Executive Summary

Introduction

Corvex and Related are undertaking this consent solicitation to remove the entire

Board

of

Trustees

of

CommonWealth

REIT

( CommonWealth,  
CWH

or  
the

Company ) after a hard-fought battle for shareholders to hold this vote, and to subsequently elect a new, truly independent Board of Trustees

The Arbitration Panel's ruling in late 2013 established a clear process to facilitate this consent solicitation

CommonWealth stands on the brink of a new phase in its history in which shareholders can choose who will manage their company, unlock substantial value, and leave behind a history as an underperforming, controlled company rife with conflicts of interest

Corvex and Related will request a record date by February 16; CommonWealth must establish the record date to be within 10 business days of the record date request; the consent solicitation must be concluded within 30 calendar days of the record date

CWH's performance record is abysmal by almost any metric over any relevant  
time period, in our view, but all the while the Portnoys have continued with  
impunity to line their pockets

Shareholders can now take back Commonwealth, choose a new, truly  
independent Board, and unlock the substantial value trapped within the  
Portnoys

conflicted external management structure

Executive Summary

The Case for Removal: Corporate Governance Malfeasance

Having deliberately manufactured a highly lucrative and insulated situation for themselves over 28 years, it is not surprising the Portnoys would harbor a deep commitment to retaining control

However, the actions taken over the past year to silence shareholders were unconscionable, in our view, and included, among many others, illegal bylaw amendments (later invalidated) and a secret attempt to manipulate Maryland lawmakers into changing the Maryland Unsolicited Takeover Act

## Edgar Filing: CommonWealth REIT - Form DFAN14A

Independent governance advisory firms such as ISS and Glass Lewis have long issued negative opinions on CWH's governance practices and recommended against re-election of certain Trustees

Conveniently coinciding with a solicitation to allow shareholders to take back their company, the Portnoys are now trumpeting highly misleading governance alterations, that can be unilaterally reversed at any time, and shamelessly asking shareholders to believe that they have experienced an epiphany

We believe the Board's actions over the past year alone, coupled with serial underperformance and atrocious corporate governance practices, warrant removal

Shareholders should not allow a few conveniently timed, reversible governance alterations to erase 28 years of poor governance, let alone the inexcusable actions of the past year

7

Executive Summary

What Are Shareholders Voting On?

The consent solicitation before shareholders is not a vote on a revised set of bylaws, a charter amendment or some other apparatus of governance with which the Portnoys would

like  
to  
distract  
shareholders,  
but  
a  
referendum  
on  
whether  
or  
not  
the  
individuals  
sitting  
on  
the  
current  
Board  
are  
fit  
to  
lead  
this  
company

The consent solicitation also creates an opportunity to elect highly qualified new leadership committed to good governance and unlocking the substantial value embedded in CommonWealth for shareholders

8

Executive Summary

A Vote on Leadership

An imperfect governance framework is only as good as those entrusted to govern

There

are

gaping

loopholes

in

the  
Portnoys  
recent  
and  
illusory  
governance  
alterations,  
not  
the  
least  
of  
which  
is  
that  
they  
are  
all  
unilaterally  
reversible  
by  
the  
Board

But the obvious flaw in the governance modifications is that they require shareholders to trust the same individuals who deliberately harmed shareholder rights over the past year with actions such as:

Passing illegal bylaw amendments to eviscerate the ability to hold any consent solicitation, a right plainly granted by the Declaration of Trust since 1986

Secretly attempting to manipulate state lawmakers into changing the Maryland Unsolicited Takeover Act to eliminate the right to hold this consent solicitation

Refusing  
to  
eliminate  
bylaws  
that  
require  
2  
Trustees  
be  
employed  
by  
RMR,  
the  
manager  
owned  
100%  
by the Portnoys

In effect, the Portnoys are asking to be judged solely on the misleading modifications of the

past two months, rather than their 28-year history of poor governance, not to mention the inexcusable actions of the past year

When a board deliberately harms shareholder rights through unconscionable tactics to protect their own interests, accepting flawed governance alterations

while  
leaving  
the  
same  
board  
in  
place  
simply  
invites  
more  
of  
the  
same

