Securities registered, or to be registered, pursuant to Section 12(b) of the Act.

Title of each class	Name of each exchange on which registered
Common Units	New York Stock Exchange

Securities registered, or to be registered, pursuant to Section 12(g) of the Act.

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None

Indicate the number of outstanding shares of each issuer's classes of capital or common stock as of the close of the period covered by the annual report.

74,196,294 Common Units

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark if the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if the registrant (1) has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards as issued Other

by the International Accounting Standards Board

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow:

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

PART I

This annual report of Teekay LNG Partners L.P. on Form 20-F for the year ended December 31, 2013 (or *Annual Report*) should be read in conjunction with the consolidated financial statements and accompanying notes included in this report.

Unless otherwise indicated, references in this prospectus to Teekay LNG Partners, we, us and our and similar terms refer to Teekay LNG Partners L.P. and/or one or more of its subsidiaries, except that those terms, when used in this Annual Report in connection with the common units described herein, shall mean specifically Teekay LNG Partners L.P. References in this Annual Report to Teekay Corporation refer to Teekay Corporation and/or any one or more of its subsidiaries.

In addition to historical information, this Annual Report contains forward-looking statements that involve risks and uncertainties. Such forward-looking statements relate to future events and our operations, objectives, expectations, performance, financial condition and intentions. When used in this Annual Report, the words expect, intend, plan, believe, anticipate, estimate and variations of such words and similar expressions are intended to identify forward-looking statements. Forward-looking statements in this Annual Report include, in particular, statements regarding:

our ability to make cash distributions on our units or any increases in quarterly distributions;

our future financial condition and results of operations and our future revenues and expenses;

growth prospects of the liquefied natural gas (or *LNG*) and liquefied petroleum gas (or *LPG*) shipping and oil tanker markets;

LNG, LPG and tanker market fundamentals, including the balance of supply and demand in the LNG, LPG and tanker markets;

our ability to conduct and operate our business and the business of our subsidiaries in a manner than minimizes taxes imposed upon us and our subsidiaries;

the expected lifespan of our vessels;

our expectation regarding our vessels' ability to perform to specifications and maintain their hire rates;

our ability to maximize the use of our vessels, including the re-deployment or disposition of vessels no longer under long-term charter;

expected purchases and deliveries of newbuilding vessels and commencement of service of newbuildings under charter contracts and our ability to obtain charter contracts on our newbuildings, including the five LNG newbuildings and 12 LPG newbuildings;

the expected technical and operational capabilities of newbuildings, including the benefits of the M-type, Electronically Controlled, Gas Injection twin engines in certain LNG carrier newbuildings;

the expected sale or redelivery of certain vessels, including the *Flanders Harmony*;

our expectation that we will not record a gain or loss on future sales of vessels under capital lease;

the expected life of intangible assets relating to the charter contracts of the *Algeciras Spirit* and *Huelva Spirit*;

the expected source of funds for short-term and long-term liquidity needs;

estimated capital expenditures and our ability to fund them;

the expected source of funds to manage our working capital deficit;

our ability to maintain long-term relationships with major LNG and LPG importers and exporters and major crude oil companies;

our ability to leverage to our advantage Teekay Corporation's relationships and reputation in the shipping industry;

our continued ability to enter into long-term, fixed-rate time-charters with our LNG and LPG customers;

our expectation of not earning revenues from voyage charters in the foreseeable future;

the recent economic downturn and financial crisis in the global market and potential negative effects on our customers' ability to charter our vessels and pay for our services;

obtaining LNG and LPG projects that we or Teekay Corporation bid on or that Teekay Corporation has been awarded;

Table of Contents

the expected timing, amount and method of financing for the purchase of three of our leased Suezmax tankers, the five LNG carrier newbuildings ordered from DMSE, the second LNG carrier from Awilco and eight of the 12 LPG carrier newbuildings ordered within Exmar LPG BVBA;

our expected financial flexibility to pursue acquisitions and other expansion opportunities;

our ability to continue to obtain all permits, licenses, and certificates material to our operations;

the expected cost of, and our ability to comply with, governmental regulations and maritime self-regulatory organization standards applicable to our business;

the impact of new environmental regulations, including Regulation (EU) No 1257/2013;

the expected cost to install ballast water treatment systems on our tankers in compliance with IMO proposals;

the expected impact of heightened environmental and quality concerns of insurance underwriters, regulators and charterers;

the adequacy of our insurance coverage for accident-related risks, environmental damage and pollution;

the future valuation of goodwill;

our expectations as to any impairment of our vessels;

our involvement in any EU anti-trust investigation of container line operators;

the impact of the downgraded credit rating of the bank providing a letter of credit to the Teekay Nakilat Joint Venture's lease;

our expectations regarding whether the UK taxing authority can successfully challenge the tax benefits available under certain of our leasing arrangements, and the potential financial exposure to the Partnership if such a challenge is successful;

our and Teekay Corporation's ability to maintain good relationships with the labor unions who work with us;

anticipated taxation of our partnership and its subsidiaries; and

our business strategy and other plans and objectives for future operations.

Forward-looking statements involve known and unknown risks and are based upon a number of assumptions and estimates that are inherently subject to significant uncertainties and contingencies, many of which are beyond our control. Actual results may differ materially from those expressed or implied by such forward-looking statements. Important factors that could cause actual results to differ materially include, but are not limited to those factors discussed in Item 3: Key Information Risk Factors , and other factors detailed from time to time in other reports we file with or furnish to the U.S. Securities and Exchange Commission (or the SEC).

We do not intend to revise any forward-looking statements in order to reflect any change in our expectations or events or circumstances that may subsequently arise. You should carefully review and consider the various disclosures included in this Annual Report and in our other filings made with the SEC that attempt to advise interested parties of the risks and factors that may affect our business prospects and results of operations.

Item 1. Identity of Directors, Senior Management and Advisors

Not applicable.

Item 2. Offer Statistics and Expected Timetable

Not applicable.

Item 3. Key Information

Selected Financial Data

Set forth below is selected consolidated financial and other data of Teekay LNG Partners and its subsidiaries for the fiscal years 2009 through 2013, which have been derived from our consolidated financial statements. The following table should be read together with, and is qualified in its entirety by reference to, (a) Item 5. Operating and Financial Review and Prospects, included herein, and (b) the historical consolidated financial statements and the accompanying notes and the Report of Independent Registered Public Accounting Firm therein (which are included herein), with respect to the consolidated financial statements for the years ended December 31, 2013, 2012 and 2011.

Table of Contents

From time to time we purchase vessels from Teekay Corporation. In 2010, we acquired three conventional tankers from Teekay Corporation. This transaction was deemed to be a business acquisition between entities under common control. Accordingly, we have accounted for this transaction in a manner similar to the pooling of interest method whereby our financial statements prior to the date these vessels were acquired by us are retroactively adjusted to include the results of these acquired vessels. The periods retroactively adjusted include all periods that we and the acquired vessels were both under the common control of Teekay Corporation and the acquired vessels had begun operations. As a result, our consolidated statements of income for the years ended December 31, 2010 and 2009 reflect the results of operations of these three vessels, referred to herein as the *Dropdown Predecessor*, as if we had acquired them when each respective vessel began operations under the ownership of Teekay Corporation, which was between May 2009 and September 2009. Please refer to Item 5 Operating and Financial Review and Prospects: Results of Operations Items You Should Consider When Evaluating Our Results of Operations .

Table of Contents

Our consolidated financial statements are prepared in accordance with United States generally accepted accounting principles (or *GAAP*).

