INTRODUCTORY NOTE TO QUARTERLY REPORT ON FORM 10-Q

As previously reported, the Company's Board of Directors has undertaken a year-long strategic review of how best to maximize shareholder value. This strategic review remains ongoing.

In support of its strategic review, the Board of Directors has authorized management to undertake a formal process to determine investor interest in the purchase of some or all of our real estate assets. This process is ongoing as of the date of this release. In connection with this process, the Company has received expressions of interest to purchase one or more of its properties from a number of interested parties. The Company is considering several such offers. If any such transactions are agreed to and concluded, the Board of Directors may consider a special distribution of any sales proceeds, among other possible uses. There is no assurance that any such transaction will be concluded or that the Company's Board of Directors will distribute any proceeds as a special distribution.

Additionally, as part of this strategic review, the Board of Directors has been analyzing the Company's business and operating strategy and outside factors on an ongoing basis. In particular, the Board of Directors has considered adverse factors such as the poor market for new home sales and uncertain prospects for its recovery; the costs of developing sites for new homes in advance of their use; volatility in the market for property debt and its increased price; the increased risk of non-performance by counterparties; the price of the Company's common stock and the limited volume of its trading. The Company's Board of Directors also has considered the continued investor interest in the Company's land lease communities and its sources and uses of liquidity.

As a result of this ongoing review, the Board of Directors has determined to reduce the Company's efforts and costs to make new home sales and to reduce the cost and the rate of development of additional home sites.

The Company's corporate revolving line of credit matures on December 31, 2008. The Company expects that the line of credit will be renewed, but the Company recognizes that loan renewals are unusually uncertain in the current financial environment.

Further, in order to conserve liquidity, the Board of Directors determined against payment of a quarterly dividend on our shares of common stock during the current quarter. The Board of Directors determined to pay a quarterly dividend on our shares of preferred stock during the current quarter. These dividend determinations are discussed in more detail elsewhere in this Quarterly Report.

Table of Contents

Under current economic conditions and due to other risks and uncertainties disclosed in this Quarterly Report on Form 10-Q and our other filings with the SEC, there can be no assurance that any of the matters discussed above or elsewhere in this Quarterly Report will proceed as anticipated by management and the Board of Directors. Among other things, there can be no assurance that we will obtain a renewal of our corporate line of credit. In the event that we are unable to obtain a renewal, we would be required to repay all amounts outstanding under this loan. This line of credit is secured by properties and improvements with a net book value of \$44,275,000.

Additionally, if the strategic review underway by our Board of Directors results in the consummation of a strategic transaction, it may impact our future financial condition or results of operations.

AMERICAN LAND LEASE, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2008

(unaudited)

A. The Company

American Land Lease, Inc. (ANL) is a Delaware corporation that owns home sites leased to owners of homes situated on the leased land and operates the communities composed of these homes. ANL has elected to be taxed as a real estate investment trust (REIT). ANL 's preferred stock, par value \$.01 per share, is listed on the New York Stock Exchange (NYSE) under the symbol ANLPRA. ANL 's common stock, par value \$.01 per share, is listed on the NYSE under the symbol ANL. In May 1997, ANL contributed its net assets to Asset Investors Operating Partnership, L.P. (the Operating Partnership) in exchange for the sole general partner interest in the Operating Partnership and substantially all of the Operating Partnership 's initial capital. Except as the context requires, we, our, us, ANL and the Company refer to American Land Lease, Inc., the Operating Partnership and all majority-owned subsidiaries.

Interests in the Operating Partnership held by limited partners other than ANL are referred to as OP Units. The Operating Partnership 's income is allocated to holders of OP Units based on the weighted average number of OP Units outstanding during the period. The holders of the OP Units receive distributions, prorated from the date of issuance, in an amount equivalent to the dividends paid, if any, to holders of ANL 's common stock. After holding the OP Units for one year, limited partners generally have the right to redeem their OP Units for cash. Notwithstanding that right, the Operating Partnership may elect to acquire some or all of the OP Units tendered for redemption in exchange for shares of ANL 's common stock in lieu of cash. At September 30, 2008, the Operating Partnership had approximately 993,000 OP Units outstanding, excluding those owned by ANL, and ANL owned 88% of the Operating Partnership.

As of September 30, 2008, based on total home sites, 72% of the Company 's portfolio of residential land lease communities is located in Florida, 24% in Arizona and 4% in Alabama.

Table of Contents

B. Presentation of Financial Statements

The accompanying unaudited condensed consolidated financial statements of the Company have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X under the Securities Exchange Act of 1934, as amended. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included and are of a normal recurring nature. Operating results for the three and nine months ended September 30, 2008 are not necessarily indicative of the results that may be expected for the year ending December 31, 2008.

The condensed consolidated balance sheet at December 31, 2007 has been derived from the audited financial statements at that date but does not include all of the information and notes required by GAAP.

For further information, refer to the statements and notes thereto included in ANL 's Annual Report on Form 10-K for the year ended December 31, 2007.

Table of Contents

The above circumstances provide uncertainty with respect to the Company's ability to continue as a going concern and there can be no assurance regarding the Company's ability to secure acceptable financing. However, the accompanying condensed consolidated financial statements do not include any adjustments relating to the recoverability and classification of asset carrying amounts or the amount and classification of liabilities that might result should the Company's be unable to continue as a going concern.

C. Summary of Significant Accounting Policies

Principles of Consolidation

The condensed consolidated financial statements include the accounts of ANL, the Operating Partnership and all majority owned subsidiaries. The minority interest in the Operating Partnership represents the OP Units that are redeemable at the option of the holder. All significant intercompany balances and transactions have been eliminated in consolidation.

The Company applies Financial Accounting Standards Board (FASB) Interpretation No. 46, *Consolidation of Variable Interest Entities (revised December 2003)*, an interpretation of ARB No. 51 (FIN 46R). The objective of FIN 46R is to provide guidance on how to identify a variable interest entity (VIE) and determine when the assets, liabilities, non-controlling interests, and results of operations of a VIE need to be included in a company's consolidated financial statements. A company that holds variable interests in an entity will need to consolidate such entity if the company absorbs a majority of the entity's expected losses or receives a majority of the entity's expected residual returns if they occur, or both (i.e., the primary beneficiary).

Real Estate and Depreciation

The Company capitalizes direct costs associated with the acquisition of consolidated properties as a cost of the assets acquired, and such direct costs are depreciated over the estimated useful lives of the related assets. In accordance with FASB Statement of Financial Accounting Standards (SFAS) No. 141, *Business Combinations* (SFAS 141), the Company allocates the purchase price of real estate to land, land improvements, buildings, furniture, fixtures, equipment and intangibles, such as the value of above and below market leases and origination costs associated with the in-place leases. In order to allocate purchase price on these various components, the Company performs the following procedures for properties acquired:

1. Determine the as-if vacant fair value of the physical property acquired;
2. Allocate the as-if vacant fair value among land, land improvements, buildings, (based on real estate valuation techniques), furniture, fixtures and equipment; and
3. Compute the difference between the purchase price of the property and the as-if vacant fair value and allocate such difference to leases in-place, which will represent the total intangible assets or liabilities. The fair value of the leases in-place are comprised of:
 - a. The value of the above and/or below market leases in-place. Above-market and below-market in-place lease values are computed based on the difference between (i) the contractual amounts to be paid pursuant to the in-place leases and (ii) management's estimate of fair market lease rates and effective lease terms for the corresponding in-place leases, measured over a period equal to the estimated remaining effective terms of the leases.
 - b. Avoided leasing commissions and other costs that were incurred to execute leases.
 - c. The value associated with lost rents during the absorption period (estimates of lost rental revenue during the expected lease-up periods based on current market demand).

Table of Contents

The values of the above and below market leases are amortized and recorded as either an increase (in the case of below market leases) or a decrease (in the case of above market leases) to rental income over the estimated remaining expected terms of the associated leases (including fixed rate renewal periods for below market leases). Amortization expense is recorded over the expected remaining terms of the associated leases for the values associated with avoided leasing commissions, other costs that were incurred to execute leases and the value associated with lost rents during the absorption period. If a resident vacates a home site prior to the effective term of the lease and no rental payments are being made on the lease, any unamortized balance of the related intangible will be written off.

Rental properties are recorded at cost less accumulated depreciation, unless considered impaired. Significant renovations and improvements, which improve or extend the useful life of an asset, are capitalized and depreciated using the straight-line method over the remaining estimated life. In addition, the Company capitalizes direct and indirect costs (including interest, taxes and other costs) in connection with the development of additional home sites within its residential land lease communities. Maintenance, repairs and minor improvements are expensed as incurred.

Interest incurred relating to the development of communities is capitalized during the development period. The Company's strategy is to master plan, develop and build substantially all of the home sites in its communities. Accordingly, substantially all projects excluding finished lots where the home is available for occupancy, are undergoing development. The Company capitalized interest of approximately \$2,256,000 and \$2,295,000 for the three months ended September 30, 2008 and 2007, and \$6,712,000 and \$6,718,000 for the nine months ended September 30, 2008 and 2007, respectively.

If events or circumstances indicate that the carrying amount of a property may be impaired, the Company will make an assessment of its recoverability by estimating the future undiscounted cash flows, excluding interest charges, of the property. In the event the property is under development, the estimate of future cash flows includes all future expenditures necessary to develop the property. If the carrying amount exceeds the aggregate future cash flows, the Company would recognize an impairment loss to the extent the carrying amount exceeds the fair value of the property. There were no impairment losses recognized for the nine months ended September 30, 2008 and 2007.

Depreciation is computed using the straight-line method over an estimated useful life of 5 to 75 years for land improvements, 5 to 50 years for buildings and 5 to 15 years for furniture and other equipment, all of which are judgmental determinations. These determinations may prove to be different than the actual life of any individual asset.

Cash Equivalents

The Company considers highly liquid investments with an original maturity of three months or less to be cash equivalents.

Inventory

The Company, through a taxable subsidiary corporation, maintains an inventory of manufactured homes situated within its residential land lease communities. Carrying amounts for inventory are determined on a specific identification basis and are stated at the lower of cost or estimated market value. If actual market conditions are less favorable than those projected by management and the market value of our inventory is lower than estimated by management, inventory write-downs may be required that could

Table of Contents

have a significant impact on the Company's results of operations and cash flows. As of September 30, 2008, \$11,902,000 of the Company's total inventory investment of \$13,774,000 was older than one year. The Company recorded charges of approximately \$61,000 and \$135,000 for the three months ended September 30, 2008 and 2007, and \$426,000 and \$335,000 for the nine months ended September 30, 2008 and 2007, respectively, to adjust inventory carrying amounts to market value.

Revenue Recognition

The Company generates income from the rental of home sites. The leases entered into by residents for the rental of home sites are generally for terms of one year, and the rental revenues associated with the leases are recognized when earned and due from residents.

The Company, through a taxable subsidiary corporation, generates income from memberships, daily green fees, cart rentals and merchandise sales at golf courses located within its communities. Revenues associated with the activities of the golf courses are recognized when earned and received by the Company.

The Company, through a taxable subsidiary corporation, generates income from the sale of homes situated on home sites owned by the Company. Sales of homes by the Company are recorded upon the closing of the home sale transaction and title passing to the purchaser.

Deferred Financing Costs

Fees and costs incurred in obtaining financing are capitalized. Such costs are amortized over the terms of the related loan agreements using the effective interest method and are charged to interest expense.

Advertising Costs

Costs of advertising are expensed the first time the advertising takes place. Direct response advertising conducted by the Company during the periods was expensed as incurred, as the Company could not define the expected period of future benefits. Advertising expenses were \$185,000 and \$453,000 for the three months ended September 30, 2008 and 2007, respectively, and \$737,000 and \$1,587,000 for the nine months ended September 30, 2008 and 2007, respectively, and are included within golf course operating expenses and selling and marketing expenses in the consolidated statements of operations.