Executive Summary

CWH Valuation Upside: NAV of Approximately \$35 Per Share

We believe removal of the conflicted and underperforming Trustees will unlock substantial value for shareholders, and estimate

current

NAV

(1)

to

be

approximately \$35 per share in such a scenario, 50% higher than the closing price on January 29, 2014

Extensive due diligence has confirmed poor property and asset management practices, validating the flaws of conflicted external management

We

believe

there

would

While we continue to estimate 24-36 months for NOI to reach stabilization, we

believe

measurable

progress

can

begin

soon

after

installation

of

new

management

with progress reports communicated to shareholders on a regular basis

Once CWH joins the ranks of other public REITs with institutional quality management, and benefits from internalized management, operational turnaround, and improved capital allocation, we believe CWH could trade at approximately \$40 per share at 12/31/15

(1)

Represents estimate of private market value of all properties owned by CWH as disclosed in 9/30/13 10-Q filing, adjusted for market conditions

We believe installing a new independent Board and an effective management

team will make CWH investable

for previously untapped REIT investors in the

public markets, and remove the downside risk that the current conflicted

management structure will persist

Corvex and Related continue to propose the following Turnaround and  
Governance Plan:

While dramatically different from CWH's existing plan, these reforms are in our  
view self-evident to every informed investor and will make CWH look like  
virtually every other member of the S&P 500

Our Nominees have the qualifications to close the valuation gap by guiding the Company to a share price which more accurately reflects its value and prospects

12

Executive Summary

Our Nominees

I. History of Underperformance

19  
History of Underperformance  
The Fundamental Cause  
of Underperformance  
We  
continue  
to  
believe  
that  
the

fundamental  
cause  
of  
underperformance

at  
CWH is the absence of accountability, and more specifically the inability of  
shareholders to choose their own manager

Ironically,  
the  
severe  
conflicts  
in  
the  
external  
management  
structure  
demand  
rigorous  
accountability  
and  
superior  
governance,

but  
in  
our  
view  
none  
exists

In a structure where the manager is incentivized to act without regard to  
shareholder interests and still avoid being terminated, severe underperformance  
is inevitable, as evidenced by the years of data establishing CWH  
underperformance

The severe conflict of interest at CWH has been well-documented: the Portnoys effectively  
control CWH despite owning virtually no stock

How  
can  
there  
be  
accountability  
when  
an  
employee  
controls  
its  
own  
employer ?

RMR, a Delaware private company, is owned by Barry Portnoy and his son Adam Portnoy

All

As  
a  
result,

accountable  
by  
no  
one  
and,  
in  
our

CWH trails its core office REIT peers by 234 bps and 359 bps on same store rental growth and NOI growth, respectively

We believe YTD 2013 results below overstate CWH's performance, as the Company has placed 112 buildings (47 properties) into discontinuing operations beginning in Q4 2012

Despite its greater scale, CWH's cost structure results in the lowest same store NOI margins of its peers

CWH's total rental and NOI growth is dependent upon its outsized acquisition activity

The Portnoys

Effected a massively dilutive equity offering priced at less than 50% of book value, increasing share count by 41%

Opted into a provision of the Maryland Unsolicited Takeover Act in a misleading attempt, later declared invalid, to try to eliminate the right to remove Trustees without cause

Reinstated Trustee Joseph Morea after a nearly 4-1 vote against his re-election at the 2013 annual meeting, and charged him with spearheading corporate governance

Spent nearly \$30 million of shareholders money on a year-long litigation process in a brazen campaign to systematically disenfranchise shareholders

In lieu of further subjugation of shareholder rights, we believe the Dissident's consent

In 2008, Locksmith Capital Management sought to allow shareholders to elect two independent nominees to the Board of TravelCenters of America, a Portnoy-managed public company, and vote to declassify the Board, noting at the time: Instead of allowing shareholders an opportunity to vote for our nominees and shareholder proposals, they invoked meaningless technicalities in order to create a Soviet style election and entrench the current Board of Directors. This Board has no shame.

with  
our  
view  
that  
the  
Portnoys

highly

The Panel struck down illegal bylaws passed by the current Board  
The Panel expressly prohibited any action intended to impede or frustrate the new solicitation

