UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2010

OR

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 000-24630

MIDWESTONE FINANCIAL GROUP, INC.

102 South Clinton Street

Iowa City, IA 52240

(Address of principal executive offices, including Zip Code)

Registrant's telephone number: 319-356-5800

Iowa
(State of Incorporation)

42-1206172
(I.R.S. Employer Identification No.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of May 4, 2010, there were 8,612,582 shares of common stock, \$1.00 par value per share, outstanding.

MidWestOne Financial Group, Inc. and Subsidiaries

Notes to Consolidated Financial Statements

(Unaudited)

1. Introductory Note

MidWestOne Financial Group, Inc. (*MidWestOne* or the *Company*, which is also referred to herein as *we*, *our* or *us*) is an Iowa corporation incorporated in 1983, a bank holding company under the Bank Holding Company Act of 1956 and a financial holding company under the Gramm-Leach-Bliley Act of 1999. Our principal executive offices are located at 102 South Clinton Street, Iowa City, Iowa 52240.

The *Company* owns 100% of the outstanding common stock of *MidWestOne Bank*, an Iowa state non-member bank chartered in 1934 with its main office in Iowa City, Iowa, (the *Bank*) and 100% of the common stock of *MidWestOne Insurance Services, Inc.*, Pella, Iowa. We operate primarily through our bank subsidiary, *MidWestOne Bank*, and *MidWestOne Insurance Services, Inc.*, our wholly-owned subsidiary that operates an insurance agency business through three offices located in central and east-central Iowa.

On March 14, 2008, we consummated a merger-of-equals transaction with the former *MidWestOne Financial Group, Inc.*, Oskaloosa, Iowa (*Former MidWestOne*), pursuant to and in accordance with the Agreement and Plan of Merger dated as of September 11, 2007 (the *Merger*). Prior to the *Merger*, we operated under the name *ISB Financial Corp.* As a result of the *Merger*, *Former MidWestOne* merged with and into the *Company* and ceased to exist as a legal entity, and we changed our name from *ISB Financial Corp.* to *MidWestOne Financial Group, Inc.* All references in this document to the *Company* and *MidWestOne* refer to the surviving organization in the *Merger*.

2. Basis of Presentation

The accompanying consolidated statements of operations for the three months ended March 31, 2010 and 2009 include the accounts and transactions of the *Company* and its wholly-owned subsidiaries *MidWestOne Bank* and *MidWestOne Insurance Services, Inc.* All material intercompany balances and transactions have been eliminated in consolidation.

The accompanying consolidated financial statements have been prepared by the *Company* pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U. S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. Management believes that the disclosures are adequate to make the information presented not misleading. In the opinion of management, the accompanying consolidated financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly the financial position as of March 31, 2010, and the results of operations and cash flows for the three months ended March 31, 2010 and 2009.

The results for the three months ended March 31, 2010 may not be indicative of results for the year ending December 31, 2010, or for any other period.

Certain amounts in the consolidated financial statements have been reclassified to conform to current year presentations.

3. Consolidated Statements of Cash Flows

In the consolidated statements of cash flows, cash and cash equivalents include cash and due from banks, interest-bearing deposits in banks, and federal funds sold.

4. Income Taxes

Federal income tax expense for the three months ended March 31, 2010 and 2009 was computed using the consolidated effective federal tax rate. The *Company* also recognized income tax expense pertaining to state franchise taxes payable by the subsidiary bank.

5. Shareholders Equity and Earnings per Common Share

Preferred Stock: On January 23, 2009, the shareholders of the Company approved a proposal to amend the Company's articles of incorporation to authorize the issuance of up to 500,000 shares of preferred stock. On February 6, 2009, the Company issued 16,000 shares of Fixed Rate Cumulative Perpetual Preferred Stock, Series A, together with a ten-year warrant to acquire 198,675 shares of common stock, to the U.S. Department of the Treasury (the "Treasury") under the Capital Purchase Program (the "CPP") for an aggregate purchase price of \$16.0 million. Upon issuance, the fair values of the senior preferred stock and the common stock warrants were computed as if the securities were issued on a stand-alone basis. The value of the senior preferred stock was estimated based on the net present value of the future senior preferred stock cash flows using a discount rate of 12%. The allocated carrying value of the senior preferred stock and common stock warrants on the date of issuance (based on their relative fair values) were \$15.6 million and \$0.4 million, respectively. The preferred stock discount, \$358,000, is being accreted on a 5% level yield basis over 60 months. The senior preferred stock has no par value per share and a liquidation preference of \$1,000 per share, or \$16.0 million in the aggregate. Dividends are payable quarterly at the rate of 5% per annum until the fifth anniversary date of the issuance and at a rate of 9% per annum thereafter. The dividends are computed on the basis of a 360-day year consisting of twelve 30-day months. The dividends are payable quarterly in arrears on February 15, May 15, August 15, and November 15 of each year.

Table of Contents

The senior preferred stock is non-voting, other than class voting rights on any authorization or issuance of shares ranking senior to the senior preferred stock, any amendment to the rights of senior preferred stock, or any merger, exchange, or similar transaction that would adversely affect the rights of the senior preferred stock. If dividends are not paid in full for six dividend periods, whether or not consecutive, the Treasury will have the right to elect two directors to the Company's Board. The right to elect directors would end when full dividends have been paid for four consecutive dividend periods. Effective February 17, 2009, the American Recovery and Reinvestment Act of 2009 (ARRA) eliminated the restrictions on a CPP participant's ability to repay the Treasury's investment until the third anniversary of the date of the Treasury's investment. Prior to ARRA, CPP participants were prohibited from redeeming the Treasury's senior preferred stock except with the proceeds of an offering of qualifying Tier 1 capital. ARRA now allows CPP participants, such as the Company, the option to repay the Treasury's investment under the CPP at any time without regard to whether the Company has raised new capital, subject to consultation with the Federal Reserve and the Federal Deposit Insurance Corporation (the FDIC). If the Company were to repay the Treasury's investment, it would be permitted to redeem the warrant issued to Treasury for fair market value.

The CPP requires that the Company be subject to specified standards for executive compensation and corporate governance as long as any obligation arising from financial assistance provided under the statute remains outstanding. The U.S. Congress and the Treasury may create additional provisions that could become retroactively applicable to the senior preferred stock.

Common Stock: On January 23, 2009, the shareholders of the Company approved a proposal to amend the Company's articles of incorporation to increase the number of authorized shares of common stock from 10,000,000 to 15,000,000.

Common Stock Warrant: In connection with the CPP described above, a warrant exercisable for 198,675 shares of Company common stock was issued to the Treasury. The warrant entitles the Treasury to purchase 198,675 shares of common stock at \$12.08 per share at any time on or before February 6, 2019. As noted above, under ARRA, if the Company repays the Treasury's investment in full, the Company would be permitted to redeem the warrant issued to Treasury at its then current fair market value. If the warrant is not redeemed at such time, however, it will remain outstanding and transferable by the Treasury.

As holder of the common stock warrant, the Treasury is not entitled to vote, to receive dividends, or to exercise any other rights of common shareholders for any purpose until such warrants have been duly exercised. The Treasury has agreed not to exercise voting power with respect to any shares of common stock issued upon exercise. The Company has filed and will maintain at all times during the period the senior preferred stock is outstanding and during the period the warrant is exercisable, a shelf registration statement relating to the issuance of common shares underlying the warrant for the benefit of the warrant holder.

The fair value of the warrants was calculated using the Binomial Option Pricing Model. The inputs to the model are consistent with those utilized by the Company for a 10-year employee stock option.

Number of warrants granted	198,675
Exercise price	\$ 12.08
Grant date fair market value	\$ 7.32
Estimated forfeiture rate	0%
Risk-free interest rate	2.93%
Expected life, in years	10
Expected volatility	40.7%
Expected dividend yield	3.86%
Estimated fair value per warrant	\$ 1.39

Table of Contents

Earnings per Common Share: Basic earnings per common share computations are based on the weighted average number of shares of common stock actually outstanding during the period. The weighted average number of shares outstanding for the three months ended March 31, 2010 and 2009 was 8,607,853 and 8,603,055, respectively. Diluted earnings per share amounts are computed by dividing net income available to common shareholders by the weighted average number of shares outstanding and all dilutive potential shares outstanding during the period. The computation of diluted earnings per share used a weighted average diluted number of shares outstanding of 8,611,511 and 8,603,548 for the three months ended March 31, 2010 and 2009, respectively. The following table presents the computation of earnings per common share for the respective periods:

Earnings per Share Information (dollars in thousands, except per share amounts)	Three Months Ended	
	March 31,	
	2010	2009
Weighted average number of shares outstanding during the period	8,607,853	8,603,055
Weighted average number of shares outstanding during the period including all dilutive potential shares	8,611,511	8,603,548
Net income	\$ 2,004	\$ 1,176
Preferred stock dividend accrued and discount accretion	(217)	(131)
Net income available to common stockholders	\$ 1,787	\$ 1,045
Earnings per share - basic	\$ 0.21	\$ 0.12
Earnings per share - diluted	\$ 0.21	\$ 0.12

Table of Contents

A summary of investment securities held to maturity is as follows:

(in thousands)	Amortized Cost	As of March 31, 2010		Estimated Fair Value
		Gross Unrealized Gains	Gross Unrealized Losses	
Mortgage-backed securities	\$ 70	\$ 5	\$	\$ 75
State and political subdivisions	5,251	108		5,359
Corporate debt securities	865			865
Total	\$ 6,186	\$ 113	\$	\$ 6,299

(in thousands)	Amortized Cost	As of December 31, 2009		Estimated Fair Value
		Gross Unrealized Gains	Gross Unrealized Losses	
Mortgage-backed securities	\$ 71	\$ 5	\$	\$ 76
State and political subdivisions	7,074	104		7,178
Corporate debt securities	864			864
Total	\$ 8,009	\$ 109	\$	\$ 8,118

The summary of available for sale investment securities shows that some of the securities in the available for sale investment portfolio had unrealized losses, or were temporarily impaired, as of March 31, 2010 and December 31, 2009. This temporary impairment represents the estimated amount of loss that would be realized if the securities were sold on the valuation date. Securities which were temporarily impaired are shown below, along with the length of the impairment period.

