UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

Quarterly Report under Section 13 or 15(d) of the Securities Exchange Act of 1934
For the Quarterly Period Ended June 30, 2008

Or

Transition Report Under Section 13 or 15(d) of the Securities Exchange Act of 1934
For the Transition Period From _____ to _____

Commission File Number 0-7406

PrimeEnergy Corporation

(Exact name of registrant as specified in its charter)

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

Delaware **84-0637348**
(State or other jurisdiction of (IRS employer
incorporation or organization) identification number)
One Landmark Square, Stamford, Connecticut 06901
(Address of principal executive offices)
(203) 358-5700
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicated by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filings required for the past 90 days. Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer" and "smaller reporting company" in Rule 12-B of the Exchange Act.

Large Accelerated Filer Accelerated Filer
Non-Accelerated Filer Smaller Reporting Company
(Do not check if smaller reporting company)

Indicated by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of each class of the Registrant's Common Stock as of August 11, 2008 was: Common Stock, \$0.10 par value, 3,050,141 shares.

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

(1) Interim Financial Statements:

The accompanying consolidated financial statements of PrimeEnergy Corporation, with the exception of the consolidated balance sheet at December 31, 2007, have not been audited by independent public accountants. In the opinion of management, the accompanying financial statements reflect all adjustments necessary to present fairly our financial position at June 30, 2008 and our income and cash flows for the six months ended June 30, 2008 and 2007. All such adjustments are of a normal recurring nature. Certain amounts presented in prior period financial statements have been reclassified for consistency with current period presentation. The results for interim periods are not necessarily indicative of annual results.

Effective January 1, 2008, the Company adopted those provisions of Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements, that were required to be adopted. There was no financial statement impact upon adoption on January 1, 2008. For further information regarding the adoption of SFAS No. 157, please refer to Note 11 of the Notes to the Consolidated Financial Statements.

SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115, became effective on January 1, 2008 and permits companies to choose, at specified dates, to measure certain eligible financial instruments at fair value. The provisions of SFAS No. 159 apply only to entities that elect to use the fair value option and to all entities with available-for-sale and trading securities. At the effective date, companies may elect the fair value option for eligible items that exist at that date, and the effect of the first remeasurement to fair value must be reported as a cumulative-effect adjustment to the opening balance of retained earnings. Since the Company has not elected to adopt the fair value option for eligible items, SFAS No. 159 has not had an impact on its financial position or results of operations.

Recently Issued Accounting Standards:

In May 2008, the FASB issued SFAS No. 162, The Hierarchy of Generally Accepted Accounting Principles which identifies a consistent framework for selecting accounting principles to be used in preparing financial statements for nongovernmental entities that are presented in conformity with United States generally accepted accounting principles (GAAP). The current GAAP hierarchy was criticized due to its complexity, ranking position of FASB Statements of Financial Accounting Concepts and the fact that it is directed at auditors rather than entities. The statement specifies that the reporting entity, not the auditors, is responsible for its compliance with GAAP. SFAS No. 162 will be effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles. The Company does not believe that SFAS No. 162 will have an impact on its financial position, result of operations or cash flows. The Company will adopt SFAS 162 when it becomes effective.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

In March 2008, the FASB issued SFAS No. 161, *Disclosure about Derivative Instruments and Hedging Activities*, an amendment of FASB Statement No. 133. SFAS No. 161 amends and expands the disclosure requirements of SFAS No. 133 with the intent to provide users of financial statements with an enhanced understanding of: (i) how and why an entity uses derivative instruments; (ii) how derivative instruments and related hedged items are accounted for under SFAS No. 133 and its related interpretations; and (iii) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. This statement is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. We are in the process of evaluating the impact of SFAS No. 161 on our consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interest in Consolidated Financial Statements*, an amendment of Accounting Research Bulletin (ARB) No. 51. SFAS No. 160 clarifies that a noncontrolling interest (previously commonly referred to as a minority interest) in a subsidiary is an ownership interest in the consolidated entity and should be reported as equity in the consolidated financial statements. The presentation of the consolidated income statement has been changed by SFAS No. 160, and consolidated net income attributable to both the parent and the noncontrolling interest is now required to be reported separately. Previously, net income attributable to the noncontrolling interest was typically reported as an expense or other deduction in arriving at consolidated net income and was often combined with other financial statement amounts. In addition, the ownership interests in subsidiaries held by parties other than the parent must be clearly identified, labeled, and presented in the equity in the consolidated financial statements separately from the parent's equity. Subsequent changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary should be accounted for consistently, and when a subsidiary is deconsolidated, any retained noncontrolling equity interest in the former subsidiary must be initially measured at fair value. Expanded disclosures, including a reconciliation of equity balances of the parent and noncontrolling interest are also required. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008 and earlier adoption is prohibited. Prospective application is required. We are in the process of evaluating the impact of SFAS No. 160 on our consolidated financial statements.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