The Portnoys' Governance Alterations Are Illusory

The Portnoys

therefore  
offer  
no  
guaranteed  
ability  
for

When a board deliberately harms shareholder rights through unconscionable tactics to protect their own interests, accepting flawed governance alterations

while  
leaving

the  
same

simply  
invites

more

All  
of  
the  
Portnoys'  
alterations

are  
ineffective,  
and  
most

importantly  
all  
are

unilaterally  
reversible

through the extraordinary powers of the Portnoys and their hand-picked Trustees:

Require  
two

RMR  
employees  
to  
always  
be  
on  
the  
Board,  
even  
though  
RMR  
owns  
no  
equity  
in  
CWH  
and  
in  
our  
opinion  
has  
incentives  
diametrically  
opposed  
to  
those  
of  
shareholders

Unilaterally amend the bylaws (while shareholders cannot) to effectively cripple shareholder action

Unilaterally stagger the Board under MUTA, without shareholder approval

Reinstate hand-picked Trustees who fail to be re-elected by shareholders

Further, there is no way to repeal the "Silent Bylaw" : Shareholders must spend exorbitant sums in litigation to strike down illegal, unilaterally-passed bylaw amendments simply to exercise their fundamental right to vote

But the fatal flaw in the alterations is that they require shareholders to trust the same individuals who deliberately harmed shareholder rights over the past year with actions that we believe suggest total disdain for shareholder rights

40

The Portnoys

Reversible Governance Alterations In Context

Why It's All Smoke and Mirrors

After the countless tactics employed over the past year, would the Portnoys really now implement meaningful

corporate

governance

enhancements

and

subject  
themselves  
to  
true  
accountability  
knowing  
full well they have severely underperformed for years? Would they really put at risk their invaluable  
Perpetual Fee Stream ?  
How can the Portnoys possibly justify reappointing Joseph Morea to the Board after he received the vote  
of  
only  
14%  
of  
the  
outstanding  
shares  
and  
how  
can  
he  
be  
in  
charge  
of  
spearheading  
purported  
governance reforms?  
What  
impact  
might  
losing  
the  
consent  
solicitation  
have  
on  
the  
Portnoys  
other,  
much  
larger  
and  
more  
lucrative externally managed REITs?  
Did the Portnoys purposefully enact only reversible governance changes just to win votes from some  
shareholders and remain in power with zero real improvement in corporate governance or accountability?  
On  
the  
following  
pages,

we  
review  
and  
highlight  
the  
flaws  
of  
the

Questions shareholders should ask themselves while conducting such a review

Until CommonWealth's long-suffering shareholders have the unambiguous ability to choose who manages their company, history will repeat itself, as the Portnoys delay their day of judgment through an illusory game of governance restructuring and legal maneuvering, all the while paying themselves huge fees for underperformance

The Portnoys

Reversible Governance Alterations In Context

Why It's All Smoke and Mirrors

Reality

Annual Elections

Bylaws still require two Managing Trustees to be employees of RMR, making the promise of having 2/3 of the Board up for annual elections in 2015

highly misleading

We publicly asked the Board to clarify this obvious contradiction but they have refused to respond

Section 3-803 of the Maryland Unsolicited Takeover Act allows Portnoys to unilaterally re-classify CWH Board at any time regardless of contrary provisions in governing documents, without a shareholder vote

CWH has not permanently opted out of Section 3-803

Charter amendment to de-classify Board requires a vote of holders of 75% of outstanding shares at 2014 annual meeting

Last year's quorum was only 67%

Can shareholders expect the Portnoys and CWH

to

Board Composition

The Board that appointed the two new

independent  
Trustees is the same one that  
has unconditionally supported the Portnoys  
and re-appointed Joe Morea after he was voted  
out of office at the 2013 annual meeting

Why would the new Trustees be any more  
independent  
than  
Joe  
Morea,  
William  
Lamkin  
and Frederick Zeytoonjian?

Are shareholders expected to believe  
that this time it is different because the  
new appointees were found by a  
headhunter hired by CWH?