The following presents information pertaining to securities with gross unrealized losses as of March 31, 2010 and December 31, 2009, aggregated by investment category and length of time that individual securities have been in a continuous loss position:

(in thousands, except number of securities)	Number of Securities	Less than 12 Months		As of March 31, 2010 12 Months or More		Total

The Company's assessment of other-than-temporary impairment (OTTI) is based on its reasonable judgment of the specific facts and circumstances impacting each individual security at the time such assessments are made. The Company reviews and considers factual information, including expected cash flows, the structure of the security, the credit quality of the underlying assets and the current and anticipated market conditions. As of April 1, 2009 the Company adopted the amended provisions of FASB ASC Topic 320. This changed the accounting for other-than-temporary impairments of debt securities and separates the impairment into credit-related and other factors. In accordance with the new guidance, the noncredit-related portion of other than temporary impairment losses recognized in prior year earnings was reclassified as a cumulative effect adjustment that increased retained earnings and

Table of Contents

decreased accumulated other comprehensive income at the beginning of the quarter ended June 30, 2009. In 2008, \$6.2 million in other than temporary impairment charges were recognized, of which \$5.2 million related to noncredit-related impairment on debt securities. Therefore, the cumulative effect adjustment to retained earnings totaled \$5.2 million, or \$3.3 million net of tax.

The receipt of principal, at par, and interest on mortgage-backed securities is guaranteed by the respective government-sponsored agency guarantor, such that the Company believes that its mortgage-backed securities do not expose the Company to credit-related losses. The Company's mortgage-backed securities portfolio consisted of securities predominantly underwritten to the standards of and guaranteed by the government-sponsored agencies of FHLMC, FNMA and GNMA.

The Company believes that the decline in the value of certain municipal obligations was primarily related to an overall widening of market spreads for many types of fixed income products since 2008, reflecting, among other things, reduced liquidity and the downgrades on the underlying credit default insurance providers. At March 31, 2010, approximately 71% of the municipal obligations held by the Company were Iowa based. The Company does not intend to sell these municipal obligations, and it is more likely than not that the Company will not be required to sell them until the recovery of its cost. Due to the issuers' continued satisfaction of their obligations under the securities in accordance with their contractual terms and the expectation that they will continue to do so, management's intent and ability to hold these securities for a period of time sufficient to allow for any anticipated recovery in fair value, as well as the evaluation of the fundamentals of the issuers' financial condition and other objective evidence, the Company believes that the municipal obligations identified in the tables above were temporarily depressed as of March 31, 2010 and December 31, 2009.

At March 31, 2010, the Company owned six collateralized debt obligations backed by pools of trust preferred securities with an original cost basis of \$9.75 million. They are secured by trust preferred securities of banks and insurance companies throughout the United States, and were rated as investment grade securities when purchased between March 2006 and December 2007. However, as the banking climate deteriorated over the past several years, the securities experienced cash flow problems and pre-tax OTTI charges of \$6.2 million during 2008, \$1.6 million during 2009, and \$0.2 million during the first quarter of 2010. The book value of these securities as of this date totaled \$1.8 million. All of the Company's trust preferred collateralized debt obligations are in mezzanine tranches and are currently rated less than investment grade by Moody's Investor Services. The market for these securities is considered to be inactive according to the guidance issued in FASB ASC Topic 820, *Fair Value Measurements and Disclosures*, which the Company adopted as of April 1, 2009. The Company used a discounted cash flow model to determine the estimated fair value of its pooled trust preferred collateralized debt obligations and to assess OTTI. The discounted cash flow analysis was performed in accordance with FASB ASC Topic 325. The assumptions used in preparing the discounted cash flow model include the following: estimated discount rates (using yields of comparable traded instruments adjusted for illiquidity and other risk factors), estimated deferral and default rates on collateral, and estimated cash flows. As part of its analysis of the collateralized debt obligations, the Company subjects the securities to a stress scenario which involves a level of deferrals or defaults in the collateral pool in excess of what the Company believes is likely.

At March 31, 2010, the analysis of five of the Company's six investments in pooled trust preferred securities indicated that the unrealized loss was temporary and that it is more likely than not that the Company would be able to recover the cost basis of these securities. However, the Company determined that a portion of the unrealized loss on the remaining investment in \$1.5 million of pooled trust preferred securities was other-than-temporary. The amount of actual and projected deferrals and/or defaults by the financial institutions underlying these pooled trust preferred securities increased significantly since the beginning of 2010. The increase in nonperforming collateral resulted in an other-than-temporary impairment of this security. The Company follows the provisions of FASB ASC Topic 320 in determining the amount of the OTTI recorded to earnings. The Company performed a discounted cash flow analysis, using the factors noted above, to determine the amount of the OTTI that was applicable to either credit losses or other factors. The amount associated with credit losses, \$189,000, was then realized through an impairment loss charged to earnings for the three months ended March 31, 2010.

The following table provides a roll forward of credit losses on fixed maturity securities recognized in net income:

(in thousands)	Three months ending March 31, 2010
Beginning balance	\$
Additional credit losses:	
Securities with no previous other than temporary impairment	
Securities with previous other than temporary impairments	189
Ending balance	\$ 189

It is reasonably possible that the fair values of the Company's investment securities could decline in the future if the overall economy and the financial condition of some of the issuers continue to deteriorate and the liquidity of these securities remains low. As a result, there is a risk that additional other-than-temporary impairments may occur in the future and any such amounts could be material to the Company's consolidated statements of operations.

Table of Contents

A summary of the contractual maturity distribution of debt investment securities at March 31, 2010 is as follows:

(in thousands)	Available For Sale		Held to Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	\$ 46,558	\$ 47,089	\$ 1,405	\$ 1,414
Due after one year through five years	101,820	105,167	3,550	3,634
Due after five years through ten years	64,324	66,726	296	311
Due after ten years	27,887	27,477	865	865
Mortgage-backed and collateralized mortgage obligations	124,593	127,063	70	75
Total	\$ 365,182	\$ 373,522	\$ 6,186	\$ 6,299

For mortgage-backed securities, actual maturities will differ from contractual maturities because borrowers have the right to prepay obligations with or without prepayment penalties.

Other investment securities include investments in Federal Home Loan Bank (FHLB) stock. The carrying value of the FHLB stock at March 31, 2010 and December 31, 2009 was \$8.9 million and \$9.0 million, respectively. This security is not readily marketable and ownership of FHLB stock is a requirement for membership in the FHLB Des Moines. The amount of FHLB stock the bank is required to hold is directly related to the amount of FHLB advances borrowed. Because there are no available market values, this security is carried at cost. Redemption of this investment is at the option of the FHLB.

Realized gains and losses on sales are determined on the basis of specific identification of investments based on the trade date. Realized gains (losses) on investments, including impairment losses for the three-months ended March 31, 2010 and 2009, are as follows:

(in thousands)	Three Months Ended March 31,	
	2010	2009
Available for sale fixed maturity securities:		
Gross realized gains	\$ 197	\$
Gross realized losses	(189)	
	8	
Equity securities:

Gross realized losses	(9)	
	40	
	\$ 48	\$

7. Fair Value Measurements

Effective January 1, 2008, the Company adopted the provisions of FASB ASC 820, *Fair Value Measurements* for non-financial assets and liabilities. These include foreclosed real estate, long-lived assets and other intangibles, which are recorded at fair value only upon impairment. FASB ASC Topic 820 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements.

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

FASB ASC Topic 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability is not adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

FASB ASC Topic 820 requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions.

Table of Contents

about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, FASB ASC Topic 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at measurement date.

Level 2 Inputs Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements. Recent market conditions have led to diminished, and in some cases, non-existent trading in certain of the financial asset classes. The Company is required to use observable inputs, to the extent available, in the fair value estimation process unless that data results from forced liquidations or distressed sales. Despite the Company's best efforts to maximize the use of relevant observable inputs, the current market environment has diminished the observability of trades and assumptions that have historically been available. A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to all of the Company's financial assets and liabilities carried at fair value effective January 1, 2008.

Valuation methods for instruments measured at fair value on a recurring basis.

Securities Available for Sale The Company's investment securities classified as available for sale include: debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies, debt securities issued by state and political subdivisions, mortgage-backed securities, collateralized mortgage obligations, corporate debt securities, and equity securities. Quoted exchange prices are available for equity securities, which are classified as Level 1. Debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies and mortgage-backed obligations are priced utilizing industry-standard models that consider various assumptions, including time value, yield curves, volatility factors, prepayment speeds, default rates, loss severity, current market and contractual prices for the underlying financial instruments, as well as other relevant economic measures. Substantially all of these assumptions are observable in the marketplace, can be derived from observable data, or are supported by observable levels at which transactions are executed in the marketplace and are classified as Level 2. Municipal securities are valued using a type of matrix, or grid, pricing in which securities are benchmarked against the treasury rate based on credit rating. These model and matrix measurements are classified as Level 2 in the fair value hierarchy.

The Company classifies its pooled trust preferred collateralized debt obligations as Level 3. The portfolio consists of six investments in collateralized debt obligations backed by pools of trust preferred securities issued by financial institutions and insurance companies. The Company has determined that the observable market data associated with these assets do not represent orderly transactions in accordance with FASB ASC Topic 820 and reflect forced liquidations or distressed sales. Based on the lack of observable market data, the Company estimated fair value based on the observable data available and reasonable unobservable market data. The Company estimated fair value based on a discounted cash flow model which used appropriately adjusted discount rates reflecting credit and liquidity risks.

Table of Contents

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of March 31, 2010, segregated by the level of valuation inputs within the fair value hierarchy utilized to measure fair value:

(in thousands)	Fair Value Measurement at March 31, 2010 Using Significant			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Available for sale debt securities:				
U.S. Government agencies and corporations	\$ 71,848	\$	\$ 71,848	\$
State and political subdivisions	159,820		159,820	
Residential mortgage-backed securities	69,477		69,477	
Commercial mortgage-backed securities	57,586		57,586	
Corporate debt securities	14,204		14,204	
Collateralized debt obligations	587			587
Total available for sale debt securities	373,522		372,935	587
Available for sale equity securities:				
Financial services industry	1,652	1,652		
Total available for sale equity securities:	1,652	1,652		
Total securities available for sale	\$ 375,174	\$ 1,652	\$ 372,935	\$ 587

(in thousands)	Fair Value Measurement at December 31, 2009 Using Significant			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Available for sale debt securities:				
U.S. Government agencies and corporations	\$ 81,191	\$	\$ 81,191	\$
State and political subdivisions	155,224		155,224	
Residential mortgage-backed securities	108,576		108,576	
Corporate debt securities	15,305		15,305	
Collateralized debt obligations	857			857
Total available for sale debt securities	361,153		360,296	857
Available for sale equity securities:				
Financial services industry	1,750	1,750		
Total available for sale equity securities:	1,750	1,750		
Total securities available for sale	\$ 362,903	\$ 1,750	\$ 360,296	\$ 857

The following table presents additional information about assets measured at fair market value on a recurring basis for which the Company has utilized Level 3 inputs to determine fair value:

(in thousands)	Collateralized Debt Obligations
Level 3 fair value at December 31, 2009	\$ 857
Transfers into Level 3	
Transfers out of Level 3	
Total gains (losses):	
Included in earnings	(189)
Included in other comprehensive income	(81)
Purchases, issuances, sales, and settlements:	
Purchases	
Issuances	
Sales	
Settlements	
Level 3 fair value at March 31, 2010	\$ 587

Changes in the fair value of available for sale securities are included in other comprehensive income to the extent the changes are not considered other-than-temporary impairments. Other-than-temporary impairment tests are performed on a quarterly basis and any decline in the fair value of an individual security below its cost that is deemed to be other-than-temporary results in a write-down that is reflected directly in the Company's consolidated statements of operations.