Income Taxes

ANL has elected to be taxed as a REIT under the Internal Revenue Code of 1986, as amended. To qualify as a REIT, ANL must meet a number of organizational and operational requirements, including income, asset, and stockholder requirements, and a requirement that, in general, it must distribute currently at least 90% of its adjusted taxable income to its stockholders. It is management's current intention to adhere to these requirements and maintain ANL's REIT status. As a REIT, ANL generally will not be subject to corporate level federal income tax on taxable income that it distributes currently to its stockholders, by virtue of a deduction for dividends paid. If ANL fails to qualify as a REIT in any taxable year, it will be subject to federal income taxes at regular corporate rates (including any applicable alternative minimum tax) and, unless entitled to relief under certain statutory provisions, may not be able to qualify as a REIT for four subsequent taxable years. Even if ANL qualifies for taxation as a REIT, ANL may be subject to certain state and local taxes on its income and property, and to federal income and excise taxes and

Table of Contents

penalties, including taxes on ANL's undistributed taxable income. In addition, taxable income from non-REIT activities conducted through ANL's taxable subsidiaries is subject to federal, state, and local income taxes.

The Company files its tax returns as prescribed by the tax laws of the jurisdictions in which it operates. The Company's federal and state income tax returns for the year ended December 31, 2005, and subsequent years are currently subject to examination by the Internal Revenue Service or other taxing authorities. The Company recognizes accrued interest related to unrecognized tax benefits as a component of interest expense and penalties related to unrecognized tax benefits as a component of general and administrative expenses. The Internal Revenue Service examined the 2005 federal tax return for Asset Investors Operating Partnership and concluded that no change was necessary to the return and accepted the return as filed.

Earnings Per Share

Basic earnings per share are based upon the weighted-average number of shares of common stock outstanding during each period. Diluted earnings per share reflect the effect of dilutive, unexercised stock options, both vested and unvested, and unvested restricted stock of 110,000 and 212,000 shares for the three months ended September 30, 2008 and 2007, respectively, and 136,000 and 288,000 shares for the nine months ended September 30, 2008 and 2007, respectively. Vested and unvested stock options totaling 445,000 and 424,000 shares for the three months ended September 30, 2008 and 2007, respectively, and 448,000 and 384,000 shares for the nine months ended September 30, 2008 and 2007, respectively, were excluded from diluted earnings as their effect was anti-dilutive.

Stock-based Compensation

The Company used the Black-Scholes-Merton formula to estimate the fair value of stock options, used the closing stock price at date of grant for time-based restricted stock and used a Monte Carlo model to estimate the fair value of market-based restricted stock for the nine months ended September 30, 2008 and 2007. Stock-based compensation is reported in selling and marketing expenses and general and administrative expenses. The Company recorded stock-based compensation expense of \$361,000 and \$327,000 for the three months ended September 30, 2008 and 2007, respectively, and \$1,009,000 and \$953,000 for the nine months ended September 30, 2008 and 2007, respectively.

Treasury Stock

On October 17, 2000, the Board of Directors authorized the Company to repurchase up to 2,000,000 shares of the outstanding common stock. The timing of stock purchases is at the discretion of management. The Company purchased 0 and 0 shares for the three months ended September 30, 2008 and 2007, respectively, and 29,000 and 190,000 shares for the nine months ended September 30, 2008 and 2007, respectively. The Company has repurchased approximately 812,000 shares as of September 30, 2008 pursuant to this authorization.

Depreciation of Personal Property

Depreciation of personal property is reported in property operating expenses, selling and marketing expenses, or general and administrative expenses, based upon the use of the associated asset. The

Table of Contents

Company recorded depreciation expense related to personal property of \$106,000 and \$113,000 for the three months ended September 30, 2008 and 2007, respectively, and \$318,000 and \$352,000 for the nine months ended September 30, 2008 and 2007, respectively. Depreciation is computed using the straight-line method over an estimated useful life of 5 to 15 years for furniture and other equipment, all of which are judgmental determinations. These determinations may prove to be different than the actual life of any individual asset.

Statements of Cash Flows

The Company considers cash maintained in bank accounts, money market funds and highly liquid investments with an initial maturity of three months or less to be cash equivalents.

Non-cash financing activities for the nine months ended September 30, 2008 and 2007 were as follows:

	2008	2007
Issuance of common stock for:		
Services by directors	\$ 175,000	\$ 194,000

Fair Value of Financial Instruments

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurement* (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. SFAS 157 is effective for financial assets and financial liabilities for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued Staff Position No. 157-2, *Effective Date of FASB Statement No. 157*, which deferred the effective date of SFAS 157 for all nonfinancial assets and nonfinancial liabilities to fiscal years beginning after November 2008.

The implementation of SFAS 157 for financial assets and financial liabilities, effective January 1, 2008, did not have a material impact on the Company's consolidated financial position and results of operations. The Company is currently assessing the impact of SFAS 157 for nonfinancial assets and nonfinancial liabilities on its consolidated financial position and results of operations.

The estimated fair value of the Company's secured notes payable was \$252,394,000 at September 30, 2008 as compared to the carrying value of \$258,928,000 at September 30, 2008.

The aggregate fair value of cash and cash equivalents, receivables, accounts payable and accrued liabilities as of September 30, 2008 approximates their carrying value due to their relatively short-term nature.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Table of Contents*Reclassifications*

In accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS 144), certain reclassifications have been made in the 2007 consolidated financial statements to present the operations of one community as discontinued operations for all periods presented (see Note K).

Comprehensive Income

SFAS No. 130, *Reporting Comprehensive Income*, requires all components of comprehensive income be reported in the consolidated financial statements in the period in which they are recognized. For all periods reported, the Company's comprehensive income is equal to its net income reported in the accompanying consolidated statements of operations.

D. Real Estate

Real estate at September 30, 2008 and December 31, 2007 is as follows (in thousands):

	September 30, 2008	December 31, 2007
Land	\$ 93,358	\$ 92,664
Land improvements and buildings	352,411	338,695
	445,769	431,359
Less accumulated depreciation	(35,303)	(31,842)
Real estate, net	\$ 410,466	\$ 399,517

The Company's real estate investment consists of land, land improvements and buildings. Buildings consist primarily of clubhouses at its residential land lease communities maintained as amenities for resident use. A majority of the Company's investment in land improvements consists of long-lived assets such as lateral infrastructure at its residential land lease communities, including sanitary sewer and storm water collection systems, potable water supply systems, roads and walkways. The balance of land improvements consists of assets with shorter lives such as marinas, fencing, swimming pools, spas, shuffleboard courts, tennis courts and other resident amenities. Depreciation is computed using the straight-line method over an estimated useful life of 5 to 75 years for land improvements and 5 to 50 years for buildings.

Table of Contents**E. Secured Notes Payable**

The following table summarizes the Company's secured notes payable (in thousands):

	September 30, 2008	December 31, 2007
Fixed rate, ranging from 7.86% to 7.92%, fully amortizing, non-recourse notes maturing in 2020	\$ 7,557	\$ 9,882
Fixed rate, ranging from 5.48% to 7.17%, partially amortizing, non-recourse notes maturing at various dates from 2013 through 2021	229,265	207,982
Variable rate, at the three-month LIBOR rate plus 115 to 175 basis points, interest only non-recourse notes maturing at various dates from 2011 through 2012	22,106	22,106
	\$ 258,928	\$ 239,970

As part of the Company's previously disclosed ongoing strategic review, the Company has determined to reduce the cost and the rate of development of additional home sites. In making this decision to curtail development activities, the Company decided not to commence construction of a clubhouse at one of our communities and, as a result, certain of the Company's subsidiaries were in technical default of a covenant in the construction loan for such community. The lender under this construction loan has not advanced any funds with respect to such phase of the construction, has been informed of this decision and has waived the technical default through January 1, 2009. The Company anticipates that, on or before January 1, 2009, it will have negotiated amended loan documents with the lender that will eliminate the default. However, there can be no assurance that such amended loan documents will be executed on or before January 1, 2009 or at all. The construction loan is cross-collateralized and cross-defaulted with a loan secured by the real property and improvements of one of the Company's stabilized communities. As of September 30, 2008, the aggregate amount outstanding under both loans was \$42,074,000, which amount was secured by real property and improvements with a net book value of \$77,786,000.

F. Secured Credit Facilities

The Company has a revolving line of credit with a bank with a total commitment of \$16,000,000 that bears interest at 175 basis points over the one-month LIBOR rate (4.2% at September 30, 2008 and 6.6% at December 31, 2007). The line of credit is secured by real property and improvements located in St. Lucie, Lake, and Pasco County, Florida and Maricopa County, Arizona with a net book value of \$44,275,000. As discussed below, the revolving line of credit matures December 31, 2008. At September 30, 2008, \$9,719,000 was outstanding and \$6,281,000 was not drawn under the revolving line of credit. The availability of funds to the Company under the line of credit is subject to certain borrowing base and other customary restrictions, including compliance with financial and other covenants thereunder. Based on the application of the borrowing base calculation, as of September 30, 2008, \$3,368,000 was available to the Company. The line of credit also includes certain financial covenants that require the Company to maintain an adjusted tangible net worth (as defined by the lender) of \$150,000,000 and to maintain a debt to adjusted tangible net worth ratio of not more than 1.75 to 1.0, among others. The Company believes it was in compliance with all financial covenant requirements at September 30, 2008.

The Company is currently negotiating with the lender and expects that this line of credit will be renewed, but recognizes that loan renewals are unusually uncertain in the current financial environment. In the event the Company is unable to obtain a renewal of the line of credit, the Company would be required to repay the amounts outstanding under this loan. This loan is secured by properties and improvements located in St. Lucie, Lake, and Pasco County, Florida and Maricopa County, Arizona with a net book value of \$44,275,000.

The Company has a floor plan line of credit with a floor plan lender providing a committed credit facility of \$35,000,000 with a variable interest rate linked to the lender's prime rate, with a floor of 5.25%, plus 25 basis points (5.5% at September 30, 2008 and 7.8% at December 31, 2007). Individual advances mature the earlier of 1,080 days or upon sale of the home to a third party. This floor plan line of credit is secured by inventory located in the Company's residential land lease communities with a carrying value of approximately \$12,447,000. At September 30, 2008, approximately \$14,344,000 was outstanding, of which \$1,953,000 was recourse to the Company, and approximately \$20,656,000 was available under the floor plan credit facility. The financial covenants of the floor plan line of credit require the Company to

Table of Contents

maintain an adjusted tangible net worth (as defined by the lender) of \$150,000,000 and to maintain a debt to adjusted tangible net worth ratio of not more than 1.75 to 1.0, among others. The floor plan lender's commitment to fund future inventory purchases expires in September 2009. The Company believes it was in compliance with all financial covenant requirements at September 30, 2008.

G. Commitments and Contingencies

Legal Contingencies

The Company is party to various legal actions resulting from its operating activities. These actions are routine litigation and administrative proceedings arising in the ordinary course of business, some of which are covered by liability insurance, and none of which are expected to have a material adverse effect on the consolidated financial condition or results of operations of the Company and its subsidiaries taken as a whole. It is possible, however, that future results of operations for any particular quarterly or annual period could be materially affected by changes in assumptions and effectiveness of strategies, related to these proceedings.

Commitments

In the ordinary course of business, the Company has entered into various construction contracts with third parties to develop subdivisions within the Company's existing portfolio of residential land lease communities. The unpaid balance of these contracts remaining at September 30, 2008 is approximately \$1,178,000.

During 2007, the Company issued a construction loan to a development company in Arizona. The proceeds of the loan are to be used exclusively to develop a community for the Company in Mesa, Arizona. The maximum aggregate amount of advances available under the construction loan is \$8,080,000, subject to certain inventory level restrictions provided for in the loan documents that limit the aggregate amount of advances outstanding at any given time. At September 30, 2008, approximately \$3,800,000 was outstanding and \$760,000 was available under the construction loan.

