### Summary

Prospective investors are urged to read this prospectus in its entirety.

We intend to be in the business of mineral property exploration. To date, we have not conducted any exploration on our sole mineral property: the Goldstrike property located in the Kamloops Mining Division of British Columbia, Canada. We own a 100% interest in the 32 mineral claim units comprising the Goldstrike property. We purchased these claims from Mr. Leopold Lindinger of Kamloops, British Columbia for a cash payment of \$5,000 and the issuance of 50,000 shares of our common stock.

Our objective is to conduct mineral exploration activities on the Goldstrike property in order to assess whether it possesses economic reserves of gold and copper. We have not yet identified any economic mineralization on the property. Our proposed exploration program is designed to search for an economic mineral deposit.

We were incorporated on June 6, 2003 under the laws of the state of Nevada. Our principal offices are located at 1055 West Hastings Street, Suite 1980, Vancouver, British Columbia, Canada. Our telephone number is (604) 688-8002.

### Risk Factors

An investment in our common stock involves a high degree of risk. You should carefully consider the risks described below and the other information in this prospectus before investing in our common stock. If any of the following risks occur, our business, operating results and financial condition could be seriously harmed. The trading price of our common stock could decline due to any of these risks, and you may lose all or part of your investment.

IF WE DO NOT OBTAIN ADDITIONAL FINANCING, OUR BUSINESS WILL FAIL.

Our current operating funds are less than necessary to complete all intended exploration of the Goldstrike Bay property, and therefore we will need to obtain additional financing in order to complete our business plan. As of December 15, 2003, we had cash in the amount of \$22,353. We currently do not have any operations and we have no income.

Our business plan calls for significant expenses in connection with the exploration of the Goldstrike property. While we have sufficient funds to conduct initial exploration on the property, we will require additional financing in order to determine whether the property contains economic mineralization. We will also require additional financing if the costs of the exploration of the Goldstrike property are greater than anticipated.

We will require additional financing to sustain our business operations if we are not successful in earning revenues once exploration is complete. We do not currently have any arrangements for financing and we can provide no assurance to investors that we will be able to find such financing if required. Obtaining additional financing would be subject to a number of factors, including the market price for gold and copper, investor acceptance of our property and

-7-

general market conditions. These factors may make the timing, amount, terms or

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

conditions of additional financing unavailable to us.

The most likely source of future funds presently available to us is through the sale of equity capital. Any sale of share capital will result in dilution to existing shareholders. The only other anticipated alternative for the financing of further exploration would be our sale of a partial interest in the Goldstrike property to a third party in exchange for cash or exploration expenditures, which is not presently contemplated.

BECAUSE WE HAVE NOT COMMENCED BUSINESS OPERATIONS, WE FACE A HIGH RISK OF BUSINESS FAILURE.

Although we are preparing to commence exploration on the Goldstrike property in October, we have not yet commenced exploration on the property. Accordingly, we have no way to evaluate the likelihood that our business will be successful. We were incorporated on June 6, 2003 and to date have been involved primarily in organizational activities and the acquisition of our mineral property. We have not earned any revenues as of the date of this prospectus. Potential investors should be aware of the difficulties normally encountered by new mineral exploration companies and the high rate of failure of such enterprises. The likelihood of success must be considered in light of the problems, expenses, difficulties, complications and delays encountered in connection with the exploration of the mineral properties that we plan to undertake. These potential problems include, but are not limited to, unanticipated problems relating to exploration, and additional costs and expenses that may exceed current estimates.

Prior to completion of our exploration stage, we anticipate that we will incur increased operating expenses without realizing any revenues. We therefore expect to incur significant losses into the foreseeable future. We recognize that if we are unable to generate significant revenues from development of the Goldstrike property and the production of minerals from the claims, we will not be able to earn profits or continue operations.

There is no history upon which to base any assumption as to the likelihood that we will prove successful, and we can provide investors with no assurance that we will generate any operating revenues or ever achieve profitable operations. If we are unsuccessful in addressing these risks, our business will most likely fail.