In December 2007, the FASB issued SFAS No. 141(R), Business Combinations. SFAS No. 141(R) was issued in an effort to continue the movement toward the greater use of fair values in financial reporting and increased transparency through expanded disclosures. It changes how business acquisitions are accounted for and will impact financial statements at the acquisition date and in subsequent periods. Certain of these changes will introduce more volatility into earnings. The acquirer must now record all assets and liabilities of the acquired business at fair value, and related transaction and restructuring costs will be expensed rather than the previous method of being capitalized as part of the acquisition. SFAS No. 141(R) also impacts the annual goodwill impairment test associated with acquisitions, including those that close before the effective date of SFAS No. 141(R). The definitions of a business and a business combination have been expanded, resulting in more transactions qualifying as business combinations. SFAS No. 141(R) is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 31, 2008 and earlier adoption is prohibited. We cannot predict the impact that the adoption of SFAS No. 141(R) will have on our financial position, results of operations or cash flows with respect to any acquisitions completed after December 31, 2008.

(2) Significant Acquisitions, Dispositions and Property Activity

The Company makes an annual offer to repurchase the interests of the partners and trust unit holders in certain of the Partnerships. The Company purchased such interests in an amount totaling \$153,000 for the six months ending June 30, 2008 and \$371,000 for the year ending December 31, 2007. The Company's proportionate share of assets, liabilities and results of operations related to the interests in the Partnerships are included in the consolidated financial statements.

(3) Restricted Cash and Cash Equivalents:

Restricted cash and cash equivalents include \$5,312,000 and \$3,633,000 at June 30, 2008 and December 31, 2007, respectively, of cash primarily pertaining to undistributed revenue payments. There were corresponding accounts payable recorded at June 30, 2008 and December 31, 2007 for these liabilities.

Trade	\$ 17,081,000	\$ 12,364,000
Royalty and other owners	15,824,000	11,209,000
Other	4,447,000	3,153,000
Total	\$ 37,352,000	\$ 26,726,000
Accrued Liabilities:		
Compensation and related expenses	\$ 3,135,000	\$ 1,687,000
Property cost	2,818,000	4,472,000
Income tax	2,147,000	
Other	3,138,000	3,794,000
Total	\$ 11,238,000	\$ 9,953,000

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

(5) Property and Equipment:

Property and equipment at June 30, 2008 and December 31, 2007 consisted of the following:

	June 30, 2008	December 31, 2007
Proved oil and gas properties, at cost	\$ 390,725,000	\$ 368,828,000
Unproved oil and gas properties, at cost	3,315,000	4,458,000
Less, accumulated depletion and depreciation	(172,741,000)	(140,115,000)
	\$ 221,299,000	\$ 233,171,000
Field service equipment and other	19,546,000	18,029,000
Less, accumulated depreciation	(10,545,000)	(9,820,000)
	\$ 9,001,000	\$ 8,209,000
Total net property and equipment	\$ 230,300,000	\$ 241,380,000

Total interest incurred during the year ended December 31, 2007 was \$12,984,000. Of this amount, the Company capitalized \$1,922,000. Capitalized interest is included as part of the cost of oil and gas properties. The capitalized rates are based upon the Company's weighted-average cost of borrowings used to finance expenditures. There was no interest capitalized during the first half of 2008.

(6) Long-Term Debt:

Bank Debt:

The Company currently has credit facilities totaling \$360 million, consisting of a \$200 million credit facility through Guaranty Bank (the offshore facility) and a \$160 million credit facility through a syndicate of banks led by Guaranty Bank (the onshore facility). The offshore facility's maturity date is 2009 and onshore credit facility matures in 2011.

Availability under the credit facilities is based on the loan value assigned to Prime's oil and gas properties. The determination of the Borrowing Base is made by the lenders taking into consideration the estimated value of Prime's oil and gas properties in accordance with the lenders' customary practices for oil and gas loans. This process involves reviewing Prime's estimated proved reserves and their valuation. The Borrowing Base is re-determined semi-annually, and the available borrowing amount could be increased or decreased as a result of such redeterminations. In addition, Prime and the lenders each have discretion at any time to have the Borrowing Base re-determined. A revision to Prime's reserves may prompt such a

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

request on the part of the lenders, which could possibly result in a reduction in the Borrowing Base and availability under the credit facilities. If outstanding borrowings under either of the credit facilities exceed the applicable portion of the Borrowing Base, Prime would be required to repay the excess amount within a prescribed period. If we are unable to pay the excess amount, it would cause an event of default.