- (1) Voyage expenses are all expenses unique to a particular voyage, including any bunker fuel expenses, port fees, cargo loading and unloading expenses, canal tolls, agency fees and commissions.
- (2) Vessel operating expenses include crewing, ship management services, repairs and maintenance, insurance, stores, lube oils and communication expenses.
- (3) Equity income includes unrealized gains (losses) on derivative instruments, and any ineffectiveness of derivative instruments designated as hedges for accounting purposes of \$10.9 million, (\$6.5) million, (\$5.8) million, \$5.5 million and \$25.9 million, for the years ended December 31, 2009, 2010, 2011, 2012 and 2013, respectively.
- (4) We entered into interest rate swaps to mitigate our interest rate risk from our floating-rate debt, leases and restricted cash. We also have entered into an agreement with Teekay Corporation relating to the Toledo Spirit time-charter contract under which Teekay Corporation pays us any amounts payable to the charterer as a result of spot rates being below the fixed rate, and we pay Teekay Corporation any amounts

Table of Contents

- payable to us as a result of spot rates being in excess of the fixed rate. We have not applied hedge accounting treatment to these derivative instruments except for one interest rate swap in one of our equity accounted joint ventures, and as a result, changes in the fair value of our derivatives are recognized immediately into income and are presented as realized and unrealized loss on derivative instruments in the consolidated statements of income and comprehensive income. Please see Item 18 Financial Statements: Note 12 Derivative Instruments.
- (5) Substantially all of these foreign currency exchange gains and losses were unrealized and not settled in cash. Under GAAP, all foreign currency-denominated monetary assets and liabilities, such as cash and cash equivalents, accounts receivable, restricted cash, accounts payable, accrued liabilities, unearned revenue, advances from affiliates, long-term debt and capital lease obligations, are revalued and reported based on the prevailing exchange rate at the end of the period. Starting in May 2012, foreign exchange gains and losses included realized and unrealized gains and losses on our cross currency swaps. Our primary sources for the foreign currency exchange gains and losses are our Euro-denominated term loans and Norwegian Kroner-denominated (or *NOK*) bonds. Euro-denominated term loans totaled 288.0 million Euros (\$412.4 million) at December 31, 2009, 278.9 million Euros (\$373.3 million) at December 31, 2010, 269.2 million Euros (\$348.9 million) at December 31, 2011, 258.8 million Euros (\$341.4 million) at December 31, 2012 and 247.6 million Euros (\$340.2 million) at December 31, 2013. Our NOK-denominated bonds totaled 700.0 million NOK (\$125.8 million) and 1.6 billion NOK (\$263.5 million) as at December 31, 2012 and 2013, respectively.
- (6) We operate certain of our liquefied natural gas (or *LNG*) carriers under tax lease arrangements. Under these arrangements, we borrow under term loans and deposit the proceeds into restricted cash accounts. Concurrently, we enter into capital leases for the vessels, and the vessels are recorded as assets on our consolidated balance sheets. The restricted cash deposits, plus the interest earned on the deposits, will equal the remaining amounts we owe under the capital lease arrangements, including our obligations to purchase the vessels at the end of the lease term where applicable. Therefore, the payments under our capital leases are fully funded through our restricted cash deposits, and our continuing obligation is the repayment of the term loans. However, under GAAP we record both the obligations under the capital leases and the term loans as liabilities, and both the restricted cash deposits and our vessels under capital leases as assets. This accounting treatment has the effect of increasing our assets and liabilities by the amount of restricted cash deposits relating to the corresponding capital lease obligations.
- (7) Vessels and equipment consist of (a) our vessels, at cost less accumulated depreciation, (b) vessels under capital leases, at cost less accumulated depreciation and (c) advances on our newbuildings.
- (8) The external charters that commenced in 2009 with The Tangguh Production Sharing Contractors and in 2013 with Awilco LNG ASA (or *Awilco*) have been accounted for as direct financing leases. As a result, the two LNG vessels chartered to The Tangguh Production Sharing Contractors and the two LNG vessels chartered to Awilco are not included as part of vessels and equipment.
- (9) Consistent with general practice in the shipping industry, we use net voyage revenues (defined as voyage revenues less voyage expenses) as a measure of equating revenues generated from voyage charters to revenues generated from time-charters, which assists us in making operating decisions about the deployment of our vessels and their performance. Under time-charters the charterer pays the voyage expenses, whereas under voyage charter contracts the ship owner pays these expenses. Some voyage expenses are fixed, and the remainder can be estimated. If we, as the ship owner, pay the voyage expenses, we typically pass the approximate amount of these expenses on to our customers by charging higher rates under the contract or billing the expenses to them. As a result, although voyage revenues from different types of contracts may vary, the net voyage revenues are comparable across the different types of contracts. We principally use net voyage revenues, a non-GAAP financial measure, because it provides more meaningful information to us than voyage revenues, the most directly comparable GAAP financial measure. Net voyage revenues are also widely used by investors and analysts in the shipping industry for comparing financial performance between companies and to industry averages. The following table reconciles net voyage revenues with voyage revenues.

(in thousands of U.S. Dollars)	Year Ended December 31, 2009	Year Ended December 31, 2010	Year Ended December 31, 2011	Year Ended December 31, 2012	Year Ended December 31, 2013
Voyage revenues	343,542	374,502	380,469	392,900	399,276
Voyage expenses	(2,034)	(2,042)	(1,387)	(1,772)	(2,857)
Net voyage revenues	341,508	372,460	379,082	391,128	396,419

(10) EBITDA and Adjusted EBITDA are used as a supplemental financial measure by management and by external users of our financial statements, such as investors, as discussed below:

Financial and operating performance. EBITDA and Adjusted EBITDA assist our management and investors by increasing the comparability of our fundamental performance from period to period and against the fundamental performance of other companies in our industry that provide EBITDA and Adjusted EBITDA information. This increased comparability is achieved by excluding the potentially disparate effects between periods or companies of interest expense, taxes, depreciation or amortization, amortization of in-process revenue contracts and realized and unrealized loss on derivative instruments relating to interest rate swaps and cross currency swaps, which items are affected by various and possibly changing financing methods, capital structure and historical cost basis and which items may significantly affect net income between periods. We believe that including EBITDA and Adjusted EBITDA as financial and operating measures benefits investors in (a) selecting between investing in us and other investment alternatives and (b) monitoring our ongoing financial and operational strength and health in assessing whether to continue to hold our common units.

Liquidity. EBITDA and Adjusted EBITDA allow us to assess the ability of assets to generate cash sufficient to service debt, pay distributions and undertake capital expenditures. By eliminating the cash flow effect resulting from our existing capitalization and other items such as dry-docking expenditures, working capital changes and foreign currency exchange gains and losses, EBITDA and Adjusted

Table of Contents

EBITDA provides a consistent measure of our ability to generate cash over the long term. Management uses this information as a significant factor in determining (a) our proper capitalization (including assessing how much debt to incur and whether changes to the capitalization should be made) and (b) whether to undertake material capital expenditures and how to finance them, all in light of our cash distribution policy. Use of EBITDA and Adjusted EBITDA as liquidity measures also permits investors to assess the fundamental ability of our business to generate cash sufficient to meet cash needs, including distributions on our common units.

Neither EBITDA nor Adjusted EBITDA, which are non-GAAP measures, should be considered as an alternative to net income, cash flow from operating activities or any other measure of financial performance or liquidity presented in accordance with GAAP. EBITDA and Adjusted EBITDA exclude some, but not all, items that affect net income and income from vessel operations and these measures may vary among other companies. Therefore, EBITDA and Adjusted EBITDA as presented in this Annual Report may not be comparable to similarly titled measures of other companies.

The following table reconciles our historical consolidated EBITDA and Adjusted EBITDA to net income, and our historical consolidated Adjusted EBITDA to net operating cash flow.

	Year Ended December 31, 2009	Year Ended December 31, 2010	Year Ended December 31, 2011	Year Ended December 31, 2012	Year Ended December 31, 2013
(in thousands of U.S. Dollars)					
<i>Reconciliation of EBITDA and Adjusted EBITDA to Net income :</i>					
Net income	81,937	92,944	97,356	139,142	213,315
Depreciation and amortization	83,180	89,841	92,413	100,474	97,884
Interest expense, net of interest income	46,584	41,829	43,193	50,709	52,731
Income tax expense	694	1,670	781	625	5,156

- (11) Calendar-ship-days are equal to the aggregate number of calendar days in a period that our vessels were in our possession during that period (including three vessels deemed to be in our possession for accounting purposes as a result of the impact of the Dropdown Predecessor prior to our actual acquisition of such vessels).
- (12) Equity accounted vessels include (i) six LNG carriers (or the *MALT LNG Carriers*) relating to our joint venture with Marubeni Corporation from 2012, (ii) four LNG carriers (or the *RasGas 3 LNG Carriers*) relating to our joint venture with QGTC Nakilat (1643-6) Holdings Corporation from 2008, (iii) four LNG carriers relating to the Angola Project (or the *Angola LNG Carriers*) in our joint venture with Mitsui & Co. Ltd. and NYK Energy Transport (Atlantic) Ltd. from 2011 and (iv) two LNG carriers (or the *Exmar LNG Carriers*) from 2010 and (v) 16 LPG carriers (or the *Exmar LPG Carriers*) from 2013 relating to our joint ventures with Exmar NV. The figures in the selected financial data for our equity accounted vessels are at a 100% and not based on our ownership percentage.

Table of Contents

(13) The number of vessels indicated do not include five LNG newbuilding carriers in our consolidated liquefied gas fleet and 12 LPG newbuilding carriers in our Exmar LPG equity accounted liquefied gas fleet.