H. Segment Reporting

The Company has two reportable segments: real estate (ownership of land leases, land development, investment acquisition and disposition) and home sales (sale of homes, both new and used, to be sited on land owned by the Company). The real estate segment consists of residential land lease communities that generate rental and other property related income through the leasing of land to residents that are unaffiliated with the Company. The home sales segment sells manufactured homes to customers that are unrelated to the Company. The homes sold by the home sales segment are situated on land within the Company's portfolio of rental property. The customers of the home sales business become residents of the Company's real estate segment coincident with the sale of a home, at which time the customer enters into a lease with the real estate segment. The chief operating decision maker assesses the performance of the real estate segment using, among other measures, net operating income excluding depreciation as a key measurement of segment profit or loss. The chief operating decision maker assesses the performance of the home sales segment using, among other measures, contribution margin, excluding allocated corporate expenses as the best measure of the segments performance. Segment operating income is generally defined as segment revenues less direct segment operating expenses.

Table of Contents

Non-segment revenue used to reconcile total revenue consists primarily of interest income and other income. Non-segment assets used to reconcile to total assets include cash and cash equivalents, cash in escrows, accounts receivable, prepaid expenses, investments, deferred charges and other assets. Overhead expenses, such as administrative expenses, are allocated to each segment based upon management's best estimate of the resources utilized in the management and operations of each segment. The accounting policies of the segments are the same as those described in Note C.

The revenues, net income (loss), and assets for each of the reportable segments are summarized in the following tables for the three and nine months ended September 30, 2008 and September 30, 2007 (in thousands).

I. Stock and Dividends

ANL's common stock and preferred stock dividends are set quarterly by ANL's Board of Directors and are subject to change or elimination at any time. ANL paid quarterly dividends on common stock of \$0.25 per share totaling \$1,983,000 and \$1,984,000 during the three months ended September 30, 2008 and 2007, respectively, and \$5,930,000 and \$5,978,000 during the nine months ended September 30, 2008 and 2007, respectively. ANL paid quarterly dividends on preferred stock of \$0.48 per share totaling \$484,000 and \$484,000 during the three months ended September 30, 2008 and 2007, respectively, and \$1,453,000 and \$1,453,000 during the nine months ended September 30, 2008 and 2007, respectively.

Table of Contents

The Company deducts cumulative paid and unpaid preferred stock dividends from net income to arrive at net income available to common stockholders. The Company deducted \$484,000 and \$484,000 for the three months ended September 30, 2008 and 2007, respectively, and \$1,453,000 and \$1,453,000 for the nine months ended September 30, 2008 and 2007, respectively, related to cumulative paid and unpaid preferred stock dividends.

J. Stock-based Compensation

The Company's 1998 Plan provides for the issuance of up to 3,000,000 shares of common stock in the form of qualified and non-qualified stock options, stock appreciation rights, limited stock appreciation rights, restricted stock, deferred stock and performance shares to its directors, officers, employees and consultants. As of September 30, 2008, the Company has granted awards of stock options and restricted stock under the 1998 Plan. As of September 30, 2008, there was approximately \$3,443,000 of total unrecognized compensation costs related to nonvested stock-based compensation arrangements granted under the 1998 Plan. The cost is expected to be recognized over a weighted average period of 3.5 years. This expected cost does not include the impact of any future stock-based compensation awards.

The Company adopted a new stock incentive plan (2008 Plan) in April 2008, which provides for the issuance of up to 600,000 shares of common stock in the form of qualified and non-qualified stock options, stock appreciation rights, limited stock appreciation rights, restricted stock, deferred stock and performance shares to its directors, officers, employees and consultants. No shares were issued under the 2008 Plan during the nine months ended September 30, 2008.

Stock Options

For the nine months ended September 30, 2008 and 2007, the Company issued approximately 314,000 and 148,000 options, respectively. The Company estimates the fair value of stock options using the Black-Scholes-Merton formula, and for the nine months ended September 30, 2008 and 2007, the estimated weighted-average grant-date fair value of options granted was \$1.68 and \$3.55 per option, respectively.

Restricted Stock

The Company issued approximately 67,000 and 9,000 shares as time-based awards of restricted stock to members of management during the nine months ended September 30, 2008 and 2007, respectively, with fair values per share of \$19.93 and \$27.02, respectively. The time-based awards of restricted stock were issued at the fair value of ANL's common stock on the date of issuance. The fair value of such restricted stock is amortized to compensation expense over the vesting period.

The Company issued 65,000 and 65,000 shares as market-based awards of restricted stock to members of management during the nine months ended September 30, 2008 and 2007, respectively. For the nine months ended September 30, 2008 and 2007, the weighted average per share fair values of the market-based restricted stock was \$10.03 and \$7.38, respectively. In the event the market-based performance objectives are not attained, the market-based awards of restricted stock are forfeited, but the dividends paid are not forfeited.

The fair value of the market-based awards of restricted stock is amortized to compensation expense over the requisite service period. The requisite service period for market-based restricted stock awards granted

Table of Contents

during the nine months ended September 30, 2008 and 2007 was three years for both grants. The principal terms of the market-based awards of restricted stock, also known as high performance shares (HPS Shares), are more fully described below.

The HPS Shares vest to the extent, if any, that the total return realized by stockholders during the measurement period exceeds the ten-year return for the Equity REIT Index prior to the date of grant, as reported by the National Association of Real Estate Investment Trusts. Total return is defined as the total of the closing price at year-end plus any dividends paid, less the closing price for the prior year-end. The total return for the Company is measured over a three-year period that ends on the final valuation date specified in connection with each grant of HPS Shares. To the extent that HPS Shares are not vested as of the final valuation date, such shares are forfeited and are returned to the Company. Vesting is achieved ratably on the final valuation date to the extent that excess value has been realized. In order for management's HPS Shares to vest in full at a given final valuation date, the actual total return to stockholders over the applicable three-year period is required to exceed the Equity REIT Index total return by 5% per year on a compounded basis.

The Company granted 65,000 HPS Shares in February 2008 with a final measurement date of December 31, 2010. The Equity REIT Index annual compounded total return over the trailing ten years as of December 31, 2007 was 10.5%. For the 2008 HPS Shares to fully vest, the actual total return over the three-year period is required to be 15.5%. If the actual total return is between 10.5% and 15.5%, then a ratable portion of the HPS Shares would vest (for example, one half of the HPS Shares would vest if the actual total return is 13.0%). If the actual total return does not exceed 10.5%, all of the 2008 HPS Shares would be forfeited, but none of the dividends paid during the three-year period would be forfeited.

K. Discontinued Operations

In accordance with SFAS 144, the Company reports as discontinued operations real estate assets held for sale and real estate assets sold in the current period. All results of these discontinued operations are included in a separate component of income on the consolidated statements of operations under the heading DISCONTINUED OPERATIONS.

During the nine months ended September 31, 2008, the Company sold a tract of commercial real estate located in Arizona. The sale of this property resulted in reclassifications of 2007 financial statements. In addition, during the year ended December 31, 2007, the Company sold an age-restricted community located in Florida with 261 home sites. The sale of this community resulted in reclassifications of previously reported 2007 financial statement amounts. The following is a summary of the components of income from discontinued operations for the three and nine months ended September 30, 2008 and 2007 (in thousands):

	Three Months Ended September 30, 2008	Three Months Ended September 30, 2007	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
Discontinued property operations:				
Rental and other property revenues	\$ 6	\$ 221	\$ 24	\$ 1,005
Property operating expenses	3	(74)	(2)	(356)
Interest expense		(90)		(360)
Depreciation		(16)	(1)	(65)
Income from discontinued operations before gain on sale of discontinued operations and minority interest expense attributable to discontinued operations	9	41	21	224
Gain on sale of discontinued operations	100	10,305	100	10,305
Income from discontinued operations before minority interest expense attributable to discontinued operations	109	10,346	121	10,529
Minority interest expense attributable to discontinued operations	(13)	(1,187)	(14)	(1,208)

Edgar Filing: AMERICAN LAND LEASE INC - Form 10-Q

Income from discontinued operations, net of minority interest	\$	96	\$	9,159	\$	107	\$	9,321
---	----	----	----	-------	----	-----	----	-------

Table of Contents

As of September 30, 2008, the Company did not have any assets classified as held for sale.

L. Recent Accounting Developments

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). SFAS 159 permits entities to choose to measure financial assets and liabilities (except for those that are specifically scoped out of the statement) at fair value. The election to measure a financial asset or liability at fair value can be made on an instrument-by-instrument basis and is irrevocable. The difference between carrying value and fair value at the election date is recorded as a transition adjustment to opening retained earnings. Subsequent changes in fair value are recognized in earnings. The effective date for SFAS 159 is as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company adopted SFAS 159 on January 1, 2008. The adoption of this standard did not have a material impact on the Company's consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, *Non-controlling Interests in Consolidated Financial Statements an amendment of Accounting Research Bulletin No. 51* (SFAS 160). The Statement seeks to improve uniformity and transparency in reporting of the net income attributable to non-controlling interests in the consolidated financial statements of the reporting entity. The statement requires, among other provisions, the disclosure, clear labeling and presentation of non-controlling interests in the Consolidated Balance Sheet and Consolidated Income Statement. SFAS 160 is effective for fiscal years beginning after December 15, 2008, early adoption is prohibited. The Company is evaluating SFAS 160 and has not yet determined the impact the adoption will have on the consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141R). SFAS 141R replaces SFAS 141, *Business Combinations* (SFAS 141), but retains the fundamental requirements in SFAS 141 that the acquisition method of accounting (also known as the purchase method) be used for all business combinations and for an acquirer to be identified for each business combination. SFAS 141R also establishes principles and requirements for how the acquirer: (a) recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquired entity; (b) improves the completeness of the information reported about a business combination by changing the requirements for recognizing assets acquired and liabilities assumed arising from contingencies; (c) recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and (d) determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141R replaces, with limited exceptions as specified in the Statement, the cost allocation process in SFAS 141 with a fair value based allocation process. SFAS 141R is required to be adopted concurrently with SFAS 160 and is effective for business combination transactions for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Early adoption is prohibited. The Company is evaluating SFAS 141R and has not yet determined the impact the adoption will have on the consolidated financial statements.

Table of Contents

M. Subsequent Events

On October 21, 2008, the Company received a loan commitment of \$7,670,000 which expires on November 21, 2008. The annual interest rate of this committed loan is locked at 7.5%. The security for the loan is real property that currently secures a portion of the Company's corporate line of credit that matures on December 31, 2008. If and when the loan closes, the entire proceeds of this loan will be used to pay down our corporate revolving line of credit, the borrowing base under the line of credit will decrease by approximately \$4,400,000, and the Company will achieve a net increase in availability of approximately \$3,270,000. There is no assurance that the lender will fund under its loan commitment.

On November 4, 2008, in connection with the Company's ongoing strategic review, the Board of Directors determined not to declare or pay a quarterly cash dividend on the Company's common stock during the current quarter.

On November 4, 2008, the Board of Directors declared a cash dividend of \$0.4844 per share of Series A Preferred Stock, payable on November 28, 2008, to stockholders of record on November 14, 2008.

The Company's common stock and preferred stock dividends are considered quarterly and are subject to change, suspension or elimination at any time. As part of this quarterly consideration, the Company's Board of Directors has and will continue to consider, among other things, the significant downturn in new home sales market and the Company's liquidity position in the context of its quarterly review and dividend decision. In addition, the Board of Directors may consider the Company's dividend policy as a part of its previously announced review of strategic alternatives.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

The Private Securities Litigation Reform Act of 1995 provides a "safe harbor" for forward-looking statements in certain circumstances. Certain information included in this report and our other filings with the Securities and Exchange Commission (the "SEC") under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, as well as information communicated orally or in writing between the dates of these SEC filings, constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements may include projections relating to our results of operations, cash flow, dividends, anticipated returns on real estate investments, opportunities to acquire additional communities and future stock repurchases. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include: general economic and business conditions; interest rate changes; financing and refinancing risks; risks inherent in owning real estate or debt secured by real estate; demand for new homes; future development rate of home sites; competition; the availability of real estate assets at prices which meet our investment criteria; our ability to reduce expense levels, implement rent increases, use leverage and other risks set forth in our SEC filings. In addition, American Land Lease, Inc.'s current and continuing qualification as a real estate investment trust ("REIT") involves the application of highly technical and complex provisions of the Internal Revenue Code and depends on our ability to meet the various requirements imposed by the Internal Revenue Code, through actual operating results, distribution levels and diversity of stock ownership. Readers should carefully review our financial statements and the notes thereto, as well as the risk factors described in the documents we file from time to time with the SEC. American Land Lease, Inc. assumes no obligation and does not intend to update forward-looking statements.