The credit facilities include terms and covenants that require the Company to maintain, as defined, a minimum current ratio, tangible net worth, debt coverage ratio and interest coverage ratio, and restrictions are placed on the payment of dividends and the amount of treasury stock the Company may purchase. The credit facilities are collateralized by substantially all of the Company's assets. The Company is required to mortgage, and grant a security interest in, consolidated proved oil and gas properties. Prime also pledged the stock of several subsidiaries to the lenders to secure the credit facilities.

During the second quarter 2008, the Company entered into an amended and restated credit agreement related to the offshore credit facility allowing for a subordinated credit facility with a private lender and the release of certain collateral which was then pledged to the new lender under a separate credit agreement.

At June 30, 2008, the borrowing bases and outstanding balances of the Company's bank debt were \$96 million and \$89.6 million, respectively, under the onshore credit facility at a weighted average interest rate of 5.92%, and \$29.4 million under the offshore credit facility at a weighted average interest rate of 5.28%. Total outstanding bank debt was \$119 million at June 30, 2008. The combined average interest rates paid on outstanding bank borrowings subject to interest at the bank's base rate and on outstanding bank borrowings bearing interest based upon the LIBO rate were 6.03% during the first six months of 2008 as compared to 8.89% during the same period of 2007.

The Company entered into interest rate hedge agreements to help manage interest rate exposure. These contracts include interest rate swaps. Interest rate swap transactions generally involve the exchange of fixed and floating rate interest payment obligations without the exchange of the underlying principal amounts. The Company entered into interest swap agreements for a period of two years, beginning in April 2008, related to \$60 million of Company bank debt resulting in a fixed rate of 4.375%. The underlying debt contracts above are repriced quarterly based upon the three-month LIBOR rates.

Indebtedness to related parties - noncurrent:

During the second quarter 2008, the Company's offshore subsidiary entered into a subordinated credit facility with a private lender with an availability of \$50 million. The private lender has specific collateral pledged under a separate credit agreement. The private lender is a member of the Company's Board of Directors.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

The current advances of this credit facility are \$20 million. The facility matures in January 2010. The new loan bears interest at the rate of 10% per annum.

(7) Other Long-Term Obligations and Commitments:

Operating Leases:

The Company has several non-cancelable operating leases, primarily for rental of office space, that have a term of more than one year.

	<i>Operating Leases</i>
2008	\$ 297,000
2009	350,000
2010	71,000
2011	5,000
Thereafter	
Total minimum payments	\$ 723,000

Asset Retirement Obligation:

A reconciliation of our liability for plugging and abandonment costs for the Six Months Ended June 30, 2008 and the year ended December 31, 2007 is as follows:

	June 30, 2008	December 31, 2007
Asset retirement obligation beginning of period	\$ 15,962,000	\$ 6,440,000
Liabilities incurred	268,000	468,000
Liabilities settled	(134,000)	(367,000)
Accretion expense	549,000	434,000
Revisions in estimated liabilities	1,211,000	8,987,000
Asset retirement obligation end of period	\$ 17,856,000	\$ 15,962,000

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

The Company's liability is determined using significant assumptions, including current estimates of plugging and abandonment costs, annual inflation of these costs, the productive life of wells and our risk-adjusted interest rate. Changes in any of these assumptions can result in significant revisions to the estimated asset retirement obligation. Revisions to the asset retirement obligation are recorded with an offsetting change to producing properties, resulting in prospective changes to depreciation, depletion and amortization expense and accretion of discount. Because of the subjectivity of assumptions and the relatively long life of most of our wells, the costs to ultimately retire our wells may vary significantly from previous estimates.

(8) Contingent Liabilities:

The Company, as managing general partner of the affiliated Partnerships, is responsible for all Partnership activities, including the drilling of development wells and the production and sale of oil and gas from productive wells. The Company also provides the administration, accounting and tax preparation work for the Partnerships, and is liable for all debts and liabilities of the affiliated Partnerships, to the extent that the assets of a given limited Partnership are not sufficient to satisfy its obligations. As of June 30, 2008, the affiliated Partnerships have established cash reserves in excess of their debts and liabilities and the Company believes these reserves will be sufficient to satisfy Partnership obligations.

The Company is subject to environmental laws and regulations. Management believes that future expenses, before recoveries from third parties, if any, will not have a material effect on the Company's financial condition. This opinion is based on expenses incurred to date for remediation and compliance with laws and regulations which have not been material to the Company's results of operations.

(9) Stock Options and Other Compensation:

In May 1989, non-statutory stock options were granted by the Company to four key executive officers for the purchase of shares of common stock. At June 30, 2008 and 2007, options on 767,500 were outstanding and exercisable at prices ranging from \$1.00 to \$1.25.

