### BURLINGTON COAT FACTORY INVESTMENTS HOLDINGS, INC. AND SUBSIDIARIES

### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

May 4, 2013

### (UNAUDITED)

### 1. Summary of Significant Accounting Policies

Basis of Presentation

These unaudited Condensed Consolidated Financial Statements include the accounts of Burlington Coat Factory Investments Holdings, Inc. and all of its subsidiaries (Company or Holdings). Holdings has no operations and its only asset is all of the stock of Burlington Coat Factory Warehouse Corporation. All discussions of operations in this report relate to Burlington Coat Factory Warehouse Corporation and its subsidiaries (BCFWC), which are reflected in the financial statements of Holdings. The Condensed Consolidated Financial Statements are unaudited, but in the opinion of management reflect all adjustments (which are of a normal and recurring nature) necessary for the fair presentation of the results of operations for the interim periods presented. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) have been condensed or omitted. It is suggested that these Condensed Consolidated Financial Statements be read in conjunction with the financial statements and notes thereto included in the Company s Annual Report on Form 10-K for the fiscal year ended February 2, 2013 (Fiscal 2012 10-K). The balance sheet at February 2, 2013 presented herein has been derived from the audited Consolidated Financial Statements contained in the Fiscal 2012 10-K. Because the Company s business is seasonal in nature, the operating results for the three month period ended May 4, 2013 are not necessarily indicative of results for the fiscal year ending February 1, 2014 (Fiscal 2013).

Accounting policies followed by the Company are described in Note 1 to the audited Consolidated Financial Statements contained in the Fiscal 2012 10-K.

On February 28, 2013, the FASB issued Account Standards Update No. 2013-04, Joint and Several Obligations, (ASU 2013-04). In accordance with ASU 2013-04, an entity is required to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of the guidance is fixed at the reporting date. Required disclosures include a description of the joint and several arrangement and the total outstanding amount of the obligation for all joint parties. ASU 2013-04 is effective for all annual and interim periods in fiscal years beginning after December 15, 2013. However, early adoption is permitted. The Company has elected not to early adopt in the current fiscal year and does not expect ASU 2013-04, once adopted, to have a material impact on the Company s financial position or results of operations.

There were no other new accounting standards that had a material impact on the Company s Condensed Consolidated Financial Statements during the three month period ended May 4, 2013 and there were no new accounting standards or pronouncements that were issued but not yet effective as of May 4, 2013 that the Company expects to have a material impact on its financial position or results of operations upon becoming effective.

### 2. Stockholder s Deficit

\$1 Billion Senior Secured Term Loan Facility (Term Loan Facility)

On February 15, 2013, BCFWC entered into Amendment No. 2 to its Term Loan Credit Agreement (Second Amendment). The Second Amendment creates a restricted payments basket of \$25 million (which includes retained excess cash flow, in an amount not to exceed 50% of BCFWC s consolidated net income (as defined in the existing Notes) and permits BCFWC to use the available amount to make restricted payments since the second quarter of Fiscal 2011), in each case so long as certain conditions are satisfied. In connection with this amendment, the Company incurred a \$1.6 million amendment fee that was capitalized and included in the line item Other Assets on the Company s Condensed Consolidated Balance Sheet. Additionally, the Company incurred \$8.9 million of additional fees, inclusive of an \$8.6 million fee payable to Bain Capital, for various consulting and advisory services. These fees were included in the line item Costs Related to Debt Amendment on the Company s Condensed Consolidated Statements of Operations and Comprehensive Loss.

The Term Loan Credit Agreement contains financial, affirmative and negative covenants and requires that BCFWC, exclusive of subsidiaries (referred to herein as BCFW), among other things, maintain on the last day of each fiscal quarter a consolidated leverage ratio not to exceed a maximum amount and maintain a consolidated interest coverage ratio of at least a certain amount. The consolidated leverage ratio compares our total debt to Adjusted EBITDA (as defined in the Term Loan Credit Agreement) for the trailing twelve months, and such ratios may not exceed 6.25 to 1 through November 2, 2013; 5.50 to 1 through November 1, 2014; 5.00 to 1 through October 31, 2015; and 4.75 to 1 at January 30, 2016 and thereafter. The consolidated interest coverage ratio compares our consolidated interest expense to Adjusted EBITDA for the trailing twelve months, and such ratios must exceed 1.85 to 1 through November 2, 2013; 2.00 to 1 through October 31, 2015; and 2.10 to 1 at January 30, 2016 and thereafter. The consolidated leverage ratio and interest coverage ratio for the three months ended May 4, 2013 were 3.7 and 3.5, respectively.

Adjusted EBITDA is a non-GAAP financial measure of our liquidity. Adjusted EBITDA starts with consolidated net income/loss for the period and adds back (i) depreciation, amortization, impairments and other non-cash charges that were deducted in arriving at consolidated net income/loss, (ii) the provision/benefit for taxes, (iii) interest expense, net, (iv) advisory fees, and (v) unusual, non-recurring or extraordinary expenses, losses or charges as reasonably approved by the administrative agent for such period. Adjusted EBITDA is used to calculate the consolidated leverage ratio. Adjusted EBITDA provides management, including the Company s chief operating decision maker, with helpful information with respect to its operations such as its ability to meet its future debt service, fund its capital expenditures and working capital requirements, and comply with various covenants in each indenture governing its outstanding notes and the credit agreements governing its senior secured credit facilities which are material to its financial condition and financial statements.

The interest rates for the Term Loan Facility are based on: (i) for LIBO rate loans for any interest period, at a rate per annum equal to (a) the greater of (x) the LIBO rate, as determined by the Term Loan Facility Administrative Agent, for such interest period

7

multiplied by the Statutory Reserve Rate (as defined in the Term Loan Credit Agreement) and (y) 1.50% (the Term Loan Adjusted LIBO Rate), plus an applicable margin; and (ii) for prime rate loans, a rate per annum equal to the highest of (a) the variable annual rate of interest then announced by JPMorgan Chase Bank, N.A. at its head office as its prime rate, (b) the federal funds rate in effect on such date plus 0.50% per annum, and (c) the Term Loan Adjusted LIBO Rate for the applicable class of term loans for one-month plus 1.00%, plus, in each case, an applicable margin. The interest rate on the Term Loan Facility was 5.5% as of May 4, 2013.

In conjunction with the Second Amendment, on February 20, 2013, Burlington Holdings, LLC (Indirect Parent), the indirect parent company of Holdings, and Burlington Holdings Finance, Inc., the wholly-owned subsidiary of Indirect Parent (collectively the Issuers), completed the offering of \$350 million aggregate principal amount of Senior Notes due 2018 (2018 Notes) at an issue price of 98.00%. The 2018 Notes are senior unsecured obligations of the Issuers, and the Issuers are not obligors or guarantors under BCFWC s existing senior secured credit facilities or indenture. As none of the Issuers subsidiaries, are obligors or guarantors under the 2018 Notes, the debt is recorded on the Issuers financial statements only and is not included in the Company s financial statements.

Interest is payable on the Senior Notes on each February 15 and August 15, commencing August 15, 2013. The first interest payment on the 2018 Notes will be payable in cash. For each interest period thereafter, the Issuers will be required to pay interest on the 2018 Notes entirely in cash, unless certain conditions are satisfied, in which case the Issuers will be entitled to pay, to the extent described in the indenture governing the 2018 Notes, interest on the 2018 Notes by increasing the principal amount of the 2018 Notes or by issuing new notes (such increase being referred to herein as PIK interest). Cash interest on the 2018 Notes will accrue at the rate of 9.00% per annum. PIK interest on the 2018 Notes will accrue at the rate of 9.75% per annum. The Company intends to pay Indirect Parent a semi annual dividend in order for Indirect Parent to make payment on the semi annual cash interest.

In February 2013, the Issuers used the net proceeds from the offering of the 2018 Notes to pay a special cash dividend of approximately \$336 million, in the aggregate, to Indirect Parent s sole member, Burlington Holdings, Inc., which in turn distributed the proceeds to its stockholders. BCFWC paid a dividend to the Issuers of \$5.0 million in order to pay certain fees in connection with the issuance of the 2018 Notes, inclusive of a \$3.5 million fee to Bain Capital for various consulting and advisory services.

### ABL Line of Credit

At May 4, 2013, the Company had \$484.8 million available under the ABL Line of Credit and no outstanding borrowings. The maximum borrowings under the facility during the three month period ended May 4, 2013 amounted to \$125.0 million. Average borrowings during the three month period ended May 4, 2013 amounted to \$24.5 million, at an average interest rate of 2.0%. There was no outstanding balance under the ABL Line of Credit at February 2, 2013.

At April 28, 2012, the Company had \$472.4 million available under the ABL Line of Credit and no outstanding borrowings. The maximum borrowings under the facility during the three month period ended April 28, 2012 amounted to \$213.7 million. Average borrowings during the three month period ended April 28, 2012 amounted to \$80.8 million at average interest rates of 2.2%.

The Term Loan Facility, ABL Line of Credit and 10% Senior Notes due 2019 (Notes) are fully, jointly, severally, unconditionally, and irrevocably guaranteed by all of the Company s subsidiaries. The ABL Line of Credit is collateralized by a first lien on the Company s real estate and property and equipment. The Term Loan Facility is collateralized by a first lien on the Company s real estate, favorable leases, and machinery and equipment and a second lien on the Company s inventory and receivables.

As of May 4, 2013, the Company was in compliance with all of its debt covenants. The agreements regarding the ABL Line of Credit and the Term Loan Facility, as well as the indenture governing the Notes, contain covenants that, among other things, limit the Company s ability, and the ability of the Company s restricted subsidiaries, to pay dividends on, redeem or repurchase capital stock; make investments; incur additional indebtedness or issue preferred stock; create liens; permit dividends or other restricted payments by the Company s subsidiaries; sell all or substantially all of the Company s assets or consolidate or merge with or into other companies; and engage in transactions with affiliates.

The Company had \$24.9 million in deferred financing fees, net of accumulated amortization, as of both May 4, 2013 and February 2, 2013 and \$30.1 million as of April 28, 2012, related to its debt instruments recorded in the line item. Other Assets on the Company s Condensed Consolidated Balance Sheets. The Company incurred new deferred financing fees of \$1.5 million as a result of the Second Amendment as discussed above. Amortization of deferred financing fees amounted to \$1.5 million and \$1.4 million for the three month periods ended May 4, 2013 and April 28, 2012, respectively, and is included in the line item. Interest Expense in the Company s Condensed Consolidated Statements of Operations and Comprehensive Loss.

On May 17, 2013, the Company entered into Amendment No. 3 (Third Amendment) to the Term Loan Credit Agreement in order to, among other things, reduce the interest rates applicable to the Company s Term Loan Facility. Refer to Note 11 to the Company s Condensed Consolidated Financial Statements entitled Subsequent Events for further details of the amendment.

### 4. Restructuring and Separation

The Company accounts for restructuring and separation costs in accordance with ASC Topic No. 420, Exit or Disposal Cost Obligations (Topic No. 420). In an effort to improve workflow efficiencies and realign certain responsibilities, the Company effected a reorganization of certain positions within its field and corporate locations. During the three months ended May 4, 2013, severance charges were \$1.6 million and were recorded in the line item Restructuring and Separation Costs in the Company s Condensed Consolidated Statement of Operations and Comprehensive Loss.

In comparison, severance charges for the three months ended April 28, 2012 were \$1.5 million. Severance charges for the three months ended April 28, 2012 were also the result of the Company s efforts to improve workflow efficiencies and realign certain responsibilities, which effected the reorganization of certain positions within its stores and corporate locations.

The table below summarizes the charges and payments related to the Company s restructuring and separation costs, which are included in the line items. Other Current Liabilities in the Company s Condensed Consolidated Balance Sheet as of May 4, 2013 and April 28, 2012:

### 5. Fair Value Measurements

The Company accounts for fair value measurements in accordance with ASC Topic No. 820, *Fair Value Measurements and Disclosures*, (Topic No. 820) which defines fair value, establishes a framework for measurement and expands disclosure about fair value measurements. Topic No. 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price), and classifies the inputs used to measure fair value into the following hierarchy:

- Level 1: Quoted prices for identical assets or liabilities in active markets.
- Level 2: Quoted market prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable.
- Level 3: Pricing inputs that are unobservable for the assets and liabilities and include situations where there is little, if any, market

activity for the assets and liabilities.

The inputs into the determination of fair value require significant management judgment or estimation.

Financial Assets

The Company s financial assets as of May 4, 2013 included cash equivalents, interest rate cap agreements and a note receivable. The Company s financial liabilities are discussed below. The carrying value of cash equivalents approximates fair value due to its short-term nature. The fair values of the interest rate cap agreements are determined using quotes that are based on models whose inputs are observable LIBOR forward interest rate curves. To comply with the provisions of Topic No. 820, the Company incorporates credit valuation adjustments to appropriately reflect both the Company s non-performance risk and the respective counterparty s non-performance risk in the fair value measurements. In adjusting the fair value of the Company s interest rate cap agreements for the effect of non-performance risk, the Company has considered the impact of netting and any applicable credit enhancements, such as collateral postings, thresholds, mutual puts, and guarantees. As a result, the Company has determined that the inputs used to value this investment fall within Level 2 of the fair value hierarchy.

Although the Company has determined that the majority of the inputs used to value its interest rate cap agreements fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with the Company s interest rate cap agreements utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default. As of May 4, 2013, the Company recorded credit valuation adjustments of \$0.1 million to the overall valuation of the Company s interest rate cap agreements. The credit valuation adjustment is not considered significant to the valuation of each of the individual interest rate cap agreements and as a result, the Company has determined that its interest rate cap agreement valuations in their entirety are classified as Level 2 within the fair value hierarchy.

The fair value of the note receivable is based on a discounted cash flow analysis whose inputs are unobservable, and therefore it falls within Level 3 of the fair value hierarchy.