BECAUSE OF THE SPECULATIVE NATURE OF EXPLORATION OF MINING PROPERTIES, THERE IS A SUBSTANTIAL RISK THAT OUR BUSINESS WILL FAIL.

The search for valuable minerals as a business is extremely risky. We can provide investors with no assurance that our mineral claims contain economic mineralization or reserves of gold or copper. Exploration for minerals is a speculative venture necessarily involving substantial risk. Problems such as unusual or unexpected formations and other conditions are involved in mineral exploration and often result in unsuccessful exploration efforts. In such a case, we would be unable to complete our business plan.

-8-

BECAUSE OF THE INHERENT DANGERS INVOLVED IN MINERAL EXPLORATION, THERE IS A RISK THAT WE MAY INCUR LIABILITY OR DAMAGES AS WE CONDUCT OUR BUSINESS.

The search for valuable minerals involves numerous hazards. As a result, we may become subject to liability for such hazards, including pollution, cave-ins and other hazards against which we cannot insure or against which we may elect not to insure. The payment of such liabilities may have a material adverse effect on our financial position.

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

EVEN IF WE DISCOVER COMMERCIAL RESERVES OF PRECIOUS METALS ON THE GOLDSTRIKE PROPERTY, WE MAY NOT BE ABLE TO SUCCESSFULLY COMMENCE COMMERCIAL PRODUCTION.

The Goldstrike property does not contain any known bodies of mineralization. If our exploration programs are successful in establishing gold and copper of commercial tonnage and grade, we will require additional funds in order to place the property into commercial production. At this time, we cannot assure investors that we will be able to obtain such financing.

WE NEED TO CONTINUE AS A GOING CONCERN IF OUR BUSINESS IS TO SUCCEED.

The Independent Auditor's Report to our audited financial statements for the period ended August 31, 2003 indicates that there are a number of factors that raise substantial doubt about our ability to continue as a going concern. Such factors identified in the report are our net loss position, our failure to attain profitable operations and our dependence upon obtaining adequate financing. If we are not able to continue as a going concern, it is likely investors will lose their investments.

IF WE BECOME SUBJECT TO BURDENSOME GOVERNMENT REGULATION OR OTHER LEGAL UNCERTAINTIES, OUR BUSINESS WILL BE NEGATIVELY AFFECTED.

There are several governmental regulations that materially restrict mineral property exploration and development. Under British Columbia mining law, to engage in certain types of exploration will require work permits, the posting of bonds, and the performance of remediation work for any physical disturbance to the land. While these current laws do will not affect our current exploration plans, if we proceed to commence drilling operations on the Goldstrike property, we will incur modest regulatory compliance costs.

In addition, the legal and regulatory environment that pertains to the exploration of ore is uncertain and may change. Uncertainty and new regulations could increase our costs of doing business and prevent us from exploring for ore deposits. The growth of demand for ore may also be significantly slowed. This could delay growth in potential demand for and limit our ability to generate revenues. In addition to new laws and regulations being adopted, existing laws may be applied to mining that have not as yet been applied. These new laws may increase our cost of doing business with the result that our financial condition and operating results may be harmed.

-9-

BECAUSE OUR DIRECTORS HAVE OTHER BUSINESS INTERESTS, THEY MAY NOT BE ABLE OR WILLING TO DEVOTE A SUFFICIENT AMOUNT OF TIME TO OUR BUSINESS OPERATIONS, CAUSING OUR BUSINESS TO FAIL.

Our directors, Mr. Ken Cai and Mr. Yenyong Zheng, each only spend approximately 20% of their business time providing services to us. While they presently possess adequate time to attend to our interests, it is possible that the demands on them from his other obligations could increase with the result that they would no longer be able to devote sufficient time to the management of our business.

IF A MARKET FOR OUR COMMON STOCK DOES NOT DEVELOP, SHAREHOLDERS MAY BE UNABLE TO SELL THEIR SHARES.

There is currently no market for our common stock and we can provide no assurance that a market will develop. We currently plan to apply for listing of our common stock on the NASD over the counter bulletin board upon the effectiveness of the registration statement, of which this prospectus forms a

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

part. However, we can provide investors with no assurance that our shares will be traded on the bulletin board or, if traded, that a public market will materialize. If no market is ever developed for our shares, it will be difficult for shareholders to sell their stock. In such a case, shareholders may find that they are unable to achieve benefits from their investment.