(14) The following table details the adjustments to equity income:

	Year Ended December 31, 2009	Year Ended December 31, 2010	Year Ended December 31, 2011	Year Ended December 31, 2012	Year Ended December 31, 2013

RISK FACTORS

We may not have sufficient cash from operations to enable us to pay the current level of quarterly distributions on our common units following the establishment of cash reserves and payment of fees and expenses.

We may not have sufficient cash available each quarter to pay the current level of quarterly distributions on our common units. The amount of cash we can distribute on our common units principally depends upon the amount of cash we generate from our operations, which may fluctuate based on, among other things:

the rates we obtain from our charters;

the charterers options to terminate charter contracts;

the level of our operating costs, such as the cost of crews and insurance;

the continued availability of LNG and LPG production, liquefaction and regasification facilities;

the number of unscheduled off-hire days for our fleet and the timing of, and number of days required for, scheduled dry docking of our vessels;

delays in the delivery of newbuildings and the beginning of payments under charters relating to those vessels;

prevailing global and regional economic and political conditions;

currency exchange rate fluctuations; and

the effect of governmental regulations and maritime self-regulatory organization standards on the conduct of our business.

The actual amount of cash we will have available for distribution also will depend on factors such as:

the level of capital expenditures we make, including for maintaining vessels, building new vessels, acquiring existing vessels and complying with regulations;

our debt service requirements and restrictions on distributions contained in our debt instruments;

fluctuations in our working capital needs;

our ability to make working capital borrowings, including to pay distributions to unitholders; and

the amount of any cash reserves, including reserves for future capital expenditures and other matters, established by Teekay GP L.L.C., our general partner (or the *General Partner*) in its discretion.

Table of Contents

The amount of cash we generate from our operations may differ materially from our profit or loss for the period, which will be affected by non-cash items. As a result of this and the other factors mentioned above, we may make cash distributions during periods when we record losses and may not make cash distributions during periods when we record net income.

We make substantial capital expenditures to maintain the operating capacity of our fleet, which reduce our cash available for distribution. In addition, each quarter our General Partner is required to deduct estimated maintenance capital expenditures from operating surplus, which may result in less cash available to unitholders than if actual maintenance capital expenditures were deducted.

We must make substantial capital expenditures to maintain, over the long term, the operating capacity of our fleet. These maintenance capital expenditures include capital expenditures associated with dry docking a vessel, modifying an existing vessel or acquiring a new vessel to the extent these expenditures are incurred to maintain the operating capacity of our fleet. These expenditures could increase as a result of changes in:

the cost of labor and materials;

customer requirements;

increases in the size of our fleet;

governmental regulations and maritime self-regulatory organization standards relating to safety, security or the environment; and

competitive standards.

Our significant maintenance capital expenditures reduce the amount of cash we have available for distribution to our unitholders.

In addition, our actual maintenance capital expenditures vary significantly from quarter to quarter based on, among other things, the number of vessels dry docked during that quarter. Our partnership agreement requires our General Partner to deduct estimated, rather than actual, maintenance capital expenditures from operating surplus (as defined in our partnership agreement) each quarter in an effort to reduce fluctuations in operating surplus. The amount of estimated maintenance capital expenditures deducted from operating surplus is subject to review and change by the conflicts committee of our General Partner's board of directors at least once a year. In years when estimated maintenance capital expenditures are higher than actual maintenance capital expenditures—as we expect will be the case in the years we are not required to make expenditures for mandatory dry dockings—the amount of cash available for distribution to unitholders will be lower than if actual maintenance capital expenditures were deducted from operating surplus. If our General Partner underestimates the appropriate level of estimated maintenance capital expenditures, we may have less cash available for distribution in future periods when actual capital expenditures begin to exceed our previous estimates.

We will be required to make substantial capital expenditures to expand the size of our fleet. We generally will be required to make significant installment payments for acquisitions of newbuilding vessels prior to their delivery and generation of revenue. Depending on whether we finance our expenditures through cash from operations or by issuing debt or equity securities, our ability to make required payments on our debt securities and cash distributions on our common units may be diminished or our financial leverage could increase or our unitholders could be diluted.

We make substantial capital expenditures to increase the size of our fleet. Please read Item 5 – Operating and Financial Review and Prospects, for additional information about these acquisitions. We currently have five LNG carrier newbuildings scheduled for delivery in 2016 and 2017, with options to order up to three additional vessels, and 12 LPG carrier newbuildings scheduled for delivery between 2014 and 2018. We may also be obligated to purchase three of our leased Suezmax tankers upon the charterer’s option, which may occur at various times from 2014 through to 2018 and which have an aggregate purchase price of approximately \$95.2 million at December 31, 2013.

We and Teekay Corporation regularly evaluate and pursue opportunities to provide the marine transportation requirements for new or expanding LNG and LPG projects. The award process relating to LNG transportation opportunities typically involves various stages and takes several months to complete. Neither we nor Teekay Corporation may be awarded charters relating to any of the projects we or it pursues. If any LNG project charters are awarded to Teekay Corporation, it must offer them to us pursuant to the terms of an omnibus agreement entered into in connection with our initial public offering. If we elect pursuant to the omnibus agreement to obtain Teekay Corporation’s interests in any projects Teekay Corporation may be awarded, or if we bid on and are awarded contracts relating to any LNG and LPG project, we will need to incur significant capital expenditures to buy Teekay Corporation’s interest in these LNG and LPG projects or to build the LNG and LPG carriers.

To fund the remaining portion of existing or future capital expenditures, we will be required to use cash from operations or incur borrowings or raise capital through the sale of debt or additional equity securities. Use of cash from operations will reduce cash available for distributions to unitholders. Our ability to obtain bank financing or to access the capital markets for future offerings may be limited by our financial condition at the time of any such financing or offering as well as by adverse market conditions resulting from, among other things, general economic conditions and contingencies and uncertainties that are beyond our control. Our failure to obtain the funds for necessary future capital expenditures could have a material adverse effect on our business, results of operations and financial condition and on our ability to make cash distributions. Even if we are successful in obtaining necessary funds, the terms of such financings could limit our ability to pay cash distributions to unitholders. In addition, incurring additional debt may significantly increase our interest expense and financial leverage, and issuing additional equity securities may result in significant unitholder dilution and would increase the aggregate amount of cash required to maintain our level of quarterly distributions to unitholders, which could have a material adverse effect on our ability to make cash distributions.

A shipowner typically is required to expend substantial sums as progress payments during construction of a newbuilding, but does not derive any income from the vessel until after its delivery. If we were unable to obtain financing required to complete payments on any future newbuilding orders, we could effectively forfeit all or a portion of the progress payments previously made.

Table of Contents

Our ability to grow may be adversely affected by our cash distribution policy.

Our cash distribution policy, which is consistent with our partnership agreement, requires us to distribute all of our available cash (as defined in our partnership agreement) each quarter. Accordingly, our growth may not be as fast as businesses that reinvest their available cash to expand ongoing operations.

Our substantial debt levels may limit our flexibility in obtaining additional financing and in pursuing other business opportunities.

As at December 31, 2013, our consolidated debt, capital lease obligations and advances from affiliates totaled \$2.4 billion and we had the capacity to borrow an additional \$192.7 million under our credit facilities. These facilities may be used by us for general partnership purposes. If we are awarded contracts for new LNG or LPG projects, our consolidated debt and capital lease obligations will increase, perhaps significantly. We will continue to have the ability to incur additional debt, subject to limitations in our credit facilities. Our level of debt could have important consequences to us, including the following:

our ability to obtain additional financing, if necessary, for working capital, capital expenditures, acquisitions or other purposes may be impaired or such financing may not be available on favorable terms;

we will need a substantial portion of our cash flow to make principal and interest payments on our debt, reducing the funds that would otherwise be available for operations, future business opportunities and distributions to unitholders;

our debt level may make us more vulnerable than our competitors with less debt to competitive pressures or a downturn in our industry or the economy generally; and

our debt level may limit our flexibility in responding to changing business and economic conditions. Our ability to service our debt depends upon, among other things, our future financial and operating performance, which is affected by prevailing economic conditions and financial, business, regulatory and other factors, some of which are beyond our control. If our operating results are not sufficient to service our current or future indebtedness, we will be forced to take actions such as reducing distributions, reducing or delaying our business activities, acquisitions, investments or capital expenditures, selling assets, restructuring or refinancing our debt, or seeking additional equity capital or bankruptcy protection. We may not be able to effect any of these remedies on satisfactory terms, or at all.

Financing agreements containing operating and financial restrictions may restrict our business and financing activities.