Table of Contents

Among the risk factors the reader should review are those set forth in Part I, Item IA. of our Annual Report on Form 10-K for the fiscal year ended December 31, 2007 and in Part II, Item 1A. of our Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2008, all of which risk factors are incorporated herein by reference.

Except as the context otherwise requires, we, our, us, ANL and the Company refer to American Land Lease, Inc., the Operating Partnership and all majority-owned subsidiaries.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP), which require us to make estimates and assumptions. We believe that of our significant accounting policies (see Note C to the condensed consolidated financial statements), the following may involve a higher degree of judgment and complexity.

Capitalized Costs

We capitalize direct and indirect costs (including interest, real estate taxes, and other costs) in connection with initial capital expenditures, capital enhancements, and capital replacements, as well as similar spending for development and redevelopment of our properties. Indirect costs that are not capitalized, including general and administrative expenses, are charged to expense as incurred. The amounts capitalized vary with the volume, cost and timing of these activities and, especially, with the pace of development and redevelopment activities. As a result, changes in the volume, cost and timing of these activities or the cessation of such activities may have a significant impact on our financial results.

The most significant capitalized cost is interest. We capitalize interest when the following three conditions are present: (i) expenditures for the asset have been made, (ii) activities necessary to get the asset ready for its intended use are in progress and (iii) interest cost is being incurred. Our determination of the activities in progress for a development property is subject to professional judgment. The most significant judgment is the determination to capitalize interest relating to the ownership of land being developed as new home sites. In many cases, the development of such land is expected to take place over several years and in multiple phases. In such instances, it is our conclusion that the entirety of each parcel is under development and is a qualifying asset. Accordingly, interest is capitalized with respect to the entire parcel until such time as all development activities cease or the individual home site is ready for its intended use. We capitalized interest of \$2,256,000 and \$2,295,000 for the three months ended September 30, 2008 and 2007, respectively, and \$6,712,000 and \$6,718,000 for the nine months ended September 30, 2008 and 2007, respectively. We regularly review the amount of capitalized costs in conjunction with our review of impairment of long-lived assets. Based on the level of development activity for the nine months ended September 30, 2008, if our development activities decreased such that 10% of our assets qualifying for capitalization of interest are no longer qualified, the amount of capitalized interest would have been reduced by \$671,000. As discussed in the Introductory Note to this Quarterly Report, we plan to reduce our development related expenditures significantly below historical levels. Reduced development activity may cause a significant portion of our assets to no longer qualify for capitalization of interest, which in turn could result in a significant reduction in the amount of capitalized interest. This reduction in capitalized interest would increase interest expense, resulting in lower net income, which would be offset in future periods by lower depreciation expense.

Table of Contents

Impairment of Long-Lived Assets

Real estate and other long-lived assets are recorded at cost, less accumulated depreciation, unless considered impaired. If events or circumstances indicate that the carrying amount of a property may be impaired, we will make an assessment of its recoverability by estimating the undiscounted future cash flows, excluding interest charges, of the property. In the event the property is under development, the estimate of future cash flows includes all future expenditures necessary to develop the property. If the carrying amount exceeds the aggregate future cash flows, we would recognize an impairment loss to the extent the carrying amount exceeds the fair market value of the property.

Real estate investments are subject to varying degrees of risk. Several factors may adversely affect the economic performance and value of our real estate investments. These factors include changes in the national, regional and local economic climates; local conditions, such as an oversupply of residential land lease properties or a reduction in the demand for our residential land lease properties; competition from other housing sources, including single and multifamily properties; plus changes in market rental rates. Additional factors that may adversely affect the economic performance and value of our development properties include regulatory changes that impact the number of home sites that can be built on our undeveloped land, changes in projected costs to construct new subdivisions in our communities and regulatory changes made by local, regional, state or national authorities. Any adverse changes in these factors could cause impairment in our real estate.

Fair Value of Financial Instruments

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurement* (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. SFAS 157 is effective for financial assets and financial liabilities for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued Staff Position No. 157-2, *Effective Date of FASB Statement No. 157*, which deferred the effective date of SFAS 157 for all nonfinancial assets and nonfinancial liabilities to fiscal years beginning after November 2008.

The implementation of SFAS 157 for financial assets and financial liabilities, effective January 1, 2008, did not have a material impact on the Company's consolidated financial position and results of operations. The Company is currently assessing the impact of SFAS 157 for nonfinancial assets and nonfinancial liabilities on its consolidated financial position and results of operations.

The estimated fair value of the Company's secured notes payable was \$252,394,000 at September 30, 2008 as compared to the carrying value of \$258,928,000 at September 30, 2008.

The aggregate fair value of cash and cash equivalents, receivables, accounts payable and accrued liabilities as of September 30, 2008 approximates their carrying value due to their relatively short-term nature.

Table of Contents

Rental Property Depreciation

Depreciation is computed using the straight-line method over an estimated useful life of 5 to 75 years for land improvements, 5 to 50 years for buildings and 5 to 15 years for furniture and other equipment, all of which are judgmental determinations. These determinations may prove to be different than the actual life of any individual asset.

Inventory

Carrying amounts for inventory are determined on a specific identification basis and are stated at the lower of cost or estimated market value. If actual market conditions are less favorable than those projected by management, if customer preferences change, or if material improvements are made by suppliers that are preferred by our customers compared to inventory we own, the market value of our inventory may be lower than estimated and inventory write-downs may be required. Any such write-downs may have a significant impact on our financial results. On a quarterly basis, we review our inventory and evaluate our carrying amount versus recent offers, comparable sales, and our asking price in order to derive an estimate of its market value. In the event that the carrying amount exceeds our estimate of market value, less a normalized margin, we record a write-down of the carrying amount as a charge to the cost of home sales in the current period. As of September 30, 2008, \$11,902,000 of our total inventory of \$13,774,000 was older than one year. We recorded charges of approximately \$61,000 and \$135,000 for the three months ended September 30, 2008 and 2007, respectively, and \$426,000 and \$335,000 for the nine months ended September 30, 2008 and 2007, respectively, to adjust inventory carrying amounts to market value. If our estimate of fair market value was overstated by 10%, we would record an additional write down to fair market value, less a normalized margin, of \$ 1,106,000 based upon the carrying value of inventory as of September 30, 2008.

Stock-based Compensation

Stock-based compensation expense is recorded at the fair value of awards at the date of issuance over the requisite service period. The determination of fair value of market-based restricted stock and stock options requires the application of complex financial models and assumptions. The fair value assigned to awards at the date of issuance determines the amount of compensation expense that will be recognized over the vesting period for the award. There are alternative valuation models that may result in a valuation for awards that differs from our assessment of fair value. The application of alternative models or different valuation assumptions within the models we use will result in a fair value that is greater than or less than the fair value we assign to awards. To the extent that the alternative fair value is greater than the fair value we assign to awards, compensation expense over the vesting term of the award would increase resulting in lower net income. In addition, management must estimate the number of shares and options that will be forfeited by employees before the vesting requirements are met. We base our estimate of forfeitures on the historical forfeiture rate realized on prior awards. We revise our estimate on an ongoing basis to reflect actual forfeitures.

Legal Contingencies

We are currently involved in certain legal proceedings. We do not believe these proceedings will have a material adverse effect on our consolidated financial position. It is possible, however, that future results of operations for any particular quarterly or annual period could be materially affected by changes in assumptions and the effectiveness of strategies related to these proceedings. The amount of loss

Table of Contents

contingencies involving litigation, for which a loss is probable and can be reasonably estimated, is determined through consultation with legal counsel representing the Company. Our evaluation of loss contingencies arising from litigation, claims and assessments, considers unasserted claims and associated estimates of loss, if any, are provided to the extent probable and reasonably estimable.

Recent Accounting Pronouncements

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). SFAS 159 permits entities to choose to measure financial assets and liabilities (except for those that are specifically scoped out of the statement) at fair value. The election to measure a financial asset or liability at fair value can be made on an instrument-by-instrument basis and is irrevocable. The difference between carrying value and fair value at the election date is recorded as a transition adjustment to opening retained earnings. Subsequent changes in fair value are recognized in earnings. The effective date for SFAS 159 is as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company adopted SFAS 159 on January 1, 2008. The adoption of this standard did not have a material impact on the Company's consolidated financial statements.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 160, *Non-controlling Interests in Consolidated Financial Statements an amendment of Accounting Research Bulletin No. 51* (SFAS 160). The Statement seeks to improve uniformity and transparency in reporting of the net income attributable to non-controlling interests in the consolidated financial statements of the reporting entity. The statement requires, among other provisions, the disclosure, clear labeling and presentation of non-controlling interests in the Consolidated Balance Sheet and Consolidated Income Statement. SFAS 160 is effective for fiscal years beginning after December 15, 2008, early adoption is prohibited. The Company is evaluating SFAS 160 and has not yet determined the impact the adoption will have on the consolidated financial statements.

In December 2007, the FASB issued Statement of Financial Accounting Standard No. 141 (revised 2007), *Business Combinations* (SFAS 141R). SFAS 141R replaces SFAS 141, *Business Combinations* (SFAS 141), but retains the fundamental requirements in SFAS 141 that the acquisition method of accounting (also known as the purchase method) be used for all business combinations and for an acquirer to be identified for each business combination. SFAS 141R also establishes principles and requirements for how the acquirer: (a) recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquired entity; (b) improves the completeness of the information reported about a business combination by changing the requirements for recognizing assets acquired and liabilities assumed arising from contingencies; (c) recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and (d) determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141R replaces, with limited exceptions as specified in the Statement, the cost allocation process in SFAS 141(R) with a fair value based allocation process. SFAS 141R is required to be adopted concurrently with SFAS 160 and is effective for business combination transactions for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Early adoption is prohibited. The Company is evaluating SFAS 141R and has not yet determined the impact the adoption will have on the consolidated financial statements.

Table of Contents**Ongoing Strategic Review**

Please see the introductory Note to this Quarterly Report regarding our ongoing strategic review and other important matters regarding our business and results of operations.

Portfolio Summary

	Operational Home sites	Developed Home sites	Undeveloped Home sites	RV Sites	Total
As of December 31, 2007	7,984	1,370	1,191	129	10,674
New lots purchased		4			4
New leases originated	77	(77)			
Properties developed		102	(102)		
Site plan changes	(12)	(8)			(20)
As of September 30, 2008	8,049 ⁽¹⁾	1,391	1,089	129	10,658

(1) As of September 30, 2008, 7,802 of these operational home sites were occupied.

Occupancy Roll Forward

	Occupied Home sites	Operational Home sites	Occupancy
As of December 31, 2007	7,748	7,984	97.0%
New home sales	86	77	
Used home sales	7		
Used homes acquired	(22)		
Site plan changes		(12)	
Homes constructed by others	1		
Homes removed from previously leased sites	(18)		
As of September 30, 2008	7,802	8,049	96.9%

Operating Strategy

One of the measures we use to analyze our economic profitability is FFO less capital replacement spending for developed home sites. For the nine months ended September 30, 2008, our capital replacement spending was \$644,000, which averaged to \$68 per developed home site.

We believe that the presentation of FFO, when considered with the financial data determined in accordance with GAAP, provides a useful measure of our performance. We use FFO in measuring our operating performance because we believe that the items that result in a difference between FFO and net income have a different impact to the ongoing operating performance of a real estate company than to other businesses. FFO should not be considered an alternative to net income or net cash flows from operating activities, as calculated in accordance with GAAP, as an indication of our performance or as a measure of liquidity. FFO is not necessarily indicative of cash available to fund our cash needs, including our ability to make distributions, since FFO does not consider recurring capital expenditures, debt maturities or other capital expenditure commitments of the Company. The Board of Governors of the National Association of Real Estate Investment Trusts (NAREIT) defines FFO as net income (loss), computed in accordance with U. S. generally accepted accounting principles, excluding gains and losses from sales of property, plus depreciation and amortization, and after adjustments for unconsolidated

Table of Contents

partnerships and joint ventures. We calculate FFO beginning with the NAREIT definition as further adjusted for the minority interest in the Operating Partnership owned by persons other than us. Our basis of computing FFO is not necessarily comparable with that of other REITs.

