ITEM 8.01 OTHER EVENTS.

On May 24, 2006 we announced financial results for our first quarter ended April 30, 2006. Service and technology revenues for the quarter, which included recognition of Comcast development revenue of \$7.2 million, increased 38% to \$55.1 million, compared with \$40.0 million for the same prior year period. Net loss for the quarter was (\$10.7) million or (\$0.13) per share, compared to a net loss of (\$857,000), or (\$0.01) per share, for the three months ended April 30, 2005, due primarily to the costs associated with litigation, more aggressive price offerings, and the expensing of stock options.

Our total subscriptions reached just over 4.4 million, with the addition of 53,000 total new subscriptions in the quarter, which represents 33% growth in the subscription base during the past year. TiVo-Owned subscription gross additions were 91,000 for the quarter, compared to 104,000 in the first quarter of last year. TiVo-Owned subscription net additions were 51,000 compared to 72,000 in the first quarter of last year. The installed base of DIRECTV TiVo subscriptions has stayed relatively flat, after accounting for the effects of churn on the DIRECTV TiVo subscription base, at approximately 2.9 million with the addition of 2,000 net new DIRECTV TiVo subscriptions.

Change in Accounting Policy

Effective February 1, 2006, we changed our method of accounting for the recognition of hardware costs in bundled sales programs where the customer prepays the arrangement fee. Previously, to the extent that the cost of the DVR exceeded the revenue allocated to the DVR, the excess costs were deferred and amortized over the period of the subscription. In this prepayment plan, we received the cash upfront from consumers, which allowed us to elect deferral of hardware costs over the service period. We now expense all hardware costs upon shipment of the DVR (direct expense method).

TiVo determined that the direct expense method was preferable to the prior accounting method after considering the accounting practices of competitors and companies within similar industries, the added clarity and ease of understanding of our reported results for investors, and the consistency with the recognition of hardware costs in bundled arrangements where the customer does not prepay the arrangement fee. We recorded the change in method of accounting in accordance with Statement of Financial Accounting Standards (SFAS) No. 154, Accounting Changes and Error Corrections. SFAS 154 requires that all elective accounting changes be made on a retrospective basis. As such, the accompanying condensed consolidated balance sheet as of January 31, 2006 has been adjusted to apply the direct expense method retrospectively to all prior periods. The net unamortized balance of previously deferred costs of \$2.6 million at January 31, 2006 is now reflected in the accompanying unaudited adjusted condensed consolidated balance sheet as an increase in accumulated deficit and a reduction in prepaid expenses and other, current and prepaid expenses and other, long-term. This change in accounting method has no impact on the condensed consolidated statements of operations for the three months ended April 30, 2005 as we did not offer bundled revenue transactions until the three months ended July 31, 2005. The impact of adopting the direct expense method resulted in an increase of approximately \$407,000 to net loss for the three months ended April 30, 2006. The following table details the impact of this accounting policy change on our fiscal year ended January 31, 2006 unaudited condensed consolidated financial statement by effected line items.

<u>TiVo-Owned Churn Rate per Month.</u> Management reviews this metric, and believes it may be useful to investors, in order to evaluate our ability to retain existing TiVo-Owned subscriptions (including both monthly and product lifetime subscriptions) by providing services that are competitive in the market. Management believes factors such as service enhancements, service commitments, higher customer satisfaction, and improved customer support may improve this metric. Conversely, management believes factors such as increased competition, lack of competitive service features, and increased price sensitivity may cause our TiVo-Owned Churn Rate per month to increase.

We define the TiVo-Owned Churn Rate per month as the total TiVo-Owned subscription cancellations in the period divided by the Average TiVo-Owned subscriptions for the period (including both monthly and product lifetime subscriptions), which then is divided by the number of months in the period. We calculate Average TiVo-Owned subscriptions for the period by adding the average TiVo-Owned subscriptions for each month and dividing by the number of months in the period. We calculate the average TiVo-Owned subscriptions for each month by adding the beginning and ending subscriptions for the month and dividing by two. We are not aware of any uniform standards for calculating churn and caution that our presentation may not be consistent with that of other companies.