(10) Related Party Transactions:

The Company acts as the managing general partner, providing administration, accounting and tax preparation services for the Partnerships. Certain directors have limited and general partnership interests in several of these Partnerships. As the managing general partner in each of the Partnerships, the Company receives approximately 5% to 15% of the net revenues of each Partnership as a carried interest in the Partnerships properties. The Company makes an annual offer to repurchase the interests of the partners and trust unit holders in certain of the Partnerships. The Company purchased such interests in an amount totaling \$153,000 in the second quarter 2008 and \$371,000 during 2007.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

Treasury stock purchases in 2008 and 2007 included shares acquired from related parties. Purchases from related parties included a total of 70,000 shares purchased for a total consideration of \$3,500,000 during the first half of 2008 and 31,700 shares purchased for a total consideration of \$1,743,000 in 2007.

Due to related parties primarily represents receipts collected by the Company as agent, for the partnerships for oil and gas sales net of expenses. As of June 30, 2008, also in due to related parties is the amount of accrued interest owed to the related party, a member of the Company's Board of Directors, with whom the Company's offshore subsidiary entered into a credit agreement. The agreement provides for a loan of \$20 million at a rate of 10% per annum and is secured by certain oil and gas properties and the Company's interest in a limited partnership which owns a shopping center in Alabama. The total due to related parties at June 30, 2008 and December 31, 2007 was \$1,179,000 and \$1,563,000 respectively. Included at June 30, 2008 was \$164,000 of accrued interest on the related party loan.

The Partnership agreements allow PrimeEnergy Management Corporation to receive reimbursement for property acquisition and development costs and general and administrative overhead, incurred on behalf of the Partnerships and related party joint venture partners who are members of the Company's Board of Directors. Receivables from related parties consist of reimbursable general and administrative costs, lease operating expenses and reimbursement for property development and related costs. Due from related parties was \$281,000 at June 30, 2008 and \$212,000 at December 31, 2007.

(11) Financial Instruments

Adoption of SFAS No. 157

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which establishes a formal framework for measuring fair values of assets and liabilities in financial statements that are already required by United States generally accepted accounting principles to be measured at fair value. SFAS No. 157 clarifies guidance in FASB Concepts Statement (CON) No. 7 which discusses present value techniques in measuring fair value. Additional disclosures are also required for transactions measured at fair value. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. In February 2008, the FASB issued FASB Staff Position (FSP) No. FAS 157-2, Effective Date of FASB Statement No. 157, which granted a one year deferral (to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years) for certain non-financial assets and liabilities to comply with SFAS No. 157. The Company will adopt the provisions of FAS No. 157 covered under FSP No. 157-2 on January 1, 2009. Additionally, in February 2008, the FASB issued FSP No. FAS 157-1, Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13, which amends SFAS No. 157 to

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

exclude SFAS No. 13 and related pronouncements that address fair value measurements for purposes of lease classification and measurement. FSP No. FAS 157-1 is effective upon the initial adoption of SFAS No. 157. The Company has adopted SFAS No. 157 and the related FSPs discussed above which did not have an impact on its financial position or results of operations for the quarter ended June 30, 2008.

As defined in SFAS No. 157, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). The transaction is based on a hypothetical transaction in the principal or most advantageous market considered from the perspective of the market participant that holds the asset or owes the liability.

The valuation techniques that can be used under SFAS No. 157 are the market approach, income approach or cost approach. The market approach uses prices and other information for market transactions involving identical or comparable assets or liabilities, such as matrix pricing. The income approach uses valuation techniques to convert future amounts to a single discounted present amount based on current market conditions about those future amounts, such as present value techniques, option pricing models (i.e. Black-Scholes model) and binomial models (i.e. Monte-Carlo model). The cost approach is based on current replacement cost to replace an asset.

The Company utilizes market data or assumptions that market participants who are independent, knowledgeable and willing and able to transact would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated or generally unobservable. The Company attempts to utilize valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The Company is able to classify fair value balances based on the observability of those inputs. SFAS No. 157 establishes a formal fair value hierarchy based on the inputs used to measure fair value. The hierarchy gives the highest priority level 1 measurements and the lowest priority to level 3 measurements, and accordingly, level 1 measurements should be used whenever possible.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

The three levels of the fair value hierarchy as defined by SFAS No. 157 are as follows:

Level 1: Valuations utilizing quoted, unadjusted prices for identical assets or liabilities in active markets that the Company has the ability to access. This is the most reliable evidence of fair value and does not require a significant degree of judgment. Examples include exchange-traded derivatives and listed equities that are actively traded.