Valuation methods for instruments measured at fair value on a nonrecurring basis

Impaired Loans From time to time, a loan is considered impaired and an allowance for credit losses is established. The specific reserves for collateral dependent impaired loans are based on the fair value of the collateral less estimated costs to sell. The fair value

Table of Contents

of collateral was determined based on appraisals. In some cases, adjustments were made to the appraised values due to various factors including age of the appraisal, age of comparables included in the appraisal, and known changes in the market and in the collateral. Because many of these inputs are unobservable the valuations are classified as Level 3.

Loans Held for Sale Loans held for sale are carried at the lower of cost or fair value. The fair value of loans held for sale is based on what secondary markets are currently offering for portfolios with similar characteristics. As such, the Company classifies loans held for sale subjected to nonrecurring fair value adjustments as Level 2.

Federal Home Loan Bank Stock Stock held in the Federal Home Loan Bank of Des Moines (FHLB), which is held for regulatory purposes, is carried in other assets. This investment generally has restrictions on the sale and/or liquidation of stock and the carrying value is approximately equal to fair value. Fair value measurements for this security are classified as Level 3 because of its undeliverable nature and related credit risk.

Other Real Estate Owned (OREO) Other real estate represents property acquired through foreclosures and settlements of loans. Property acquired is carried at the lower of the carrying amount of the loan at the time of acquisition, or the estimated fair value of the property, less disposal costs. The Company considers third party appraisals as well as independent fair value assessments from realtors or persons involved in selling OREO in determining the fair value of particular properties. Accordingly, the valuation of OREO is subject to significant external and internal judgment. The Company also periodically reviews OREO to determine whether the property continues to be carried at the lower of its recorded book value or fair value of the property, less disposal costs. Because many of these inputs are unobservable the valuations are classified as Level 3.

The following table discloses the Company's estimated fair value amounts of its financial instruments recorded at fair value on a nonrecurring basis. It is management's belief that the fair values presented below are reasonable based on the valuation techniques and data available to the Company as of March 31, 2010 and December 31, 2009, as more fully described below. The operations of the Company are managed from a going concern basis and not a liquidation basis. As a result, the ultimate value realized for the financial instruments presented could be substantially different when actually recognized over time through the normal course of operations. Additionally, a substantial portion of the Company's inherent value is the Bank's capitalization and franchise value. Neither of these components has been given consideration in the presentation of fair values below.

Fair Value Measurements at March 31, 2010 Using

(in thousands)	Total	Quoted Prices in		
		Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Table of Contents

The following presents the carrying amount and estimated fair value of the financial instruments held by the Company at March 31, 2010 and December 31, 2009. The information presented is subject to change over time based on a variety of factors.

(in thousands)	March 31, 2010		December 31, 2009	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial assets:				
Cash and cash equivalents	\$ 41,998	\$ 41,998	\$ 27,588	\$ 27,588
Investment securities	381,360	381,473	370,912	371,021
Loans held for sale	759	759	1,208	1,208
Loans, net	940,136	940,602	953,041	953,647
Loan pool participations	81,518	81,518	83,052	83,052
Other real estate owned	2,547	2,547	3,635	3,635
Accrued interest receivable	10,515	10,515	11,534	11,534
Federal Home Loan Bank stock	8,901	8,901	8,973	8,973
Financial liabilities:				
Deposits	1,193,285	1,197,263	1,179,868	1,185,450
Federal funds purchased and securities sold under agreements to repurchase	39,565	39,565	44,973	44,973
Federal Home Loan Bank borrowings	127,700	130,553	130,200	133,098
Long-term debt	15,576	10,046	15,588	10,070
Accrued interest payable	2,071	2,071	2,248	2,248

Cash and due from banks, noninterest-bearing demand deposits, federal funds purchased, securities sold under repurchase agreements, and accrued interest are instruments with carrying values that approximate fair value.

Investment securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If a quoted price is not available, the fair value is obtained from benchmarking the security against similar securities.

Loans held for sale have an estimated fair value based on quoted market prices of similar loans sold on the secondary market.

For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The fair values for other loans are determined using estimated future cash flows, discounted at the interest rates currently being offered for loans with similar terms to borrowers with similar credit quality. The Company does record nonrecurring fair value adjustments to loans to reflect (1) partial write-downs that are based on the observable market price or appraised value of the collateral or (2) the full charge-off of the loan carrying value.

Loan pool participations carrying values represent the discounted price paid by us to acquire our participation interests in the various loan pools purchased, which approximate fair value.

Deposit liabilities are carried at historical cost. The fair value of demand deposits, savings accounts and certain money market account deposits is the amount payable on demand at the reporting date. The fair value of fixed maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities. If the fair value of the fixed maturity certificates of deposit is calculated at less than the carrying amount, the carrying value of these deposits is reported as the fair value.

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

Federal Home Loan Bank borrowings and long-term debt are recorded at historical cost. The fair value of these items are estimated using discounted cash flow analyses, based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

Changes in assumptions or estimation methodologies may have a material effect on these estimated fair values.

8. Allowance for Loan Losses and Nonperforming Assets

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries of loans previously charged-off, if any, are credited to the allowance when realized. The allowance for loan losses is evaluated on a quarterly basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective, as it requires estimates that are susceptible to significant revision as more information becomes available.

Table of Contents

The following is an analysis of activity in the allowance for loan losses for the periods indicated:

(dollars in thousands)	Three months ended

Total nonperforming loans and nonperforming other assets		\$ 18,887		\$ 17,514
Ratios:				
Nonperforming loans to loans, before allowance for loan losses		1.71%		1.44%
Nonperforming loans and nonperforming other assets to loans, before allowance for loan losses		1.98%		1.81%

The allowance for loan losses related to nonperforming loans at March 31, 2010 and December 31, 2009 was \$1,230,000 and \$727,000, respectively. Nonperforming loans of \$3.7 million and \$1.2 million at March 31, 2010 and December 31, 2009, respectively, were not subject to

a related allowance for credit losses because the net realizable value of loan collateral, guarantees and other factors exceed the loan carrying value.

9. Effect of New Financial Accounting Standards

In June 2009, the FASB issued an accounting standard which amended current GAAP related to the accounting for transfers and servicing of financial assets and extinguishments of liabilities, including the removal of the concept of a qualifying special-purpose entity from GAAP. This new accounting standard also clarified that a transferor must evaluate whether it has maintained effective control of a financial asset by considering its continuing direct or indirect involvement with the transferred financial asset. This accounting standard was effective for financial asset transfers occurring after December 31, 2009. The adoption of this accounting standard did not have a material impact on our financial condition, results of operations, or disclosures.

In June 2009, the FASB issued an accounting standard which requires a qualitative rather than a quantitative analysis to determine the primary beneficiary of a variable interest entity (VIE) for consolidation purposes. The primary beneficiary of a VIE is the enterprise that has: (1) the power to direct the activities of the VIE that most significantly impact the VIE 's economic performance, and (2) the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits of the VIE that could potentially be significant to the VIE. The amendments were effective for the Company as of January 1, 2010 and it did not have a material effect on its consolidated financial statements.

Table of Contents

In December 2009, the FASB issued FASB ASU 2009-16, *Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets*. The guidance enhances information reported to users of financial statements by providing greater transparency about transfers of financial assets, including securitization transactions, and where companies have continuing exposure to the risks related to transferred financial assets. This standard is effective for the Company as of January 1, 2010 with adoption applied prospectively for transfers that occur on or after that date. The adoption of this accounting standard did not have a material impact on our financial condition, results of operations, or disclosures.

In January 2010, the FASB issued FASB ASU 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*, which clarifies and expands disclosure requirements related to fair value measurements. Disclosures are required for significant transfers between levels in the fair value hierarchy. Activity in Level 3 fair value measurements is to be presented on a gross, rather than net, basis. The update clarifies how the appropriate level of disaggregation should be determined and emphasizes that information sufficient to permit reconciliation between fair value measurements and line items on the financial statements should be provided. The update is effective for interim and annual reporting periods beginning after December 15, 2009 except for the expanded disclosures related to activity in Level 3 fair value measurements which are effective one year later. The Company adopted ASU 2010-06 for the period beginning January 1, 2010 and it did not have a material effect on its consolidated financial statements.

10. Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates. Significant estimates that are particularly sensitive to change are the allowance for loan losses and the fair value of available for sale securities.

11. Subsequent Events

Management evaluated subsequent events through the date the consolidated financial statements were available to be issued. Events or transactions occurring after March 31, 2010 but prior to the date the consolidated financial statements were available to be issued that provided additional evidence about conditions that existed at March 31, 2010 have been recognized in the consolidated financial statements for the period ended March 31, 2010. Events or transactions that provided evidence about conditions that did not exist at March 31, 2010 but arose before the consolidated financial statements were available to be issued have not been recognized in the consolidated financial statements for the period ended March 31, 2010.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

OVERVIEW

The Company provides financial services to individuals, businesses, governmental units and institutional customers in east central Iowa. The Bank has office locations in Belle Plaine, Burlington, Cedar Falls, Conrad, Coralville, Davenport, Fairfield, Fort Madison, Hudson, Melbourne, North English, North Liberty, Oskaloosa, Ottumwa, Parkersburg, Pella, Sigourney, Waterloo and West Liberty, Iowa. MidWestOne Insurance Services, Inc. provides personal and business insurance services in Pella, Melbourne and Oskaloosa, Iowa. The Bank is actively engaged in many areas of commercial banking, including: acceptance of demand, savings and time deposits; making commercial, real estate, agricultural and consumer loans, and other banking services tailored for its individual customers. The Wealth Management Division of the Bank administers estates, personal trusts, conservatorships, pension and profit-sharing accounts along with providing other management services to customers.

We operate as an independent community bank that offers a broad range of customer-focused financial services as an alternative to large regional and multi-state banks in our market area. Management has invested in the infrastructure and staffing to support our strategy of serving the financial needs of businesses, individuals and municipalities in our market area. We focus our efforts on core deposit generation, especially transaction accounts, and quality loan growth with emphasis on growing commercial loan balances. We seek to maintain a disciplined pricing strategy on deposit generation that will allow us to compete for high quality loans while maintaining an appropriate spread over funding costs.

Our results of operations depend primarily on our net interest income, which is the difference between the interest income on our earning assets, such as loans and securities, and the interest expense paid on our deposits and borrowings. Results of operations are also affected by non-interest income and expense, the provision for loan losses and income tax expense. Results of operations are also significantly affected by general

economic and competitive conditions, as well as changes in market interest rates, government policies and actions of regulatory authorities.