The operating and financial restrictions and covenants in our financing arrangements and any future financing agreements for us could adversely affect our ability to finance future operations or capital needs or to engage, expand or pursue our business activities. For example, the arrangements may restrict our ability to:

incur or guarantee indebtedness;

change ownership or structure, including mergers, consolidations, liquidations and dissolutions;

make dividends or distributions when in default of the relevant loans;

make certain negative pledges and grant certain liens;

sell, transfer, assign or convey assets;

make certain investments; and

enter into a new line of business.

Some of our financing arrangements require us to maintain a minimum level of tangible net worth, to maintain certain ratios of vessel values as it relates to the relevant outstanding principal balance, a minimum level of aggregate liquidity, a maximum level of leverage and require one of our subsidiaries to maintain restricted cash deposits. Our ability to comply with covenants and restrictions contained in debt instruments may be affected by events beyond our control, including prevailing economic, financial and industry conditions. If market or other economic conditions deteriorate, compliance with these covenants may be impaired. If restrictions, covenants, ratios or tests in the financing agreements are breached, a significant portion of the obligations may become immediately due and payable, and the lenders' commitment to make further loans may terminate. We might not have or be able to obtain sufficient funds to make these accelerated payments. In addition, our obligations under our existing credit facilities are secured by certain of our vessels, and if we are unable to repay debt under the credit facilities, the lenders could seek to foreclose on those assets.

Restrictions in our debt agreements may prevent us from paying distributions.

The payment of principal and interest on our debt and capital lease obligations reduces cash available for distribution to us and on our units. In addition, our financing agreements prohibit the payment of distributions upon the occurrence of the following events, among others:

failure to pay any principal, interest, fees, expenses or other amounts when due;

failure to notify the lenders of any material oil spill or discharge of hazardous material, or of any action or claim related thereto;

breach or lapse of any insurance with respect to vessels securing the facility;

breach of certain financial covenants;

failure to observe any other agreement, security instrument, obligation or covenant beyond specified cure periods in certain cases;

Table of Contents

default under other indebtedness;

bankruptcy or insolvency events;

failure of any representation or warranty to be materially correct;

a change of control, as defined in the applicable agreement; and

a material adverse effect, as defined in the applicable agreement.

We derive a substantial majority of our revenues from a limited number of customers, and the loss of any customer, charter or vessel, or any adjustment to our charter contracts could result in a significant loss of revenues and cash flow.

We have derived, and believe that we will continue to derive, a significant portion of our revenues and cash flow from a limited number of customers. Please read Item 18 Financial Statements: Note 3 Segment Reporting.

We could lose a customer or the benefits of a time-charter if:

the customer fails to make charter payments because of its financial inability, disagreements with us or otherwise;

we decrease charter payments due under a charter because of the customer's inability to continue making the original payments;

the customer exercises certain rights to terminate the charter, purchase or cause the sale of the vessel or, under some of our charters, convert the time-charter to a bareboat charter (some of which rights are exercisable at any time);

the customer terminates the charter because we fail to deliver the vessel within a fixed period of time, the vessel is lost or damaged beyond repair, there are serious deficiencies in the vessel or prolonged periods of off-hire, or we default under the charter; or

under some of our time-charters, the customer terminates the charter because of the termination of the charterer's sales agreement or a prolonged force majeure event affecting the customer, including damage to or destruction of relevant facilities, war or political unrest preventing us from performing services for that customer.

If we lose a key LNG time-charter, we may be unable to re-deploy the related vessel on terms as favorable to us due to the long-term nature of most LNG time-charters and the lack of an established LNG spot market. If we are unable to

re-deploy a LNG carrier, we will not receive any revenues from that vessel, but we may be required to pay expenses necessary to maintain the vessel in proper operating condition. In addition, if a customer exercises its right to purchase a vessel, we would not receive any further revenue from the vessel and may be unable to obtain a substitute vessel and charter. This may cause us to receive decreased revenue and cash flows from having fewer vessels operating in our fleet. Any compensation under our charters for a purchase of the vessels may not adequately compensate us for the loss of the vessel and related time-charter.

If we lose a key conventional tanker customer, we may be unable to obtain other long-term conventional charters and may become subject to the volatile spot market, which is highly competitive and subject to significant price fluctuations. If a customer exercises its right under some charters to purchase or force a sale of the vessel, we may be unable to acquire an adequate replacement vessel or may be forced to construct a new vessel. Any replacement newbuilding would not generate revenues during its construction and we may be unable to charter any replacement vessel on terms as favorable to us as those of the terminated charter.

The loss of certain of our customers, time-charters or vessels, or a decline in payments under our charters, could have a material adverse effect on our business, results of operations and financial condition and our ability to make cash distributions.

We depend on Teekay Corporation and certain of our joint venture partners to assist us in operating our business and competing in our markets.

Pursuant to certain services agreements between us and certain of our operating subsidiaries, on the one hand, and certain subsidiaries of Teekay Corporation and certain of our joint venture partners, on the other hand, the Teekay Corporation subsidiaries and certain of our joint venture partners provide to us administrative and business development services and to our operating subsidiaries significant operational services (including vessel maintenance, crewing for some of our vessels, purchasing, shipyard supervision, insurance and financial services) and other technical, advisory and administrative services. Our operational success and ability to execute our growth strategy depend significantly upon Teekay Corporation's and certain of our joint venture partners' satisfactory performance of these services. Our business will be harmed if Teekay Corporation or certain of our joint venture partners fails to perform these services satisfactorily or if Teekay Corporation or certain of our joint venture partners stops providing these services to us.

Our ability to compete for the transportation requirements of LNG and oil projects and to enter into new time-charters and expand our customer relationships depends largely on our ability to leverage our relationship with Teekay Corporation and its reputation and relationships in the shipping industry. Our ability to compete for the transportation requirement of LPG projects and to enter into new charters and expand our customer relationships depends largely on our ability to leverage our relationship with one of our joint venture partners and their reputation and relationships in the shipping industry. If Teekay Corporation or certain of our joint venture partners suffer material damage to its reputation or relationships it may harm our ability to:

renew existing charters upon their expiration;

obtain new charters;

Table of Contents

successfully interact with shipyards during periods of shipyard construction constraints;

obtain financing on commercially acceptable terms; or

maintain satisfactory relationships with our employees and suppliers.

If our ability to do any of the things described above is impaired, it could have a material adverse effect on our business, results of operations and financial condition and our ability to make cash distributions.

Our operating subsidiaries may also contract with certain subsidiaries of Teekay Corporation and certain of our joint venture partners to have newbuildings constructed on behalf of our operating subsidiaries and to incur the construction-related financing. Our operating subsidiaries would purchase the vessels on or after delivery based on an agreed-upon price. None of our operating subsidiaries currently has this type of arrangement with Teekay Corporation or any of its affiliates or any joint venture partners.

Our main growth depends on continued growth in demand for LNG and LPG shipping.

Our growth strategy focuses on continued expansion in the LNG and LPG shipping sectors. Accordingly, our growth depends on continued growth in world and regional demand for LNG and LPG and marine transportation of LNG and LPG, as well as the supply of LNG and LPG. Demand for LNG and LPG and for the marine transportation of LNG and LPG could be negatively affected by a number of factors, such as:

increases in the cost of natural gas derived from LNG relative to the cost of natural gas generally;

increase in the cost of LPG relative to the cost of naphtha and other competing petrochemicals;

increases in the production of natural gas in areas linked by pipelines to consuming areas, the extension of existing, or the development of new, pipeline systems in markets we may serve, or the conversion of existing non-natural gas pipelines to natural gas pipelines in those markets;

decreases in the consumption of natural gas due to increases in its price relative to other energy sources or other factors making consumption of natural gas less attractive;

additional sources of natural gas, including shale gas;

availability of alternative energy sources; and

negative global or regional economic or political conditions, particularly in LNG and LPG consuming regions, which could reduce energy consumption or its growth.

Reduced demand for LNG and LPG shipping would have a material adverse effect on our future growth and could harm our business, results of operations and financial condition.

Changes in the oil markets could result in decreased demand for our conventional vessels and services in the future.

Demand for our vessels and services in transporting oil depends upon world and regional oil markets. Any decrease in shipments of crude oil in those markets could have a material adverse effect on our conventional tanker business. Upon completion of the remaining charter terms for our conventional tankers, any adverse changes in the oil markets may affect our ability to enter into long-term fixed-rate contracts for our conventional tankers. Historically, those markets have been volatile as a result of the many conditions and events that affect the price, production and transport of oil, including competition from alternative energy sources. Past slowdowns of the U.S. and world economies have resulted in reduced consumption of oil products and decreased demand for vessels and services, which reduced vessel earnings. Additional slowdowns could have similar effects on our operating results.

Changes in the LPG markets could result in decreased demand for our LPG vessels operating in the spot market.

