▶ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)

OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2012

or

◻ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)

OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 001-16189

NiSource Inc.

(Exact name of registrant as specified in its charter)

<u>Delaware</u> (State or other jurisdiction of incorporation or organization)	<u>35-2108964</u> (I.R.S. Employer Identification No.)
--	--

801 East 86th Avenue

<u>Merrillville, Indiana</u> (Address of principal executive offices)	<u>46410</u> (Zip Code)
--	----------------------------

(877) 647-5990

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Edgar Filing: NISOURCE INC/DE - Form 10-Q

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files.)

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: Common Stock, \$0.01 Par Value: 284,092,190 shares outstanding at April 26, 2012.

DEFINED TERMS

The following is a list of frequently used abbreviations or acronyms that are found in this report:

NiSource Subsidiaries and Affiliates

Capital Markets	NiSource Capital Markets, Inc.
CER	Columbia Energy Resources, Inc.
CGORC	Columbia Gas of Ohio Receivables Corporation
CNR	Columbia Natural Resources, Inc.
Columbia	Columbia Energy Group
Columbia Gulf	Columbia Gulf Transmission Company
Columbia of Kentucky	Columbia Gas of Kentucky, Inc.
Columbia of Maryland	Columbia Gas of Maryland, Inc.
Columbia of Massachusetts	Bay State Gas Company
Columbia of Ohio	Columbia Gas of Ohio, Inc.
Columbia of Pennsylvania	Columbia Gas of Pennsylvania, Inc.
Columbia of Virginia	Columbia Gas of Virginia, Inc.
Columbia Transmission	Columbia Gas Transmission, L.L.C.
CPRC	Columbia Gas of Pennsylvania Receivables Corporation
Crossroads Pipeline	Crossroads Pipeline Company
Granite State Gas	Granite State Gas Transmission, Inc.
Hardy Storage	Hardy Storage Company, L.L.C.
Kokomo Gas	Kokomo Gas and Fuel Company
Millennium	Millennium Pipeline Company, L.L.C.
NARC	NIPSCO Accounts Receivable Corporation
NDC Douglas Properties	NDC Douglas Properties, Inc.
NiSource	NiSource Inc.
NiSource Corporate Services	NiSource Corporate Services Company
NiSource Development Company	NiSource Development Company, Inc.
NiSource Finance	NiSource Finance Corp.
NiSource Midstream	NiSource Midstream Services, L.L.C.
Northern Indiana	Northern Indiana Public Service Company
Northern Indiana Fuel and Light	Northern Indiana Fuel and Light Company
PEI	PEI Holdings, Inc.
Whiting Clean Energy	Whiting Clean Energy, Inc.

Abbreviations

AFUDC	Allowance for funds used during construction
AMRP	Accelerated Main Replacement Program
AOC	Administrative Order by Consent
AOI	Accumulated other comprehensive income
ARP	Alternative Regulatory Plan
ARRs	Auction Revenue Rights
ASC	Accounting Standards Codification
BBA	British Banker Association
Bcf	Billion cubic feet
Board	Board of Directors
BP AE	BP Alternative Energy North America Inc
BTMU	The Bank of Tokyo-Mitsubishi UFJ, LTD.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited)**1. Basis of Accounting Presentation**

The accompanying unaudited condensed consolidated financial statements for NiSource (the Company) reflect all normal recurring adjustments that are necessary, in the opinion of management, to present fairly the results of operations in accordance with GAAP in the United States of America.

The accompanying financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in NiSource's Annual Report on Form 10-K for the fiscal year ended December 31, 2011. Income for interim periods may not be indicative of results for the calendar year due to weather variations and other factors.

The unaudited condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the SEC. Certain information and note disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to those rules and regulations, although NiSource believes that the disclosures made are adequate to make the information not misleading.

Immaterial Restatement

As indicated in NiSource's Annual Report on Form 10-K for the fiscal year ended December 31, 2011, NiSource made correcting adjustments to its historical financial statements including for the first quarter of 2011 relating to deferred revenue, environmental asset recovery and OPEB over-reimbursement. NiSource does not believe that these corrections, individually or in the aggregate, are material to its financial statements (unaudited) for the quarterly period ended March 31, 2011. For additional information on these corrections, see Note 1, Nature of Operations and Summary of Significant Accounting Policies, and Note 26, Quarterly Financial Data (Unaudited), of the Consolidated Financial Statements of NiSource's Annual Report on Form 10-K for the fiscal year ended December 31, 2011.

The following table sets forth the effects of the correcting adjustments to Net Income for the three months ended March 31, 2011:

Increase/(Decrease) in Net Income (<i>in millions</i>)	Three Months Ended March 31, 2011
Previously reported Net Income	\$ 205.2
Deferred revenue	(0.6)
Environmental asset recovery	8.0
OPEB over-reimbursement	(0.2)
Total corrections	7.2
Income taxes	2.9
Corrected Net Income	\$ 209.5

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited)

The following table sets forth the effects of the correcting adjustments on affected line items within the Condensed Statement of Consolidated Income (unaudited) for the three months ended March 31, 2011:

Condensed Statements of Consolidated Income (unaudited)

<i>(in millions, except per share amounts)</i>	Three Months ended March 31, 2011	
	As Previously Reported	As Corrected
Net Revenues		
Electric	\$ 347.1	\$ 346.5
Gross Revenues		
	2,232.2	2,231.6
Total Net Revenues	1,061.3	1,060.7
Operation and maintenance	432.5	429.3
Depreciation and amortization	138.9	134.3
Total Operating Expenses	665.1	657.3
Operating Income	399.2	406.4
Income from Continuing Operations before Income Taxes	312.7	319.9
Income Taxes	107.9	110.8
Income from Continuing Operations	204.8	209.1
Net Income	\$ 205.2	\$ 209.5
Basic Earnings Per Share (\$)		
Continuing operations	\$ 0.73	\$ 0.75
Basic Earnings Per Share	\$ 0.73	\$ 0.75
Diluted Earnings Per Share (\$)		
Continuing operations	\$ 0.72	\$ 0.73
Diluted Earnings Per Share	\$ 0.72	\$ 0.73

These corrections affected certain line items within net cash flows from operating activities on the Condensed Statement of Consolidated Cash Flows (unaudited) for the three months ended March 31, 2011, with no net effect on total net cash flows from operating activities.

2. Recent Accounting Pronouncements**Recently Adopted Accounting Pronouncements**

Comprehensive Income. In June 2011, the FASB issued Accounting Standards Update 2011-05, which revises the manner in which entities present comprehensive income in their financial statements. The new guidance removes the presentation options in ASC 220 and requires entities to report components of comprehensive income in either (1) a continuous statement of comprehensive income or (2) two separate but consecutive statements. The update does not change the items that must be reported in other comprehensive income. In December 2011, the FASB issued Accounting Standards Update 2011-12, which indefinitely defers the requirement to present reclassification adjustments out of accumulated other comprehensive income by component in both the Condensed Statements of Consolidated Income (unaudited) and the Condensed Statements of Consolidated Comprehensive Income (unaudited), as required by Accounting Standards Update 2011-05. For public entities, these updates are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. NiSource adopted the guidance on January 1, 2012 by presenting the Condensed Statements of Consolidated Income (unaudited) and the Condensed

Edgar Filing: NISOURCE INC/DE - Form 10-Q

Statements of Consolidated Comprehensive Income (unaudited) as two separate statements.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)**Recently Issued Accounting Pronouncements**

Balance Sheet Disclosure. In December 2011, the FASB issued Accounting Standards Update 2011-11, which requires additional disclosures regarding the nature of an entity's rights to offset positions associated with its financial and derivative instruments. These new disclosures will provide additional information about the entity's gross and net financial exposure. The amendment is effective for fiscal years, and interim periods within those years, beginning after January 1, 2013 with retrospective application required. NiSource is currently reviewing the provisions of this new standard to determine the impact on its Condensed Consolidated Financial Statements (unaudited) and Notes to Condensed Consolidated Financial Statements (unaudited).

Goodwill Impairment. In September 2011, the FASB issued Accounting Standards Update 2011-08, which gives entities testing goodwill for impairment the option of performing a qualitative assessment before calculating the fair value of a reporting unit for the goodwill impairment test. The amendment is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. As NiSource performs its annual Goodwill impairment test during the second quarter of its fiscal year, NiSource is currently reviewing the provisions of this new standard to determine if it will elect the option for the second quarter of 2012.

3. Earnings Per Share

Basic EPS is computed by dividing income available to common stockholders by the weighted-average number of shares of common stock outstanding for the period. The weighted average shares outstanding for diluted EPS includes the incremental effects of the various long-term incentive compensation plans and the Forward Agreements (refer to Note 4 Forward Equity Agreement for additional information). The calculation of diluted earnings per share for March 31, 2012 and 2011 excludes out-of-the-money stock options of 2.1 million and 3.5 million, respectively, which had an anti-dilutive effect. The numerator in calculating both basic and diluted EPS for each period is reported net income. The computation of diluted average common shares follows:

Three Months Ended March 31, (in thousands)	2012	2011
Denominator		
Basic average common shares outstanding	282,925	279,339
Dilutive potential common shares		
Nonqualified stock options	126	-
Shares contingently issuable under employee stock plans	158	1,112
Shares restricted under stock plans	615	317
Forward agreements	9,275	4,203
Diluted Average Common Shares	293,099	284,971

4. Forward Equity Agreement

On September 14, 2010, NiSource and Credit Suisse Securities (USA) LLC, as forward seller, closed an underwritten registered public offering of 24,265,000 shares of NiSource's common stock. All of the shares sold were borrowed and delivered to the underwriters by the forward seller. NiSource did not receive any of the proceeds from the sale of the borrowed shares, but NiSource will receive proceeds upon settlement of the Forward Agreements referred to below.

In connection with the public offering, NiSource entered into forward sale agreements (Forward Agreements) with an affiliate of the forward seller covering an aggregate of 24,265,000 shares of NiSource's common stock. Settlement of the Forward Agreements is expected to occur no later than September 10, 2012. Subject to certain exceptions, NiSource may elect cash or net share settlement for all or a portion of its obligations under the Forward Agreements. Upon any physical settlement of the Forward Agreements, NiSource will deliver shares of its common stock in exchange for cash proceeds at the forward sale price, which initially is \$15.9638 and is subject to adjustment as provided in the Forward Agreements. If the equity forward had been settled by delivery of shares at March 31, 2012, NiSource would have received

Edgar Filing: NISOURCE INC/DE - Form 10-Q

approximately \$351.2 million based on a forward price of \$14.4744 for the 24,265,000 shares. NiSource currently anticipates settling the equity forward by delivering shares.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

In accordance with ASC 815-40, NiSource has classified the Forward Agreement as an equity transaction. As a result of this classification, no amounts have been recorded in the Condensed Consolidated Financial Statements (unaudited) as of and for the three months ended March 31, 2012 and the year ended December 31, 2011 in connection with the Forward Agreements. The only impact to the Condensed Consolidated Financial Statements (unaudited) is the inclusion of incremental shares within the calculation of fully diluted EPS under the treasury stock method. Refer to Note 3, Earnings Per Share, for additional information.

5. Gas in Storage

Both the LIFO inventory methodology and the weighted average cost methodology are used to value natural gas in storage. Gas Distribution Operations price natural gas storage injections at the average of the costs of natural gas supply purchased during the year. For interim periods, the difference between current projected replacement cost and the LIFO cost for quantities of gas temporarily withdrawn from storage is recorded as a temporary LIFO liquidation credit or debit within the Condensed Consolidated Balance Sheets (unaudited). Due to seasonality requirements, NiSource expects interim variances in LIFO layers to be replenished by year-end. NiSource has a temporary LIFO liquidation debit of \$21.7 million recorded for the three months ended March 31, 2012 for certain gas distribution companies recorded within Prepayments and other, on the Condensed Consolidated Balance Sheets (unaudited).

6. Discontinued Operations and Assets and Liabilities Held for Sale

There were no significant assets or liabilities of discontinued operations and held for sale on the Condensed Consolidated Balance Sheets at March 31, 2012 and December 31, 2011.

Results from discontinued operations, which primarily arise from changes in estimate for certain liabilities for NiSource's former exploration and production subsidiary, CER, are provided in the following table:

Three Months Ended March 31, <i>(in millions)</i>	2012	2011
Revenues from Discontinued Operations	\$ -	\$ -
(Loss) Income from discontinued operations	(0.2)	0.6
Income tax (benefit) expense	(0.1)	0.2
(Loss) Income from Discontinued Operations - net of taxes	\$ (0.1)	\$ 0.4
Gain on Disposition of Discontinued Operations - net of taxes	\$ -	\$ -

7. Asset Retirement Obligations

Certain costs of removal that have been, and continue to be, included in depreciation rates and collected in the service rates of the rate-regulated subsidiaries are classified as Regulatory liabilities and other removal costs on the Condensed Consolidated Balance Sheets (unaudited).

Changes in NiSource's liability for asset retirement obligations for the three months ended March 31, 2012 and 2011 are presented in the table below:

<i>(in millions)</i>	2012	2011
Balance as of January 1,	\$ 146.4	\$ 138.8

Edgar Filing: NISOURCE INC/DE - Form 10-Q

Accretion expense		0.2		0.2
Accretion recorded as a regulatory asset/liability		2.1		1.7
Settlements		(0.3)		(0.6)
Balance as of March 31,		\$ 148.4	\$	140.1

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

8. Regulatory Matters

Gas Distribution Operations Regulatory Matters

Significant Rate Developments. On June 27, 2011, Northern Indiana filed a settlement agreement with the IURC in which regulatory stakeholders agreed that Northern Indiana should adopt the WACOG accounting methodology instead of LIFO, Northern Indiana's historical method. On August 31, 2011, the IURC approved the settlement and Northern Indiana transitioned to WACOG accounting methodology beginning January 1, 2012.

On March 15, 2012, the IURC approved a settlement agreement with Northern Indiana and all participating parties to extend its product and services contained in its current gas ARP indefinitely.

On January 14, 2011, Columbia of Pennsylvania filed a base rate case with the Pennsylvania PUC, seeking a revenue increase of approximately \$37.8 million annually. The parties jointly filed a petition for approval of a partial settlement on July 1, 2011. The partial settlement resolved all issues except residential rate design and a challenge to the structure of one of Columbia of Pennsylvania's customer programs. The settlement provides for an annual revenue increase of \$17 million. The Pennsylvania PUC issued an order on October 14, 2011 approving the annual revenue increase of \$17 million. New rates went into effect on October 18, 2011. The Pennsylvania PUC's ruling increased the minimum residential customer charge from \$12.25 to \$18.73, which includes an allowance for 20 Ccf of distribution charges. However, the customer pays for gas commodity on all usage.

On November 12, 2010, Columbia of Pennsylvania filed a petition for an order authorizing the company to revise its accounting methodology for the gas it holds in storage. Columbia of Pennsylvania had historically used Last-In First-Out (LIFO) accounting but sought permission to move to a Weighted Average Cost of Gas (WACOG) accounting methodology as a means of simplifying regulatory accounting and to realize the value of low-cost gas injected into storage decades ago. On February 4, 2011, Columbia of Pennsylvania filed a settlement agreement with the Pennsylvania PUC in which regulatory stakeholders agreed that Columbia of Pennsylvania should adopt the WACOG accounting methodology and provide the benefit of the low-cost gas supplies to its customers. On March 31, 2011, the Pennsylvania PUC approved the settlement and Columbia of Pennsylvania began to provide the projected benefit as a credit to its customers as a reduction to the Gas Cost Recovery rate. The credit to customers of \$43.8 million was totally refunded by September 2011.

On September 29, 2010, Columbia of Pennsylvania filed tariff modifications with the Pennsylvania PUC, seeking permission to apply a BTU content billing adjustment to customers' metered volumetric consumption. The filing sought to account for high BTU content gas that is produced from Marcellus Shale, which burns hotter than gas from other sources, resulting in lower volumes than assumed in the design of the Columbia of Pennsylvania's rates. The proposed billing adjustment was designed to produce revenues reflective of the BTU content underlying the demand forecast in the design of Columbia of Pennsylvania's most recently approved base rates by synchronizing the BTU content used for billing with the BTU content used for rate design. If the billing adjustment had been in place for the twelve months ended June 30, 2010, it would have produced additional revenues of approximately \$3.7 million due to the difference between the BTU value used in the design of the recently approved rates and the actual BTU value at the time of billing. By an Order entered on January 26, 2011, the Pennsylvania PUC consolidated this matter with Columbia of Pennsylvania's base rate case filed on January 14, 2011. As described above, on October 14, 2011, the Pennsylvania PUC approved a partial settlement of the base rate case. The partial settlement resolved the issue of BTU content whereby the parties agreed that Columbia of Pennsylvania would convert from usage-based billing to heat content billing by no later than the June 2012 billing cycle. Columbia of Pennsylvania began heat content billing, with a therm billing unit, on January 31, 2012.

On May 19, 2008 Columbia of Ohio filed an application with the PUCO to defer environmental remediation expenses. On September 24, 2008, the PUCO approved the application. Each year COH must report on the amounts deferred during the previous year. On December 6, 2011, COH filed its annual deferral report for the twelve months ended November 30, 2011. PUCO Staff filed its Comments on January 5, 2012, and objected to deferral of costs for a Toledo remediation project. As suggested by PUCO Staff, Columbia of Ohio capitalized \$2.4 million in costs associated with the Toledo project which will be proposed for recovery as a component of future rate base.

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

Columbia of Massachusetts filed an application to implement its Targeted Infrastructure Reinvestment Factor (TIRF) on April 30, 2010. On October 29, 2010, the Massachusetts DPU approved Columbia of Massachusetts proposed adjustment factor, to take effect November 1, 2010, subject to further investigation and reconciliation. On April 29, 2011, Columbia of Massachusetts filed its second annual application of its TIRF tracker for DPU approval for new rates to go into effect November 1, 2011. On October 31, 2011, the Massachusetts DPU approved Columbia of Massachusetts proposed adjustment factor subject to further investigation and reconciliation. On September 16, 2010, Columbia of Massachusetts filed a petition for approval to implement its first semi-annual revenue decoupling adjustment factor (RDAF) for the Peak Period. That adjustment, which took effect on November 1, 2010, subject to further review and reconciliation, was approved by the DPU on March 23, 2011. Columbia of Massachusetts filed its application for approval of its Off-peak Period RDAF on March 15, 2011. The rate took effect on May 1, 2011, subject to further review and reconciliation by the DPU. On September 15, 2011, Columbia of Massachusetts filed a petition for approval of its second Peak Period RDAF, with a proposed effective date of November 1, 2011. On October 31, 2011, the Massachusetts DPU approved Columbia of Massachusetts proposed adjustment factor subject to further investigation and reconciliation. On March 19, 2012, Columbia of Massachusetts filed its Off-Peak RDAF to take effect May 1, 2012. The filing is under review by the Massachusetts DPU.

On April 13, 2012, Columbia of Massachusetts submitted a filing with the Massachusetts DPU requesting an annual revenue requirement increase of \$29.2 million. Columbia of Massachusetts filed using a historic test year ending December 31, 2011. Additionally, Columbia of Massachusetts proposed rate-year, rate base treatment, as well as modification to the TIRF. The rate-year, rate base treatment has been proposed to reduce the impact of regulatory lag. An order is expected later this year, with new rates going into effect on November 1, 2012.