Table of Contents**RESULTS OF OPERATIONS****Comparison of Operating Results for the Three Months Ended March 31, 2010 and March 31, 2009****Summary**

We earned net income of \$2.0 million, of which \$1.8 million was available to common shareholders, for the quarter ended March 31, 2010, compared with \$1.2 million, of which \$1.0 million was available to common shareholders, for the quarter ended March 31, 2009, an increase of 70.4% and 71.0%, respectively. Basic and diluted earnings per common share for the first quarter of 2010 were \$0.21 versus \$0.12 for the first quarter of 2009. Our return on average assets for the first quarter of 2010 was 0.53% compared with a return of 0.32% for the same period in 2009. Our return on average shareholders' equity was 5.28% for the quarter ended March 31, 2010 versus 3.38% for the quarter ended March 31, 2009. The return on average tangible common equity was 5.76% for the first quarter of 2010 compared with 3.58% for the same period in 2009.

The following table presents selected financial results and measures for the first quarter of 2010 and 2009.

(\$ amounts in thousands)	Quarter Ended March 31,	
	2010	2009
Net Income	\$ 2,004	\$ 1,176
Average Assets	1,527,170	1,504,685
Average Shareholders' Equity	153,798	141,152
Return on Average Assets	0.53%	0.32%
Return on Average Shareholders' Equity	5.28%	3.38%
Return on Average Tangible Common Equity	5.76%	3.58%
Total Equity to Assets (end of period)	10.00%	9.53%
Tangible Common Equity to Tangible Assets (end of period)	8.26%	7.73%

We have traditionally disclosed certain non-GAAP ratios to evaluate and measure our financial condition, including our return on average tangible common equity. We believe these ratios provide investors with information regarding our financial condition and how we evaluate our financial condition internally. The following table provides a reconciliation of the non-GAAP measure to the most comparable GAAP equivalent.

(in thousands)	For the Three Months Ended March 31,	
	2010	2009
Tangible Common Equity:		
Average total shareholders' equity	\$ 153,798	\$ 141,152
Less: Average preferred stock	(15,708)	(9,601)
Average goodwill and intangibles	(12,371)	(13,244)
<i>Average tangible common equity</i>	125,719	118,307
<i>Net income available to common shareholders</i>	1,787	1,045
Return on average tangible common equity	5.76%	3.58%

Net Interest Income

Net interest income is the difference between interest income and fees earned on earning assets and interest expense incurred on interest-bearing liabilities. Interest rate levels and volume fluctuations within earning assets and interest-bearing liabilities impact net interest income.

Certain assets with tax favorable treatment are evaluated on a tax-equivalent basis. Tax-equivalent basis assumes a federal income tax rate of 34%. Tax favorable assets generally have lower contractual pre-tax yields than fully taxable assets. A tax-equivalent analysis is performed by

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

adding the tax savings to the earnings on tax favorable assets. After factoring in the tax favorable effects of these assets, the yields may be more appropriately evaluated against alternative earning assets. In addition to yield, various other risks are factored into the evaluation process.

Our net interest income for the quarter ended March 31, 2010 declined \$0.2 million to \$11.8 million compared to \$12.0 million for the quarter ended March 31, 2009. Our total interest income of \$17.8 million was \$1.1 million lower in the first quarter of 2010 compared with the same period in 2009. Most of the decrease in interest income was due to reduced interest on loans and loan pool participations. The decrease in interest income was largely offset by reduced interest expense on deposits. Total interest expense for the first quarter of 2010

Table of Contents

decreased \$0.9 million, or 12.5%, compared with the same period in 2009 due primarily to lower interest rates in 2010. Our net interest margin on a tax-equivalent basis for the first quarter of 2010 decreased to 3.50% compared with 3.60% in the first quarter of 2009. Net interest margin is a measure of the net return on interest-earning assets and is computed by dividing annualized net interest income on a tax-equivalent basis by the average of total interest-earning assets for the period. Our overall yield on earning assets declined to 5.22% for the first quarter of 2010 from 5.58% for the first quarter of 2009. The average cost of interest-bearing liabilities decreased in the first quarter of 2010 to 2.01% from 2.29% for the first quarter of 2009.

The following table shows the consolidated average balance sheets, detailing the major categories of assets and liabilities, the interest income earned on interest-earning assets, the interest expense paid for the interest-bearing liabilities, and the related interest rates for the quarters ended March 31, 2010 and 2009. Dividing annualized income or expense by the average balances of assets or liabilities results in average yields or costs. Average information is provided on a daily average basis.

- (1) Loan fees included in interest income are not material.
- (2) Computed on a tax-equivalent basis, assuming a federal income tax rate of 34%.
- (3) Non-accrual loans have been included in average loans, net of unearned discount.
- (4) Includes interest income and discount realized on loan pool participations.
- (5) Net interest margin is tax-equivalent net interest income as a percentage of average earning assets.

Table of Contents

The following table sets forth an analysis of volume and rate changes in interest income and interest expense on our average earning assets and average interest-bearing liabilities reported on a fully tax-equivalent basis assuming a 34% tax rate. The table distinguishes between the changes related to average outstanding balances (changes in volume holding the initial interest rate constant) and the changes related to average interest rates (changes in average rate holding the initial outstanding balance constant). The change in interest due to both volume and rate has been allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.

(in thousands)	Three Months Ended March 31, 2010 Compared to 2009 Change due to		
	Volume	Rate/Yield	Net

Interest income and fees on loans on a tax-equivalent basis decreased \$1.2 million, or 8.1%, in the first quarter of 2010 compared to the same period in 2009. Average loans were \$55.1 million, or 5.4%, lower in the first quarter of 2010 compared with 2009. The decrease in average loan volume was attributable to the volume of refinancing activity, which resulted in a large amount of adjustable rate residential real estate loans that were held in our portfolio being refinanced into fixed-rate loans that are sold in the secondary market rather than held in our portfolio. The yield on our loan portfolio is affected by the amount of nonaccrual loans (which do not earn interest income), the mix of the portfolio (real estate loans generally have a lower overall yield than commercial and agricultural loans), the effects of competition and the interest rate environment on the amounts and volumes of new loan originations, and the mix of variable rate versus fixed rate loans in our portfolio. The average rate on loans decreased slightly from 6.00% in the first quarter of 2009 to 5.83% in first quarter of 2010.

Interest and discount income on loan pool participations was \$0.9 million for the first quarter of 2010 compared with \$1.0 million for the first quarter of 2009, a decrease of \$0.1 million. Former MidWestOne had engaged in this business since 1988 and we continued the business following the merger. These loan pool participations are pools of performing, sub-performing and nonperforming loans purchased at varying discounts from the aggregate outstanding principal amount of the underlying loans. The loan pools are held and serviced by a third-party independent servicing corporation. We invest in the pools that are purchased by the servicer from nonaffiliated banking organizations and from

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

the FDIC acting as receiver of failed banks and savings associations. We have very minimal exposure in the loan pools to consumer real estate, subprime credit or construction and real estate development loans. Currently, we hold \$83.7 million in loan pool participations.

Income is derived from this investment in the form of interest collected and the repayment of principal in excess of the purchase cost, which is referred to as discount recovery. The loan pool participations were historically a high-yield activity, but this yield has fluctuated from period to period based on the amount of cash collections, discount recovery, and net collection expenses of the servicer in any given period. The net all-in yield on loan pool participations was 4.98% for the first quarter of 2010, down from 5.48% for the same period of 2009. The net yield was lower in the first quarter of 2010 than for the first quarter of 2009 primarily due to elevated charge-off levels in the portfolio as well as slowed collections, as borrowers saw their ability to refinance debt decline due to the continued tightness in the credit markets.

The income and yield on loan pool participations may vary in future periods due to the volume and accretable yield on loan pools purchased.

Interest income on investment securities on a tax-equivalent basis totaled \$3.7 million in the first quarter of 2010 compared with \$3.5 million for the first quarter of 2009, an increase of \$280,000, or 8.1%, mainly due to a higher investment balance, and despite a lower yield on investments in 2010. The average balance of investments in the first quarter of 2010 was \$378.6 million compared with \$291.0 million in the first quarter of 2009. The tax-equivalent yield on our investment portfolio in the first quarter of 2010 decreased to 4.01% from 4.83% in the comparable period of 2009 reflecting reinvestment of maturing securities and purchases of new securities at lower market interest rates.

Interest expense on deposits was \$1.1 million, or 18.8%, lower in the first quarter of 2010 compared with the same period in 2009 mainly due to the decrease in interest rates during 2009. The weighted average rate paid on interest-bearing deposits was 1.80% in the first quarter of 2010 compared with 2.31% in the first quarter of 2009. This decline reflects the overall reduction in market interest rates on deposits throughout the markets in which we operate. Average interest-bearing deposits for the first quarter of 2010 were \$40.2 million, or 4.0%, greater compared with the same period in 2009.

Table of Contents

Interest expense on borrowed funds was \$206,000 higher in the first quarter of 2010 compared with the same period in 2009. Interest on borrowed funds totaled \$1.4 million for the first quarter of 2010. Average borrowed funds for the first quarter of 2010 were \$41.1 million lower compared to the same period in 2009. The majority of the difference was due to a reduction in the level of federal funds purchased, repurchase agreements, and FHLB borrowings. Elimination of the purchase accounting benefit on FHLB borrowings related to the March 2008 merger in the first quarter of 2009 led to the weighted average rate on borrowed funds increasing to 3.15% for the first quarter of 2010 compared with 2.21% for the first quarter of 2009.

Provision for Loan Losses

The provision for loan losses is a current charge against income and represents an amount which management believes is sufficient to maintain an adequate allowance for known and probable losses. In assessing the adequacy of the allowance for loan losses, management considers the size and quality of the loan portfolio measured against prevailing economic conditions, regulatory guidelines, historical loan loss experience and credit quality of the portfolio. When a determination is made by management to charge off a loan balance, such write-off is charged against the allowance for loan losses.

We recorded a provision for loan losses of \$1.5 million in the first quarter of 2010 compared with a \$2.4 million provision in the first quarter of 2009. Net loans charged off in the first quarter of 2010 totaled \$0.9 million compared with net loans charged off of \$0.4 million in the first quarter of 2009. The decrease in the provision in the first quarter of 2010 compared with the same period in 2009 reflects our belief that existing identified potential problem credits have been adequately reserved for. We continue to increase our loan loss allowance by maintaining a provision for loan losses that is greater than our net charge-off activity. We determine an appropriate provision based on our evaluation of the adequacy of the allowance for loan losses in relationship to a continuing review of problem loans, current economic conditions, actual loss experience and industry trends. We believe that the allowance for loan losses was adequate based on the inherent risk in the portfolio as of March 31, 2010; however, there is no assurance losses will not exceed the allowance and any growth in the loan portfolio, and the uncertainty of the general economy may require that management continue to evaluate the adequacy of the allowance for loan losses and make additional provisions in future periods as deemed necessary.