We have several LPG carriers either owned or chartered-in by the Exmar LPG Joint Venture that operate in the LPG spot market. The charters in the spot market operate for short durations and are priced on a current, or spot, market rate. Consequently, the LPG spot market is highly volatile and fluctuates based upon the many conditions and events that affect the price, production and transport of LPG, including competition from alternative energy sources and negative global or regional economic or political conditions. Any adverse changes in the LPG markets may impact our ability to enter into economically beneficial charters when our LPG carriers complete their existing short-term charters in the LPG spot market, which may reduce vessel earnings and impact our operating results.

Growth of the LNG market may be limited by infrastructure constraints and community environmental group resistance to new LNG infrastructure over concerns about the environment, safety and terrorism.

A complete LNG project includes production, liquefaction, regasification, storage and distribution facilities and LNG carriers. Existing LNG projects and infrastructure are limited, and new or expanded LNG projects are highly complex and capital-intensive, with new projects often costing several billion dollars. Many factors could negatively affect continued development of LNG infrastructure or disrupt the supply of LNG, including:

increases in interest rates or other events that may affect the availability of sufficient financing for LNG projects on commercially reasonable terms;

decreases in the price of LNG, which might decrease the expected returns relating to investments in LNG projects;

the inability of project owners or operators to obtain governmental approvals to construct or operate LNG facilities;

Table of Contents

local community resistance to proposed or existing LNG facilities based on safety, environmental or security concerns;

any significant explosion, spill or similar incident involving an LNG facility or LNG carrier; and

labor or political unrest affecting existing or proposed areas of LNG production.

If the LNG supply chain is disrupted or does not continue to grow, or if a significant LNG explosion, spill or similar incident occurs, it could have a material adverse effect on our business, results of operations and financial condition and our ability to make cash distributions.

Our growth depends on our ability to expand relationships with existing customers and obtain new customers, for which we will face substantial competition.

One of our principal objectives is to enter into additional long-term, fixed-rate LNG, LPG and oil charters. The process of obtaining new long-term charters is highly competitive and generally involves an intensive screening process and competitive bids, and often extends for several months. Shipping contracts are awarded based upon a variety of factors relating to the vessel operator, including:

shipping industry relationships and reputation for customer service and safety;

shipping experience and quality of ship operations (including cost effectiveness);

quality and experience of seafaring crew;

the ability to finance carriers at competitive rates and financial stability generally;

relationships with shipyards and the ability to get suitable berths;

construction management experience, including the ability to obtain on-time delivery of new vessels according to customer specifications;

willingness to accept operational risks pursuant to the charter, such as allowing termination of the charter for force majeure events; and

competitiveness of the bid in terms of overall price.

We compete for providing marine transportation services for potential energy projects with a number of experienced companies, including state-sponsored entities and major energy companies affiliated with the energy project requiring

energy shipping services. Many of these competitors have significantly greater financial resources than we do or Teekay Corporation does. We anticipate that an increasing number of marine transportation companies including many with strong reputations and extensive resources and experience will enter the energy transportation sector. This increased competition may cause greater price competition for time-charters. As a result of these factors, we may be unable to expand our relationships with existing customers or to obtain new customers on a profitable basis, if at all, which would have a material adverse effect on our business, results of operations and financial condition and our ability to make cash distributions.

Table of Contents

Delays in deliveries of newbuildings could harm our operating results and lead to the termination of related charters.

The delivery of newbuildings we may order or otherwise acquire, could be delayed, which would delay our receipt of revenues under the charters for the vessels. In addition, under some of our charters if delivery of a vessel to our customer is delayed, we may be required to pay liquidated damages in amounts equal to or, under some charters, almost double, the hire rate during the delay. For prolonged delays, the customer may terminate the time-charter and, in addition to the resulting loss of revenues, we may be responsible for additional, substantial liquidated damages.

Our receipt of newbuildings could be delayed because of:

quality or engineering problems;

changes in governmental regulations or maritime self-regulatory organization standards;

work stoppages or other labor disturbances at the shipyard;

bankruptcy or other financial crisis of the shipbuilder;

a backlog of orders at the shipyard;

political or economic disturbances where our vessels are being or may be built;

weather interference or catastrophic event, such as a major earthquake or fire;

our requests for changes to the original vessel specifications;

shortages of or delays in the receipt of necessary construction materials, such as steel;

our inability to finance the purchase or construction of the vessels; or

our inability to obtain requisite permits or approvals.

If delivery of a vessel is materially delayed, it could adversely affect our results or operations and financial condition and our ability to make cash distributions.

We may be unable to secure long-term charters for our LNG newbuildings before their scheduled deliveries.

In July and November 2013, we entered into agreements with Daewoo Shipbuilding & Marine Engineering Co., Ltd. of South Korea for the construction of three LNG newbuildings that are expected to deliver in 2017 (with the option to order up to three additional vessels), without having secured corresponding long-term charters. The process of obtaining new long-term charters is highly competitive. Consequently, we may be unable to secure long-term charters for these or other newbuildings we may order before their scheduled delivery, if at all, which could harm our business, results of operations and financial condition and our ability to make cash distributions.

We may be unable to recharter vessels at attractive rates, which may lead to reduced revenues and profitability.

Our ability to recharter our LNG and LPG carriers upon the expiration or termination of their current time charters and the charter rates payable under any renewal or replacement charters will depend upon, among other things, the then current states of the LNG and LPG carrier markets. The charters for two of our LNG carriers are scheduled to expire in 2015 and 2016, respectively. If charter rates are low when existing time charters expire, we may be required to recharter our vessels at reduced rates or even possibly at a rate whereby we incur a loss, which would harm our results of operations. Alternatively, we may determine to leave such vessels off-charter. The size of the current orderbooks for LNG carriers and LPG carriers is expected to result in the increase in the size of the world LNG and LPG fleets over the next few years. An over-supply of vessel capacity, combined with stability or any decline in the demand for LNG or LPG carriers, may result in a reduction of charter hire rates.

We may have more difficulty entering into long-term, fixed-rate LNG time-charters if an active short-term, medium-term or spot LNG shipping market develops.

LNG shipping historically has been transacted with long-term, fixed-rate time-charters, usually with terms ranging from 20 to 25 years. One of our principal strategies is to enter into additional long-term, fixed-rate LNG time-charters. In recent years the number of spot, short-term and medium-term LNG charters of under four years has been increasing. In 2012, they accounted for approximately 25% of global LNG trade.

If an active spot, short-term or medium-term market continues to develop, we may have increased difficulty entering into long-term, fixed-rate time-charters for our LNG carriers and, as a result, our cash flow may decrease and be less stable. In addition, an active short-term, medium-term or spot LNG market may require us to enter into charters based on changing market prices, as opposed to contracts based on a fixed rate, which could result in a decrease in our cash flow in periods when the market price for shipping LNG is depressed.

Over time vessel values may fluctuate substantially and, if these values are lower at a time when we are attempting to dispose of a vessel, we may incur a loss.

Vessel values for LNG and LPG carriers and conventional tankers can fluctuate substantially over time due to a number of different factors, including:

prevailing economic conditions in natural gas, oil and energy markets;

a substantial or extended decline in demand for natural gas, LNG, LPG or oil;

increases in the supply of vessel capacity; and

the cost of retrofitting or modifying existing vessels, as a result of technological advances in vessel design or equipment, changes in applicable environmental or other regulation or standards, or otherwise.

Vessel values have declined over the past few years. If a charter terminates, we may be unable to re-deploy the vessel at attractive rates and, rather than continue to incur costs to maintain and finance it, may seek to dispose of it. Our inability to dispose of the vessel at a reasonable value could result in a loss on its sale and adversely affect our results of operations and financial condition.

Increased technological innovation in vessel design or equipment could reduce our charter hire rates and the value of our vessels.

The charter hire rates and the value and operational life of a vessel are determined by a number of factors, including the vessel's efficiency, operational flexibility and physical life. Efficiency includes speed, fuel economy and the ability for LNG or LPG to be loaded and unloaded quickly. More efficient vessel designs, engines or other features may increase efficiency. Flexibility includes the ability to access LNG and LPG storage facilities, utilize related docking facilities and pass through canals and straits. Physical life is related to the original design and construction, maintenance and the impact of the stress of operations. If new LNG or LPG carriers are built that are more efficient or flexible or have longer physical lives than our vessels, competition from these more technologically advanced LNG or LPG carriers could reduce recharter rates available to our vessels and the resale value of the vessels. As a result, our business, results of operations and financial condition could be harmed.

We may be unable to realize expected benefits from investments in new technologies, including newer engine, designs.