On January 30, 2009, Columbia of Ohio filed an application with the PUCO to implement a gas supply auction. The auction replaced Columbia of Ohio s current GCR mechanism for providing commodity gas supplies to its sales customers. By Order dated December 2, 2009, the PUCO approved a stipulation that resolved all issues in the case. Pursuant to the stipulation, Columbia of Ohio conducted two consecutive one-year long standard service offer auction periods starting April 1, 2010 and April 1, 2011. On February 23, 2010, Columbia of Ohio held the first standard service offer auction which resulted in a final retail price adjustment of \$1.93 per Mcf. On February 24, 2010 the PUCO issued an entry that approved the results of the auction and directed Columbia of Ohio to proceed with the implementation of the standard service offer process. On February 8, 2011, Columbia of Ohio held its second standard service offer auction which resulted in a retail price adjustment of \$1.88 per Mcf. On February 9, 2011, the PUCO issued an entry that approved the results of the auction with the new retail price adjustment to become effective April 1, 2011. Several parties challenged the transition from a standard service offer auction to a standard choice offer auction and on September 7, 2011, the PUCO issued an Order authorizing Columbia of Ohio to implement a standard choice offer auction in February 2012. On October 7, 2011, the OCC filed an application for rehearing of the PUCO s Order. By Entry on Rehearing dated November 1, 2011, the PUCO denied the OCC s Application for Rehearing. On February 14, 2012, Columbia of Ohio held its first standard choice offer auction which resulted in a retail price adjustment of \$1.53 per Mcf. On February 14, 2012, the PUCO issued an entry that approved the results of the auction with the new retail price adjustment to become effective April 1, 2012. With the implementation of the standard choice offer, Columbia of Ohio will report lower gross revenues and lower cost of sales. There is no impact on net revenues.

On October 3, 2011, Columbia of Ohio filed an application with PUCO, requesting authority to defer incurred charges to a regulatory asset for debt-based post-in-service carrying charges, depreciation and property taxes associated with Columbia of Ohio s capital program. Interested parties filed comments on Columbia of Ohio s application by February 17, 2012. Columbia of Ohio filed Reply Comments on February 27, 2012.

On November 30, 2011 Columbia of Ohio filed a Notice of Intent to file an application to adjust rates associated with Rider IRP and Rider DSM. On February 28, 2012, Columbia of Ohio filed its application to adjust rates associated with IRP and DSM Riders. The DSM Rider tracks and recovers costs associated with Columbia of Ohio s energy efficiency and conservation programs. The application sought to increase the annual revenue from the riders by approximately \$27.9 million. On April 10, 2012, Columbia of Ohio reached a settlement with parties allowing for an increase in annual revenue from the Riders of approximately \$27 million. It is anticipated that the PUCO will approve the settlement to become effective May 1, 2012.

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

On December 9, 2011 Columbia of Ohio filed a Notice of Intent to file an application to extend its Infrastructure Replacement Program. On January 6, 2012, the OCC filed a Memorandum Contra, arguing that Columbia of Ohio's base rates should be reviewed as part of the IRP extension process. Columbia of Ohio filed a Reply Memorandum on January 11, 2012. Columbia of Ohio filed an amended Notice of Intent and an amended Motion for Waiver on March 5, 2012.

On April 19, 2012, Columbia of Ohio filed an application that requests authority to increase its uncollectible expense rider rate in order to generate an additional \$14.6 million in annual revenue in order to offset anticipated increases in uncollectible expenses.

Cost Recovery and Trackers. A significant portion of the distribution companies' revenue is related to the recovery of gas costs, the review and recovery of which occurs via standard regulatory proceedings. All states require periodic review of actual gas procurement activity to determine prudence and to permit the recovery of prudently incurred costs related to the supply of gas for customers. NiSource distribution companies have historically been found prudent in the procurement of gas supplies to serve customers.

Certain operating costs of the NiSource distribution companies are significant, recurring in nature, and generally outside the control of the distribution companies. Some states allow the recovery of such costs via cost tracking mechanisms. Such tracking mechanisms allow for abbreviated regulatory proceedings in order for the distribution companies to implement charges and recover appropriate costs. Tracking mechanisms allow for more timely recovery of such costs as compared with more traditional cost recovery mechanisms. Examples of such mechanisms include GCR adjustment mechanisms, tax riders, and bad debt recovery mechanisms.

Comparability of Gas Distribution Operations line item operating results is impacted by regulatory trackers that allow for the recovery in rates of certain costs such as bad debt expenses. Increases in the expenses that are the subject of trackers, result in a corresponding increase in net revenues and therefore have essentially no impact on total operating income results.

Certain of the NiSource distribution companies have completed rate proceedings involving infrastructure replacement or are embarking upon regulatory initiatives to replace significant portions of their operating systems that are nearing the end of their useful lives. Each LDC's approach to cost recovery may be unique, given the different laws, regulations and precedent that exist in each jurisdiction.

Gas Transmission and Storage Operations Regulatory Matters

Columbia Gulf Rate Case. On October 28, 2010, Columbia Gulf filed a rate case with the FERC, proposing a rate increase and tariff changes. Among other things, the filing proposed a revenue increase of approximately \$50 million to cover increases in the cost of services, which includes adjustments for operation and maintenance expenses, capital investments, adjustments to depreciation rates and expense, rate of return, and increased federal, state and local taxes. On November 30, 2010, the FERC issued an Order allowing new rates to become effective by May 2011, subject to refund. Columbia Gulf placed new rates into effect, subject to refund, on May 1, 2011. Columbia Gulf and the active parties to the case negotiated a settlement, which was filed with the FERC on September 9, 2011. On September 30, 2011, the Chief Judge severed the issues relating to a contesting party for separate hearing and decision. On October 4, 2011, the Presiding Administrative Law Judge certified the settlement agreement as uncontested to the FERC with severance of the contesting party from the settlement. On November 1, 2011, Columbia Gulf began billing interim rates to customers. On December 1, 2011, the FERC issued an order approving the settlement without change. The key elements of the settlement, which was a "black box agreement", include: (1) increased base rate to \$0.1520 per Dth and (2) establishing a postage stamp rate design. No protests to the order were filed and therefore, pursuant to the Settlement, the order became final on January 1, 2012 which made the settlement effective on February 1, 2012. On February 2, 2012, the Presiding Administrative Law Judge issued an initial decision granting a joint motion terminating the remaining litigation with the contesting party and allowing it to become a settling party. The FERC issued an order on March 15, 2012, affirming the initial decision, which terminated the remaining litigation with the contesting party. Refunds of approximately \$16 million, accrued as of December 31, 2011, were disbursed to settling parties in March 2012.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)**Electric Operations Regulatory Matters**

Significant Rate Developments. On July 18, 2011, Northern Indiana filed with the IURC a settlement in its 2010 Electric Rate Case with the OUCC, Northern Indiana Industrial Group, NLMK Indiana and Indiana Municipal Utilities Group. The settlement agreement limited the proposed base rate impact to the residential customer class to a 4.5% increase. The parties have also agreed to a rate of return of 6.98% based upon a 10.2% return on equity. The settlement also resolves all pending issues related to compliance with the August 25, 2010 Order in the 2008 Electric Rate Case. On December 21, 2011, the IURC issued an Order approving the Settlement Agreement as filed, and new electric base rates became effective on December 27, 2011. On January 20, 2012, the City of Hammond filed an appeal of the IURC's December 21, 2011 Order. That appeal is pending.

During 2002, Northern Indiana settled certain regulatory matters related to an electric rate review. On September 23, 2002, the IURC issued an Order adopting most aspects of the settlement. The Order approving the settlement provided that certain electric customers of Northern Indiana would receive bill credits of approximately \$55.1 million each year. The credits continued at approximately the same annual level and per the same methodology, until the IURC approval and implementation of new customer rates, which occurred on December 27, 2011. A final reconciliation of the credits will occur in a future fuel cost filing according to the terms of the approved settlement in the 2010 Electric Rate Case. Credits amounting to \$(0.9) million and \$13.0 million were recognized for electric customers for the first quarter of 2012 and 2011, respectively.

On December 9, 2009, the IURC issued an Order in its generic DSM investigation proceeding establishing an overall annual energy savings goal of 2% to be achieved by Indiana jurisdictional electric utilities in 10 years, with interim savings goals established in years one through nine. On May 25, 2011, the IURC issued an Order approving a tracker mechanism to recover the costs associated with these energy efficiency programs. On July 27, 2011, the IURC issued an Order approving the energy efficiency programs. On February 1, 2012, Northern Indiana submitted a petition to the IURC to recover lost margins, and an evidentiary hearing is scheduled for July 31, 2012.

Cost Recovery and Trackers. A significant portion of Northern Indiana's revenue is related to the recovery of fuel costs to generate power and the fuel costs related to purchased power. These costs are recovered through a FAC, a standard, quarterly, summary regulatory proceeding in Indiana.

As part of a multi-state effort to strengthen the electric transmission system serving the Midwest, Northern Indiana anticipates making an investment in a new, 100-mile, 345-kilovolt transmission project in northern Indiana. The project, a major new transmission system improvement reviewed and authorized by the MISO, is scheduled to be in service during the latter part of the decade. On March 16, 2012, Northern Indiana filed with the FERC for incentives for this transmission project, including all construction work in progress in rate base. Northern Indiana has also been identified by the MISO as one of two Transmission Owners to invest in another project. On February 8, 2012, Pioneer Transmission, LLC filed a complaint with the FERC, seeking to obtain 100 percent of the investment rights in this second project. The last Response was filed by Northern Indiana on March 27, 2012.

In the Order issued on August 25, 2010, the IURC approved an RTO tracker for recovery of MISO non-fuel costs and revenues and off-system sales sharing and ordered that purchased power costs and fuel-related MISO charge types be recovered in the FAC. The IURC also approved a purchase capacity tracker referred to as the RA Tracker. Similar treatment was requested in the 2010 Electric Rate Case filing and approved in the December 21, 2011 Order approving the Settlement Agreement. The implementation of such trackers coincides with the implementation of new customer rates. Northern Indiana made its first filings for recovery of costs under the RTO and RA mechanisms on February 2, 2012. The RTO filing also seeks authorization from the IURC to retain certain revenues under MISO Schedule 26-A to support investments in Northern Indiana's Multi-Value Projects under MISO's 2011 transmission expansion plan. On April 10, 2012, the IURC approved a procedural schedule to consider the retention of MISO Schedule 26-A revenues. The hearing date is set for May 14, 2012.

As part of the August 25, 2010 Order, a new purchase power benchmark became effective. This purchase power benchmark superseded the one made effective by a settlement in October 2007. The benchmark is based upon the costs of power generated by a hypothetical natural gas fired unit using gas purchased and delivered to Northern Indiana. During the quarters ended March 31, 2012 and 2011, no purchased power costs

exceeded the benchmark.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

On March 22, 2011, Northern Indiana filed a petition with the IURC for a certificate of public convenience and necessity and associated relief for the construction of additional environmental projects required to comply with the NOV consent decree lodged in the United States District Court for the Northern District of Indiana on January 13, 2011. Refer to Note 19-C, Environmental Matters, for additional information. This petition has since been trifurcated into three separate phases. On December 28, 2011, the IURC issued an order for the Phase I projects estimated to cost \$500 million and granting the requested ratemaking and accounting relief associated with these Phase I projects. On February 15, 2012, the IURC issued an order for the Phase II projects. The proposed construction of a FGD unit on Michigan City Generating Station Unit 12 is the subject of Phase III of this proceeding. On February 14, 2012, the IURC issued a procedural schedule for the Phase III projects, which includes an evidentiary hearing scheduled on May 10, 2012.

On February 7, 2012, Northern Indiana filed ECR-19 and EER-9, the filing implementing the ECT, which included \$109.6 million of net capital expenditures and operation and maintenance and depreciation expenses of \$32.6 million for the period ended December 31, 2011.

9. Risk Management Activities

NiSource is exposed to certain risks relating to its ongoing business operations. The primary risks managed by using derivative instruments are commodity price risk and interest rate risk. Derivative natural gas contracts are entered into to manage the price risk associated with natural gas price volatility and to secure forward natural gas prices. Interest rate swaps are entered into to manage interest rate risk associated with NiSource's fixed-rate borrowings. NiSource designates some of its commodity forward contracts as cash flow hedges of forecasted purchases of commodities and designates its interest rate swaps as fair value hedges of fixed-rate borrowings. Additionally, certain NiSource subsidiaries enter into forward physical contracts with various third parties to procure or sell natural gas or power. Certain forward physical contracts are derivatives which qualify for the normal purchase and normal sales exception which do not require mark-to-market accounting.

Accounting Policy for Derivative Instruments. The ASC topic on accounting for derivatives and hedging requires an entity to recognize all derivatives as either assets or liabilities on the Consolidated Balance Sheets at fair value, unless such contracts are exempted such as a normal purchase and normal sale contract under the provisions of the ASC topic. The accounting for changes in the fair value of a derivative depends on the intended use of the derivative and resulting designation.

NiSource uses a variety of derivative instruments (exchange traded futures and options, physical forwards and options, basis contracts, financial commodity swaps, and interest rate swaps) to effectively manage its commodity price risk and interest rate risk exposure. If certain conditions are met, a derivative may be specifically designated as (a) a hedge of the exposure to changes in the fair value of a recognized asset or liability or an unrecognized firm commitment, or (b) a hedge of the exposure to variable cash flows of a forecasted transaction. In order for a derivative contract to be designated as a hedge, the relationship between the hedging instrument and the hedged item or transaction must be highly effective. The effectiveness test is performed at the inception of the hedge and each reporting period thereafter, throughout the period that the hedge is designated. Any amounts determined to be ineffective are recognized currently in earnings. For derivative contracts that qualify for the normal purchase and normal sales exception, a contract's fair value is not recognized in the Consolidated Financial Statements until the contract is settled.

Unrealized and realized gains and losses are recognized each period as components of AOCI, regulatory assets and liabilities or earnings depending on the designation of the derivative instrument. For subsidiaries that utilize derivatives for cash flow hedges, the effective portions of the gains and losses are recorded to AOCI and are recognized in earnings concurrent with the disposition of the hedged risks. If a forecasted transaction corresponding to a cash flow hedge is no longer probable to occur, the accumulated gains or losses on the derivative are recognized currently in earnings. For fair value hedges, the gains and losses are recorded in earnings each period together with the change in the fair value of the hedged item. As a result of the rate-making process, the rate-regulated subsidiaries generally record gains and losses as regulatory liabilities or assets and recognize such gains or losses in earnings when both the contracts settle and the physical commodity flows. These gains and losses recognized in earnings are then subsequently recovered or passed back to customers in revenues through rates. When gains and losses are recognized in earnings, they are recognized in revenues or cost of sales for derivatives that correspond to commodity risk activities and are recognized in interest expense for derivatives that correspond to interest-rate risk activities.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

NiSource has elected not to net fair value amounts for its derivative instruments or the fair value amounts recognized for its right to receive cash collateral or obligation to pay cash collateral arising from those derivative instruments recognized at fair value, which are executed with the same counterparty under a master netting arrangement. NiSource discloses amounts recognized for the right to reclaim cash collateral within Restricted cash and amounts recognized for the right to return cash collateral within Other accruals on the Consolidated Balance Sheets.

Commodity Price Risk Programs. NiSource and NiSource's utility customers are exposed to variability in cash flows associated with natural gas purchases and volatility in natural gas prices. NiSource purchases natural gas for sale and delivery to its retail, commercial and industrial customers, and for most customers the variability in the market price of gas is passed through in their rates. Some of NiSource's utility subsidiaries offer programs where variability in the market price of gas is assumed by the respective utility. The objective of NiSource's commodity price risk programs is to mitigate this gas cost variability, for NiSource or on behalf of its customers, associated with natural gas purchases or sales by economically hedging the various gas cost components by using a combination of futures, options, forward physical contracts, basis swap contracts or other derivative contracts. Northern Indiana also uses derivative contracts to minimize risk associated with power price volatility. These commodity price risk programs and their respective accounting treatment are described below.

Northern Indiana, Columbia of Pennsylvania, Columbia of Kentucky, Columbia of Maryland and Columbia of Virginia use NYMEX futures and NYMEX options to minimize risk associated with gas price volatility. These derivative programs must be marked to fair value, but because these derivatives are used within the framework of the companies' GCR or FAC mechanism, regulatory assets or liabilities are recorded to offset the change in the fair value of these derivatives.

Northern Indiana and Columbia of Virginia offer a fixed price program as an alternative to the standard GCR mechanism. These services provide certain customers with the opportunity to either lock in their gas cost or place a cap on the gas costs that would be charged in future months. In order to hedge the anticipated physical purchases associated with these obligations, forward physical contracts, NYMEX futures and NYMEX options are used to secure forward gas prices. The accounting treatment elected for these contracts is varied in that certain of these contracts have been accounted for as cash flow hedges while some contracts are not. The accounting treatment is based on the election of the company. The normal purchase and normal sales exception is elected for forward physical contracts associated with these programs where delivery of the commodity is probable to occur.

Northern Indiana also offers a Depend-a-Bill program to its customers as an alternative to the standard tariff rate that is charged to residential customers. The program allows Northern Indiana customers to fix their total monthly bill in future months at a flat rate regardless of gas usage or commodity cost. In order to hedge the anticipated physical purchases associated with these obligations, forward physical contracts, NYMEX futures and NYMEX options have been used to secure forward gas prices. The normal purchase and normal sales exception is elected for forward physical contracts associated with these programs where delivery of the commodity is probable to occur.

Northern Indiana enters into gas purchase contracts at first of the month prices that give counterparties the daily option to either sell an additional package of gas at first of the month prices or recall the original volume to be delivered. Northern Indiana charges a fee for this option. The changes in the fair value of these options are primarily due to the changing expectations of the future intra-month volatility of gas prices. These written options are derivative instruments, must be marked to fair value and do not meet the requirement for hedge accounting treatment. However, Northern Indiana records the related gains and losses associated with these transactions as a regulatory asset or liability.

Columbia of Kentucky, Columbia of Ohio and Columbia of Pennsylvania enter into contracts that allow counterparties the option to sell gas to them at first of the month prices for a particular month of delivery. These Columbia LDCs charge the counterparties a fee for this option. The changes in the fair value of the options are primarily due to the changing expectations of the future intra-month volatility of gas prices. These Columbia LDCs defer a portion of the change in the fair value of the options as either a regulatory asset or liability based on the regulatory customer sharing mechanisms in place, with the remaining changes in fair value recognized currently in earnings.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)****NiSOURCE INC.****Notes to Condensed Consolidated Financial Statements (unaudited) (continued)**

As part of the MISO Day 2 initiative, Northern Indiana was allocated or has purchased FTRs. These FTRs help Northern Indiana offset congestion costs due to the MISO Day 2 activity. The FTRs are marked to fair value and are not accounted for as a hedge, but since congestion costs are recoverable through the fuel cost recovery mechanism, the related gains and losses associated with marking these derivatives to market are recorded as a regulatory asset or liability. In the second quarter of 2008, MISO changed its allocation procedures from an allocation of FTRs to an allocation of ARRs, whereby Northern Indiana was allocated ARRs based on its historical use of the MISO administered transmission system. ARRs entitle the holder to a stream of revenues or charges based on the price of the associated FTR in the FTR auction, so ARRs can be used to purchase FTRs in the FTR auction. ARRs are not derivatives.