Level 2: Valuations utilizing quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly for substantially the full term of the asset or liability. Financial instruments that are valued using models or other valuation methodologies are included. Models used should primarily be industry-standard models that consider various assumptions and economic measures, such as interest rates, yield curves, time value, volatilities, contract terms, current market prices, credit risk or other market-corroborated inputs. Examples include most over-the-counter derivatives (non-exchange traded), physical commodities, most structured notes and municipal and corporate bonds.

Level 3: Valuations utilizing significant, unobservable inputs. This provides the least objective evidence of fair value and requires a significant degree of judgment. Inputs may be used with internally developed methodologies and should reflect an entity's assumptions using the best information available about the assumptions that market participants would use in pricing an asset or liability. Examples include certain corporate loans, real-estate and private equity investments and long-dated or complex over-the-counter derivatives.

Depending on the particular asset or liability, input availability can vary depending on factors such as product type, longevity of a product in the market and other particular transaction conditions. In some cases, certain inputs used to measure fair value may be categorized into different levels of the fair value hierarchy. For disclosure purposes under SFAS No. 157, the lowest level that contains significant inputs used in valuation should be chosen. Per SFAS No. 157, the Company has classified its assets and liabilities into these levels depending upon the data relied on to determine the fair values. The fair values of the Company's natural gas and crude oil price collars and swaps are valued based upon quotes obtained from counterparties to the agreements and are designated as Level 3.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

The following fair value hierarchy table presents information about the Company's liabilities measured at fair value on a recurring basis as of June 30, 2008:

	Quoted Prices in Active Markets For Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of June 30, 2008
Assets				
Interest Rate Contracts			\$ 534,000	\$ 534,000
Total Assets			\$ 534,000	\$ 534,000
Liabilities				
Commodity Derivative Contracts			\$ (35,592,000)	\$ (35,592,000)
Total Liability			\$ (35,592,000)	\$ (35,592,000)

The derivative contracts were measured based on quotes from the Company's counterparties. Such quotes have been derived using a model that considers various inputs including current market and contractual prices for the underlying instruments, quoted forward prices for natural gas and crude oil, volatility factors and interest rates, such as a LIBOR curve for a similar length of time as the derivative contract term. Although the Company utilizes multiple quotes to assess the reasonableness of its values, the Company has not attempted to obtain sufficient corroborating market evidence to support classifying these derivative contracts as Level 2.

The following table sets forth a reconciliation of changes in the fair value of financial assets and liabilities classified as level 3 in the fair value hierarchy.

Net liabilities as of January 1, 2008	\$ (3,618,000)
Total realized and unrealized losses:	
Included in earnings	(4,284,000)
Included in other comprehensive income	(27,719,000)
Purchases, sales, issuances and settlements, net	563,000
Net liabilities as of June 30, 2008	\$ (35,058,000)

- (a) Amounts reported in net income are classified as sales for commodity derivative instruments and as a reduction to interest expense for interest rate swap instruments.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

Derivative Instruments and Hedging Activity:

The Company periodically enters into derivative commodity instruments to hedge its exposure to price fluctuations on natural gas and crude oil production. At June 30, 2008, the Company had eleven cash flow hedges open: two natural gas price swap arrangements and nine crude oil collar arrangements. At June 30, 2008, \$55.8 million (\$35.6 million net of tax) unrealized loss was recorded in Accumulated Other Comprehensive Income, \$31.8 million and \$23.8 million short-term and long-term derivative payable. Also included in Accumulated Other Comprehensive Income is unrealized gain on interest rate swaps of \$835,000 (\$534,000 net of tax), and \$267,000 in both short and long-term derivative assets.

The change in the fair value of derivatives designated as hedges that is effective is initially recorded to Accumulated Other Comprehensive Income. The ineffective portion, if any, of the change in the fair value of derivatives designated as hedges, and the change in fair value of all other derivatives, is recorded currently in earnings as a component of oil and gas sales.

As of June 30, 2008, natural gas price swaps cover 2,985 Mmcf of production at a weighted average price of \$8.04 for 2008 and \$9.75 for 2009. The oil price collar covers 731 Mbbl of production at a floor price ranging from \$60.00 to \$65.00, a ceiling price ranging from \$77.40 to \$86.50 and a third-tier call of \$100 on one collar arrangement.

Assuming no change in commodity prices, after June 30, 2008, the Company would expect to reclassify to the Statement of Operations, over the next 12 months, \$20.7 million in after-tax loss associated with commodity hedges. This reclassification represents the net short-term payables associated with open positions currently not reflected in earnings at June 30, 2008 related to anticipated remaining 2008 production and 2009 production through June.

Assuming no change in interest rates after June 30, 2008, the Company would expect to reclassify to the statement of operations \$267,000 in after tax gains associated with the interest rate swaps. This reclassification represents interest swaps which will expire within one year of June 30, 2008.