The fair values of the Company s financial assets and the hierarchy of the level of inputs are summarized below:

ITEM 7 MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements This Annual Report on Form 10-K includes forward-looking statements within the meaning of the Private

Securities Litigation Reform Act of 1995. All statements other than statements of historical fact, including statements regarding industry prospects and future consolidated financial position or results of operations, made in this Report on Form 10-K are forward looking. We use words such as anticipates, believes, expects, future, intends and similar expressions to identify forward-looking statements. Forward-looking statements reflect management is current expectations and are inherently uncertain. Our actual results may differ significantly from such expectations. The following discussion includes forward-looking statements regarding expectations of, among others, non-cash pension expense, environmental costs, capital expenditures and liquidity, all of which are inherently difficult to predict. Although we make such statements based on assumptions that we believe to be reasonable, there can be no assurance that actual results will not differ materially from our expectations. Accordingly, we identify the following important factors, among others, which could cause our results to differ from any results that might be projected, forecasted or estimated in any such forward-looking statements:

- variations in demand for our products including the impact of any unplanned market-related downtime, or variations in product pricing; i. changes in the cost or availability of raw materials we use, in particular pulpwood, pulp, pulp substitutes, caustic soda, and abaca fiber; ii. changes in energy-related costs and commodity raw materials with an energy component; iii. our ability to develop new, high value-added products; iv. the impact of exposure to volatile market-based pricing for sales of excess electricity; the impact of competition, both domestic and international, changes in industry production capacity, including the construction of new mills or new machines, the closing of mills and incremental changes due to capital expenditures or productivity increases; the gain or loss of significant customers and/or on-going viability of such customers; viii. cost and other effects of environmental compliance, cleanup, damages, remediation or restoration, or personal injury or property damages related thereto, such as the costs of natural resource restoration or damages related to the presence of polychlorinated biphenyls ( PCBs ) in the lower Fox River on which our former Neenah mill was located; adverse results in litigation in the Fox River matter; risks associated with our international operations, including local economic and political environments and fluctuations in currency exchange rates;
- xii. disruptions in production and/or increased costs due to labor disputes;

geopolitical events, including war and terrorism;

xiii. the impact of unfavorable outcomes of audits by various state, federal or international tax authorities;

xiv. enactment of adverse state, federal or foreign tax or other legislation or changes in government policy or regulation; and

xv. our ability to finance, consummate and integrate acquisitions;

### RESULTS OF OPERATIONS

2013 versus 2012

**Overview** The following table sets forth summarized results of operations:

|                                | Year ended De | Year ended December 31 |           |  |  |
|--------------------------------|---------------|------------------------|-----------|--|--|
| In thousands, except per share | 2013          |                        | 2012      |  |  |
| Net sales                      | \$ 1,722,615  | \$                     | 1,577,788 |  |  |
| Gross profit                   | 218,660       |                        | 213,649   |  |  |
| Operating income               | 86,519        |                        | 101,874   |  |  |
| Net income                     | 67,158        |                        | 59,379    |  |  |
| Earnings per diluted share     | 1.52          |                        | 1.36      |  |  |

Net income increased 13.1% in the year over year comparison and totaled \$67.2 million in 2013, or \$1.52 per diluted share. In 2012 net income was \$59.4 million, or \$1.36 per diluted share The year over year comparison reflects benefits from a significant acquisition in 2013, solid performance from our two growth businesses and a favorable tax rate.

Effective April 30, 2013, we completed the acquisition of Dresden Papier GmbH ( Dresden ) for \$211 million, net of cash acquired. Our reported results for 2013 include \$101.8 million of net sales and \$18.3 million of operating income from Dresden representing its results prospectively from the acquisition date. Such results are reported as part of the Composite Fibers business unit.

Our growth-oriented fiber-based engineered materials businesses reported improved results evidenced by an \$29.8 million increase in operating income. However, total operating income from all of our business units increased \$2.2 million reflecting the impact of a lower contribution from Specialty Papers. Overall, total net sales increased \$144.8 million, or 9.2% and shipping volumes increased 6.2% in the year-over-year comparison

Composite Fibers operating income increased to \$62.4 million from \$36.1 million in 2012 primarily due to the inclusion of Dresden, higher selling prices and an improved mix. Excluding Dresden, shipping volumes were essentially unchanged.

Advanced Airlaid Materials operating income increased to \$21.5 million compared with \$18.0 million in 2012 primarily due to increased shipping volumes.

Specialty Papers operating income declined to \$39.7 million from \$67.3 million in 2012. Although shipping volumes increased 1.4%, this unit s profitability was unfavorably impacted by operational disruptions and lower selling prices.

In addition to the impact of including Dresden, the consolidated results of operations for 2013 and 2012 include the following significant unusual items:

|  | After-tax   |             |  |
|--|-------------|-------------|--|
| In thousands, except per share                       | Gain (loss) | Diluted EPS |  |

| Timberland sales and related costs                   | 5,388       | 0.12        |  |

The above items increased earnings by \$5.3 million, or \$0.12 per diluted share, in 2013. Comparatively, in 2012 earnings benefited by \$4.6 million or \$0.10 per diluted share from the items set forth above.

**Business Units** Results of individual business units are presented based on our management accounting practices and management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to accounting principles generally accepted in the United States of America; therefore, the financial results of individual business units are not necessarily comparable with similar information for any other company. The management accounting process uses assumptions and allocations to measure performance of the business units. Methodologies are refined from time to time as management accounting practices are enhanced and businesses change. The costs incurred by support areas not directly aligned with the business unit are allocated primarily based on an estimated

utilization of support area services or are included in Other and Unallocated in the Business Unit Performance table.

Management evaluates results of operations of the business units before pension expense, certain corporate level costs, and the effects of certain gains or losses not considered to be related to the core business operations. Management believes that this is a more meaningful representation of the operating performance of its core businesses, the profitability of business units and the extent of cash flow generated from these core operations. Such amounts are presented under the caption—Other and Unallocated. This presentation is aligned with the management and operating structure of our company. It is also on this basis that the Company—s performance is evaluated internally and by the Company—s Board of Directors.

On April 30, 2013, we completed the acquisition of Dresden for \$211 million. Dresden s results are included prospectively from the acquisition date as part of the Composite Fibers business unit. For additional information related to this acquisition, refer to Note 3 Acquisition.

GLATFELTER 2013 FORM 10-K

17

During 2013, our growth oriented businesses generated approximately 48.5%, or \$834.8 million, of our consolidated net sales compared with 43.3% in 2012, reflecting strategic initiatives to invest in growth businesses. Consolidated net sales for 2013 increased \$144.8 million, or 9.2%, in the comparison to 2012 and totaled \$1,722.6 million. The increase was primarily due to the Dresden acquisition and \$13.6 million from the favorable impact of foreign currencies. Lower selling prices, primarily in Specialty Papers, adversely affected the comparison by \$9.4 million. Shipping volumes increased 6.2% in the year over year comparison, or 1.8% excluding the Dresden acquisition.

In Composite Fibers, net sales were \$566.4 million, an increase of \$129.7 million, or 29.7%. The Dresden acquisition accounted for \$101.8 million of the increase. On an organic basis, shipping volumes were essentially unchanged with a favorable mix. Higher selling prices and the translation of foreign currencies benefited the comparison by \$2.9 million and \$8.7 million, respectively.

Composite Fibers—operating income in 2013 increased \$26.3 million, of which Dresden represented \$18.3 million. The remaining increase was primarily due to improved mix of products and higher selling prices. Foreign currency translation favorably impacted operating income by \$0.6 million compared with the prior year.

In Advanced Airlaid Materials, net sales increased \$22.1 million, or 9.0%, in 2013 compared to 2012. The increase in net sales was due to a 6.4% increase in shipping volumes, a \$4.9 million benefit from favorable impact of foreign currency exchange partially offset by \$2.3 million of lower selling prices.

Operating income in this business unit increased \$3.5 million in 2013 compared to 2012 led by a \$5.7 million benefit from the increase in shipping volumes. The translation of foreign currencies favorably impacted operating income by \$2.2 million.

In the Specialty Papers business unit, net sales for 2013 decreased by \$6.9 million, or 0.8%, to \$887.9 million. The decrease was primarily due to \$10.0 million from lower selling prices partially offset by a 1.4% increase in shipping volumes.

Specialty Papers operating income in 2013 of \$39.7 million was \$27.6 million lower than 2012 primarily due to lower selling prices, operational interruptions that adversely affected pulp mill production and \$3.8 million from lower energy and related sales.

We sell excess power generated by the Spring Grove, PA facility. In addition, two of our facilities are registered generators of renewable energy credits (RECs). The following table summarizes this activity for 2013 and 2012:

| In thousands             | Year ended Do |          |            |
|--------------------------|---------------|----------|------------|
|                          | 2013          | 2012     | Change     |
| Energy sales             | \$ 8,189      | \$ 5,284 | \$ 2,905   |
| Costs to produce         | (6,784)       | (4,187)  | (2,597)    |
| Net                      | 1,405         | 1,097    | 308        |
| Renewable energy credits | 1,748         | 5,903    | (4,155)    |
| Total                    | \$ 3.153      | \$ 7.000 | \$ (3,847) |

RECs represent sales of certified credits earned related to burning renewable sources of energy such as black liquor and wood waste. We sell RECs into an emerging and somewhat illiquid market. The extent and value of future revenues from REC sales is dependent on many factors outside of management s control. Therefore, we may not be able to generate consistent amounts of sales of RECs in future periods.

**Pension Expense** The following table summarizes the amounts of pension expense recognized for 2013 compared to 2012:

|                        | Year ended De | Year ended December 31 |          |  |  |
|------------------------|---------------|------------------------|----------|--|--|
| In thousands           | 2013          | 2012                   | Change   |  |  |
| Recorded as:           |               |                        |          |  |  |
| Costs of products sold | \$ 12,368     | \$ 9,148               | \$ 3,220 |  |  |
| SG&A expense           | 1,849         | 2,467                  | (618)    |  |  |
| Total                  | \$ 14.217     | \$ 11.615              | \$ 2.602 |  |  |

The amount of pension expense recognized each year is dependent on various actuarial assumptions and certain other factors, including discount rates and the fair value of our pension assets. Pension expense in 2014 is expected to be approximately \$6.2 million. The decrease is primarily due to higher discount rates and the impact of amortizing deferred actuarial gains from higher returns on assets in 2013.

**Gain on Sales of Plant, Equipment and Timberlands, net** During the years ended December 31, 2013 and 2012, we completed the following sales of assets:

| Dollars in thousands | Acres | I  | Proceeds | Gain     |
|----------------------|-------|----|----------|----------|
| 2013                 |       |    |          |          |

In connection with each of the asset sales set forth above, we received cash proceeds.

**Other and Unallocated** The amount of net operating expenses not allocated to a business unit and reported as Other and Unallocated in our table of *Business Unit Performance*, excluding gains from sales of plant, equipment and timberlands, totaled \$38.8 million in 2013 compared with \$29.3 million in 2012. The increase is primarily due to acquisition and integration expenses, legal entity restructuring related costs and higher pension expense.

Non-operating income (expense) as presented in the Business Unit Performance table includes \$18.0 million and \$18.7 million of interest expense for 2013 and 2012, respectively. The amount reported for 2012 includes a \$1.9 million charge related to the write-off of unamortized issuance costs in connection with the refinancing or our long-term bonds. Excluding the 2012 write-off, interest expense increased \$1.2 million primarily reflecting the financing of the Dresden acquisition.

**Income taxes** In 2013, income tax expense totaled \$2.0 million on pre-tax income of \$69.2 million. The comparable amounts in 2012 were \$19.6 million and \$78.9 million, respectively. Tax expense in 2013 benefited from a greater proportion of earnings generated in lower tax foreign jurisdictions relative to the U.S. and by an aggregate of \$16.3 million from cellulosic biofuel production credits, research and development credits, reduction in reserves due to the lapse of statutes of limitation and changes in international statutory rates.

Foreign Currency We own and operate manufacturing facilities in Canada, Germany, France, the United Kingdom and the Philippines. The functional currency in Canada is the U.S. dollar, in Germany and France the Euro, in the UK it is the British Pound Sterling, and in the Philippines it is the Peso. During 2013, Euro functional currency operations generated approximately 31.0% of net sales and 29.1% of operating expenses and British Pound Sterling operations represented 6.2% of net sales and 5.8% of operating expenses. The translation of the results from international operations into U.S. dollars is subject to changes in foreign currency exchange rates. The table below summarizes the translation impact on reported results that changes in currency exchange rates had on our non-U.S. based operations from the conversion of these operation s results:

|                        | Year ended        |
|------------------------|-------------------|
| In thousands           | December 31, 2013 |
|                        | Favorable         |
|                        | (unfavorable)     |
| Net sales              | \$ 13,555         |
| Costs of products sold | (9,723)           |
| SG&A expenses          | (987)             |
| Income taxes and other | (84)              |
| Net income             | \$ 2,761          |

The above table only presents the financial reporting impact of foreign currency translations assuming currency exchange rates in 2013 were the same as 2012. It does not present the impact of certain competitive advantages or disadvantages of operating or competing in multi-currency markets.

### 2012 versus 2011

**Overview** For the year ended December 31, 2012, net income was \$59.4 million, or \$1.36 per diluted share, compared with net income of \$42.7 million, or \$0.93 per diluted share, in 2011. The amounts reported for 2012 include after-tax charges totaling \$4.8 million incurred in connection with the refinancing of \$200 million fixed-rate bonds for a new \$250 million fixed-rate issuance, as well as a \$4.0 million benefit from the conversion of alternative fuel mixture credits for cellulosic biofuel production credits. Results for 2011 include after-tax charges totaling \$7.5 million for costs incurred to redeem \$100 million of fixed-rate bonds, acquisition and integration expenses and work force efficiency actions. Reported results for both years included after-tax gains of \$5.4 million and \$4.2 million in 2012 and 2011, respectively, from the sales of timberlands and, in 2011, the release of tax reserves related to prior timberland sales. Unfavorable foreign currency translations affected the comparison of reported results for 2012 with 2011 by \$5.7 million.

