MONRO MUFFLER BRAKE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Condensed Consolidated Financial Statements

The consolidated balance sheet as of June 26, 2010 and March 27, 2010, the consolidated statements of income and cash flows for the quarter ended June 26, 2010 and June 27, 2009, and the consolidated statement of changes in shareholders' equity for the quarter ended June 26, 2010, include Monroe Muffler Brake, Inc. and its wholly owned subsidiary (the "Company"). These unaudited condensed consolidated financial statements have been prepared by the Company. In the opinion of management, all known adjustments (consisting of normal recurring accruals or adjustments) have been made to present the financial position, results of operations and cash flows for the unaudited periods presented.

Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended March 27, 2010. The results of operations for the interim periods being reported on herein are not necessarily indicative of the operating results for the full year.

The Company reports its results on a 52/53 week fiscal year with the fiscal year ending on the last Saturday in March of each year. The following are the dates represented by each fiscal period reported in these condensed financial statements:

Quarter Ended Fiscal June 2010 :	March 28, 2010	June 26, 2010 (13 weeks)
Quarter Ended Fiscal June 2009 :	March 29, 2009	June 27, 2009 (13 weeks)

During the fourth quarter of fiscal 2010, the Company substantially completed the purchase price allocation for the fiscal year 2010 acquisitions. Some of the amounts previously estimated changed during the measurement period. The significant changes in estimates consisted of an increase in property, plant and equipment of \$2.0 million; an increase in intangible assets of \$1.1 million; and an increase in long-term debt of \$3.9 million. The measurement period adjustments represent updates made to the purchase price allocation based on revisions to valuation estimates in quarters subsequent to the quarter of acquisition and initial accounting. There were no significant adjustments to the Company's Consolidated Statement of Income.

Note 2 Acquisitions

The Company's acquisitions are strategic moves in its plan to fill in and expand its presence in its existing and contiguous markets, and leverage fixed operating costs such as distribution and advertising.

In the first quarter of fiscal 2011, the Company added seven retail tire and automotive repair stores located in Pennsylvania and Maine through two acquisition transactions. Collectively, these stores produced approximately \$11.3 million in sales annually based on unaudited pre-acquisition historical information. The total purchase price of these stores was approximately \$7.1 million in cash and the assumption of certain liabilities. The acquisitions were financed through the Company's existing bank facility. The results of operations of these acquired stores are included in the Company's results from their respective acquisition dates.

The Company has completed its initial accounting for these acquisitions in accordance with accounting guidance on business combinations. The acquisitions resulted in goodwill related to, among other things, growth opportunities and unidentified intangible assets. All of the goodwill is expected to be deductible for tax purposes.

The Company has recorded finite-lived intangible assets at their determined fair value related to customer relationships. However, the Company has not completed its final purchase price accounting of these acquisitions due to the timing of the acquisitions. As the Company completes its final accounting for these acquisitions, there may be changes, some of which may be material, to this initial accounting.

Table of Contents

MONRO MUFFLER BRAKE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In accordance with accounting guidance on business combinations, the Company expensed all costs related to these acquisitions in the first quarter of fiscal 2011. The total costs related to these acquisitions were not material to the Consolidated Statement of Income. These costs are included in the Consolidated Statement of Income under operating, selling, general and administrative expenses.

The purchase price of the acquisitions have been preliminarily allocated to the net tangible and intangible assets acquired, with the remainder recorded as goodwill on the basis of estimated fair values, as follows:

	As of June 26, 2010	
	(Dollars in thousands)	
Other current assets	\$	199
Intangible assets		393
Other noncurrent assets		209
Current liabilities		(344)
Total net identifiable assets acquired	\$	457
Total consideration transferred	\$	7,107
Less: total net identifiable assets acquired		457
Goodwill	\$	6,650

Intangible assets consist of customer lists which are being amortized over their estimated useful life of ten years.