Some participants in the shipping industry are implementing, or assessing the implementation of, new technologies, including more fuel efficient vessel designs, engines and other features. We are investing in technology upgrades such as M-type, Electronically Controlled, Gas Injection twin engines for certain LNG carrier newbuildings. Investments in new technologies may not result in expected increased acceptance of vessels by customers or in cost reductions sufficient to justify our investment.

Table of Contents

We may be unable to make or realize expected benefits from acquisitions, and implementing our growth strategy through acquisitions may harm our business, financial condition and operating results.

Our growth strategy includes selectively acquiring existing LNG and LPG carriers or LNG and LPG shipping businesses. Historically, there have been very few purchases of existing vessels and businesses in the LNG and LPG shipping industries. Factors that may contribute to a limited number of acquisition opportunities in the LNG and LPG industries in the near term include the relatively small number of independent LNG and LPG fleet owners and the limited number of LNG and LPG carriers not subject to existing long-term charter contracts. In addition, competition from other companies could reduce our acquisition opportunities or cause us to pay higher prices.

Any acquisition of a vessel or business may not be profitable to us at or after the time we acquire it and may not generate cash flow sufficient to justify our investment. In addition, our acquisition growth strategy exposes us to risks that may harm our business, financial condition and operating results, including risks that we may:

fail to realize anticipated benefits, such as new customer relationships, cost-savings or cash flow enhancements;

be unable to hire, train or retain qualified shore and seafaring personnel to manage and operate our growing business and fleet;

decrease our liquidity by using a significant portion of our available cash or borrowing capacity to finance acquisitions;

significantly increase our interest expense or financial leverage if we incur additional debt to finance acquisitions;

incur or assume unanticipated liabilities, losses or costs associated with the business or vessels acquired; or

incur other significant charges, such as impairment of goodwill or other intangible assets, asset devaluation or restructuring charges.

Unlike newbuildings, existing vessels typically do not carry warranties as to their condition. While we generally inspect existing vessels prior to purchase, such an inspection would normally not provide us with as much knowledge of a vessel's condition as we would possess if it had been built for us and operated by us during its life. Repairs and maintenance costs for existing vessels are difficult to predict and may be substantially higher than for vessels we have operated since they were built. These costs could decrease our cash flow and reduce our liquidity.

Our insurance may be insufficient to cover losses that may occur to our property or result from our operations.

The operation of LNG and LPG carriers and oil tankers is inherently risky. Although we carry hull and machinery (marine and war risks) and protection and indemnity insurance, all risks may not be adequately insured against, and any particular claim may not be paid. In addition, only certain of our LNG carriers carry insurance covering the loss of

revenues resulting from vessel off-hire time based on its cost compared to our off-hire experience. Any significant off-hire time of our vessels could harm our business, operating results and financial condition. Any claims covered by insurance would be subject to deductibles, and since it is possible that a large number of claims may be brought, the aggregate amount of these deductibles could be material. Certain of our insurance coverage is maintained through mutual protection and indemnity associations, and as a member of such associations we may be required to make additional payments over and above budgeted premiums if member claims exceed association reserves.

We may be unable to procure adequate insurance coverage at commercially reasonable rates in the future. For example, more stringent environmental regulations have led in the past to increased costs for, and in the future may result in the lack of availability of, insurance against risks of environmental damage or pollution. A catastrophic oil spill, marine disaster or natural disasters could result in losses that exceed our insurance coverage, which could harm our business, financial condition and operating results. Any uninsured or underinsured loss could harm our business and financial condition. In addition, our insurance may be voidable by the insurers as a result of certain of our actions, such as our ships failing to maintain certification with applicable maritime self-regulatory organizations.

Changes in the insurance markets attributable to terrorist attacks may also make certain types of insurance more difficult for us to obtain. In addition, the insurance that may be available may be significantly more expensive than our existing coverage.

Terrorist attacks, piracy, increased hostilities or war could lead to further economic instability, increased costs and disruption of our business.

Terrorist attacks, piracy, and the current conflicts in the Middle East, and other current and future conflicts, may adversely affect our business, operating results, financial condition, ability to raise capital and future growth. Continuing hostilities in the Middle East may lead to additional armed conflicts or to further acts of terrorism and civil disturbance in the United States, or elsewhere, which may contribute to economic instability and disruption of LNG, LPG and oil production and distribution, which could result in reduced demand for our services.

In addition, LNG, LPG and oil facilities, shipyards, vessels, pipelines and oil and gas fields could be targets of future terrorist attacks and our vessels could be targets of pirates or hijackers. Any such attacks could lead to, among other things, bodily injury or loss of life, vessel or other property damage, increased vessel operational costs, including insurance costs, and the inability to transport LNG, LPG and oil to or from certain locations. Terrorist attacks, war, piracy, hijacking or other events beyond our control that adversely affect the distribution, production or transportation of LNG, LPG or oil to be shipped by us could entitle our customers to terminate our charter contracts, which would harm our cash flow and our business.

Terrorist attacks, or the perception that LNG or LPG facilities and carriers are potential terrorist targets, could materially and adversely affect expansion of LNG and LPG infrastructure and the continued supply of LNG and LPG to the United States and other countries. Concern that LNG or LPG facilities may be targeted for attack by terrorists has contributed to significant community and environmental resistance to the construction of a number of LNG or LPG facilities, primarily in North America. If a terrorist incident involving an LNG or LPG facility or LNG or LPG carrier did occur, in addition to the possible effects identified in the previous paragraph, the incident may adversely affect construction of additional LNG or LPG facilities in the United States and other countries or lead to the temporary or permanent closing of various LNG or LPG facilities currently in operation.

Table of Contents

Acts of piracy on ocean-going vessels have recently increased in frequency, which could adversely affect our business.

Acts of piracy have historically affected ocean-going vessels trading in regions of the world such as the South China Sea and the Indian Ocean off the coast of Somalia. While there continue to be significant numbers of piracy incidents in the Gulf of Aden and Indian Ocean, recently there have been increases in the frequency and severity of piracy incidents off the coast of West Africa. If these piracy attacks result in regions in which our vessels are deployed being named on the Joint War Committee Listed Areas, war risk insurance premiums payable for such coverage can increase significantly and such insurance coverage may be more difficult to obtain. In addition, crew costs, including costs which may be incurred to the extent we employ on-board security guards, could increase in such circumstances. We may not be adequately insured to cover losses from these incidents, which could have a material adverse effect on us. In addition, hijacking as a result of an act of piracy against our vessels, or an increase in cost or unavailability of insurance for our vessels, could have a material adverse impact on our business, financial condition and results of operations.

Our substantial operations outside the United States expose us to political, governmental and economic instability, which could harm our operations.

Because our operations are primarily conducted outside of the United States, they may be affected by economic, political and governmental conditions in the countries where we engage in business. Any disruption caused by these factors could harm our business, including by reducing the levels of oil and gas exploration, development and production activities in these areas. We derive some of our revenues from shipping oil, LNG and LPG from politically and economically unstable regions, such as Angola and Yemen. Hostilities, strikes, or other political or economic instability in regions where we operate or where we may operate could have a material adverse effect on the growth of our business, results of operations and financial condition and ability to make cash distributions. In addition, tariffs, trade embargoes and other economic sanctions by the United States or other countries against countries in which we operate or to which we trade may harm our business and ability to make cash distributions. Finally, a government could requisition one or more of our vessels, which is most likely during war or national emergency. Any such requisition would cause a loss of the vessel and could harm our cash flow and financial results.

We assume a credit risk by entering into charter agreements with unrated entities.

Some of our vessels are chartered to unrated entities, such as the four LNG carriers chartered to Angola LNG Supply Services LLC and the two LNG carriers chartered to Yemen LNG Company Limited. Some of these unrated entities will use revenue generated from the sale of the shipped gas to pay their shipping and other operating expenses, including the charter fees. The price of the gas may be subject to market fluctuations and the LNG supply may be curtailed by start-up delays and stoppages. If the revenue generated by the charterer is insufficient to pay the charter fees, we may be unable to realize the expected economic benefit from these charter agreements.

Table of Contents

Marine transportation is inherently risky, and an incident involving significant loss of or environmental contamination by any of our vessels could harm our reputation and business.

Our vessels and their cargoes are at risk of being damaged or lost because of events such as:

marine disasters;

bad weather or natural disasters;

mechanical failures;

grounding, fire, explosions and collisions;

piracy;

human error; and

war and terrorism.

An accident involving any of our vessels could result in any of the following:

death or injury to persons, loss of property or environmental damage;

delays in the delivery of cargo;

loss of revenues from or termination of charter contracts;

governmental fines, penalties or restrictions on conducting business;

higher insurance rates; and

damage to our reputation and customer relationships generally.

