SECTION 8 - OTHER EVENTS

Item 8.01 Other Events

On February 3, 2009, Nord Resources Corporation (the "Company") issued a news release reporting that it has commenced the mining of new ore at its Johnson Camp Mine near Tucson, and also that it has elected not to proceed with its option to acquire the Coyote Springs exploration property in Arizona.

The Company announced that it has commenced the mining of new ore at its Johnson Camp Mine near Tucson, and that it is on schedule to commence production of copper cathode from new ore in the current fiscal quarter. The Company also announced that it anticipates achieving its planned production rate of 25 million pounds of copper per year by this spring.

The Company disclosed that it produced approximately 2.9 million pounds of copper from residual leaching during 2008, but this was a relatively expensive process on a unit cost basis as the result of the low yield realized from leaching old ore. The Company also disclosed that it anticipates benefiting from the marked decline in the price of sulfuric acid which is one of its largest operating costs, noting that the price for sulfuric acid has declined to less than US\$100 per ton from a peak in 2008 of US\$450 per ton.

Fisher Industries of Dickenson, North Dakota, is acting as the mining contractor for the Johnson Camp Mine.

Additionally, the Company announced that it has elected not to proceed with its option to acquire the Coyote Springs exploration property in Arizona which, in any event, is not material to the Company's overall operations. The Company indicated that it plans to focus its primary exploration efforts at Johnson Camp.

SECTION 9 - FINANCIAL STATEMENTS AND EXHIBITS

Item 9.01 Financial Statements and Exhibits

(d) Exhibits.

Exhibit	Description
99.1	News release of Nord Resources Corporation dated February 3, 2009.