A PURCHASER IS PURCHASING PENNY STOCK WHICH LIMITS HIS OR HER ABILITY TO SELL THE STOCK.

The shares offered by this prospectus constitute penny stock under the Securities and Exchange Act. The shares will remain penny stock for the foreseeable future. The classification of penny stock makes it more difficult for a broker-dealer to sell the stock into a secondary market, which makes it more difficult for a purchaser to liquidate his or her investment. Any broker-dealer engaged by the purchaser for the purpose of selling his or her shares in our company will be subject to rules 15c-1 through 15c-10 of the Securities and Exchange Act. Rather than creating a need to comply with those rules, some broker-dealers will refuse to attempt to sell penny stock.

### Forward-Looking Statements

This prospectus contains forward-looking statements that involve risks and uncertainties. We use words such as anticipate, believe, plan, expect, future, intend and similar expressions to identify such forward-looking statements. You should not place too much reliance on these forward-looking statements. Our actual results are most likely to differ materially from those anticipated in these forward-looking statements for many reasons, including the risks faced by us described in the "Risk Factors" section and elsewhere in this prospectus.

### Use Of Proceeds

We will not receive any proceeds from the sale of the common stock offered through this prospectus by the selling shareholders.

-10-

### Determination Of Offering Price

The selling shareholders will sell our shares at \$0.03 per share until our shares are quoted on the OTC Bulletin Board, and thereafter at prevailing market prices or privately negotiated prices. We determined this offering price, based upon the price of the last sale of our common stock to investors.

### Dilution

The common stock to be sold by the selling shareholders is common stock that is currently issued and outstanding. Accordingly, there will be no dilution to our existing shareholders.

### Selling Shareholders

The selling shareholders named in this prospectus are offering all of the 2,300,000 shares of common stock offered through this prospectus. The named party beneficially owns and has sole voting and investment power over all shares or rights to these shares. The numbers in this table assume that none of the selling shareholders sells shares of common stock not being offered in this prospectus or purchases additional shares of common stock, and assumes that all shares offered are sold. The percentages are based on 3,300,000 shares of common stock outstanding on the date of this prospectus.

Zhipong Cai and Zhiquan Cai are brothers of Dr. Ken Cai, our president and a director.

Tianying Zheng is a cousin of, and Lianke Zheng is the uncle of Dr. Yenyong Zheng, our secretary, treasurer and a director.

Otherwise, none of the selling shareholders:

- (1) has had a material relationship with us other than as a

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

shareholder at any time within the past three years; or

(2) has ever been one of our officers or directors.

### Plan Of Distribution

The selling shareholders may sell some or all of their common stock in one or more transactions, including block transactions:

The selling shareholders will sell our shares at \$0.03 per share until our shares are quoted on the OTC Bulletin Board, and thereafter at prevailing market

-16-

prices or privately negotiated prices. We determined this offering price arbitrarily based upon the price of the last sale of our common stock to investors.

The shares may also be sold in compliance with the Securities and Exchange Commission's Rule 144.

The selling shareholders may also sell their shares directly to market makers acting as principals or brokers or dealers, who may act as agent or acquire the common stock as a principal. Any broker or dealer participating in such transactions as agent may receive a commission from the selling shareholders, or, if they act as agent for the purchaser of such common stock, from such purchaser. The selling shareholders will likely pay the usual and customary brokerage fees for such services. Brokers or dealers may agree with the selling shareholders to sell a specified number of shares at a stipulated price per share and, to the extent such broker or dealer is unable to do so acting as agent for the selling shareholders, to purchase, as principal, any unsold shares at the price required to fulfill the respective broker's or dealer's commitment to the selling shareholders. Brokers or dealers who acquire shares as principals may thereafter resell such shares from time to time in transactions in a market or on an exchange, in negotiated transactions or otherwise, at market prices prevailing at the time of sale or at negotiated prices, and in connection with such re-sales may pay or receive commissions to or from the purchasers of such shares. These transactions may involve cross and block transactions that may involve sales to and through other brokers or dealers. If applicable, the selling shareholders may distribute shares to one or more of their partners who are unaffiliated with us. Such partners may, in turn, distribute such shares as described above. We can provide no assurance that all or any of the common stock offered will be sold by the selling shareholders.

