QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended October 28, 2012

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-14077

WILLIAMS-SONOMA, INC.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or organization)

94-2203880
(I.R.S. Employer Identification No.)

3250 Van Ness Avenue, San Francisco, CA
(Address of principal executive offices)

94109
(Zip Code)

Registrant's telephone number, including area code: (415) 421-7900

Edgar Filing: WILLIAMS SONOMA INC - Form 10-Q

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of November 25, 2012, 98,046,283 shares of the registrant's Common Stock were outstanding.

WILLIAMS-SONOMA, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Thirty-Nine Weeks Ended October 28, 2012 and October 30, 2011

(Unaudited)

NOTE A. FINANCIAL STATEMENTS - BASIS OF PRESENTATION

These financial statements include Williams-Sonoma, Inc. and its wholly owned subsidiaries (we, us or our). The condensed consolidated balance sheets as of October 28, 2012 and October 30, 2011, the condensed consolidated statements of earnings and of comprehensive income for the thirteen and thirty-nine weeks then ended, and the condensed consolidated statements of cash flows for the thirty-nine weeks then ended have been prepared by us, without audit. In our opinion, the financial statements include all adjustments (which include only normal recurring adjustments) necessary to present fairly the financial position at the balance sheet dates and the results of operations for the thirteen and thirty-nine weeks then ended. Significant intercompany transactions and accounts have been eliminated. The condensed consolidated balance sheet as of January 29, 2012, presented herein, has been derived from our audited consolidated balance sheet included in our Annual Report on Form 10-K for the fiscal year ended January 29, 2012.

The results of operations for the thirteen and thirty-nine weeks ended October 28, 2012 are not necessarily indicative of the operating results of the full year.

Certain information and footnote disclosures normally included in the annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted. These financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the fiscal year ended January 29, 2012.

New Accounting Pronouncements

In June 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*. This guidance revises the manner in which entities present comprehensive income in their financial statements. The new guidance removes the presentation options in previous guidance and requires entities to report components of comprehensive income in either (1) a continuous statement of comprehensive income or (2) two separate but consecutive statements. The new guidance does not change the items that must be reported in other comprehensive income. We adopted ASU 2011-05 in the first quarter of fiscal 2012 and have included two separate but consecutive statements.

NOTE B. STOCK-BASED COMPENSATION

Equity Award Programs

Our Amended and Restated 2001 Long-Term Incentive Plan (the Plan) provides for grants of incentive stock options, nonqualified stock options, stock-settled stock appreciation rights (collectively, option awards), restricted stock awards, restricted stock units, deferred stock awards (collectively, stock awards) and dividend equivalents up to an aggregate of 25,759,903 shares. As of October 28, 2012, there were 7,580,102 shares available for future grant. Awards may be granted under the Plan to officers, employees and non-employee Board members of the company or any parent or subsidiary. Annual grants are limited to 1,000,000 shares covered by option awards and 400,000 shares covered by stock awards on a per person basis. All grants of option awards made under the Plan have a maximum term of seven years. The exercise price of these option awards is not less than 100% of the closing price of our stock on the day prior to the grant date. Option awards granted to employees generally vest over a period of four to five years. Stock awards granted to employees generally vest over a period of four years. Certain option awards, stock awards and other agreements contain vesting acceleration clauses resulting from events including, but not limited to, retirement, merger or a similar corporate event. Option and stock awards granted to non-employee Board members generally vest in one year. Non-employee Board members

Table of Contents

automatically receive stock awards on the date of their initial election to the Board and annually thereafter on the date of the annual meeting of stockholders (so long as they continue to serve as a non-employee Board member). Shares issued as a result of award exercises will be funded with the issuance of new shares.

Stock-Based Compensation Expense

We measure and record stock-based compensation expense in our consolidated financial statements for all employee stock-based awards using a fair value method. During the thirteen and thirty-nine weeks ended October 28, 2012, we recognized total stock-based compensation expense, as a component of selling, general and administrative expenses, of \$7,686,000 and \$22,778,000, respectively (including stock-based compensation expense of \$3,019,000 for the thirty-nine weeks ended October 28, 2012, associated with the retirement of our former Executive Vice President, Chief Operating and Chief Financial Officer). During the thirteen and thirty-nine weeks ended October 30, 2011, we recognized total stock-based compensation expense of \$5,578,000 and \$17,834,000, respectively.

Stock Options

The following table summarizes our stock option activity during the thirty-nine weeks ended October 28, 2012:

	Shares
Balance at January 29, 2012	934,696
Granted	0
Exercised	(415,136)
Cancelled	(680)
Balance at October 28, 2012 (100% vested)	518,880

Stock-Settled Stock Appreciation Rights

The following table summarizes our stock-settled stock appreciation right activity during the thirty-nine weeks ended October 28, 2012:

	Shares
Balance at January 29, 2012	3,941,642
Granted	0
Converted into common stock	(759,429)
Cancelled	(214,738)
Balance at October 28, 2012	2,967,475
Vested at October 28, 2012	1,221,789
Vested and expected to vest at October 28, 2012	2,342,876

Table of Contents*Restricted Stock Units*

The following table summarizes our restricted stock unit activity during the thirty-nine weeks ended October 28, 2012:

	Shares
Balance at January 29, 2012	2,293,851
Granted	1,226,037
Released	(379,285)
Cancelled	(331,352)
Balance at October 28, 2012	2,809,251
Vested and expected to vest at October 28, 2012	1,984,825

NOTE C. EARNINGS PER SHARE

Basic earnings per share is computed as net earnings divided by the weighted average number of common shares outstanding for the period. Diluted earnings per share is computed as net earnings divided by the weighted average number of common shares outstanding for the period plus common stock equivalents consisting of shares subject to stock-based awards with exercise prices less than or equal to the average market price of our common stock for the period, to the extent their inclusion would be dilutive.

The following is a reconciliation of net earnings and the number of shares used in the basic and diluted earnings per share computations:

<i>Dollars and amounts in thousands, except per share amounts</i>	Net Earnings	Weighted Average Shares	Earnings Per Share
Thirteen weeks ended October 28, 2012			
Basic	\$ 48,900	98,444	\$ 0.50
Effect of dilutive stock-based awards		1,974	
Diluted	\$ 48,900	100,418	\$ 0.49
Thirteen weeks ended October 30, 2011			
Basic	\$ 43,421	103,651	\$ 0.42
Effect of dilutive stock-based awards		2,070	
Diluted	\$ 43,421	105,721	\$ 0.41
Thirty-nine weeks ended October 28, 2012			
Basic	\$ 122,996	99,528	\$ 1.24
Effect of dilutive stock-based awards		1,757	
Diluted	\$ 122,996	101,285	\$ 1.21
Thirty-nine weeks ended October 30, 2011			
Basic	\$ 114,345	104,592	\$ 1.09
Effect of dilutive stock-based awards		2,243	
Diluted	\$ 114,345	106,835	\$ 1.07

Stock-based awards of 1,210,000 and 2,482,000 for the thirteen weeks ended and 1,604,000 and 1,719,000 for the thirty-nine weeks ended October 28, 2012 and October 30, 2011, respectively, were not included in the computation of diluted earnings per share, as their inclusion would be anti-dilutive.

NOTE D. SEGMENT REPORTING

We have two reportable segments, direct-to-customer and retail. The direct-to-customer segment has seven merchandising concepts (Williams-Sonoma, Pottery Barn, Pottery Barn Kids, PBteen, West Elm, Williams-Sonoma Home and Rejuvenation) and sells our products through our six e-commerce websites

Table of Contents

(williams-sonoma.com, potterybarn.com, potterybarnkids.com, pbteen.com, westelm.com and rejuvenation.com) and seven direct mail catalogs (Williams-Sonoma, Pottery Barn, Pottery Barn Kids, Pottery Barn Bed and Bath, PBteen, West Elm and Rejuvenation). The retail segment has five merchandising concepts which sell products for the home (Williams-Sonoma, Pottery Barn, Pottery Barn Kids, West Elm and Rejuvenation). The five retail merchandising concepts are operating segments, which have been aggregated into one reportable segment, retail. Management's expectation is that the overall economic characteristics of each of our major concepts within each reportable segment will be similar over time based on management's judgment that the operating segments have had similar historical economic characteristics and are expected to have similar long-term financial performance in the future.

These reportable segments are strategic business units that offer similar home-centered products. They are managed separately because the business units utilize two distinct distribution and marketing strategies. Based on management's best estimate, our operating segments include allocations of certain expenses, including advertising and employment costs, to the extent they have been determined to benefit both channels. These operating segments are aggregated at the channel level for reporting purposes due to the fact that our brands are interdependent for economies of scale and we do not maintain fully allocated income statements at the brand level. As a result, material financial decisions related to the brands are made at the channel level. Furthermore, it is not practicable for us to report revenue by product group.

We use earnings before unallocated corporate overhead, interest and taxes to evaluate segment profitability. Unallocated costs before interest and income taxes include corporate employee-related costs, occupancy expenses (including depreciation expense), administrative costs and third party service costs, primarily in our corporate systems, corporate facilities and other administrative departments. Unallocated assets include corporate cash and cash equivalents, deferred income taxes, the net book value of corporate facilities and related information systems, and other corporate long-lived assets.

Income tax information by segment has not been included as taxes are calculated at a company-wide level and are not allocated to each segment.

Table of Contents**Segment Information**

<i>Dollars in thousands</i>	Direct-to-Customer	Retail	Unallocated	Total
Thirteen weeks ended October 28, 2012

Assets ³	351,040	924,547	775,577	2,051,164
Capital expenditures	22,084	40,924	39,247	102,255

¹ Includes net revenues of approximately \$39.4 million and \$36.3 million for the thirteen weeks ended October 28, 2012 and October 30, 2011, respectively, and \$101.6 million and \$94.4 million for the thirty-nine weeks ended October 28, 2012 and October 30, 2011, respectively, related to our foreign operations.

² Unallocated costs include approximately \$7.0 million for employee separation charges primarily related to the retirement of our former Executive Vice President, Chief Operating and Chief Financial Officer.

³ Includes approximately \$31.3 million and \$25.4 million of long-term assets as of October 28, 2012 and October 30, 2011, respectively, related to our foreign operations.

⁴ Includes expenses in the retail channel of approximately \$2.3 million related to asset impairment and early lease termination charges for underperforming retail stores.

NOTE E. COMMITMENTS AND CONTINGENCIES

We are involved in lawsuits, claims and proceedings incident to the ordinary course of our business. These disputes, which are not currently material, are increasing in number as our business expands and our company grows larger. Litigation is inherently unpredictable. Any claims against us, whether meritorious or not, could be time consuming, result in costly litigation, require significant amounts of management time and result in the diversion of significant operational resources. The results of these lawsuits, claims and proceedings cannot be predicted with certainty. However, we believe that the ultimate resolution of these current matters will not have a material adverse effect on our consolidated financial statements taken as a whole.

