net income of \$3,380,000. In addition, we received a \$1,957,000 federal income tax refund mentioned above. Our Insurance Services segment generated the bulk of the cash received from operating activities, the result of increased premium and maintenance fee receipts and decreased claims payouts. Our cash flows used in investing activities totaled \$2,672,000 in the first quarter of 2008 primarily as a result of purchases of available-for-sale fixed income securities in excess of proceeds from their sale. Cash used in financing activities totaled \$1,153,000 for the three months ended March 31, 2008 primarily as a result of repurchases of our common stock, consistent with our previously announced share repurchase program.

Historically, we have maintained a strong working capital position and, as a result, we have been able to satisfy our operational and capital expenditure requirements with cash generated from our operating and investing activities. These same sources of funds have also allowed us to pursue investment and expansion opportunities consistent with our growth plans. Although there can be no assurance our operating activities will provide positive cash flow for the remainder of 2008, we are optimistic that our working capital requirements will be met for the foreseeable future for the following reasons: (1) our current cash position is very strong, with a balance of approximately \$29,000,000; and (2) a large portion of our approximate \$205,000,000 investment portfolio is in short-term, highly liquid bonds and other fixed income securities.

Other Significant Balance Sheet Accounts. Reinsurance recoverables decreased by \$2,022,000 (10%) to \$17,997,000 at March 31, 2008 from \$20,109,000 primarily as a result of the favorable development in the reinsurance layer of \$2,718,000 as discussed in Note 7 to the unaudited financial statements included herein and Item 2, Management's Discussion and Analysis and Results of Operations.

In addition to an adjustment to premiums ceded, estimates of ultimate reinsurance ceded premium amounts compared to the amounts paid on a provisional basis give rise to a balance sheet asset classified as *Other Amounts Receivable Under Reinsurance Contracts* or a balance sheet liability classified as *Funds Held Under Reinsurance Treaties*. Furthermore, each retrospective treaty requires a 24 or 36 month holding period before any premium adjustments or

cash can be returned or paid. The ultimate settlement amount is not determined until all losses have been settled under the respective treaties. As of March 31, 2008, API had recorded a balance sheet asset, Other Amounts Receivable Under Reinsurance Contracts of \$107,000 and a balance sheet liability, Funds Held Under Reinsurance Treaties of \$5,311,000, which represent the differences between the estimates of ultimate reinsurance premiums ceded amounts for the 2002 through 2008 treaty years as compared to the amounts paid on a provisional basis.

Other amounts receivable under reinsurance contracts decreased \$4,428,000 (98%) to \$107,000 at March 31, 2008 from \$4,535,000 at December 31, 2007 due to a net payment of \$7,045,000 received from reinsurers primarily for the initial reimbursement for the excess reinsurance premiums paid on a provisional basis for the 2005 treaty year.

Accrued expenses and other liabilities decreased \$4,270,000 (59%) to \$2,917,000 at March 31, 2008 from \$7,187,000 at December 31, 2007 primarily as a result of payment of approximately \$3,078,000 of accrued 2007 incentive compensation in March, 2008.

Federal income taxes payable increased \$5,089,000 to \$3,132,000 at March 31, 2007 from a receivable of \$1,957,000 at December 31, 2007 primarily as a result of taxes payable on 2008 earnings in addition to a receipt in the current quarter of a 2007 federal income tax refund described in the Liquidity and Capital Resources section above.

Line of Credit. We had a \$3,000,000 line of credit that was originally established in November 2003 with PlainsCapital Bank. The line of credit called for interest payments only to be made on any amount drawn until April 15, 2008, when the entire amount of the line of credit, principal and interest then remaining unpaid, became due and payable. At April 15, 2008, there had never been any advances taken against this line of credit and we elected to not renew this line of credit.

Capital Expenditures. In April 2007 we entered into a contract with a vendor to provide us with, and assist in the implementation of, an integrated policy and claims administration system. The total cash outflow for the project is anticipated to be approximately \$1,900,000 of which \$1,041,000 has been capitalized to date. Our capital expenditures for equipment were \$403,000 in the three months ended March 31, 2008 of which approximately \$194,000 were expenditures related to this software implementation project. We expect to incur additional capital expenditures of approximately \$859,000 for the remainder of this project, which are to be funded from cash on hand over the next twelve months.

Restrictions on Dividends by API. In addition to restrictions on dividends and distributions applicable to all Texas stock insurance companies, for so long as any Series A redeemable preferred stock is outstanding, the Texas Department of Insurance prohibits API from paying dividends to us in any fiscal year unless and until we have complied with our redemption and dividend payment obligations to the holders of our Series A redeemable preferred stock for that year. We have also agreed that, without prior approval of the Texas Department of Insurance, aggregate annual distributions to us in respect of API's capital stock may not exceed the lesser of 10% of API's prior year-end policyholder statutory earned surplus or API's prior year net income, and in no event may exceed API's statutory earned surplus.