We are bearing all costs relating to the registration of the common stock. These are estimated to be \$20,000. The selling shareholders, however, will pay any commissions or other fees payable to brokers or dealers in connection with any sale of the common stock.

The selling shareholders must comply with the requirements of the Securities Act and the Securities Exchange Act in the offer and sale of the common stock. In particular, during such times as the selling shareholders may be deemed to be engaged in a distribution of the common stock, and therefore be considered to be an underwriter, they must comply with applicable law and may, among other things:

1. Not engage in any stabilization activities in connection with our common stock;
2. Furnish each broker or dealer through which common stock may be offered,

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

such copies of this prospectus, as amended from time to time, as may be required by such broker or dealer; and

3. Not bid for or purchase any of our securities or attempt to induce any person to purchase any of our securities other than as permitted under the Securities Exchange Act.

The Securities Exchange Commission has also adopted rules that regulate

-17-

broker-dealer practices in connection with transactions in penny stocks. Penny stocks are generally equity securities with a price of less than \$5.00 (other than securities registered on certain national securities exchanges or quoted on the Nasdaq system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or system).

The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from those rules, deliver a standardized risk disclosure document prepared by the Commission, which:

- \* contains a description of the nature and level of risk in the market for penny stocks in both public offerings and secondary trading;
- \* contains a description of the broker's or dealer's duties to the customer and of the rights and remedies available to the customer with respect to a violation to such duties or other requirements of
- \* contains a brief, clear, narrative description of a dealer market, including "bid" and "ask" prices for penny stocks and the significance of the spread between the bid and ask price;
- \* contains a toll-free telephone number for inquiries on disciplinary actions;
- \* defines significant terms in the disclosure document or in the conduct of trading penny stocks; and
- \* contains such other information and is in such form (including language, type, size, and format) as the Commission shall require by rule or regulation;

The broker-dealer also must provide, prior to effecting any transaction in a penny stock, the customer:

- \* with bid and offer quotations for the penny stock;
- \* the compensation of the broker-dealer and its salesperson in the transaction;
- \* the number of shares to which such bid and ask prices apply, or other comparable information relating to the depth and liquidity of the market for such stock; and
- \* monthly account statements showing the market value of each penny stock held in the customer's account.

In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from those rules; the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written acknowledgment of the receipt of a risk disclosure statement, a written agreement to transactions involving penny stocks, and a signed and dated copy of a written suitability statement. These disclosure requirements will have the effect of reducing the trading activity in the secondary market for our stock because it will be subject to these penny stock rules. Therefore, stockholders may have difficulty selling those securities.

### Description Of Business

In General

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

We intend to commence operations as an exploration stage company. We will be engaged in the acquisition, and exploration of mineral properties with a view to exploiting any mineral deposits we discover that demonstrate economic feasibility. We own a 100% interest in 32 contiguous mineral claim units known collectively as the Goldstrike property.

Our plan of operation is to conduct exploration work on the Goldstrike property in order to ascertain whether it possesses economic quantities of gold or copper. There can be no assurance that economic mineral deposits or reserves exist on the Goldstrike property until appropriate exploration work is done and an economic evaluation based on such work concludes that production of minerals from the property is economically feasible.

### Goldstrike Property Purchase Agreement

On June 30, 2003, we entered into an agreement with Mr. Leopold Lindinger of Kamloops, British Columbia, whereby he agreed to sell to us a total of 32 mineral claim units located near Blue River, British Columbia that have the potential to contain gold and copper mineralization or deposits. In order to acquire a 100% interest in these claims, we paid \$5,000 and issued 50,000 shares of common stock to Mr. Lindinger.