NOTE F. STOCK REPURCHASE PROGRAM AND DIVIDEND*Stock Repurchase Program*

In January 2012, our Board of Directors authorized a stock repurchase program to purchase up to \$225,000,000 of our common stock. During the thirteen weeks ended October 28, 2012, we repurchased 748,807 shares under this program at an average cost of \$41.69 per share and a total cost of \$31,217,000. During the thirty-nine weeks ended October 28, 2012, we repurchased 3,278,078 shares under this program at an average cost of \$37.92 per

Table of Contents

share and a total cost of \$124,293,000. As of October 28, 2012, there remains an aggregate of \$31,283,000 available for repurchases under this program.

Stock repurchases under this program may be made through open market and privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements, capital availability and other market conditions. The stock repurchase program does not have an expiration date and may be limited or terminated at any time without prior notice.

During the thirteen weeks ended October 30, 2011, we repurchased 963,700 shares of our common stock at an average cost of \$32.68 per share and a total cost of \$31,490,000. During the thirty-nine weeks ended October 30, 2011, we repurchased 2,530,208 shares of our common stock at an average cost of \$37.15 per share and a total cost of \$93,986,000 under programs previously authorized by our Board of Directors.

Dividend

Our quarterly cash dividend was \$0.22 per common share for the thirteen weeks ended October 28, 2012.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements that involve risks and uncertainties, as well as assumptions that, if they do not fully materialize or are proven incorrect, could cause our business and results of operations to differ materially from those expressed or implied by such forward-looking statements. Such forward-looking statements include statements related to: our expectations regarding the overall economic characteristics and trends of each of our major concepts within each reportable segment; our beliefs regarding the resolution of current lawsuits, claims and proceedings; our expectations regarding our dividends and stock repurchase program; our expectations regarding our brands as we execute our strategies; the execution of our strategies; our investment in our strategic initiatives; our expectations regarding the growth of our existing brands; the expansion of our global business, including expectations regarding the opening of additional franchised locations, our global e-commerce shipping capabilities and the opening of our stores in Australia in early fiscal 2013; our expectations regarding launching new business; our focus on improving customer service and enhancing profitability; our focus on enhancements to the online shopping experience; our expectations regarding execution of our holiday season; our planned capital expenditures; our expectations regarding our effective tax rate for fiscal 2012 and the variability in our quarterly tax rates; our plans to use our cash resources to fund our inventory and inventory related purchases, advertising and marketing initiatives, purchases of property and equipment, stock repurchases and dividend payments; our compliance with our bank covenants; our belief that our cash on-hand, in addition to our available credit facilities, will provide adequate liquidity for our business operations over the next 12 months; our estimates and assumptions in preparing our condensed consolidated financial statements; our beliefs regarding seasonal patterns associated with the retail and direct-to-customer industries; our potential use of foreign currency contracts; our expectations regarding demand for our products; our beliefs regarding guidance; and our expectations regarding our cash flow, as well as statements of belief and statements of assumptions underlying any of the foregoing. You can identify these and other forward-looking statements by the use of words such as *may*, *should*, *expects*, *plans*, *anticipates*, *believes*, *estimates*, *predicts*, *intends*, *will*, *continue*, or the negative of such terms, or other comparable terminology.

The risks, uncertainties and assumptions referred to above that could cause our results to differ materially from the results expressed or implied by such forward-looking statements include, but are not limited to, those discussed under the heading *Risk Factors* in this document and the risks, uncertainties and assumptions discussed from time to time in our other public filings and public announcements. All forward-looking statements

Table of Contents

included in this document are based on information available to us as of the date hereof, and we disclaim any obligation to update these forward-looking statements.

OVERVIEW

We are a multi-channel specialty retailer of high-quality products for the home. The direct-to-customer segment of our business sells our products through our six e-commerce websites (williams-sonoma.com, potterybarn.com, potterybarnkids.com, pbteen.com, westelm.com and rejuvenation.com) and seven direct-mail catalogs (Williams-Sonoma, Pottery Barn, Pottery Barn Kids, Pottery Barn Bed and Bath, PBteen, West Elm and Rejuvenation). Our e-commerce platform is available to customers worldwide, while our catalogs reach customers throughout the U.S. The retail segment of our business sells similar products through our five retail store concepts (Williams-Sonoma, Pottery Barn, Pottery Barn Kids, West Elm and Rejuvenation). Based on their contribution to our net revenues, our core brands are: Pottery Barn, which sells casual home furnishings; Williams-Sonoma, which sells cooking and entertaining essentials; and Pottery Barn Kids, which sells stylish children's furnishings.

The following discussion and analysis of financial condition, results of operations, and liquidity and capital resources for the thirteen weeks ended October 28, 2012 (third quarter of fiscal 2012), as compared to the thirteen weeks ended October 30, 2011(third quarter of fiscal 2011) and the thirty-nine weeks ended October 28, 2012 (year-to-date 2012), as compared to the thirty-nine weeks ended October 30, 2011(year-to-date 2011), should be read in conjunction with our condensed consolidated financial statements and the notes thereto.

All explanations of changes in operational results are discussed in order of their magnitude.

Third Quarter of Fiscal 2012 Financial Results

In the third quarter of fiscal 2012, our net revenues increased 8.9% to \$944,554,000, compared to \$867,176,000 in the third quarter of fiscal 2011, and comparable brand revenues increased 8.5%. Diluted earnings per share in the third quarter of fiscal 2012 increased to \$0.49, versus \$0.41 in the third quarter of fiscal 2011. During the quarter, we also returned \$52,953,000 to our stockholders through stock repurchases and dividends.

Direct-to-customer net revenues in the third quarter of fiscal 2012 increased \$57,462,000, or 14.7%, compared to the third quarter of fiscal 2011. This increase was driven by growth across all brands, led by Pottery Barn, West Elm, Pottery Barn Kids and Williams-Sonoma. E-commerce net revenues increased 16.7% to \$395,764,000 in the third quarter of fiscal 2012, compared to \$339,130,000 in the third quarter of fiscal 2011.

Retail net revenues in the third quarter of fiscal 2012 increased \$19,916,000, or 4.2%, compared to the third quarter of fiscal 2011. This increase was primarily driven by the Pottery Barn and West Elm brands, partially offset by a decrease in the Williams-Sonoma brand. Retail leased square footage remained flat compared to the third quarter of fiscal 2011. Comparable store sales in the third quarter of fiscal 2012 increased 2.9%, compared to 6.3% in the third quarter of fiscal 2011.

All brands delivered positive comparable brand revenue growth in the third quarter of fiscal 2012. Pottery Barn and West Elm continued to perform well, and comparable brand growth in Pottery Barn Kids accelerated as its inventory positions improved. PBteen and Williams-Sonoma both experienced year-over-year comparable brand revenue increases and improved revenue trends versus the second quarter of fiscal 2012.

In the Pottery Barn brand, comparable brand revenues increased 11.1% in the third quarter of fiscal 2012, on top of 7.0% growth in the third quarter of fiscal 2011, with strong results across both channels and all product categories. West Elm comparable brand revenues increased 13.0% during the third quarter of fiscal 2012, on top of 27.0% growth in the third quarter of fiscal 2011. Growth continued to be driven by all categories, led by double-digit comparable brand revenue growth in furniture and textiles. In Williams-Sonoma, as we continue to focus on improving overall brand performance, we saw a year-over-year increase in comparable brand revenues of 1.3% during the third quarter of fiscal 2012, compared to 0.3% growth in the third quarter of fiscal 2011. These

Table of Contents

net revenue improvements resulted from our strategic focus on product innovation, marketing and customer engagement. We have continued to work toward our goal of increasing our ratio of exclusive products, as the strongest performance continues to be in those categories where we have the highest proportion of new, exclusive and innovative products. In Pottery Barn Kids, comparable brand revenues increased 10.1% during the third quarter of fiscal 2012, on top of 5.2% growth in the third quarter of fiscal 2011, with strong results across both channels and all product categories. Textiles and decorative accessories posted notable growth, reflecting a successful back-to-school season. Our baby business was also strong, led by consumer response to our expanded nursery offerings, gift giving and registry experience. PBteen comparable brand revenues increased 2.0% during the quarter, on top of 6.5% growth in the third quarter of fiscal 2011. This growth was led by furniture and textiles with strength in our dorm initiative in the back-to-school time period and our strategic launch of Burton home furnishings.

Third Quarter of Fiscal 2012 Operational Results

Throughout the third quarter of fiscal 2012, we continued to invest in our three key strategic initiatives for driving sustainable, profitable growth and increasing stockholder value: growing our existing brands, global expansion and launching new businesses.

In our existing brands, we continued to focus on opportunities for further growth.

In our global business, we opened five new stores, including the first Williams-Sonoma and West Elm stores in the Middle East, with our unaffiliated franchisee. We also continued to ship to more than 90 countries around the world through our third party vendor and are continuing to make progress toward opening four stores in Sydney, Australia in early fiscal 2013, which represent our first company-owned stores outside of North America.

With respect to launching new businesses, in late October we announced West Elm Market, a brand extension of West Elm that provides an assortment inspired by the common sense shop-keeping of the classic general store. Subsequent to quarter-end, we also announced the launch of Mark and Graham, our newest direct-to-customer brand, which features personalized gifts and accessories.

Foundational to all of our growth initiatives are improvements in our supply chain and advancements in our technology.

In our supply chain, we continued to focus on improving our return rates as well as improving quality and on-time shipping performance by working with our teams in Vietnam and China. Additionally, we continued to make progress on the consolidation of our conveyable mail order operations and the in-sourcing of our distribution hubs.

In e-commerce, we implemented website improvements that provide for a more personalized shopping experience and make buying more streamlined for customers who transact on multiple devices. We also continued to explore and capitalize on social media and mobile opportunities.

As we look forward to the remainder of fiscal 2012, we continue to be focused on the execution of our holiday season and our long-term strategies that will allow us to continue to deliver increased revenue and profitability.

Results of Operations

NET REVENUES

Net revenues consist of direct-to-customer net revenues and retail net revenues. Direct-to-customer net revenues include sales of merchandise to customers through our e-commerce websites and our catalogs, as well as shipping fees. Retail net revenues include sales of merchandise to customers at our retail stores, as well as shipping fees on

Table of Contents

any retail products shipped to our customers' homes. Shipping fees consist of revenue received from customers for delivery of merchandise to their homes. Revenues are presented net of sales returns and other discounts.