The Company entered into interest rate hedge agreements to help manage interest rate exposure. These contracts include interest rate swaps. Interest rate swap transactions generally involve the exchange of fixed and floating rate interest payment obligations without the exchange of the underlying principal amounts. The Company entered into interest swap agreements for a period of two years, beginning in April 2008, related to \$60 million of Company bank debt resulting in a fixed rate of 4.375%. The underlying debt contracts above are repriced quarterly based upon the three-month LIBOR rates.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

June 30, 2008

At June 30, 2008, we had two natural gas price swap contracts covering our 2008 and 2009 production as follows:

Contract Period	Natural Gas Price Swaps		
	Volume in Mmcf	Weighted Average Price (per Mcf)	Net Unrealized Gain (In thousands)
Third Quarter 2008	1,005	8.07	(3,333)
Fourth Quarter 2008	1,005	8.07	(3,604)
Full Year 2008	2,010	\$ 8.04	\$ (6,937)
First Quarter 2009	975	\$ 9.75	\$ (2,662)
Full Year 2009	975	\$ 9.75	\$ (2,662)

We are exposed to market risk on these open contracts, to the extent of changes in market prices of natural gas and crude oil. However, the market risk exposure on these hedged contracts is generally offset by the gain or loss recognized upon the ultimate sale of the commodity that is hedged.

The preceding paragraphs contain forward-looking information concerning future production and projected gains and losses, which may be impacted both by production and by changes in future market prices of energy commodities. See [Forward-Looking Information](#) for further details.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
This discussion should be read in conjunction with the financial statements of the Company and notes thereto.

LIQUIDITY AND CAPITAL RESOURCES

Cash flow provided by operations for the six month period ended June 30, 2008 was \$47,628,000. Excluding the effects of significant unforeseen expenses or other income, our cash flow from operations fluctuates primarily because of variations in oil and gas production and prices or changes in working capital accounts. Our oil and gas production will vary based on actual well performance but may be curtailed due to factors beyond our control. Hurricanes in the Gulf of Mexico may shut down our production for the duration of the storm's presence in the Gulf or damage production facilities so that we cannot produce from a particular property for an extended amount of time. In addition, downstream activities on major pipelines in the Gulf of Mexico can also cause us to shut-in production for various lengths of time.

Our realized oil and gas prices vary due to world political events, supply and demand of products, product storage levels, and weather patterns. We sell the vast majority of our production at spot market prices. Accordingly, product price volatility will affect our cash flow from operations. To mitigate price volatility we sometimes lock in prices for some portion of our production through the use of financial instruments.

The Company's activities include development and exploratory drilling. The Company's strategy is to develop a balanced portfolio of drilling prospects that includes lower risk wells with a high probability of success and higher risk wells with greater economic potential.

For 2008 we have budgeted \$60 million for exploration and development in our core operating areas. As of August 2008, the Company has committed approximately \$27 million on wells in these areas that have been spudded since January 1, 2008. We expect to continue to make significant capital expenditures over the next several years as part of our long-term growth strategy.

Table of Contents

PrimeEnergy Corporation

June 30, 2008

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

If our exploratory drilling results in significant new discoveries, we will have to expend additional capital in order to finance the completion, development, and potential additional opportunities generated by our success. We believe that, because of the additional reserves resulting from the successful wells and our record of reserve growth in recent years, we will be able to access sufficient additional capital through additional bank financing.

The Company has in place both a stock repurchase program and a limited partnership interest repurchase program. Spending under these programs in 2007 was \$4.8 million. As of June 30, 2008 the Company has expended approximately \$4.5 million on these programs. The amount of treasury stock the Company may purchase is restricted by debt covenants with the Company's primary lender.

The Company currently maintains two credit facilities with a bank totaling \$360 million, with a combined current borrowing base of \$119 million. The bank reviews the borrowing base semi-annually and, at their discretion, may decrease or propose an increase to the borrowing base relative to a redetermined estimate of proved oil and gas reserves. Our oil and gas properties are pledged as collateral for the line of credit and we are subject to certain financial covenants defined in the agreement. We are currently in compliance with these financial covenants. If we do not comply with these covenants on a continuing basis, the lenders have the right to refuse to advance additional funds under the facility and/or declare all principal and interest immediately due and payable.

During the second quarter of 2008, the Company's offshore subsidiary arranged a subordinated credit facility with a private lender controlled by a director of the Company. The facility provides availability of \$50 million and is secured by properties released by the bank and pledged under this agreement. The current advances of this credit facility are \$20 million due January 2010.