### Description, Location and Access

The Goldstrike property is located in the Kamloops Mining Division approximately 29 kilometers south-southeast of the community of Blue River, British Columbia. Access to the property can be gained from either the town of Vavenby, or between Avola and Blue River located along highway 5 north of the city of Kamloops. The latter access is the most expedient and utilizes a major logging road that follows the Finn Creek valley to the headwaters of the Adams River. Travel is then southerly via a series of branch roads that transect much of the property and surrounding area. The property is accessible from late May to mid-October. In some years, late season and winter logging occurs that greatly expands the accessible time frame.

-23-

The Goldstrike property is situated in the Columbia Mountains near the headwaters of the Adams River. Several easterly trending creeks transect the claims. Slopes are generally moderate to the east and southeast with steeper areas confined to the headwaters of the tributaries. Elevations range from 760 meters to 2,000 meters near the northwest corner of the claims. The terrain over most of the property is not an impediment to exploration work.

Winter snowpacks of several meters are not uncommon. The central portions of the Goldstrike property are generally snow free from late May to early November.

### Exploration History

To date, no mineral deposit has been delineated on the Goldstrike property. Consequently there has been no production from the property or any reserved or resource calculated.

In late 1998, Mr. Lindinger, the person who sold the Goldstrike property to us, discovered gold-bismuth mineralization on the property. Recent gold discoveries in the Yukon and Alaska spurred exploration for gold deposits found in areas containing significant amounts of bismuth. The presence of similar geological occurrences in southern British Columbia has led to exploration of these regions.

During 1999, Cassidy Gold Corp. commenced exploration on the claims to determine

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

the geological setting and mineral potential of the property. Soil sampling resulted in the discovery of additional gold mineralization trending in a east-southeast direction, known as the Bizar showing, as well as in a road bank 1.5 kilometers southeast of the Bizar showing. Soil sampling involves gathering dirt from property areas with the most potential to host economically significant mineralization based on past exploration results. All samples gathered are then sent to a laboratory where they are crushed and analysed for metal content.

Cassidy Gold Corp. drill tested the Bizar showing and the road bank areas in late 1999. Drilling involves extracting a long cylinder of rock from the ground to determine amounts of metals at different depths. Pieces of the rock obtained, known as drill core, are analysed for mineral content.

Drilling in the area of the Bizar showing encountered narrow zones of gold mineralization that could not be definitely correlated to the mineralization seen on surface. The drilling on the road bank did not result in the discovery of any significant mineralization.

We intend to conduct additional exploration work on the property to test the apparent east-southeast trend of gold, bismuth, copper and arsenic mineralization and its potential continuation to the east. We plan to expand the existing grid with continued soil and rock sampling.

The source of mineralization that Cassidy Gold Corp. found in the road bank is likely proximal. The shallow overburden, the layer of soil above the rock, suggests that soil sampling would be effective. We intend to establish a detailed grid and collect close spaced (25 meter) soil samples. Grid emplacement

-24-

involves dividing a portion of the property being explored into small sections. Results from sampling are then recorded according to the section of the grid from which they are gathered.

Any anomalous areas will be followed by trenching and drilling. Trenching involves removing surface soil using a backhoe or bulldozer. Samples are then taken from the bedrock below and analysed for mineral content.

### Compliance with Government Regulation

We will be required to comply with all regulations, rules and directives of governmental authorities and agencies applicable to the exploration of minerals in Canada generally, and in the province of British Columbia, specifically. Under these laws, prior to production, we have the right to explore the property, subject only to a notice of work which may entail posting a bond if we significantly disturb the property surface. This would first occur during the drilling phase of exploration.

In addition, production of minerals in the province of British Columbia requires prior approval of applicable governmental regulatory agencies. We can provide no assurance to investors that such approvals will be obtained. The cost and delay involved in attempting to obtain such approvals cannot be known at this time.

We will have to sustain the cost of reclamation and environmental mediation for all exploration and development work undertaken. The amount of these costs is not known at this time as we do not know the extent of the exploration program that will be undertaken beyond completion of the currently planned work programs. Because there is presently no information on the size, tenor, or quality of any resource or reserve at this time, it is impossible to assess the impact of any capital expenditures on earnings or our competitive position in

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

the event a potentially economic deposit is discovered.