The following table summarizes our net revenues for the third quarter of fiscal 2012 and fiscal 2011, and year-to-date 2012 and 2011:

<i>Dollars in thousands</i>	Thirteen Weeks Ended				Thirty-Nine Weeks Ended			
	October 28, 2012	% Total	October 30, 2011	% Total	October 28, 2012	% Total	October 30, 2011	% Total
Direct-to-customer net revenues	\$ 447,115	47.3%	\$ 389,653	44.9%	\$ 1,235,883	46.9%	\$ 1,101,815	44.9%
Retail net revenues	497,439	52.7%	477,523	55.1%	1,400,568	53.1%	1,350,936	55.1%
Net revenues	\$ 944,554	100.0%	\$ 867,176	100.0%	\$ 2,636,451	100.0%	\$ 2,452,751	100.0%

Net revenues in the third quarter of fiscal 2012 increased by \$77,378,000, or 8.9%, compared to the third quarter of fiscal 2011. This increase was driven by comparable brand revenue growth of 8.5%, including e-commerce net revenue growth of 16.7%, and a 2.9% increase in comparable store sales. These increased net revenues during the third quarter of fiscal 2012 were primarily driven by the Pottery Barn, West Elm and Pottery Barn Kids brands.

Net revenues for year-to-date 2012 increased by \$183,700,000, or 7.5%, compared to year-to-date 2011. This increase was driven by comparable brand revenue growth of 7.2%, including e-commerce net revenue growth of 14.2%, and a 3.8% increase in comparable store sales. These increased net revenues during year-to-date 2012 were driven primarily by the Pottery Barn and West Elm brands.

Comparable Brand Revenue Growth

Comparable brand revenue includes retail comparable store sales and direct-to-customer sales, as well as shipping fees, sales returns and other discounts associated with current period sales. Outlet comparable store net revenues are also included in their respective brands. Sales related to our international franchised stores have been excluded as these stores are not operated by us.

Comparable stores are defined as permanent stores in which gross square footage did not change by more than 20% in the previous 12 months and which have been open for at least 12 consecutive months without closure for seven or more consecutive days.

Percentages represent changes in comparable brand revenue compared to the same period in the prior year.

<i>Comparable brand revenue growth (decline)</i>	Thirteen Weeks Ended		Thirty-Nine Weeks Ended	
	October 28, 2012	October 30, 2011	October 28, 2012	October 30, 2011
Pottery Barn	11.1%	7.0%	10.6%	6.1%
Williams-Sonoma ¹	1.3%	0.3%	(0.7%)	1.5%
Pottery Barn Kids	10.1%	5.2%	4.5%	7.8%
West Elm	13.0%	27.0%	16.6%	28.7%
PBteen	2.0%	6.5%	(0.6%)	10.9%
Total	8.5%	7.3%	7.2%	7.6%

¹ Williams-Sonoma excludes net revenues from Williams-Sonoma Home merchandise. Including Williams-Sonoma Home, comparable brand revenue growth (decline) for Williams-Sonoma was 0.8% and 0.1% in the third quarter of fiscal 2012 and fiscal 2011, respectively, and (1.6%) and 1.2% for year-to-date 2012 and year-to-date 2011, respectively (Williams-Sonoma Home net revenues are included in the total).

Table of Contents**DIRECT-TO-CUSTOMER NET REVENUES**

<i>Dollars in thousands</i>	Thirteen Weeks Ended		Thirty-Nine Weeks Ended	
	October 28, 2012	October 30, 2011	October 28, 2012	October 30, 2011
Direct-to-customer net revenues	\$ 447,115	\$ 389,653	\$ 1,235,883	\$ 1,101,815
Direct-to-customer net revenue growth	14.7%	9.9%	12.2%	11.7%
E-commerce net revenue growth	16.7%	14.6%	14.2%	17.7%
E-commerce net revenues as a percent of direct-to-customer net revenues	88.5%	87.0%	87.4%	85.8%

Direct-to-customer net revenues in the third quarter of fiscal 2012 increased \$57,462,000, or 14.7%, compared to the third quarter of fiscal 2011. This increase was driven by growth across all brands, led by Pottery Barn, West Elm, Pottery Barn Kids and Williams-Sonoma. E-commerce net revenues increased 16.7% to \$395,764,000 in the third quarter of fiscal 2012, compared to \$339,130,000 in the third quarter of fiscal 2011.

Direct-to-customer net revenues for year-to-date 2012 increased \$134,068,000, or 12.2%, compared to year-to-date 2011. This increase was primarily driven by the Pottery Barn and West Elm brands, as well as incremental net revenues from Rejuvenation. E-commerce net revenues increased 14.2% to \$1,080,145,000 for year-to-date 2012, compared to \$945,654,000 for year-to-date 2011.

RETAIL NET REVENUES AND OTHER DATA

<i>Dollars in thousands</i>	Thirteen Weeks Ended		Thirty-Nine Weeks Ended

¹ Temporary pop-up stores, where lease terms are typically short-term in nature and are used to test new markets, are not included in the totals above as they are not considered permanent stores.

Table of Contents

Retail net revenues in the third quarter of fiscal 2012 increased \$19,916,000, or 4.2%, compared to the third quarter of fiscal 2011. This increase was primarily driven by the Pottery Barn and West Elm brands, partially offset by a decrease in the Williams-Sonoma brand. Retail leased square footage remained flat compared to the third quarter of fiscal 2011. Comparable store sales in the third quarter of fiscal 2012 increased 2.9%, compared to 6.3% in the third quarter of fiscal 2011.

Retail net revenues for year-to-date 2012 increased \$49,632,000, or 3.7%, compared to year-to-date 2011. This increase was primarily driven by the Pottery Barn and West Elm brands, partially offset by a decrease in the Williams-Sonoma brand. Retail leased square footage remained flat compared to year-to-date 2011. Comparable store sales for year-to-date 2012 increased 3.8%, compared to 4.8% for year-to-date 2011.

COST OF GOODS SOLD

<i>Dollars in thousands</i>	Thirteen Weeks Ended				Thirty-Nine Weeks Ended			
	October 28, 2012	% Net Revenues	October 30, 2011	% Net Revenues	October 28, 2012	% Net Revenues	October 30, 2011	% Net Revenues
Cost of goods sold ¹	\$ 576,556	61.0%	\$ 535,213	61.7%	\$ 1,624,707	61.6%	\$ 1,516,184	61.8%

¹ Includes total occupancy expenses of \$130,330,000 and \$125,254,000 for the third quarter of fiscal 2012 and fiscal 2011, respectively, and \$380,009,000 and \$373,083,000 for year-to-date 2012 and year-to-date 2011, respectively.

Cost of goods sold includes cost of goods, occupancy expenses and shipping costs. Cost of goods consists of cost of merchandise, inbound freight expenses, freight-to-store expenses and other inventory related costs such as shrinkage, damages and replacements. Occupancy expenses consist of rent, depreciation and other occupancy costs, including common area maintenance and utilities. Shipping costs consist of third party delivery services and shipping materials.

Our classification of expenses in cost of goods sold may not be comparable to other public companies, as we do not include non-occupancy related costs associated with our distribution network in cost of goods sold. These costs, which include distribution network employment, third party warehouse management and other distribution-related administrative expenses, are recorded in selling, general and administrative expenses.

Within our reportable segments, the direct-to-customer channel does not incur freight-to-store or store occupancy expenses, and typically operates with lower markdowns and inventory shrinkage than the retail channel. However, the direct-to-customer channel incurs higher customer shipping, damage and replacement costs than the retail channel.

Third Quarter of Fiscal 2012 vs. Third Quarter of Fiscal 2011

Cost of goods sold increased by \$41,343,000, or 7.7%, in the third quarter of fiscal 2012 compared to the third quarter of fiscal 2011. Cost of goods sold as a percentage of net revenues decreased to 61.0% in the third quarter of fiscal 2012 from 61.7% in the third quarter of fiscal 2011. This decrease was primarily driven by the leverage of occupancy expenses due to increasing net revenues.

In the direct-to-customer channel, cost of goods sold as a percentage of net revenues decreased 40 basis points in the third quarter of fiscal 2012 compared to the third quarter of fiscal 2011. This decrease as a percentage of net revenues was primarily driven by the leverage of occupancy expenses due to increasing net revenues, partially offset by lower selling margins from increasing our shipping value to our customers.

In the retail channel, cost of goods sold as a percentage of net revenues decreased 30 basis points in the third quarter of fiscal 2012 compared to the third quarter of fiscal 2011. This decrease as a percentage of net revenues was primarily driven by a rate reduction in occupancy expenses and improved selling margins.

Table of Contents*Year-to-Date 2012 vs. Year-to-Date 2011*

Cost of goods sold for year-to-date 2012 increased by \$108,523,000, or 7.2%, compared to year-to-date 2011. Cost of goods sold as a percentage of net revenues decreased to 61.6% for year-to-date 2012 from 61.8% for year-to-date 2011. This decrease was primarily driven by the leverage of fixed occupancy expenses due to increasing net revenues, partially offset by lower selling margins including increasing our shipping value to our customers.

In the direct-to-customer channel, cost of goods sold as a percentage of net revenues increased 60 basis points for year-to-date 2012 compared to year-to-date 2011. This increase as a percentage of net revenues was primarily driven by lower selling margins from increasing our shipping value to our customers, partially offset by the leverage of fixed occupancy expenses due to increasing net revenues.

In the retail channel, cost of goods sold as a percentage of net revenues decreased 40 basis points for year-to-date 2012 compared to year-to-date 2011. This decrease as a percentage of net revenues was primarily driven by a rate reduction in occupancy expenses.

SELLING, GENERAL AND ADMINISTRATIVE EXPENSES

<i>Dollars in thousands</i>	Thirteen Weeks Ended				Thirty-Nine Weeks Ended			
	October 28, 2012	% Net Revenues	October 30, 2011	% Net Revenues	October 28, 2012	% Net Revenues	October 30, 2011	% Net Revenues
Selling, general and administrative expenses	\$ 288,702	30.6%	\$ 263,219	30.4%	\$ 813,022	30.8%	\$ 752,038	30.7%

Selling, general and administrative expenses consist of non-occupancy related costs associated with our retail stores, distribution warehouses, customer care centers, supply chain operations (buying, receiving and inspection) and corporate administrative functions. These costs include employment, advertising, third party credit card processing and other general expenses.

We experience differing employment and advertising costs as a percentage of net revenues within the retail and direct-to-customer channels due to their distinct distribution and marketing strategies. Store employment costs represent a greater percentage of retail net revenues than employment costs as a percentage of net revenues within the direct-to-customer channel. However, advertising expenses are higher within the direct-to-customer channel than in the retail channel.

Third Quarter of Fiscal 2012 vs. Third Quarter of Fiscal 2011

Selling, general and administrative expenses increased by \$25,483,000, or 9.7%, in the third quarter of fiscal 2012 compared to the third quarter of fiscal 2011. Selling, general and administrative expenses as a percentage of net revenues increased to 30.6% in the third quarter of fiscal 2012 from 30.4% in the third quarter of fiscal 2011. This increase as a percentage of net revenues was primarily driven by higher employment costs and an increase in other expenses resulting from planned incremental investments to support e-commerce, global expansion and business development growth strategies.