Sensitive assets include nonaccrual loans, loans on the Bank's watch loan reports and other loans identified as having more than reasonable potential for loss. We review sensitive assets on at least a quarterly basis for changes in the customer's ability to pay and changes in valuation of underlying collateral in order to estimate probable losses. We also periodically review a watch loan list which is comprised of loans that have been restructured or involve customers in industries which have been adversely affected by market conditions. The majority of these loans are being repaid in conformance with their contracts.

Noninterest Income

(dollars in thousands)	Three months ended March 31,		
	2010	2009	% Change
Trust and investment fees	\$ 1,234	\$ 1,107	11.5%
Service charges and fees on deposit accounts	864	911	(5.2)
Mortgage origination and loan servicing fees	500	771	(35.1)
Other service charges, commissions and fees	584	525	11.2
Bank owned life insurance income	167	224	(25.4)
Impairment losses on investment securities, net	(189)		NM
Gain on sale of available for sale securities	237		NM
Loss on sale of premises and equipment	(77)		NM
Total noninterest income	\$ 3,320	\$ 3,538	(6.2)%

NM - Percentage change not considered meaningful.

Total noninterest income decreased \$0.2 million for the first quarter of 2010 compared to the same period for 2009. The decrease in 2010 is largely due to the \$0.3 million decline in mortgage origination and servicing fees between the two comparative periods. Other than temporary impairment charges on investment securities of \$0.2 million was more than offset by gains of the sale of available for sale investment securities. The impairment charge recognized in 2010 resulted from our investment in collateralized debt obligations backed by groups of trust preferred

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

securities issued by multiple banks and insurance companies.

Mortgage origination and loan servicing fees were \$0.5 million in the quarter ended March 31, 2010, a decline of \$0.3 million from \$0.8 million at March 31, 2009. The decrease in mortgage origination fees was attributable to lower refinancing volume of single family residential loans, as the bulk of creditworthy borrowers had already taken advantage of the historically low interest rates before the start of 2010. Trust and investment fees increased \$0.1 million, or 11.5%, to \$1.2 million for the three months ended March 31, 2010, compared to \$1.1 million for the same period of 2009. The sale of an unused bank office building in Oskaloosa during the first quarter of 2010 resulted in

Table of Contents

a net loss of \$77,000. Management's strategic goal is for noninterest income to constitute 30% of total revenues (net interest income plus noninterest expense) over time. As of March 31, 2010 noninterest income comprised 22.0% of total revenues, compared to 22.8% as of March 31, 2009.

Noninterest Expense

(dollars in thousands)	Three months ended March 31,		
	2010	2009	% Change
Salaries and employee benefits	\$ 5,790	\$ 5,753	0.6%
Net occupancy and equipment expense	1,776	1,707	4.0
Professional fees	749	1,082	(30.8)
Data processing expense	457	516	(11.4)
FDIC insurance expense	692	898	(22.9)
Other operating expense	1,584	1,967	(19.5)
Total noninterest expense	\$ 9,464	\$ 9,956	(4.9)%

NM - Percentage change not considered meaningful.

Noninterest expense for the first quarter of 2010 was \$11.0 million compared with \$11.9 million for the first quarter of 2009, a decrease of \$0.9 million, or 7.3%. Noninterest expense includes salaries and employee benefits, occupancy and equipment expense, FDIC insurance premiums, professional fees and data processing expense. The primary reason for the decrease in noninterest expense was the drop in all categories of noninterest expense, with the exception of small increases in salaries and employee benefits and net occupancy, for the three months ended March 31, 2010, compared to the same period in 2009. Professional fees decreased by \$0.3 million from \$1.1 million to \$0.8 million for the quarter ended March 31, 2009 and 2010, respectively, due to lower costs associated with Sarbanes Oxley compliance efforts. FDIC insurance also saw a moderate decline of \$0.2 million to \$0.7 million from \$0.9 million for the first quarter of 2010 compared to the same period in 2009. Salaries and employee benefits and net occupancy and equipment expenses both saw small increases between the comparative periods.

We are currently evaluating the potential for restructuring our branch footprint in 2010 and decreasing associated expenses to further reduce operating costs.

Income Tax Expense

Our effective tax rate, or income taxes divided by income before taxes, was 21.1% for the first quarter of 2010, and 3.5% for the same period of 2009. The increase in the effective rate in 2010 was primarily due to the relative amount of tax-exempt income on tax-exempt bonds to total net income. Income tax expense increased \$492,000 to \$535,000 in the first quarter of 2010 compared to \$43,000 for the same period of 2009.

FDIC Assessments

On November 12, 2009, the FDIC adopted a final rule that required insured depository institutions to prepay on December 30, 2009, their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011, and 2012. On December 31, 2009, the Bank paid the FDIC \$9.2 million in prepaid assessments. The FDIC determined each institution's prepaid assessment based on the institution's: (i) actual September 30, 2009 assessment base, increased quarterly by a five percent annual growth rate through the fourth quarter of 2012; and (ii) total base assessment rate in effect on September 30, 2009, increased by an annualized three basis points beginning in 2011. The FDIC began to offset prepaid assessments on March 31, 2010, representing payment of the regular quarterly risk-based deposit insurance assessment for the fourth quarter of 2009. Any prepaid assessment not exhausted after collection of the amount due on June 30, 2013, will be returned to the institution.

FINANCIAL CONDITION

Our total assets increased slightly to \$1.54 billion as of March 31, 2010 from \$1.53 billion on December 31, 2009. This growth resulted primarily from increased interest-bearing deposits in banks and investment in securities, somewhat offset by a decrease in loans due to refinancing activity of portfolio loans, mostly consisting of single family residential loans that are then sold on the secondary market. The asset

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

growth was funded by an increase in deposits. Total deposits at March 31, 2010 were \$1.19 billion compared with \$1.18 billion at December 31, 2009, up \$13.4 million, or 1.1%, primarily due to increased consumer and public fund deposits.

Investment Securities

Investment securities available for sale totaled \$375.2 million as of March 31, 2010. This was an increase of \$12.3 million, or 3.4%, from December 31, 2009. The increase was primarily due to net purchases of \$12.0 million during the period. Investment securities classified as held to maturity decreased to \$6.2 million as of March 31, 2010 as a result of security maturities. The investment portfolio consists mainly of U.S. government agency securities, mortgage-backed securities and obligations of states and political subdivisions.

Table of Contents

As of March 31, 2010, we owned \$1.8 million of collateralized debt obligations that were backed by pools of trust preferred securities issued by various commercial banks (approximately 80%) and insurance companies (approximately 20%). No real estate holdings secure these debt securities. We continue to monitor the values of these debt securities for purposes of determining other-than-temporary impairment in future periods given the instability in the financial markets and continue to obtain updated cash flow analysis as required.

Loans

The following table shows the composition of the bank loans (before deducting the allowance for loan losses), as of the periods shown:

(in thousands)	March 31, 2010		December 31, 2009	
	Balance	% of Total	Balance	% of Total
Agricultural	\$ 89,825	9.4%	\$ 92,727	9.6%
Commercial and financial	201,637	21.1	203,539	21.0
Real estate:				
Construction, one- to four- family residential	21,063	2.2	20,785	2.1
Construction, land development and commercial	56,389	5.9	58,652	6.1
Mortgage, farmland	87,947	9.2	88,747	9.2
Mortgage, one- to four- family first liens	157,005	16.4	161,065	16.7
Mortgage, one- to four- family junior liens	71,733	7.5	73,665	7.6
Mortgage, multifamily	31,745	3.3	32,455	3.4
Mortgage, commercial	198,667	20.8	196,025	20.3
Loans to individuals	23,074	2.4	23,262	2.4
Obligations of state and political subdivisions	15,604	1.6	16,076	1.7
Total loans	\$ 954,689	100.0%	\$ 966,998	100.0%

Total bank loans (excluding loan pool participations and loans held for sale) decreased by \$12.3 million, to \$954.7 million as of March 31, 2010 as compared to December 31, 2009. We experienced a \$4.8 million, or 1.6%, decrease in the commercial, financial and agricultural sectors, along with a \$4.9 million, or 0.9%, decrease in real estate mortgage loans, which resulted primarily from the continued refinancing activity seen due to historically low interest rates, which resulted in adjustable rate residential real estate loans that were held in our portfolio being refinanced into fixed-rate loans that are sold in the secondary market rather than held in our portfolio. Additionally, construction real estate decreased \$2.0 million, or 2.5%; loans to individuals decreased \$0.2 million, or 0.8%, and; and obligations of state and political subdivisions declined \$0.5 million, or 2.9%. As of March 31, 2010, our bank loan (excluding loan pool participations) to deposit ratio was 80.0% compared with a year-end 2009 bank loan to deposit ratio of 82.0%. We anticipate that the loan to deposit ratio will continue to decline in future periods, as loans continue to pay down and deposits remain steady or increase. As of March 31, 2010, our largest category of bank loans was commercial real estate, comprising 42% of the portfolio, of which 9% was farmland, 8% construction, and 3% multifamily. Residential real estate loans was the next largest category at 24%, commercial loans 23%, agricultural loans 9%, and consumer loans 2%. All of these percentages relate to our direct loans and do not include loan pool participations.

We have minimal direct exposure to subprime mortgages in our loan portfolio. Our loan policy provides a guideline that real estate mortgage borrowers have a Beacon score of 640 or greater. Exceptions to this guideline have been noted but the overall exposure is deemed minimal by management. Mortgages we originate and sell on the secondary market are typically underwritten according to the guidelines of secondary market investors. These mortgages are sold on a non-recourse basis.

Loan Pool Participations

As of March 31, 2010, we had loan pool participations, net, totaling \$81.5 million, down from \$83.1 million at December 31, 2009. Loan pools are participation interests in performing, sub-performing and nonperforming loans that have been purchased from various non-affiliated banking organizations. Former MidWestOne had engaged in this activity since 1988, and we continued this line of business following the merger. We have identified a maximum for loan pool participation balances of not more than \$110.0 million. The most recently purchased pools have performed well and we believe the business still has merit over the long term. The loan pool investment balances shown as an asset on our Consolidated Balance Sheets represent the discounted purchase cost of the loan pool participations. We acquired no new loan pool participations during the first quarter of 2010. As of March 31, 2010, the categories of loans by collateral type in the loan pools were commercial real estate - 54%, commercial loans - 11%, agricultural and agricultural real estate - 10%, single-family residential real estate - 11% and other loans - 14%.

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

We have minimal exposure in the loan pools to consumer real estate subprime credit or to construction and real estate development loans.