Escrow Account. In connection with the API acquisition, the Texas Department of Insurance has required us to place \$2,500,000 into an escrow account with a bank, to remain in escrow until the aggregate remaining redemption and dividend obligation relating to our Series A redeemable preferred stock is less than the amount of the escrow balance. No withdrawals may be made from this escrow account without prior approval from the Texas Department of Insurance.

Adoption of Recent Accounting Pronouncements

In September 2006, the FASB issued Statement of Financial Accounting Standards, or SFAS No. 157, Accounting for Fair Value Measurements, effective for fiscal years beginning after November 15, 2007. However, on February 12,

2008, the FASB issued FSP FAS 157-2 which would delay the effective date of SFAS No. 157 for all non-financial assets and non-financial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). This FSP partially defers the effective date of SFAS No. 157 to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years for items within the scope of this FSP. This Statement defines fair value, establishes a framework for measuring fair value in accordance with GAAP and expands disclosures about fair value measurements. Accordingly, this Statement does not require any new fair value measurements. However, for some entities, the application of this Statement will change current practice. We have adopted this standard for the three months ended March 31, 2008 and a more detailed discussion is included in Note 17 to evaluating the impact, if any, the adoption of this standard will have on our financial position, results of operations or cash flows.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. This Statement permits entities to choose to measure certain financial assets and liabilities at fair value which are otherwise measured on a different basis in existing literature. Additional disclosures are required. It is effective for the Company, if elected, as of January 1, 2008. Early adoption is permitted with several constraints. We are currently evaluating the impact, if any, the adoption of this standard would have on our financial position, results of operations or cash flows.

In December 2007, the FASB issued Statement of Financial Accounting Standards, or SFAS, No. 160, Noncontrolling Interests in Consolidated Financial Statements (SFAS 160). SFAS 160 amends Accounting Research Bulletin No. 51 to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. The Statement is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Earlier adoption is prohibited. We will adopt the Statement on its effective date. The adoption is not expected to have a significant effect on our financial position, results of operations or cash flows.

In December 2007, the FASB issued Statement of Financial Accounting Standards, or SFAS No. 141 (Revised December 2007) Business Combinations (SFAS 141R). SFAS 141R replaces FASB Statement No. 141, Business Combinations but retains the fundamental requirement in SFAS 141 that the acquisition method (referred to as the purchase method in SFAS 141) of accounting be used for all business combinations. SFAS 141R provides new and additional guidance with respect to business combinations including: defining the acquirer in a transaction, the valuation of assets and liabilities when noncontrolling interests exist, the treatment of contingent consideration, the treatment of costs incurred to effect the acquisition, the treatment of reorganization costs, and the valuation of assets and liabilities when the purchase price is below the net fair value of assets acquired. SFAS 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Earlier adoption is prohibited. We will adopt the Statement on its effective date.

Off-Balance Sheet Arrangements

There were no off-balance sheet arrangements as of March 31, 2008.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are principally exposed to three types of market risk related to our investment operations, including credit risk, interest rate risk, and equity price risk. The term market risk refers to the risk of a loss arising from adverse changes in market rates and prices such as interest rates, credit risk, equity prices and foreign currency exchange rates.

We invest our assets primarily in fixed-maturity securities, which as of March 31, 2008 and December 31, 2007 comprised approximately 82% and 86% of total investments, including unrestricted cash balances, at market value. As of March 31, 2008 and December 31, 2007, the fair value of investments in fixed maturity securities was \$191,766,000 and \$191,609,000.

The fixed-income maturities consist predominately of investment grade U.S. government agency and non-agency collateralized mortgage obligations and U.S. government agency mortgage-backed bonds for the purpose of generating ample cash flow to meet claim funding requirements while maintaining a reasonable investment yield.

We have exposure to credit risk primarily as a holder of fixed-income securities. We control this exposure by emphasizing investment grade quality in the fixed-income securities we purchase. At March 31, 2008 and at December 31, 2007, substantially all of our fixed-income portfolio consisted of investment grade securities. We believe that this concentration of investment grade securities limits our exposure to credit risk on our fixed-income investments. For additional discussion of our fixed income securities including our Alt-A securities and related other than temporary impairment, see Note 4 to unaudited financial statements included herein and Item 2. Management's Discussion and Analysis and Results of Operations.

Equity securities comprised approximately 5% of total investments, including unrestricted cash, at market value as of March 31, 2008 and December 31, 2007, respectively. As of March 31, 2008 and December 31, 2007, the fair value of investments in equity securities was \$11,614,000 and \$11,406,000, respectively.

Equity securities are subject to equity price risk, which is defined as the potential for loss in market value due to a decline in equity prices. The value of common stock equity investments is dependent upon the general conditions in the securities markets and the business and financial performance of the individual companies in the portfolio. Values are typically based on future economic prospects as perceived by investors in the equity markets. We regularly review the carrying value of our investments and identify and record losses when events and circumstances indicate that such declines in the fair value of such assets below our accounting basis are other-than-temporary. For additional discussion of our equity securities including our investment in Financial Industries Corporation and related other than temporary impairment, see Note 4 to unaudited financial statements included herein and Item 2. Management's Discussion and Analysis and Results of Operations.