NiSource is in the process of winding down its unregulated natural gas marketing business, where gas financial contracts are utilized to economically hedge expected future gas purchases associated with forward gas agreements. These financial contracts, as well as the associated forward physical sales contracts, are derivatives and are marked-to-market with all associated gains and losses recognized to income. NiSource established a reserve of \$3.5 million and \$25.6 million against certain derivatives as of March 31, 2012 and December 31, 2011, respectively. This amount represents reserves related to the creditworthiness of certain customers, fair value of future cash flows, and the cost of maintaining significant amounts of restricted cash. The physical sales contracts marked-to-market had a fair value of approximately \$72.9 million at March 31, 2012 and \$136.8 million at December 31, 2011, while the financial derivative contracts marked-to-market had a fair value loss of \$115.8 million at March 31, 2012, and \$155.5 million at December 31, 2011. During the fourth quarter of 2011, NiSource recorded a reserve of \$22.6 million on certain assets related to the wind down of the unregulated natural gas marketing business. During the first quarter of 2012, NiSource settled a majority of the contracts related to the reserve noted above. As a result, NiSource wrote off \$43.8 million of price risk assets and recorded notes receivable of \$20.7 million.

On October 31, 2011, cash and derivatives broker-dealer MF Global filed for Chapter 11 bankruptcy protection. MF Global brokered NYMEX hedges of natural gas futures on behalf of NiSource affiliates. At the date of bankruptcy, NiSource affiliates had contracts open with MF Global with settlement dates ranging from November 2011 to February 2014. On November 3, 2011, these contracts were measured at a mark-to-market loss of approximately \$46.4 million. NiSource affiliates had posted initial margin to open these accounts of \$6.9 million and additional maintenance margin for mark-to-market losses, for a total cash balance of \$53.3 million. Within the first week after the filing, at the direction of the Bankruptcy Court, a transfer of assets was initiated on behalf of NiSource affiliates to a court-designated replacement broker for future trade activity. The existing futures positions were closed and then rebooked with the replacement broker at the new closing prices as of November 3, 2011. Initial margin on deposit at MF Global of \$5.7 million was transferred to the court-designated replacement broker. The maintenance margin was retained by MF Global to offset the loss positions of the open contracts on November 3, 2011. NiSource affiliates are monitoring the activity in the bankruptcy case and have filed a proof of claim at the Court's direction. As of March 31, 2012, NiSource affiliates maintained a reserve for the \$1.2 million difference between the initial margin posted with MF Global and the cash transferred to the court-designated replacement broker as a loss contingency.

Interest Rate Risk Activities. NiSource recognizes that the prudent and selective use of derivatives may help it to lower its cost of debt capital and manage its interest rate exposure. NiSource Finance has entered into various receive fixed and pay floating interest rate swap agreements which modify the interest rate characteristics of a portion of its outstanding long-term debt from fixed to variable rate. These interest rate swaps also serve to hedge the fair market value of NiSource Finance's outstanding debt portfolio. As of March 31, 2012, NiSource had \$6.6 billion of outstanding fixed rate debt, of which \$500.0 million is subject to fluctuations in interest rates as a result of the fixed-to-variable interest rate swap transactions. These interest rate swaps are designated as fair value hedges. NiSource had no net gain or loss recognized in earnings due to hedging ineffectiveness for the three months ended March 31, 2012 and 2011.

On July 22, 2003, NiSource Finance entered into fixed-to-variable interest rate swap agreements in a notional amount of \$500 million with four counterparties with an 11-year term. NiSource Finance receives payments based upon a fixed 5.40% interest rate and pays a floating interest amount based on U.S. 6-month BBA LIBOR plus an average of 0.78% per annum. There was no exchange of premium at the initial date of the swaps. In addition, each party has the right to cancel the swaps on July 15, 2013.

Contemporaneously with the issuance on September 16, 2005 of \$1 billion of its 5.25% and 5.45% notes, maturing September 15, 2017 and 2020, respectively, NiSource Finance settled \$900 million of forward starting interest rate swap agreements with six counterparties. NiSource paid an aggregate settlement payment of \$35.5 million which is being amortized from AOCI to interest expense over the term of the underlying debt, resulting in an effective interest rate of 5.67% and 5.88%, respectively. As of March 31, 2012, AOCI includes \$10.9 million related to forward starting interest rate swap settlement, net of tax. These derivative contracts are accounted for as a cash flow hedge.

As of March 31, 2012, NiSource holds a 47.5% interest in Millennium. As NiSource reports Millennium as an equity method investment, NiSource is required to recognize a proportional share of Millennium's OCI. NiSource's proportionate share of the remaining unrealized loss associated with a settled interest rate swap is \$19.4 million, net of tax, as of March 31, 2012. Millennium is amortizing the unrealized loss related to these terminated interest rate swaps into earnings using the effective interest method through interest expense as interest payments are made. NiSource records its proportionate share of the amortization as Equity Earnings in Unconsolidated Affiliates in the Condensed Statements of Consolidated Income (unaudited).

* For the amounts of realized/unrealized gain (loss) recognized in income on derivatives disclosed in the table above, losses of \$19.8 million and \$22.6 million for the first quarter of 2012 and 2011, respectively, were deferred as allowed per regulatory orders. These amounts will be amortized to income over future periods of up to twelve months as specified in a regulatory order.

NiSource's derivative instruments measured at fair value as of March 31, 2012 and December 31, 2011 do not contain any credit-risk-related contingent features.

Certain NiSource affiliates have physical commodity purchase agreements that contain ratings triggers that require increases in collateral if the credit rating of NiSource or certain of its affiliates are rated below BBB- by Standard & Poor's or below Baa3 by Moody's. These agreements are primarily for the physical purchase or sale of natural gas and electricity. The collateral requirement from a downgrade below the ratings trigger levels would amount to approximately \$2.1 million. In addition to agreements with ratings triggers, there are some agreements that contain adequate assurance or material adverse change provisions that could result in additional credit support such as letters of credit and cash collateral to transact business.

NiSource had \$148.2 million and \$158.2 million of cash on deposit with brokers for margin requirements associated with open derivative positions reflected within Restricted cash on the Condensed Consolidated Balance Sheets (unaudited) as of March 31, 2012 and December 31, 2011, respectively.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

(a) During the fourth quarter of 2011, NiSource recorded a reserve of \$22.6 million on certain assets related to the wind down of the unregulated natural gas marketing business. The financial price risk program amount above is shown gross and has not been adjusted for the reserve.

Price risk management assets and liabilities include commodity exchange-traded and non-exchange-based derivative contracts. Exchange-traded derivative contracts are generally based on unadjusted quoted prices in active markets and are classified within Level 1. These financial assets and liabilities are secured with cash on deposit with the exchange; therefore nonperformance risk has not been incorporated into these valuations. Certain non-exchange-traded derivatives are valued using broker or over-the-counter, on-line exchanges. In such cases, these non-exchange-traded derivatives are classified within Level 2. Non-exchange-based derivative instruments include swaps, forwards, and options. In certain instances, these instruments may utilize models to measure fair value. NiSource uses a similar model to value similar instruments. Valuation models utilize various inputs that include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, other observable inputs for the asset or liability, and market-corroborated inputs, i.e., inputs derived principally from or corroborated by observable market data by correlation or other means. Where observable inputs are available for substantially the full term of the asset or liability, the instrument is categorized in Level 2. Certain derivatives trade in less active markets with a lower availability of pricing information and models may be utilized in the valuation. When such inputs have a significant impact on the measurement of fair value, the instrument is categorized in Level 3. Credit risk is considered in the fair value calculation of derivative instruments that are not exchange-traded. Credit exposures are adjusted to reflect collateral agreements which reduce exposures. As of March 31, 2012 and 2011, there were no material transfers between fair value hierarchies. Additionally there were no changes in the method or significant assumptions used to estimate the fair value of NiSource's financial instruments.

To determine the fair value of derivatives associated with NiSource's unregulated natural gas marketing business, certain reserves were calculated. These reserves were primarily determined by evaluating the credit worthiness of certain customers, fair value of future cash flows, and the cost of maintaining restricted cash. Refer to Note 9, Risk Management Activities for additional information on price risk assets.

Price risk management assets also include fixed-to-floating interest-rate swaps, which are designated as fair value hedges, as a means to achieve NiSource's targeted level of variable-rate debt as a percent of total debt. NiSource uses a calculation of future cash inflows and estimated future outflows related to the swap agreements, which are discounted and netted to determine the current fair value. Additional inputs to the present value calculation include the contract terms, as well as market parameters such as current and projected interest rates and volatility. As they are based on observable data and valuations of similar instruments, the interest-rate swaps are categorized in Level 2 in the fair value hierarchy. Credit risk is considered in the fair value calculation of the interest rate swap.

Available-for-sale securities are investments pledged as collateral for trust accounts related to NiSource's wholly-owned insurance company. Available-for-sale securities are included within Other investments in the Condensed Consolidated Balance Sheets (unaudited). Securities classified within Level 1 include U.S. Treasury debt securities which are highly liquid and are actively traded in over-the-counter markets. NiSource values corporate and mortgage-backed debt securities using a matrix pricing model that incorporates market-based information. These securities trade less frequently and are classified within Level 2. Total gains and losses from available-for-sale securities are included in other comprehensive income (loss). The amortized cost, gross unrealized gains and losses, and fair value of available-for-sale debt securities at March 31, 2012 and December 31, 2011 were:

<i>(in millions)</i>	Amortized Cost	Total Gains	Total Losses	Fair Value
Available-for-sale debt securities, March 31, 2012				
U.S. Treasury	\$ 33.9	\$ 1.4	\$ -	\$ 35.3
Corporate/Other	59.5	1.8	(0.1)	61.2
Total Available-for-sale debt securities	\$ 93.4	\$ 3.2	\$ (0.1)	\$ 96.5

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

<i>(in millions)</i>	Amortized Cost	Total Gains	Total Losses	Fair Value
Available-for-sale debt securities, December 31, 2011				
U.S. Treasury	\$ 36.7	\$ 1.7	\$ -	\$ 38.4
Corporate/Other	56.3	1.6	(0.3)	57.6
Total Available-for-sale debt securities	\$ 93.0	\$ 3.3	\$ (0.3)	\$ 96.0

For the three months ended March 31, 2012 and 2011, the net realized gain on the sale of available-for-sale U.S. Treasury debt securities was zero and \$0.1 million, respectively. For the three months ended March 31, 2012 and 2011, the net realized gain on sale of available-for-sale Corporate/Other bond debt securities was zero and \$0.5 million, respectively.

The cost of maturities sold is based upon specific identification. At March 31, 2012, all of the U.S. Treasury debt securities have maturities of greater than one year. At March 31, 2012, approximately \$1.2 million of Corporate/Other bonds have maturities of less than a year while the remaining securities have maturities of greater than one year.

The following tables present the fair value reconciliation of Level 3 assets and liabilities measured at fair value on a recurring basis for the three months ended March 31, 2012 and 2011:

<i>Three Months Ended March 31, 2012 (in millions)</i>	Other Derivatives
Balance as of January 1, 2012	\$ 0.3
Total gains or (losses) (unrealized/realized)	(0.2)
Included in regulatory assets/liabilities	0.1
Balance as of March 31, 2012	\$ -
Change in unrealized gains/(losses) relating to instruments still held as of March 31, 2012	\$ -

<i>Three Months Ended March 31, 2011 (in millions)</i>	Other Derivatives
Balance as of January 1, 2011	\$ 0.2
Total gains or losses (unrealized/realized)	(0.4)
Included in regulatory assets/liabilities	(0.4)
Purchases	0.5
Settlements	(0.1)
Balance as of March 31, 2011	\$ (0.9)
Change in unrealized gains/(losses) relating to instruments still held as of March 31, 2011	\$ (0.9)

Non-recurring Fair Value Measurements. There were no significant non-recurring fair value measurements recorded during the three months ended March 31, 2012 and 2011.

B. Other Fair Value Disclosures for Financial Instruments. NiSource has certain financial instruments that are not measured at fair value on a recurring basis but nevertheless are recorded at amounts that approximate fair value due to their liquid or short-term nature, including cash and cash equivalents, restricted cash, accounts receivable, accounts payable, customer deposits and short-term borrowings. NiSource's long-term borrowings are recorded at historical amounts unless designated as a hedged item in a fair value hedge.

Edgar Filing: NISOURCE INC/DE - Form 10-Q

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate fair value.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

Long-term Debt. The fair values of these securities are estimated based on the quoted market prices for the same or similar issues or on the rates offered for securities of the same remaining maturities. Certain premium costs associated with the early settlement of long-term debt are not taken into consideration in determining fair value. These fair value measurements are classified as Level 2 within the fair value hierarchy. For the quarters ending March 31, 2012 and 2011, there were no changes in the method or significant assumptions used to estimate the fair value of the financial instruments.

The carrying amount and estimated fair values of financial instruments were as follows:

<i>(in millions)</i>	Carrying Amount as of March 31, 2012	Estimated Fair Value as of March 31, 2012	Carrying Amount as of Dec. 31, 2011	Estimated Fair Value as of Dec. 31, 2011
Long-term debt (including current portion)	6,585.2	7,420.5	6,594.4	7,369.4
11. Transfers of Financial Assets				

Transfers of accounts receivable are accounted for as secured borrowings resulting in the recognition of short-term borrowings on the Condensed Consolidated Balance Sheets (unaudited). The maximum amount of debt that can be recognized related to NiSource's accounts receivable programs is \$515 million.

All accounts receivables sold to the commercial paper conduits are valued at face value, which approximate fair value due to their short-term nature. The amount of the undivided percentage ownership interest in the accounts receivables sold is determined in part by required loss reserves under the agreements. Below is information about the accounts receivable securitization agreements entered into by NiSource's subsidiaries.

On October 23, 2009, Columbia of Ohio entered into an agreement to sell, without recourse, substantially all of its trade receivables, as they originate, to CGORC, a wholly-owned subsidiary of Columbia of Ohio. CGORC, in turn, is party to an agreement with BTMU and RBS, also dated October 23, 2009, under the terms of which it sells an undivided percentage ownership interest in its accounts receivable to commercial paper conduits sponsored by BTMU and RBS. On October 21, 2011, the agreement was renewed with an amendment increasing the maximum seasonal program limit from \$200 million to \$240 million. The amended agreement expires on October 19, 2012, and can be renewed if mutually agreed to by all parties. As of March 31, 2012, \$161.4 million of accounts receivable had been transferred by CGORC. CGORC is a separate corporate entity from NiSource and Columbia of Ohio, with its own separate obligations, and upon a liquidation of CGORC, CGORC's obligations must be satisfied out of CGORC's assets prior to any value becoming available to CGORC's stockholder. Under the agreement, an event of termination occurs if NiSource's debt rating is withdrawn by either Standard & Poor's or Moody's, or falls below BB- or Ba3 at either Standard & Poor's or Moody's, respectively.

On October 23, 2009, Northern Indiana entered into an agreement to sell, without recourse, substantially all of its trade receivables, as they originate, to NARC, a wholly-owned subsidiary of Northern Indiana. NARC, in turn, is party to an agreement with RBS, also dated October 23, 2009, under the terms of which it sells an undivided percentage ownership interest in its accounts receivable to a commercial paper conduit sponsored by RBS. The maximum seasonal program limit under the terms of the agreement is \$200 million. On August 31, 2011, the agreement was renewed, having a new scheduled termination date of August 29, 2012, and can be further renewed if mutually agreed to by both parties. As of March 31, 2012, \$169.3 million of accounts receivable had been transferred by NARC. NARC is a separate corporate entity from NiSource and Northern Indiana, with its own separate obligations, and upon a liquidation of NARC, NARC's obligations must be satisfied out of NARC's assets prior to any value becoming available to NARC's stockholder. Under the agreement, an event of termination occurs if Northern Indiana's debt rating is withdrawn by either Standard & Poor's or Moody's, or falls below BB or Ba2 at either Standard & Poor's or Moody's, respectively.

Edgar Filing: NISOURCE INC/DE - Form 10-Q

On March 15, 2010, Columbia of Pennsylvania entered into an agreement to sell, without recourse, substantially all of its trade receivables, as they originate, to CPRC, a wholly-owned subsidiary of Columbia of Pennsylvania. CPRC, in turn, is party to an agreement with BTMU, also dated March 15, 2010, under the terms of which it sells an undivided percentage ownership interest in its accounts receivable to a commercial paper conduit sponsored by

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

BTMU. The maximum seasonal program limit under the terms of the agreement is \$75 million. On March 13, 2012, the agreement was renewed, having a new scheduled termination date of March 12, 2013, and can be further renewed if mutually agreed to by both parties. As of March 31, 2012, \$45.9 million of accounts receivable had been transferred by CPRC. CPRC is a separate corporate entity from NiSource and Columbia of Pennsylvania, with its own separate obligations, and upon a liquidation of CPRC, CPRC's obligations must be satisfied out of CPRC's assets prior to any value becoming available to CPRC's stockholder. Under the agreement, an event of termination occurs if NiSource's debt rating is withdrawn by either Standard & Poor's or Moody's, or falls below BB- or Ba3 at either Standard & Poor's or Moody's, respectively.

The following table reflects the gross and net receivables transferred as well as short-term borrowings related to the securitization transactions as of March 31, 2012 and December 31, 2011 for Columbia of Ohio, Northern Indiana and Columbia of Pennsylvania:

<i>(in millions)</i>	March 31, 2012	December 31, 2011
Gross Receivables	\$ 446.4	\$ 510.5
Less: Receivables not transferred	69.8	278.8
Net receivables transferred	\$ 376.6	\$ 231.7
Short-term debt due to asset securitization	\$ 376.6	\$ 231.7

For the three months ended March 31, 2012 and 2011, \$1.1 million and \$1.5 million of fees associated with the securitization transactions were recorded as interest expense, respectively. Columbia of Ohio, Northern Indiana and Columbia of Pennsylvania remain responsible for collecting on the receivables securitized and the receivables cannot be sold to another party.

12. Goodwill Assets

In accordance with the provisions for goodwill accounting under GAAP, NiSource tests its goodwill for impairment annually as of June 30 each year unless indicators, events, or circumstances would require an immediate review. Goodwill is tested for impairment at a level of reporting referred to as a reporting unit, which generally is an operating segment or a component of an operating segment as defined by the FASB.

NiSource's goodwill assets as of March 31, 2012 were \$3.7 billion pertaining primarily to the acquisition of Columbia on November 1, 2000. Of this amount, approximately \$2.0 billion is allocated to Columbia Transmission Operations and \$1.7 billion is allocated to Columbia Distribution Operations. In addition, Northern Indiana Gas Distribution Operations' goodwill assets at March 31, 2012 related to the purchase of Northern Indiana Fuel and Light in March 1993 and Kokomo Gas in February 1992 were \$18.8 million.

The test performed at June 30, 2011 indicated that the fair value of each of the reporting units that carry or are allocated goodwill exceeded their carrying values, indicating that no impairment exists under Step 1 of the annual impairment test.

NiSource considered whether there were any events or changes in circumstances subsequent to the annual test that would reduce the fair value of any of the reporting units below their carrying amounts and necessitate another goodwill impairment test. No such indicators were noted that would require goodwill impairment testing during the first quarter.