Note 3 Earnings Per Share

Basic earnings per common share (EPS) amounts are computed by dividing earnings after the deduction of preferred stock dividends by the average number of common shares outstanding. Diluted EPS amounts assume the issuance of common stock for all potentially dilutive equivalents outstanding.

The following is a reconciliation of basic and diluted EPS for the respective periods:

	Quarter Ended	
	Fiscal June	
	2010	2009
	(Dollars in thousands, except per share data)	
Numerator for earnings per common share calculation:		
Net Income	\$ 13,211	\$ 9,411
Less: Preferred stock dividends	46	66
Income available to common stockholders	\$ 13,165	\$ 9,345
Denominator for earnings per common share calculation:		

Edgar Filing: MONRO MUFFLER BRAKE INC - Form 10-Q

Weighted average common shares, basic	19,995	19,440
Effect of dilutive securities:		
Preferred Stock	507	507
Stock options	534	489
Weighted average number of common shares, diluted	21,036	20,436
Basic Earnings per common share:	\$.66	\$.48
Diluted Earnings per common share:	\$.63	\$.46

Table of Contents

MONRO MUFFLER BRAKE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The computation of diluted EPS excludes the effect of the assumed exercise of approximately 43,000 and 137,000 stock options for the three months ended fiscal June 2010 and June 2009, respectively. Such amounts were excluded as the exercise prices of these options were greater than the average market value of the Company's common stock for those periods, resulting in an anti-dilutive effect on diluted EPS.

Note 4 Income Taxes

In the normal course of business, the Company provides for uncertain tax positions and the related interest and penalties, and adjusts its unrecognized tax benefits and accrued interest and penalties accordingly. The total amount of unrecognized tax benefits were \$5.7 million and \$5.6 million, respectively at June 26, 2010 and March 27, 2010, the majority of which, if recognized, would affect the effective tax rate. As of June 26, 2010, the Company had approximately \$.6 million of interest and penalties accrued related to unrecognized tax benefits.

The Company is currently under audit by the Internal Revenue Service for the fiscal 2008 tax year, and also currently under audit by certain state tax jurisdictions for the fiscal 2001 to 2007 tax years. It is reasonably possible that the examination phase of the audit for these years may conclude in the next 12 months, and that the related unrecognized tax benefits for tax positions taken regarding previously filed tax returns may change from those recorded as liabilities for uncertain tax positions in the Company's financial statements as June 26, 2010. However, based on the status of the examinations, it is not possible to estimate the effect of any amount of such change to previously recorded uncertain tax positions.

The Company files U.S. federal income tax returns and income tax returns in various state jurisdictions. The Company's fiscal 2007 through fiscal 2009 U.S. federal tax years and various state tax years remain subject to income tax examinations by tax authorities.

Note 5 Derivative Financial Instruments

The Company reports derivatives and hedging activities in accordance with accounting guidance on disclosures about derivative instruments and hedging activities. This statement requires that all derivative instruments be recorded on the balance sheet at fair value. Changes in the fair value of derivatives are recorded each period in current earnings or other comprehensive income, depending on whether the derivative is designated as part of a hedge transaction, and if it is, depending on the type of hedge transaction.

The notional amount of derivative financial instruments, which consisted solely of three interest rate swaps used to minimize the risk and/or costs associated with changes in interest rates, was \$30.0 million at June 26, 2010. These swaps matured in July 2010. Fixed rates under these agreements range from 3.27% to 3.29%.

The Company manages exposure to changes in market interest rates. The Company's use of derivative instruments is limited to highly effective interest rate swaps to hedge the risk of changes in cash flows (future interest payments) attributable to changes in LIBOR swap rates, the designated benchmark interest rate being hedged on certain of the Company's LIBOR-induced variable-rate debt. The interest rate swaps effectively fixed the Company's interest payments on certain LIBOR-indexed variable-rate debt.

The Company reflects the current fair value of all interest rate hedge instruments in its consolidated balance sheets as a component of other current liabilities. All of the Company's interest rate hedge instruments were designated as cash flow hedges.