For the three and nine months ended September 30, 2008 and 2007, our FFO was (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Net income (loss) available to common stockholders ⁽¹⁾	\$ 587	\$ 9,891	\$ (527)	\$ 12,196
Adjustments:				
Cumulative preferred stock dividends	484	484	1,453	1,453
Minority interest in Operating Partnership	127	162	107	560
Real estate depreciation	1,348	1,239	4,046	3,670
Gain on sale of discontinued operations	(100)	(10,305)	(100)	(10,305)
Discontinued Operations:				
Real estate depreciation attributable to discontinued operations		16	1	65
Minority interest in Operating Partnership attributable to discontinued operations	13	1,187	14	1,208
Funds From Operation (FFO)	2,459	2,674	4,994	8,847
Cumulative preferred stock dividends	(484)	(484)	(1,453)	(1,453)
FFO available to common stockholders	\$ 1,975	\$ 2,190	\$ 3,541	\$ 7,394
Weighted average common shares, common shares equivalents and OP Units outstanding	8,728	8,864	8,732	8,945

(1) Represents the numerator for earnings per common share calculated in accordance with GAAP

For the nine months ended September 30, 2008 and 2007, net cash flows were as follows (in thousands):

	Nine Months Ended September 30,	
	2008	2007
Net cash provided by operating activities	\$ 14,936	\$ 12,509
Net cash used in investing activities	\$ (17,206)	\$ (4,810)
Net cash provided by (used in) financing activities	\$ 1,759	\$ (7,656)

Table of Contents

**RESULTS OF OPERATIONS FOR THE
THREE AND NINE MONTHS ENDED SEPTEMBER 30, 2008**

Executive Overview

We are in the business of owning and leasing residential land. Our current business focuses on the ownership of land and generation of these leases primarily within adult or retirement (55+) communities (94% of our total home sites at September 30, 2008); we focus on these communities for the following reasons:

Current demographic projections predict that the customer base for this asset class will grow for the next 20+ years.

The residents have established credit histories and therefore are able to obtain favorable financing or pay cash for their homes making significant equity investments to improve the leasehold estate that effectively secures our lease.

The residents, as a result of their retired or semi-retired status, are less affected by current economic changes thereby making their continued rental payments more stable and the continued sales of homes in our communities more consistent year to year.

The Company is able to leverage its current marketing, brand, and management expertise. We seek growth through home sales to fill unoccupied home sites in current subdivisions, development of our land portfolio to increase the inventory of available home sites, and the selective acquisition of communities and development opportunities.

This business model presents a number of challenges and risks for the Company's management. Several of these risks are:

Community operations require management of expenses throughout the year while revenue increases are established on an annual basis and in some instances, are fixed at lease origination.

The continued development of additional home sites is a capital-intensive activity that requires substantial investments to be made in advance of returns.

Changes in the credit market may have an adverse impact on our ability to obtain additional capital needed to fund our operations.

Older homes may depreciate or become obsolete, thereby reducing the value of the property that effectively secures our lease.

Changes in the interest rate environment may have an adverse impact on our new home buyers' ability to realize sufficient proceeds from the sale of their present homes or finance new purchases, thereby limiting their financial ability to acquire new homes in our communities.

The cost of developing additional home sites and communities may increase at a rate or to a level that may exceed the costs projected at the point of the initial investment by the Company, and increases in rental rates may not be sufficient to offset the increased development costs.

We may incur operating losses from our home sales business during periods of low demand in the U.S. housing market, such as the present market.

Based upon the above and other factors, the rate of sales of new homes may be substantially slower than projected at the point of the initial investment by the Company, resulting in returns on investment materially different from original projections.

Table of Contents

There are additional challenges that might occur as a result of natural disasters such as hurricanes:

Our residents' homes may have damage that exceeds the insurance proceeds available under their homeowners' policies, thereby limiting residents' ability to restore their homes to pre-hurricane condition. In some instances, this may result in a loss of occupancy for an unknown period of time. This occupancy loss may be insured under the Company's business interruption policies.

The extent of claims made against properties in our asset class may continue to have a material impact on the cost of insurance for both the Company and our residents, thereby increasing the Company's operating costs at a rate in excess of rental rate increases and limiting our residents' ability to reinvest in their homes at the same rate enjoyed before the natural disaster.

The severity and number of natural disasters that impact Florida may result in a slowing rate of new customers to buy homes on our expansion sites, thereby reducing the rate of absorption and lowering the Company's return on investment.

The costs of hurricane clean-up and repair may not be fully covered by insurance policies, resulting in higher than projected capital spending.

Hurricanes may significantly disrupt our sales and marketing activities, thereby reducing home sales and revenue growth from new home site rentals during the impacted fiscal periods.

Beginning in 2007 and continuing in 2008, our ability to fill unoccupied sites in our land lease communities with new homes was significantly impacted by the slowdown in the U.S. housing market. We believe this slowdown is attributable to a decline in consumer confidence, an overall softening of demand for new homes, an oversupply of homes available for sale in our markets, the inability of some of our home buyers to sell their current homes and the direct and indirect impact of the turmoil in the mortgage loan market. Industry conditions deteriorated significantly during 2007 and continued in 2008. We attribute the reduction in our new home sales demand to concerns on the part of prospective home buyers about the direction of home prices and concerns by prospective home buyers about their ability to sell their existing homes. The potential of mortgage foreclosures, price reductions and increased sales incentives advertised by homebuilders have contributed to home buyers' concerns and provide impediments to our new home sales process. The result has been weakened demand for our new homes, slower sales, lower prices for homes at time of resale, higher cancellation rates, and increased price discounts and other sales incentives to attract home buyers. The weakened demand for new homes has negatively impacted our profitability, cash flow, liquidity and returns on newly leased sites.

We continue to operate our business with the expectation that difficult market conditions will continue to impact us for at least the near term. As a result and in connection with our ongoing strategic review, we are focused on increasing our short- and mid-term liquidity as we operate our business in these challenging times. As part of this effort to increase liquidity, we plan to reduce our efforts and costs to make new home sales and to reduce the cost and the rate of development of additional home sites, which may reduce the number of expansion home sites and leases facilitated by our home sales business.

Table of Contents

Comparison of Three Months Ended September 30, 2008 to Three Months Ended September 30, 2007

Rental Property Operations

Rental and other property revenues from our owned properties totaled \$9,831,000 for the three months ended September 30, 2008 compared to \$9,380,000 for the three months ended September 30, 2007, an increase of \$451,000 or 4.8%. The increase in property operating revenue was a result of:

\$370,000 increase in base rental income driven by increases in rental rates and the origination of leases of new home sites at our development properties,

\$100,000 increase in the pass on of taxes to tenants correlated with the increase in tax expenses, all offset by a

\$19,000 decrease in revenue recognized related to acquired lease obligations.

Golf course operating revenues totaled \$158,000 for the three months ended September 30, 2008 compared to \$165,000 for the three months ended September 30, 2007, a decrease of \$7,000 or 4.2%. Golf revenues decreased at two of three communities that have adjacent golf courses.

Property operating expenses from our owned properties totaled \$3,215,000 for the three months ended September 30, 2008 compared to \$3,090,000 for the same period in 2007, an increase of \$125,000 or 4.0%. The increase in property operating expenses was a result of:

\$54,000 increase in property taxes,

\$46,000 increase in repairs and maintenance, and a

\$35,000 increase in salaries, wages and benefits, all offset by a

\$10,000 decrease in other property level expenses.

Golf course operating expenses totaled \$311,000 for the three months ended September 30, 2008 compared to \$341,000 for the three months ended September 30, 2007, a decrease of \$30,000 or 8.8%.

Depreciation expense was \$1,348,000 during the three months ended September 30, 2008 compared to \$1,239,000 during the same period in 2007. The increase was as a result of an increase in depreciable property attributable to the continued development of previously undeveloped home sites.

Same store property revenues, a non-GAAP financial measure, for the three months ended September 30, 2008 increased by 4.7% from the three months ended September 30, 2007, consisting of a 3.5% increase from same site rental revenues and a 1.2% increase from absorption rental site revenues. Expenses related to those revenues increased 3.4% over that same period consisting of a 2.2% increase in same site rental expenses, a 2.2% increase from absorption rental site expenses and a (1.0%) decrease in golf expenses. Same store property net operating income, a non-GAAP financial measure, increased 5.3% for the three months ended September 30, 2008. Our same store base included 98.7% of our property operating revenues for the three months ended September 30, 2008.

Table of Contents

We believe that the same store information provides the users of these financial statements with a comparison of the profitability for properties owned during both reporting periods that cannot be obtained from a review of the consolidated income statement. This comparison can be useful to an understanding of the parts in addition to an understanding of the whole. A reconciliation of same store operating results used in the above calculation to total operating revenues and total expenses for the three months ended September 30, 2008 and 2007, determined in accordance with U.S. generally accepted accounting principles, is reflected in the following table (in thousands):

		Three Months Ended September 30, 2008	Three Months Ended September 30, 2007	Change	% Change	Contribution to Same Store % Change ⁽¹⁾
Same site rental revenues	C	\$ 9,493	\$ 9,158	\$ 335	3.7%	3.5%
Absorption rental revenues		244	128	116	90.6%	1.2%
Same store golf revenues		158	165	(7)	(4.2%)	
Same store revenues	A	9,895	9,451	444	4.7%	4.7%
Other ancillary revenues ⁽²⁾		94	94			
Total property revenues	E	\$ 9,989	\$ 9,545	\$ 444	4.7%	
Same site rental expenses	D	\$ 2,696	\$ 2,630	\$ 66	2.5%	2.2%
Absorption rental expenses		66		66	100.0%	2.2%
Same store golf expenses		311	341	(30)	(8.8%)	(1.0%)
Same store expenses	B	3,073	2,971	102	3.4%	3.4%
Expenses related to offsite management ⁽³⁾		453	460	(7)	(1.5%)	
Total property operating expenses	F	\$ 3,526	\$ 3,431	\$ 95	2.8%	
Same store net operating income	A-B	\$ 6,822	\$ 6,480	\$ 342	5.3%	
Same site net operating income	C-D	\$ 6,797	\$ 6,528	\$ 269	4.1%	
Total net operating income	E-F	6,463	\$ 6,114	\$ 349	5.7%	

⁽¹⁾ Computed as the change in the individual component of same store revenue or expense divided by the total applicable same store base (revenue or expense) for the 2007 period. For example, same site rental revenue increase of \$335 as compared to the total same store revenues in 2007 of \$9,451 is a 3.5% increase ($\$335 / \$9,451 = 3.5\%$).

⁽²⁾ Other ancillary revenues consist of amortization of deferred income recognized related to acquired lease obligations, intercompany revenues and other miscellaneous income not attributable to land leases.

⁽³⁾ Expenses related to offsite management reflect portfolio property management costs not attributable to a specific property.

Table of Contents*Home Sales Operations*

Revenues for the home sales business totaled \$3,403,000 for the three months ended September 30, 2008 as compared to \$7,162,000 for the three months ended September 30, 2007. The decrease in revenues compared to the same period in the prior year was primarily due to decreased sales at nine of our expansion communities. The average selling price of new homes closed was \$116,000 and \$137,000 for the three months ended September 30, 2008 and 2007, respectively. The decrease in average selling price is the result of a shift in product mix combined with a decrease in the average size of a home sold from 1,535 square feet in 2007 to 1,464 square feet in 2008. Homes sold totaled 29 for the three months ended September 30, 2008 compared to 51 homes for the three months ended September 30, 2007, a decrease of 43.1%.