In the direct-to-customer channel, selling, general and administrative expenses as a percentage of net revenues decreased 50 basis points in the third quarter of fiscal 2012 compared to the third quarter of fiscal 2011. This decrease was primarily driven by greater advertising efficiency and the sales leverage of employment costs and other general expenses.

In the retail channel, selling, general and administrative expenses as a percentage of net revenues increased 120 basis points in the third quarter of fiscal 2012 compared to the third quarter of fiscal 2011. This increase was primarily driven by higher employment costs and an increase in other expenses.

Table of Contents

Year-to-Date 2012 vs. Year-to-Date 2011

Selling, general and administrative expenses for year-to-date 2012 increased by \$60,984,000, or 8.1%, compared to year-to-date 2011. Including employee separation charges of \$6,935,000 primarily related to the retirement of our former Executive Vice President, Chief Operating and Chief Financial Officer, selling, general and administrative expenses as a percentage of net revenues increased to 30.8% for year-to-date 2012 from 30.7% for year-to-date 2011 (which included expense of \$2,040,000 from early lease termination charges for underperforming retail stores). This increase as a percentage of net revenues was primarily driven by higher employment costs, including employee separation charges, partially offset by reductions in other general expenses.

In the direct-to-customer channel, selling, general and administrative expenses as a percentage of net revenues decreased 70 basis points for year-to-date 2012 compared to year-to-date 2011. This decrease was primarily driven by greater advertising efficiency and the sales leverage of other general expenses.

In the retail channel, selling, general and administrative expenses as a percentage of net revenues increased 50 basis points for year-to-date 2012 compared to year-to-date 2011. This increase was primarily driven by higher employment costs, partially offset by reductions in other general expenses.

INCOME TAXES

The effective rate was 38.3% for year-to-date 2012 and 38.0% for year-to-date 2011.

We expect the effective tax rate to be in the range of 38.2% to 38.6% for fiscal 2012. Throughout the year, we expect that there could be ongoing variability in our quarterly tax rates due to volatility in earnings in addition to taxable events that occur and tax exposures that are re-evaluated.

LIQUIDITY AND CAPITAL RESOURCES

As of October 28, 2012, we held \$262,484,000 in cash and cash equivalent funds, the majority of which are held in money market funds, interest-bearing demand deposit accounts and highly liquid U.S. Treasury bills. As is consistent within our industry, our cash balances are seasonal in nature, with the fourth quarter historically representing a significantly higher level of cash than other periods.

Throughout the fiscal year, we utilize our cash balances to build our inventory levels in preparation for our fourth quarter holiday sales. In fiscal 2012, we plan to use our cash resources to fund our inventory and inventory related purchases, advertising and marketing initiatives, purchases of property and equipment, stock repurchases and dividend payments. In addition to the current cash balances on hand, we have a credit facility that provides for a \$300,000,000 unsecured revolving line of credit that may be used for loans or letters of credit. Prior to December 22, 2016, we may, upon notice to the lenders, request an increase in the credit facility of up to \$200,000,000 to provide for a total of \$500,000,000 of unsecured revolving credit. During the thirteen and thirty-nine weeks ended October 28, 2012 and October 30, 2011, we had no borrowings under the credit facility, and no amounts were outstanding as of October 28, 2012 or October 30, 2011. However, as of October 28, 2012, \$4,970,000 in issued but undrawn standby letters of credit was outstanding under the credit facility. Additionally, as of October 28, 2012, we had three unsecured letter of credit reimbursement facilities for a total of \$90,000,000, of which an aggregate of \$19,011,000 was outstanding. These letter of credit facilities represent only a future commitment to fund inventory purchases to which we had not taken legal title. We are currently in compliance with all of our bank covenants and, based on our current projections, we expect to remain in compliance throughout fiscal 2012. We believe our cash on hand, in addition to our available credit facilities, will provide adequate liquidity for our business operations over the next 12 months.

For year-to-date 2012, net cash provided by operating activities was \$62,383,000 compared to net cash used in operating activities of \$1,883,000 for year-to-date 2011. For year-to-date 2012 net cash provided by operating

Table of Contents

activities was primarily attributable to adjusted net earnings and an increase in customer deposits and deferred rent and lease incentives, partially offset by an increase in merchandise inventories. Net cash provided for year-to-date 2012 compared to net cash used for year-to-date 2011 was primarily due to the timing of payments associated with accrued salaries, benefits and other expenses and accounts payable, partially offset by an increase in inventory purchases.

For year-to-date 2012, net cash used in investing activities was \$117,946,000 compared to net cash used in investing activities of \$104,298,000 for year-to-date 2011. For year-to-date 2012, net cash used in investing activities was primarily attributable to purchases of property and equipment of \$116,398,000, comprised of \$44,035,000 for systems development projects (including e-commerce websites), \$43,345,000 for stores and \$29,018,000 for distribution, facility infrastructure and other projects. This represents an increase in net cash used compared to year-to-date 2011 primarily due to an increase in the purchases of property and equipment.

For fiscal 2012, we anticipate investing \$200,000,000 to \$220,000,000 in the purchase of property and equipment, primarily for systems development projects (including e-commerce websites), the construction of new, remodeled or expanded stores, as well as distribution center and other infrastructure projects.

For year-to-date 2012, net cash used in financing activities was \$185,567,000 compared to net cash used in financing activities of \$142,751,000 for year-to-date 2011. Net cash used in financing activities for year-to-date 2012 and compared to year-to-date 2011 was primarily attributable to the repurchase of common stock and the payment of dividends.

Stock Repurchase Program

See section titled Unregistered Sales of Equity Securities And Use of Proceeds within Part II, Item 2 of this Quarterly Report on Form 10-Q for further information.

Dividend

Our quarterly cash dividend was \$0.22 per common share for the third quarter of fiscal 2012, for an annual cash dividend, subject to capital availability, of \$0.88 per share.

Critical Accounting Policies

Management's Discussion and Analysis of Financial Condition and Results of Operations is based on our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. The estimates and assumptions are evaluated on an ongoing basis and are based on historical experience and various other factors that we believe to be reasonable under the circumstances. Actual results may differ significantly from these estimates. During the third quarter of fiscal 2012, there have been no significant changes to the critical accounting policies discussed in our Annual Report on Form 10-K for the year ended January 29, 2012.

Seasonality

Our business is subject to substantial seasonal variations in demand. Historically, a significant portion of our revenues and net earnings have been realized during the period from October through December, and levels of net revenues and net earnings have generally been significantly lower during the period from January through September. We believe this is the general pattern associated with the retail and direct-to-customer industries. In anticipation of our peak season, we hire a substantial number of additional temporary employees in our retail stores, customer care centers and distribution centers, and incur significant fixed catalog production and mailing costs.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risks, which include significant deterioration of the U.S. and foreign markets, changes in U.S. interest rates, foreign currency exchange rates, including the devaluation of the U.S. dollar, and the effects of uncertain economic forces which may affect the prices we pay our vendors in the foreign countries in which we do business. We do not engage in financial transactions for trading or speculative purposes.

Interest Rate Risk

As of October 28, 2012, our line of credit facility was the only instrument we held with a variable interest rate which could, if drawn upon, subject us to risks associated with changes in that interest rate. As of October 28, 2012, there were no amounts outstanding under our credit facility.

In addition, we have fixed and variable income investments consisting of short-term investments classified as cash and cash equivalents, which are also affected by changes in market interest rates. As of October 28, 2012, our investments, made primarily in money market funds, interest-bearing demand deposit accounts and highly liquid U.S. Treasury bills, are stated at cost and approximate their fair values.

Foreign Currency Risks

We purchase a significant amount of inventory from vendors outside of the U.S. in transactions that are denominated in U.S. dollars. Approximately 3% of our international purchase transactions are in currencies other than the U.S. dollar, primarily the euro. Any currency risks related to these international purchase transactions were not significant to us during year-to-date 2012 and year-to-date 2011. Since we pay for the majority of our international purchases in U.S. dollars, however, a decline in the U.S. dollar relative to other foreign currencies would subject us to risks associated with increased purchasing costs from our vendors in their effort to offset any lost profits associated with any currency devaluation. We cannot predict with certainty the effect these increased costs may have on our financial statements or results of operations.

In addition, as of October 28, 2012, our retail stores in Canada and our limited operations in Asia, Europe and Australia, expose us to market risk associated with foreign currency exchange rate fluctuations. These exchange rate fluctuations have not been material to us in the past, however, as we continue to expand globally, we may enter into foreign currency contracts in the future to minimize any currency risk associated with these international operations. We did not enter into any foreign currency contracts during year-to-date 2012 or year-to-date 2011.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of October 28, 2012, an evaluation was performed by management, with the participation of our Chief Executive Officer (CEO) and our Chief Financial Officer (CFO), of the effectiveness of our disclosure controls and procedures. Based on that evaluation, our management, including our CEO and CFO, concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow for timely discussions regarding required disclosures, and that such information is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC.

Table of Contents

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting that occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Information required by this Item is contained in Note E to our Condensed Consolidated Financial Statements within Part I of this Form 10-Q.

ITEM 1A. RISK FACTORS

A description of the risks and uncertainties associated with our business is set forth below. You should carefully consider such risks and uncertainties, together with the other information contained in this report and in our other public filings. If any of such risks and uncertainties actually occurs, our business, financial condition or operating results could differ materially from the plans, projections and other forward-looking statements included in the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations" and elsewhere in this report and in our other public filings. In addition, if any of the following risks and uncertainties, or if any other risks and uncertainties, actually occurs, our business, financial condition or operating results could be harmed substantially, which could cause the market price of our stock to decline, perhaps significantly.

The changes in general economic conditions over the past few years, and the resulting impact on consumer confidence and consumer spending, could adversely impact our results of operations.

Our financial performance is subject to changes in general economic conditions and the impact of such economic conditions on levels of consumer confidence and consumer spending. Consumer confidence and consumer spending may deteriorate significantly, and could remain depressed for an extended period of time. Consumer purchases of discretionary items, including our merchandise, generally decline during periods when disposable income is limited, unemployment rates increase or there is economic uncertainty. An uncertain economic environment, such as the one we experienced during the 2008-2009 economic downturn, could cause our vendors to go out of business or our banks to discontinue lending to us or our vendors, or it could cause us to undergo additional restructurings, any of which would adversely impact our business and operating results.

We are unable to control many of the factors affecting consumer spending, and declines in consumer spending on home furnishings in general could reduce demand for our products.

Our business depends on consumer demand for our products and, consequently, is sensitive to a number of factors that influence consumer spending, including general economic conditions, consumer disposable income, fuel prices, recession and fears of recession, unemployment, war and fears of war, inclement weather, such as Hurricane Sandy, availability of consumer credit, consumer debt levels, conditions in the housing market, interest rates, sales tax rates and rate increases, inflation, consumer confidence in future economic conditions and political conditions, and consumer perceptions of personal well-being and security. In particular, the 2008-2009 economic downturn led to decreased discretionary spending, which adversely impacted our business. In addition, a decrease in home purchases has led and may continue to lead to decreased consumer spending on home products. These factors have affected our various brands and channels differently. Adverse changes in factors affecting discretionary consumer spending have reduced and may continue to further reduce consumer demand for our products, thus reducing our sales and harming our business and operating results.