The gains and losses related to the fair value of interest rate hedges are deferred in stockholders' equity as a component of other comprehensive income or loss. These deferred gains and losses are recognized in income as a decrease or increase to interest expense in the period in which the related cash flows being hedged are recognized in expense. However, to the extent that the change in value of an interest rate hedge instrument does not perfectly offset the change in the value of the cash flows being hedged, that ineffective portion is immediately recognized in the income statement. The Company's hedge instruments have been determined to be highly effective as of June 26, 2010.

Table of Contents

MONRO MUFFLER BRAKE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company primarily executes derivative transactions of relatively short duration with strong creditworthy counterparties. These counterparties expose the Company to credit risk in the event of non-performance. The amount of such exposure is limited to the unpaid portion of amounts due to the Company pursuant to the terms of the derivative financial instruments, if any. Although there are no collateral requirements, if a downgrade in the credit rating of these counterparties occurs, management believes that this exposure is mitigated by provisions in the derivative agreements which allow for the legal right of offset of any amounts due to the Company from the counterparties with amounts payable, if any, to the counterparties by the Company. Management considers the risk of counterparty default to be minimal.

The following table presents the Company's derivative financial instruments measured at fair value at June 26, 2010:

Interest Rate Swaps	Notional Amount of Underlying Debt	Fixed Rate Received	Year of Transaction (Dollars in thousands)	Maturity	Fair Value
Swaps associated with:					
1 month U.S. LIBOR	\$ 10,000	3.29%	2008	2010	\$ (25)
1 month U.S. LIBOR	10,000	3.27%	2008	2010	(25)
1 month U.S. LIBOR	10,000	3.27%	2008	2010	(25)
	\$ 30,000				\$ (75)

The location and amounts of derivative fair values in the balance sheet as of June 26, 2010 were as follows:

	Balance Sheet Location	Fair Value (Dollars in thousands)
Interest rate contracts designated as hedging instruments under accounting guidance on derivative instruments and hedging activities	Other current liabilities	\$ 75

The effect of derivative instruments in cash flow hedge relationships on the financial statements for the three months ended June 26, 2010 and June 27, 2009 were as follows:

	Amount of Gain or (Loss) Recognized in Other Comprehensive Income on Derivatives (Effective Portion) 2011 2010	Location of Gain or (Loss) Reclassified from Accumulated Other Comprehensive Income into Income (Effective Portion)	Amount of Gain or (Loss) Reclassified From Other Comprehensive Income into Income (Effective Portion) 2011 2010 (Dollars in thousands)
Derivatives in Flow Hedging Relationships			

Edgar Filing: MONRO MUFFLER BRAKE INC - Form 10-Q

(Dollars in
thousands)

Interest rate contracts	\$ 144	\$ (97)	Interest income (expense)	\$ (230)	\$ (215)
-------------------------	--------	---------	---------------------------	----------	----------

While it is not the Company's intention to terminate its derivative financial instruments, fair values were estimated based on quotes from financial institutions, which represented the amounts that the Company would receive or pay if the instruments were terminated at the respective balance sheet date. These fair values indicated that the termination of interest rate swaps would result in a \$75,000 loss as of June 26, 2010.

Note 6 Fair Value of Financial Instruments

The guidance on fair value measurements, among other things, defines fair value, establishes a consistent framework for measuring fair value and expands disclosure for each major asset and liability category measured at fair value on either a recurring or nonrecurring basis. The guidance clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability.

Table of Contents

MONRO MUFFLER BRAKE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

As a basis for considering such assumptions, the guidance establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

- Level 1. Observable inputs such as quoted prices in active markets;
- Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and
- Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Assets and liabilities measured at fair value are based on one or more of the following three valuation techniques:

- a.) Market approach. Prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities.
- b.) Cost approach. Amount that would be required to replace the service capacity of an asset (replacement cost).
- c.) Income approach. Techniques to convert future amounts to a single present amount based on market expectations (including present value techniques, option-pricing and excess earnings models).

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The following table represents the financial assets and liabilities on the consolidated balance sheet as of June 26, 2010 that were measured at fair value on a recurring basis and the valuation approach applied to each of these items.