A summary of our home sales activities for the three months ended September 30, 2008 and 2007 is highlighted in the following table:

	Three Months Ended September 30, 2008	Three Months Ended September 30, 2007	Unit Change	Percent Change
New home closings	29	51	(22)	(43.1)%
New home contracts	30	44	(14)	(31.8)%
Home resales	3	4	(1)	(25.0)%
Brokered home sales	23	22	1	4.5%
New home contract backlog ⁽¹⁾	6	32	(26)	(81.3)%

⁽¹⁾ Balance as of September 30, 2008 and 2007, respectively.

Total cost of sales for the three months ended September 30, 2008 was \$2,518,000 compared to \$5,055,000 for the three months ended September 30, 2007. Resulting margin decreases are attributable to a decrease in manufacturer rebates associated with lower purchasing volumes and increases in costs of homes purchased offset by a decrease in inventory write downs compared to 2007. Selling and marketing expense for the three months ended September 30, 2008 decreased \$918,000 from the three months ended September 30, 2007 as a result of lower commission expense associated with lower sales volumes coupled with decreased marketing expense in the current year.

We reported a loss from the home sales business of \$514,000 for the three months ended September 30, 2008 as compared to a loss of \$202,000 for the three months ended September 30, 2007.

General and Administrative Expenses

Our general and administrative expenses were \$1,356,000 for the three months ended September 30, 2008 and \$1,105,000 for the three months ended September 30, 2007. The \$251,000 increase in expense was a result of:

\$127,000 increase in salaries, wages and benefits,

Table of Contents

\$115,000 increase in professional fees,

\$36,000 increase in stock based compensation expense, and a

\$7,000 increase in other costs, all offset by a

\$34,000 decrease in regulatory compliance and public company reporting costs.

Interest and Other Income

During the three months ended September 30, 2008 and 2007, interest and other income were \$59,000 and \$7,000, respectively. The increase of \$52,000 was a result of interest earned in 2008 on a construction loan made to an unaffiliated homebuilder in late 2007.

Interest Expense

During the three months ended September 30, 2008 and 2007, interest expense was \$2,202,000 and \$2,197,000, respectively, which was net of capitalized interest of \$2,256,000 and \$2,295,000, respectively. The increase is primarily a result of higher outstanding balances offset by decreased interest rates on variable rate debt.

Cumulative Preferred Stock Dividends

During the three months ended September 30, 2008 and 2007, cumulative preferred stock dividends were \$484,000 and \$484,000, respectively.

Comparison of Nine Months Ended September 30, 2008 to Nine Months Ended September 30, 2007

Rental Property Operations

Rental and other property revenues from our owned properties totaled \$29,263,000 for the nine months ended September 30, 2008 compared to \$28,032,000 for the nine months ended September 30, 2007, an increase of \$1,231,000 or 4.4%. The increase in property operating revenue was a result of:

\$1,249,000 increase in base rental income driven by increases in rental rates and the origination of leases of new home sites at our development properties,

\$102,000 increase in the pass on of utilities to tenants correlated with the increase in utilities expenses,

\$63,000 increase in the pass on of property tax allocations to tenants,

\$37,000 increase in rents for recreational vehicle sites, all offset by a

\$141,000 decrease in revenue recognized related to acquired lease obligations, and a

\$79,000 decrease in other miscellaneous income.

Edgar Filing: AMERICAN LAND LEASE INC - Form 10-Q

Golf course operating revenues totaled \$814,000 for the nine months ended September 30, 2008 and \$814,000 for the nine months ended September 30, 2007.

Table of Contents

Property operating expenses from our owned properties totaled \$9,529,000 for the nine months ended September 30, 2008 compared to \$9,384,000 for the same period in 2007, an increase of \$145,000 or 1.5%. The increase in property operating expenses was a result of:

\$81,000 increase in property taxes,

\$75,000 increase in salaries, wages and benefits,

\$65,000 increase in utility expense partially correlated with an increase in billings to tenants reported as rental & other property revenue,

\$28,000 increase in property insurance, and a

\$23,000 increase in repairs and maintenance costs, all offset by a

\$64,000 decrease in other property level expenses,

\$50,000 decrease in utility operations expense, and a

\$13,000 decrease in property operating overhead.

Golf course operating expenses totaled \$991,000 for the nine months ended September 30, 2008 compared to \$1,033,000 for the nine months ended September 30, 2007, a decrease of \$42,000 or 4.1%. Golf expenses increased at all three communities that have adjacent golf courses.

Depreciation expense was \$4,046,000 during the nine months ended September 30, 2008 compared to \$3,670,000 during the same period in 2007. The increase was as a result of an increase in depreciable property attributable to the continued development of previously undeveloped home sites.

Same store property revenues, a non-GAAP financial measure, for the nine months ended September 30, 2008 increased by 5.0% from the nine months ended September 30, 2007, consisting of a 3.3% increase from same site rental revenues and a 1.7% increase from absorption rental site revenues. Expenses related to those revenues increased 1.3% over that same period consisting of a 0.9% increase in same site rental expenses, a 0.9% increase from absorption rental site expenses and a 0.5% decrease in golf expenses. Same store property net operating income, a non-GAAP financial measure, increased 6.8% for the nine months ended September 30, 2008. Our same store base included 99.0% of our property operating revenues for the nine months ended September 30, 2008.

Table of Contents

We believe that the same store information provides the users of these financial statements with a comparison of the profitability for properties owned during both reporting periods that cannot be obtained from a review of the consolidated income statement. This comparison can be useful to an understanding of the parts in addition to an understanding of the whole. A reconciliation of same store operating results used in the above calculation to total operating revenues and total expenses for the nine months ended September 30, 2008 and 2007, determined in accordance with U.S. generally accepted accounting principles, is reflected in the following table (in thousands):

		Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007	Change	% Change	Contribution to Same Store % Change ⁽¹⁾
Same site rental revenues	C	\$ 28,440	\$ 27,500	\$ 940	3.4%	3.3%

Absorption rental expenses		80		80	100.0%	0.9%
Same store golf expenses		991	1,033	(42)	(4.1)%	(0.5)%
Same store expenses	B	9,186	9,068	118	1.3%	1.3%
Expenses related to offsite management ⁽³⁾		1,334	1,349	(15)	(1.1)%	
Total property operating expenses	F	\$ 10,520	\$ 10,417	\$ 103	1.0%	
Same store net operating income	A-B	\$ 20,773	\$ 19,459	\$ 1,314	6.8%	
Same site net operating income	C-D	20,325	19,465	860	4.4%	
Total net operating income	E-F	\$ 19,557	\$ 18,429	\$ 1,128	6.1%	

(1) Computed as the change in the individual component of same store revenue or expense divided by the total applicable same store base (revenue or expense) for the 2007 period. For example, same site rental revenue increase of \$940 as compared to the total same store revenues in 2007 of \$28,527 is a 3.3% increase ($\$940 / \$28,527 = 3.3\%$).

(2) Other ancillary revenues consist of amortization of deferred income recognized related to acquired lease obligations, intercompany revenues and other miscellaneous income not attributable to land leases.

(3) Expenses related to offsite management reflect portfolio property management costs not attributable to a specific property.

Home Sales Operations

Revenues for the home sales business totaled \$10,783,000 for the nine months ended September 30, 2008 as compared to \$22,756,000 for the nine months ended September 30, 2007. The decrease in revenues compared to the same period in the prior year was primarily due to decreased sales at fifteen of our expansion communities. The average selling price of new homes closed was \$123,000 and \$131,000 for the nine months ended September 30, 2008 and 2007, respectively, a decrease of 6.1%. The decrease in selling prices is a result of a shift in product mix. Homes sold totaled 86 for the nine months ended September 30, 2008 compared to 171 homes for the nine months ended September 30, 2007, a decrease of 49.7%.

Table of Contents

A summary of our home sales activities for the nine months ended September 30, 2008 and 2007 is highlighted in the following table:

	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007	Unit Change	Percent Change
New home closings	86	171	(85)	(49.7)%
New home contracts	82	196	(114)	(58.2)%
Home resales	7	8	(1)	(12.5)%
Brokered home sales	64	71	(7)	(9.9)%
New home contract backlog ⁽¹⁾	6	32	(26)	(81.3)%

⁽¹⁾ Balance as of September 30, 2008 and 2007, respectively.

Total cost of sales for the nine months ended September 30, 2008 was \$8,169,000 compared to \$16,346,000 for the nine months ended September 30, 2007. Resulting margin decreases are attributable to a decrease in manufacturer rebates associated with lower purchasing, increases in costs of homes purchased, and an increase in inventory write downs pursuant to our valuation discipline as a result of lower sales volumes partially offset by increases attributable to increased selling prices. Selling and marketing expenses for the nine months ended September 30, 2008 decreased \$2,073,000 from the nine months ended September 30, 2007 as a result of lower commission expense associated with lower sales volumes coupled with decreased marketing expense in the current year.

We reported a loss from the home sales business of \$2,300,000 for the nine months ended September 30, 2008 as compared to a loss of \$546,000 for the nine months ended September 30, 2007.

General and Administrative Expenses

Our general and administrative expenses were \$3,811,000 for the nine months ended September 30, 2008 and \$3,062,000 for the nine months ended September 30, 2007. The \$749,000 increase in expense was a result of:

\$372,000 increase in salaries, wages and benefits,

\$148,000 increase in professional fees,

\$118,000 increase in various other costs,

\$61,000 increase in stock-based compensation expense, and a

\$50,000 increase in regulatory compliance and public company reporting costs.

Interest and Other Income

During the nine months ended September 30, 2008 and 2007, interest and other income were \$161,000 and \$185,000, respectively. The decrease of \$24,000 was a result of a one-time fee paid to us for delays caused by a prior owner of a community in first quarter 2007 offset by interest earned on a construction loan made to an unaffiliated home builder.

Interest Expense

Edgar Filing: AMERICAN LAND LEASE INC - Form 10-Q

During the nine months ended September 30, 2008 and 2007, interest expense was \$6,648,000 and \$6,448,000, respectively, which was net of capitalized interest of \$6,712,000 and \$6,718,000, respectively. The increase is primarily a result of higher outstanding balances offset by decreased interest rates on variable rate debt.

Table of Contents

Loss on Early Debt Retirement

The Company incurred a \$1,987,000 prepayment fee associated with refinancing three loans during the nine months ended September 30, 2008. There were no such fees incurred in 2007.

Cumulative Preferred Stock Dividends

During the nine months ended September 30, 2008 and 2007, cumulative preferred stock dividends were \$1,453,000 and \$1,453,000, respectively.

Returns from Home Sales Business

In connection with our ongoing strategic review, we are reducing development costs and new home sales operations and related expenditures. These actions have the potential to reduce the number of expansion home site leases facilitated by our home sales business. We may further change our levels of development and home sales activity based on, among other things, changes in new home sales demand, our liquidity position and our ongoing strategic review, and any reduced home sales or development efforts may be reversed if market conditions improve.

Historically, we have engaged in the home sales business for four reasons:

- 1) to lease expansion home sites within our portfolio, thereby increasing the profitability and value of our communities,
- 2) to upgrade existing leased home sites with new and more valuable homes, thereby increasing the long-term value of the lease income stream,
- 3) to broker the resale of homes in order to support investment values in the homes and to attract good neighbors all so as to promote the long-term values of the communities, both for the residents who are our customers and for the long-term growth and security of our own investment, and
- 4) to resell any homes we acquire as a result of defaults in lease obligations owed to us.

We measure the profitability of developing and leasing expansion home sites within our portfolio through identifying the following:

- 1) an estimate of the stabilized first year profit on the leases originated on expansion home sites,
- 2) an estimate of the total development costs of the expansion sites leased including all current and projected development costs, and
- 3) an estimate of the home sales profit or loss attributable to new homes sold on expansion sites, without consideration for the other aspects of the home sales business.

We believe that our projection of the stabilized first year returns from the leases originated on expansion home sites provides the user of our financial statements with a comparison of the profitability of the newly leased sites to our current portfolio and to alternative investments in stabilized communities. Based upon current uncertainties over new home sales demand, we are unable to project with confidence the stabilized first year profit for newly leased sites relative to investments in stabilized communities.