Any of these results could have a material adverse effect on our business, financial condition and operating results.

The marine energy transportation industry is subject to substantial environmental and other regulations, which may significantly limit our operations or increase our expenses.

Our operations are affected by extensive and changing international, national and local environmental protection laws, regulations, treaties and conventions in force in international waters, the jurisdictional waters of the countries in which our vessels operate, as well as the countries of our vessels' registration, including those governing oil spills, discharges to air and water, and the handling and disposal of hazardous substances and wastes. Many of these requirements are designed to reduce the risk of oil spills and other pollution. In addition, we believe that the heightened environmental, quality and security concerns of insurance underwriters, regulators and charterers will lead to additional regulatory requirements, including enhanced risk assessment and security requirements and greater inspection and safety requirements on vessels. We expect to incur substantial expenses in complying with these laws and regulations, including expenses for vessel modifications and changes in operating procedures.

These requirements can affect the resale value or useful lives of our vessels, require a reduction in cargo capacity, ship modifications or operational changes or restrictions, lead to decreased availability of insurance coverage for environmental matters or result in the denial of access to certain jurisdictional waters or ports, or detention in, certain ports. Under local, national and foreign laws, as well as international treaties and conventions, we could incur material liabilities, including cleanup obligations, in the event that there is a release of petroleum or other hazardous substances from our vessels or otherwise in connection with our operations. We could also become subject to personal injury or property damage claims relating to the release of or exposure to hazardous materials associated with our operations. In addition, failure to comply with applicable laws and regulations may result in administrative and civil penalties, criminal sanctions or the suspension or termination of our operations, including, in certain instances, seizure or detention of our vessels. For further information about regulations affecting our business and related requirements on us, please read Item 4 Information on the Partnership: C. Regulations.

Climate change and greenhouse gas restrictions may adversely impact our operations and markets.

Due to concern over the risk of climate change, a number of countries have adopted, or are considering the adoption of, regulatory frameworks to reduce greenhouse gas emissions. These regulatory measures include, among others, adoption of cap and trade regimes, carbon taxes, increased efficiency standards, and incentives or mandates for renewable energy. Compliance with changes in laws, regulations and obligations relating to climate change could increase our costs related to operating and maintaining our vessels and require us to install new emission controls, acquire allowances or pay taxes related to our greenhouse gas emissions, or administer and manage a greenhouse gas emissions program. Revenue generation and strategic growth opportunities may also be adversely affected.

Adverse effects upon the oil and gas industry relating to climate change may also adversely affect demand for our services. Although we do not expect that demand for oil and gas will lessen dramatically over the short term, in the long term climate change may reduce the demand for oil and gas or increased regulation of greenhouse gases may create greater incentives for use of alternative energy sources. Any long-term material adverse effect on the oil and gas industry could have a significant financial and operational adverse impact on our business that we cannot predict with certainty at this time.

Table of Contents

Exposure to currency exchange rate fluctuations will result in fluctuations in our cash flows and operating results.

We are paid in Euros under some of our charters, and certain of our vessel operating expenses and general and administrative expenses currently are denominated in Euros, which is primarily a function of the nationality of our crew and administrative staff. We also make payments under two Euro-denominated term loans. If the amount of our Euro-denominated obligations exceeds our Euro-denominated revenues, we must convert other currencies, primarily the U.S. Dollar, into Euros. An increase in the strength of the Euro relative to the U.S. Dollar would require us to convert more U.S. Dollars to Euros to satisfy those obligations, which would cause us to have less cash available for distribution. In addition, if we do not have sufficient U.S. Dollars, we may be required to convert Euros into U.S. Dollars for distributions to unitholders. An increase in the strength of the U.S. Dollar relative to the Euro could cause us to have less cash available for distribution in this circumstance. We have not entered into currency swaps or forward contracts or similar derivatives to mitigate this risk.

Because we report our operating results in U.S. Dollars, changes in the value of the U.S. Dollar relative to the Euro and Norwegian Kroner also result in fluctuations in our reported revenues and earnings. In addition, under U.S. accounting guidelines, all foreign currency-denominated monetary assets and liabilities such as cash and cash equivalents, accounts receivable, restricted cash, accounts payable, long-term debt and capital lease obligations, are revalued and reported based on the prevailing exchange rate at the end of the period. This revaluation historically has caused us to report significant non-monetary foreign currency exchange gains or losses each period. The primary source for these gains and losses is our Euro-denominated term loans and our Norwegian Kroner-denominated bonds. We have entered into foreign currency forward contracts to economically hedge portions of our forecasted expenditures denominated in Norwegian Kroner. We also incur interest expense on our Norwegian Kroner-denominated bonds. We have entered into cross-currency swaps to economically hedge the foreign exchange risk on the principal and interest payments of our Norwegian Kroner bonds.

Many of our seafaring employees are covered by collective bargaining agreements and the failure to renew those agreements or any future labor agreements may disrupt our operations and adversely affect our cash flows.

A significant portion of our seafarers, and the seafarers employed by Teekay Corporation and its other affiliates that crew some of our vessels, are employed under collective bargaining agreements. While some of our labor agreements have recently been renewed, crew compensation levels under future collective bargaining agreements may exceed existing compensation levels, which would adversely affect our results of operations and cash flows. We may be subject to labor disruptions in the future if our relationships deteriorate with our seafarers or the unions that represent them. Our collective bargaining agreements may not prevent labor disruptions, particularly when the agreements are being renegotiated. Any labor disruptions could harm our operations and could have a material adverse effect on our business, results of operations and financial condition and our ability to make cash distributions.

Teekay Corporation and certain of our joint venture partners may be unable to attract and retain qualified, skilled employees or crew necessary to operate our business, or may have to pay substantially increased costs for its employees and crew.

Our success depends in large part on Teekay Corporation's and certain of our joint venture partners' ability to attract and retain highly skilled and qualified personnel. In crewing our vessels, we require technically skilled employees with specialized training who can perform physically demanding work. The ability to attract and retain qualified crew members under a competitive industry environment continues to put upward pressure on crew manning costs.

If we are not able to increase our charter rates to compensate for any crew cost increases, our financial condition and results of operations may be adversely affected. Any inability we experience in the future to hire, train and retain a

sufficient number of qualified employees could impair our ability to manage, maintain and grow our business.

Due to our lack of diversification, adverse developments in our LNG, LPG or oil marine transportation businesses could reduce our ability to make distributions to our unitholders.

We rely exclusively on the cash flow generated from our LNG and LPG carriers and conventional oil tankers that operate in the LNG, LPG and oil marine transportation business. Due to our lack of diversification, an adverse development in the LNG, LPG or oil shipping industry would have a significantly greater impact on our financial condition and results of operations than if we maintained more diverse assets or lines of business.

Teekay Corporation and its affiliates may engage in competition with us.

Teekay Corporation and its affiliates, including Teekay Offshore Partners L.P. (or *Teekay Offshore*), may engage in competition with us. Pursuant to an omnibus agreement between Teekay Corporation, Teekay Offshore, us and other related parties, Teekay Corporation, Teekay Offshore and their respective controlled affiliates (other than us and our subsidiaries) generally have agreed not to own, operate or charter LNG carriers without the consent of our General Partner. The omnibus agreement, however, allows Teekay Corporation, Teekay Offshore or any of such controlled affiliates to:

acquire LNG carriers and related time-charters as part of a business if a majority of the value of the total assets or business acquired is not attributable to the LNG carriers and time-charters, as determined in good faith by the board of directors of Teekay Corporation or the board of directors of Teekay Offshore's general partner; however, if at any time Teekay Corporation or Teekay Offshore completes such an acquisition, it must offer to sell the LNG carriers and related time-charters to us for their fair market value plus any additional tax or other similar costs to Teekay Corporation or Teekay Offshore that would be required to transfer the LNG carriers and time-charters to us separately from the acquired business; or

own, operate and charter LNG carriers that relate to a bid or award for an LNG project that Teekay Corporation or any of its subsidiaries submits or receives; however, at least 180 days prior to the scheduled delivery date of any such LNG carrier, Teekay Corporation must offer to sell the LNG carrier and related time-charter to us, with the vessel valued at its fully-built-up cost, which represents the aggregate expenditures incurred (or to be incurred prior to delivery to us) by Teekay Corporation to acquire or construct and bring such LNG carrier to the condition and location necessary for our intended use, plus a reasonable allocation of overhead costs related to the development of such a project and other projects that would have been subject to the offer rights set forth in the omnibus agreement but were not completed.

Table of Contents

If we decline the offer to purchase the LNG carriers and time-charters described above, Teekay Corporation or Teekay Offshore may own and operate the LNG carriers, but may not expand that portion of its business.