	Significant Other Observable Inputs (Level 2) Amount (Dollars in thousands)
Liabilities	
Derivatives	\$ 75
<u>Note 7 - Supplemental Disclosure of Cash Flow Information</u>	

The following transactions represent non-cash investing and financing activities during the periods indicated:

THREE MONTHS ENDED JUNE 26, 2010:

In connection with the fiscal 2011 acquisitions (Note 2), liabilities were assumed as follows:

Fair value of assets acquired	\$ 800,000
Goodwill acquired	6,650,000
Cash paid, net of cash acquired	(7,106,000)

Edgar Filing: MONRO MUFFLER BRAKE INC - Form 10-Q

Liabilities assumed

\$ 344,000

In connection with the accounting for income tax benefits related to the exercise of stock options, the Company decreased current liabilities and increased paid-in capital by \$1,374,000.

Table of Contents

MONRO MUFFLER BRAKE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

THREE MONTHS ENDED JUNE 27, 2009:

In connection with the Autotire Acquisition (Note 2), liabilities were assumed as follows:

Fair value of assets acquired	\$ 9,703,000
Goodwill acquired	5,033,000
Cash paid, net of cash acquired	(7,358,000)
 Liabilities assumed	 \$ 7,378,000

In connection with the recording of capital leases, the Company increased both fixed assets and long-term debt by \$2,094,000.

In connection with the accounting for income tax benefits related to the exercise of stock options, the Company decreased current liabilities and increased paid-in capital by \$563,000.

Note 8 Cash Dividend

In April 2010, the Company's Board of Directors declared its intention to pay a regular quarterly cash dividend during fiscal 2011 of \$.09 per common share or common share equivalent to be paid beginning with the first quarter of fiscal 2011. However, the declaration of and any determination as to the payment of future dividends will be at the discretion of the Board of Directors and will depend on the Company's financial condition, results of operations, capital requirements, compliance with charter and contractual restrictions, and such other factors as the Board of Directors deems relevant.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations****Results of Operations**

The statements contained in this Form 10-Q that are not historical facts, including (without limitation) statements made in the Management's Discussion and Analysis of Financial Condition and Results of Operations, may contain statements of future expectations and other forward-looking statements made pursuant to the Safe Harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are subject to risks, uncertainties and other important factors that could cause actual results to differ materially from those expressed. These factors include, but are not necessarily limited to, product demand, dependence on and competition within the primary markets in which the Company's stores are located, the need for and costs associated with store renovations and other capital expenditures, the effect of economic conditions, the impact of competitive services and pricing, product development, parts supply restraints or difficulties, industry regulation, risks relating to leverage and debt service (including sensitivity to fluctuations in interest rates), continued availability of capital resources and financing, risks relating to integration of acquired businesses, the availability of vendor rebates and other factors set forth or incorporated elsewhere herein and in the Company's other Securities and Exchange Commission filings. The Company does not undertake to update any forward-looking statement that may be made from time to time by or on behalf of the Company.

The following table sets forth income statement data of Monro Muffler Brake, Inc. (Monro or the Company) expressed as a percentage of sales for the fiscal periods indicated:

	Quarter Ended Fiscal June 2010	2009
Sales	100.0%	100.0%
Cost of sales, including distribution and occupancy costs	58.3	55.9
Gross profit	41.7	44.1
Operating, selling, general and administrative expenses	27.2	30.6
Intangible amortization	.2	.1
Loss on disposal of assets	0	.1
Total operating expenses	27.4	30.8
Operating income	14.3	13.3
Interest expense - net	.9	1.5
Other income - net	0	0
Income before provision for income taxes	13.4	11.8
Provision for income taxes	5.1	4.5
Net income	8.3%	7.3%

First Quarter Ended June 26, 2010 Compared To First Quarter Ended June 27, 2009

Sales were \$158.2 million for the quarter ended June 26, 2010 as compared with \$128.0 million in the quarter ended June 27, 2009. The sales increase of \$30.2 million or 23.6%, was partially due to a comparable store sales increase of 5.1%. Additionally, there was an increase of \$24.6 million related to new stores, of which \$21.7 million came from the FY 2010 Acquisitions. Partially offsetting this was a decrease in sales from

Edgar Filing: MONRO MUFFLER BRAKE INC - Form 10-Q

closed stores amounting to \$1.2 million. There were 90 selling days in the quarter ended June 26, 2010 and in the quarter ended June 27, 2009.