From an operating perspective, our businesses performed well during 2012 compared with 2011, evidenced by a \$9.9 million, or 8.9%, increase in operating income led by strong improvements from Specialty Papers and Advanced Airlaid Materials. Composite Fibers results were unfavorable in the comparison by \$4.7 million.

Our Composite Fibers business unit s operating income decreased to \$36.1 million from \$40.8 million in 2011. Volumes shipped decreased 3.2% compared to 2011 reflecting generally softer economic conditions in its market segments. Unfavorable foreign currency translations affected this unit s operating income by \$3.2 million.

GLATFELTER 2013 FORM 10-K 19

Advanced Airlaid Materials operating income increased \$4.6 million, or 34.3%, largely reflecting lower input costs and an increase in shipping volumes. Unfavorable foreign currency translations affected this unit s operating income by \$3.0 million.

Specialty Papers operating income totaled \$67.3 million and \$57.3 million for 2012 and 2011, respectively. Volumes shipped increased in the comparison to 2011 and this unit s profitability was further favorably impacted by higher selling prices and slightly lower input costs partially offset by higher spending for maintenance and other costs.

During 2012, we generated significant operating cash flow of \$112.8 million, and although lower than 2011, this was largely due to the year over year impact of receiving cash in 2011 compared with a net outflow of cash in 2012 related to cellulosic biofuel production and alternative fuel mixture credits.

The following table sets forth summarized consolidated results of operations:

Net sales for 2012 decreased \$25.4 million, or 1.6%, in the comparison to 2011 and totaled \$1,577.8 million. The translation of foreign currencies unfavorably impacted net sales by \$35.8 million more than offsetting a \$3.5 million benefit from higher selling prices. Shipping volumes were up slightly as higher shipping volumes in both Specialty Papers and Advanced Airlaid Materials were partially offset by softer demand in Composite Fibers related to the weak European economy.

In Composite Fibers, net sales were \$436.7 million, a decrease of \$39.3 million, or 8.3%, primarily due to the translation of foreign currencies which unfavorably impacted the comparison by \$24.4 million. Average selling prices were essentially unchanged and total shipping volumes were lower in the comparison by approximately 3%.

Composite Fibers operating income in 2012 totaled \$36.1 million, a \$4.7 million decrease compared to 2011 primarily due to lower shipping volumes and a \$3.2 million unfavorable effect from foreign currency translation.

On October 14, 2012, a fire was sustained by our Scäer, France facility, one of several facilities within the Composite Fibers business unit. The fire damaged the electrical system primarily servicing one of two papermaking machines at the facility as well as certain mill infrastructure. All customer orders were fulfilled by shipping products on hand or by utilizing assets at the business unit so ther facilities. The total cost of the fire in 2012 was \$3.9 million which was offset by expected insurance recoveries, net of deductibles.

In Advanced Airlaid Materials, net sales declined \$5.7 million in the comparison of 2012 to 2011. The decline in net sales was due to the \$11.5 million negative effect of foreign currency translation and a \$2.7 million impact of lower selling prices. These factors were partially offset by the benefit from a 2.6% increase in shipping volumes.

Operating income in this business unit increased \$4.6 million in 2012 compared to 2011 led by a \$8.3 million benefit from lower raw material and energy costs in addition to continuous improvement initiatives including supply chain efficiencies, waste reduction and improved throughput, and benefits from a new festooner. The translation of foreign currencies negatively impacted operating income by \$3.0 million.

In the Specialty Papers business unit, net sales for 2012 increased \$19.7 million, or 2.3%, to \$894.8 million. The increase was primarily due to a \$6.5 million benefit from higher selling prices and a 1.2% increase in shipping volumes.

Specialty Papers operating income in 2012 of \$67.3 million was \$10.0 million higher than 2011 reflecting the benefits from higher selling prices and shipping volumes, and a \$5.7 million benefit from lower raw material costs. These factors were partially offset by higher maintenance and other cost inflation as well as \$2.3 million of lower energy and related sales.

We sell excess power generated by the Spring Grove, PA facility. In addition, two of our facilities are registered generators of renewable energy credits (RECs). The following table summarizes this activity for 2012 and 2011:

The amount set forth above for pension expense recorded as selling, general and administrative (SG&A) expense in 2011 includes a \$2.0 million one-time pension settlement charge recorded in connection with the retirement of our former Chief Executive Officer.

The amount of pension expense recognized each year is dependent on various actuarial assumptions and certain other factors, including discount rates and the fair value of our pension assets.

**Gain on Sales of Plant, Equipment and Timberlands, net** During the years ended December 31, 2012 and 2011, we completed the following sales of assets:

In connection with each of the asset sales set forth above, we received cash proceeds.

**Other and Unallocated** The amount of net operating expenses not allocated to a business unit and reported as Other and Unallocated in our table of Business Unit Performance, excluding gains from sales of plant, equipment and timberlands, totaled \$29.3 million in 2012 compared with \$30.2 million in 2011. The amount reported for 2011 includes the \$2.0 million one-time pension settlement charge discussed earlier. Excluding the one-time pension charge, net operating expenses not allocated to a business unit increased \$1.1 million primarily due to higher professional services fees and other cost inflation.

Non-operating income (expense) as presented in the Business *Unit Performance* table includes \$18.7 million of interest expense for 2012 and \$31.8 million for 2011. In connection with debt refinancing or redemption initiatives, the reported amounts include \$1.9 million and \$5.9 million in 2012 and 2011, respectively, related to the write-off of unamortized issuance costs and original issue discount.

Excluding these write-offs, interest expense declined to \$16.8 million in 2012 compared to \$25.9 million in 2011, primarily reflecting the 2011 redemption of \$100 million of 7.125% notes.

**Income taxes** In 2012, income tax expense totaled \$19.6 million on pre-tax income of \$78.9 million. The comparable amounts in 2011 were \$8.2 million and \$50.8 million, respectively. Tax expense in 2011 includes a net \$5.2 million income tax benefit realized in connection with the resolution of certain foreign tax audits, and expiration of statutes of limitation, partially offset by an increase in the valuation allowance on certain net operating loss carryforwards.

**Foreign Currency** We own and operate manufacturing facilities in Canada, Germany, France, the United Kingdom and the Philippines. The functional currency in Canada is the U.S. dollar, in Germany and France the Euro, in the UK it is the British Pound Sterling, and in the Philippines it is the Peso. During 2012, Euro functional currency operations generated approximately 25.3% of net sales and 24.2% of operating expenses and British Pound Sterling operations represented 7.5% of net sales and 7.6% of operating expenses. The translation of the results from international operations into U.S. dollars is subject to changes in foreign currency exchange rates. The table below summarizes the translation impact on reported results that changes in currency exchange rates had on our non-U.S. based operations from the conversion of these operation s results:

#### LIQUIDITY AND CAPITAL RESOURCES

Our business is capital intensive and requires significant expenditures for new or enhanced equipment, to support our research and development efforts, for environmental compliance matters including, but not limited to, the Clean Air Act, and to support our business strategy. In addition, we have mandatory debt service requirements of both principal and interest. The following table summarizes cash flow information for each of the years presented:

| Cash and cash equivalents at end of period       | \$ 122.882      | \$ 97.679 |

At the end of the 2013, we had \$122.9 million in cash and cash equivalents held by both domestic and foreign subsidiaries. Although unremitted earnings of our foreign subsidiaries is deemed to be permanently reinvested, substantially all of the cash and cash equivalents is available for use domestically.

In addition to our cash and cash equivalents, as of December 31, 2013, \$211.3 million is available under our revolving credit agreement, which matures in November 2016.

Cash flow provided from operating activities increased in the year-over-year comparison by \$60.8 million primarily due to a reduction in cash used for working capital lower cash income tax payments and higher net income.

Net cash used by investing activities increased \$263.7 million in the comparison of 2013 to 2012. In 2013, we spent \$210.9 million to acquire Dresden. In addition, in 2013 capital expenditures totaled \$103.0 million, an increase of \$44.3 million primarily reflecting the investment completed in 2013 to expand capacity to serve Composite Fibers growth markets. Capital expenditures in 2014 are expected to be approximately \$80 million to \$90 million.

Net cash provided by financing activities totaled \$163.2 million in 2013 reflecting additional borrowings used to finance the Dresden acquisition.

In 2013 our Board of Directors authorized an 11% increase in our quarterly cash dividend. In 2013, we used \$17.0 million of cash for dividends on our common stock compared with \$15.6 million in 2012. In February 2014, we announced an additional 10% increase in our dividend. The Board of Directors determines what, if any, dividends will be paid to our shareholders. Dividend payment decisions are based upon then-existing factors and conditions and, therefore, historical trends of dividend payments are not necessarily indicative of future payments.

In 2012, as discussed below, we issued \$250.0 million of 5.375% bonds and used the proceeds to repay all amounts outstanding under our revolving credit agreement and to redeem \$200.0 million of 7.125% notes together with a redemption premium and consent fee of \$5.1 million.

The following table sets forth our outstanding long-term indebtedness:

| In thousands                             | 2013       | 2012       |

| Long-term debt, net of current portion   | \$ 442,325 | \$ 250,000 |

Our revolving credit facility contains a number of customary compliance covenants, the most restrictive of which is a maximum leverage ratio of 3.5x. As of December 31, 2013, the leverage ratio, as calculated in accordance with the definition in our credit agreement, was 2.2x, well within the limits set forth in our credit agreement. Based on our expectations of future results of operations and capital needs, we do not believe the debt covenants will impact our operations or limit our ability to undertake financings that may be necessary to meet our capital needs.

The 5.375% Notes contain cross default provisions that could result in all such notes becoming due and payable in the event of a failure to repay debt outstanding under the credit agreement at maturity, or a default under the credit agreement, that accelerates the debt outstanding thereunder. As discussed above, as of December 31, 2013, we met all of the requirements of our debt covenants. The significant terms of the debt instruments are more fully discussed in Item 8 Financial Statements Note 16.

Cash used for common share repurchases totaled \$5.7 million in 2012, and \$48.0 million in 2011. The amount for 2012 includes \$1.2 million under a \$50 million

program authorized in 2011. In May 2012, our Board of Directors authorized a second, two-year share repurchase program for up to \$25.0 million, exclusive of commissions, of our outstanding common stock. The following table summarizes share repurchases made under this program through December 31, 2013:

|                         | shares  | (th | ousands) |

We are subject to various federal, state and local laws and regulations intended to protect the environment as well as human health and safety. At various times, we have incurred significant costs to comply with these regulations and we could incur additional costs as new regulations are developed or regulatory priorities change. As a result of new air quality regulations including the U.S. EPA Best Available Retrofit Technology rule (BART; otherwise known as the Regional Haze Rule) and the Boiler Maximum Achievable Control Technology rule (Boiler MACT), we anticipate that we could incur material capital and operating costs. Recently issued rules will require process modifications and/or installation of air pollution controls on power boilers at two of our facilities. We are currently reviewing options available to comply with these rules to understand the effect they may have on our operations, such as reducing or curtailing boiler usage or modifying the types of boilers operated or fuel consumed. The cost of compliance is likely to be significant. Our current estimate to implement viable options could result in capital spending of between \$50 million to \$90 million depending on the solutions available to comply with the

regulations. However, the amount of capital spending ultimately incurred may differ, and the difference could be material, depending on the option chosen. In addition, the timing of any additional capital spending is uncertain, although we currently expect to incur the majority of expenditures generally between 2014 and 2016. Enactment of new environmental laws or regulations or changes in existing laws or regulations could significantly change our estimates.

In addition, we may incur obligations to remove or mitigate any adverse effects on the environment resulting from our operations, including the restoration of natural resources and liability for personal injury and for damages to property and natural resources. See Item 8 Financial Statements and Supplementary Data Note 22 for a summary of significant environmental matters.

We expect to meet all of our near and long-term cash needs from a combination of operating cash flow, cash and cash equivalents, and our existing credit facilities. However, an unfavorable outcome of various environmental matters could have a material adverse impact on our consolidated financial position, liquidity and/or results of operations.

**Off-Balance-Sheet Arrangements** As of December 31, 2013 and 2012, we had not entered into any off-balance-sheet arrangements. Financial derivative instruments to which we are a party and guarantees of indebtedness, which solely consist of obligations of subsidiaries and a partnership, are reflected in the condensed consolidated balance sheets included herein in Item 8 Financial Statements and Supplementary Data.

**Contractual Obligations** The following table sets forth contractual obligations as of December 31, 2013:

- (1) Represents principal and interest payments due on long-term debt, the significant terms of which are discussed in Item 8 Financial Statements, Note 16, Long-term Debt. The amounts set forth above include expected interest payments of \$104.6 million over the term of the underlying debt instruments based contractual rates or current market rates in the case of variable rate instruments.
- (2) Represents rental agreements for various land, buildings, vehicles, and computer and office equipment.
- (3) Represents open purchase order commitments and other obligations, primarily for raw material, and forward purchases with minimum annual purchase obligations. In certain situations, prices are subject to variations based on market prices. In such situations, the information above is based on prices in effect at December 31, 2013.
- (4) Primarily represents expected benefits to be paid pursuant to retirement medical plans and nonqualified pension plans and the expected costs of asset retirement obligations.
- (5) Since we are unable to reasonably estimate the timing of ultimate payment, the amounts set forth above do not include any payments that may be made related to uncertain tax positions, including potential interest, accounted for in accordance with ASC 740-10-20. As discussed in more detail in Item 8 Financial Statements, Note 8, Income Taxes, such amounts totaled \$14.9 million at December 31, 2013.