13. Income Taxes

NiSource's interim effective tax rates reflect the estimated annual effective tax rates for 2012 and 2011, adjusted for tax expense associated with certain discrete items. The effective tax rates for the three months ended March 31, 2012 and 2011 were 34.7% and 34.6%, respectively. These effective tax rates differ from the Federal tax rate of 35% primarily due to the effects of tax credits, state income taxes, utility rate-making, and other permanent book-to-tax differences.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

On December 27, 2011, the United States Treasury Department and the IRS issued temporary and proposed regulations effective for years beginning on or after January 1, 2012 that, among other things, provided guidance on whether expenditures qualified as deductible repairs. In addition, on March 15, 2012, the IRS issued a directive to discontinue exam activity related to positions on this issue taken on original tax returns for years beginning before January 1, 2012. NiSource expects the IRS to issue guidance for the treatment of expenditures for gas transmission and distribution assets, and generation within the next twelve months. NiSource further expects that it will be more likely to adopt the procedures provided in this guidance rather than the more general rules set forth in the temporary and proposed regulations. Accordingly, NiSource management expects to adjust unrecognized tax benefits recorded in 2009 related to its change in tax accounting for repairs for gas transmission and distribution assets and generation assets in the period specific guidance for these assets is issued. As noted above, NiSource management believes that the issuance of such guidance and intent to adopt the guidance by NiSource is reasonably possible to occur within the next twelve months. In that event, NiSource will recognize a tax benefit for this issue in the amount of \$80.9 million. NiSource believes these adjustments will not have a significant effect on the income statement.

There were no material changes recorded in the first quarter of 2012 to NiSource's uncertain tax positions as of December 31, 2011.

14. Pension and Other Postretirement Benefits

NiSource provides defined contribution plans and noncontributory defined benefit retirement plans that cover its employees. Benefits under the defined benefit retirement plans reflect the employees' compensation, years of service and age at retirement. Additionally, NiSource provides health care and life insurance benefits for certain retired employees. The majority of employees may become eligible for these benefits if they reach retirement age while working for NiSource. The expected cost of such benefits is accrued during the employees' years of service. Current rates of rate-regulated companies include postretirement benefit costs, including amortization of the regulatory assets that arose prior to inclusion of these costs in rates. For most plans, cash contributions are remitted to grantor trusts.

For the three months ended March 31, 2012, NiSource has contributed \$0.9 million to its pension plans and \$13.1 million to its other postretirement benefit plans.

The following table provides the components of the plans' net periodic benefits cost for the three months ended March 31, 2012 and 2011:

Three Months Ended March 31, <i>(in millions)</i>	Pension Benefits		Other Postretirement Benefits	
	2012	2011	2012	2011
Components of Net Periodic Benefit Cost				
Service cost	\$ 9.4	\$ 9.4	\$ 2.8	\$ 2.5
Interest cost	28.2	29.9	9.3	9.6
Expected return on assets	(41.1)	(41.8)	(6.7)	(6.7)
Amortization of transition obligation	-	-	0.3	0.3
Amortization of prior service cost	0.1	0.1	(0.1)	(0.1)
Recognized actuarial loss	20.3	13.9	2.4	1.7
Total Net Periodic Benefit Costs	\$ 16.9	\$ 11.5	\$ 8.0	\$ 7.3

For the quarters ended March 31, 2012 and 2011, pension and other postretirement benefit cost of approximately \$5.6 million and \$7.1 million, respectively, was capitalized as a component of plant or recognized as a regulatory asset or liability consistent with regulatory orders for certain of NiSource's regulated businesses.

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

15. Variable Interests and Variable Interest Entities

In general, a VIE is an entity which (1) has an insufficient amount of at-risk equity to permit the entity to finance its activities without additional financial subordinated support provided by any parties, (2) whose at-risk equity owners, as a group, do not have power, through voting rights or similar rights, to direct activities of the entity that most significantly impact the entity's economic performance or (3) whose at-risk owners do not absorb the entity's losses or receive the entity's residual return. A VIE is required to be consolidated by a company if that company is determined to be the primary beneficiary of the VIE.

NiSource consolidates those VIEs for which it is the primary beneficiary. NiSource considers quantitative and qualitative elements in determining the primary beneficiary. Qualitative measures include the ability to control an entity and the obligation to absorb losses or the right to receive benefits.

NiSource's analysis includes an assessment of guarantees, operating leases, purchase agreements, and other contracts, as well as its investments and joint ventures. For items that have been identified as variable interests, or where there is involvement with an identified VIE, an in-depth review of the relationship between the relevant entities and NiSource is made to evaluate qualitative and quantitative factors to determine the primary beneficiary, if any, and whether additional disclosures would be required under the current standard.

At March 31, 2012, consistent with prior periods, NiSource consolidated its low income housing real estate investments from which NiSource derives certain tax benefits. As of March 31, 2012, NiSource is a 99% limited partner with a net investment of approximately \$3.0 million. Consistent with prior periods, NiSource evaluated the nature and intent of the low income housing investments when determining the primary beneficiary. NiSource concluded that it continues to be the primary beneficiary. Subject to certain conditions precedent, NiSource has the contractual right to take control of the low income housing properties. At March 31, 2012, gross assets of the low income housing real estate investments in continuing operations were \$28.6 million. Current and non-current assets were \$0.5 million and \$28.1 million, respectively. As of March 31, 2012, NiSource has long-term debt of approximately \$9.7 million as a result of consolidating these investments. However, this debt is nonrecourse to NiSource and NiSource's direct and indirect subsidiaries. Approximately \$0.5 million of the assets are restricted to settle the obligations of the entity.

Northern Indiana has a service agreement with Pure Air, a general partnership between Air Products and Chemicals, Inc. and First Air Partners LP, under which Pure Air provides scrubber services to reduce sulfur dioxide emissions for Units 7 and 8 at the Bailly Generating Station. Services under this contract commenced on July 1, 1992, and Northern Indiana pays for the services under a combination of fixed and variable charges. The agreement provides that, assuming various performance standards are met by Pure Air, a termination payment would be due if Northern Indiana terminated the agreement prior to the end of the twenty-year contract period. NiSource has made an exhaustive effort to obtain information needed from Pure Air to determine the status of Pure Air as a VIE. However, Northern Indiana had not been able to obtain this information and as a result, it is unclear whether Pure Air is a VIE and if Northern Indiana is the primary beneficiary. Northern Indiana will continue to request the information required to determine whether Pure Air is a VIE. Northern Indiana has no exposure to loss related to the service agreement with Pure Air.

16. Long-Term Debt

On April 5, 2012, NiSource Finance negotiated a \$250.0 million three-year bank term loan with a syndicate of banks which matures on April 3, 2015. Borrowings under the term loan will have an effective cost of LIBOR plus 137 basis points.

17. Short-Term Borrowings

During June 2011, NiSource Finance implemented a new commercial paper program with a program limit of up to \$500.0 million with a dealer group comprised of Barclays, Citigroup, Credit Suisse and Wells Fargo. Commercial paper issuances are supported by available capacity under NiSource's \$1.5 billion unsecured revolving credit facility, which expires in March 2015. At March 31, 2012, NiSource had \$496.6 million of commercial paper outstanding.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)****NiSOURCE INC.****Notes to Condensed Consolidated Financial Statements (unaudited) (continued)**

On March 3, 2011, NiSource Finance entered into a new \$1.5 billion four-year revolving credit facility with a syndicate of banks led by Barclays Capital. The new facility has a termination date of March 3, 2015 and replaced an existing \$1.5 billion five-year credit facility which would have expired during July 2011. The purpose of the facility is to fund ongoing working capital requirements and for general corporate purposes, including supporting liquidity for NiSource's commercial paper program, and provides for the issuance of letters of credit. At March 31, 2012, NiSource had \$391.0 million of outstanding borrowings under this facility.

As of March 31, 2012 and December 31, 2011, NiSource had \$37.5 million of stand-by letters of credit outstanding, of which \$19.2 million were under the revolving credit facility.

Transfers of accounts receivable are accounted for as secured borrowings resulting in the recognition of short-term debt on the Condensed Consolidated Balance Sheet in the amount of \$376.6 million and \$231.7 million as of March 31, 2012 and December 31, 2011, respectively. Refer to Note 11, "Transfers of Financial Assets," for additional information.

<i>(in millions)</i>	March 31, 2012	December 31, 2011
Commercial Paper weighted average interest rate of 1.01% at March 31, 2012 and December 31, 2011.	\$ 496.6	\$ 402.7
Credit facilities borrowings weighted average interest rate of 2.07% and 1.99% at March 31, 2012 and December 31, 2011, respectively	391.0	725.0
Accounts receivable securitization facility borrowings	376.6	231.7
Total short-term borrowings	\$ 1,264.2	\$ 1,359.4

Given their turnover is less than 90 days, cash flows related to the borrowings and repayments of the items listed above are presented net in the Condensed Statements of Consolidated Cash Flows (unaudited).

18. Share-Based Compensation

The stockholders approved and adopted the NiSource Inc. 2010 Omnibus Incentive Plan (the "Omnibus Plan"), at the Annual Meeting of Stockholders held on May 11, 2010. The Omnibus Plan provides for awards to employees and non-employee directors of incentive and nonqualified stock options, stock appreciation rights, restricted stock and restricted stock units, performance shares, performance units, cash-based awards and other stock-based awards. The Omnibus Plan provides that the number of shares of common stock of NiSource available for awards is 8,000,000 plus the number of shares subject to outstanding awards granted under either the 1994 Plan or the Director Plan (described below) that expire or terminate for any reason. No further awards are permitted to be granted under the prior 1994 Plan or the Director Plan. At March 31, 2012, there were 7,513,387 shares reserved for future awards under the Omnibus Plan.

Prior to May 11, 2010, NiSource issued long-term equity incentive grants to key management employees under a long-term incentive plan approved by stockholders on April 13, 1994 ("1994 Plan"). The types of equity awards previously authorized under the 1994 Plan did not significantly differ from those permitted under the Omnibus Plan.

NiSource recognized stock-based employee compensation expense of \$3.2 million and \$3.0 million for the three months ended March 31, 2012 and 2011, respectively, as well as related tax benefits of \$1.1 million and \$1.0 million.

As of March 31, 2012, the total remaining unrecognized compensation cost related to nonvested awards amounted to \$25.8 million, which will be amortized over the weighted-average remaining requisite service period of 2.3 years.

Edgar Filing: NISOURCE INC/DE - Form 10-Q

Stock Options. As of March 31, 2012, approximately 2.2 million options were outstanding and exercisable with a weighted average strike price of \$22.11. No options were granted during the three months ended March 31, 2012 and 2011. As of March 31, 2012, the aggregate intrinsic value for the options outstanding and exercisable was \$4.9 million. During the three months ended March 31, 2012, cash received from the exercise of options was \$13.4 million. No options were exercised during the three months ended March 31, 2011.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

Restricted Awards. During the three months ended March 31, 2012, NiSource granted restricted stock units and shares of restricted stock of 151,999, subject to service conditions. The total grant date fair value of the shares of restricted stock and restricted stock units was \$3.3 million, based on the average market price of NiSource's common stock at the date of each grant less the present value of any dividends not received during the vesting period, which will be expensed, net of forfeitures, over the vesting period which is generally three years. If the employee terminates employment before the service conditions lapse due to (1) Retirement or Disability (as defined in the award agreement), or (2) death, the employment conditions will lapse with respect to a pro rata portion of the shares of restricted stock and restricted stock units on the date of termination. In the event of a Change-in-Control (as defined in the award agreement), all unvested shares of restricted stock and restricted stock units will immediately vest. Termination due to any other reason will result in all shares of restricted stock and restricted stock units awarded being forfeited effective on the employee's date of termination. As of March 31, 2012, 595,593 nonvested shares (all of which are expected to vest) of restricted stock and restricted stock units were granted and outstanding.

Performance Shares. During the three months ended March 31, 2012, NiSource granted 709,193 performance shares subject to performance conditions. The grant date fair-value of the awards was \$14.6 million, based on the average market price of NiSource's common stock at the date of each grant less the present value of dividends not received during the vesting period which will be expensed, net of forfeitures, over the three year requisite service period. The performance conditions are based on achievement of two non-GAAP financial measures: cumulative net operating earnings, that NiSource defines as income from continuing operations adjusted for certain items; and cumulative funds from operations that NiSource defines as net operating cash flows provided by continuing operations; and relative total shareholder return that NiSource defines as the annualized growth in the dividends and share price of a share of NiSource's common stock (calculated using a 20 trading day average of NiSource's closing price beginning December 31, 2011 and ending on December 31, 2014) compared to the total shareholder return performance of a predetermined peer group of companies. The service conditions lapse on January 30, 2015 when the shares vest provided the performance criteria are satisfied. In general, if the employee terminates employment before January 30, 2015 due to (1) Retirement or Disability (as defined in the award agreement), or (2) death, the employment conditions will lapse with respect to a pro rata portion of the performance shares payable at target on the date of termination provided the performance criteria are met. In the event of a Change-in-Control (as defined in the award agreement), all unvested performance shares will immediately vest. Termination due to any other reason will result in all performance shares awarded being forfeited effective on the employee's date of termination. As of March 31, 2012, 1,956,433 nonvested (all of which are expected to vest) performance shares were granted and outstanding.

Non-employee Director Awards. As of May 11, 2010, awards to non-employee directors may be made only under the Omnibus Plan. Currently, restricted stock units are granted annually to non-employee directors, subject to a non-employee director's election to defer receipt of such restricted stock unit award. The non-employee director's restricted stock units vest on the last day of the non-employee director's annual term corresponding to the year the restricted stock units were awarded subject to special pro-rata vesting rules in the event of Retirement or Disability (as defined in the award agreement), or death. The vested restricted stock units are payable as soon as practicable following vesting except as otherwise provided pursuant to the non-employee director's election to defer. As of March 31, 2012, 116,906 restricted stock units had been issued to non-employee directors under the Omnibus Plan.

Only restricted stock units remain outstanding under the prior plan for non-employee directors, the Amended and Restated Non-employee Director Stock Incentive Plan (the Director Plan). All such awards are fully vested and shall be distributed to the directors upon their separation from the Board. As of March 31, 2012, 241,401 restricted stock units remain outstanding under the Director Plan and as noted above no further shares may be awarded under the Director Plan.

401(k) Match, Profit Sharing and Company Contribution. NiSource has a voluntary 401(k) savings plan covering eligible employees that allows for periodic discretionary matches as a percentage of each participant's contributions in newly issued shares of common stock. NiSource also has a retirement savings plan that provides for discretionary profit sharing contributions of shares of common stock to eligible employees based on earnings results; and eligible exempt employees hired after January 1, 2010, receive a non-elective company contribution of three percent of eligible pay in shares of common stock. For the quarter ended March 31, 2012 and 2011, NiSource recognized 401(k) match, profit sharing and non-elective contribution expense of \$5.8 million and \$3.9 million, respectively.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)**19. Other Commitments and Contingencies**

A. Guarantees and Indemnities. As a part of normal business, NiSource and certain subsidiaries enter into various agreements providing financial or performance assurance to third parties on behalf of certain subsidiaries. Such agreements include guarantees and stand-by letters of credit. These agreements are entered into primarily to support or enhance the creditworthiness otherwise attributed to a subsidiary on a stand-alone basis, thereby facilitating the extension of sufficient credit to accomplish the subsidiaries' intended commercial purposes. The total guarantees and indemnities in existence at March 31, 2012 and the years in which they expire were:

<i>(in millions)</i>	Total	2012	2013	2014	2015	2016	After
Guarantees of subsidiaries debt	\$ 6,120.8	\$ 315.0	\$ 420.3	\$ 500.0	\$ 230.0	\$ 291.5	\$ 4,364.0
Guarantees supporting commodity transactions of subsidiaries	141.9	45.5	14.5	-	80.0	-	1.9
Accounts receivable securitization	376.6	376.6	-	-	-	-	-
Lines of credit	887.6	887.6	-	-	-	-	-
Letters of credit	37.5	33.9	2.6	1.0	-	-	-
Other guarantees	273.7	10.5	224.0	32.2	3.0	-	4.0
Total commercial commitments	\$ 7,838.1	\$ 1,669.1	\$ 661.4	\$ 533.2	\$ 313.0	\$ 291.5	\$ 4,369.9

Guarantees of Subsidiaries Debt. NiSource has guaranteed the payment of \$6.1 billion of debt for various wholly-owned subsidiaries including NiSource Finance and Columbia of Massachusetts, and through a support agreement, Capital Markets, which is reflected on NiSource's Condensed Consolidated Balance Sheets (unaudited). The subsidiaries are required to comply with certain covenants under the debt indenture and in the event of default, NiSource would be obligated to pay the debt's principal and related interest. NiSource does not anticipate its subsidiaries will have any difficulty maintaining compliance. On October 3, 2011, NiSource executed a Second Supplemental Indenture to the original Columbia of Massachusetts Indenture dated April 1, 1991, for the specific purpose of guaranteeing Columbia of Massachusetts outstanding medium-term notes.

Guarantees Supporting Commodity Transactions of Subsidiaries. NiSource has issued guarantees, which support up to \$141.9 million of commodity-related payments for its current subsidiaries involved in energy marketing activities. These guarantees were provided to counterparties in order to facilitate physical and financial transactions involving natural gas services. To the extent liabilities exist under the commodity-related contracts subject to these guarantees, such liabilities are included in the Condensed Consolidated Balance Sheets (unaudited).

Lines and Letters of Credit and Accounts Receivable Advances. On March 3, 2011, NiSource Finance entered into a new \$1.5 billion four-year revolving credit facility with a syndicate of banks led by Barclays Capital. The new facility replaced an existing \$1.5 billion five-year credit facility which would have expired during July 2011. The new facility has a termination date of March 3, 2015. The purpose of the facility is to fund ongoing working capital requirements and for general corporate purposes, including supporting liquidity for the Company's commercial paper program, and provides for the issuance of letters of credit. At March 31, 2012, NiSource had \$391.0 million in borrowings under its four-year revolving credit facility, \$496.6 million in commercial paper outstanding and \$376.6 million outstanding under its accounts receivable securitization agreements. At March 31, 2012, NiSource issued stand-by letters of credit of approximately \$37.5 million for the benefit of third parties. See Note 17, Short-Term Borrowings, for additional information.

Other Guarantees or Obligations. On June 30, 2008, NiSource's subsidiary, PEI, sold Whiting Clean Energy to BPAE for \$216.7 million which included \$16.1 million in working capital. The agreement with BPAE contains representations, warranties, covenants and closing conditions. NiSource has executed purchase and sales agreement guarantees totaling \$220 million which guarantee performance of PEI's covenants, agreements, obligations, liabilities, representations and warranties under the agreement with BPAE. No amounts related to the purchase and sales agreement guarantees are reflected in the Condensed Consolidated Balance Sheet (unaudited) as of March 31, 2012. These guarantees are due to expire in June 2013.

Table of Contents

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

NiSource has additional purchase and sales agreement guarantees totaling \$30.0 million, which guarantee performance of the seller's covenants, agreements, obligations, liabilities, representations and warranties under the agreements. No amounts related to the purchase and sales agreement guarantees are reflected in the Condensed Consolidated Balance Sheets (unaudited). Management believes that the likelihood NiSource would be required to perform or otherwise incur any significant losses associated with any of the aforementioned guarantees is remote.

In connection with Millennium's refinancing of its long-term debt in August 2010, NiSource provided a letter of credit to Union Bank N.A., as Collateral Agent for deposit into a debt service reserve account as required under the Deposit and Disbursement Agreement governing the Millennium notes offering. This account is to be drawn upon by the note holders in the event that Millennium is delinquent on its principal and interest payments. The value of NiSource's letter of credit represents 47.5% (NiSource's ownership percentage in Millennium) of the Debt Service Reserve Account requirement, or \$16.2 million. The total exposure for NiSource is \$16.2 million. NiSource has an accrued liability of \$1.5 million related to the inception date fair value of this guarantee as of March 31, 2012.