Our overall cost basis in the loan pool participations represents a discount from the aggregate outstanding principal amount of the loans underlying the pools. For example, as of March 31, 2010, such cost basis was \$83.2 million, while the contractual outstanding principal amount of the underlying loans as of such date was approximately \$177.3 million. The discounted cost basis inherently reflects the assessed collectability of the underlying loans. We do not include any amounts related to the loan pool participations in our totals of nonperforming loans.

The loans in the pools provide some geographic diversification to our balance sheet. As of March 31, 2010, loans in the southeast region of the United States represented approximately 40% of the total. The northeast was the next largest area with 32%, the central region with 19%, the southwest region with 8% and northwest represented a minimal amount of the portfolio at 1%. The highest concentration of assets is in Florida at approximately 18% of the basis total, with the next highest state level being Ohio at 11%, then Pennsylvania at

Table of Contents

approximately 7%, followed by Colorado and New Jersey both at 6%. As of March 31, 2010, approximately 56% of the loans were contractually current or less than 90 days past-due, while 44% were contractually past-due 90 days or more. It should be noted that many of the loans were acquired in a contractually past due status, which is reflected in the discounted purchase price of the loans. Performance status is monitored on a monthly basis. The 44% contractually past-due includes loans in litigation and foreclosed property. As of March 31, 2010, loans in litigation totaled approximately \$17.6 million, while foreclosed property was approximately \$11.4 million. As of March 31, 2010, our investment basis in our loan pool participations was approximately 46.9% of the face amount of the underlying loans.

Other Intangible Assets

Other intangible assets decreased to \$11.9 million as of March 31, 2010 from \$12.2 million as of December 31, 2009 as a result of normal amortization. Amortization of intangible assets is recorded using an accelerated method based on the estimated life of the intangible. The following table summarizes the amounts and carrying values of intangible assets as of March 31, 2010.

(in thousands)	Gross Carrying Amount	Accumulated Amortization	Unamortized Intangible Assets
March 31, 2010			
Other intangible assets:			
Insurance agency intangible	1,320	292	1,028
Core deposit premium	5,433	1,858	3,575
Trade name intangible	7,040		7,040
Customer list intangible	330	57	273
Total	\$ 14,123	\$ 2,207	\$ 11,916

Deposits

Total deposits as of March 31, 2010 were \$1.19 billion compared with \$1.18 billion as of December 31, 2009, an increase of \$13.4 million. Certificates of deposit were the largest category of deposits at March 31, 2010, representing approximately 48.1% of total deposits. Total certificates of deposit were \$573.9 million at March 31, 2010, down \$7.7 million, or 1.3%, from \$581.6 million at December 31, 2009. Included in total certificates of deposit at March 31, 2010 was \$23.9 million of brokered deposits in the Certificate of Deposit Account Registry Service (CDARS) program, a decrease of \$0.5 million, or 2.0%, from the \$24.4 million at December 31, 2009. Based on historical experience, management anticipates that many of the maturing certificates of deposit will be renewed upon maturity. Maintaining competitive market interest rates will facilitate our retention of certificates of deposit. Interest-bearing checking deposits were \$423.7 million at March 31, 2010, an increase of \$22.4 million, or 5.6%, from \$401.3 million at December 31, 2009. The increased balances were primarily in our Power Checking account product. Approximately 84.6% of our total deposits are considered core deposits.

Federal Home Loan Bank Borrowings

FHLB borrowings totaled \$127.7 million as of March 31, 2010 compared with \$130.2 million as of December 31, 2009. We utilize FHLB borrowings as a supplement to customer deposits to fund earning assets and to assist in managing interest rate risk.

Long-term Debt

Long-term debt in the form of junior subordinated debentures that have been issued to a statutory trust that issued trust preferred securities was \$15.6 million as of March 31, 2010, unchanged from December 31, 2009. These junior subordinated debentures were assumed by us from Former MidWestOne in the merger. Former MidWestOne had issued these junior subordinated debentures on September 20, 2007, to MidWestOne Capital Trust II. The junior subordinated debentures mature on December 15, 2037, do not require any principal amortization and are callable at par at our option on the fifth anniversary of the date of issuance. The interest rate is fixed at 6.48% for five years on \$7.7 million of the issuance and is variable quarterly at the three month LIBOR plus 1.59% on the remainder.

Nonperforming Assets

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

Our nonperforming assets totaled \$18.9 million as of March 31, 2010, up \$1.4 million compared to December 31, 2009. This increase was due to an increase in nonperforming loans of \$2.5 million coupled with a decrease in other real estate owned of \$1.1 million. The balance of other real estate owned at March 31, 2010 was \$2.5 million compared to \$3.6 million at year-end 2009. Nonperforming loans totaled \$16.3 million (1.71% of total bank loans) as of March 31, 2010, compared to \$13.9 million (1.44% of total bank loans) as of December 31, 2009. See Note 8 Allowance for Loan Losses and Nonperforming Assets for additional information related to nonperforming assets.

The nonperforming loans consisted of \$10.8 million in nonaccrual loans, \$3.6 million in troubled debt restructures and \$2.0 million in loans past due 90 days or more and still accruing. This compares with \$9.9 million, \$2.6 million and \$1.4 million, respectively, as of December 31, 2009. The Company experienced a \$1.0 million increase in restructured loans, which grew from \$2.6 million at December 31, 2009 to \$3.6 million at March 31, 2010. This increase stems from the restructuring of one consumer loan, three residential real estate loans totaling \$0.4 million and two commercial real estate loans totaling \$0.5 million. During the same period, loans and leases past due 90 days or more and still accruing interest increased by \$0.6 million from \$1.4 million at December 31, 2009 to \$2.0 million at March 31, 2010.

Table of Contents

Additionally, loans past-due 30 to 89 days (not included in the nonperforming loan totals) were \$11.1 million as of March 31, 2010 compared with \$10.1 million as of December 31, 2009. Other real estate owned totaled \$2.5 million as of March 31, 2010 and \$3.6 million at December 31, 2009.

All of the other real estate property was acquired through foreclosures and we are actively working to sell all properties held as of March 31, 2010. Other real estate is carried at appraised value less estimated cost of disposal at date of acquisition. Additional discounts could be required to market and sell the properties, resulting in a write down through expense.

Allowance for Loan Losses

Our allowance for loan losses as of March 31, 2010 was \$14.6 million, which was 1.52% of total bank loans (excluding loan pools) as of that date. This compares with an allowance for loan losses of \$14.0 million as of December 31, 2009, which was 1.44% of total bank loans. Gross charge-offs for the first quarter of 2010 totaled \$1.1 million, while recoveries of previously charged-off loans totaled \$0.2 million. Annualized net loan charge offs to average bank loans as of March 31, 2010 was 0.38% compared to 0.48% for the year ended December 31, 2009. As of March 31, 2010, the allowance for loan losses was 89.1% of nonperforming bank loans compared with 100.6% as of December 31, 2009. While nonperforming loan levels increased during the first quarter, the increase has been primarily in credits that our management had already identified as weak and for which we believe adequate provisions already had been made. Based on the inherent risk in the loan portfolio, we believe that as of March 31, 2010, the allowance for loan losses was adequate; however, there is no assurance losses will not exceed the allowance and any growth in the loan portfolio and the uncertainty of the general economy may require that management continue to evaluate the adequacy of the allowance for loan losses and make additional provisions in future periods as deemed necessary. See Note 8 Allowance for Loan Losses and Nonperforming Assets for additional information related to the allowance for loan losses.

During the first quarter of 2010, we updated the Allowance for Loan Losses (ALLL) calculation to reflect current historical net charge-offs. We use a five year average percentage in the historical charge-off portion of the ALLL calculation. The historical charge-off portion is one of six factors used in establishing our pass percentage factor for each loan type. There were no changes to the other five factors during the first quarter of 2010. Classified loans are reviewed per the requirements of FASB ASC Topics 310 and 450. All classified loans are reviewed for impairment per FASB ASC Topic 310.

We currently track the loan to value (LTV) ratio of loans in our portfolio, and those loans in excess of internal and supervisory guidelines are presented to the Bank's Board of Directors on a quarterly basis. At March 31, 2010, there were six owner occupied 1-4 family loans with a LTV of 100% or greater. In addition, there are 44 home equity lines of credit without credit enhancement that have LTV of 100% or greater. We have the first lien on three of these equity lines and other financial institutions have the first lien on the remaining 41.

We monitor and report our troubled debt restructuring on a quarterly basis. At March 31, 2010, reported troubled debt restructurings were not a material portion of the loan portfolio. We review loans 90+ days past due that are still accruing interest no less than quarterly to determine if there is a strong reason that the credit should not be placed on non-accrual. All commercial and agricultural lenders are required to review their portfolios on a monthly basis and document that either no downgrades are necessary or report credits that they feel warrant a downgrade to loan review for inclusion in the allowance for loan loss calculation.

Capital Resources

Total shareholders' equity was 10.00% of total assets as of March 31, 2010 and was 9.92% as of December 31, 2009. Tangible common equity to tangible assets was 8.26% as of March 31, 2010 and 8.16% as of December 31, 2009. Our Tier 1 capital to risk-weighted assets ratio was 13.06% as of March 31, 2010 and was 12.66% as of December 31, 2009. Risk-based capital guidelines require the classification of assets and some off-balance-sheet items in terms of credit-risk exposure and the measuring of capital as a percentage of the risk-adjusted asset totals. We believe that, as of March 31, 2010, the Company and the Bank met all capital adequacy requirements to which we are subject. As of that date, the Bank was well capitalized under regulatory prompt corrective action provisions.

Table of Contents

We have traditionally disclosed certain non-GAAP ratios to evaluate and measure our financial condition, including our tangible common equity to tangible assets and Tier 1 capital to risk-weighted assets ratios. We believe these ratios provide investors with information regarding our financial condition and how we evaluate our financial condition internally. The following table provides a reconciliation of the non-GAAP measure to the most comparable GAAP equivalent.