Table of Contents

Our calculation of estimated stabilized first year returns from leases originated on expansion home sites is a projection. We project the amount of variable property operating expenses we will incur as a result of the newly leased home sites. In order to project our variable operating expenses, we begin with operating expenses determined in accordance with GAAP and deduct those expenses we believe will not increase with the addition of newly leased sites.

The most directly comparable financial measure that can be reconciled to GAAP is our historical return on investment in operational home sites for the year ended December 31, 2007, which is reconciled on page 43 in footnote 1. Our projection of the estimated stabilized first year return from leases originated on expansion home sites cannot be directly reconciled to a comparable GAAP measure, principally because there will be leases that begin during the period and we estimate the incremental operating expenses associated with these leases. The estimated stabilized first year return from leases originated on investment in expansion home sites should not be considered in isolation nor is it intended to represent an alternative measure of operating income or cash flow or any other measure of performance as determined in accordance with GAAP.

By comparing the projected stabilized first year profit on the expansion home site leases originated to the sum of total development costs, as increased (in the event of a home sales loss) or decreased (in the event of a home sales profit) by the estimated home sales profit or loss, we are able to measure the projected stabilized first year return from leases originated on our expansion home sites. We believe that this measure provides a useful comparison to the returns available from investing in stabilized communities. Based upon current uncertainties over new home sales demand, we are unable to project with confidence the stabilized first year profit for newly leased sites relative to investments in stabilized communities.

Our calculation of projected stabilized first year return from leases originated on expansion home sites includes the following components:

- (a) We derive our projected stabilized first year profit on leases originated on expansion home sites by deducting estimated operating expenses from the stabilized contractual revenues from leases originated during the period. We estimate operating expenses using one half of the actual ratio of property operating expenses incurred to property revenue generated in the prior year. For example, if we originate a lease at a property where the ratio of operating expense to property revenues was 40% for the prior year, we apply a 20% expense ratio to project the additional expense associated with the newly leased home site for the first year. We believe that one half of the actual expenses is an appropriate estimate of the relationship between fixed and variable expenses of operating our communities.
- (b) The total development costs of the expansion sites leased are based upon the sum of land, construction costs, and other capitalized costs, including interest expense, as allocated to the individual home sites based upon the leased value of each home site.
- (c) We determine the home sales profit or loss that is attributable to sale of homes situated on expansion home sites by deducting from the reported home sales operating income the gross margin and commissions attributable to the (i) the sale of used homes, and (ii) brokerage of home sale transactions between third parties. We make no allocation of sales overhead to the transactions identified above.

We believe that our home sales operations drive our projected stabilized first year return from leases originated on expansion home sites because most of our expansion home site leases originate with our sale of a home.

Table of Contents

Our projections of the stabilized first year returns from the leases originated on expansion home sites constitute forward-looking statements. Actual returns may be materially different than such projections as a result of the risks and other factors discussed throughout our Annual Report for the year ended December 31, 2007 and our quarterly reports filed with the Securities and Exchange Commission from time to time. We undertake no obligation to update such projections to reflect events or circumstances occurring after the date of this report.

The leases facilitated by the home sales business during the three months ended September 30, 2008 and 2007 are estimated to provide a stabilized first year return on investment of 4.7% and 7.2%, respectively. These returns are shown on the following table and are based upon unaudited projected information. This compares to our realized returns from operational home sites of 8.3% for the year ended December 31, 2007. The decrease in return on expansion home sites is driven primarily by (i) the decreased profitability of our home sales business resulting from fewer home sales over which the fixed costs are allocated, and (ii) increases in the per site cost of development. Our future returns are dependent upon a number of factors, including changes in the per site cost of development, changes in lease incentives utilized in support of the rate of new home sales, changes in the profitability of our home sales business, changes in the quantity of new homes sold and other factors.

The calculation of our projected first year return from leases originated on expansion home sites for three months ended September 30, 2008 and 2007 is shown on the following table (in thousands, except expansion sites leased):

		Three Months Ended September 30, 2008	Three Months Ended September 30, 2007
Expansion sites leased during the period		28	49
Estimated stabilized first year profit on leases originated during the period	A	\$ 85	\$ 179
Allocated costs, including development costs of sites leased		\$ 1,262	\$ 2,213
Home sales loss attributable to sites leased		543	284
Total costs incurred to originate ground leases	B	\$ 1,805	\$ 2,497
Estimated stabilized first year returns from the leases originated on expansion home sites during the period	A/B	4.7%	7.2%

For the three months ended September 30, 2008 and 2007, we estimate our profit or loss attributable to the sale of homes situated on expansion home sites as follows (in thousands):

	Three Months Ended September 30, 2008	Three Months Ended September 30, 2007
Reported loss from sales operations	\$ (514)	\$ (202)
Brokerage business income	(28)	(36)
Used home sales	(1)	(46)
Adjusted (loss) income for projection analysis	\$ (543)	\$ (284)

Table of Contents

We exclude the profits from our used home sales and brokerage business from our projection of return on investment in expansion home sites. The profits from these activities represent profits that are not directly related to our expansion activities.

Comparison of the Nine Months Ended September 30, 2008 and 2007

The leases facilitated by the home sales business during the nine months ended September 30, 2008 and 2007 are estimated to provide a stabilized first year return on investment of 4.6% and 6.8%, respectively. These returns are shown on the following table and are based upon unaudited projected information. This compares to our realized returns from operational home sites of 8.3% for the year ended December 31, 2007. The decrease in return on expansion home sites is driven primarily by (i) the decreased profitability of our home sales business resulting from fewer home sales over which the fixed costs are allocated, and (ii) increases in the per site cost of development. Our future returns are dependent upon a number of factors, including changes in the per site cost of development, changes in lease incentives utilized in support of the rate of new home sales, changes in the profitability of our home sales business, changes in the quantity of new homes sold and other factors.

The calculation of our projected first year return from leases originated on expansion home sites for the nine months ended September 30, 2008 and 2007 is shown in the following table (in thousands, except expansion sites leased):

		Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
Expansion sites leased during the period		84	162
Estimated stabilized first year profit on leases originated during the period	A	\$ 311	\$ 544
Allocated costs, including development costs of sites leased		\$ 4,360	\$ 7,203
Home sales loss attributable to sites leased		2,391	751
Total costs incurred to originate ground leases	B	\$ 6,751	\$ 7,954
Estimated stabilized first year returns from the leases originated on expansion home sites during the period	A/B	4.6%	6.8%

For the nine months ended September 30, 2008 and 2007, we estimate our profit or loss attributable to the sale of homes situated on expansion home sites as follows (in thousands):

	Nine Months Ended September 30, 2008	Nine Months Ended September 30, 2007
Reported loss from sales operations	\$ (2,300)	\$ (546)
Brokerage business income	(70)	(101)
Used home sales	(21)	(104)
Adjusted loss for projection analysis	\$ (2,391)	\$ (751)

Table of Contents

We exclude the profits from our used home sales and brokerage business from our projection of return on investment in expansion home sites. The profits from these activities represent profits that are not directly related to our expansion activities.

The reconciliation of our projected first year return from leases originated on expansion home sites, a projection, to our return on investment in operational home sites for the year ended December 31, 2007 in accordance with GAAP is shown in the following table (in thousands):

		Total Portfolio for Year Ended December 31, 2007
Property income before depreciation ¹	A	\$ 24,686
Total investment in operational home sites ¹	B	\$ 295,821
Return on investment from earning home sites ¹	A/B	8.3%

¹ A reconciliation of our return on investment for earning sites for the year ended December 31, 2007 to property income before depreciation and investment in operational sites is shown in the following table (in thousands):

	December 31, 2007
Rental and other property revenues	\$ 38,651
Property operating expenses	(13,965)
Property income before depreciation (A)	\$ 24,686
Real estate assets, net	\$ 399,517
Add: Accumulated depreciation	31,842
Less: Real estate under development	(122,403)
Less: Cost of home sites ready for intended use	(13,135)
Investment in operational sites (B)	\$ 295,821
Return on investment in operational sites (A/B) ¹	8.3%

¹ Our return on investment in operational sites reflects our income from and investment in sites that were leased for the first time during the year ended December 31, 2007. For these leases, the income reported above includes less than a full twelve months of operating results. Consequently, when compared to the investment we have made in these home sites, the return on investment during the year ended December 31, 2007 is less than the return when measured using a full twelve months of operating results.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

As of September 30, 2008, we had cash and cash equivalents of \$30,000. Our principal activities that demand liquidity include our normal operating activities (including new home sales operations), development expenditures, payments of principal and interest on outstanding debt, acquisitions of and additional investments in properties, and payments of distributions to preferred and common stockholders and OP Unit holders. We plan to utilize cash provided by operating activities, short-term borrowings, refinancings, and possibly the sale of properties resulting from our strategic review to meet short-term liquidity demands. We plan to meet our long-term liquidity requirements, such as debt maturities and property acquisitions, through long-term borrowings, both secured and unsecured, refinancings or extensions, the issuance of debt or equity securities (including OP Units or other partnership interests), the sale of properties and cash generated from operations. Under current economic conditions, our ability to satisfy short- and long-term liquidity requirements through these means is uncertain.

In connection with our ongoing strategic review, we are focused on increasing liquidity. As part of this effort to increase liquidity, we are reviewing all of our internal activities and expect to implement restructuring and cost-reduction programs. Our plans to increase liquidity include reducing projected development and new home sales operations and related expenditures.

In addition, the Board of Directors determined against the declaration and payment of quarterly cash dividends on the Company's common stock during the current quarter. The Board of Directors determined to pay the preferred stock dividend during the current quarter. Our dividend policy remains under review and the Board of Directors has considered, and will continue to consider, among other things, the significant downturn in new home sales market, our ongoing strategic review and the Company's liquidity position in the context of its quarterly review and dividend decision. The Board of Directors will decide each quarter whether to declare and pay dividends on our common and preferred stock.

We have a revolving line of credit with a bank with a total commitment of \$16,000,000 that bears interest at 175 basis points over the one-month LIBOR rate (4.2% at September 30, 2008). The line of credit is secured by real property and improvements located in St. Lucie, Lake, and Pasco Counties, Florida and Maricopa County, Arizona with a net book value of \$44,275,000. The revolving line of credit matures on December 31, 2008. We are currently in negotiations with our lender and expect that this line of credit will be renewed. However, loan renewals are unusually uncertain in the current financial environment, and there is no assurance we will obtain the renewal. In the event we are unable to obtain a renewal of this line of credit, we would be required to repay all amounts outstanding. At September 30, 2008, \$9,719,000 was outstanding and \$6,281,000 was not drawn under the revolving line of credit.

The availability of funds to us under our line of credit is subject to certain borrowing base and other customary restrictions, including compliance with financial and other covenants thereunder. Based on the application of the borrowing base calculation, as of September 30, 2008, \$3,368,000 was available.

Table of Contents

The line of credit also includes certain financial covenants that require us to maintain a tangible net worth (as defined by lender) of \$150,000,000 and to maintain a debt to adjusted tangible net worth ratio (as defined by lender) of not more than 1.75 to 1.0, among others. We believe we were in compliance with all financial covenant requirements under this revolving line of credit at September 30, 2008.

We have a floor plan line of credit with a floor plan lender providing a committed credit facility of \$35,000,000 with a variable interest rate linked to the lender's prime rate, with a floor of 5.25%, plus 25 basis points (5.5% at September 30, 2008). Individual advances mature the earlier of 1,080 days or upon sale of the home to a third party. The floor plan line of credit is partially recourse to the Company and at September 30, 2008, \$1,953,000 of the outstanding balance under the floor plan was recourse to the Company. This floor plan line of credit is secured by inventory located in the Company's residential land lease communities with a carrying value of approximately \$12,447,000. The financial covenants of the floor plan line of credit require the Company to maintain a tangible net (as defined by lender) worth of \$150,000,000 and to maintain a debt to adjusted tangible net worth (as defined by lender) ratio of not more than 1.75 to 1.0, among others. The Company believes it was in compliance with all financial covenant requirements under this floor plan facility at September 30, 2008. The floor plan lender's commitment to fund future inventory purchases expires in September 2009. At September 30, 2008, \$14,344,000 was outstanding, and approximately \$20,656,000 was available under the floor plan facility.