NiSource has issued other guarantees supporting derivative related payments associated with interest rate swap agreements issued by NiSource Finance, operating leases for many of its subsidiaries and for other agreements entered into by its current and former subsidiaries.

B. Other Legal Proceedings. In the normal course of its business, NiSource and its subsidiaries have been named as defendants in various legal proceedings. In the opinion of management, the ultimate disposition of these currently asserted claims will not have a material impact on NiSource's consolidated financial statements.

C. Environmental Matters.

NiSource operations are subject to environmental statutes and regulations related to air quality, water quality, hazardous waste and solid waste. NiSource believes that it is in substantial compliance with those environmental regulations currently applicable to its operations and believes that it has all necessary permits to conduct its operations.

It is management's continued intent to address environmental issues in cooperation with regulatory authorities in such a manner as to achieve mutually acceptable compliance plans. However, there can be no assurance that fines and penalties will not be incurred. Management expects a significant portion of environmental assessment and remediation costs to be recoverable through rates for certain NiSource companies.

As of March 31, 2012 and December 31, 2011, NiSource had recorded reserves of approximately \$168.8 million and \$173.5 million, respectively, to cover environmental remediation at various sites. The current portion of this reserve is included in Legal and Environmental Reserves in the Condensed Consolidated Balance Sheet. The noncurrent portion is included in Other Noncurrent Liabilities in the Condensed Consolidated Balance Sheet. NiSource accrues for costs associated with environmental remediation obligations when the incurrence of such costs is probable and the amounts can be reasonably estimated. The original estimates for cleanup can differ materially from the amount ultimately expended. The actual future expenditures depend on many factors, including currently enacted laws and regulations, the nature and extent of contamination, the method of cleanup, and the availability of cost recovery from customers. These expenditures are not currently estimable at some sites. NiSource periodically adjusts its reserves as information is collected and estimates become more refined.

Air

The actions listed below could require further reductions in emissions from various emission sources. NiSource will continue to closely monitor developments in these matters.

Climate Change. Future legislative and regulatory programs could significantly restrict emissions of GHGs or could impose a cost or tax on GHG emissions. Recently, proposals have been developed to implement Federal, state and regional GHG programs and to create renewable energy standards.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

In 2009 and 2010, the United States Congress considered a number of legislative proposals to regulate GHG emissions. The United States House of Representatives passed a comprehensive climate change bill in June 2009 that would have created a GHG-cap-and-trade system and implemented renewable energy standards. Bills on the same topics were introduced in the Senate in 2009 and 2010, but failed to garner enough support to pass. If a Federal or state comprehensive climate change bill were to be enacted into law, the impact on NiSource's financial performance would depend on a number of factors, including the overall level of required GHG reductions, the renewable energy targets, the degree to which offsets may be used for compliance, the amount of recovery allowed from customers, and the extent to which NiSource would be entitled to receive CO₂ allowances at no cost. Comprehensive Federal or state GHG regulation could result in additional expense or compliance costs that may not be fully recoverable from customers and could materially impact NiSource's financial results.

National Ambient Air Quality Standards. The CAA requires EPA to set national air quality standards for particulate matter and five other pollutants (the NAAQS) considered harmful to public health and the environment. Periodically EPA imposes new or modifies existing NAAQS. States that contain areas that do not meet the new or revised standards must take steps to maintain or achieve compliance with the standards. These steps could include additional pollution controls on boilers, engines, turbines, and other facilities owned by electric generation, gas distribution, and gas transmission operations.

The following NAAQS were recently added or modified:

Particulate Matter: In 2006, the EPA issued revisions to the NAAQS for particulate matter. The final rule (1) increased the stringency of the current fine particulate (PM_{2.5}) standard, (2) added a new standard for inhalable coarse particulate (particulate matter between 10 and 2.5 microns in diameter), and (3) revoked the annual standards for coarse particulate (PM₁₀) while retaining the 24-hour PM₁₀ standards. These actions were challenged in a case before the DC Court of Appeals, *American Farm Bureau Federation et al. v. EPA*. In 2009, the appeals court granted portions of the plaintiffs' petitions challenging the fine particulate standards but denied portions of the petitions challenging the standards for coarse particulate. State plans implementing the new standard for inhalable coarse particulate and the modified 24-hour standard for fine particulate are expected in 2012. The annual and secondary PM_{2.5} standards have been remanded to the EPA for reconsideration. Northern Indiana will continue to monitor this matter and cannot estimate the impact of any new rules at this time.

Ozone (eight hour): On September 2, 2011, the EPA announced it would implement its 2008 eight-hour ozone NAAQS rather than tightening the standard in 2012. The EPA will review, and possibly revise, the standard in 2013 consistent with CAA requirements. In addition, the EPA has proposed to re-designate the Chicago metropolitan area, including the areas in which Northern Indiana operates three of its electric generation facilities, as non-attainment for ozone. Northern Indiana will continue to monitor this matter and cannot estimate the impact of any new rules at this time.

Nitrogen Dioxide (NO₂): The EPA revised the NO₂ NAAQS by adding a one-hour standard while retaining the annual standard. The new standard could impact some NiSource combustion sources. EPA will designate areas that do not meet the new standard beginning in 2012. States with areas that do not meet the standard will need to develop rules to bring areas into compliance within five years of designation. Additionally, under certain permitting circumstances emissions from some existing NiSource combustion sources may need to be assessed and compared to the revised NO₂ standards before areas are designated. Petitions challenging the rule have been filed by various parties. NiSource will continue to monitor this matter and cannot estimate the impact of these rules at this time.

National Emission Standard for Hazardous Air Pollutants. On August 20, 2010, the EPA revised national emission standards for hazardous air pollutants for certain stationary reciprocating internal combustion engines. Compliance requirements vary by engine type and will generally be required within three years. NiSource is continuing its evaluation of the cost impacts of the final rule and estimates the cost of compliance to be \$20 - \$25 million.

ITEM 1. FINANCIAL STATEMENTS (continued)

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

Waste

NiSource subsidiaries are potentially responsible parties at waste disposal sites under the CERCLA (commonly known as Superfund) and similar state laws. Additionally, a program has been instituted to identify and investigate former MGP sites where Gas Distribution Operations subsidiaries or predecessors may have liability. The program has identified 67 such sites where liability is probable. Remedial actions at many of these sites are being overseen by state or federal environmental agencies through consent agreements or voluntary remediation agreements.

During the fourth quarter of 2011, NiSource completed a probabilistic model to estimate its future remediation costs related to its MGP sites. The model was prepared by a third party and incorporates NiSource and general industry experience with remediating MGP sites. NiSource accordingly increased its liability for estimated remediation costs by \$71.1 million. The total liability at NiSource related to the facilities subject to remediation was \$137.6 million and \$139.5 million at March 31, 2012 and December 31, 2011, respectively. The liability represents NiSource's best estimate of the probable cost to remediate the facilities. NiSource believes that it is reasonably possible that remediation costs could vary by as much as \$25 million in addition to the costs noted above. Remediation costs are estimated based on the best available information, applicable remediation standards at the balance sheet date, and experience with similar facilities.

Additional Issues Related to Individual Business Segments

The sections above describe various regulatory actions that affect Gas Transmission and Storage Operations, Electric Operations, and certain other discontinued operations for which NiSource has retained a liability. Specific information is provided below.

Gas Transmission and Storage Operations.

Waste

Columbia Transmission continues to conduct characterization and remediation activities at specific sites under a 1995 AOC (subsequently modified in 1996 and 2007). The 1995 AOC originally covered 245 major facilities, approximately 13,000 liquid removal points, approximately 2,200 mercury measurement stations and about 3,700 storage well locations. As a result of the 2007 amendment, approximately 50 facilities remain subject to the terms of the AOC. During the third quarter of 2011, Columbia Transmission completed a study to estimate its future remediation requirements related to the AOC. Columbia Transmission accordingly increased its liability for estimated remediation costs by \$25.6 million. The total liability at Columbia Transmission related to the facilities subject to remediation was \$27.7 million and \$30.0 million at March 31, 2012 and December 31, 2011, respectively. The liability represents Columbia Transmission's best estimate of the cost to remediate the facilities or manage the site until retirement. A Response Action Work Plan consistent with this estimate was submitted to the EPA in the fourth quarter of 2011 and subsequently approved. Remediation costs are estimated based on the information available, applicable remediation standards, and experience with similar facilities. Columbia Transmission expects that the remediation for these facilities will be completed in 2015.

One of the facilities subject to the 1995 AOC is the Majorsville Operations Center, which was remediated under an EPA approved Remedial Action Work Plan in summer 2008. Pursuant to the Remedial Action Work Plan, Columbia Transmission completed a project that stabilized residual oil contained in soils at the site and in sediments in an adjacent stream. Columbia Transmission continues to monitor the site subject to EPA oversight. On April 23, 2009, PADEP issued an NOV to Columbia Transmission, alleging that the remediation did not fully address the contamination. The NOV asserts violations of the Pennsylvania Clean Streams Law and the Pennsylvania Solid Waste Management Act and includes a proposed penalty of \$1 million. Columbia Transmission is unable to estimate the likelihood or cost of potential penalties or additional remediation at this time.

Electric Operations.

Air

Edgar Filing: NISOURCE INC/DE - Form 10-Q

Northern Indiana expects to become subject to a number of new air-quality mandates in the next several years. These mandates may require Northern Indiana to make capital improvements to its electric generating stations. The cost of capital improvements is estimated to be \$620 million to \$1.1 billion. This figure includes additional capital improvements associated with the New Source Review Consent Decree, CSAPR and the Utility Mercury and Air Toxics Standards Rule. Northern Indiana believes that the capital costs will likely be recoverable from ratepayers.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

Sulfur dioxide: On December 8, 2009, the EPA revised the SO₂ NAAQS by adopting a new 1-hour primary NAAQS for SO₂. EPA expects to designate areas that do not meet the new standard by mid-2012. States with such areas would have until 2014 to develop attainment plans with compliance required by 2017. Northern Indiana will continue to monitor developments in these matters but does not anticipate a material impact.

Cross-State Air Pollution Rule / Clean Air Interstate Rule (CAIR) / Transport Rule: On July 6, 2011, the EPA announced its replacement for the 2005 CAIR to reduce the interstate transport of fine particulate matter and ozone. The CSAPR reduces overall emissions of SO₂ and NO_x by setting state-wide caps on power plant emissions. The CSAPR limits emissions, including Northern Indiana's, with restricted emission allowance trading programs scheduled to begin in 2012. In a decision issued on December 30, 2011, the D.C. Circuit Court stayed the CSAPR and reinstated the CAIR trading program provisions and requirements, including reissuing CAIR emission allowances, pending resolution of the stay. This development does not significantly impact Northern Indiana's current emissions control plans. Northern Indiana utilizes the inventory model in accounting for emission allowances issued under the CAIR program whereby these allowances were recognized at zero cost upon receipt from the EPA. Northern Indiana believes its current multi-pollutant compliance plan and New Source Review Consent Decree capital investments will allow Northern Indiana to meet the emission requirements of CSAPR whenever final resolution of the appeal is reached.

Utility Mercury and Air Toxics Standards Rule: On February 8, 2008, the United States Court of Appeals for the District of Columbia Circuit vacated two EPA rules that are the basis for the Indiana Air Pollution Control Board's Clean Air Mercury Rule (CAMR) that established utility mercury emission limits in two phases (2010 and 2018) and a cap-and-trade program to meet those limits. In response to the vacatur, the EPA pursued a new Section 112 rulemaking to establish MACT standards for electric utilities. The EPA finalized the Mercury and Air Toxics Standards (MATS) Rule on December 16, 2011. Compliance for Northern Indiana's affected units will be required in early 2015, with the possibility of a one year extension. Northern Indiana is currently developing a plan for further environmental controls to comply with MATS.

New Source Review: On September 29, 2004, the EPA issued an NOV to Northern Indiana for alleged violations of the CAA and the Indiana SIP. The NOV alleges that modifications were made to certain boiler units at three of Northern Indiana's generating stations between the years 1985 and 1995 without obtaining appropriate air permits for the modifications. Northern Indiana, EPA, the Department of Justice, and IDEM have settled the matter through a consent decree.

Water

The Phase II Rule of the Clean Water Act Section 316(b), which requires all large existing steam electric generating stations to meet certain performance standards to reduce the effects on aquatic organisms at their cooling water intake structures, became effective on September 7, 2004. Under this rule, stations will either have to demonstrate that the performance of their existing fish protection systems meet the new standards or develop new systems, such as a closed-cycle cooling tower. Various court challenges and EPA responses ensued. The EPA announced a proposed rule and is obligated to finalize a rule in 2012. Northern Indiana will continue to monitor this matter but cannot estimate the cost of compliance at this time.

Waste

On March 31, 2005, the EPA and Northern Indiana entered into an AOC under the authority of Section 3008(h) of the RCRA for the Bailly Station. The order requires Northern Indiana to identify the nature and extent of releases of hazardous waste and hazardous constituents from the facility. Northern Indiana must also remediate any release of hazardous constituents that present an unacceptable risk to human health or the environment. The process to complete investigation and select appropriate remediation activities is ongoing.

On June 21, 2010, EPA published a proposed rule for CCRs through the RCRA. The proposal outlines multiple regulatory approaches that EPA is considering. These proposed regulations could negatively affect Northern Indiana's ongoing byproduct reuse programs and would impose additional requirements on its management of coal combustion residuals. Northern Indiana will continue to monitor developments in this matter and cannot estimate the cost of compliance at this time.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)**Other Operations.****Waste**

NiSource affiliates have retained environmental liabilities, including cleanup liabilities associated with some of its former operations. Four sites are associated with its former propane operations and ten sites associated with former petroleum operations. At one of those sites, an AOC has been signed with EPA to address petroleum residue in soil and groundwater.

20. Accumulated Other Comprehensive Loss

The following table displays the components of Accumulated Other Comprehensive Loss.

<i>(in millions)</i>	March 31, 2012	December 31, 2011
Other comprehensive income (loss), before tax:		
Unrealized gains on securities	\$ 3.2	\$ 8.0
Tax expense on unrealized gains on securities	(1.1)	(3.1)
Unrealized losses on cash flow hedges	(50.7)	(52.3)
Tax benefit on unrealized losses on cash flow hedges	19.9	20.5
Unrecognized pension and OPEB costs	(51.9)	(53.0)
Tax benefit on unrecognized pension and OPEB costs	19.7	20.2
Total Accumulated Other Comprehensive Loss, net of taxes	\$ (60.9)	\$ (59.7)

Equity Investment

As an equity method investment, NiSource is required to recognize a proportional share of Millennium's OCI. The remaining unrealized loss at March 31, 2012 of \$19.4 million, net of tax, related to terminated interest rate swaps is being amortized over the period ending June 2025 into earnings using the effective interest method through interest expense as interest payments are made by Millennium. The unrealized loss of \$19.4 million and \$19.7 million at March 31, 2012 and December 31, 2011, respectively, is included in unrealized losses on cash flow hedges above.

21. Business Segment Information

Operating segments are components of an enterprise for which separate financial information is available and evaluated regularly by the chief operating decision maker in deciding how to allocate resources and assess performance. The NiSource Chief Executive Officer is the chief operating decision maker.

At March 31, 2012, NiSource's operations are divided into three primary business segments. The Gas Distribution Operations segment provides natural gas service and transportation for residential, commercial and industrial customers in Ohio, Pennsylvania, Virginia, Kentucky, Maryland, Indiana and Massachusetts. The Gas Transmission and Storage Operations segment offers gas transportation and storage services for LDCs, marketers and industrial and commercial customers located in northeastern, mid-Atlantic, midwestern and southern states. The Electric Operations segment provides electric service in 20 counties in the northern part of Indiana.

Table of Contents**ITEM 1. FINANCIAL STATEMENTS (continued)**

NiSOURCE INC.

Notes to Condensed Consolidated Financial Statements (unaudited) (continued)

The following table provides information about business segments. NiSource uses operating income as its primary measurement for each of the reported segments and makes decisions on finance, dividends and taxes at the corporate level on a consolidated basis. Segment revenues include intersegment sales to affiliated subsidiaries, which are eliminated in consolidation. Affiliated sales are recognized on the basis of prevailing market, regulated prices or at levels provided for under contractual agreements. Operating income is derived from revenues and expenses directly associated with each segment.

Three Months Ended March 31, (in millions)	2012	2011
REVENUES		
Gas Distribution Operations		
Unaffiliated	\$ 1,069.1	\$ 1,584.8
Intersegment	0.2	0.7
Total	1,069.3	1,585.5
Gas Transmission and Storage Operations		
Unaffiliated	233.0	213.4
Intersegment	42.4	42.0
Total	275.4	255.4
Electric Operations		
Unaffiliated	354.4	348.2
Intersegment	0.2	0.2
Total	354.6	348.4
Corporate and Other		
Unaffiliated *	2.2	85.2
Intersegment	110.7	110.5
Total	112.9	195.7
Eliminations	(153.5)	(153.4)
Consolidated Revenues	\$ 1,658.7	\$ 2,231.6

Operating Income		
Gas Distribution Operations	\$ 212.0	\$ 241.5
Gas Transmission and Storage Operations	138.6	118.4
Electric Operations	46.2	50.6
Corporate and Other	2.6	(4.1)
Consolidated Operating Income	\$ 399.4	\$ 406.4

* The reduction to other revenues is attributed to the continued wind down of the unregulated natural gas marketing business as well as the early termination of certain contracts as discussed in Note 9, Risk Management Activities. There was a corresponding decrease in cost of sales with no impact to operating income.

Cash paid for income taxes	1.7	0.7

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS****NiSOURCE INC.*****Note regarding forward-looking statements***

The Management's Discussion and Analysis, including statements regarding market risk sensitive instruments, contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Investors and prospective investors should understand that many factors govern whether any forward-looking statement contained herein will be or can be realized. Any one of those factors could cause actual results to differ materially from those projected. These forward-looking statements include, but are not limited to, statements concerning NiSource's plans, objectives, expected performance, expenditures and recovery of expenditures through rates, stated on either a consolidated or segment basis, and any and all underlying assumptions and other statements that are other than statements of historical fact. From time to time, NiSource may publish or otherwise make available forward-looking statements of this nature. All such subsequent forward-looking statements, whether written or oral and whether made by or on behalf of NiSource, are also expressly qualified by these cautionary statements. All forward-looking statements are based on assumptions that management believes to be reasonable; however, there can be no assurance that actual results will not differ materially.

Realization of NiSource's objectives and expected performance is subject to a wide range of risks and can be adversely affected by, among other things, weather, fluctuations in supply and demand for energy commodities, growth opportunities for NiSource's businesses, increased competition in deregulated energy markets, the success of regulatory and commercial initiatives, dealings with third parties over whom NiSource has no control, actual operating experience of NiSource's assets, the regulatory process, regulatory and legislative changes, the impact of potential new environmental laws or regulations, the results of material litigation, changes in pension funding requirements, changes in general economic, capital and commodity market conditions, counterparty credit risk, and the matters set forth in the Risk Factors section of NiSource's 2011 Form 10-K, which many of are beyond the control of NiSource. In addition, the relative contributions to profitability by each segment, and the assumptions underlying the forward-looking statements relating thereto, may change over time. NiSource expressly disclaims a duty to update any of the forward-looking statements contained in this report.

The following Management's Discussion and Analysis should be read in conjunction with NiSource's Annual Report on Form 10-K for the fiscal year ended December 31, 2011.