Table of Contents

If we are unable to identify and analyze factors affecting our business, anticipate changing consumer preferences and buying trends, and manage our inventory commensurate with customer demand, our sales levels and operating results may decline.

Our success depends, in large part, upon our ability to identify and analyze factors affecting our business and to anticipate and respond in a timely manner to changing merchandise trends and customer demands. For example, in the specialty home products business, style and color trends are constantly evolving. Consumer preferences cannot be predicted with certainty and may change between selling seasons. Changes in customer preferences and buying trends may also affect our brands differently. We must be able to stay current with preferences and trends in our brands and address the customer tastes for each of our target customer demographics. We must also be able to identify and adjust the customer offerings in our brands to cater to customer demands. For example, a change in customer preferences for children's room furnishings may not correlate to a similar change in buying trends for other home furnishings. If we misjudge either the market for our merchandise or our customers' purchasing habits, our sales may decline significantly or may be delayed while we work to fill backorders, and we may be required to mark down certain products to sell the resulting excess inventory or to sell such inventory through our outlet stores or other liquidation channels at prices which are significantly lower than our retail prices, either of which would negatively impact our business and operating results.

In addition, we must manage our inventory effectively and commensurate with customer demand. Much of our inventory is sourced from vendors located outside of the United States. Thus, we usually must order merchandise, and enter into contracts for the purchase and manufacture of such merchandise, up to twelve months in advance of the applicable selling season and frequently before trends are known. The extended lead times for many of our purchases may make it difficult for us to respond rapidly to new or changing trends. Our vendors also may not have the capacity to handle our demands or may go out of business in times of economic crisis. In addition, the seasonal nature of the specialty home products business requires us to carry a significant amount of inventory prior to peak selling season. As a result, we are vulnerable to demand and pricing shifts and to misjudgments in the selection and timing of merchandise purchases. If we do not accurately predict our customers' preferences and acceptance levels of our products, our inventory levels will not be appropriate, and our business and operating results may be negatively impacted.

Our dependence on foreign vendors and our increased global operations subject us to a variety of risks and uncertainties that could impact our operations and financial results.

In fiscal 2011, we sourced our products from vendors in 50 countries outside of the United States. Approximately 61% of our merchandise purchases were foreign-sourced, predominantly from Asia and Europe. Our dependence on foreign vendors means that we may be affected by changes in the value of the U.S. dollar relative to other foreign currencies. For example, any upward valuation in the Chinese yuan, the euro, or any other foreign currency against the U.S. dollar may result in higher costs to us for those goods. Although approximately 97% of our foreign purchases of merchandise are negotiated and paid for in U.S. dollars, declines in foreign currencies and currency exchange rates might negatively affect the profitability and business prospects of one or more of our foreign vendors. This, in turn, might cause such foreign vendors to demand higher prices for merchandise in their effort to offset any lost profits associated with any currency devaluation, delay merchandise shipments to us, or discontinue selling to us, any of which could ultimately reduce our sales or increase our costs. In addition, an increase in the cost of living in the foreign countries in which our vendors operate may result in an increase in our costs or in our vendors going out of business.

We, and our vendors, are also subject to other risks and uncertainties associated with changing economic and political conditions in foreign countries. These risks and uncertainties include import duties and quotas, compliance with anti-dumping regulations, work stoppages, economic uncertainties and adverse economic conditions (including inflation and recession), foreign government regulations, employment matters, wars and fears of war, political unrest, natural disasters, regulations to address climate change and other trade restrictions. We cannot predict whether any of the countries in which our raw materials are sourced from, or our products are currently manufactured or may be manufactured in the future, will be subject to trade restrictions imposed by the

Table of Contents

U.S. or foreign governments or the likelihood, type or effect of any such restrictions. Any event causing a disruption or delay of imports from foreign vendors, including the imposition of additional import restrictions, restrictions on the transfer of funds and/or increased tariffs or quotas, or both, could increase the cost or reduce the supply of merchandise available to us and adversely affect our business, financial condition and operating results. Furthermore, some or all of our foreign vendors' operations may be adversely affected by political and financial instability resulting in the disruption of trade from exporting countries, restrictions on the transfer of funds and/or other trade disruptions. In addition, an economic downturn in or failure of foreign markets may result in financial instabilities for our foreign vendors, which may cause our foreign vendors to decrease production, discontinue selling to us, or cease operations altogether. Our operations in Asia and Europe could also be affected by changing economic and political conditions in foreign countries, any of which could have a negative effect on our business, financial condition and operating results.

Although we continue to improve our global compliance program, there remains a risk that one or more of our foreign vendors will not adhere to our global compliance standards, such as fair labor standards and the prohibition on child labor. Non-governmental organizations might attempt to create an unfavorable impression of our sourcing practices or the practices of some of our vendors that could harm our image. If either of these events occurs, we could lose customer goodwill and favorable brand recognition, which could negatively affect our business and operating results.

We depend on key domestic and foreign agents and vendors for timely and effective sourcing of our merchandise, and we may not be able to acquire products in sufficient quantities and at acceptable prices to meet our needs, which would impact our operations and financial results.

Our performance depends, in part, on our ability to purchase our merchandise in sufficient quantities at competitive prices. We purchase our merchandise from numerous foreign and domestic manufacturers and importers. We have no contractual assurances of continued supply, pricing or access to new products, and any vendor could change the terms upon which it sells to us, discontinue selling to us, or go out of business at any time. We may not be able to acquire desired merchandise in sufficient quantities on terms acceptable to us. Better than expected sales demand may also lead to customer backorders and lower in-stock positions of our merchandise, which could negatively affect our business and operating results. In addition, our vendors may have difficulty adjusting to our changing demands and growing business.

Any inability to acquire suitable merchandise on acceptable terms or the loss of one or more of our key agents or vendors could have a negative effect on our business and operating results because we would be missing products that we felt were important to our assortment, unless and until alternative supply arrangements are secured. We may not be able to develop relationships with new agents or vendors, and products from alternative sources, if any, may be of a lesser quality and/or more expensive than those we currently purchase.

In addition, we are subject to certain risks, including risks related to the availability of raw materials, labor disputes, union organizing activities, vendor financial liquidity, inclement weather, natural disasters, general economic and political conditions and regulations to address climate change that could limit our vendors' ability to provide us with quality merchandise on a timely basis and at prices that are commercially acceptable.

If our vendors fail to adhere to our quality control standards, we may delay a product launch or recall a product, which could damage our reputation and negatively affect our operations and financial results.

Our vendors might not adhere to our quality control standards, and we might not identify the deficiency before merchandise ships to our stores or customers. Our vendors' failure to manufacture or import quality merchandise in a timely and effective manner could damage our reputation and brands, and could lead to an increase in customer litigation against us and an increase in our routine litigation costs. Further, any merchandise that we receive, even if it meets our quality standards, could become subject to a recall, which could damage our reputation and brands, and harm our business. Recently enacted legislation has given the U.S. Consumer Product Safety Commission increased regulatory and enforcement power, particularly with regard to children's safety,

Table of Contents

among other areas. As a result, companies like ours may be subject to more product recalls and incur higher recall-related expenses. Any recalls or other safety issues could harm our brands' images and negatively affect our business and operating results.

Our efforts to expand globally may not be successful and could negatively impact the value of our brands, and our increasing global presence presents additional challenges.

We are currently growing our business through global expansion. In August 2012, we announced the opening of four stores in Sydney, Australia. The four stores are currently slated to open in early fiscal 2013, and are our first retail locations outside of North America to be owned and operated by us as part of our overall global expansion strategy. Additionally, in fiscal 2009, we entered into a franchise agreement with an unaffiliated franchisee to operate stores in the Middle East. Under this agreement, our franchisee operates stores that sell goods purchased from us under our brand names. We have no prior experience directly opening stores outside of North America and we have limited experience opening stores through third party arrangements. Our success as we expand globally will depend, in part, on our ability to understand consumer preferences and anticipate buying trends there. Further, our franchise arrangements may not continue to be successful. The administration of our global expansion may divert management attention and require more resources than we expect.

While our global expansion to date has been a small part of our business, we plan to continue to increase the number of stores we open directly and through franchise arrangements. The effect of these arrangements on our business and results of operations is uncertain and will depend upon various factors, including the demand for our products in new global markets. In addition, certain aspects of our franchise arrangements are not directly within our control, such as the ability of our franchisee to meet its projections regarding store openings and sales. Moreover, while the agreement we have entered into may provide us with certain termination rights, to the extent that our franchisee does not operate its stores in a manner consistent with our requirements regarding our brand identities and customer experience standards, the value of our brands could be impaired. In addition, in connection with this franchise agreement, we have and will continue to implement certain new processes that may subject us to additional regulations and laws, such as U.S. export regulations. Failure to comply with any applicable regulations or laws could have an adverse effect on our results of operations.

We plan to increase our global presence, including through global shipping that we currently offer through a third party vendor. We have limited experience with international sales, anticipating consumer tastes and trends in different countries, and marketing to customers overseas. Moreover, global awareness of our brands and our products may not be high and, as a result, our global sales may not be successful or result in the revenues we anticipate. Also, our products may not be accepted, either due to foreign legal requirements or due to different consumer tastes and trends. If our global growth initiatives are not successful, or if we or our third party vendors fail to comply with any applicable regulations or laws, the value of our brands may be impaired and negatively affect our future opportunities for global growth, which could adversely affect our results of operations.

We have limited experience operating on a global basis and our failure to effectively manage the risks and challenges inherent in a global business could adversely affect our business, operating results and financial condition and growth prospects.

We operate several subsidiaries in Asia and Europe, which includes managing overseas employees, and plan to continue expanding these overseas operations in the future. We have limited experience operating overseas subsidiaries and managing non-U.S. employees and, as a result, may encounter cultural challenges with local practices and customs that may result in harm to our reputation and the value of our brands. Our global presence also exposes us to the laws and regulations of these jurisdictions, including those related to marketing, privacy, data protection and employment. We may be unable to keep current with government requirements as they change from time to time. Our failure to comply with such laws and regulations may harm our reputation, adversely affect our future opportunities for growth and expansion in these countries, and harm our business and operating results.

Table of Contents

Moreover, our global operations subject us to a variety of risks and challenges, including:

increased management, infrastructure and legal compliance costs;

increased financial accounting and reporting requirements and complexities;

general economic conditions, changes in diplomatic and trade relationships and political and social instability in each country or region;

economic uncertainty around the world;

compliance with foreign laws and regulations and the risks and costs of non-compliance with such laws and regulations;

compliance with U.S. laws and regulations for foreign operations;

dependence on certain third parties, including vendors and other service providers, with whom we do not have extensive experience;

fluctuations in currency exchange rates and the related effect on our financial results;

reduced or varied protection for intellectual property rights in some countries and practical difficulties of enforcing such rights abroad; and

compliance with the laws of foreign taxing jurisdictions and the overlapping of different tax regimes.

