WisdomTree Japan Hedged Real Estate Fund **DXJR** (NYSE Arca Ticker)

SUMMARY PROSPECTUS January 22, 2014

Before you invest in the Fund, as defined below, you may want to review the Fund's prospectus and statement of additional information (SAI), which contain more information about the Fund and the risks of investing in the Fund. The Fund's current prospectus and SAI are incorporated by reference into this summary prospectus. You can find the Fund's prospectus and SAI, as well as other information about the Fund, online at www.wisdomtree.com/prospectus. You may also obtain this information at no charge by calling 1-866-909-9473 or by sending an e-mail request to getinfo@wisdomtree.com.

Investment Objective

The WisdomTree Japan Hedged Real Estate Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Japan Hedged Real Estate Index (the Index).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund's average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.48%
Distribution and/or Service (12b-1) Fees	None
Other Expenses*	0.00%
Total Annual Fund Operating Expenses	0.48%
Fee Waivers	(0.05%)
Total Annual Fund Operating Expenses After Fee Waivers**	0.43%

* Other Expenses are based on estimated amounts for the current fiscal year.

** WisdomTree Asset Management, Inc. has contractually agreed to limit the Management Fee to 0.43% through July 31, 2015, unless earlier terminated by the Board of Trustees of the Trust for any reason at any time.

Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year

3 Years

\$44

\$146

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

WisdomTree Trust Prospectus 1

Principal Investment Strategies of the Fund

The Fund employs a passive management or indexing investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund's total assets (exclusive of collateral held from securities lending) will be invested in the component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is designed to provide exposure to Japanese real estate companies as defined by WisdomTree Investments, Inc. (WisdomTree Investments), as index provider, while at the same time neutralizing exposure to fluctuations of the value of the Japanese yen relative to the U.S. dollar. The Index was created by WisdomTree Investments utilizing a proprietary combination of sub-industry classifications from Standard & Poor's Global Industry Classification Standards (S&P GICS) to determine membership for inclusion as a real estate company in the Index. In addition to real estate investment trusts and real estate management and development companies (included in the financial sector as defined by S&P GICS), the following sub-industries, which are derived from the consumer discretionary sector, industrial sector or material sectors as defined by S&P GICS, are included in the Index: homebuilding, building products, construction and engineering (building sub-groups), construction materials, and marine ports and services.

The Index consists of companies incorporated in Japan that trade primarily on Tokyo or Jasdq Stock Exchanges. Securities are weighted by their float-adjusted market capitalization. Float-adjusted means that the share amounts used in calculating the Index reflect only shares available to investors. Shares held by control groups, public companies and government agencies are excluded. At the time of the Index's annual rebalance, the maximum weight of any single security in the Index is capped at 10%. In response to market conditions, security weights may fluctuate above the specified cap between annual Index rebalance dates.

To be eligible for inclusion in the Index, a company must have: (i) a float-adjusted market capitalization of at least \$500 million as of the Index screening date; (ii) an average daily trading volume of at least \$100,000 for three months preceding the Index screening date; (iii) a calculated volume factor (the average daily trading volume for three months preceding the Index screening date divided by the weight of the security in the Index) that is greater than \$200 million; and (iv) trading of at least either 250,000 shares per month or \$25 million notional for each of the six months preceding the Index screening date. In the event that a company has a calculated volume factor that is less than \$400 million as of the annual Index screening date, its weight in the Index will be reduced such that its weight equals its weight prior to the adjustment multiplied by a fraction of its calculated volume factor divided by \$400 million.

The Index hedges against fluctuations in the relative value of the Japanese yen against the U.S. dollar. The Index is designed to have higher returns than an equivalent unhedged investment when the yen is weakening relative to the U.S. dollar. Conversely, the Index is designed to have lower returns than an equivalent unhedged investment when the yen is rising relative to the U.S. dollar. The Index applies an applicable published one-month currency forward rate to the total equity exposure to Japan to adjust the value of the Japanese yen against the U.S. dollar.

The Fund intends to enter into forward currency contracts or futures contracts designed to offset the Fund's exposure to the Japanese yen. A forward currency contract is a contract between two parties to buy or sell a specific currency in the future at an agreed upon exchange rate. A currency futures contract is a contract to exchange one currency for another at a specified date in the future at an agreed upon exchange rate. The amount of forward contracts and futures contracts in the Fund is based on the aggregate exposure of the Fund and Index to the Japanese yen. While this approach is designed to minimize the impact of currency fluctuations on Fund returns, it does not necessarily eliminate the Fund's exposure to the yen. The return of the forward currency contracts and currency futures contracts may not perfectly offset the actual fluctuations between the yen and the U.S. dollar.

To the extent the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as its Index.