Critical Accounting Policies and Estimates The preceding discussion and analysis of our consolidated financial position and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to inventories, long-lived assets, pension and post-retirement obligations, environmental liabilities and income taxes. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

We believe the following represent the most significant and subjective estimates used in the preparation of our consolidated financial statements.

Long-lived Assets We evaluate the recoverability of our long-lived assets, including plant, equipment, timberlands, goodwill and other intangible assets periodically or whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. Our evaluations include considerations of a variety of qualitative factors and analyses based on the cash flows generated by the underlying assets, profitability information, including estimated future operating results, trends or other determinants of fair value. If the value of an asset determined by these evaluations is less than its carrying amount, a loss is recognized for the difference between the fair value and the carrying value of the asset. Future adverse changes in market conditions or poor operating results of the related business may indicate an inability to recover the carrying value of the assets, thereby possibly requiring an impairment charge in the future.

**Pension and Other Post-Retirement Obligations** Accounting for defined-benefit pension plans, and any curtailments thereof, requires various assumptions, including, but not limited to, discount rates, expected long-term rates of return on plan assets, future compensation growth rates and mortality rates. Accounting for our retiree medical plans, and any curtailments thereof, also requires various assumptions, which include, but are not limited to, discount rates and annual rates of increase in the per capita costs of health care benefits.

The following chart summarizes the more significant assumption used in the actuarial valuation of our defined-benefit plans for each of the past three years:

|   | 2013  | 2012  | 2011  |
|---|-------|-------|-------|
| Pension plans                                     |       |       |       |
| Weighted average discount rate                    |       |       |       |
| for benefit expense                               | 4.28% | 5.09% | 5.81% |

| Rate of compensation increase                     | 4.00  | 4.00  | 4.00  |
| Post-retirement medical                           |       |       |       |
| Weighted average discount rate                    | 3.58  | 4.45  | 5.12  |
| for benefit expense                               |       |       |       |
| for benefit obligation                            | 4.52  | 3.58  | 4.45  |
| Health care cost trend rate                       |       |       |       |
| assumed for next year                             | 7.46  | 7.68  | 7.90  |
| Ultimate cost trend rate                          | 4.50  | 4.50  | 4.50  |
| Year that the ultimate cost trend rate is reached | 2028  | 2028  | 2028  |

<sup>(1)</sup> For 2014, the expected long-term rate of return on pension plan assets was reduced to 8.00%.

We evaluate these assumptions at least once each year or as facts and circumstances dictate and we make changes as conditions warrant. Changes to these assumptions will increase or decrease our reported net periodic benefit expense, which will result in changes to the recorded benefit plan assets and liabilities.

**Environmental Liabilities** We maintain accruals for losses associated with environmental obligations when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated based on existing legislation and remediation technologies. These accruals are adjusted periodically as assessment and remediation actions continue and/or further legal or technical information develops. Such undiscounted liabilities are exclusive of any insurance or other claims against third parties. Recoveries of environmental remediation costs from other parties, including insurance carriers, are recorded as assets when their receipt is assured beyond a reasonable doubt.

**Income Taxes** We record the estimated future tax effects of temporary differences between the tax bases of assets and liabilities and amounts reported in our balance sheets, as well as operating loss and tax credit carry forwards. These deferred tax assets and liabilities are measured using enacted tax rates and laws that will be in effect when such amounts are expected to reverse or be utilized. We regularly review our deferred tax assets for recoverability based on historical taxable income, projected future taxable income, the expected timing of the reversals

GLATFELTER 2013 FORM 10-K

25

of existing temporary differences and tax planning strategies. If we are unable to generate sufficient future taxable income, or if there is a material change in the actual effective tax rates or time period within which the underlying temporary differences become taxable or deductible, we could be required to increase the valuation allowance against our deferred tax assets, which may result in a substantial increase in our effective tax rate and a material adverse impact on our reported results.

Significant judgment is required in determining our worldwide provision for income taxes and recording the related assets and liabilities. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is less than certain. We and our subsidiaries are examined by various Federal,

State and foreign tax authorities. We regularly assess the potential outcomes of these examinations and any future examinations for the current or prior years in determining the adequacy of our provision for income taxes. We continually assess the likelihood and amount of potential adjustments and adjust the income tax provision, the current liability and deferred taxes in the period in which the facts that give rise to a revision become known.

Other significant accounting policies, not involving the same level of uncertainties as those discussed above, are nevertheless important to an understanding of the Consolidated Financial Statements. Refer to Item 8 Financial Statements and Supplementary Data Notes to Consolidated Financial Statements for additional accounting policies.

The table above presents the average principal outstanding and related interest rates for the next five years for debt outstanding as of December 31, 2013. Fair values included herein have been determined based upon rates currently available to us for debt with similar terms and remaining maturities.

Our market risk exposure primarily results from changes in interest rates and currency exchange rates. At December 31, 2013, we had long-term debt outstanding of \$442.3 million, of which 30.2% is at variable interest rates. Variable-rate debt outstanding consists of borrowings under our revolving credit agreement that accrues interest based on one month LIBOR plus a margin. At December 31, 2013, the weighted-average interest rate paid on variable rate debt was approximately 1.93%. A hypothetical 100 basis point increase or decrease in the interest rate on variable rate debt would increase or decrease annual interest expense by \$1.3 million.

As part of our overall risk management practices, we enter into financial derivatives primarily designed to either i) hedge foreign currency risks associated with forecasted transactions cash flow hedges; or ii) mitigate the impact that changes in currency exchange rates have on intercompany financing transactions and foreign currency denominated receivables and payables foreign currency hedges. For a more complete discussion of this activity, refer to Item 8 Financial Statements and Supplementary Data Note 19.

We are subject to certain risks associated with changes in foreign currency exchange rates to the extent our operations are conducted in currencies other than the U.S. dollar. During 2013, Euro functional currency operations generated approximately 31.0% of net sales and 29.1%

of operating expenses and British Pound Sterling operations represented 6.2% of net sales and 5.8% of operating expenses.

# ITEM 8 FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA MANAGEMENT S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management of P. H. Glatfelter Company (the Company ) is responsible for establishing and maintaining adequate internal control over financial reporting. The Company s internal control over financial reporting is a process designed under the supervision of the chief executive and chief financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company s financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States.

As of December 31, 2013, management conducted an assessment of the effectiveness of the Company s internal control over financial reporting based on the framework established in *Internal Control* Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). We excluded from our assessment, as permitted under the applicable SEC rules, regulations and related interpretations, the internal control over financial reporting of Dresden Papier GmbH, which was acquired on April 30, 2013, and whose assets constitute 17.8% of total assets, and which represented 5.9% of total net sales, of the consolidated financial statement amounts as of and for the year ended December 31, 2013. Management has determined that the Company s internal control over financial reporting as of December 31, 2013, is effective to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company s financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States.

The Company s internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial

statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures are being made only in accordance with authorizations of management; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company s assets that could have a material effect on our financial statements.

The Company s internal control over financial reporting as of December 31, 2013, has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their reports appearing herein, which expresses an unqualified opinion on the effectiveness of the Company s internal control over financial reporting as of December 31, 2013.

The Company s management, including the chief executive officer and chief financial officer, does not expect that our internal control over financial reporting will prevent or detect all errors and all frauds. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system s objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based, in part, on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of controls effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

#### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of P. H. Glatfelter Company

We have audited the internal control over financial reporting of P. H. Glatfelter and subsidiaries (the Company) as of December 31, 2013, based on criteria established in *Internal Control Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. As described in Management s Report on Internal Control over Financial Reporting, management excluded from its assessment the internal control over financial reporting at Dresden Papier GmbH. (Dresden), which was acquired on April 30, 2013 and whose assets constitute 17.8% of total assets, and which represented 5.9% of total net sales, of the consolidated financial statement amounts as of and for the year ended December 31, 2013. Accordingly, our audit did not include the internal control over financial reporting at Dresden. The Company s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company s internal control over financial reporting is a process designed by, or under the supervision of, the company s principal executive and principal financial officers, or persons performing similar functions, and effected by the company s board of directors, management, and other personnel to provide reasonable

assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the criteria established in *Internal Control Integrated Framework* (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedule as of and for the year ended December 31, 2013 of the Company and our report dated March 3, 2014 expressed an unqualified opinion on those financial statements and financial statement schedule.

#### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of P. H. Glatfelter Company

We have audited the accompanying consolidated balance sheets of P. H. Glatfelter Company and subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, shareholders equity, and cash flows for each of the three years in the period ended December 31, 2013. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and financial statement schedule are the responsibility of the Company s management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of P. H. Glatfelter Company and subsidiaries as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2013, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company s internal control over financial reporting as of December 31, 2013, based on the criteria established in *Internal Control Integrated Framework* (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 3, 2014 expressed an unqualified opinion on the Company s internal control over financial reporting.

#### P. H. GLATFELTER COMPANY

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 1. ORGANIZATION

P. H. Glatfelter Company and subsidiaries ( Glatfelter ) is a manufacturer of specialty papers and fiber-based engineered materials. Headquartered in York, Pennsylvania, our manufacturing facilities are located in Spring Grove, Pennsylvania; Chillicothe and Freemont, Ohio; Gatineau, Quebec, Canada; Lydney, England; Caerphilly, Wales; Gernsbach, Falkenhagen and Heidenau, Germany; Scaër, France; and the Philippines. Our products are marketed worldwide, either through wholesale paper merchants, brokers and agents, or directly to customers.

#### 2. ACCOUNTING POLICIES

**Principles of Consolidation** The consolidated financial statements include the accounts of Glatfelter and its wholly owned subsidiaries. All intercompany balances and transactions have been eliminated.

**Accounting Estimates** The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingencies as of the balance sheet date and the reported amounts of revenues and expenses during the reporting period. Management believes the estimates and assumptions used in the preparation of these consolidated financial statements are reasonable, based upon currently available facts and known circumstances, but recognizes that actual results may differ from those estimates and assumptions.

**Cash and Cash Equivalents** We classify all highly liquid instruments with an original maturity of three months or less at the time of purchase as cash equivalents.

**Inventories** Inventories are stated at the lower of cost or market. Raw materials, in-process and finished inventories of our U.S. manufacturing operations are valued using the last-in, first-out (LIFO) method, and the supplies inventories are valued principally using the average-cost method. Inventories at our foreign operations are valued using the average cost method.

**Plant, Equipment and Timberlands** For financial reporting purposes, depreciation is computed using the straight-line method over the estimated useful lives of the respective assets.

The range of estimated service lives used to calculate financial reporting depreciation for principal items of plant and equipment are as follows:

| Buildings               | 10 | 45 Years |
|-------------------------|----|----------|
| Machinery and equipment | 7  | 35 Years |
| Other                   | 4  | 40 Years |

**Maintenance and Repairs** Maintenance and repairs costs are charged to income and major renewals and betterments are capitalized. At the time property is retired or sold, the net carrying value is eliminated and any resultant gain or loss is included in income.

Valuation of Long-lived Assets, Intangible Assets and Goodwill We evaluate long-lived assets for impairment when a specific event indicates that the carrying value of an asset may not be recoverable. Recoverability is assessed based on estimates of future cash flows expected to result from the use and eventual disposition of the asset. If the sum of expected undiscounted cash flows is less than the carrying value of the asset, the asset s fair value is estimated and an impairment loss is recognized for any deficiencies. Goodwill and non-amortizing tradename intangible assets are reviewed, on a discounted cash flow basis, during the third quarter of each year for impairment or more frequently if impairment indicators are present. Impairment losses, if any, are recognized for the amount by which the carrying value of the reporting unit exceeds its fair value. The carrying value of a reporting unit is defined using an enterprise premise which is generally determined by the difference between the unit s assets and operating liabilities.

**Asset Retirement Obligations** In accordance with the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) No. 410, *Asset Retirement and Environmental Obligations*, we accrue asset retirement obligations in the period in which obligations

relating to future asset retirements are incurred and when a reasonable estimate of fair value can be determined. Under these standards, costs are to be accrued at estimated fair value, and a related long-lived asset is capitalized. Over time, the liability is accreted to its settlement value and the capitalized cost is depreciated over the useful life of the related asset for which the obligation exists. Upon settlement of the liability, we recognize a gain or loss for any difference between the settlement amount and the liability recorded.

GLATFELTER 2013 FORM 10-K

35

**Income Taxes** Income taxes are determined using the asset and liability method of accounting for income taxes in accordance with FASB ASC 740 *Income Taxes* (ASC 740). Under ASC 740, tax expense includes U.S. and international income taxes plus the provision for U.S. taxes on undistributed earnings of international subsidiaries not deemed to be permanently invested. Tax credits and other incentives reduce tax expense in the year the credits are claimed. Certain items of income and expense are not reported in tax returns and financial statements in the same year. The tax effect of such temporary differences is reported in deferred income taxes. Deferred tax assets are recognized if it is more likely than not that the assets will be realized in future years. We establish a valuation allowance for deferred tax assets for which realization is not more likely than not.

Income tax contingencies are accounted for in accordance with FASB ASC 740-10-20 *Income Taxes*. Significant judgment is required in determining our worldwide provision for income taxes and recording the related assets and liabilities. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is less than certain. We and our subsidiaries are examined by various Federal, State, and foreign tax authorities. We regularly assess the potential outcomes of these examinations and any future examinations for the current or prior years in determining the adequacy of our provision for income taxes. We continually assess the likelihood and amount of potential adjustments and record any necessary adjustments in the period in which the facts that give rise to a revision become known.

**Treasury Stock** Common stock purchased for treasury is recorded at cost. At the date of subsequent reissue, the treasury stock account is reduced by the cost of such stock on the weighted-average cost basis.

**Foreign Currency Translation** Foreign currency translation gains and losses and the effect of exchange rate changes on transactions designated as hedges of net foreign investments are included as a component of other comprehensive income (loss). Transaction gains and losses are included in income in the period in which they occur.