If we enter into production, the cost of complying with permit and regulatory environment laws will be greater than in the exploration phases because the impact on the project area is greater. Permits and regulations will control all aspects of any production program if the project continues to that stage because of the potential impact on the environment. Examples of regulatory requirements include:

- Water discharge will have to meet water standards;
- Dust generation will have to be minimal or otherwise re-mediated;
- Dumping of material on the surface will have to be re-contoured and re-vegetated;
- An assessment of all material to be left on the surface will need to be environmentally benign;
- Ground water will have to be monitored for any potential contaminants;

-25-

- The socio-economic impact of the project will have to be evaluated and if deemed negative, will have to be re-mediated; and
- There will have to be an impact report of the work on the local fauna and flora.

### Employees

We have no employees as of the date of this prospectus other than our two directors.

### Research and Development Expenditures

We have not incurred any other research or development expenditures since our incorporation.

### Subsidiaries

We do not have any subsidiaries.

### Patents and Trademarks

We do not own, either legally or beneficially, any patents or trademarks.

### Plan Of Operations

Our plan of operation for the twelve months following the date of this prospectus is to complete exploration on the Goldstrike property consisting of grid establishment and soil and rock sampling. We anticipate that this exploration program will cost approximately \$7,000.

As well, we anticipate spending an additional \$20,000 on professional fees, including fees payable in connection with the filing of this registration statement and complying with reporting obligations.

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

Total expenditures over the next 12 months are therefore expected to be \$27,000.

We are able to proceed with this exploration program without additional financing. We expect to commence this program in March or April 2004.

We anticipate this program will take approximately 30 days, including the interpretation of all data collected. We anticipate proceeding with further sampling and trenching in May or June 2004.

We will require additional funding in order to proceed with the trenching program. We anticipate that additional funding will be required in the form of equity financing from the sale of our common stock. However, we cannot provide investors with any assurance that we will be able to raise sufficient funding from the sale of our common stock to fund the second phase of the exploration program. We believe that debt financing will not be an alternative for funding

-26-

the complete exploration program. We do not have any arrangements in place for any future equity financing.

Our cash reserves are not sufficient to meet our obligations for the next twelve-month period. As a result, we will need to seek additional funding in the near future. We currently do not have a specific plan of how we will obtain such funding; however, we anticipate that additional funding will be in the form of equity financing from the sale of our common stock. We may also seek to obtain short-term loans from our directors, although no such arrangement has been made. At this time, we cannot provide investors with any assurance that we will be able to raise sufficient funding from the sale of our common stock or through a loan from our directors to meet our obligations over the next twelve months. We do not have any arrangements in place for any future equity financing.

### Results Of Operations For Period Ending August 31, 2003

We did not earn any revenues during the period ending August 31, 2003. We do not anticipate earning revenues until such time as we have entered into commercial production on the Goldstrike property. We have not commenced the exploration stage of our business and can provide no assurance that we will discover economic mineralization on the property, or if such minerals are discovered, that we will enter into commercial production.

We incurred operating expenses in the amount of \$3,917 for the period from our inception on June 6, 2003 to August 31, 2003. These operating expenses were comprised of legal fees of \$3,000, incorporation costs of \$751, bank charges of \$116 and office costs of \$50.

We have not attained profitable operations and are dependent upon obtaining financing to pursue exploration activities. For these reasons our auditors believe that there is substantial doubt that we will be able to continue as a going concern.

### Description Of Property

We own a 100% interest in 32 mineral claim units comprising the Goldstrike property. We do not own or lease any property other than the Goldstrike property.

### Certain Relationships And Related Transactions

Except as described below, none of the following parties has, since our date of

1. we would not be able to pay our debts as they become due in the usual course of business; or

2. our total assets would be less than the sum of our total liabilities plus the amount that would be needed to satisfy the rights of shareholders who have preferential rights superior to those receiving the distribution.