<i>(in thousands)</i>	At March 31, 2010	At December 31, 2009
Tangible Common Equity:		
Total shareholders' equity	\$ 154,158	\$ 152,208
Less: Preferred stock	(15,716)	(15,699)
Goodwill and intangibles	(12,016)	(12,272)

Total shareholders' equity	\$ 154,158	\$ 152,208
Plus: Long term debt (qualifying restricted core capital)	15,464	15,464
Less: Net unrealized gains on securities available for sale	(2,016)	(1,505)
Disallowed goodwill and intangibles	(11,789)	(12,286)
<i>Tier 1 capital</i>	155,817	153,881
<i>Risk-weighted assets</i>	1,193,520	1,215,240
Tier 1 capital to risk-weighted assets	13.06%	12.66%

The preferred stock has no par value per share and a liquidation preference of \$1,000 per share, or \$16.0 million in the aggregate. The senior preferred stock is non-voting, other than class voting rights on any authorization or issuance of shares ranking senior to the senior preferred stock, any amendment to the rights of senior preferred stock, or any merger, exchange, or similar transaction that would adversely affect the rights of the senior preferred stock. If dividends are not paid in full for six dividend periods, whether or not consecutive, the U.S. Treasury will have the right to elect two directors to the Company's Board. The right to elect directors would end when full dividends have been paid for four consecutive dividend periods. In addition, on February 6, 2009, we issued to the U.S. Treasury a warrant to purchase 198,675 shares of our common stock at a strike price of \$12.08 per share at any time on or before February 6, 2019. If we repay the U.S. Treasury's investment in full, we would be permitted to redeem the warrant issued to the U.S. Treasury at its then current fair market value. If the warrant is not redeemed at such time, however, it will remain outstanding and transferable by the U.S. Treasury. All of the capital from Treasury was treated as Tier 1 capital for regulatory purposes.

On January 21, 2010, 33,000 restricted stock units were granted to certain directors and officers. During the first quarter of 2010, 2,546 shares were issued in connection with the vesting of previously awarded grants of restricted stock units, of which 20 shares were surrendered by a

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

grantee to satisfy tax requirements. In addition, 1,945 shares were issued in connection with the exercise of previously issued stock options.

On February 11, 2010, we filed a universal shelf-registration statement registering for future sale up to \$25.0 million of securities from time to time in one or more offerings. Given the growth opportunities and the difficult credit market, we believe that it is prudent to have all options available to raise additional capital. On April 22, 2010, the Company's Board of Directors declared a quarterly dividend for the second quarter of 2010 of \$0.05 per common share, which is consistent with the dividend per common share paid in the first quarter of 2010.

Table of Contents**Capital levels and minimum required levels:**

Liquidity

Liquidity management involves meeting the cash flow requirements of depositors and borrowers. We conduct liquidity management on both a daily and long-term basis; and adjust our investments in liquid assets based on expected loan demand, projected loan maturities and payments, estimated cash flows from the loan pool participations, expected deposit flows, yields available on interest-bearing deposits, and the objectives of its asset/liability management program. We had liquid assets (cash and cash equivalents) of \$42.0 million as of March 31, 2010, compared with \$27.6 million as of December 31, 2009. Investment securities classified as available for sale, totaling \$375.2 million and \$362.9 million as of March 31, 2010 and December 31, 2009, respectively, could be sold to meet liquidity needs if necessary. Additionally, our bank subsidiary maintains unsecured lines of credit with several correspondent banks and secured lines with the Federal Reserve Bank discount window and the Federal Home Loan Bank of Des Moines that would allow it to borrow federal funds on a short-term basis, if necessary. Management believes that the Company had sufficient liquidity as of March 31, 2010 to meet the needs of borrowers and depositors.

Our principal sources of funds were deposits, FHLB borrowings, principal repayments on loans, proceeds from the sale of loans, proceeds from the maturity and sale of investment securities, and funds provided by operations. While scheduled loan amortization and maturing interest-bearing deposits are relatively predictable sources of funds, deposit flows and loan prepayments are greatly influenced by economic conditions, the general level of interest rates, and competition. We utilized particular sources of funds based on comparative costs and availability. This included fixed-rate FHLB borrowings that were obtained at a more favorable cost than deposits. We generally managed the pricing of our deposits to maintain a steady deposit base but had from time to time decided not to pay rates on deposits as high as its competition.

As of March 31, 2010, we had \$15.6 million of long-term debt outstanding. This amount represents indebtedness payable under junior subordinated debentures issued to a subsidiary trust that issued trust preferred securities in a pooled offering. The junior subordinated debentures have a 35-year term. One-half of the balance has a fixed interest rate of 6.48 percent until December 15, 2012; the other one-half has a variable rate of three-month LIBOR plus 1.59 percent.

Critical Accounting Policies

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

We have identified the following critical accounting policies and practices relative to the reporting of our results of operation and financial condition. These accounting policies relate to the allowance for loan losses, participation interests in loan pools, application of purchase accounting, goodwill and intangible assets, and fair value of available for sale investment securities.

Allowance for Loan Losses

The allowance for loan losses is based on our estimate. We believe the allowance for loan losses is adequate to absorb probable losses in the existing portfolio. In evaluating the portfolio, we take into consideration numerous factors, including current economic conditions, prior loan loss experience, the composition of the loan portfolio, and management's estimate of probable credit losses. The allowance for loan losses is established through a provision for loss based on our evaluation of the risk inherent in the loan portfolio, the composition of the portfolio, specific impaired loans, and current economic conditions. Such evaluation, which includes a review of all loans on which full collectability may not be reasonably assured, considers, among other matters, the estimated net realizable value or the fair value of the

Table of Contents

underlying collateral, economic conditions, historical loss experience, and other factors that warrant recognition in providing for an adequate allowance for loan losses. In the event that our evaluation of the level of the allowance for loan losses is inadequate, we would need to increase our provision for loan losses.

Participation Interests in Loan Pools

The loan pool accounting practice relates to our estimate that the investment amount reflected on our financial statements does not exceed the estimated net realizable value or the fair value of the underlying collateral securing the purchased loans. In evaluating the purchased loan pool, we take into consideration many factors, including the borrowers' current financial situation, the underlying collateral, current economic conditions, historical collection experience, and other factors relative to the collection process. If the estimated net realizable value of the loan pool participations is overstated, our yield on the loan pools would be reduced.

Application of Purchase Accounting

During 2008, we completed the acquisition of the Former MidWestOne Financial Group, Inc., which generated significant amounts of goodwill and intangible assets and related amortization. The values assigned to goodwill and intangibles, as well as their related useful lives, are subject to judgment and estimation by our management. Goodwill and intangibles related to acquisitions are determined and based on purchase price allocations. Valuation of intangible assets is generally based on the estimated cash flows related to those assets, while the initial value assigned to goodwill is the residual of the purchase price over the fair value of all identifiable assets acquired and liabilities assumed. If the carrying value of the goodwill exceeded the implied fair value of the goodwill, an impairment loss would be recorded in an amount equal to that excess. Performing such a discounted cash flow analysis involves the use of estimates and assumptions. Useful lives are determined based on the expected future period of the benefit of the asset, the assessment of which considers various characteristics of the asset, including the historical cash flows. Due to the number of estimates involved related to the allocation of purchase price and determining the appropriate useful lives of intangible assets, we have identified purchase accounting as a critical accounting policy.

Goodwill and Intangible Assets

Goodwill and intangible assets arise from purchase business combinations. During 2008, we completed our merger with the Former MidWestOne. We were deemed to be the purchaser for accounting purposes and thus recognized goodwill and other intangible assets in connection with the merger. The goodwill was assigned to our one reporting unit, banking. As a general matter, goodwill and other intangible assets generated from purchase business combinations and deemed to have indefinite lives are not subject to amortization and are instead tested for impairment at least annually. Core deposit and customer relationship intangibles arising from acquisitions are being amortized over their estimated useful lives of up to 10 years.

In 2008, the extreme volatility in the banking industry that first started to surface in the latter part of 2007 had a significant impact on banking companies and the price of banking stocks, including our common stock. At December 31, 2008, our market capitalization was less than our total shareholders' equity, providing an indication that goodwill may be impaired as of such date. Thus, we performed an impairment analysis as a result of the significant decline in our stock price. Based on this analysis, we wrote off \$27.3 million of goodwill in the fourth quarter of 2008, which represented all of the goodwill that resulted from the Merger. Such charge had no effect on the Company's or the Bank's cash balances or liquidity. In addition, because goodwill and other intangible assets are not included in the calculation of regulatory capital, the Company's and the Bank's December 31, 2008 regulatory ratios were not adversely affected by this non-cash expense and exceeded the minimum amounts required to be considered well-capitalized.

Our other intangible assets are core deposit premium, insurance agency, trade name, and customer list intangibles. The establishment and subsequent amortization of these intangible assets involves the use of significant estimates and assumptions. These estimates and assumptions include, among other things, the estimated cost to service deposits acquired discount rates, estimated attrition rates and useful lives, future economic and market conditions, comparison of our market value to book value and determination of appropriate market comparables. Actual future results may differ from those estimates. We assess these intangible assets for impairment annually or more often if conditions indicate a possible impairment. Each quarter we evaluate the estimated useful lives of intangible assets and whether events or changes in circumstances warrant a revision to the remaining periods of amortization. In accordance with FASB ASC 350, *Accounting for the Impairment or Disposal of Long-Lived Assets*, recoverability of these assets is measured by comparison of the carrying amount of the asset to the future undiscounted cash flows the asset is expected to generate. If the asset is considered to be impaired, the amount of any impairment is measured as the difference between the carrying value and the fair value of the impaired asset.

Fair Value of Available for Sale Securities

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

Securities available for sale are reported at fair value, with unrealized gains and losses reported as a separate component of accumulated other comprehensive income, net of deferred income taxes. Declines in fair value of individual securities, below their amortized cost, are evaluated by management to determine whether the decline is temporary or other-than-temporary. Declines in the fair value of available for sale securities below their cost that are deemed other-than-temporary are reflected in earnings as impairment losses. In determining whether other-than-temporary impairment exists, management considers whether: (1) we have the intent to sell the security, (2) it is more likely than not that we will be required to sell the security before recovery of the amortized cost basis and (3) we do not expect to recover the entire amortized cost basis of the security.

Table of Contents

Off-Balance-Sheet Arrangements

We are a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of our customers, which include commitments to extend credit. Our exposure to credit loss in the event of nonperformance by the other party to the commitments to extend credit is represented by the contractual amount of those instruments. We use the same credit policies in making commitments as we do for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any conditions established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. We evaluate each customer's creditworthiness on a case-by-case basis. As of March 31, 2010, outstanding commitments to extend credit totaled approximately \$175.0 million.

Commitments under standby and performance letters of credit outstanding aggregated \$3.9 million as of March 31, 2010. We do not anticipate any losses as a result of these transactions.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

In general, market risk is the risk of change in asset values due to movements in underlying market rates and prices. Interest rate risk is the risk to earnings and capital arising from movements in interest rates. Interest rate risk is the most significant market risk affecting MidWestOne as other types of market risk, such as foreign currency exchange rate risk and commodity price risk, do not arise in the normal course of our business activities.

In addition to interest rate risk, the current challenging economic environment, particularly the severe dislocations in the credit markets that prevailed throughout 2008 and 2009, and continued during the first quarter of 2010, has made liquidity risk (namely, funding liquidity risk) a more prevalent concern among financial institutions. In general, liquidity risk is the risk of being unable to fund an entity's obligations to creditors (including, in the case of banks, obligations to depositors) as such obligations become due and/or fund its acquisition of assets.