Any of these risks could adversely affect our global operations, reduce our global revenues or increase our operating costs, adversely affecting our business, operating results and financial condition and growth prospects. Some of our vendors and our franchisee in the Middle East also have global operations and are subject to the risks described above. Even if we are able to successfully manage the risks of our global operations, our business may be adversely affected if our vendors and franchisee are not able to successfully manage these risks.

In addition, as we continue to expand our global operations, we are subject to certain U.S. laws, including the Foreign Corrupt Practices Act, in addition to the laws of the foreign countries in which we operate. We must ensure that our employees comply with these laws. If any of our overseas operations, or our employees or agents, violates such laws, we could become subject to sanctions or other penalties that could negatively affect our reputation, business and operating results.

A number of factors that affect our ability to successfully open new stores or close existing stores are beyond our control, and these factors may harm our ability to expand or contract our retail operations and harm our ability to increase our sales and profits.

Historically, more than 50% of our net revenues have been generated by our retail stores. Our ability to open additional stores or close existing stores successfully will depend upon a number of factors, including:

general economic conditions;

our identification of, and the availability of, suitable store locations;

our success in negotiating new leases and amending or terminating existing leases on acceptable terms;

the success of other retail stores in and around our retail locations;

our ability to secure required governmental permits and approvals;

our hiring and training of skilled store operating personnel, especially management;

the availability of financing on acceptable terms, if at all; and

the financial stability of our landlords and potential landlords.

Many of these factors are beyond our control. For example, for the purpose of identifying suitable store locations, we rely, in part, on demographic surveys regarding the location of consumers in our target market segments. While we believe that the surveys and other relevant information are helpful indicators of suitable store locations, we recognize that these information sources cannot predict future consumer preferences and buying trends with complete accuracy. In addition, changes in demographics, in the types of merchandise that we sell and in the pricing of our products may reduce the number of suitable store locations. Further, time frames for lease negotiations and store development vary from location to location and can be subject to unforeseen delays. We

Table of Contents

may not be able to open new stores or, if opened, operate those stores profitably. Construction and other delays in store openings could have a negative impact on our business and operating results. Additionally, we may not be able to renegotiate the terms of our current leases or close our underperforming stores, either of which could negatively impact our operating results.

Our sales may be negatively impacted by increasing competition from companies with brands or products similar to ours.

The specialty direct-to-customer and retail business is highly competitive. Our e-commerce websites, direct mail catalogs and specialty retail stores compete with other e-commerce websites, other direct mail catalogs and other retail stores that market lines of merchandise similar to ours. We compete with national, regional and local businesses utilizing a similar retail store strategy, as well as traditional furniture stores, department stores and specialty stores. The substantial sales growth in the direct-to-customer industry within the last decade has encouraged the entry of many new competitors and an increase in competition from established companies. In addition, the decline in the global economic environment has led to increased competition from discount retailers selling similar products at reduced prices. The competitive challenges facing us include:

anticipating and quickly responding to changing consumer demands or preferences better than our competitors;

maintaining favorable brand recognition and achieving customer perception of value;

effectively marketing and competitively pricing our products to consumers in several diverse market segments;

effectively managing and controlling our costs:

developing innovative, high-quality products in colors and styles that appeal to consumers of varying age groups, tastes and regions, and in ways that favorably distinguish us from our competitors; and

effectively managing our supply chain and distribution strategies in order to provide our products to our consumers on a timely basis and minimize returns, replacements and damaged products.

In light of the many competitive challenges facing us, we may not be able to compete successfully. Increased competition could reduce our sales and harm our operating results and business.

Our business and operating results may be harmed if we are unable to timely and effectively deliver merchandise to our stores and customers.

The success of our business depends, in part, on our ability to timely and effectively deliver merchandise to our stores and customers. We cannot control all of the various factors that might affect our fulfillment rates in direct-to-customer sales and timely and effective merchandise delivery to our stores. We rely upon third party carriers for our merchandise shipments and reliable data regarding the timing of those shipments, including shipments to our customers and to and from all of our stores. In addition, we are heavily dependent upon two carriers for the delivery of our merchandise to our customers. Accordingly, we are subject to risks, including labor disputes, union organizing activity, inclement weather, natural disasters, the closure of such carriers' offices or a reduction in operational hours due to an economic slowdown, possible acts of terrorism associated with such carriers' ability to provide delivery services to meet our shipping needs, disruptions or increased fuel costs, and costs associated with any regulations to address climate change. Failure to deliver merchandise in a timely and effective manner could damage our reputation and brands. In addition, fuel costs have been volatile and airline and other transportation companies continue to struggle to operate profitably, which could lead to increased fulfillment expenses. Any rise in fulfillment costs could negatively affect our business and operating results by increasing our transportation costs and decreasing the efficiency of our shipments.

Table of Contents

Our failure to successfully manage our order-taking and fulfillment operations could have a negative impact on our business and operating results.

Our direct-to-customer business depends, in part, on our ability to maintain efficient and uninterrupted order-taking and fulfillment operations in our customer care centers and on our e-commerce websites. Disruptions or slowdowns in these areas could result from disruptions in telephone service or power outages, inadequate system capacity, system issues, computer viruses, security breaches, human error, changes in programming, union organizing activity, disruptions in our third party labor contracts, natural disasters or adverse weather conditions. Industries that are particularly seasonal, such as the home furnishings business, face a higher risk of harm from operational disruptions during peak sales seasons. These problems could result in a reduction in sales as well as increased selling, general and administrative expenses.

In addition, we face the risk that we cannot hire enough qualified employees to support our direct-to-customer operations, or that there will be a disruption in the workforce we hire from our third party providers, especially during our peak season. The need to operate with fewer employees could negatively impact our customer service levels and our operations.

Our facilities and systems, as well as those of our vendors, are vulnerable to natural disasters and other unexpected events, any of which could result in an interruption in our business and harm our operating results.

Our retail stores, corporate offices, distribution centers, infrastructure projects and direct-to-customer operations, as well as the operations of our vendors from which we receive goods and services, are vulnerable to damage from earthquakes, tornadoes, hurricanes, fires, floods, power losses, telecommunications failures, hardware and software failures, computer viruses and similar events. If any of these events result in damage to our facilities or systems, or those of our vendors, we may experience interruptions in our business until the damage is repaired, resulting in the potential loss of customers and revenues. In addition, we may incur costs in repairing any damage beyond our applicable insurance coverage.

If we are unable to effectively manage our e-commerce business, including effectively managing cybersecurity risks, our reputation and operating results may be harmed.

E-commerce has been our fastest growing business over the last several years and continues to be a significant part of our sales success. The success of our e-commerce business depends, in part, on third parties and factors over which we have limited control. We must successfully respond to changing consumer preferences and buying trends relating to e-commerce usage. Our success in e-commerce has been aided in part by our ability to understand the buying trends of visitors to our websites and to personalize the experience they have with us. We also utilize interest-based advertising to target internet users whose behavior indicates they might be interested in our products. Current or future legislation may reduce or restrict our ability to use these techniques, which could reduce the effectiveness of our advertising spend.

We are also vulnerable to certain additional risks and uncertainties associated with our e-commerce websites, including: changes in required technology interfaces; website downtime and other technical failures; internet connectivity issues; costs and technical issues as we upgrade our website software; computer viruses; changes in applicable federal and state regulations; security breaches; and consumer privacy concerns. In order to function successfully, we rely on communication and transmission of data over both public and private networks. Third parties may have the knowledge or technology to disable, disrupt or interfere with our systems or processes. Although we take the security of our systems seriously, we cannot guarantee that we can prevent all efforts to circumvent our security measures. Any security breach or attack against our networks or systems could slow, hinder, or prevent the proper functioning of our electronic communications. Such a breach or attack could harm our business. In addition, we must keep up to date with competitive technology trends, including the use of new or improved technology, creative user interfaces and other e-commerce marketing tools such as paid search and mobile applications, among others, which may increase our costs and which may not succeed in increasing sales.

Table of Contents

or attracting customers. Our failure to successfully respond to these risks and uncertainties might adversely affect the sales in our e-commerce business, as well as damage our reputation and brands.

Our failure to successfully manage the costs and performance of our catalog mailings might have a negative impact on our business.

Catalog mailings are an important component of our business. Postal rate increases, paper costs, printing costs and other catalog distribution costs affect the cost of our catalog mailings. We rely on discounts from the basic postal rate structure, which could be changed or discontinued at any time. Paper costs have fluctuated significantly in the past and may continue to fluctuate in the future. Future increases in postal rates, paper costs or printing costs would have a negative impact on our operating results to the extent that we are unable to offset such increases by raising prices, implementing more efficient printing, mailing, delivery and order fulfillment systems, or through the use of alternative direct-mail formats. Also, consolidation within the printing industry has reduced the number of potential suppliers capable of meeting our printing requirements, and further consolidation could limit our ability to obtain favorable terms. In addition, if the performance of our catalogs declines, if we misjudge the correlation between our catalog circulation and net sales, or if our catalog strategy overall does not continue to be successful, our results of operations could be negatively impacted.

We have historically experienced fluctuations in our customers' response to our catalogs. Customer response to our catalogs is substantially dependent on merchandise assortment, merchandise availability and creative presentation, as well as the selection of customers to whom the catalogs are mailed, changes in mailing strategies, the size of our mailings, timing of delivery of our mailings, as well as the general retail sales environment and current domestic and global economic conditions. In addition, environmental organizations and other consumer advocacy groups may attempt to create an unfavorable impression of our paper use in catalogs and our distribution of catalogs generally, which may have a negative effect on our sales and our reputation. In addition, we depend upon external vendors to print our catalogs. The failure to effectively produce or distribute our catalogs could affect the timing of catalog delivery. The timing of catalog delivery has been and can be affected by postal service delays. Any delays in the timing of catalog delivery could cause customers to forego or defer purchases, negatively impacting our business and operating results.

Declines in our comparable store sales within our comparable brand revenue metric may harm our operating results and cause a decline in the market price of our common stock.

Various factors affect comparable store sales, including the number, size and location of stores we open, close, remodel or expand in any period, the overall economic and general retail sales environment, consumer preferences and buying trends, changes in sales mix among distribution channels, our ability to efficiently source and distribute products, changes in our merchandise mix, competition (including competitive promotional activity and discount retailers), current local and global economic conditions, the timing of our releases of new merchandise and promotional events, the success of marketing programs, the cannibalization of existing store sales by our new stores, changes in catalog circulation and in our direct-to-customer business and fluctuations in foreign exchange rates. Among other things, weather conditions can affect comparable store sales because inclement weather can alter consumer behavior or require us to close certain stores temporarily and thus reduce store traffic. Even if stores are not closed, many customers may decide to avoid going to stores in bad weather. These factors have caused and may continue to cause our comparable store sales results to differ materially from prior periods and from earnings guidance we have provided. For example, the overall economic and general retail sales environment, as well as local and global economic conditions, has caused a significant decline in our comparable store sales results in the recent past.