(A Nevada Corporation)  
(An Exploration Stage Company)  
Notes to Financial Statements  
August 31, 2003  
(In U.S. Dollars)

Note 1. ORGANIZATION AND NATURE OF BUSINESS

We were incorporated on June 9, 2003 under the Company Act of the State of Nevada, U.S.A. to pursue opportunities in the business of mineral explorations. June 9, 2003 is also the inception date of the Company.

Note 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

These financial statements have been prepared in accordance with Accounting Principles Generally Accepted in the United States ("USGAAP").

Exploration stage company

Goldstrike is an exploration stage company as it does not have an established commercial deposit and is not in the production stage".

Use of estimates

The preparation of financial statements in conformity with USGAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Cash and cash equivalents

Cash and cash equivalents consist of cash on deposit and highly liquid short-term interest bearing securities with a maturity at the date of purchase of three months or less.

Income Taxes

Provisions for income taxes are based on taxes payable or refundable for the current year and deferred taxes on temporary differences

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

between the amount of taxable income and pretax financial income and between the tax bases of assets and liabilities and their reported amounts in the financial statements. Deferred tax assets and liabilities are included in the financial statement at currently enacted income tax rates applicable to the period in which the deferred tax assets and liabilities are expected to be realized or settled as prescribed in FASB Statement No. 109, Accounting for Income Taxes. As changes in tax laws or rate are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes.

Note 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont'd)

Compensated absences

Employees of the corporation are entitled to paid vacations, sick days and other time off depending on job classification, length of service and other factors. It is impractical to estimate the amount of compensation for future absences, and accordingly, no liability has been recorded in the accompanying financial statements. The corporation's policy is to recognize the costs of compensated absences when paid to employees.

Net profit per share

Goldstrike adopted Statement of Financial Accounting Standards No. 128 that requires the reporting of both basic and diluted earnings per share. Basic earnings per share is computed by dividing net income available to common shareowners by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. In accordance with FASB 128, any anti-dilution effects on net loss per share are excluded.

Disclosure about fair value of financial instruments

Goldstrike has financial instruments, none of which are held for trading purposes. Goldstrike estimates that the fair value of all financial instruments at September 24, 2003 as defined in FASB 107, does not differ materially from the aggregate carrying values of its financial instruments recorded in the accompanying balance sheet. The estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies. Considerable judgment is required in interpreting market data to develop the estimates of fair value, and accordingly, the estimates are not necessarily indicative of the amounts that the Company could realize in a current market exchange.

Concentration of credit risk

Financial instruments that potentially subject Goldstrike to a significant concentration of credit risk consist primarily of cash and

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

cash equivalents which are not collateralized. Goldstrike limits its exposure to credit loss by placing its cash and cash equivalents with high credit quality financial institutions.

Long-lived assets

Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of," requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset in question may not be recoverable. This standard did not have a material effect on the Company's results of operations, cash flows or financial position in these financial statements.

Foreign currency translation

The accounts of Goldstrike are translated into US Dollars on the following basis:

- \* Monetary assets and liabilities are translated at the current rate of exchange.
- \* The weighted average exchange rate for the period is used to translate revenue, expenses, and gains or losses from the functional currency to the reporting currency.
- \* The gain or loss on translation is reported as a separate component of stockholders' equity and not recognized in net income. Gains or losses on remeasurement are recognized in current net income.
- \* Gains or losses from foreign currency transactions are recognized in current net income.
- \* Fixed assets are measured at historical exchange rates that existed at the time of the transaction.
- \* Depreciation is measured at historical exchange rates that existed at the time the underlying related asset was acquired.
- \* An analysis of the changes in the cumulative translation adjustment as disclosed as part of stockholders' equity. There are no cumulative translation adjustments to August 31, 2003.

Stock-based Compensation

SFAS No. 123, "Accounting for stock-based compensation" permits the use of either a "fair value based method" or the "intrinsic value method" defined in Accounting Principles Board Opinion 25, "Accounting for stock issued to employees" (APB 25) to account for stock-based compensation arrangements.

