- .. Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

**ITEM 1.04 Mine Safety Reporting of Shutdowns and Patterns of Violations**

On July 21, 2010, the Dodd Frank Wall Street Reform and Consumer Protection Act (the Act) was enacted. Section 1503 of the Act included new reporting requirements related to mine safety, including disclosing on a Current Report on Form 8-K the receipt of an imminent danger order under Section 107(a) of the Federal Mine Safety and Health Act of 1977 (the Mine Act) issued by the federal Mine Safety and Health Administration (MSHA).

On Friday, June 15, 2012, at approximately 10:00 A.M., Sebree Mining, LLC (Sebree) an operating subsidiary of the Partnership, received an imminent danger order under Section 107(a) of the Mine Act at the Onton #9 Mine. Following an MSHA-approved plan, Sebree was working toward the permanent sealing off of a worked out area of the mine that was experiencing adverse conditions caused by a roof convergence, commonly referred to as a squeeze. The area was being closely monitored by Sebree and MSHA personnel and, as adverse conditions worsened, MSHA issued an imminent danger order for the area inby the location where the seals were to be built. No one was injured as a result of the condition and MSHA issued no violations of the health and safety standards applicable to underground coal mines. On Tuesday, June 19, 2012, at approximately 10:10 A.M., MSHA lifted the order as the sealing process was being completed. Sebree is reviewing the order to determine whether it will seek judicial review of the order's issuance.

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