The remainder of the investment portfolio consists of cash and highly liquid short-term investments.

As mentioned above, our invested assets are subject to interest rate risk and equity price risk. The following table presents the effect as of March 31, 2008 on current estimated fair values of the fixed-maturity securities available-for-sale and equity securities assuming a 100-basis point (1%) increase in market interest rates and a 10% decline in equity prices.

		Estimated Fair Value at	Estimated Fair Value at
		Current	Adjusted
	Carrying Value	Market Rates/Prices	Market Rates/Prices (1)
		(in thousands)	
Interest rate risk:			
Fixed-maturities; available for sale	\$ 191,766	\$ 191,766	\$ 180,158
Equity price risk:			
Equity securities (1)	11,614	11,614	10,453

Adjusted rates assume a 100 basis point (1%) increase in market rates for fixed rate securities and a 10% decline in equity market values.

For all our financial assets and liabilities, we seek to maintain reasonable average durations, consistent with the maximization of income, without sacrificing investment quality and providing for liquidity and diversification.

The estimated fair values at current market rates for financial instruments subject to interest rate risk and equity price risk in the table above are the same as those included elsewhere herein. The estimated fair values are calculated using simulation modeling based on the most likely outcome, assuming a 100-basis point shift in interest rates.

This sensitivity analysis provides only a limited, point-in-time view of the market risk sensitivity of certain of our financial instruments. The actual impact of market interest rate and price changes on the financial instruments may differ significantly from those shown in the sensitivity analysis. The sensitivity analysis is further limited, as it does not consider any actions that we could take in response to actual and/or anticipated changes in interest rates and equity

prices.

We are also subject to credit risk with respect to our reinsurers. Although our reinsurers are liable to us to the extent we cede risk to them, we are ultimately liable to our policyholders on all risks we have reinsured. As a result, reinsurance agreements do not limit our ultimate obligations to pay claims to policyholders and we may not recover claims made to our reinsurers.

Additionally, our revenues generated through commissions at our Financial Services segment also expose us to market risk. Changes in interest rates could have an impact at our broker/dealer subsidiary, APS Financial. The general level of interest rates may trend higher or lower, and this move may impact our level of business in different fixed-income sectors. If a generally improving economy is the impetus behind higher rates, then while our investment grade business may drop off, our high yield business might improve with improving credit conditions. A volatile interest rate environment could also impact our business as this type of market condition can lead to investor uncertainty and their corresponding willingness to commit funds.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure material information required to be disclosed in the Company's reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required financial disclosure. In designing and evaluating the disclosure controls and procedures, the Company recognized that a control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's Disclosure Committee and management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(b). Based upon this evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of March 31, 2008.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during the most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are involved in various claims and legal actions that have arisen in the ordinary course of business. Management believes that any liabilities arising from these actions will not have a significant adverse effect on our financial condition or results of operations.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the period ended December 31, 2007 which could materially affect our business, financial condition or future results. The risks described in this report are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial could have a material adverse effect on our business, financial condition and results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Items 2(a) and (b) are inapplicable.

(c) Stock Repurchases for the three months ended March 31, 2008:

Period	Total Number of shares Purchased (1)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value of Shares that May yet be Purchased under the Plans or Programs (2)
January 1, 2008 - January 31, 2008	21,641	\$ 18.59	21,641	\$ 849,000
February 1, 2008 - February 29, 2008	23,065	\$ 18.16	23,065	\$ 430,000
March 1, 2008 - March 31, 2008	40,318	\$ 19.28	40,318	\$ 3,652,000

(1)

Of the total shares purchased, 71,746 were purchased in open market transactions and 13,278 were purchased in private transactions.

(2)

Our original share repurchase program was announced August 17, 2004, was increased in \$2,000,000 increments on December 12, 2005 and on June 30, 2006, \$1,000,000 on September 7, 2007 and \$4,000,000 on March 5, 2008. As of March 31, 2008, we have a maximum dollar value of \$3,652,000 remaining for the future purchase of shares under the Stock Repurchase program.

Our open market stock repurchases are made in reliance upon Rule 10b-18 of the Exchange Act safe harbor from certain market manipulation claims for purchases by an issuer of its own common stock. Under this rule, we may not open trading in our shares, may not trade in the last thirty minutes of the trading session, may bid no more than the current bid or last trade, and may purchase no more in a single day than 25% of the average daily trading volume for the last four calendar weeks, unless certain rules for larger block trades are followed. Our stock option plan allows us to accept shares owned by an optionee immediately prior to the exercise of an option in payment for the option exercise. Additionally, we consider unsolicited offers to sell shares back to us and make a decision on purchasing them based on the price and our business needs at the time of the offer. We give priority in our repurchases to shares offered in option exercises, followed by open market purchases and finally unsolicited offers from shareholders. We do not reissue any shares acquired in repurchases, instead canceling them upon acquisition.