The Company has slightly modified its methodology for calculating the number of selling days in each month and quarter.

Table of Contents

Previously, in computing its comparable store sales percentage increases (adjusted for days), the Company did not include Sundays or open holidays in the number of selling days, but included all sales in each comparable period. This was because only a small number of stores were open Sundays, and some were not open holidays. Also, these days were generally much shorter selling days. Now that over 50% of the Company's stores are open Sundays, almost all stores are open holidays, and the selling days are longer, the Company concluded that counting Sundays and open holidays as selling days is now appropriate. Accordingly, selling days now include each day other than Easter, Thanksgiving and Christmas. This change was made beginning in fiscal year 2011 (April 2010) and retroactively applied to prior months and quarters. There is no impact on reported actual comparable store sales increases for any prior periods. Nor will the change impact calculated comparable store sales increases in future periods. However, this change may result in a change in the calculated comparable store sales percent increase in certain prior periods when adjusted for days.

For the fiscal year 2010 fiscal quarters and full year, the results were as follows:

	Reported Comparable Store Sales Increase	Originally Reported Comparable Store Sales Increase, Adjusted For Days	Restated Comparable Store Sales Increase, Adjusted For Days
Q1 FY10	6.2%	6.2%	7.4%(1)
Q2 FY10	7.4%	7.4%	7.4%
Q3 FY10	7.2%	7.2%	7.2%
Q4 FY10	8.0%	8.0%	6.8%(2)
Full year FY10	7.2%	7.2%	7.2%

(1) This adjustment for days relates to the fact that the Easter holiday fell in April 2009, reducing the number of selling days as compared to the prior year quarter.

(2) This adjustment for days relates to the fact that the Company was open for business for the first time on New Year's Day on January 1, 2010, increasing the number of selling days as compared to the prior year quarter.

At June 26, 2010, the Company had 785 company-operated stores and three franchised locations compared with 740 stores at June 27, 2009. During the quarter ended June 26, 2010, the Company added eight stores.

Management believes that the improvement in comparable store sales resulted from several factors, including an increase in sales across all product categories. It is management's belief that strong in-store sales execution, highly effective advertising campaigns and price increases in several product categories also contributed to the sales improvement. Comparable store traffic as well as average ticket increased over the prior year first quarter. Soft economic conditions and the related decrease in consumer spending and tightening of credit, resulting in declining automobile sales (as compared to historical levels), helped to contribute to the improved sales. Management believes that consumers are keeping their cars longer and repairing them instead of trading them in for new cars. Additionally, while consumers can and often defer repairs when the economy is weak, most repairs can only be deferred for a period of time. When customers do come in to have their vehicles repaired, it is management's belief that they spend more on average because the problem with their vehicle has worsened due to additional wear.

Management also believes that the recent closings of dealerships by Chrysler and General Motors are driving more business to the Company's stores as consumers look for alternative, proven, economical and more geographically convenient locations to service their automobiles.

Gross profit for the quarter ended June 26, 2010 was \$66.0 million or 41.7% of sales as compared with \$56.4 million or 44.1% of sales for the quarter ended June 27, 2009. The decrease in gross profit for the quarter ended June 26, 2010, as a percentage of sales, is due to several factors.

Total material costs, including outside purchases, increased as a percentage of sales as compared to the prior year. The fiscal year 2010 and fiscal year 2011 acquisitions, all but one of which were tire stores, have resulted in a more pronounced shift in mix to the lower margin tire category, causing a fair amount of margin pressure. Approximately two thirds of the gross margin deterioration was attributable to these acquired tire stores. Tire and oil cost increases also contributed to the decline in margin. Partially offsetting these factors were selling price increases across the chain.