**Revenue Recognition** We recognize revenue on product sales when the customer takes title and assumes the risks and rewards of ownership. Estimated costs for sales incentives, discounts and sales returns and allowances are recorded as sales deductions in the period in which the related revenue is recognized.

Revenue from energy sales is recognized when electricity is delivered to the customer. Certain costs associated with the production of electricity, such as fuel, labor, depreciation and maintenance are netted against energy sales for presentation on the Consolidated Statements of Income.

Revenue from renewable energy credits is recorded under the caption Energy and related sales in the Consolidated Statements of Income and is recognized when all risks, rights and rewards to the certificate are transferred to the counterparty.

Environmental Liabilities — Accruals for losses associated with environmental obligations are recorded when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated based on existing legislation and remediation technologies. Costs related to environmental remediation are charged to expense. These accruals are adjusted periodically as assessment and remediation actions continue and/or further legal or technical information develops. Such undiscounted liabilities are exclusive of any insurance or other claims against third parties. Environmental costs are capitalized if the costs extend the life of the asset, increase its capacity and/or mitigate or prevent contamination from future operations. Recoveries of environmental remediation costs from other parties, including insurance carriers, are recorded as assets when their receipt is assured beyond a reasonable doubt.

**Earnings Per Share** Basic earnings per share is computed by dividing net income by the weighted-average common shares outstanding during the respective periods. Diluted earnings per share is computed by dividing net income by the weighted-average common shares and common share equivalents outstanding during the period. The dilutive effect of common share equivalents is considered in the diluted earnings per share computation using the treasury stock method.

**Financial Derivatives and Hedging Activities** We use financial derivatives to manage exposure to changes in foreign currencies. In accordance with FASB ASC 815 *Derivatives and Hedging* ( ASC 815 ), we record all derivatives on the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether we have elected to designate a derivative in a hedging relationship and apply hedge accounting, and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting.

36

Cash Flow Hedges The effective portion of the gain or loss on those derivative instruments designated and qualifying as a hedge of the exposure to variability in expected future cash flows related to forecasted transactions is deferred and reported as a component of accumulated other comprehensive income (loss). Deferred gains or losses are reclassified to our results of operations at the time the hedged forecasted transaction is recorded in our results of operations. The effectiveness of cash flow hedges is assessed at inception and quarterly thereafter. If the instrument becomes ineffective or it becomes probable that the originally forecasted transaction will not occur, the related change in fair value of the derivative instrument is also reclassified from accumulated other comprehensive income (loss) and recognized in earnings.

**Fair Value of Financial Instruments** Under the accounting for fair value measurements and disclosures, a fair value hierarchy was established that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). A financial instrument s level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The three levels of the fair value hierarchy are described below:

Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets

or liabilities.

Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar

assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates); and inputs that are derived principally from or corroborated by observable market data by

correlation or other means.

Level 3 Inputs that are both significant to the fair value measurement and unobservable.

### **Recently Issued Accounting Pronouncements**

In February 2013, the FASB issued ASU 2013-02 Comprehensive Income (Topic 220): Reporting Amounts Reclassified Out of Accumulated Other Comprehensive Income which will require new disclosures about items reclassified out of accumulated other comprehensive income. The new standard became effective for us beginning January 1, 2013. This standard did not have a material impact on us.

In July 2013, the FASB issued ASU 2013-11 (Income Taxes (Topic 740): *Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*), which provides that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except to the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available, in which case the unrecognized tax benefit should be presented in the financial statements as a liability This update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013, with early adoption permitted. We believe that our implementation of this guidance will have no material impact on our consolidated financial statements.

### 3. ACQUISITIONS

On April 30, 2013, we completed the acquisition of all outstanding shares of Dresden Papier GmbH ( Dresden ) from Fortress Paper Ltd. for \$211 million, net of cash acquired. Dresden, based in Heidenau, Germany, is the leading global supplier of nonwoven wallpaper base materials, and is a major supplier to most of the world s largest wallpaper manufacturers. Dresden s revenues for the full year 2013 were \$158.6 million and it employed approximately 146 people at its state-of-the-art, 72,800 short-ton-capacity manufacturing facility. We financed the acquisition through a combination of cash on hand and borrowings under our Revolving Credit Facility.

GLATFELTER 2013 FORM 10-K

37

The acquisition of Dresden adds another industry-leading nonwovens product line to our Composite Fibers business, and broadens our relationship with leading producers of consumer and industrial products. This acquisition also provides additional operational leverage and growth opportunities for Glatfelter globally, particularly in large markets such as Russia and China, and other developing markets in eastern Europe and Asia.

Dresden now operates as part of our Composite Fibers business unit, which manufactures fiber-based products for growing global niche markets, including filtration papers for tea and single serve coffee applications, metallized papers, composite laminates, and technical specialties.

The share purchase agreement provides for, among other terms, indemnification provisions for claims that may arise, including among others, uncertain tax positions and other third party claims. The preliminary allocation of the purchase price to assets acquired and liabilities assumed is as follows:

| Total purchase price             | \$ | 210,911    | \$          | \$<br>210,911 |

The adjustments set forth above primarily relate to the recognition of additional indemnification receivable from the seller associated with certain tax matters. Such adjustments did not impact previously reported results of operations, earnings per share, or cash flows.

The preliminary purchase price allocation set forth above is based on all information available to us at the present time and is subject to change. In the event new information, primarily related to an on-going tax audit for periods prior to the acquisition, becomes available, the measurement of the amounts of an indemnification receivable reflected above under the caption Prepaid and other current assets may be affected.

For purposes of allocating the total purchase price, assets acquired and liabilities assumed are recorded at their estimated fair market value. The allocation set forth above is based on management s estimate of the fair value using valuation techniques such as discounted cash flow models, appraisals and similar methodologies. The amount allocated to intangible assets represents the estimated value of customer relationships, technological know-how and trade name.

Acquired property, plant and equipment are preliminarily being depreciated on a straight-line basis with estimated remaining lives ranging from 5 years to 30 years. Intangible assets are being amortized on a straight-line basis over an average estimated remaining life of 17 years reflecting the expected future value.

In connection with the Dresden acquisition we recorded \$74.9 million of goodwill and \$87.6 million of intangible assets. The goodwill arising from the acquisition largely relates to strategic benefits, product and market diversification, assembled workforce, and similar factors. For tax purposes, none of the goodwill is deductible. Intangible assets consist of \$9.8 million of non-amortizing tradename, and the remainder consists of technology and customer relationships.

Our results of operations include the results of Dresden prospectively since the acquisition was completed on April 30, 2013. All such results reported herein are included as part of the Composite Fibers business unit. Revenue and operating income of Dresden included in our consolidated results of operations for 2013 totaled \$101.8 million and \$18.3 million, respectively.

The table below summarizes pro forma financial information as if the acquisition and related financing transaction occurred as of January 1, 2011:

During 2013, we incurred legal, professional and advisory costs directly related to the Dresden acquisition totaling \$3.2 million. For purposes of presenting the above pro forma financial information, such costs have been eliminated. All such costs are presented under the caption Selling, general and administrative expenses in the accompanying condensed consolidated statements of income. In addition, the pro forma financial information excludes \$1.1 million of charges to costs of products sold

related to the write up of inventory to fair value and \$2.0 million of integration related costs. This unaudited pro forma financial information above is not necessarily indicative of what the operating results would have been had the acquisition been completed at the beginning of the respective period nor is it indicative of future results.

### 4. ENERGY AND RELATED SALES, NET

We sell excess power generated by the Spring Grove, PA facility. We also sell renewable energy credits generated by the Spring Grove, PA and Chillicothe, OH facilities representing sales of certified credits earned related to burning renewable sources of energy such as black liquor and wood waste.

The following table summarizes this activity for each of the past three years:

#### 8. INCOME TAXES

Income taxes are recognized for the amount of taxes payable or refundable for the current year and deferred tax liabilities and assets for the future tax consequences of events that have been recognized in our consolidated financial statements or tax returns. The effects of income taxes are measured based on enacted tax laws and rates.

The provision for income taxes from operations consisted of the following:

|                          | Yea      | ar Ended December 31 |          |
|--------------------------|----------|----------------------|----------|

| Income tax provision     | \$ 2,043 | \$ 19,562            | \$ 8,151 |

The amounts set forth above for total deferred taxes and other included a deferred tax benefit of \$15.1 million, \$2.3 million and \$1.5 million in 2013, 2012 and 2011, respectively. Other taxes totaled an expense of \$3.6 million, \$0.1 million and \$1.8 million in 2013, 2012 and 2011, respectively, associated with the deferred tax impact of uncertain tax positions.

The following are the domestic and foreign components of pretax income from operations:

|                     | Year       | Ended December 31 |           |

GLATFELTER 2013 FORM 10-K 41

Current and non-current deferred tax assets and liabilities are included in the following balance sheet captions:

|                           | December  | 31        |
|---------------------------|-----------|-----------|
| In thousands              | 2013      | 2012      |
| Prepaid expenses and      |           |           |
| other current assets      | \$ 21,447 | \$ 16,319 |
| Other long term assets    | 9,197     | 8,110     |
| Other current liabilities | 12        | 687       |
| Deferred income taxes     | 141,020   | 62,046    |

At December 31, 2013 we had state and foreign tax net operating loss ( NOL ) carryforwards of \$92.1 million and \$32.7 million, respectively. These NOL carryforwards are available to offset future taxable income, if any. The state NOL carryforwards expire between 2014 and 2033; certain foreign NOL carryforwards expire between 2014 and 2033.

The state and foreign NOL carryforwards on the income tax returns filed included unrecognized tax benefits taken in prior years. The NOLs for which a deferred tax asset is recognized for financial statement purposes in accordance with ASC 740 are presented net of these unrecognized tax benefits.

In addition, we had various state tax credit carryforwards totaling \$0.4 million, which expire between 2014 and 2027, and foreign investment tax credits of \$3.8 million which expire between 2019 and 2033.

As of December 31, 2013 and 2012, we had a valuation allowance of \$6.2 million and \$30.5 million, respectively, against net deferred tax assets, primarily due to uncertainty regarding the ability to utilize state and foreign tax NOL carryforwards and certain deferred foreign tax credits. The change in the valuation allowance was primarily due to the expiration of fully reserved NOLs.

Tax credits and other incentives reduce tax expense in the year the credits are claimed. We recorded tax credits of \$3.0 million, \$0.4 million and \$1.0 million in 2013, 2012 and 2011, respectively, related to research and development credits and the fuels tax credits.

At December 31, 2013 and 2012, unremitted earnings of subsidiaries outside the United States deemed to be permanently reinvested totaled \$288.8 million and \$236.3 million, respectively. Because the unremitted earnings of subsidiaries are deemed to be permanently reinvested as of December 31, 2013 and because we have no need for or plans to repatriate such earnings, no deferred tax liability has been recognized in our consolidated financial statements. It is not practicable to

determine the amount of additional taxes that have not been provided.

As of December 31, 2013, 2012 and 2011, we had \$14.9 million, \$30.4 million and \$29.7 million of gross unrecognized tax benefits, respectively. As of December 31, 2013, if such benefits were to be recognized, approximately \$14.9 million would be recorded as a component of income tax expense, thereby affecting our effective tax rate.

A reconciliation of the beginning and ending balances of the total amounts of gross unrecognized tax benefits is as follows:

in connection with acquisition accounting for the Dresden transaction, we recorded a \$1.3 million reserve for an uncertain tax position and at the same time recorded a receivable from the seller due to an indemnification agreement.

We, or one of our subsidiaries, file income tax returns with the United States Internal Revenue Service, as well as various state and foreign authorities. The following table summarizes tax years that remain subject to examination by major jurisdiction:

# (1) includes provincial or similar local jurisdictions, as applicable.

The amount of income taxes we pay is subject to ongoing audits by federal, state and foreign tax authorities, which often result in proposed assessments. Management performs a comprehensive review of its global tax positions on a quarterly basis and accrues amounts for uncertain tax positions. Based on these

reviews and the result of discussions and resolutions of matters with certain tax authorities and the closure of tax years subject to tax audit, reserves are adjusted as necessary. However, future results may include favorable or unfavorable adjustments to our estimated tax liabilities in the period the assessments are determined or resolved or as such statutes are closed. Due to potential for resolution of federal, state and foreign examinations, and the expiration of various statutes of limitation, it is reasonably possible our gross unrecognized tax benefits balance may decrease within the next twelve months by a range of zero to \$5.4 million. Substantially all of this range relates to tax positions taken in the U.S. and in Germany.

We recognize interest and penalties related to uncertain tax positions as income tax expense. The following table summarizes information related to interest and penalties on uncertain tax positions:

#### 9. STOCK-BASED COMPENSATION

The P. H. Glatfelter Amended and Restated Long Term Incentive Plan (the LTIP) provides for the issuance of Glatfelter common stock to eligible participants in the form of restricted stock units, restricted stock awards, non-qualified stock options, performance shares, incentive stock options and performance units. In May 2013, our shareholders approved an increase of 1,030,000 in the number shares authorized to be issued under the LTIP.

As of December 31, 2013, there were 2,179,443 shares of common stock available for future issuance under the LTIP.

Since the approval of the LTIP, we have issued to eligible participants restricted stock units, performance share awards and stock only stock appreciation rights ( SOSARs ).

Restricted Stock Units (RSUs) and Performance Share Awards (PSAs) Awards of RSUs and PSAs are made under our LTIP. The vesting of RSUs is generally based on the passage of time, generally on a graded scale over a three, four, and five-year period. Beginning in March of 2011, PSAs were issued annually to members of senior management and each respective grant cliff vests each December 31, assuming the achievement of predetermined, three-year cumulative performance targets. The performance measures include a minimum, target and maximum performance level providing the grantees an opportunity to receive more or less shares than targeted depending on actual financial performance. For both RSUs and PSAs, the grant date fair value of the awards, which is equal to the closing price per common share on the date of the award, is used to determine the amount of expense to be recognized over the applicable service period. Settlement of RSUs and PSAs will be made in shares of our common stock currently held in treasury.