It is the goal of the Company to increase its oil and gas reserves and production through the acquisition and development of oil and gas properties. The Company also continues to explore and consider opportunities to further expand its oilfield servicing revenues through additional investment in field service equipment. However, the majority of the Company's capital spending is discretionary, and the ultimate level of expenditures will be dependent on the Company's assessment of the oil and gas business environment, the number and quality of oil and gas prospects available, the market for oilfield services, and oil and gas business opportunities in general.

PrimeEnergy Corporation

June 30, 2008

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

RESULTS OF OPERATIONS

Revenues and net income during the six month period ended June 30, 2008, as compared to the same periods in 2007 reflect the increased oil and gas sales, presented below, offset by exploration costs and depreciation and depletion of oil and gas properties. The table summarizes production volumes and average sales prices realized (including realized gains and losses from derivatives).

	Six months Ended June 30,			Three Months Ended June 30,		
	2008	2007	Increase / (Decrease)	2008	2007	Increase / (Decrease)
Barrels of Oil Produced	287,000	227,000	60,000	149,000	136,000	13,000
Average Price Received	\$ 92.46	\$ 57.35	\$ 35.11	\$ 106.57	\$ 58.22	\$ 48.35
Oil Revenue	\$ 26,536,000	\$ 13,019,000	\$ 13,517,000	\$ 15,879,000	\$ 7,918,000	\$ 7,961,000
MCF of Gas Produced	4,441,000	4,326,000	115,000	2,109,000	2,481,000	(372,000)
Average Price Received	\$ 9.31	\$ 8.01	\$ 1.30	\$ 9.89	\$ 7.83	\$ 2.06
Gas Revenue	\$ 41,354,000	\$ 34,653,000	\$ 6,701,000	\$ 20,859,000	\$ 19,425,000	\$ 1,434,000
Total Oil & Gas Revenue	\$ 67,890,000	\$ 47,672,000	\$ 20,218,000	\$ 36,738,000	\$ 27,343,000	\$ 9,395,000

Oil and gas prices received excluding the impact of derivatives were;

	Six months Ended June 30,			Three Months Ended June 30,		
	2008	2007	Increase / (Decrease)	2008	2007	Increase / (Decrease)
Oil Price	\$ 109.26	\$ 56.06	\$ 53.20	\$ 128.71	\$ 57.63	\$ 71.08
Gas Price	\$ 9.74	\$ 7.12	\$ 2.62	\$ 11.25	\$ 7.56	\$ 3.69

Changes in production are due to production from properties added during 2007 and early 2008 offset by the natural decline of existing properties. The increase in oil production is related to our onshore drilling program while the change in gas production reflects the production from our offshore drilling program.

Lease operating expense for the six months of 2008 increased by \$3,925,000 compared to 2007 due to the addition of lease operating expenses of new properties, increased production taxes related to higher prices and overall price increases in oil field services.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(Continued)

General and administrative expenses remained flat in the first six months of 2008 as compared to 2007.

Field Service income and expense for the six months of 2008 increased \$936,000 and \$524,000, respectively, compared to 2007. These increases reflect higher utilization of equipment combined with an upward trend in rates and costs during 2008.

Depreciation and depletion increased to \$35,690,000 in 2008 from \$20,600,000 in 2007. This increase is directly attributed to the majority of the Company's offshore properties coming on line late in 2007. These additions increased the overall property basis and production for the company

This Report contains forward-looking statements that are based on management's current expectations, estimates and projections. Words such as expects, anticipates, intends, plans, believes, projects and estimates, and variations of such words and similar expressions are intended to identify such forward-looking statements. These statements constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, and are subject to the safe harbors created thereby. These statements are not guarantees of future performance and involve risks and uncertainties and are based on a number of assumptions that could ultimately prove inaccurate and, therefore, there can be no assurance that they will prove to be accurate. Actual results and outcomes may vary materially from what is expressed or forecast in such statements due to various risks and uncertainties. These risks and uncertainties include, among other things, the possibility of drilling cost overruns and technical difficulties, volatility of oil and gas prices, competition, risks inherent in the Company's oil and gas operations, the inexact nature of interpretation of seismic and other geological and geophysical data, imprecision of reserve estimates, and the Company's ability to replace and expand oil and gas reserves. Accordingly, stockholders and potential investors are cautioned that certain events or circumstances could cause actual results to differ materially from those projected.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
Interest rate and swap activity.

The Company is exposed to interest rate risk on its line of credit, which has variable rates based upon the lenders base rate, as defined, and the London Inter-Bank Offered rate. Based on the weighted average balances outstanding during the first half of 2008, a hypothetical 2.5% increase in the applicable interest rates would have increased interest expense for the Six Months Ended June 30, 2008 by approximately \$1,601,000.