There was also a decrease in labor costs as a percent of sales due primarily to a continued shift in mix to tire sales and improved labor productivity, helping to improve gross profit. Additionally, distribution and occupancy costs decreased as a percentage of sales from the prior

year as the Company, with improved sales, was able to better leverage these largely fixed costs.

Table of Contents

The Company expects the decline in gross margin versus the prior year quarters to be most pronounced in its first and second quarters of fiscal year 2011, since it did not own the Tire Warehouse stores, whose mix is almost 100% tires, until its third fiscal quarter last year. Management expects gross margin for the third and fourth quarters to begin to flatten out as compared to the same quarters of fiscal 2010, and operating profit to be approximately 100 basis points better.

Operating expenses for the quarter ended June 26, 2010 were \$43.4 million or 27.4% of sales as compared with \$39.4 million or 30.8% of sales for the quarter ended June 27, 2009. Within operating expenses, selling, general and administrative (SG&A) expenses for the quarter ended June 26, 2010 increased by \$3.9 million to \$43.1 million from the quarter ended June 27, 2009, and decreased as a percentage of sales from 30.6% to 27.2%. The increase in dollars is directly attributed to the acquired stores' operating expenses. The decrease in percentage of sales is due to improved sales which have allowed the Company to leverage largely fixed costs, as well as a continued focus on cost control.

Operating income for the quarter ended June 26, 2010 of approximately \$22.6 million increased by 33.2% as compared to operating income of approximately \$17.0 million for the quarter ended June 27, 2009, and increased as a percentage of sales from 13.3% to 14.3%.

Net interest expense for the quarter ended June 26, 2010 decreased by approximately \$.4 million as compared to the same period in the prior year, and decreased from 1.5% to .9% as a percentage of sales for the same periods. The weighted average debt outstanding for the quarter ended June 26, 2010 decreased by approximately \$10.6 million as compared to the quarter ended June 27, 2009, primarily related to repayments made on the Company's Revolving Credit Facility agreement. In addition, the weighted average interest rate decreased by approximately 100 basis points from the prior year.

The effective tax rate for the quarter ended June 26, 2010 and June 27, 2009 was 37.7% and 37.8%, respectively, of pre-tax income.

Net income for the quarter ended June 26, 2010 of \$13.2 million increased 40.4% from net income for the quarter ended June 27, 2009. Earnings per share on a diluted basis for the quarter ended June 26, 2010 increased 37.0%.

Capital Resources and Liquidity

Capital Resources

The Company's primary capital requirements in fiscal year 2011 are the upgrading of facilities and systems and the funding of its store expansion program, including potential acquisitions of existing store chains. For the three months ended June 26, 2010, the Company's primary capital requirements were divided between the funding of capital expenditures related to existing and greenfield stores totaling \$3.1 million, and the funding of acquisitions totaling \$7.1 million. Funds were provided primarily by cash flow from operations and bank financing.

The Company paid dividends of \$1.8 million during the three months ended June 26, 2010. In April 2010, the Company's Board of Directors declared its intention to pay a regular quarterly cash dividend of \$.09 per common share or common share equivalent beginning with the first quarter of fiscal year 2011.

Management believes that the Company has sufficient resources available (including cash and equivalents, net cash flow from operations and bank financing) to expand its business as currently planned for the next several years.

Liquidity

In July 2005, the Company entered into a five-year, \$125 million Revolving Credit Facility agreement with five banks. A sixth bank was added in June 2008. Interest only is payable monthly throughout the Credit Facility's term. The facility included a provision allowing the Company to expand the amount of the overall facility to \$160 million. Amendments in January 2007 and June 2008 were made to these amounts which increased the overall facility to \$200 million and extended the expiration to January 2012. Currently, the committed sum is \$163.3 million and the accordion feature is \$36.7 million. Approximately \$59.2 million was outstanding at June 26, 2010, including \$16.8 million of outstanding letters of credit.