The following table summarizes RSU and PSA activity during the past three years:

| Units                | 2013      | 2012     | 2011     |

| Compensation expense | \$ 2,882  | \$ 2,576 | \$ 2,069 |

The amount granted in 2013, 2012 and 2011 includes 183,910, 161,083 and 98,187 PSAs, respectively, exclusive of reinvested dividends. The performance period for the 2011 PSAs concluded on December 31, 2013 and, based on actual performance relative to target, approximately 78% of the award were issued to participants in 2014. The weighted average grant date fair value per unit for awards in 2013, 2012 and 2011 was \$22.34, \$15.49, and \$12.47, respectively. As of December 31, 2013, unrecognized compensation expense for outstanding RSUs and PSAs

totaled \$7.1 million. The weighted average remaining period over which the expense will be recognized is 2.9 years.

Under terms of the SOSAR, the recipients received the right to receive a payment in the form of shares of common stock equal to the difference, if any, in the fair market value of one share of common stock at the time of exercising the SOSAR and the exercise price. The SOSARs vest ratably over a three year period. As of December 31, 2013, the intrinsic value of SOSARs vested and expected to vest totaled \$25.8 million. The remaining weighted average contractual life of outstanding SOSARs was 6.5 years as of December 31, 2013.

Our LTIP also permits the issuance of nonqualified stock options; however, we have not issued any options since 2004. As of December 31, 2013, 10,000 stock options were outstanding with a weighted average exercise price of \$11.29 per share. All options expire on the earlier of termination or, in some instances, a defined period subsequent to termination of employment, or ten years from the date of grant. The exercise price represents the quoted market price of Glatfelter common stock on the date of grant, or the average quoted market prices of Glatfelter common stock on the first day before and after the date of grant for which quoted market price information was available if such information was not available on the date of grant. As of December 31, 2013, the intrinsic value of outstanding stock options totaled \$0.2 million.

#### 10. RETIREMENT PLANS AND OTHER POST-RETIREMENT BENEFITS

We provide non-contributory retirement benefits under both funded and unfunded plans to all U.S. employees and to certain non-U.S. employees. Participation in benefits under the plans are based upon the employees date of hire and the covered group in which that employee falls. U.S. benefits are based on either a unit-benefit formula for bargained hourly employees, or a final average pay formula or cash balance formula for salaried employees. Non-U.S. benefits are based, in the case of certain plans, on average salary and years of service and, in the case of other plans, on a fixed amount for each year of service. U.S. plan provisions and funding meet the requirements of the Employee Retirement Income Security Act of 1974. We use a December 31-measurement date for all of our defined benefit plans.

We also provide certain health care benefits to eligible U.S.-based retired employees and exclude all salaried employees hired after January 1, 2008. These benefits include a comprehensive medical plan for retirees prior to age 65 and fixed supplemental premium payments to certain retirees over age 65 to help defray the costs of Medicare. Claims are paid as reported.

The amount set forth for intra plan transfers represents assets contributed to the pension plan from a post-retirement medical plan sub-account previously established pursuant to Section 420 of the Internal Revenue Code. Benefits due under the post-retirement medical plan continue to be paid for by us.

Amounts recognized in the consolidated balance sheets consist of the following as of December 31:

The components of amounts recognized as Accumulated other comprehensive income consist of the following on a pre-tax basis:

|                             | Pension | Benefits | Other B         | Benefits |

The accumulated benefit obligation for all defined benefit pension plans was \$471.1 million and \$507.4 million at December 31, 2013 and 2012, respectively.

The weighted-average assumptions used in computing the benefit obligations above were as follows:

|                                  | Pension E | Pension Benefits |       | Other Benefits |  |
|----------------------------------|-----------|------------------|-------|----------------|--|

| Discount rate benefit obligation | 5.20%     | 4.28%            | 4.52% | 3.58%          |  |
| Future compensation growth rate  | 4.00      | 4.00             |       |                |  |

The discount rates set forth above were estimated based on the modeling of expected cash flows for each of our benefit plans and selecting a portfolio of high-quality debt instruments with maturities matching the respective cash flows of each plan. The resulting discount rates as of December 31, 2013 ranged from 3.60% to 5.36% for pension plans and from 3.95% to 4.64% for other benefit plans.

Information for pension plans with an accumulated benefit obligation in excess of plan assets was as follows:

In connection with the December 31, 2010 retirement of our former chief executive officer and the lump-sum distribution in July 2011 of accrued pension benefits due to him, we recorded a \$2.0 million one-time pension settlement charge in 2011.

The prior service cost and actuarial net loss for our defined benefit pension plans that will be amortized from accumulated other comprehensive income (loss) into our results of operations as a component of net periodic benefit cost over the next fiscal year are \$2.9 million and \$11.9 million, respectively. The comparable amounts of expected amortization for other benefit plans are a credit of \$0.3 million and expense of \$0.5 million, respectively.

| Expected long-term rate of return on plan assets |                        | 8.50  | 8.50  |

To develop the expected long-term rate of return assumption, we considered the historical returns and the future expected returns for each asset class, as well as the target asset allocation of the pension portfolio.

Assumed health care cost trend rates used to determine benefit obligations at December 31 were as follows:

|   | 2013  | 2012  |
|---|-------|-------|
| Health care cost trend rate assumed for next year                                 | 7.46% | 7.68% |

Assumed health care cost trend rates have a significant effect on the amounts reported for health care plans. A one percentage-point change in assumed health care cost trend rates would have the following effects:

**Plan Assets** All pension plan assets in the U.S. are invested through a single master trust fund. The strategic asset allocation for this trust fund is selected by management, reflecting the results of comprehensive asset and liability modeling. The general principles guiding U.S. pension asset investment policies are those embodied in the Employee Retirement Income Security Act of 1974 (ERISA). These principles include discharging our investment responsibilities for the exclusive benefit of plan participants and in accordance with the prudent expert standard and other ERISA rules and regulations. We establish strategic asset allocation percentage targets and appropriate benchmarks for significant asset classes with the aim of achieving a prudent balance between return and risk.

Investments and decisions will be made solely in the interest of the Plan s participants and beneficiaries, and for the exclusive purpose of providing benefits accrued thereunder. The primary goal of the Plan is to ensure the solvency of the Plan over time and thereby meet its distribution objectives. Plan assets will be diversified. All investments in the Plan will be made in accordance with ERISA and other applicable statutes.

Risk is minimized by diversification by asset class, by style of each manager and by sector and industry limits when applicable. The target allocation during 2013 for the Plan assets are:

| Domestic Equity                         |     |
|---|-----|
| Large cap                               | 39% |
| Small and mid cap                       | 13  |
| International equity                    | 13  |
| Real Estate Investment Trusts (REIT)    | 5   |
| Fixed income, cash and cash equivalents | 30  |
| Diversification is achieved by:         |     |

- i. placing restrictions on the percentage of equity investments in any one company, percentage of investment in any one industry, limiting the amount of assets placed with any one manager; and
- ii. setting targets for duration of fixed income securities, maintaining a certain level of credit quality, and limiting the amount of investment in a single security and in non-investment grade paper.

A formal asset allocation review is done periodically to ensure that the Plan has an appropriate asset allocation based on the Plan s projected benefit obligations. The target return for each equity and fixed income manager will be one that places the manager s performance in the top 40% of its peers and on a gross basis, exceeds that of

46

the manager s respective benchmark index. The target return for cash and cash equivalents is a return that at least equals that of the 90-day T-bills.

The Investment Policy statement lists specific categories of securities or activities that are prohibited including options, futures, commodities, hedge funds, limited partnerships, and our stock.

The table below presents the fair values of our benefit plan assets by level within the fair value hierarchy, as described in Note 2:

**Cash Flow** We were not required to make contributions to our qualified pension plan in 2013 nor do we expect to make any to this plan in 2014. Benefit payments expected to be made in 2014 under our non-qualified pension plans and other benefit plans are summarized below:

| In thousands               |          |
|----------------------------|----------|
| Nonqualified pension plans | \$ 2,257 |
| Other benefit plans        | 4,032    |

The following benefit payments under all pension and other benefit plans, and giving effect to expected future service, as appropriate, are expected to be paid:

|                   | Pension   | Other    |
|-------------------|-----------|----------|

| 2019 through 2023 | 179,439   | 27,542   |

**Defined Contribution Plans** We maintain 401(k) plans for certain hourly and salaried employees. Employees may contribute up to 50% of their earnings, subject to certain restrictions. We will match a portion of the employee s contribution, subject to certain limitations, in the form of shares of Glatfelter common stock out of treasury. The expense associated with our 401(k) match was \$1.9 million, \$1.7 million and \$1.3 million in 2013, 2012 and 2011, respectively.

### 11. INVENTORIES

Inventories, net of reserves were as follows:

|                         |      | Decem   | ber 31 |         |
|-------------------------|------|---------|--------|---------|

| Supplies                |      | 67,292  |        | 58,951  |
| Total                   | \$ 2 | 236,310 | \$     | 222,366 |

We value all of our U.S. inventories, excluding supplies, on the LIFO method. If we had valued these inventories using the first-in, first-out method, inventories would have been \$24.5 million and \$22.4 million higher than reported at December 31, 2013 and 2012, respectively.

## 12. PLANT, EQUIPMENT AND TIMBERLANDS

Plant, equipment and timberlands at December 31 were as follows:

| In thousands                     | 2013       | 2012       |

| Net intangibles                    | \$<br>96,081 | \$ 8,301   |

In connection with the Dresden acquisition, we recorded \$74.9 million of goodwill and \$87.6 million of intangible assets, all of which are presented above within Composite Fibers. The remainder of the change in goodwill was due to foreign currency translation adjustments. Other than non-amortizable goodwill and tradename, intangible assets are amortized on a straight-line basis. Customer relationships are amortized over periods ranging from 10 years to 14 years and technology and related intangible assets are amortized over periods ranging from 14 years to 20 years. The following table sets forth information pertaining to amortization of intangible assets:

| In thousands                    | 2013     | 2012     |

| Long-term debt, net of current portion   | \$ 442,325 | \$ 250,000 |

On November 21, 2011, we entered into an amendment to our revolving credit agreement with a consortium of banks (the Revolving Credit Facility ) which increased the amount available for borrowing to \$350 million, extended the maturity of the facility to November 21, 2016, and instituted a lower interest rate pricing grid.

For all U.S. dollar denominated borrowings under the Revolving Credit Facility, the borrowing rate is, at our option, (a) the bank s base rate which is equal to the greater of i) the prime rate; ii) the federal funds rate plus 50 basis points plus an applicable spread ranging from 25 basis points to 125 basis points based on our corporate credit ratings determined by Standard & Poor s Rating Services and Moody s Investor Service, Inc. (the Corporate Credit Rating); or iii) the daily Euro-rate plus 100 basis points; or (b) the daily Euro-rate plus an applicable margin ranging from 125 basis points to 225 basis points based on the Corporate Credit Rating. For non-US dollar denominated borrowings, interest is based on (b) above.

The Revolving Credit Facility contains a number of customary covenants for financings of this type that, among other things, restrict our ability to dispose of or create liens on assets, incur additional indebtedness, repay other indebtedness, limits certain intercompany financing arrangements, make acquisitions and engage in mergers or consolidations. We are also required to comply with specified financial tests and ratios including: i) maximum net debt to earnings before interest, taxes, depreciation and amortization (EBITDA) ratio (the leverage ratio);

48

ii) a consolidated EBITDA to interest expense ratio; and iii) beginning December 31, 2015, a minimum liquidity ratio. The most restrictive of our covenants is a maximum leverage ratio of 3.5x. As of December 31, 2013, the leverage ratio, as calculated in accordance with the definition in our credit agreement, was 2.2x, well within the limits set forth in our credit agreement. A breach of these requirements would give rise to certain remedies under the Revolving Credit Facility, among which are the termination of the agreement and accelerated repayment of the outstanding borrowings plus accrued and unpaid interest under the credit facility.

On October 3, 2012, we completed a private placement offering of \$250.0 million aggregate principal amount of 5.375% Senior Notes due 2020 (the 5.375% Notes). The 5.375% Notes are fully and unconditionally guaranteed, jointly and severally, by PHG Tea Leaves, Inc., Mollanvick, Inc., and Glatfelter Holdings, LLC (the Guarantors). The net proceeds from this offering totaled approximately \$245.1 million, after deducting the commissions and other fees and expenses relating to the offering and were used to tender and call \$200.0 million aggregate principal amount of our outstanding 7.125% notes due November 2016, plus the payment of the applicable redemption premium and accrued interest. We used the remaining net proceeds to repay amounts outstanding under our revolving credit facility and for general corporate purposes. Pursuant to the redemption provisions contained in the 7.125% Notes Indenture, we redeemed all of the 7.125% Notes at 102.375% of par. The \$4.8 million redemption premium is reported under the caption other non-operating expenses other-net in the accompanying consolidated statements of income. The write-off of the related unamortized deferred financing fees totaled \$1.9 million and is reported under the caption. Interest expense in the accompanying consolidated statements of income.

Interest on the 5.375% Notes will be payable semiannually in arrears on April 15 and October 15, commencing on April 15, 2013.

The 5.375% Notes are redeemable, in whole or in part, at anytime on or after October 15, 2016 at the redemption prices specified in the applicable Indenture. Prior to October 15, 2016, we may redeem some or all of the Notes at a make-whole premium as specified in the Indenture. These Notes and the guarantees of the notes are senior obligations of the Company and the Guarantors, respectively, rank equally in right of payment with future

senior indebtedness of the Company and the Guarantors and will mature on October 15, 2020.