Liquidity Risk

Liquidity refers to our ability to fund operations, to meet depositor withdrawals, to provide for our customers' credit needs, and to meet maturing obligations and existing commitments. Our liquidity principally depends on cash flows from operating activities, investment in and maturity of assets, changes in balances of deposits and borrowings, and our ability to borrow funds.

Net cash inflows from operating activities were \$6.3 million in the first quarter of 2010, compared with \$6.9 million in the first quarter of 2009. Proceeds from sale of loans held for sale, net of funds used to originate loans held for sale, were a source of inflow for the first quarter of 2010, as was a net change in accrued interest receivable of \$1.0 million.

Net cash inflows from investing activities were \$3.2 million in the three months ended March 31, 2010, compared to net cash outflows of \$7.8 million in the comparable three-month period of 2009. In the first three months of 2010, securities transactions accounted for a net outflow of \$10.2 million, and net principal received on loans accounted for net inflows of \$11.3 million. Cash inflows for loan pool participations were \$1.5 million during the first three months of 2010 compared to a \$2.3 million outflow during the same period of 2009.

Net cash provided by financing activities in the first three months of 2010 was \$4.9 million. The largest cash outflow from financing activities in the first quarter of 2010 consisted of \$3.5 million in net decrease in securities sold under agreements to repurchase. The largest financing cash inflow during the three months ended March 31, 2010 was the \$13.4 million increase in deposits. Cash inflows from financing activities in the first quarter of 2009 were \$35.0 million, which included the \$16.0 million that we received from our issuance of shares of senior preferred stock and a warrant to purchase common stock to the U.S. Treasury pursuant to the Capital Purchase Program. In addition, net increases occurred in deposits and securities sold under agreements to repurchase of \$22.0 million and \$10.3 million, respectively.

To further mitigate liquidity risk, the Bank has several sources of liquidity in place to maximize funding availability and increase the diversification of funding sources. The criteria for evaluating the use of these sources include - volume concentration (percentage of liabilities), cost, volatility, and the fit with the current Asset/Liability management plan. These acceptable sources of liquidity include:

Fed Funds Lines

FHLB Borrowings

Brokered Repurchase Agreements

Federal Reserve Bank Discount Window

Fed Funds Lines:

Routine liquidity requirements are met by fluctuations in the Bank's Fed Funds position. The principal function of these funds is to maintain short-term liquidity. Unsecured Fed Funds purchased lines are viewed as a volatile liability and are not used as a long-term funding solution, especially when used to fund long-term assets. Multiple correspondent relationships are preferable and Fed Funds sold exposure to any one customer is continuously monitored. The current Fed Funds purchased limit is 10% of total assets, or the amount of established Fed Funds lines, whichever is smaller. Currently, our subsidiary bank has unsecured Fed Fund lines totaling \$55 million, which are tested annually to ensure availability.

Table of Contents**FHLB Borrowings:**

FHLB borrowings provide both a source of liquidity and long-term funding for the Bank. Use of this type of funding is coordinated with both the strategic balance sheet growth projections and the current and future interest rate risk profile of the Bank. Factors that are taken into account when contemplating use of FHLB borrowings are the effective interest rate, the collateral requirements, community investment program credits, and the implications and cost of having to purchase incremental FHLB stock. The current FHLB advance limit is 25% of total assets. Currently, the Bank has a \$205.2 million advance limit with \$127.7 million in outstanding borrowings, leaving \$77.5 million available for liquidity needs. These borrowings are secured by various real estate loans (residential, commercial and agricultural).

Brokered Repurchase Agreements:

Brokered repurchase agreements may be established with approved brokerage firms and banks. Repurchase agreements create rollover risk (the risk that a broker will discontinue the relationship due to market factors) and are not used as a long-term funding solution, especially when used to fund long-term assets. Collateral requirements and availability are evaluated and monitored. The current policy limit for brokered repurchase agreements is 10% of total assets. There were no outstanding brokered repurchase agreements at March 31, 2010.

Federal Reserve Bank Discount Window:

The FRB Discount Window is another source of liquidity, particularly during difficult economic times. The Bank has a borrowing capacity with the Federal Reserve Bank of Chicago limited only by the amount of municipal securities pledged against the line. Currently, the Bank owns municipal securities with an approximate market value of \$13.5 million available for liquidity purposes.

Interest Rate Risk

The nature of the banking business, which involves paying interest on deposits at varying rates and terms and charging interest on loans at other rates and terms, creates interest rate risk. As a result, net interest margin and earnings and the market value of assets and liabilities are subject to fluctuations arising from the movement of interest rates. We manage several forms of interest rate risk, including asset/liability mismatch, basis risk and prepayment risk. A key management objective is to maintain a risk profile in which variations in net interest income stay within the limits and guidelines of the Bank's Asset/Liability Management Policy.

Like most financial institutions, our net income can be significantly influenced by a variety of external factors, including: overall economic conditions, policies and actions of regulatory authorities, the amounts of and rates at which assets and liabilities reprice, variances in prepayment of loans and securities other than those that are assumed, early withdrawal of deposits, exercise of call options on borrowings or securities, competition, a general rise or decline in interest rates, changes in the slope of the yield-curve, changes in historical relationships between indices (such as LIBOR and prime), and balance sheet growth or contraction. Our asset and liability committee (ALCO) seeks to manage interest rate risk under a variety of rate environments by structuring our balance sheet and off-balance sheet positions. The risk is monitored and managed within approved policy limits.

We use a third-party computer software simulation modeling program to measure our exposure to potential interest rate changes. For various assumed hypothetical changes in market interest rates, numerous other assumptions are made, such as prepayment speeds on loans and securities backed by mortgages, the slope of the Treasury yield curve, the rates and volumes of our deposits, and the rates and volumes of our loans. This analysis measures the estimated change in net interest income in the event of hypothetical changes in interest rates. The following table presents our projected changes in net interest income for the various interest rate shock levels at March 31, 2010.

Analysis of Net Interest Income Sensitivity

	Immediate Change in Rates			
	-200	-100	+100	+200
(dollars in thousands)				
March 31, 2010				
Dollar change	\$ 835	\$ 1,125	\$ (1,716)	\$ (2,366)
Percent change	1.7%	2.3%	-3.5%	-4.9%
December 31, 2009				

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

Dollar change	\$ 885	\$ 1,373	\$ (1,995)	\$ (3,310)
Percent change	1.8%	2.8%	-4.1%	-6.8%

As shown above, at March 31, 2010, the effect of an immediate and sustained 200 basis point increase in interest rates would decrease our net interest income by approximately \$2.4 million. The effect of an immediate and sustained 200 basis point decrease in rates would increase our net interest income by approximately \$0.8 million. An increase in interest rates would cause our interest-bearing liabilities to reprice more quickly than interest-earning assets, thus reducing net interest income. Conversely, a decrease in interest rates would cause an increase in net interest income as interest-bearing liabilities would decline more rapidly than interest-earning assets. In the current low interest rate environment, model results of a 200 basis point drop in interest rates are of questionable value as many interest bearing liabilities and interest earning assets cannot re-price significantly lower than current levels.

Table of Contents

Computations of the prospective effects of hypothetical interest rate changes were based on numerous assumptions. Actual values may differ from those projections set forth above. Further, the computations do not contemplate any actions we could have undertaken in response to changes in interest rates.

Item 4. Controls and Procedures.

Disclosure Controls and Procedures

Under supervision and with the participation of certain members of our management, including the chief executive officer and the chief financial officer, we completed an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in SEC Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of March 31, 2010. Based on this evaluation, our chief executive officer and chief financial officer believe that the disclosure controls and procedures were effective as of the end of the period covered by this Report with respect to timely communication to them and other members of management responsible for preparing periodic reports and material information required to be disclosed in this Report as it relates to the Company and our consolidated subsidiaries.

The effectiveness of the Company's or any system of disclosure controls and procedures is subject to certain limitations, including the exercise of judgment in designing, implementing, and evaluating the controls and procedures, the assumptions used in identifying the likelihood of future events, and the inability to eliminate misconduct completely. As a result, there can be no assurance that our disclosure controls and procedures will prevent all errors or fraud or ensure that all material information will be made known to appropriate management in a timely fashion. By their nature, our or any system of disclosure controls and procedures can provide only reasonable assurance regarding management's control objectives.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Cautionary Note Regarding Forward-Looking Statements

Statements made in this report, other than those concerning historical financial information, may be considered forward-looking statements, which speak only as of the date of this document and are based on current expectations and involve a number of assumptions. These include, among other things, statements regarding future results or expectations. The Company intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and is including this statement for purposes of these safe harbor provisions. The Company's ability to predict results, or the actual effect of future plans or strategies, is inherently uncertain. Factors that could cause actual results to differ from those set forth in the forward-looking statements or that could have a material effect on the operations and future prospects of the Company include, but are not limited to: (1) the strength of the local and national economy; (2) changes in interest rates, legislative/regulatory changes, monetary and fiscal policies of the U.S. government, including policies of the U.S. Treasury and the Federal Reserve Board; (3) the loss of key executives or employees; (4) changes in the quality and composition of the Company's loan and securities portfolios; demand for loan products; deposit flows; competition; demand for financial services in the Company's respective market areas; implementation of new technologies; ability to develop and maintain secure and reliable electronic systems; and accounting principles, policies, and guidelines; (5) expected revenue synergies and cost savings from the merger may not be fully realized or realized within the expected time frame; and (6) other risk factors detailed from time to time in filings made by the Company with the SEC.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

The Company and its subsidiaries are from time to time parties to various legal actions arising in the normal course of business. The Company believes that there are no threatened or pending proceedings against the Company or its subsidiaries, which, if determined adversely, would have a material adverse effect on the business or financial condition of the Company.

Item 1A. Risk Factors.

Edgar Filing: MidWestOne Financial Group, Inc. - Form 10-Q

There have been no material changes from the risk factors set forth in Part I, Item 1A, Risk Factors of our Form 10-K for the annual period ended December 31, 2009. Please refer to that section of our Form 10-K for disclosures regarding the risks and uncertainties related to our business.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

We did not repurchase any of our equity securities during the quarter covered by this report. As of March 31, 2010, we did not have in effect an approved share repurchase program.

As discussed above, on February 6, 2009, we consummated the sale of \$16.0 million of senior preferred stock to the Treasury pursuant to the Capital Purchase Program. The terms of the senior preferred stock place certain restrictions on our ability to pay dividends on our

Table of Contents

common stock. First, no dividends on our common stock may be paid unless all accrued dividends on Treasury's senior preferred stock have been paid in full. Second, until the third anniversary of the date of Treasury's investment, we may not increase the dividends paid on its common stock beyond \$0.1525 per share without first obtaining the consent of Treasury.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. [Removed and Reserved].

Item 5. Other Information.

None.

Item 6. Exhibits.