Principal Risks of Investing in the Fund

Edgar Filing: WisdomTree Trust - Form 497K

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share (NAV), trading price, yield, total return and/or ability to

WisdomTree Trust Prospectus 2

meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus, titled "Additional Principal Risk Information About the Fund" and "Additional Non-Principal Risk Information."

- n **Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- n **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.
- n **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds (ETFs), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV, and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.
- n **Cash Redemption Risk.** The Fund's investment strategy will require it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.
- n **Construction Industry Risk.** The Fund may invest in companies in the construction industry, and therefore the performance of the Fund could be negatively impacted by events affecting this industry. The construction industry may be significantly affected by changes to the national, regional and local residential and commercial real estate markets. The industry is also sensitive to interest rate fluctuations, which may cause changes in the availability of mortgage capital as well as the purchasing power of potential homebuyers. In addition, changes in government spending, zoning laws, economic conditions, taxation, real estate values and building inventories may have significant effects on the construction industry.
- n **Currency Exchange Rate Risk.** The Fund uses various strategies to attempt to minimize the impact of changes in the value of the Japanese yen against the U.S. dollar. These strategies may not be successful. In order to minimize transaction costs, or for other reasons, the Fund's exposure to the yen may not be fully hedged at all times. Currency exchange rates can be very volatile and can change quickly and unpredictably. Therefore, the value of an investment in the Fund may also go up or down quickly and unpredictably and investors may lose money.
- n **Derivatives Risk.** The Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of forward currency contracts and futures contracts. With respect to forward currency contracts, these risks include but are not limited to the risk that the counterparty will default on its obligations. With respect to futures contracts, these risks include but are not limited to: (1) the success of the adviser's and

Edgar Filing: WisdomTree Trust - Form 497K

sub-adviser's ability to predict movements in the prices of individual currencies or securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the currencies or securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the contracts at any particular time.

- n **Financial Sector Risk.** The Fund may invest in companies in the financial sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. This sector can be significantly affected by changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

WisdomTree Trust Prospectus 3

- n **Foreign Securities Risk.** Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.

- n **Geographic Concentration in Japan.** Because the Fund invests primarily in the securities of companies in Japan, the Fund's performance is expected to be closely tied to social, political, and economic conditions within Japan and to be more volatile than the performance of more geographically diversified funds. The Japanese economy has only recently emerged from a prolonged economic downturn. Since the year 2000, Japan's economic growth rate has remained relatively low. The economy is characterized by government intervention and protectionism, an unstable financial services sector, and relatively high unemployment. Economic growth is heavily dependent on international trade, government support of the financial services sector and other troubled sectors, and consistent government policy. The United States is Japan's largest single trading partner, but close to half of Japan's trade is conducted with developing nations, almost all of which are in Southeast Asia. Slowdowns in the U.S. and China could have a negative impact on Japan. Exposure to China, in terms of both imports and exports, has been increasing in recent years. These and other factors could have a negative impact on the Fund's performance and increase the volatility of an investment in the Fund.

- n **Industrials Investing Risk.** The Fund may invest in companies in the industrials sector. The industrials sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

- n **Investment Style Risk.** The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to its Index.

- n **Issuer-Specific Risk.** Issuer-specific events, including changes in the financial condition of an issuer, can have a negative impact on the value of the Fund.

- n **Large-Capitalization Investing.** The Fund may invest in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of large-capitalization companies underperform securities of smaller-capitalization companies or the market as a whole. The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion.

- n **Mid-Capitalization Investing.** The Fund may invest in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of smaller companies are often more vulnerable to market volatility than securities of larger companies.

- n **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.

Edgar Filing: WisdomTree Trust - Form 497K

- n **Non-Diversification Risk.** Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

- n **Real Estate Investing.** The Fund invests primarily in real estate companies, including investments in real estate investment trusts (REITs) traded in Japan. REITs are securities that invest substantially all of their assets in real estate, trade like stocks and may qualify for special tax considerations. Investments in REITs subject the Fund to risks associated with the direct ownership of real estate. Market conditions or events affecting the overall market for real estate and REITs, such as declining property values or rising interest rates, could have a negative impact on the Fund's performance.

WisdomTree Trust Prospectus 4

Fund Performance

The Fund is new and therefore does not have a performance history.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. Mellon Capital Management Corporation serves as sub-adviser to the Fund.

Portfolio Managers

Karen Q. Wong, CFA, a Managing Director, Head of Equity Portfolio Management, has been a portfolio manager of the Fund since its inception.

Thomas J. Durante, CFA, a Director, Senior Portfolio Manager, has been a portfolio manager of the Fund since its inception.

Richard A. Brown, CFA, a Director, Senior Portfolio Manager, has been a portfolio manager of the Fund since its inception.

Buying and Selling Fund Shares

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (Creation Units), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 50,000 shares. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund and/or a designated amount of U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an Intermediary), WisdomTree Asset Management, Inc. or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary s website for more information.