The Company entered into interest rate hedge agreements to help manage interest rate exposure. These contracts include interest rate swaps. Interest rate swap transactions generally involve the exchange of fixed and floating rate interest payment obligations without the exchange of the underlying principal amounts. The Company entered into swap agreements for

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (Continued)

a period of two years, beginning in April 2008, related to \$60 million of Company bank debt resulting in a fixed rate of 4.375%. The underlying debt contracts are repriced quarterly based upon the three-month LIBOR rates.

Derivative Instruments and Hedging Activity.

Our hedging strategy is designed to reduce the risk of price volatility for our production in the natural gas and crude oil markets. Our hedging arrangements apply to only a portion of our production and provide only partial price protection. These hedging arrangements limit the benefit to us of increases in prices, but offer protection in the event of price declines. Further, if our counterparties defaulted, this protection might be limited as we might not receive the benefits of the hedges. Please read the discussion below and Note 11 of the Notes to Consolidated Financial Statements for a more detailed discussion of our hedging arrangements.

Hedges on Production Collars.

From time to time, we enter into natural gas and crude oil collar agreements with counterparties to hedge price risk associated with a portion of our production. These cash flow hedges are not held for trading purposes. Under the collar arrangements, if the index price rises above the ceiling price, we pay the counterparty. If the index price falls below the floor price, the counterparty pays us. In the case of a three-way collar if the index price rises above the third tier price, the counterparty pays us.

Hedges on Production Swaps.

From time to time, we enter into natural gas and crude oil swap agreements with counterparties to hedge price risk associated with a portion of our production. These cash flow hedges are not held for trading purposes. Under the swap agreements, if the index price rises above the swap price, we pay the counterparty. If the index falls below the swap price, the counterparty pays us.

ITEM 4T. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

(a) Management's Quarterly Report on Internal Control Over Financial Reporting.

The Company's management is responsible for establishing and maintaining an adequate system of internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)). Under the supervision and with the participation of our senior management, consisting of our chief executive officer and our chief financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this report (the Evaluation Date). Based on that evaluation, the Company's management, including our chief executive officer and chief financial officer, concluded that as of the Evaluation Date our disclosure controls and procedures are effective such that the information relating to us required to be disclosed in our Securities and Exchange Commission (SEC) reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles in the United States. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance of achieving their control objectives. In evaluating the effectiveness of our internal control over financial reporting, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control - Integrated Framework. This quarterly report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this quarterly report.

(b) Changes in Internal Control over Financial Reporting.

There were no changes in our internal control over financial reporting that occurred during the last fiscal quarter of the period covered by this report that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

From time to time, the Company is party to certain legal actions and claims arising in the ordinary course of business. While the outcome of these events cannot be predicted with certainty, management does not expect these matters to have a materially adverse effect on the financial position or results of operations of the Company.

Item 1A. RISK FACTORS

Not required

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no sales of equity securities during the period covered in this Report.

During the six months ended June 30, 2008, the Company purchased the following shares of common stock as treasury shares.

2008 Month	Number of Shares	Average Price Paid per share	Maximum Number of Shares that May Yet Be Purchased Under The Plan (1)
January	60,684	\$ 50.06	224,871
February	558	\$ 54.68	224,313
March	10,465	\$ 50.25	213,848
April	5,500	\$ 58.05	208,348
May	435	\$ 61.23	207,913
June	6,726	\$ 55.62	201,187
Total/Average	84,368	\$ 51.13	

- (1) In December 1993, we announced that our board of directors authorized a stock repurchase program whereby we may purchase outstanding shares of our common stock from time-to-time, in open market transactions or negotiated sales. A total of 2,700,000 shares have been authorized, to date, under this program. Through June 30, 2008 we repurchased a total of 2,498,813 shares under this program for \$32,422,977 at an average price of \$13.38 per share. Additional purchases may occur as market conditions warrant. We expect future purchases will be funded with internally generated cash flow or from working capital.

PART II - OTHER INFORMATION**Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

The Annual Meeting of Stockholders of the Company was held on June 10, 2008. The only matter submitted to the stockholders was the election of seven Directors (named below) nominated by management, all of whom were currently serving as Directors. Proxies were solicited pursuant to Regulation 14A under the Securities Act of 1934, definitive copies of which were filed with the Commission. There was no solicitation in opposition to management's nominees, and all of the Directors nominated for the re-election were elected. The number of shares of the Company's common stock voted at the Annual Meeting was 2,282,932. Those persons nominated and elected as Directors, and the number of shares voting for or withheld for each, is shown below. There were no abstentions or broker non-votes.

	For	Withheld
Beverly A. Cummings	2,187,879	95,053
Charles E. Drimal, Jr.	2,188,349	94,583