Neither of the two new independent  
Trustees  
will be up for election at the 2014 annual  
meeting  
they were conveniently added to the  
classes up for election in 2015 and 2016

In fact, Mr. Morea himself also will not be up for  
election  
in  
2014

shareholders  
cannot  
hold  
him accountable until 2016

Size of the Board to be increased  
such that the ratio of Independent  
Trustees compared to total Trustees  
will increase from the current 71% to  
at least 75%

at  
any  
time  
by  
the

Board without shareholder approval, as they were last year to prevent ability to hold a consent solicitation; in fact, shareholders don't have the right to amend or modify bylaws at all

Shareholders are expected to assume that Bylaws will not be again amended whenever convenient to the Portnoys

In fact, the Portnoys have proven that they will use the Red Tape bylaws even the most innocuous ones to silence shareholders Nothing stops Board from re-inserting the 3%/3-year bylaw for Trustee nominations before the 2015 annual meeting

In fact, Select Income REIT ( SIR ) another RMR-managed REIT 44% of whose shares are owned by CWH

re-inserted  
an  
arbitration  
clause  
in  
its

after  
clearing

(SEC  
had  
challenged  
the clause during SIR's IPO process)

We had to prove to the Portnoys in arbitration that our record date request had been sent via registered mail return receipt requested (which it was, in addition to e-mail, hand delivery and FedEx), in order to be counted as a valid request

On January 21, 2014, we sent the Board a public letter, providing them an opportunity to address the gaping loopholes in their governance alterations and

The Board's response? Silence.  
Coupled with the unconscionable actions taken over the last year,  
what else do you need to know?  
We asked if the Portnoy Board will:

Eliminate  
the  
requirement  
that  
at  
least  
2  
Trustees  
be  
affiliated  
with  
RMR?

Amend the charter to ensure that the Board cannot opt back into Section 3-803 of the Maryland General Corporation Law which allows them to unilaterally re-stagger the Board?

Amend governance documents to commit that if Barry Portnoy is not elected as a Trustee at the 2014 Annual Meeting, he cannot be unilaterally reinstated as Joseph Morea was after receiving the vote of only 14% of the outstanding shares?

Amend the charter and bylaws to ensure the new provisions that make the annual meeting and nomination process less offensive reversible only with a shareholder vote?

Amend the charter and bylaws to replicate the Arbitration Panel's procedural guidelines for any future consent solicitation?

Post online the entire un-redacted transcript of the October 2013 hearing before the Arbitration Panel so that shareholders can understand management's testimony about, among other things, their fiduciary duties to RMR vs. shareholders and how the RMR contract is negotiated every

year?

Work with Corvex/Related and the Arbitration Panel to implement obvious solutions that address the Board's professed concerns regarding the transition to a new Board?

Corvex/Related s Turnaround and Governance Plan

A Simple Blueprint for Change

CommonWealth can then elect a Board of Trustees that:

Is truly independent (per ISS s definition)

Implements and can describe to shareholders the procedures designed to ensure its independent Trustees can continue to operate independently

Is accountable to shareholders

Hires its own independent advisors when necessary

Systematically sets performance goals for the management team, measures its performance, and holds it accountable for its failures

Objectively  
benchmarks  
its  
corporate  
governance  
policies  
against  
peers

Challenges management's thinking on material strategic issues when appropriate

Once shareholders take back control of CommonWealth and can choose who should manage their company, the conflict of interest between manager and owner will be eliminated

In short, shareholders can elect an experienced, independent Board charged with being their advocate

51  
Corvex/Related s Turnaround and Governance Plan  
Peaceful  
Transition  
of  
Authority

Plan  
A

To eliminate the already miniscule risks, the Board members could implement the following

to protect Commonwealth and its shareholders:

We also point out that the Arbitration Panel will remain available for resolving disputes

even

after

the

removal

of

the

Trustees

and

during

the

transition

to

a

newly

elected

Board

While we wholeheartedly dismiss the scare tactics employed by the Portnoys

that

a

removal

of

Trustees

will

cause

the

business

material

harm

we

point

out

that ironically the sitting Board members could easily preclude any of their

imagined disruptions from occurring by acting responsibly in advance of a

consent solicitation

We have asked the Board to work with Corvex/Related and the Arbitration Panel

to implement obvious solutions that address the Board's professed concerns,

but the Board refuses to respond

Agree to allow nominations of replacement Trustees concurrently with the removal of existing