The 5.375% Notes contain various covenants customary to indebtedness of this nature including limitations on i) the amount of indebtedness that may be incurred; ii) certain restricted payments including common stock dividends; iii) distributions from certain subsidiaries; iv) sales of assets; v) transactions amongst subsidiaries; and vi) incurrence of liens on assets. In addition, the 5.375% Notes contain cross default provisions that could result in all such notes becoming due and payable in the event of a failure to repay debt outstanding under the Revolving Credit Agreement at maturity or a default under the Revolving Credit Agreement that accelerates the debt outstanding thereunder. As of December 31, 2013, we met all of the requirements of our debt covenants.

On April 11, 2013, Glatfelter Gernsbach GmbH & Co. KG ( Gernsbach ), a wholly-owned subsidiary of ours, entered into an agreement with IKB Deutsche Industriebank AG, Düsseldorf ( IKB ), pursuant to which Gernsbach borrowed from IKB approximately 42.7 million (or \$57.6 million) aggregate principal amount (the IKB Loan ).

The IKB Loan, guaranteed in full by us, is repayable in 32 quarterly installments beginning on June 30, 2015 and ending on March 31, 2023 and will bear interest at a rate of 2.05% per annum. Interest on the IKB Loan or portion thereof is payable quarterly in each year of the term of the loan with interest accruing from the date the loan or portion thereof is drawn.

The IKB Loan provides for representations, warranties and covenants customary for financings of this type. The financial covenants contained in the IBK Loan, which relate to the minimum ratio of consolidated EBITDA to consolidated interest expense and the maximum ratio of consolidated total net debt to consolidated adjusted EBITDA, will be calculated by reference to our Amended and Restated Credit Agreement, dated November 21, 2011.

Aggregated unamortized deferred debt issuance costs incurred in connection with all of our outstanding debt totaled \$6.4 million at December 31, 2013 and are reported under the caption Other assets in the accompanying consolidated balance sheets. The deferred costs are being amortized on a straight line basis over the life of the underlying instruments. Amortization expense related to deferred debt issuance costs totaled \$1.3 million in 2013.

GLATFELTER 2013 FORM 10-K

The following schedule sets forth the maturity of our long-term debt during the indicated year.

| In thousands |         |
|--------------|---------|
| 2014         | \$      |
| 2015         | 5,511   |
| 2016         | 140,888 |
| 2017         | 7,348   |
| 2018         | 7,348   |
| Thereafter   | 281,230 |

P. H. Glatfelter Company guarantees all debt obligations of its subsidiaries. All such obligations are recorded in these consolidated financial statements.

As of December 31, 2013 and 2012, we had \$5.2 million and \$4.6 million, respectively, of letters of credit issued to us by certain financial institutions. The letters of credit, which reduce amounts available under our revolving credit facility, primarily provide financial assurances for the benefit of certain state workers compensation insurance agencies in conjunction with our self-insurance program. We bear the credit risk on this amount to the extent that we do not comply with the provisions of certain agreements. No amounts are outstanding under the letters of credit.

#### 17. ASSET RETIREMENT OBLIGATION

During 2008, we recorded \$11.5 million, net present value, of asset retirement obligations related to the legal requirement to close several lagoons at the Spring Grove, PA facility. Historically, lagoons were used to dispose of residual waste material. Closure of the lagoons, which is expected to be completed in 2016, will be accomplished by filling the lagoons, installing a non-permeable liner which will be covered with soil to construct the required cap over the lagoons. The amount referred to above, in addition to upward revisions, was accrued with a corresponding increase in the carrying value of the property, equipment and timberlands caption on the consolidated balance sheet. The amount capitalized is being amortized as a charge to operations on the straight-line basis in relation to the expected closure period.

Following is a summary of the reserve for asset retirement obligations for the periods indicated:

| In thousands            | 2013     | 2012     |
|-------------------------|----------|----------|
| Balance at January 1,   | \$ 8,882 | \$ 9,679 |
| Accretion               | 229      | 458      |
| Payments                | (2,824)  | (1,255)  |
| Gain                    | (1,255)  |          |
| Balance at December 31, | \$ 5,032 | \$ 8,882 |

During 2013, we recognized a \$1.3 million gain related to the progress of closure activities for a portion of the lagoons required to be retired. The gain is reflected in the accompanying consolidated statements of income under the caption costs of products sold.

The following table summarizes the line items in the accompanying condensed consolidated balance sheets where the asset retirement obligations are recorded:

|                             | December 31 |        |  |
|-----------------------------|-------------|--------|--|
| In millions                 | 2013        | 2012   |  |
| Other current liabilities   | \$ 0.9      | \$ 3.6 |  |
| Other long-term liabilities | 4.1         | 5.3    |  |
| Total                       | \$ 5.0      | \$ 8.9 |  |

## 18. FAIR VALUE OF FINANCIAL INSTRUMENTS

The amounts reported on the consolidated balance sheets for cash and cash equivalents, accounts receivable and short-term debt approximate fair value. The following table sets forth the carrying value and fair value of long-term debt as of December 31:

|                    | 2013          |    |         |       | 2012     |       |         |  |
|--------------------|---------------|----|---------|-------|----------|-------|---------|--|
|                    | Fair          |    |         |       |          |       |         |  |
|                    | Carrying      |    |         |       | Carrying |       |         |  |
| In thousands       | Value         |    | Value   | Value |          | Value |         |  |

As of December 31, 2013 and 2012, we had \$250.0 million of 5.375% fixed rate bonds. These bonds are publicly registered, but thinly traded. Accordingly, the values set forth above for the bonds, as well as our other debt instruments, are based on observable inputs and other relevant market data (Level 2). The fair value of financial derivatives is set forth below in Note 19.

## 19. FINANCIAL DERIVATIVES AND HEDGING ACTIVITIES

As part of our overall risk management practices, we enter into financial derivatives primarily designed to either i) hedge foreign currency risks associated with forecasted transactions cash flow hedges; or ii) mitigate the impact that changes in currency exchange rates have on intercompany financing transactions and foreign currency denominated receivables and payables foreign currency hedges.

50

**Derivatives Designated as Hedging Instruments** Cash Flow Hedges In 2011, we began to use currency forward contracts as cash flow hedges to manage our exposure to fluctuations in the currency exchange rates on certain forecasted production costs expected to be incurred over a maximum of twelve months. Currency forward contracts involve fixing the EUR-USD exchange rate or USD-CAD for delivery of a specified amount of foreign currency on a specified date.

We designate certain currency forward contracts as cash flow hedges of forecasted raw material purchases or other production costs with exposure to changes in foreign currency exchange rates. The effective portion of changes in the fair value of derivatives designated and that qualify as cash flow hedges of foreign exchange risk is deferred as a component of accumulated other comprehensive income in the accompanying consolidated balance sheet and is subsequently reclassified into cost of products sold in the period that inventory produced using the hedged transaction affects earnings. The ineffective portion of the change in fair value of the derivative is recognized directly to earnings and reflected in the accompanying consolidated statement of income as non-operating income (expense) under the caption Other-net.

We had the following outstanding derivatives that were used to hedge foreign exchange risks associated with forecasted transactions and designated as hedging instruments:

| In thousands                  | 2013      | 2012   |
|-------------------------------|-----------|--------|
| Derivative                    | Buy Notio | nal    |
| Sell / Buy                    |           |        |
| Euro / U.S. dollar            | 27,105    | 27,003 |
| U.S. dollar / Canadian dollar | 13,077    | 12,369 |

These contracts have maturities of twelve months or less.

**Derivatives Not Designated as Hedging Instruments** Foreign Currency Hedges We also enter into forward foreign exchange contracts to mitigate the impact changes in currency exchange rates have on balance sheet monetary assets and liabilities. None of these contracts are designated as hedges for financial accounting purposes and, accordingly, changes in value of the foreign exchange forward contracts and in the offsetting underlying on-balance-sheet transactions are reflected in the accompanying statement of operations under the caption Other net.

| In thousands                  | 2013                | 2012   |

| U.S. dollar / Euro            | 2,000               | 2,000  |
| U.S. dollar / British Pound   | 6,000               |        |

These contracts have maturities of one month from the date originally entered into.

#### Fair Value Measurements

The following table summarizes the fair values of derivative instruments as of December 31 for the year indicated and the line items in the accompanying consolidated balance sheet where the instruments are recorded:

| In thousands                                | 2013                    | <b>2013</b> 2012 |             | 2012  |  |

The amounts set forth in the table above represent the net asset or liability giving effect to rights of offset with each counterparty.

The following table summarizes the amount of income or loss from derivative instruments recognized in our results of operations for the periods indicated and the line items in the accompanying consolidated statements of income where the results are recorded:

GLATFELTER 2013 FORM 10-K

51

The impact of activity not designated as hedging was substantially all offset by the remeasurement of the underlying on-balance sheet item.

The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described in Note 2.

The fair values of the foreign exchange forward contracts are considered to be Level 2. Foreign currency forward contracts are valued using foreign currency forward and interest rate curves. The fair value of each contract is determined by comparing the contract rate to the forward rate and discounting to present value. Contracts in a gain position are recorded in the consolidated balance sheet under the caption Prepaid and other current assets and the value of contracts in a loss position is recorded under the caption Other current liabilities.

A rollforward of fair value amounts recorded as a component of accumulated other comprehensive income is as follows:

| In thousands                        | 2013              | 2012     |
|-------------------------------------|-------------------|----------|
| Balance at January 1,               | \$ (599)          | \$ 1,649 |
| Deferred losses on cash flow hedges | (1,642)           | (65)     |
| Reclassified to earnings            | 945               | (2,183)  |
| Balance at December 31.             | <b>\$</b> (1.296) | \$ (599) |

We expect substantially all of the amounts recorded as a component of accumulated other comprehensive income will be realized in results of operations within the next twelve months and the amount ultimately recognized will vary depending on actual market rates.

Credit risk related to derivative activity arises in the event a counterparty fails to meet its obligations to us. This exposure is generally limited to the amounts, if any, by which the counterparty s obligations exceed our obligation to them. Our policy is to enter into contracts only with financial institutions which meet certain minimum credit ratings.

#### 20. SHAREHOLDERS EQUITY

The following table summarizes outstanding shares of common stock:

#### 21. SHARE REPURCHASES

In May 2012, our Board of Directors authorized a two-year share repurchase program for up to \$25.0 million of our outstanding common stock, exclusive of commissions. The following table summarizes share repurchases through December 31, 2013, made under this program:

|                         | shares  | (the | ousands) |
|-------------------------|---------|------|----------|
| Authorized amount       | n/a     | \$   | 25,000   |
| Repurchases             | 291,120 |      | (4,462)  |
| Remaining authorization |         | \$   | 20,538   |

In April 2011, our Board of Directors authorized a share repurchase program for up to \$50.0 million of our outstanding common stock, exclusive of commissions, all of which was used.

## 22. COMMITMENTS, CONTINGENCIES AND LEGAL PROCEEDINGS

**Contractual Commitments** The following table summarizes the minimum annual payments due on noncancelable operating leases and other similar contractual obligations having initial or remaining terms in excess of one year:

| In thousands | Leases   | Other     |
|--------------|----------|-----------|
| 2014         | \$ 6,648 | \$ 71,816 |
| 2015         | 4,481    | 23,245    |
| 2016         | 2,560    | 20,959    |
| 2017         | 1,654    | 103       |
| 2018         | 755      | 95        |
| Thereafter   | 162      | 95        |

Other contractual obligations primarily represent minimum purchase commitments under energy supply contracts and other purchase obligations.

52

At December 31, 2013, required minimum annual payments due under operating leases and other similar contractual obligations aggregated \$16.3 million and \$116.3 million, respectively.

#### Fox River Neenah, Wisconsin

Background. We have significant uncertainties associated with environmental claims arising out of the presence of polychlorinated biphenyls ( PCBs ) in sediments in the lower Fox River, on which our former Neenah facility was located, and in the Bay of Green Bay Wisconsin (collectively, the Site ). The United States, the State of Wisconsin, and two Indian tribes (collectively, the Governments ) seek to require (a) a cleanup of the Site ( response actions ), (b) reimbursement of cleanup costs ( response costs ), and (c) natural resource damages ( NRDs ). They claim that we, together with seven other entities that have been formally notified that they are potentially responsible parties ( PRPs ) under CERCLA for response costs or NRDs, are jointly and severally responsible under the Comprehensive Environmental Response, Compensation and Liability Act ( CERCLA or Superfund ) for those response actions, response costs, and NRDs, all of which may total in excess of \$1 billion.

The PRPs consist of us, Appvion, Inc. (formerly known as Appleton Papers Inc.), CBC Coating, Inc. (formerly known as Riverside Paper Corporation), Georgia-Pacific Consumer Products, L.P. (formerly known as Fort James Operating Company), Menasha Corporation, NCR Corporation (NCR), U.S. Paper Mills Corp., and WTM I Company.

The Governments have identified manufacturing and recycling of NCR®-brand carbonless copy paper as the principal source of the PCBs in sediments at the Site. Our predecessor, the Bergstrom Paper Company, and later we operated a deinking paper mill in Neenah, Wisconsin. This mill received NCR®-brand carbonless copy paper in its furnish and discharged PCBs to Little Lake Butte des Morts, an impoundment of the river at the upstream end of the Site.

The United States Environmental Protection Agency (EPA) has divided the Site into five operable units, including the most upstream (OU1) and four downstream reaches of the river and bay (OU2-5). OU1 extends from primarily Lake Winnebago to the dam at Appleton, and is comprised of Little Lake Butte des Morts. The Neenah Facility discharged its wastewater into this portion of the site.

We have resolved our liability for response actions and response costs associated with the permanent cleanup of Little Lake Butte des Morts through a consent decree.

and amendments, entered in *United States v. P.H. Glatfelter Co.*, No. 2:03-cv-949-LA (E.D. Wis.). Together with WTM I Company and with assistance from Menasha Corporation, we have completed that cleanup except for on-going operation and maintenance.

