Yes No

If Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82

Sercel Launches New-Generation UNITE Cableless System

Paris November 6, 2012 Sercel has launched a new generation of UNITE, its industry-leading cableless acquisition system, as well as a new geophone sensor, the SG-5.

The new larger-capacity internal battery of the new-generation UNITE gives the system two weeks of operating autonomy. New data management software has also been added, increasing the system's wireless data harvesting rate by 50%.

The new SG-5 sensor offers the advantage of a low natural frequency response at 5hz, well below the 10hz industry standard, making it the perfect sensor for microseismic applications.

When deployed together, the new, more compact UNITE cableless system and the new SG-5 have a combined weight of less than two kilograms.

Pascal Rouiller, CEO, Sercel, said: More than 25 customers are already using our UNITE cable-free system. We are convinced that by offering these new enhancements, with the latest generation of UNITE and our new SG-5 geophone, we will further strengthen our position in the land acquisition market. Our launch of this new combination underlines our commitment to meeting our customers' needs by offering the best equipment solution for every seismic application.

About CGGVeritas

CGGVeritas (www.cggveritas.com) is a leading international pure-play geophysical company delivering a wide range of technologies, services and equipment through Sercel, to its broad base of customers mainly throughout the global oil and gas industry.

CGGVeritas is listed on the Euronext Paris (ISIN: 0000120164) and the New York Stock Exchange (in the form of American Depositary Shares, NYSE: CGV).