Companies that elect to use the method provided in APB25 are required to disclose pro forma net income and pro forma earnings per share information that would have resulted from the use of the fair value

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

based methods. The Company has elected to continue to determine the value of stock-based compensation arrangements with employees under the provisions of APB 25. No pro forma disclosures have been included with the accompanying financial statements as there was no pro forma effect to the Company's net loss or net loss per share.

Note 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont'd)

Mineral property acquisition costs and deferred exploration expenditures

- a) Mineral property acquisition costs are capitalized. Exploration costs and mine development costs to be incurred, including those to be incurred in advance of commercial production and those incurred to expand capacity of proposed mines, expensed as incurred while Goldstrike is in the exploration stage. Mine development costs to be incurred to maintain production will be expensed as incurred. Depletion and amortization expense related to capitalized mineral properties, exploration costs and mine development costs will be computed using the units-of-production method based on proved and probable reserves.
- b) US GAAP requires that whenever events or changes in circumstances indicate that the carrying amount may not be recoverable, the entity shall estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the discounted future cash flows is less than the carrying amount of the asset, an impairment loss (difference between the carrying amount and fair value) should be recognized as a component of income from continuing operations before income taxes.
- c) Where properties are disposed of, the sales proceeds are, firstly, applied as a recovery of mineral property acquisition costs, and secondly, as a gain or loss recorded in current operations.

Values

The amounts for mineral properties and deferred expenses represent costs incurred to date and are not intended to reflect present or future values. The recoverability of the amounts shown for mineral properties and deferred exploration costs is dependent on the confirmation of economically recoverable reserves, the ability of Goldstrike to obtain the necessary financing to successfully complete their development, including compliance with the requirements of lenders who may provide this financing from time to time, and upon future profitable operations.

Note 3. MINERAL PROPERTIES

### Part II

#### Information Not Required In The Prospectus

##### Indemnification Of Directors And Officers

Our officers and directors are indemnified as provided by the Nevada Revised Statutes and our bylaws.

-31-

Under the NRS, director immunity from liability to a company or its shareholders for monetary liabilities applies automatically unless it is specifically limited by a company's articles of incorporation that is not the case with our articles of incorporation. Excepted from that immunity are:

- (1) a willful failure to deal fairly with the company or its shareholders in connection with a matter in which the director has a material conflict of interest;
- (2) a violation of criminal law (unless the director had reasonable cause to believe that his or her conduct was lawful or no reasonable cause to believe that his or her conduct was unlawful);
- (3) a transaction from which the director derived an improper personal profit; and
- (4) willful misconduct.

Our bylaws provide that we will indemnify our directors and officers to the fullest extent not prohibited by Nevada law; provided, however, that we may modify the extent of such indemnification by individual contracts with our directors and officers; and, provided, further, that we shall not be required to indemnify any director or officer in connection with any proceeding (or part thereof) initiated by such person unless:

- (1) such indemnification is expressly required to be made by law;

## Edgar Filing: GOLKSTRIKE INC - Form SB-2

- (2) the proceeding was authorized by our Board of Directors;
- (3) such indemnification is provided by us, in our sole discretion, pursuant to the powers vested in us under Nevada law; or
- (4) such indemnification is required to be made pursuant to the bylaws.

Our bylaws provide that we will advance all expenses incurred to any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative, by reason of the fact that he is or was our director or officer, or is or was serving at our request as a director or executive officer of another company, partnership, joint venture, trust or other enterprise, prior to the final disposition of the proceeding, promptly following request. This advanced of expenses is to be made upon receipt of an undertaking by or on behalf of such person to repay said amounts should it be ultimately determined that the person was not entitled to be indemnified under our bylaws or otherwise.

-32-

Our bylaws also provide that no advance shall be made by us to any officer in any action, suit or proceeding, whether civil, criminal, administrative or investigative, if a determination is reasonably and promptly made: (a) by the board of directors by a majority vote of a quorum consisting of directors who were not parties to the proceeding; or (b) if such quorum is not obtainable, or, even if obtainable, a quorum of disinterested directors so directs, by independent legal counsel in a written opinion, that the facts known to the decision-making party at the time such determination is made demonstrate clearly and convincingly that such person acted in bad faith or in a manner that such person did not believe to be in or not opposed to our best interests.