In November 2007, the EPA issued a unilateral administrative order for remedial action ( UAO ) to us and to seven other respondents directing us to implement the cleanup of the Site downstream of Little Lake Butte des Morts. Since that time, the district court has held that one of the respondents, Appvion, is not liable for this Site. In addition, the United States and the State of Wisconsin have entered into a settlement with another respondent, Georgia-Pacific LLP ( GP ), limiting GP s responsibility to the downstream-most three miles of the river. Work has proceeded to implement the UAO, mostly funded by NCR and its indemnitors.

In January 2008, two of the UAO respondents, NCR and Appleton Papers Inc. (now known as Appvion), brought two actions, consolidated under the caption *Appleton Papers Inc. v. George A. Whiting Paper Co.*, No. 2:08-cv-16-WCG (E.D. Wis.) (Whiting Litigation), that ultimately involved us and more than two dozen parties in litigation to allocate among the parties the responsibility for response actions, response costs, and NRDs for this Site. Most of the parties responsible for relatively small discharges of PCBs settled with the Governments, resolving their liability. On June 27, 2013, the district court entered a final judgment that (a) neither NCR nor Appvion may pursue any other party for contribution, (b) NCR owes us and the other non-settling parties full contribution for any amounts we may have to pay on account of response actions or response costs downstream of Little Lake Butte des Morts or on account of NRDs, (c) NCR is not liable for response costs, response actions, or NRDs in Little Lake Butte des Morts, and (d) NCR owes us reimbursement of \$4.28 million in costs we incurred in the past. NCR and Appvion have appealed that judgment. We have filed a cross-appeal of that judgment (as have several other defendants), challenging those portions of the judgment with which we disagree, including the ruling that NCR is not liable for response costs, response actions, or NRDs in Little Lake Butte des Morts. Until the Whiting Litigation judgment is affirmed on appeal, all past and future costs or damages incurred by any person remain the subject of litigation against us.

In October 2010, the United States and the State of Wisconsin sued us and thirteen other defendants to recover an injunction requiring the UAO respondents to complete the response actions required by the UAO and all

GLATFELTER 2013 FORM 10-K

parties to reimburse past and future response costs incurred by the Governments as well as to pay NRDs. That case is captioned *United States v. NCR Corp.*, No. 1:10-cv-910-WCG (E.D. Wis.) ( Government Action ). To date, litigation of the Government Action has been limited to the United States claim against the UAO respondents for a mandatory injunction to require implementation of the remaining work under the UAO, that is, completion of the remedy in the 33 miles of the river downstream of Little Lake Butte des Morts. Following a trial in December 2012, on May 1, 2013, the district court granted that injunction ( May 2013 Order ). The May 2013 Order directs the Company jointly and severally along with three other defendants that are also enjoined (NCR, WTM I Company, and Menasha Corporation) to comply with the UAO. An accompanying declaratory judgment declares the Company and those three defendants jointly and severally liable with three additional defendants (Georgia-Pacific, LLP, U.S. Paper Mills, Inc., and CBC Coatings, Inc.) that have entered into agreements with the United States governing those parties compliance with the UAO. The district court has denied NCR s motion to require us to contribute to compliance with the injunction. We have appealed the May 2013 Order, as have NCR, WTM I, and Menasha.

Cost estimates. Estimates of the Site remediation change over time as we, or others, gain additional data and experience at the Site. In addition, disagreement exists over the likely costs for some of this work. Based upon estimates made by the Governments and independent estimates commissioned by various potentially responsible parties, we have no reason to disagree with the Governments assertion that total past and future response costs and NRDs at this site may exceed \$1 billion and that \$1.5 billion is a reasonable outside estimate. Much of that amount has already been incurred. As described below, some of that amount is NRDs. The parties implementing the response action under the UAO in the downstream part of the river estimate the cost of work done in 2013 and the future cost of work yet to be done totals approximately \$360 million. The Governments seek to have that work done at a rate estimated to cost approximately \$70 million each year from 2013 through 2016, and at lower rates afterward.

**NRDs.** The Governments NRD assessment documents claimed that we are jointly and severally responsible for NRDs with a value between \$176 million and \$333 million. The Governments now claim that this range should be inflated to 2009 dollars and then certain unreimbursed past assessment costs should be added, so that the range of their claim would be \$287 million to \$423 million. We

deny liability for most of these NRDs and believe that even if anyone is liable, that we are not jointly and severally liable for the full amount. The May 2013 Order does not determine whether liability for NRDs would be joint and several. Moreover, we believe that the Natural Resource Trustees may not legally pursue this claim at this late date, as the limitations period for NRD claims is three years from discovery.

Reserves for the Site. As of December 31, 2013, our reserve for the Site, including our remediation and ongoing monitoring obligations in Little Lake Butte des Morts, our share of remediation of the rest of the Site, NRDs associated with PCB contamination at the Site and all pending, threatened or asserted and unasserted claims against us relating to PCB contamination at the Site totaled \$16.3 million. Of our total reserve for the Fox River, \$0.1 million is recorded in the accompanying condensed consolidated balance sheets under the caption Environmental liabilities and the remainder is recorded under the caption Other long term liabilities.

Although we believe that amounts already funded by us and WTM I to implement the Little Lake Butte des Morts remedy are adequate and no payments have been required since January 2009, there can be no assurance that these amounts will in fact suffice. WTM I has filed a bankruptcy petition in the Bankruptcy Court in Richmond; accordingly, there can be no assurance that WTM I will be able to fulfill its obligation to pay half of any additional costs, if required.

We do not believe that we will be allocated a significant percentage share of liability in any final equitable allocation of the response costs and NRDs. The accompanying consolidated financial statements do not include reserves for defense costs for the Whiting Litigation, the Government Action, or any future defense costs related to our involvement at the Site, which could be significant.

In setting our reserve for the Site, we have assessed our legal defenses, including our successful defenses to the allegations made in the Whiting Litigation and the determination in the Whiting Litigation that NCR owes us full contribution for response costs and NRDs that we may become obligated to pay except in OU1, and assumed that we will not bear the entire cost of remediation or damages to the exclusion of other known parties at the Site, who are also potentially jointly and severally liable. The existence and ability of other parties to participate has also been taken into account in setting our reserve, and is generally based on our evaluation of recent publicly available financial information on certain of the responsible parties and any known insurance, indemnity or cost

54

sharing agreements between responsible parties and third parties. In addition, our assessment is based upon the magnitude, nature, location and circumstances associated with the various discharges of PCBs to the river and the relationship of those discharges to identified contamination. We will continue to evaluate our exposure and the level of our reserves, including, but not limited to, our potential share of the costs and NRDs, if any, associated with the Site.

The amount and timing of future expenditures for environmental compliance, cleanup, remediation and personal injury, NRDs and property damage liabilities cannot be ascertained with any certainty due to, among other things, the unknown extent and nature of any contamination, the response actions that may ultimately be required, the availability of remediation equipment and landfill space, and the number and financial resources of any other PRPs.

**Other Information.** The Governments have published studies estimating the amount of PCBs discharged by each identified potentially responsible party s (PRP s) facility to the lower Fox River and Green Bay. These reports estimate our Neenah mill s share of the mass of PCBs discharged to be as high as 27%. The district court in its May 2013 Order found the discharge mass estimates used in these studies not to be accurate. We believe that the Neenah mill s absolute and relative contribution of PCB mass is significantly lower than the estimates set forth in these studies. The trial court in the Government Action has found that the Neenah mill discharged an unknown amount of PCBs.

In any event, based upon the rulings in the Whiting Litigation and the Government Action, neither of which endorsed an equitable allocation in proportion to the mass of PCBs discharged, we continue to believe that an allocation in proportion to mass of PCBs discharged would not constitute an equitable allocation of the potential liability for the contamination at the Fox River. We contend that other factors, such as the location of contamination, the location of discharge, and a party s role in causing discharge, must be considered in order for the allocation to be equitable.

In the 1990s, we entered into interim cost-sharing agreements with six of the other PRPs, which provided for those PRPs to share certain costs relating to scientific studies of PCBs discharged at the Site ( Interim Cost Sharing Agreements ). These Interim Cost Sharing Agreements do not establish the final allocation of

remediation costs incurred at the Site. Based upon our evaluation of the rulings in the Whiting Litigation as well as the volume, nature and location of the various discharges of PCBs at the Site and the relationship of those discharges to identified contamination, we believe our allocable share of liability at the Site is less than our share of costs under the Interim Cost Sharing Agreements.

Range of Reasonably Possible Outcomes. Our analysis of the range of reasonably possible outcomes is derived from all available information, including but not limited to decisions of the courts, official documents such as records of decision, discussions with the United States and other parties, as well as legal counsel and engineering consultants. Based on our analysis of the current records of decision and cost estimates for work to be performed at the Site, we believe that it is reasonably possible that our costs associated with the Fox River matter may exceed our cost estimates and the aggregate amounts accrued for the Fox River matter by amounts that are insignificant or that could range up to \$275 million over an undeterminable period that could range beyond 10 years. We believe that the likelihood of an outcome in the upper end of the monetary range is significantly less than other possible outcomes within the range and that the possibility of an outcome in excess of the upper end of the monetary range is remote. The rulings in our favor in the Whiting Litigation, if sustained on appeal, suggest that outcomes in the upper end of the monetary range have become somewhat less likely, while adverse rulings on some issues in the Whiting Litigation and the Government Action and increases in cost estimates for some of the work may make an outcome in the upper end of the range more likely. The Company also believes that the effect of reading the Whiting Litigation decisions together with the May 2013 Order requires the ongoing compliance with the UAO to be funded by NCR, or to the extent that the Company is required to provide any such funding, that NCR will be required to reimburse the Company. There can be no assurance, however, that the May 2013 Order will not have a material adverse effect on the Company s consolidated financial position, liquidity or results of operation.

**Summary.** Our current assessment is that we will be able to manage this environmental matter without a long-term, material adverse impact on the Company. This matter could, however, at any particular time or for any particular year or years, have a material adverse effect on our consolidated financial position, liquidity and/or results of operations or could result in a default under our debt covenants. Moreover, there can be no assurance that our reserves will be adequate to provide for future obligations related to this matter, that our share of costs and/or

GLATFELTER 2013 FORM 10-K

55

damages will not exceed our available resources, or that those obligations will not have a long-term, material adverse effect on our consolidated financial position, liquidity or results of operations. Should a court grant the United States or the State of Wisconsin relief that requires us individually either to perform directly or to contribute

significant amounts towards remedial action downstream of Little Lake Butte des Morts or to NRDs, those developments could have a material adverse effect on our consolidated financial position, liquidity and results of operations and might result in a default under our loan covenants.

The sum of individual amounts set forth above may not agree to the consolidated financial statements included herein due to rounding.

Results of individual business units are presented based on our management accounting practices and management structure. There is no comprehensive, authoritative body of guidance for management accounting equivalent to accounting principles generally accepted in the United States of America; therefore, the financial results of individual business units are not necessarily comparable with similar information for any other company. The management accounting process uses assumptions and allocations to measure performance of the business units. Methodologies are refined from time to time as management accounting practices are enhanced and businesses change. The costs incurred by support areas not directly aligned with the business unit are allocated primarily based on an estimated utilization of support area services.

Management evaluates results of operations of the business units before pension income or expense, alternative fuel mixture credits, debt redemption costs, restructuring related charges, certain corporate level costs, and the effects of certain asset dispositions. Management believes that this is a more meaningful representation of the operating performance of its core businesses, the profitability of business units and the extent of cash flow generated from these core operations. Such amounts are presented under the caption Other and Unallocated. This presentation is aligned with the management and operating structure of our company. It is also on this basis that the Company s performance is evaluated internally and by the Company s Board of Directors.

## 24. CONDENSED CONSOLIDATING FINANCIAL STATEMENTS

Our 5.375% Notes are fully and unconditionally guaranteed, on a joint and several basis, by certain of our 100%-owned domestic subsidiaries, PHG Tea Leaves, Inc., Mollanvick, Inc., and Glatfelter Holdings, LLC. The guarantees are subject to certain customary release provisions including i) the designation of such subsidiary as an unrestricted or excluded subsidiary; (ii) in connection with any sale or disposition of the capital stock of the subsidiary guarantor; and (iii) upon our exercise of our legal defeasance option or our covenant defeasance option, all of which are more fully described in the Indenture dated as of October 3, 2012 among us, the Guarantors and US Bank National Association, as Trustee, relating to the 5.375% Notes. The following presents our consolidating statements of income, including comprehensive income, and cash flows for the years ended December 31, 2013, 2012 and 2011 and our consolidating balance sheets as of December 31, 2013 and 2012. These financial statements reflect P. H. Glatfelter Company (the parent), the guarantor subsidiaries (on a combined basis) and elimination entries necessary to combine such entities on a consolidated basis. Effective December 31, 2013, Glatfelter Pulpwood Company, previously a guarantor, was merged with and into the parent. Accordingly, all condensed consolidating financial statements have been restated to give effect to this merger as of the earliest period presented. In addition, the amounts of intercompany investing and financing activities previously presented net for the years ended December 2012 and 2011 have been presented on a gross basis to conform to the current year s presentation.

| CERTIFICATION PURSUANT TO SECTION 302 (a) OF THE SARBANES-OXLEY ACT OF 2002 |
|---|
|---|

- I, Dante C. Parrini, certify that:
- 1. I have reviewed this Annual Report on Form 10-K for the year ended December 31, 2013 of P. H. Glatfelter Company (Glatfelter);
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report.
- 4. Glatfelter s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f)) and 15d-15(f)) for Glatfelter and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to Glatfelter, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of Glatfelter's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in Glatfelter s internal control over financial reporting that occurred during Glatfelter s most recent fiscal quarter (the fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, Glatfelter s internal control over financial reporting; and
- 5. Glatfelter s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to Glatfelter s auditors and the audit committee of Glatfelter s board of directors or persons performing the equivalent functions:
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect Glatfelter s ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in Glatfelter s internal control over financial reporting.