Trustees

Request waivers under existing financing agreements regarding a change in control or

arrange for replacement facilities

RMR could remove language or simply agree not to immediately terminate its management of

the assets in the event of a change in control

Potential Interim CEO

Mr. Lozier served as co-founder and CEO of the Archon Group L.P., a subsidiary of Goldman Sachs, from its formation in 1996 until 2012

Archon is an international real estate services and advisory company based in Dallas, TX

During Mr. Lozier s tenure at Archon, the company grew from 320 employees to 8,500

employees managing 36,000 assets with a gross value of approximately \$59 billion

Archon underwrote, acquired and asset managed real estate and real estate debt for

Goldman Sachs with a concentration in office, multi-family and limited service hospitality

Prior to the formation of Archon, Mr. Lozier was an employee of the J.E. Robert Company and had been responsible for managing the GS / JER joint venture for two years. Mr. Lozier directed the acquisition efforts of the joint venture between GS and JER from 1991-1995

Mr. Lozier could serve as interim CEO until the new Board decides to hire a permanent CEO. As interim CEO, he would focus on transition of management services, continuity of financial reporting, and building out a permanent management team

Related/Corvex have identified a potential interim CEO, Jim Lozier, to help transition CWH to internal management

Mr. Lozier is a 30+ year real estate industry veteran with impeccable credentials

who has created significant value for equity holders during his career

on  
repeated  
feedback  
from

across  
CWH s  
markets regarding their experience with RMR, we believe:

Many  
leasing  
brokers  
representing  
tenants  
across  
CWH s  
markets  
steer  
tenants  
away

from RMR-managed properties because of a lack of attention from RMR personnel  
RMR often fails to execute simple asset and property management functions, such as  
responding to tenant work requests, and challenging real estate tax assessments

Blake Schreck, president and economic development director for the Lenexa Chamber of  
Commerce, didn't sound unhappy about Southlake Technology Park changing hands. He  
echoed multiple local commercial real estate brokers, who indicated that Commonwealth's  
slow response to requests for lease proposals from prospective tenants had likely cost the  
933,0000-square-foot office park deals and contributed to its 48 percent occupancy rate.

Where Are The Employees?

RMR employees service assets for CWH in addition to other RMR-managed public REITs

the  
Portnoys  
privately

all  
of  
which

encompass office, retail, hospitality, senior housing, land and other property types

It appears that the leasing staff is too small, resources are spread too thin, and a true asset management department is non-existent

The majority of, if not all, leases from CWH, SIR, HPT, SNH and GOV are processed through the CWH's headquarters office for review, approval and negotiation

There appears to be little delegation to local RMR representatives, creating a substantial bottleneck that leads to very slow response times

It appears that staffing is maintained at deficient levels in order to maximize profit margins for RMR at the expense of CWH shareholders

Clearly, assets that are suffering from such poor management should only be sold after first maximizing value for CWH shareholders

Opportunistic funds with expensive capital (such as Oaktree Capital and Garrison Investment

Group)

were  
among  
the  
largest  
buyers  
of

assets

Significant Operational Upside

We are confident that misaligned incentives at the corporate level have translated into underperforming run rate NOI

In our opinion, properties can achieve our estimate of stabilized NOI within 24-36 months of installing an effective management team whose incentives are aligned with shareholders

Furthermore, we believe that measurable progress can begin within several months of initiating a repositioning program with progress reports communicated to shareholders in real time

The cost to shareholders of a severely conflicted external management structure was self-evident during our work in the field

Our weighted average cap rate for the Top 10 markets in CWH's portfolio is 6.8% while the

Edgar Filing: Commonwealth REIT - Form DFAN14A

average implied cap rate of the public peers is 6.7%

Given that the portfolio of assets in CWH's Top 10 markets are comparable or superior to the full portfolios of the average public peer, we believe our weighted average cap rate compares favorably