CONSOLIDATED REVIEW**Executive Summary**

NiSource (the Company) is an energy holding company under the Public Utility Holding Company Act of 2005 whose subsidiaries are engaged in the transmission, storage and distribution of natural gas in the high-demand energy corridor stretching from the Gulf Coast through the Midwest to New England and the generation, transmission and distribution of electricity in Indiana. NiSource generates virtually 100% of its operating income through these rate-regulated businesses. A significant portion of NiSource's operations are subject to seasonal fluctuations in sales. During the heating season, which is primarily from November through March, net revenues from gas sales are more significant, and during the cooling season, which is primarily from June through September, net revenues from electric sales and transportation services are more significant than in other months.

For the three months ended March 31, 2012, NiSource reported income from continuing operations of \$193.5 million, or \$0.68 per basic share, compared to \$209.1 million, or \$0.75 per basic share reported for the same period in 2011.

The decrease in income from continuing operations was due primarily to the following items:

Warmer weather in the current quarter resulted in a decrease in income from continuing operations of \$45.7 million compared to the prior year. Weather statistics are provided in the Gas Distribution Operations segment discussion.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS
(continued)

NiSOURCE INC.

NiSource incurred higher interest expense of \$13.5 million resulting from the issuance of long-term debt of \$400.0 million in June 2011 and \$500.0 million in November 2011, the expiration of the Sugar Creek deferral, as well as higher average short-term borrowings and rates. These increases were partially offset by the repurchase of \$125.3 million of the 2016 and \$124.7 million of the 2013 notes in November 2011.

Depreciation and amortization increased \$11.8 million due primarily to higher capital spend and the additional depreciation related to the Sugar Creek facility due to the expiration of the deferral as a result of the electric rate case. NiSource's capital spend is projected to be approximately \$1.4 billion in 2012.

These decreases were partially offset by the following:

Electric Operations' net revenues increased \$22.2 million primarily due to the implementation of the electric rate case. Refer to Note 8, Regulatory Matters, in the Notes to Condensed Consolidated Financial Statements (unaudited) for more information.

Regulatory and service programs at Gas Distributions Operations increased net revenues by \$11.5 million primarily due to the rate case at Columbia of Pennsylvania and the implementation of rates under Columbia of Ohio's approved infrastructure replacement program. Refer to Note 8, Regulatory Matters, in the Notes to Condensed Consolidated Financial Statements (unaudited) for more information.

Higher demand margin revenues at Gas Transmission and Storage Operations increased net revenues by \$8.6 million primarily due to growth projects placed into service since the first quarter of 2011. Refer below and to the Gas Transmission and Storage Operations segment discussion for a list of growth projects in progress. Additionally, the implementation of the rate case at Columbia Gulf increased net revenues by \$7.2 million.

These factors and other impacts to the financial results are discussed in more detail within the following discussions of Results of Operations and Results and Discussion of Segment Operations.

Platform for Growth

NiSource's business plan will continue to center on commercial and regulatory initiatives; commercial growth and expansion of the gas transmission and storage business; financial management of the balance sheet; and cost and process excellence.

Commercial and Regulatory Initiatives

NiSource is moving forward on regulatory initiatives across several distribution company markets. Whether through full rate case filings or other approaches, NiSource's goal is to develop strategies that benefit all stakeholders as it addresses changing customer conservation patterns, develops more contemporary pricing structures, and embarks on long-term investment programs to enhance its infrastructure.

Northern Indiana continues to advance initiatives designed to improve customer services and reliability, as well as enhance the region's environmental and economic sustainability.

Edgar Filing: NISOURCE INC/DE - Form 10-Q

Significant environmental investments at Northern Indiana's coal-fired electric generation facilities remain on track, including construction of FGD equipment on two units at the Company's Schahfer generating station. The improvements are part of a nearly \$850 million environmental investment program over the next six to eight years.

On April 5, 2012, Northern Indiana introduced its IN-Charge Electric Vehicle Program. The pilot program provides a credit for residential electric customers to offset the cost of installing a home-based electric vehicle charging system. The program also offers customers free overnight charging for their vehicles at home.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS
(continued)

NiSOURCE INC.

NiSource Gas Distribution companies continue to deliver strong results from their strategy of aligning long-term infrastructure replacement and enhancement programs with a variety of complementary customer programs and rate- design initiatives.

Infrastructure projects across much of the gas distribution territory, combined with customer programs and regulatory treatment, continue to generate earnings growth. These initiatives, part of a \$4 billion plus long-term investment program, along with the new rates in effect contributed to an increase of \$11.5 million in net revenues compared to the same period in the prior year.

On April 13, 2012, Columbia of Massachusetts submitted a filing with the Massachusetts DPU requesting an annual revenue requirement increase of \$29.2 million. Columbia of Massachusetts filed using a historic test year ending December 31, 2011. Additionally, Columbia of Massachusetts proposed a rate-year, rate base treatment, as well as modification to the Targeted Infrastructure Reinvestment Factor. The rate year rate base treatment has been proposed to reduce the impact of regulatory lag. An order is expected later this year with new rates going into effect on November 1, 2012.

At Columbia of Pennsylvania, the state's General Assembly passed HB1294 on February 7, 2012, and was approved as Act 11 by the Governor on February 14, 2012. The law supports the company's infrastructure modernization initiatives by authorizing the Pennsylvania PUC to approve a distribution system improvement charge. In addition, it allows Pennsylvania utilities to base their rates on a forecasted test year, which will allow recovery of infrastructure investments as they are made. A similar law was passed in Ohio in 2011.

Refer to Note 8, Regulatory Matters, in the Notes to Condensed Consolidated Financial Statements (unaudited) for a complete discussion of regulatory and commercial matters.

Commercial Growth and Expansion of the Gas Transmission and Storage Business

NiSource Gas Transmission & Storage Operations continues to develop and execute investment opportunities in emerging and existing markets. The company is active in midstream, mineral leasing and traditional pipeline projects, particularly in areas encompassed by the Company's strategic footprint in the Utica and Marcellus shale production areas.

Work is progressing on NiSource Midstream's Big Pine Gathering System. Anchored by a long-term agreement with XTO Energy Inc., the 70-mile, \$150-million project is located in the hydrocarbon-rich area of western Pennsylvania. It will offer an initial capacity of approximately 425,000 Dth per day with interconnections to multiple interstate pipeline markets. The project's targeted in-service date is December 2012.

NiSource Midstream also is pursuing opportunities in the liquids-rich fairway of the Utica play in eastern Ohio, including proposals to provide gathering services, as well as cryogenic natural gas liquids processing. In addition, NiSource Midstream is in advanced discussions with a producer counterparty regarding a potential joint venture that would optimize NiSource Midstream's minerals position in this area, which could include downstream infrastructure investment opportunities.

NiSource Gas Transmission and Storage Operations is successfully pursuing growth opportunities within its existing pipeline system. For example, it recently completed open seasons on two supply- and market-driven expansions of its Columbia Transmission and

Edgar Filing: NISOURCE INC/DE - Form 10-Q

Columbia Gulf systems. The approximately \$220 million West Side Expansion Project will transport approximately 500,000 Dth per day of Marcellus production originating in southwest Pennsylvania and north-central West Virginia to Gulf Coast markets. Binding long-term precedent agreements have been signed with two shippers. The East Side Expansion Project would connect up to 500,000 Dth per day of northern Pennsylvania Marcellus production with growing mid-Atlantic markets. Discussions with customers for binding transportation agreements are currently underway.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS
(continued)

NiSOURCE INC.

Columbia Transmission received approval from the FERC to construct facilities to serve Virginia Electric and Power Company's 1,329-megawatt, gas-fired generation facility under construction in Warren County, Va. The approximately \$35 million project will provide up to nearly 250,000 Dth per day of long-term, firm transportation starting in mid-2014.

During the first quarter 2012, Columbia Transmission continued discussions with customers regarding a long-term infrastructure modernization program. Similar to the modernization programs in place at NiSource's gas utilities, this effort would enhance the reliability and flexibility of the Company's core pipeline system, ensuring continued safe and reliable service while positioning the Company to meet anticipated regulatory requirements. The plan could involve an investment of about \$4 billion over a 10- to 15-year period.

Financial Management of the Balance Sheet

At the end of the first quarter, NiSource maintained approximately \$632 million in net available liquidity. Additionally, during the first quarter of 2012, Standard & Poor's reaffirmed NiSource's stable credit rating.

On April 5, 2012, NiSource Finance negotiated a \$250.0 million three-year bank term loan with a syndicate of banks which matures on April 3, 2015. Borrowings under the term loan will have an effective cost of LIBOR plus 137 basis points.

Ethics and Controls

NiSource has had a long-term commitment to providing accurate and complete financial reporting as well as high standards for ethical behavior by its employees. NiSource's senior management takes an active role in the development of this Form 10-Q and the monitoring of the company's internal control structure and performance. In addition, NiSource will continue its mandatory ethics training program for all employees.

Refer to Controls and Procedures included in Item 4.

Results of Operations

Quarter Ended March 31, 2012

Net Income

NiSource reported net income of \$193.4 million, or \$0.68 per basic share, for the three months ended March 31, 2012, compared to a net income of \$209.5 million, or \$0.75 per basic share, for the first quarter of 2011. Income from continuing operations was \$193.5 million, or \$0.68 per basic share, for the three months ended March 31, 2012, compared to income from continuing operations of \$209.1 million, or \$0.75 per basic share, for the first quarter of 2011. Operating income was \$399.4 million, a decrease of \$7.0 million from the same period in 2011. All per share amounts are basic earnings per share. Basic average shares of common stock outstanding at March 31, 2012 were 282.9 million compared to 279.3 million at March 31, 2011.

Comparability of line item operating results between quarterly periods is impacted by regulatory and tax trackers that allow for the recovery in rates of certain costs such as bad debt expenses. Therefore, increases in these tracked operating expenses are offset by increases in net revenues and have essentially no impact on income from continuing operations.

Immaterial Restatement

As indicated in NiSource's Annual Report on Form 10-K for the fiscal year ended December 31, 2011, NiSource made correcting adjustments to its historical financial statements including for the first quarter of 2011 relating to deferred revenue, environmental asset recovery and OPEB over-reimbursement. NiSource does not believe that these corrections, individually or in the aggregate, are material to its financial statements

Edgar Filing: NISOURCE INC/DE - Form 10-Q

(unaudited) for the quarterly period ended March 31, 2011. For additional information on these corrections, see Note 1, Nature of Operations and Summary of Significant Accounting Policies, and Note 26, Quarterly Financial Data (Unaudited), of the Consolidated Financial Statements of NiSource's Annual Report on Form 10-K for the fiscal year ended December 31, 2011.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS
(continued)

NiSOURCE INC.

Net Revenues

Total consolidated net revenues (gross revenues less cost of sales) for the quarter ended March 31, 2012, were \$1,028.4 million, a \$32.3 million decrease from the same period last year. This decrease in net revenues was primarily due to decreased Gas Distribution Operations' net revenues of \$73.9 million partially offset by increased Electric Operations' net revenues of \$22.2 million and increased Gas Transmission and Storage Operations' net revenues of \$19.1 million.

Gas Distribution Operations' net revenues decreased due primarily to lower regulatory and tax trackers, which are offset in expense, of \$46.4 million and the effects of warmer weather of \$39.0 million. These decreases in net revenues were partially offset by an increase of \$11.5 million for regulatory and service programs, including impacts from the rate case at Columbia of Pennsylvania and the implementation of rates under Columbia of Ohio's approved infrastructure replacement program.

Electric Operations' net revenues increased primarily due to increased industrial, commercial and residential margins of \$20.6 million mainly due to the implementation of the electric rate case. Additionally, there were lower revenue credits of \$13.9 million in the current period as the electric rate case discontinued these credits and an increase in RTO tracker revenues of \$4.4 million. These increases were partially offset by a decrease in environmental cost recovery of \$11.0 million due to the plant balance eligible for recovery being reset to zero as a result of the electric rate case and a decrease of \$6.7 million due to the impact of weather.

Gas Transmission and Storage Operations' net revenues increased primarily due to higher demand margin revenue of \$8.6 million as a result of growth projects placed into service since the first quarter of 2011. Additionally, there was an increase of \$7.2 million due to the impact of the rate case at Columbia Gulf and higher regulatory trackers of \$2.6 million, which are offset in expense.

Expenses

Operating expenses for the first quarter 2012 were \$636.7 million, a decrease of \$20.6 million from the 2011 period. This decrease was primarily due to lower operation and maintenance expenses of \$23.9 million and a decrease in other taxes of \$6.2 million partially offset by an increase in depreciation and amortization of \$11.8 million. The decrease in operation and maintenance expenses is due to a decrease in regulatory trackers, which are offset in revenue, of \$33.7 million, a mark-to-market adjustment of corporate owned life insurance assets of \$7.9 million, and a decrease in outside service costs of \$3.8 million. This was partially offset by higher electric generation costs of \$6.8 million and an increase in MISO fees resulting from the electric rate case. Other taxes decreased primarily as a result of lower tax trackers, which are offset in revenue. Depreciation and amortization increased due primarily to higher capital expenditures and the additional depreciation related to the Sugar Creek facility due to the expiration of the deferral as a result of the electric rate case.

Equity Earnings in Unconsolidated Affiliates

Equity Earnings in Unconsolidated Affiliates were \$7.7 million during the first quarter of 2012 compared to \$3.0 million for the first quarter of 2011. Equity Earnings in Unconsolidated Affiliates includes investments in Millennium and Hardy Storage which are integral to the Gas Transmission and Storage Operations' business. Equity earnings increased as a result of an increase in earnings at Millennium.

Other Income (Deductions)

Other Income (Deductions) reduced income by \$103.0 million in 2012 compared to a reduction in income of \$86.5 million in the prior year. The increase in deductions is primarily due to an increase in interest expense of \$13.5 million resulting from the issuance of long-term debt of \$400.0 million in June 2011 and \$500.0 million in November 2011, the expiration of the Sugar Creek deferral, as well as higher average short-term borrowings and rates. This was partially offset by a decrease in interest expense due to the repurchase of \$125.3 million of the 2016 and \$124.7

Edgar Filing: NISOURCE INC/DE - Form 10-Q

million 2013 notes in November 2011. Other-net income of \$0.3 million was recorded in 2012 compared to \$3.3 million in 2011.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS
(continued)

NiSOURCE INC.

Income Taxes

Income tax expense for the first quarter of 2012 was \$102.9 million compared to \$110.8 million in the prior year. NiSource's interim effective tax rates reflect the estimated annual effective tax rates for 2012 and 2011, adjusted for tax expense associated with certain discrete items. The effective tax rates for the three months ended March 31, 2012 and 2011 were 34.7% and 34.6%, respectively. These effective tax rates differ from the Federal tax rate of 35% primarily due to the effects of tax credits, state income taxes, utility rate-making, and other permanent book-to-tax differences.

On December 27, 2011, the United States Treasury Department and the IRS issued temporary and proposed regulations effective for years beginning on or after January 1, 2012 that, among other things, provided guidance on whether expenditures qualified as deductible repairs. In addition, on March 15, 2012, the IRS issued a directive to discontinue exam activity related to positions on this issue taken on original tax returns for years beginning before January 1, 2012. NiSource expects the IRS to issue guidance for the treatment of expenditures for gas transmission and distribution assets, and generation within the next twelve months. NiSource further expects that it will be more likely to adopt the procedures provided in this guidance rather than the more general rules set forth in the temporary and proposed regulations. Accordingly, NiSource management expects to adjust unrecognized tax benefits recorded in 2009 related to its change in tax accounting for repairs for gas transmission and distribution assets and generation assets in the period specific guidance for these assets is issued. As noted above, NiSource management believes that the issuance of such guidance and intent to adopt the guidance by NiSource is reasonably possible to occur within the next twelve months. In that event, NiSource will recognize a tax benefit for this issue in the amount of \$80.9 million. NiSource believes these adjustments will not have a significant effect on the income statement.

Refer to Note 13, Income Taxes, in the Notes to the Condensed Consolidated Financial Statements (unaudited) for more detail about income taxes.

Discontinued Operations

There was a net loss of \$0.1 million in the first quarter of 2012 from discontinued operations compared to net income of \$0.4 million in the first quarter of 2011.

Liquidity and Capital Resources

A significant portion of NiSource's operations, most notably in the gas distribution, gas transportation and storage and electric distribution businesses, are subject to seasonal fluctuations in cash flow. During the heating season, which is primarily from November through March, cash receipts from gas sales and transportation services typically exceed cash requirements. During the summer months, cash on hand, together with the seasonal increase in cash flows from the electric business during the summer cooling season and external short-term and long-term financing, is used to purchase gas to place in storage for heating season deliveries and perform necessary maintenance of facilities. NiSource believes that through income generated from operating activities, amounts available under its revolving credit facility, commercial paper program, long-term debt agreements and NiSource's ability to access the capital markets, there is adequate capital available to fund its operating activities and capital expenditures in 2012.

Operating Activities

Net cash from operating activities for the three months ended March 31, 2012 was \$480.0 million, an increase of \$57.9 million compared to the three months ended March 31, 2011. The increase in cash from operating activities was the result of a decrease in pension and other postretirement plan funding of \$87.5 million, which is discussed below. Additionally, there was a decrease of \$78.6 million in the use of working capital from accounts payable resulting from lower gas prices and volumes in 2012 compared to 2011. These increases were partially offset by a decrease in working capital from income tax receivables of \$78.4 million as there was a refund received in 2011 which did not occur in 2012.

Pension and Other Postretirement Plan Funding. NiSource expects to make contributions of approximately \$3.3 million to its pension plans and approximately \$51.7 million to its postretirement medical and life plans in 2012, which could change depending on market conditions. For the three months ended March 31, 2012, NiSource has contributed \$0.9 million to its pension plans and \$13.1 million to its other postretirement benefit plans.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS
(continued)

NiSOURCE INC.

Investing Activities

NiSource's capital expenditures for the three months ended March 31, 2012 were \$292.6 million, compared to \$209.4 million for the comparable period in 2011. The increase is the result of increased spending for Gas Transmission and Storage Operations' system growth and Electric Operations' maintenance and other. NiSource projects 2012 capital expenditures to be approximately \$1.4 billion.

Restricted cash was \$149.7 million and \$160.6 million as of March 31, 2012 and December 31, 2011, respectively. The decrease in restricted cash was due to the wind-down of NiSource's unregulated natural gas marketing business.

Financing Activities

Long-term Debt. Refer to Note 16, "Long-Term Debt," in the Notes to Condensed Consolidated Financial Statements (unaudited) for information on long-term debt.

Credit Facilities. On March 3, 2011, NiSource Finance entered into a new \$1.5 billion four-year revolving credit facility with a syndicate of banks led by Barclays Capital. The new facility replaced an existing \$1.5 billion five-year credit facility which would have expired during July 2011. The purpose of the new facility is to fund ongoing working capital requirements and for general corporate purposes, including supporting liquidity for the company's commercial paper program, and provides for the issuance of letters of credit.

During June 2011, NiSource Finance implemented a new commercial paper program with a program limit of up to \$500.0 million with a dealer group comprised of Barclays, Citigroup, Credit Suisse and Wells Fargo. Commercial paper issuances are supported by available capacity under NiSource's \$1.5 billion unsecured revolving credit facility, which expires in March 2015.

NiSource Finance had \$391.0 million in outstanding borrowings under its four-year revolving credit facility at March 31, 2012, at a weighted average interest rate of 2.07% and borrowings of \$725.0 million at December 31, 2011, at a weighted average interest rate of 1.99%. In addition, NiSource Finance had \$496.6 million in commercial paper outstanding at March 31, 2012, at a weighted average interest rate of 1.01% and \$402.7 million in commercial paper outstanding at December 31, 2011, at a weighted average interest rate of 1.01%.