Our comparable store sales have fluctuated significantly in the past on an annual, quarterly and monthly basis, and we expect that comparable store sales will continue to fluctuate in the future. However, past comparable store sales are not necessarily an indication of future results and comparable store sales may decrease in the future. Our ability to improve our comparable store sales results depends, in large part, on maintaining and improving our forecasting of customer demand and buying trends, selecting effective marketing techniques, effectively driving

Table of Contents

traffic to our stores through marketing and various promotional events, providing an appropriate mix of merchandise for our broad and diverse customer base and using effective pricing strategies. Any failure to meet the comparable store sales expectations of investors and securities analysts in one or more future periods could significantly reduce the market price of our common stock.

Our failure to successfully anticipate merchandise returns might have a negative impact on our business.

We record a reserve for merchandise returns based on historical return trends together with current product sales performance in each reporting period. If actual returns are greater than those projected and reserved for by management, additional sales returns might be recorded in the future. In addition, to the extent that returned merchandise is damaged, we often do not receive full retail value from the resale or liquidation of the merchandise. Further, the introduction of new merchandise, changes in merchandise mix, changes in consumer confidence, or other competitive and general economic conditions may cause actual returns to exceed merchandise return reserves. In particular, the recent adverse economic conditions resulted and may again result in increased merchandise returns. Any significant increase in merchandise returns that exceeds our reserves could harm our business and operating results.

If we are unable to manage successfully the complexities associated with a multi-channel and multi-brand business, we may suffer declines in our existing business and our ability to attract new business.

With the expansion of our e-commerce business, new brands, acquired brands, and brand extensions, our overall business has become substantially more complex. The changes in our business have forced us to develop new expertise and face new challenges, risks and uncertainties. For example, we face the risk that our e-commerce business might cannibalize a significant portion of our retail and catalog businesses, and we face the risk of catalog circulation cannibalizing our retail sales. While we recognize that our e-commerce sales cannot be entirely incremental to sales through our retail and catalog channels, we seek to attract as many new customers as possible to our e-commerce websites. We continually analyze the business results of our channels and the relationships among the channels in an effort to find opportunities to build incremental sales.

If we are unable to introduce new brands and brand extensions successfully, or to reposition or close existing brands, our business and operating results may be negatively impacted.

We have in the past and may in the future introduce new brands and brand extensions, reposition brands, close existing brands, or acquire new brands, especially as we continue to expand globally. Our newest brands West Elm and PBteen, as well as our newly acquired brand, Rejuvenation and any other new brands, may not grow as we project and plan for. The work involved with integrating new brands into our existing systems and operations could be time consuming, require significant amounts of management time and result in the diversion of substantial operational resources. Further, if we devote time and resources to new brands, acquired brands, brand extensions or brand repositioning, and those businesses are not as successful as we planned, then we risk damaging our overall business results. Alternatively, if our new brands, acquired brands, brand extensions or repositioned brands prove to be very successful, we risk hurting our other existing brands through the potential migration of existing brand customers to the new businesses. In addition, we may not be able to introduce new brands and brand extensions, integrate newly acquired brands, reposition existing brands, or expand our brands globally, in a manner that improves our overall business and operating results and may therefore be forced to close the brands, which may damage our reputation and negatively impact our operating results.

Fluctuations in our tax obligations and effective tax rate may result in volatility of our operating results and stock price.

We are subject to income taxes in many U.S. and certain foreign jurisdictions, and our domestic and global tax liabilities are subject to the allocation of expenses in differing jurisdictions. Our provision for income taxes is subject to volatility and could be adversely impacted by a number of factors that require significant judgment and estimation. Although we believe our estimates are reasonable, the final tax outcome of these matters may

Table of Contents

materially differ from our estimates and adversely affect our financial condition or operating results. We record tax expense based on our estimates of future payments, which include reserves for estimates of probable settlements of foreign and domestic tax audits. At any one time, many tax years are subject to audit by various taxing jurisdictions. The results of these audits and negotiations with taxing authorities may affect the ultimate settlement of these issues. As a result, we expect that throughout the year there could be ongoing variability in our quarterly tax rates as taxable events occur and exposures are evaluated.

In addition, our effective tax rate in a given financial statement period may be materially impacted by changes in the mix and level of earnings or losses in countries with differing statutory tax rates or by changes to existing rules or regulations. There could be an adverse impact on our effective tax rate if pending government proposals in the U.S. for fundamental international tax reform are enacted. Further, other pending tax legislation in the U.S. and abroad could negatively impact our current or future tax structure and effective tax rates.

Our inability to obtain commercial insurance at acceptable rates or our failure to adequately reserve for self-insured exposures might increase our expenses and have a negative impact on our business.

We believe that commercial insurance coverage is prudent in certain areas of our business for risk management. Insurance costs may increase substantially in the future and may be affected by natural catastrophes, fear of terrorism, financial irregularities and other fraud at publicly-traded companies, intervention by the government and a decrease in the number of insurance carriers. In addition, the carriers with which we hold our policies may go out of business, or may be otherwise unable to fulfill their contractual obligations. In addition, for certain types or levels of risk, such as risks associated with earthquakes, hurricanes or terrorist attacks, we may determine that we cannot obtain commercial insurance at acceptable rates, if at all. Therefore, we may choose to forego or limit our purchase of relevant commercial insurance, choosing instead to self-insure one or more types or levels of risks. We are primarily self-insured for workers' compensation, employee health benefits and product and general liability claims. If we suffer a substantial loss that is not covered by commercial insurance or our self-insurance reserves, the loss and related expenses could harm our business and operating results. In addition, exposures exist for which no insurance may be available and for which we have not reserved.

Our inability or failure to protect our intellectual property would have a negative impact on our brands, goodwill and operating results.

We may not be able to adequately protect our intellectual property in the U.S. or in foreign jurisdictions, particularly as we continue to expand globally. Our trademarks, service marks, copyrights, trade dress rights, trade secrets, domain names and other intellectual property are valuable assets that are critical to our success. The unauthorized reproduction or other misappropriation of our intellectual property could diminish the value of our brands or goodwill and cause a decline in our sales. Protection of our intellectual property and maintenance of distinct branding are particularly important as they distinguish our products and services from our competitors. In addition, the costs of defending our intellectual property may adversely affect our operating results.

We may be subject to legal proceedings that could be time consuming, result in costly litigation, require significant amounts of management time and result in the diversion of significant operational resources.

We are involved in lawsuits, claims and proceedings incident to the ordinary course of our business. Litigation is inherently unpredictable. Any claims against us, whether meritorious or not, could be time consuming, result in costly litigation, require significant amounts of management time and result in the diversion of significant operational resources. There have been a growing number of e-commerce-related patent infringement lawsuits in recent years. There has also been a rise in lawsuits against companies that gather information in order to market to consumers online or through the mail. In addition, there has been an increase in employment-related lawsuits. From time to time, we have been subject to these types of lawsuits. The cost of defending claims against us or the ultimate resolution of such claims may harm our business and operating results. In addition, the increasingly regulated business environment may result in a greater number of enforcement actions and private litigation. This could subject us to increased exposure to stockholder lawsuits.

Table of Contents

Our operating results may be harmed by unsuccessful management of our employment, occupancy and other operating costs, and the operation and growth of our business may be harmed if we are unable to attract qualified personnel.

To be successful, we need to manage our operating costs and continue to look for opportunities to reduce costs. We recognize that we may need to increase the number of our employees, especially during peak sales seasons, and incur other expenses to support new brands and brand extensions and the growth of our existing brands, including the opening of new stores. Alternatively, if we are unable to make substantial adjustments to our cost structure during times of uncertainty, such as the 2008-2009 economic downturn, we may incur unnecessary expenses or we may have too few resources to properly run our business, and our business and operating results may be negatively impacted. From time to time, we may also experience union organizing activity in currently non-union facilities. Union organizing activity may result in work slowdowns or stoppages and higher labor costs. In addition, there appears to be a growing number of wage-and-hour lawsuits and other employment-related lawsuits against retail companies, especially in California.

We contract with various agencies to provide us with qualified personnel for our workforce. Any negative publicity regarding these agencies, such as in connection with immigration issues or employment practices, could damage our reputation, disrupt our ability to obtain needed labor or result in financial harm to our business, including the potential loss of business-related financial incentives in the jurisdictions where we operate. Although we strive to secure long-term contracts on favorable terms with our service providers and other vendors, we may not be able to avoid unexpected operating cost increases in the future. Further, we incur substantial costs to warehouse and distribute our inventory. Significant increases in our inventory levels may result in increased warehousing and distribution costs in addition to potential increases in costs associated with inventory that is lost, damaged or aged. Higher than expected costs, particularly if coupled with lower than expected sales, would negatively impact our business and operating results. In addition, in times of economic uncertainty, these long-term contracts may make it difficult to quickly reduce our fixed operating costs, which could negatively impact our business and operating results.

We are undertaking certain systems changes that might disrupt our business operations.

Our success depends, in part, on our ability to source and distribute merchandise efficiently through appropriate systems and procedures. We are in the process of substantially modifying our information technology systems, which involves updating or replacing legacy systems with successor systems over the course of several years. There are inherent risks associated with replacing our core systems, including supply chain and merchandising systems disruptions, that could affect our ability to get the correct products into the appropriate stores and delivered to customers. We may not successfully launch these new systems, or the launch of such systems may result in disruptions to our business operations. In addition, changes to any of our software implementation strategies could result in the impairment of software-related assets. We are also subject to the risks associated with the ability of our vendors to provide information technology solutions to meet our needs. Any disruptions could negatively impact our business and operating results.

We outsource certain aspects of our business to third party vendors and are in the process of insourcing certain business functions from third party vendors, both of which subject us to risks, including disruptions in our business and increased costs.

We outsource certain aspects of our business to third party vendors that subject us to risks of disruptions in our business as well as increased costs. For example, we utilize outside vendors for such things as payroll processing and various distribution center services. Accordingly, we are subject to the risks associated with their ability to successfully provide the necessary services to meet our needs. If our vendors are unable to adequately protect our data and information is lost, our ability to deliver our services is interrupted, or our vendors' fees are higher than expected, then our business and operating results may be negatively impacted.

Table of Contents

In addition, we are in the process of insourcing certain aspects of our business, including the management of certain infrastructure technology, furniture manufacturing, furniture delivery to our customers and the management of our global vendors, each of which were previously outsourced to third party providers. We may also need to continue to insource other aspects of our business in the future in order to control our costs and to stay competitive. This may cause disruptions in our business and result in increased cost to us. In addition, if we are unable to perform these functions better than, or at least as well as, our third party providers, our business may be harmed.

