Notes:

Specific items- unless otherwise stated, any reference to earnings before interest, tax, depreciation and amortisation (EBITDA), operating profit,

operating costs, profit before tax and earnings per share (EPS) are measured before specific items. The commentary focuses on the trading results on an adjusted basis being before specific items. This is consistent with the way that financial performance is measured by management and is reported to the Board and the Operating Committee and assists in providing a meaningful analysis of the trading results of the group. The directors believe that presentation of the group's results in this way is relevant to the understanding of the group's financial performance as specific items are those that in management's judgement need to be disclosed by virtue of their size, nature or incidence. In determining whether an event or transaction is specific, management considers quantitative as well as qualitative factors such as the frequency or predictability of occurrence. Specific items may not be comparable to similarly titled measures used by other companies. Reported EBITDA, reported operating profit, reported profit before tax and reported EPS are the equivalent unadjusted or statutory measures.

Underlying revenue is a measure which seeks to reflect the underlying revenue performance of the group that will contribute to long term profitable growth. As such it excludes any increases or decreases in revenue as a result of acquisitions or disposals, any foreign exchange movements affecting revenue and any specific items. We are focusing on the trends in underlying revenue excluding transit revenue as transit traffic is low-margin and is significantly affected by reductions in mobile termination rates which have no impact on the group's profitability.