Subscription Acquisition Cost or SAC. Management reviews this metric, and believes it may be useful to investors, in order to evaluate trends in the efficiency of our marketing programs and subscription acquisition strategies. We define SAC as our total acquisition costs for a given period divided by TiVo-Owned subscription gross additions for the same period. We define total acquisition costs as the sum of sales and marketing expenses, rebates, revenue share, and other payments to channel, minus hardware gross margin (defined as hardware revenues less cost of hardware revenues). As a result of the seasonal nature of our subscription growth, our SAC varies significantly during the year. Management primarily reviews this metric on an annual basis due to the timing difference between our recognition of promotional programs expense and the subsequent addition of the related subscription acquisition. Accordingly, we are also presenting SAC on a trailing twelve months basis as well in order to show SAC

over the longer-term. We do not include DIRECTV subscription gross additions in our calculation of SAC because we incur limited or no acquisition costs for new DIRECTV subscriptions. We are not aware of any uniform standards for calculating total acquisition costs or SAC and caution that our presentation may not be consistent with that of other companies.

Average Revenue Per Subscription or ARPU. Management reviews this metric, and believes it may be useful to investors, in order to evaluate the potential of our subscription base to generate revenues from a variety of sources, including subscription fees, advertising, and audience measurement research. ARPU does not include rebates, revenue share and other payments to channel that reduce our GAAP revenues, and as a result, you should not use ARPU as a substitute for measures of financial performance calculated in accordance with GAAP. Management believes it is useful to consider this metric excluding the costs associated with rebates, revenue share and other payments to channel because of the discretionary nature of these expenses and because management believes these expenses are more appropriately monitored as part of SAC. We are not aware of any uniform standards for calculating ARPU and caution that our presentation may not be consistent with that of other companies.

We calculate ARPU per month for TiVo-Owned subscriptions by subtracting DIRECTV-related service revenues (which includes DIRECTV subscription service revenues and DIRECTV-related advertising revenues) from our total reported service revenues and dividing the result by the number of months in the period. We then divide by Average TiVo-Owned subscriptions for the period, calculated as described above for churn rate. The preceding table shows this calculation and reconciles ARPU for TiVo-Owned subscriptions to our reported service and technology revenues.

For fiscal year 2007, pursuant to the recently amended DIRECTV agreement, TiVo reserves a portion of DIRECTV subscription fees as a non-refundable credit to fund mutually agreed development, maintenance, and support services. The recurring monthly economics of the agreement are similar to the economics for DIRECTV receivers with TiVo service activated since 2002.

We calculate ARPU per month for DIRECTV subscriptions by first subtracting TiVo-Owned-related service revenues (which includes TiVo-Owned subscription service revenues and TiVo-Owned related advertising revenues) from our total reported service revenues. Then we divide average revenues per month for DIRECTV-related service revenues by average subscriptions for the period.

Forward-Looking Statements

This release contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements relate to, among other things, TiVo s business development strategies, current and future partnerships, the expected future deployment and availability of the TiVo service, future TiVo service features and advertising technologies, and other factors that may affect future earnings or financial results. Forward-looking statements generally can be identified by the use of forward-looking terminology such as, believe, expect, may, will, intend, estimate, continue, or similar expressions or the negative of those terms or expressions. Such statements involve risks and uncertainties, which could cause actual results to vary materially from those expressed in or indicated by the forward-looking statements. Factors that may cause actual results to differ materially include delays in development, competitive service offerings and lack of market acceptance, as well as the other potential factors described under Risk Factors in the Company s public reports filed with the Securities and Exchange Commission, including the Company s Annual Report on Form 10-K for the fiscal year ended January 31, 2006. We caution you not to place undue reliance on forward-looking statements, which reflect an analysis only and speak only as of the date hereof.