The Company has financed certain store properties and equipment with capital leases, which amount to \$46.0 million and are due in installments through 2039.

Table of Contents

The terms of the Credit Facility permit the payment of cash dividends not to exceed 25% of the preceding year's net income, and allow stock buybacks subject to the Company being able to meet its existing financial covenants. The Agreement requires the maintenance of specified interest and rent coverage ratios and amounts of net worth. It also contains restrictions on cash dividend payments. At June 26, 2010, the Company is in compliance with the applicable debt covenants, and does not see a risk of being out of compliance for the foreseeable future. These agreements permit mortgages and specific lease financing arrangements with other parties with certain limitations.

The Company enters into interest rate hedge agreements, which involve the exchange of fixed and floating rate interest payments periodically over the life of the agreement without the exchange of the underlying principal amounts. The differential to be paid or received is accrued as interest rates change and is recognized over the life of the agreements as an offsetting adjustment to interest expense. The Company entered into three \$10 million interest rate swap agreements in July 2008 which expired in July 2010.

The purpose of these agreements was to limit the interest rate exposure in the Company's floating rate debt. Fixed rates under these agreements ranged from 3.27% to 3.29%.

Recent Accounting Pronouncements

There have been no developments to recently issued accounting standards, including the expected dates of adoption and estimated effects on the Company's consolidated financial statements, from those disclosed in the Company's 2010 Annual Report on Form 10-K.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to market risk from potential changes in interest rates. At June 26, 2010 and March 27, 2010, approximately 71% and 58%, respectively, of the Company's long-term debt, excluding capital leases, was at fixed interest rates and therefore, the fair value is affected by changes in market interest rates. The Company's cash flow exposure on floating rate debt, which is not supported by interest rate swap agreements, would result in interest expense fluctuating approximately \$.1 million based upon the Company's debt position at the quarter ended June 26, 2010 and \$.2 million for fiscal year ended March 27, 2010, given a 1% change in LIBOR.

The Company regularly evaluates these risks and had entered into three interest rate swap agreements, which expired in July 2010, with an aggregate notional amount of \$30.0 million. These agreements limited the interest rate exposure on the Company's floating rate debt, related specifically to the Revolving Credit Facility, via the exchange of fixed and floating rate interest payments periodically over the life of the agreements without the exchange of the underlying principal amount. The fixed rates paid by the Company under these agreements range from 3.27% to 3.29%.

The Company believes the amount of risk and the use of derivative financial instruments described above are not material to the Company's financial condition or results of operations.

Item 4. Controls and Procedures

Disclosure controls and procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports that the Company files or submits pursuant to the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's (SEC) rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

In conjunction with the close of each fiscal quarter and under the supervision of the Chief Executive Officer and Chief Financial Officer, the Company conducts an update, a review and an evaluation of the effectiveness of the Company's disclosure controls and procedures. It is the conclusion of the Company's Chief Executive Officer and Chief Financial Officer, based upon an evaluation completed as of the end of the most recent fiscal quarter reported on herein, that the Company's disclosure controls and procedures were effective.

Changes in internal controls

There were no changes in the Company's internal control over financial reporting during the quarter ended June 26, 2010 that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

The Company is not a party or subject to any legal proceedings other than certain claims and lawsuits that arise in the normal course of its business. The Company does not believe that such claims or lawsuits, individually or in the aggregate, will have a material adverse effect on its financial condition or results of operations.

Item 1A. Risk Factors

There have been no changes to the risk factors described in the Company's previously filed Annual Report on Form 10-K for the fiscal year ended March 27, 2010.

Item 6. Exhibits

a. Exhibits

- 31.1 Certification of Robert G. Gross pursuant to Section 302 of the Sarbanes Oxley Act of 2002
- 31.2 Certification of Catherine D. Amico pursuant to Section 302 of the Sarbanes Oxley Act of 2002
- 32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes Oxley Act of 2002