As part of our previously disclosed ongoing strategic review, we have determined to reduce the cost and the rate of development of additional home sites in our communities. In making this decision to curtail development activities, we decided not to commence construction of a clubhouse at one of our communities and, as a result, were in technical default of a covenant in the construction loan for such community. The lender under this construction loan has not advanced any funds with respect to such phase of the construction, has been informed of this decision and waived the technical default.

Our ability to access secured and unsecured borrowings as a source of liquidity is dependent upon factors outside of our control including economic trends that impact the availability of credit from lending sources we currently utilize. Our ability to issue additional equity in the form of equity securities (including the issuance by the Operating Partnership of OP Units) is dependent upon certain factors outside of our control, including returns available on alternative investments and other economic factors. The amount of cash generated by our operations is dependent upon our ability to operate the existing portfolio of revenue earning sites and to originate new earning sites through new lease originations generated by our home sales business. Our ability to generate cash through the operation of the current portfolio is dependent upon the costs we pay to acquire the goods and services required to operate the portfolio, and the absence of natural disasters, such as hurricanes, that would disrupt the flow of rental income for an undeterminable time period and other factors. Our ability to generate cash through the origination of new earning sites is dependent upon our ability to market effectively to our target market customers, to originate contracts for sale of homes at our properties, thereby generating income producing leases and to develop the undeveloped land within our portfolio in a timely fashion, and on a cost effective basis. Our ability to generate cash through the origination of new earning sites is dependent on market factors as well, including demand for new homes.

Table of Contents

Operating Activities

Our net cash provided by operating activities was \$14.9 million during the nine months ended September 30, 2008 compared to \$12.5 million during the same period in 2007. The \$2.4 million increase was primarily the result of:

\$3.5 million decrease in cash used to fund inventory in 2008 as compared to cash used to fund inventory decreases in 2007,

\$0.8 million increase in property operating income, offset by a

\$1.7 million decrease in home sales earnings due to lower sales volumes and a

\$0.2 million increase in interest costs.

Investing Activities

During the nine months ended September 30, 2008, the net cash used in investing activities was \$17.2 million, compared with \$4.8 million net cash used during the same period in 2007. The \$12.4 million increase in net cash used for investing activities is primarily the result of:

\$15.6 million decrease in proceeds from sale of real estate,

\$2.6 million increase in construction loan advances, offset by a

\$5.8 million decrease in expenditures for capital replacements, development and improvements in the 2008 period as compared to the 2007 period.

Financing Activities

Net cash provided by financing activities was \$1.8 million for the nine months ended September 30, 2008 compared with net cash used in financing activities during the same period in 2007 of \$7.7 million.

The \$9.5 million increase in cash provided by financing activities is primarily the result of:

Increases

\$21.6 million increase in proceeds from secured notes payable,

\$18.8 million decrease in principal payments on secured credit facilities,

\$7.9 million decrease in principal payments on secured notes payable for real estate sold, and a

Edgar Filing: AMERICAN LAND LEASE INC - Form 10-Q

\$3.5 million decrease in payments for treasury stock, all offset by a
Decreases

\$24.6 million decrease in proceeds from secured credit facilities,

\$15.8 million increase in principal payments on secured notes payable, and a

\$1.9 million increase in payments on early extinguishment of debt.

Table of Contents

Dividends and Distributions

Our dividends on common and preferred stock are set quarterly by the Board of Directors and are subject to change or elimination at any time. Our primary financial objective is to maximize long-term, risk-adjusted returns on investment for common stockholders. While the dividend policy is considered within the context of this objective, maintenance of past dividend levels is not a primary investment objective of the Company and is subject to numerous factors including our ongoing strategic review, profitability, capital expenditure plans, obligations related to principal payments and capitalized interest, liquidity and the availability of debt and equity capital at terms deemed attractive by us to finance these expenditures. Our Board of Directors has and will continue to consider the downturn in new home sales in the context of its quarterly review and dividend decision. In addition, the Board of Directors may consider the Company's dividend policy as a part of its previously announced review of strategic alternatives. Our net operating loss carryforward may be used to offset all or a portion of our REIT taxable income, which may allow us to reduce or eliminate our dividends paid and still maintain our REIT status. Substantially all of our REIT net operating loss carryforwards expire in 2008 and 2009.

Historically, the combination of dividend payments, capital expenditures, capitalized interest and debt repayment has exceeded funds provided from operating activities, and we have funded a portion of these expenditures from debt financings. However, there is no assurance that we will be able to continue to do so on terms deemed acceptable in the future. In the event that we are unable to do so or decide not to pursue such financing, we will be required to reduce or eliminate dividends, reduce or eliminate capital expenditures, or both.

As described above, as part of our ongoing strategic review, the Board of Directors determined against the declaration and payment of quarterly cash dividends on the Company's common stock during the current quarter. The Board of Directors determined to pay the preferred stock dividend during the current quarter. The Board of Directors will decide each quarter whether or not to declare and pay dividends on our common and preferred stock.

The Board of Directors authorized the Company to repurchase up to 2,000,000 shares of the outstanding common stock. During the three months ended September 30, 2008, the Company repurchased 0 shares of the outstanding common stock and has repurchased a total of approximately 812,000 shares pursuant to this authorization. The Company has and will continue to evaluate this investment opportunity in the context of its primary financial objective to maximize long-term, risk-adjusted returns on investment for common stockholders, as well as its ongoing strategic review and related focus on increasing liquidity.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our principal exposure to market risk is changes in interest rates relating to our various debt instruments and borrowings. As compared to the nine months ended September 30, 2007, our exposure to changes in interest rates at September 30, 2008 for repricing and refunding as to unpaid principal balances (i) decreased from \$195.0 million to \$193.0 million for partially amortizing secured notes payable; (ii) remained unchanged at \$22.1 million for variable rate secured notes payable; (iii) increased from \$13.3 million to \$14.3 million for variable rate secured floor plan facility; and (iv) increased from \$5.6 million to \$9.7 million for variable rate secured mortgage credit facility. The following is a discussion of the potential impact of changes in interest rates on our debt instruments at September 30, 2008.

Table of Contents

We have \$7.6 million of fixed rate, fully amortizing, non-recourse, secured notes payable. We do not have exposure to changing interest rates on these notes as the rates are fixed and the notes are fully amortizing.

We have \$229.3 million of fixed rate, partially amortizing, non-recourse, secured notes payable. We do not have significant exposure to changes in interest rates since the interest rates are fixed. We have repricing and refunding risks as to the unpaid balance on these notes of \$193.0 million due at maturity between 2013 and 2021, with an average maturity of 9.0 years.

We have \$22.1 million of interest only, non-recourse, secured notes payable. These variable rate loans bear interest at the three-month LIBOR rate plus 1.15 and 1.75 basis points, respectively. If LIBOR increased immediately by 1%, then our annual income before minority interest in the Operating Partnership and cash flows would decrease by \$221,000 due to an increase in interest expense based on the outstanding balance at September 30, 2008. We have repricing and refunding risks as to the unpaid balance due at maturity of these notes of \$22.1 million due at maturity between 2011 and 2012, with an average maturity of 3.4 years.

We have a revolving line of credit with a bank that bears interest at 175 basis points over the one-month LIBOR rate. If the LIBOR rate increased immediately by 1%, then our annual income before minority interest in the Operating Partnership and cash flows would decrease by \$97,000 due to an increase in interest expense on this line of credit, based on the approximately \$9.7 million outstanding balance at September 30, 2008. We have repricing and refunding risks as to the unpaid balance due at the maturity of this note in December 2008.

We have a secured floor plan facility that bears interest at the lender's prime rate plus 25 basis points. If the lender's prime rate increased immediately by 1%, then our annual income before minority interest in the Operating Partnership and cash flows would decrease by \$143,000 due to an increase in interest expense on this line of credit, based on the approximately \$14.3 million outstanding balance at September 30, 2008. We have repricing and refunding risks as to the unpaid balance due at the maturity of this note.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our senior management, including our chief executive officer, chief operating officer and chief financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this quarterly report (the evaluation date). Based upon this evaluation, our chief executive officer, chief operating officer, and chief financial officer concluded as of the evaluation date that our disclosure controls and procedures were effective such that the information relating to American Land Lease, including our consolidated subsidiaries, required to be disclosed in our SEC filings (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to American Land Lease's management, including our chief executive officer, chief operating officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Table of Contents

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting during the three months ended September 30, 2008 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II.

OTHER INFORMATION

Item 1A. RISK FACTORS

Disruptions in financial markets could adversely affect our liquidity or financial condition, and could impair our ability to obtain debt financing, or refinancing existing indebtedness on favorable terms.

Recent market and economic conditions have been unprecedented and challenging with tighter credit conditions and slower growth through the third quarter of 2008. For the nine-month period ended September 30, 2008, continued concerns about the availability and cost of credit, the U.S. mortgage market and a declining real estate market in the U.S. have contributed to increased market volatility and diminished expectations for the U.S. economy. These conditions, combined with volatile oil prices, declining business and consumer confidence and increased unemployment have in recent weeks contributed to unprecedented levels of volatility.

As a result of these market conditions, the cost and availability of credit has been and may continue to be adversely affected by illiquid credit markets and wider credit spreads. We had \$3.4 million available under our revolving credit facility at September 30, 2008, and we have no current reason to believe that we will be unable to access the facility before it matures on December 31, 2008. However, concern about the stability of the markets generally and the strength of borrowers specifically has led many lenders and institutional investors to reduce and, in some cases cease to provide, funding to borrowers.

If these market conditions continue, our ability to timely refinance maturing liabilities and access the capital markets to meet liquidity needs may be limited. Our revolving line of credit matures on December 31, 2008. We are currently in negotiations with our lender and expect that we will be able to renew this line of credit. However, renewals are unusually uncertain in the current financial environment and there is no assurance we will be able to obtain one. If we are unable to obtain a renewal or secure a new line of credit, we would be required to repay the amounts outstanding under our existing line of credit. Additionally, certain of our debt obligations are floating-rate obligations with interest rate and related payments that vary with the movement of LIBOR or other indexes. If the current market turbulence continues, there could be a rise in interest rates which could reduce our profitability or adversely affect our ability to meet our obligations.

Table of Contents

The soundness of financial institutions could adversely affect us.

We have relationships with many financial institutions, including lenders under our credit facilities, and, from time to time, we execute transactions with counterparties in the financial services and insurance industries. As a result, defaults by, or even rumors or questions about, financial institutions or the financial services and insurance industries generally, could result in losses or defaults by these institutions. In the event that the volatility of the financial markets adversely affects these financial institutions or counterparties, we or other parties to the transactions with us may be unable to complete transactions as intended, which could adversely affect our business and results of operations.

For a discussion of additional potential risks or uncertainties, please see Part I, Item 1A., of the Company's 2007 Annual Report on Form 10-K for the fiscal year ended December 31, 2007, filed with the Securities and Exchange Commission on March 11, 2008 and Part II., Item 1A., of the Company's Quarterly Report on Form 10-Q for the fiscal period ended June 30, 2008, filed the Securities and Exchange Commission on August 7, 2008.

Item 6. EXHIBITS

Exhibit No.	Description
3.1	Third Amended and Restated Certificate of Incorporation of American Land Lease, Inc. (incorporated herein by reference to Exhibit 3.1 to the Registrant's Current Report on Form 8-K, dated May 4, 2005 and filed on May 4, 2005).
3.2	Fourth Amended and Restated By-laws of American Land Lease, Inc. (incorporated herein by reference to Exhibit 3.1 to the Registrant's Current Report on Form 8-K, dated April 4, 2005 and filed on April 5, 2005).
31.1	Certification of CEO pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of COO pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.3	Certification of CFO pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1	Certification of CEO Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 furnished herewith.
32.2	Certification of COO Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 furnished herewith.
32.3	Certification of CFO Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 furnished herewith.