As of March 31, 2012 and December 31, 2011, NiSource had \$376.6 million and \$231.7 million, respectively, of short-term borrowings recorded on the Condensed Consolidated Balance Sheets (unaudited) and cash from financing activities in the same amount relating to its accounts receivable securitization facilities. See Note 11, "Transfers of Financial Assets."

As of March 31, 2012 and December 31, 2011, NiSource had \$37.5 million of stand-by letters of credit outstanding of which \$19.2 million were under the revolving credit facility.

As of March 31, 2012, an aggregate of \$593.2 million of credit was available under the credit facility.

Sale of Trade Accounts Receivables. Refer to Note 11, "Transfers of Financial Assets," in the Notes to Condensed Consolidated Financial Statements (unaudited) for information on the sale of accounts receivable.

All accounts receivable sold to the commercial paper conduits are valued at face value, which approximates fair value due to their short-term nature. The amount of the undivided percentage ownership interest in the accounts receivables sold is determined, in part, by required loss reserves under the agreements.

Credit Ratings. On February 29, 2012, Standard & Poor's affirmed the senior unsecured ratings for NiSource and its subsidiaries at BBB-. Standard & Poor's outlook for NiSource and all of its subsidiaries is stable. On December 13, 2011, Fitch affirmed the senior unsecured ratings for NiSource at BBB-, and the existing ratings of all other subsidiaries. Fitch's outlook for NiSource and all of its subsidiaries is stable. On November 18, 2011, Moody's

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS**
(continued)**NiSOURCE INC.**

Investors Service affirmed the senior unsecured ratings for NiSource at Baa3, and the existing ratings of all other subsidiaries. Moody's outlook for NiSource and all of its subsidiaries is stable. Although all ratings continue to be investment grade, a downgrade by Standard & Poor's, Moody's or Fitch would result in a rating that is below investment grade.

Certain NiSource affiliates have agreements that contain ratings triggers that require increased collateral if the credit ratings of NiSource or certain of its subsidiaries are rated below BBB- by Standard & Poor's or Baa3 by Moody's. These agreements are primarily for insurance purposes and for the physical purchase or sale of power. The collateral requirement that would be required in the event of a downgrade below the ratings trigger levels would amount to approximately \$23.0 million. In addition to agreements with ratings triggers, there are other agreements that contain adequate assurance or material adverse change provisions that could necessitate additional credit support such as letters of credit and cash collateral to transact business. In addition, under Northern Indiana's trade receivables sales program, an event of termination occurs if Northern Indiana's debt rating is withdrawn by either Standard & Poor's or Moody's, or falls below BB or Ba2 at either Standard & Poor's or Moody's, respectively. Likewise, under Columbia of Ohio's and Columbia of Pennsylvania's trade receivables sales programs, an event of termination occurs if NiSource's debt rating is withdrawn by either Standard & Poor's or Moody's, or falls below BB- or Ba3 at either Standard & Poor's or Moody's, respectively.

Contractual Obligations. Refer to Note 13, Income Taxes, in the Notes to Condensed Consolidated Financial Statements (unaudited) for material changes recorded during the three months ended March 31, 2012 to NiSource's uncertain tax positions recorded as of December 31, 2011.

Forward Equity Sale. Refer to Note 4, Forward Equity Agreement, in the Notes to Condensed Consolidated Financial Statements (unaudited) for information on financing activities related to the forward equity sale.

Market Risk Disclosures

Risk is an inherent part of NiSource's energy businesses. The extent to which NiSource properly and effectively identifies, assesses, monitors and manages each of the various types of risk involved in its businesses is critical to its profitability. NiSource seeks to identify, assess, monitor and manage, in accordance with defined policies and procedures, the following principal market risks that are involved in NiSource's energy businesses: commodity price risk, interest rate risk and credit risk. Risk management at NiSource is a multi-faceted process with oversight by the Risk Management Committee that requires constant communication, judgment and knowledge of specialized products and markets. NiSource's senior management takes an active role in the risk management process and has developed policies and procedures that require specific administrative and business functions to assist in the identification, assessment and control of various risks. These include but are not limited to market, operational, financial and strategic risk types. In recognition of the increasingly varied and complex nature of the energy business, NiSource's risk management process, policies and procedures continue to evolve and are subject to ongoing review and modification.

Various analytical techniques are employed to measure and monitor NiSource's market and credit risks, including VaR. VaR represents the potential loss or gain for an instrument or portfolio from changes in market factors, for a specified time period and at a specified confidence level.

Commodity Price Risk

NiSource is exposed to commodity price risk as a result of its subsidiaries' operations involving natural gas and power. To manage this market risk, NiSource's subsidiaries use derivatives, including commodity futures contracts, swaps and options. NiSource is not involved in speculative energy trading activity.

Commodity price risk resulting from derivative activities at NiSource's rate-regulated subsidiaries is limited, since regulations allow recovery of prudently incurred purchased power, fuel and gas costs through the rate-making process, including gains or losses on these derivative instruments. If states should explore additional regulatory reform, these subsidiaries may begin providing services without the benefit of the traditional rate-making process and may be more exposed to commodity price risk. Some of NiSource's rate-regulated utility subsidiaries offer commodity price risk products to its customers for which derivatives are used to hedge forecasted customer usage under such products. These

Edgar Filing: NISOURCE INC/DE - Form 10-Q

subsidiaries do not have regulatory recovery orders for these products and are subject to gains and losses recognized in earnings due to hedge ineffectiveness.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS
(continued)

NiSOURCE INC.

Interest Rate Risk

NiSource is exposed to interest rate risk as a result of changes in interest rates on borrowings under its revolving credit agreement, commercial paper program and accounts receivable programs, which have interest rates that are indexed to short-term market interest rates. NiSource is also exposed to interest rate risk due to changes in interest rates on fixed-to-variable interest rate swaps that hedge the fair value of long-term debt. Based upon average borrowings and debt obligations subject to fluctuations in short-term market interest rates, an increase (or decrease) in short-term interest rates of 100 basis points (1%) would have increased (or decreased) interest expense by \$4.4 million for the three months ended March 31, 2012 and \$4.4 million for the three months ended March 31, 2011.

Credit Risk

Due to the nature of the industry, credit risk is embedded in many of NiSource's business activities. NiSource's extension of credit is governed by a Corporate Credit Risk Policy. In addition, Risk Management Committee guidelines are in place which document management approval levels for credit limits, evaluation of creditworthiness, and credit risk mitigation efforts. Exposures to credit risks are monitored by the Corporate Credit Risk function which is independent of commercial operations. Credit risk arises due to the possibility that a customer, supplier or counterparty will not be able or willing to fulfill its obligations on a transaction on or before the settlement date. For derivative related contracts, credit risk arises when counterparties are obligated to deliver or purchase defined commodity units of gas or power to NiSource at a future date per execution of contractual terms and conditions. Exposure to credit risk is measured in terms of both current obligations and the market value of forward positions net of any posted collateral such as cash, letters of credit and qualified guarantees of support.

NiSource closely monitors the financial status of its banking credit providers and interest rate swap counterparties. NiSource evaluates the financial status of its banking partners through the use of market-based metrics such as credit default swap pricing levels, and also through traditional credit ratings provided by major credit rating agencies.

On October 31, 2011, cash and derivatives broker-dealer MF Global filed for Chapter 11 bankruptcy protection. MF Global brokered NYMEX hedges of natural gas futures on behalf of NiSource affiliates. At the date of bankruptcy, NiSource affiliates had contracts open with MF Global with settlement dates ranging from November 2011 to February 2014. On November 3, 2011, these contracts were measured at a mark-to-market loss of approximately \$46.4 million. NiSource affiliates had posted initial margin to open these accounts of \$6.9 million and additional maintenance margin for mark-to-market losses, for a total cash balance of \$53.3 million. Within the first week after the filing, at the direction of the Bankruptcy Court, a transfer of assets was initiated on behalf of NiSource affiliates to a court-designated replacement broker for future trade activity. The existing futures positions were closed and then rebooked with the replacement broker at the new closing prices as of November 3, 2011. Initial margin on deposit at MF Global of \$5.7 million was transferred to the court-designated replacement broker. The maintenance margin was retained by MF Global to offset the loss positions of the open contracts on November 3, 2011. NiSource affiliates are monitoring the activity in the bankruptcy case and have filed a proof of claim at the Court's direction. As of March 31, 2012, NiSource affiliates maintained a reserve for the \$1.2 million difference between the initial margin posted with MF Global and the cash transferred to the court-designated replacement broker as a loss contingency.

Fair Value Measurement

NiSource measures certain financial assets and liabilities at fair value. The level of the fair value hierarchy disclosed is based on the lowest level of input that is significant to the fair value measurement. NiSource's financial assets and liabilities include price risk assets and liabilities, available-for-sale securities and a deferred compensation plan obligation.

Exchange-traded derivative contracts are generally based on unadjusted quoted prices in active markets and are classified within Level 1. These financial assets and liabilities are secured with cash on deposit with the exchange; therefore nonperformance risk has not been incorporated into these valuations. Certain non-exchange-traded derivatives are valued using broker or over-the-counter, on-line exchanges. In such cases, these non-exchange-traded derivatives are classified within Level 2. Non-exchange-based derivative instruments include swaps, forwards, and options. In certain instances, these instruments may utilize models to measure fair value. NiSource

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS**
(continued)**NiSOURCE INC.**

uses a similar model to value similar instruments. Valuation models utilize various inputs that include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, other observable inputs for the asset or liability, and market-corroborated inputs, i.e., inputs derived principally from or corroborated by observable market data by correlation or other means. Where observable inputs are available for substantially the full term of the asset or liability, the instrument is categorized in Level 2. Certain derivatives trade in less active markets with a lower availability of pricing information and models may be utilized in the valuation. When such inputs have a significant impact on the measurement of fair value, the instrument is categorized in Level 3. Credit risk is considered in the fair value calculation of derivative instruments that are not exchange-traded. Credit exposures are adjusted to reflect collateral agreements which reduce exposures.

Price risk management assets also include fixed-to-floating interest-rate swaps, which are designated as fair value hedges, as a means to achieve its targeted level of variable-rate debt as a percent of total debt. NiSource uses a calculation of future cash inflows and estimated future outflows related to the swap agreements, which are discounted and netted to determine the current fair value. Additional inputs to the present value calculation include the contract terms, as well as market parameters such as current and projected interest rates and volatility. As they are based on observable data and valuations of similar instruments, the interest-rate swaps are categorized in Level 2 in the fair value hierarchy. Credit risk is considered in the fair value calculation of the interest rate swap.

Refer to Note 10, Fair Value Disclosures, in the Notes to the Condensed Consolidated Financial Statements (unaudited) for additional information on NiSource's fair value measurements.

Market Risk Measurement

Market risk refers to the risk that a change in the level of one or more market prices, rates, indices, volatilities, correlations or other market factors, such as liquidity, will result in losses for a specified position or portfolio. NiSource calculates a one-day VaR at a 95% confidence level for the unregulated gas marketing group that utilizes a variance/covariance methodology. The daily market exposure for the unregulated gas marketing portfolio on an average, high and low basis was \$0.1 million, \$0.2 million and \$0.1 million, respectively, for the first quarter of 2012. Prospectively, management has set the VaR limit at \$0.4 million for gas marketing. Exceeding this limit would result in management actions to reduce portfolio risk.

Refer to Note 9, Risk Management Activities, in the Notes to Condensed Consolidated Financial Statements (unaudited) for further discussion of NiSource's risk management.

Off Balance Sheet Arrangements

As a part of normal business, NiSource and certain subsidiaries enter into various agreements providing financial or performance assurance to third parties on behalf of certain subsidiaries. Such agreements include guarantees and stand-by letters of credit.

NiSource has issued guarantees that support up to approximately \$141.9 million of commodity-related payments for its current and former subsidiaries involved in energy marketing activities. These guarantees were provided to counterparties in order to facilitate physical and financial transactions involving natural gas services. To the extent liabilities exist under the commodity-related contracts subject to these guarantees, such liabilities are included in the Condensed Consolidated Balance Sheets (unaudited).

NiSource has purchase and sales agreement guarantees totaling \$30.0 million, which guarantee performance of the seller's covenants, agreements, obligations, liabilities, representations and warranties under the agreements. No amounts related to the purchase and sales agreement guarantees are reflected in the Condensed Consolidated Balance Sheets (unaudited). Management believes that the likelihood NiSource would be required to perform or otherwise incur any significant losses associated with any of the aforementioned guarantees is remote.

NiSource has other guarantees outstanding. Refer to Note 19-A, Guarantees and Indemnities, in the Notes to Condensed Consolidated Financial Statements (unaudited) for additional information about NiSource's off balance sheet arrangements.

NiSOURCE INC.

Other Information

Critical Accounting Policies

Goodwill. NiSource's goodwill assets at March 31, 2012 were \$3,677.3 million, most of which resulted from the acquisition of Columbia on November 1, 2000. In addition, Northern Indiana Gas Distribution Operations' goodwill assets at June 30, 2011 related to the purchase of Northern Indiana Fuel and Light and Kokomo Gas were \$18.8 million. As required, NiSource tests for impairment of goodwill on an annual basis and on an interim basis when events or circumstances indicate that a potential impairment may exist. NiSource's annual goodwill test takes place in the second quarter of each year and was most recently finalized as of June 30, 2011. The fair value of each reporting unit exceeded the carrying value based on this impairment test. Refer to Note 12, "Goodwill Assets," in the Notes to Condensed Consolidated Financial Statements (unaudited) for additional information concerning NiSource's annual goodwill test.

There were no significant changes to critical accounting policies for the period ended March 31, 2012.

Recently Adopted and Issued Accounting Pronouncements

Refer to Note 2, "Recent Accounting Pronouncements," in the Notes to Condensed Consolidated Financial Statements (unaudited).

International Financial Reporting Standards

In February 2012, the SEC Chief Accountant advised that SEC commissioners will receive a proposal on IFRS in the coming months when the SEC Staff produces their final report on IFRS. In February 2010, the SEC expressed its commitment to the development of a single set of high quality globally accepted accounting standards and directed its staff to execute a work plan addressing specific areas of concern regarding the potential incorporation of IFRS for the U.S. In May 2011, a Staff Paper was issued outlining a possible endorsement approach for the incorporation of IFRS into the U.S. financial reporting system, as opposed to a single-date approach, if the SEC were to decide that incorporation of IFRS is in the best interest of U.S. investors. Under this possible framework, IFRS would be incorporated into U.S. GAAP during a transition period (e.g., five to seven years) and the FASB would be retained as the United States standard setter. The accounting differences between U.S. GAAP and IFRS are complex and significant in many aspects, and conversion to IFRS would have broad impacts across NiSource. NiSource's strategy for addressing a potential mandate of IFRS will be re-assessed when the SEC makes its determination on whether to require the use of IFRS and by what method.

Dodd-Frank Financial Reform Bill

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act) was passed by Congress on July 15, 2010 and was signed into law on July 21, 2010. The Act, among other things, establishes a Financial Stability Oversight Council (FSOC) and a Consumer Financial Protection Bureau (CFPB) whose duties will include the monitoring of domestic and international financial regulatory proposals and developments, as well as the protection of consumers. The FSOC may submit comments to the SEC and any standard-setting body with respect to an existing or proposed accounting principle, standard or procedure. The Act also creates increased oversight of the over-the-counter derivative market, requiring certain transactions in swaps, options, and other derivatives to be cleared through a clearing house, requiring cash margins to be posted for those transactions, and requiring substantial reporting and regulatory oversight for entities engaged as a dealer in derivatives and swaps. Some regulations to implement the Act have been finalized and others are scheduled to be issued later this year. NiSource is monitoring the rulemaking process under the Act. Although the Act and the new regulations are expected to have some impact on capital markets and derivatives markets generally, NiSource does not expect the Act to have any material effect on its operations.

Total	3,339,992	3,336,971

NiSource's natural gas distribution operations serve approximately 3.3 million customers in seven states: Ohio, Indiana, Pennsylvania, Massachusetts, Virginia, Kentucky and Maryland. The regulated subsidiaries offer both traditional bundled services as well as transportation only for customers that purchase gas from alternative suppliers. The operating results reflect the temperature-sensitive nature of customer demand with 74% of annual residential and commercial throughput affected by seasonality. As a result, segment operating income is higher in the first and fourth quarters reflecting the heating demand during the winter season.

Regulatory Matters

Refer to Note 8, Regulatory Matters, in the Notes to Condensed Consolidated Financial Statements (unaudited) for information on significant rate developments and cost recovery and trackers for the Gas Distribution Operations segment.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS**

NiSOURCE INC.

Gas Distribution Operations (continued)

Customer Usage. Increased efficiency of natural gas appliances and improvements in home building codes and standards has contributed to a long-term trend of declining average use per customer. In addition, usage for the first quarter of 2012 declined from the same period last year primarily due to warmer than normal weather. While historically, rate design at the distribution level has been structured such that a large portion of cost recovery is based upon throughput, rather than in a fixed charge, operating costs are largely incurred on a fixed basis, and do not fluctuate due to changes in customer usage. As a result, the NiSource LDCs have pursued changes in rate design to more effectively match recoveries with cost incurrence. Each of the states in which the NiSource LDCs operate has different requirements regarding the procedure for establishing changes to rate design. Columbia of Ohio restructured its rate design through a base rate proceeding and has adopted a de-coupled rate design which more closely links the recovery of fixed costs with fixed charges. Columbia of Massachusetts and Columbia of Virginia received regulatory approval of decoupling mechanisms which adjust revenues to an approved benchmark level through a volumetric adjustment factor. In its 2011 rate case, Columbia of Pennsylvania implemented a higher fixed residential customer charge. In its 2010 rate case, Northern Indiana implemented a higher fixed customer charge for residential and small customer classes moving toward full straight fixed variable rate design. This rate design was also incorporated in the settlement of the 2011 merger of the three Indiana LDCs; Northern Indiana, Kokomo Gas and Northern Indiana Fuel and Light.

Environmental Matters

Various environmental matters occasionally impact the Gas Distribution Operations segment. As of March 31, 2012, a reserve has been recorded to cover probable and estimable environmental response actions. Refer to Note 19-C, Environmental Matters, in the Notes to Condensed Consolidated Financial Statements (unaudited) for additional information regarding environmental matters for the Gas Distribution Operations segment.

Weather

In general, NiSource calculates the weather related revenue variance based on changing customer demand driven by weather variance from normal heating degree-days. Normal is evaluated using heating degree days across the NiSource distribution region. While the temperature base for measuring heating degree days (i.e. the estimated average daily temperature at which heating load begins) varies slightly across the region, the NiSource composite measurement is based on 65 degrees. NiSource composite heating degree days reported do not directly correlate to the weather related dollar impact on the results of Gas Distribution Operations. Heating degree days experienced during different times of the year or in different operating locations may have more or less impact on volume and dollars depending on when and where they occur. When the detailed results are combined for reporting, there may be weather related dollar impacts on operations when there is not an apparent or significant change in the aggregated NiSource composite heating degree-day comparison.

Weather in the Gas Distribution Operations territories for the first quarter of 2012 was 23% warmer than normal and 25% warmer than the first quarter in 2011.

Throughput

Total volumes sold and transported of 309.0 MMDth for the first quarter of 2012 decreased by 39.8 MMDth from the same period last year. This 11.4% decrease in volume was primarily due to warmer weather.