If our operating and financial performance in any given period does not meet the guidance that we have provided to the public, our stock price may decline.

We provide public guidance on our expected operating and financial results for future periods. Although we believe that this guidance provides investors and analysts with a better understanding of management's expectations for the future and is useful to our stockholders and potential stockholders, such guidance is comprised of forward-looking statements subject to the risks and uncertainties described in this report and in our other public filings and public statements. Our actual results may not always be in line with or exceed the guidance we have provided, especially in times of economic uncertainty. In the past, when we have reduced our previously provided guidance, the market price of our common stock has declined. If, in the future, our operating or financial results for a particular period do not meet our guidance or the expectations of investment analysts or if we reduce our guidance for future periods, the market price of our common stock may decline as well.

A variety of factors, including seasonality and the economic environment, may cause our quarterly operating results to fluctuate, leading to volatility in our stock price.

Our quarterly results have fluctuated in the past and may fluctuate in the future, depending upon a variety of factors, including shifts in the timing of holiday selling seasons, including Valentine's Day, Easter, Halloween, Thanksgiving and Christmas, as well as changes in economic conditions. Historically, a significant portion of our revenues and net earnings have typically been realized during the period from October through December each year. In anticipation of increased holiday sales activity, we incur certain significant incremental expenses prior to and during peak selling seasons, particularly October through December, including fixed catalog production and mailing costs and the costs associated with hiring a substantial number of temporary employees to supplement our existing workforce.

We may require external funding sources for operating funds, which may cost more than we expect, or not be available at the levels we require and, as a consequence, our expenses and operating results could be negatively affected.

We regularly review and evaluate our liquidity and capital needs. We currently believe that our available cash, cash equivalents and cash flow from operations will be sufficient to finance our operations and expected capital requirements for at least the next 12 months. However, we might experience periods during which we encounter additional cash needs and we might need additional external funding to support our operations. Although we were able to amend our line of credit facility during fiscal 2012 on acceptable terms, in the event we require additional liquidity from our lenders, such funds may not be available to us or may not be available to us on acceptable terms in the future. For example, in the event we were to breach any of our financial covenants, our banks would not be required to provide us with additional funding, or they may require us to renegotiate our existing credit facility on less favorable terms. In addition, we may not be able to renew our letters of credit that we use to help pay our suppliers on terms that are acceptable to us, or at all, as the availability of letter of credit facilities may become limited. Further, the providers of such credit may reallocate the available credit to other borrowers. If we are unable to access credit at the levels we require, or the cost of credit is greater than expected, it could adversely affect our operating results.

Table of Contents

Disruptions in the financial markets may adversely affect our liquidity and capital resources and our business.

Disruptions in the global financial markets and banking systems have made credit and capital markets more difficult for companies to access, even for some companies with established revolving or other credit facilities. We have access to capital through our revolving line of credit facility. Each financial institution, which is part of the syndicate for our revolving line of credit facility, is responsible for providing a portion of the loans to be made under the facility. If any participant, or group of participants, with a significant portion of the commitments in our revolving line of credit facility fails to satisfy its obligations to extend credit under the facility and we are unable to find a replacement for such participant or group of participants on a timely basis (if at all), our liquidity and our business may be materially adversely affected.

If we are unable to pay quarterly dividends or repurchase our stock at intended levels, our reputation and stock price may be harmed.

In January 2012, our Board of Directors authorized the repurchase of up to \$225,000,000 of our common stock. In addition, our quarterly cash dividend is \$0.22 per common share for an annual cash dividend of \$0.88 per share. The dividend and stock repurchase program may require the use of a significant portion of our cash earnings. As a result, we may not retain a sufficient amount of cash to fund our operations or finance future growth opportunities, new product development initiatives and unanticipated capital expenditures. Further, our Board of Directors may, at its discretion, decrease the intended level of dividends or entirely discontinue the payment of dividends at any time. The stock repurchase program does not have an expiration date and may be limited at any time. Our ability to pay dividends and repurchase stock will depend on our ability to generate sufficient cash flows from operations in the future. This ability may be subject to certain economic, financial, competitive and other factors that are beyond our control. Any failure to pay dividends or repurchase stock after we have announced our intention to do so may negatively impact our reputation and investor confidence in us and may negatively impact our stock price.

If we fail to maintain proper and effective internal controls, our ability to produce accurate and timely financial statements could be impaired and our investors' views of us could be harmed.

We have evaluated and tested our internal controls in order to allow management to report on, and our registered independent public accounting firm to attest to, the effectiveness of our internal controls, as required by Section 404 of the Sarbanes-Oxley Act of 2002. If we are not able to continue to meet the requirements of Section 404 in a timely manner, or with adequate compliance, we would be required to disclose material weaknesses if they develop or are uncovered and we may be subject to sanctions or investigation by regulatory authorities, such as the Securities and Exchange Commission or the New York Stock Exchange. In addition, our internal controls may not prevent or detect all errors and fraud. A control system, no matter how well designed and operated, is based upon certain assumptions and can provide only reasonable assurance that the objectives of the control system will be met. If any of the above were to occur, our business and the perception of us in the financial markets could be negatively impacted.

Changes to accounting rules or regulations may adversely affect our operating results.

Changes to existing accounting rules or regulations may impact our future operating results. A change in accounting rules or regulations may even affect our reporting of transactions completed before the change is effective. The introduction of new accounting rules or regulations and varying interpretations of existing accounting rules or regulations have occurred and may occur in the future. Future changes to accounting rules or regulations, or the questioning of current accounting practices, may adversely affect our operating results.

Table of Contents

Changes to estimates related to our property and equipment, including information technology systems, or operating results that are lower than our current estimates at certain store locations, may cause us to incur impairment charges.

We make estimates and projections in connection with impairment analyses for certain of our store locations and other property and equipment, including information technology systems. Our impairment analyses determine whether projected cash flows from operations are sufficient to recover the carrying value of these assets. Impairment results when the carrying value of the asset exceeds the estimated undiscounted future cash flows over its remaining useful life. These calculations require us to make a number of estimates and projections of future results. If these estimates or projections change or prove incorrect, we may be, and have been, required to record impairment charges on certain store locations and other property and equipment, including information technology systems. These impairment charges have been significant in the past and may be significant in the future and, as a result of these charges, our operating results have been and may, in the future, be adversely affected.

If we do not properly account for our unredeemed gift certificates, gift cards and merchandise credits, our operating results will be harmed.

We maintain a liability for unredeemed gift cards, gift certificates and merchandise credits until the earlier of redemption, escheatment or four years. After four years, the remaining unredeemed gift cards, gift certificate or merchandise credit liability is relieved and recorded as a benefit within selling, general and administrative expenses. In the event that our historical redemption patterns change in the future, we might change the minimum time period for maintaining a liability for unredeemed gift certificates on our balance sheets, which would affect our financial position or operating results. Further, in the event that a state or states were to require that the unredeemed amounts be escheated to that state or states, our business and operating results would be harmed.

We may be exposed to risks and costs associated with credit card fraud and identity theft that could cause us to incur unexpected expenses and loss of revenue.

A significant portion of our customer orders are placed through our e-commerce websites or through our customer care centers. In addition, a significant portion of sales made through our retail channel require the collection of certain customer data, such as credit card information. In order for our sales channel to function and develop successfully, we and other parties involved in processing customer transactions must be able to transmit confidential information, including credit card information, securely over public networks. Third parties may have the technology or knowledge to breach the security of customer transaction data. Although we take the security of our systems and the privacy of our customers confidential information seriously, we cannot guarantee that our security measures will effectively prevent others from obtaining unauthorized access to our information and our customers' information. Any person who circumvents our security measures could destroy or steal valuable information or disrupt our operations. Any security breach could cause consumers to lose confidence in the security of our websites or stores and choose not to purchase from us. Any security breach could also expose us to risks of data loss, litigation and liability and could seriously disrupt our operations and harm our reputation, any of which could harm our business.

In addition, states and the federal government are increasingly enacting laws and regulations to protect consumers against identity theft. Also, as our business expands globally, we are subject to data privacy and other similar laws in various foreign jurisdictions. Compliance with these laws will likely increase the costs of doing business and, if we fail to implement appropriate safeguards or to detect and provide prompt notice of unauthorized access as required by some of these new laws, we could be subject to potential claims for damages and other remedies, which could harm our business.

Table of Contents

If we fail to attract and retain key personnel, our business and operating results may be harmed.

Our future success depends to a significant degree on the skills, experience and efforts of key personnel in our senior management, whose vision for our company, knowledge of our business and expertise would be difficult to replace. If any one of our key employees leaves, are seriously injured or are unable to work, and we are unable to find a qualified replacement, we may be unable to execute our business strategy.

In addition, our main offices are located in the San Francisco Bay Area, where competition for personnel with retail and technology skills can be intense. If we fail to identify, attract, retain and motivate these skilled personnel, especially in this challenging economic environment, our business may be harmed. Further, in the event we need to hire additional personnel, we may experience difficulties in attracting and successfully hiring such individuals due to competition for highly skilled personnel, as well as the significantly higher cost of living expenses in our market.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

In January 2012, our Board of Directors authorized a stock repurchase program to purchase up to \$225,000,000 of our common stock. During the third quarter of fiscal 2012, we repurchased 748,807 shares under this program at an average cost of \$41.69 per share and a total cost of \$31,217,000. During year-to-date 2012, we repurchased 3,278,078 shares under this program at an average cost of \$37.92 per share and a total cost of \$124,293,000. As of October 28, 2012, there remains an aggregate of \$31,283,000 available for repurchases under this program.

The following table summarizes our repurchases of shares of our common stock during the third quarter of fiscal 2012:

Fiscal period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Dollar Value of Shares That May Yet Be Purchased Under the Program
July 30, 2012 - August 26, 2012	263,822	\$ 36.90	263,822	\$ 52,766,000
August 27, 2012 - September 23, 2012	216,281	\$ 42.89	216,281	\$ 43,490,000
September 24, 2012 - October 28, 2012	268,704	\$ 45.43	268,704	\$ 31,283,000
Total	748,807	\$ 41.69	748,807	\$ 31,283,000

Stock repurchases under this program may be made through open market and privately negotiated transactions at times and in such amounts as management deems appropriate. The timing and actual number of shares repurchased will depend on a variety of factors including price, corporate and regulatory requirements, capital availability and other market conditions. The stock repurchase program does not have an expiration date and may be limited or terminated at any time without prior notice.

During the third quarter of fiscal 2011, we repurchased 963,700 shares of our common stock at an average cost of \$32.68 per share and a total cost of \$31,490,000. During year-to-date 2011, we repurchased 2,530,208 shares of our common stock at an average cost of \$37.15 per share and a total cost of \$93,986,000 under programs previously authorized by our Board of Directors.