Net Revenues

Net revenues for the first quarter of 2012 were \$513.7 million, a decrease of \$73.9 million from the same period in 2011, due primarily to lower regulatory and tax trackers, which are offset in expense, of \$46.4 million and the effects of warmer weather of \$39.0 million. These decreases in net revenues were partially offset by an increase of \$11.5 million for regulatory and service programs, including impacts from the rate case at Columbia of Pennsylvania and the implementation of rates under Columbia of Ohio's approved infrastructure replacement program.

Edgar Filing: NISOURCE INC/DE - Form 10-Q

At Northern Indiana, sales revenues and customer billings are adjusted for amounts related to under and over-recovered purchased gas costs from prior periods per regulatory order. These amounts are primarily reflected in the Other gross revenues statistic provided at the beginning of this segment discussion. The adjustment to Other gross revenues for the three months ended March 31, 2012 was a revenue decrease of \$36.2 million compared to a decrease of \$34.9 million for the three months ended March 31, 2011.

(continued)

NiSOURCE INC.

Gas Distribution Operations (continued)

Operating Income

For the first quarter of 2012, Gas Distribution Operations reported operating income of \$212.0 million, a decrease of \$29.5 million from the comparable 2011 period. Operating income decreased as a result of lower net revenues, as described above, partially offset by lower operating expenses. Operating expenses were \$44.4 million lower than the comparable period reflecting a decrease of \$46.4 million in regulatory and tax trackers, which are offset in net revenue. This was partially offset by an increase of \$3.8 million in depreciation costs due to an increase in capital expenditures.

Total	505.5	523.1

NiSource's Gas Transmission and Storage Operations segment primarily consists of the operations of Columbia Transmission, Columbia Gulf, NiSource Midstream, Crossroads Pipeline, and the equity investments in Millennium and Hardy Storage. In total, NiSource owns a pipeline network of approximately 15,000 miles extending from the Gulf of Mexico to New York and the eastern seaboard. The pipeline network serves customers in 16 northeastern, mid-Atlantic, midwestern and southern states, as well as the District of Columbia. In addition, the Gas Transmission and Storage Operations segment operates one of the nation's largest underground natural gas storage systems.

Gas Transmission and Storage Operations' most significant projects are as follows:

Growth Projects Placed into Service

Clendenin Project. Construction began in 2010 on this approximately \$18 million capital project that modified existing facilities in the Clendenin, West Virginia area to move Marcellus production to liquid market centers. The Clendenin project provided the Gas Transmission and Storage Operations segment the ability to meet incremental transportation demand of up to 150,000 Dth per day. Long-term firm transportation contracts for 133,100 Dth were executed, some of which began in the third quarter 2010 and others that began in June 2011.

East Lateral Project. In 2010, the Gas Transmission and Storage Operations segment initiated a \$5 million project to modify existing facilities on the Columbia Gulf East Lateral to provide firm transportation service for up to 300,000 Dth per day. Firm transportation contracts for 250,000 Dth per day were executed for five-year terms. This FERC-approved project was completed and put into service in May 2011.

Majorsville, PA Project. The Gas Transmission and Storage Operations segment executed three separate projects totaling approximately \$80 million in the Majorsville, PA vicinity to aggregate Marcellus Shale gas production for downstream transmission. Fully contracted, the pipeline and compression assets allow the Gas Transmission and Storage Operations segment to gather and deliver more than 325,000 Dth per day of

Edgar Filing: NISOURCE INC/DE - Form 10-Q

Marcellus production gas to the Majorsville MarkWest Liberty processing plants developed by MarkWest Liberty Midstream & Resources L.L.C.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS**
(continued)

NiSOURCE INC.

Gas Transmission and Storage Operations (continued)

In 2010, Columbia Transmission received approval from the FERC to refunctionalize certain transmission assets to gathering and transferred these pipeline facilities to a newly formed affiliate, NiSource Midstream Services, LLC. These facilities are included in providing non-FERC jurisdiction gathering services to producers in the Majorsville, PA vicinity. Two of the three projects were completed and placed into service on August 1, 2010, creating an integrated gathering and processing system serving Marcellus production in southwestern Pennsylvania and northern West Virginia. Precedent agreements were executed by anchor shippers in the fourth quarter of 2009, which were superseded by the execution of long-term service agreements in August and September 2010. In the fourth quarter, construction began on the third project on a pipeline to deliver residue gas from the Majorsville MarkWest Liberty processing plant to the Texas Eastern Wind Ridge compressor station in southwestern Pennsylvania to provide significant additional capacity to eastern markets. This project was placed into service in April 2011.

Southern Appalachian Project. The Gas Transmission and Storage Operations segment invested nearly \$4 million that expanded Line SM-116 to transport approximately 38,500 Dth per day on a firm basis as a continuation of its strategy to provide transportation services to producers of Marcellus and Appalachian gas. This additional capacity was supported by executed, binding precedent agreements. These additional facilities were placed in service in April 2011.

Growth Projects in Progress

Smithfield Project. The Gas Transmission and Storage Operations segment is making approximately \$14 million of capital investments for modifications to existing pipeline and compressor facilities to accommodate receipt of up to 150,000 Dth per day of additional Marcellus gas from connections near Smithfield, West Virginia and Waynesburg, Pennsylvania. Three anchor shippers agreed to long-term, firm transportation contracts, one contract that began in April 2011 and others that began in August 2011. The project is expected to be fully in service in July 2012.

Rimersburg Expansion Project. The Gas Transmission and Storage Operations segment is investing approximately \$7 million for this project that added capacity to north central Pennsylvania to meet the growing demands of producers in the area. The project expands Line 134 from the Brinker compressor station to the Iowa regulator, adding approximately 19,000 Dth per day of additional capacity, all of which has been sold through precedent agreements. The project will be placed into service in the second quarter of 2012.

Line WB Expansion Project. The Gas Transmission and Storage Operations segment is expanding its WB system through investment in additional facilities, which provide transportation service on a firm basis from Loudoun, Virginia to Leach, Kentucky. The expansion totaled approximately \$14 million, allowing producers to meet incremental transportation demand in the Marcellus/Appalachian Basin. Binding precedent agreements for approximately 175,000 Dth per day of firm transportation capacity were executed, some which began in January 2011. Final construction on all facilities will be completed and placed into service in May 2012.

Big Pine Gathering System Project. The Gas Transmission and Storage Operations segment is making an investment of approximately \$150 million, which includes right-of-way acquisitions and installation, refurbishment and operation of approximately 70 miles of pipeline facilities in the hydrocarbon-rich Western Pennsylvania shale production region. The newly constructed pipeline will have an initial combined capacity of 425,000 Dth per day. Natural gas will initially be sourced from a new processing plant owned by XTO Energy Inc., a subsidiary of ExxonMobil, and delivered to Columbia Transmission and two other third-party pipelines in Pennsylvania. The project is expected to be placed in service in late 2012.

Power Plant Generation Project. The Gas Transmission and Storage Operations segment is spending nearly \$35 million on an expansion project, which includes new pipeline and modifications to existing compression assets, with Virginia Power Services Energy Corporation, Inc., the energy manager for Virginia Electric and Power Company. This project will expand the Columbia Transmission system in order to provide up to nearly 250,000 Dth per day of transportation capacity under a long-term, firm contract. The project is expected to be ready for commercial operations by mid-2014.

Westside Expansion. The Gas Transmission and Storage Operations segment is planning to invest \$220 million in new pipeline and compression to increase supply origination from the Smithfield and Waynesburg areas on the Columbia Transmission system and provides a

Edgar Filing: NISOURCE INC/DE - Form 10-Q

backhaul transportation path to Gulf Coast markets on the Columbia Gulf system. This investment will increase capacity up to 500,000 Dth per day transporting Marcellus production under long-term, firm contracts. The project is expected to be in service by the fourth quarter 2014.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS
(continued)

NiSOURCE INC.

Gas Transmission and Storage Operations (continued)

Equity Investments

Millennium Pipeline. Millennium Pipeline Company, L.L.C. operates approximately 250 miles of pipeline granted under the authority of the FERC. The Millennium pipeline has the capability to transport up to 525,400 Dth per day of natural gas to markets along its route, which lies between Corning, New York and Ramapo, New York, as well as to the New York City market through its pipeline interconnections. Columbia Transmission owns a 47.5% interest in Millennium and acts as operator for the pipeline in partnership with DTE Millennium Company and National Grid Millennium LLC, which each own an equal remaining share of the company.

Columbia Transmission made a contribution of \$5.2 million and received distributions of earnings of \$12.4 million from Millennium in the first quarter 2012. No contributions were made nor distributions received during the first quarter of 2011.

Hardy Storage. Hardy Storage is a joint venture between subsidiaries of Columbia Transmission and Piedmont that manages an underground storage field in Hardy and Hampshire counties in West Virginia. Columbia Transmission serves as operator of the company, which is regulated by the FERC. Hardy Storage has a working storage capacity of 12 Bcf and the ability to deliver 176,000 Dth of natural gas per day.

Hardy Storage distributed a total of \$0.5 million and \$1.8 million of available accumulated earnings in the first quarter 2012 and 2011, respectively, to NiSource. NiSource made no contributions during the first quarter of 2012 or 2011.

Sales and Percentage of Physical Capacity Sold

Columbia Transmission and Columbia Gulf compete for transportation customers based on the type of service a customer needs, operating flexibility, available capacity and price. Columbia Gulf and Columbia Transmission provide a significant portion of total transportation services under firm contracts and derive a smaller portion of revenues through interruptible contracts, with management seeking to maximize the portion of physical capacity sold under firm contracts.

Firm service contracts require pipeline capacity to be reserved for a given customer between certain receipt and delivery points. Firm customers generally pay a capacity reservation fee based on the amount of capacity being reserved regardless of whether the capacity is used, plus an incremental usage fee when the capacity is used. Annual capacity reservation revenues derived from firm service contracts generally remain constant over the life of the contract because the revenues are based upon capacity reserved and not whether the capacity is actually used. The high percentage of revenue derived from capacity reservation fees mitigates the risk of revenue fluctuations within the Gas Transmission and Storage Operations segment due to changes in near-term supply and demand conditions. For the quarter ended March 31, 2012, approximately 91.8% of the transportation revenues were derived from capacity reservation fees paid under firm contracts and 6.5% of the transportation revenues were derived from usage fees under firm contracts compared to approximately 91.7% and 6.8%, respectively, for the quarter ended March 31, 2011.

Interruptible transportation service is typically short term in nature and is generally used by customers that either do not need firm service or have been unable to contract for firm service. These customers pay a usage fee only for the volume of gas actually transported. The ability to provide this service is limited to available capacity not otherwise used by firm customers, and customers receiving services under interruptible contracts are not assured capacity in the pipeline facilities. Gas Transmission and Storage Operations provides interruptible service at competitive prices in order to capture short term market opportunities as they occur and interruptible service is viewed by management as an important strategy to optimize revenues from the gas transmission assets. For the quarters ended March 31, 2012 and 2011, approximately 1.7% and 1.5%, respectively, of the transportation revenues were derived from interruptible contracts.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS
(continued)

NiSOURCE INC.

Gas Transmission and Storage Operations (continued)

Regulatory Matters

Refer to Note 8, Regulatory Matters, in the Notes to Condensed Consolidated Financial Statements (unaudited) for information on regulatory matters for the Gas Transmission and Storage Operations segment.

Environmental Matters

Various environmental matters occasionally impact the Gas Transmission and Storage Operations segment. As of March 31, 2012, a reserve has been recorded to cover probable and estimable environmental response actions. Refer to Note 19-C, Environmental Matters, in the Notes to Condensed Consolidated Financial Statements (unaudited) for additional information regarding environmental matters for the Gas Transmission and Storage Operations segment.

Throughput

Columbia Transmission's throughput consists of gas transportation service deliveries to LDC city gates, to gas fired power plants, other industrial customers, or other interstate pipelines in its market area. Columbia Transmission's market area covers portions of Northeastern, Mid-Atlantic, Midwestern, and Southern states as well as the District of Columbia. Gas delivered via transportation services to storage is not accounted for as throughput until it is withdrawn from storage and delivered to one of the aforementioned locations via a transportation service. Throughput for Columbia Gulf traditionally consists of gas delivered to Columbia Transmission at Leach, Kentucky as well as gas delivered south of Leach to other interstate pipelines or to an LDC's city gate. Recent changes in market conditions have resulted in more non-traditional throughput such as backhaul transportation services that originate in Leach that flow southward. Columbia Gulf has also begun to flow gas in a southerly direction from its Louisiana interconnects to Florida markets. Crossroads Pipeline serves customers in Northern Indiana and Ohio via gas flowing west to east originating from outside the Chicago area to Cygnet, Ohio where it interconnects with Columbia Transmission. Intra-segment eliminations represent gas delivered to an affiliated pipeline within the segment.

Throughput for the Gas Transmission and Storage Operations segment totaled 505.5 MMDth for the first quarter of 2012, compared to 523.1 MMDth for the same period in 2011. The decrease of 17.6 MMDth for the three-month period was attributable to the significantly warmer weather, which drove a vast majority of the decrease on the Columbia Transmission system. Because of the impact from increased production of Appalachian shale gas and the warmer winter weather, fewer deliveries were made on the Columbia Gulf system to Columbia Transmission at Leach, Kentucky. The increase in shale gas from the Appalachian, Haynesville and Barnett shale areas has also led to an increase in non-traditional throughput on Columbia Gulf in the form of backhaul services to serve demand in the Florida markets.

Net Revenues

Net revenues were \$274.5 million for the first quarter of 2012, an increase of \$19.1 million from the same period in 2011, primarily due to higher demand margin revenue of \$8.6 million as a result of growth projects placed into service since the first quarter of 2011. Additionally, there was an increase of \$7.2 million due to the impact of the rate case at Columbia Gulf and higher regulatory trackers of \$2.6 million, which are offset in expense.

Operating Income

Operating income was \$138.6 million for the first quarter of 2012, an increase of \$20.2 million from the first quarter of 2011. This increase is due to an increase in operating revenues, as described above, and higher equity earnings, partially offset by higher operating expenses. Equity earnings increased \$4.7 million primarily from increased earnings at Millennium. Operating expenses increased as a result of higher other taxes

Edgar Filing: NISOURCE INC/DE - Form 10-Q

of \$3.2 million and an increase in regulatory trackers of \$2.6 million, which are offset in operating revenues. These increases were partially offset by a decrease in outside service costs of \$3.8 million and lower employee and administrative expenses of \$2.6 million, primarily pension costs.

NiSource generates and distributes electricity, through its subsidiary Northern Indiana, to approximately 457 thousand customers in 20 counties in the northern part of Indiana. The operating results reflect the temperature-sensitive nature of customer demand with annual sales affected by temperatures in the northern part of Indiana. As a result, segment operating income is generally higher in the second and third quarters, reflecting cooling demand during the summer season.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS
(continued)

NiSOURCE INC.

Electric Operations (continued)

Electric Supply

On October 28, 2011, Northern Indiana filed its 2011 Integrated Resource Plan with the IURC. The plan evaluates demand-side and supply-side resource alternatives to reliably and cost-effectively meet Northern Indiana customers' future energy requirements over the next twenty years. Existing resources are expected to be sufficient, assuming favorable outcomes for environmental upgrades, to meet customers' needs for the next decade. Northern Indiana continues to monitor and assess economic, regulatory and legislative activity, and will update its resource plan as appropriate.

Regulatory Matters

Refer to Note 8, Regulatory Matters, in the Notes to Condensed Consolidated Financial Statements (unaudited) for information on significant rate developments, MISO, and cost recovery and trackers for the Electric Operations segment.

Environmental Matters

Various environmental matters occasionally impact the Electric Operations segment. As of March 31, 2012, a reserve has been recorded to cover probable and estimable environmental response actions. Refer to Note 19-C, Environmental Matters, in the Notes to Condensed Consolidated Financial Statements (unaudited) for additional information regarding environmental matters for the Electric Operations segment.

Sales

Electric Operations sales quantities for the first quarter of 2012 were 4,125.6 gwh, a decrease of 209.1 gwh compared to the first quarter of 2011.

Net Revenues

Net revenues were \$237.4 million for the first quarter of 2012, an increase of \$22.2 million from the same period in 2011, primarily due to increased industrial, commercial and residential margins of \$20.6 million mainly due to the implementation of the electric rate case. Additionally, there were lower revenue credits of \$13.9 million in the current period as the electric rate case discontinued these credits and an increase in RTO tracker revenues of \$4.4 million. These increases were partially offset by a decrease in environmental cost recovery of \$11.0 million due to the plant balance eligible for recovery being reset to zero as a result of the electric rate case and a decrease of \$6.7 million due to the impact of weather.

At Northern Indiana, sales revenues and customer billings are adjusted for amounts related to under- and over-recovered purchased fuel costs from prior periods per regulatory order. These amounts are primarily reflected in the Other gross revenues statistic provided at the beginning of this segment discussion. The adjustment to Other gross revenues for the three months ended March 31, 2012 was a revenue decrease of \$20.1 million, compared to a decrease of \$10.8 million for the three months ended March 31, 2011.

Operating Income

Operating income for the first quarter of 2012 was \$46.2 million, a decrease of \$4.4 million from the same period in 2011 due to higher operating expenses partially offset by the increase in net revenues described above. Operating expenses increased \$26.6 million due primarily to and higher employee and administrative costs of \$7.7 million and an increase in electric generation costs of \$6.8 million. Additionally, there was an increase in depreciation costs of \$6.4 million primarily due to depreciation for Sugar Creek and higher MISO fees of \$5.5 million, both of which were previously deferred and the electric rate case resulted in the expiration of those deferrals.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

NiSOURCE INC.

For a discussion regarding quantitative and qualitative disclosures about market risk see Management's Discussion and Analysis of Financial Condition and Results of Operations - Market Risk Disclosures.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

NiSource's Chief Executive Officer and its Principal Financial Officer, after evaluating the effectiveness of NiSource's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)), have concluded based on the evaluation required by paragraph (b) of Exchange Act Rules 13a-15 and 15d-15 that, as of the end of the period covered by this report, NiSource's disclosure controls and procedures are considered effective.

Disclosure controls and procedures include, without limitation, controls and procedures designed to provide reasonable assurance that information required to be disclosed by NiSource in the reports that it files or submits under the Exchange Act is accumulated and communicated to NiSource's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Controls

There have been no changes in NiSource's internal control over financial reporting during the fiscal quarter covered by this report that has materially affected, or is reasonably likely to materially affect, NiSource's internal control over financial reporting.

Table of Contents

PART II

ITEM 1. LEGAL PROCEEDINGS

NiSOURCE INC.

Majorsville Operations Center PADEP Notice of Violation

In 1995, Columbia Transmission entered into an AOC with the EPA that requires Columbia Transmission to characterize and remediate environmental contamination at thousands of locations along Columbia Transmission's pipeline system. One of the facilities subject to the AOC is the Majorsville Operations Center, which was remediated under an EPA approved Remedial Action Work Plan in summer 2008. Pursuant to the Remedial Action Work Plan, Columbia Transmission completed a project that stabilized residual oil contained in soils at the site and in sediments in an adjacent stream.

On April 23, 2009, however, the PADEP issued Columbia Transmission an NOV, alleging that the remediation was not effective. The NOV asserts violations of the Pennsylvania Clean Streams Law and the Pennsylvania Solid Waste Management Act and contains a settlement demand in the amount of \$1 million. Columbia Transmission is unable to estimate the likelihood or cost of potential penalties or additional remediation at this time.

ITEM 1A. RISK FACTORS