In addition, pursuant to the omnibus agreement, Teekay Corporation, Teekay Offshore or any of their respective controlled affiliates (other than us and our subsidiaries) may:

acquire, operate or charter LNG carriers if our General Partner has previously advised Teekay Corporation or Teekay Offshore that the board of directors of our General Partner has elected, with the approval of the conflicts committee of its board of directors, not to cause us or our subsidiaries to acquire or operate the carriers;

acquire up to a 9.9% equity ownership, voting or profit participation interest in any publicly traded company that owns or operate LNG carriers; and

provide ship management services relating to LNG carriers.

If there is a change of control of Teekay Corporation or Teekay Offshore, the non-competition provisions of the omnibus agreement may terminate, which termination could have a material adverse effect on our business, results of operations and financial condition and our ability to make cash distributions.

Our General Partner and its other affiliates have conflicts of interest and limited fiduciary duties, which may permit them to favor their own interests to those of unitholders.

Teekay Corporation, which owns and controls our General Partner, indirectly owns our 2% General Partner interest and as at December 31, 2013 owned a 34.0% limited partner interest in us. Conflicts of interest may arise between Teekay Corporation and its affiliates, including our General Partner, on the one hand, and us and our unitholders, on the other hand. As a result of these conflicts, our General Partner may favor its own interests and the interests of its affiliates over the interests of our unitholders. These conflicts include, among others, the following situations:

neither our partnership agreement nor any other agreement requires our General Partner or Teekay Corporation to pursue a business strategy that favors us or utilizes our assets, and Teekay Corporation's officers and directors have a fiduciary duty to make decisions in the best interests of the stockholders of Teekay Corporation, which may be contrary to our interests;

the executive officers and three of the directors of our General Partner also currently serve as executive officers or directors of Teekay Corporation;

our General Partner is allowed to take into account the interests of parties other than us, such as Teekay Corporation, in resolving conflicts of interest, which has the effect of limiting its fiduciary duty to our unitholders;

our General Partner has limited its liability and reduced its fiduciary duties under the laws of the Marshall Islands, while also restricting the remedies available to our unitholders, and as a result of purchasing common units, unitholders are treated as having agreed to the modified standard of fiduciary duties and to certain actions that may be taken by our General Partner, all as set forth in our partnership agreement;

our General Partner determines the amount and timing of our asset purchases and sales, capital expenditures, borrowings, issuances of additional partnership securities and reserves, each of which can affect the amount of cash that is available for distribution to our unitholders;

in some instances our General Partner may cause us to borrow funds in order to permit the payment of cash distributions, even if the purpose or effect of the borrowing is to make incentive distributions to affiliates to Teekay Corporation;

our General Partner determines which costs incurred by it and its affiliates are reimbursable by us;

our partnership agreement does not restrict our General Partner from causing us to pay it or its affiliates for any services rendered to us on terms that are fair and reasonable or entering into additional contractual arrangements with any of these entities on our behalf;

our General Partner controls the enforcement of obligations owed to us by it and its affiliates; and

our General Partner decides whether to retain separate counsel, accountants or others to perform services for us.

Certain of our lease arrangements contain provisions whereby we have provided a tax indemnification to third parties, which may result in increased lease payments or termination of favorable lease arrangements.

We and a joint venture partner are the lessee under 30-year capital lease arrangements with a third party for three LNG carriers. Under the terms of these capital lease arrangements, the lessor claims tax depreciation on the capital expenditures it incurred to acquire these vessels. As is typical in these leasing arrangements, tax and change of law risks are assumed by the lessee. The rentals payable under the lease arrangements are predicated on the basis of certain tax and financial assumptions at the commencement of the leases. If an assumption proves to be incorrect or there is a change in the applicable tax legislation or the interpretation thereof by the United Kingdom (U.K.) taxing authority, the lessor is entitled to increase the rentals so as to maintain its agreed after-tax margin. We do not have the ability to pass these increased rentals onto our charter party. However, the terms of the lease arrangements enable us and our joint venture partner jointly to terminate the lease arrangement on a voluntary basis at any time. In the event of an early termination of the lease arrangements, the joint venture may be obliged to pay termination sums to the lessor sufficient to repay its investment in the vessels and to compensate it for the tax effect of the terminations, including recapture of tax depreciation, if any. Although the exact amount of any such payments upon termination would be negotiated between us and the lessor, we expect the amount would be significant.

Table of Contents

We own a 70% interest in Teekay Nakilat Corporation (or the *Teekay Nakilat Joint Venture*). As described in Item 18 Financial Statements: Note 4 Leases and Restricted Cash, the Teekay Nakilat Joint Venture is the lessee under 30-year capital lease arrangements with a third party for the three RasGas II LNG Carriers (or the *RasGas II Leases*). The UK taxing authority (or *HMRC*) has been urging the lessor as well as other lessors under capital lease arrangements that have tax benefits similar to the ones provided by the RasGas II Leases, to terminate such finance lease arrangements and has in other circumstances challenged the use of similar structures. As a result, the lessor has requested that the Teekay Nakilat Joint Venture contemplate the termination of the RasGas II Leases or entertain other alternatives for the leasing structure. The Teekay Nakilat Joint Venture has declined this request as it does not believe that HMRC will be able to successfully challenge the availability of the tax benefits of these leases to the lessor. This assessment is partially based on a January 2012 court decision from the First Tribunal regarding a similar financial lease of an LNG carrier that ruled in favor of the taxpayer as well as a 2013 decision from the Upper Tribunal that upheld the 2012 verdict. HMRC has been granted leave to further appeal the 2013 decision to the Court of Appeal. If the HMRC is able to successfully challenge the RasGas II Leases, the Teekay Nakilat Joint Venture could be subject to significant costs associated with the termination of the lease or increased lease payments to compensate the lessor for the lost tax benefits. The Partnership estimates its 70% share of the potential exposure to be approximately \$34 million, exclusive of potential financing costs and interest rate swap termination costs.

The Teekay Nakilat Joint Venture has received notice from the lessor of the three vessels of a credit rating downgrade to the bank that was providing the letter of credit (or *LC Bank*) to Teekay Nakilat Joint Venture's lease. As a result, the lessor has increased the lease payments over the remaining term of the RasGas II Leases of approximately \$12.3 million on a net present value basis effective April 2014. The Partnership's 70% share of the present value of the lease payment increase is approximately \$8.6 million. The Teekay Nakilat Joint Venture is looking at alternatives to mitigate the impact of the downgrade to the LC Bank's credit rating to avoid a prolonged increase to lease payments.

In addition, the subsidiaries of another joint venture formed to service the Tangguh LNG project in Indonesia have lease arrangements with a third party for two LNG carriers. We purchased Teekay Corporation's interest in this joint venture in 2009. The terms of the lease arrangements provide similar tax and change of law risk assumption by this joint venture as we have with the three RasGas II LNG Carriers.

Our joint venture arrangements impose obligations upon us but limit our control of the joint ventures, which may affect our ability to achieve our joint venture objectives.

For financial or strategic reasons, we conduct a portion of our business through joint ventures. Generally, we are obligated to provide proportionate financial support for the joint ventures although our control of the business entity may be substantially limited. Due to this limited control, we generally have less flexibility to pursue our own objectives through joint ventures than we would with our own subsidiaries. There is no assurance that our joint venture partners will continue their relationships with us in the future or that we will be able to achieve our financial or strategic objectives relating to the joint ventures and the markets in which they operate. In addition, our joint venture partners may have business objectives that are inconsistent with ours, experience financial and other difficulties that may affect the success of the joint venture, or be unable or unwilling to fulfill their obligations under the joint ventures, which may affect our financial condition or results of operations.

TAX RISKS

United States common unitholders will be required to pay U.S. taxes on their share of our income even if they do not receive any cash distributions from us.

U.S. citizens, residents or other U.S. taxpayers will be required to pay U.S. federal income taxes and, in some cases, U.S. state and local income taxes on their share of our taxable income, whether or not they receive cash distributions from us. U.S. common unitholders may not receive cash distributions from us equal to their share of our taxable income or even equal to the actual tax liability that results from their share of our taxable income.

Because distributions may reduce a common unitholder's tax basis in our common units, common unitholders may realize greater gain on the disposition of their units than they otherwise may expect, and common unitholders may have a tax gain even if the price they receive is less than their original cost.

If common unitholders sell their common units, they will recognize gain or loss for U.S. federal income tax purposes that is equal to the difference between the amount realized and their tax basis in those common units. Prior distributions in excess of the total net taxable income allocated decrease a common unitholder's tax basis and will, in effect, become taxable income if common units are sold at a price greater than their tax basis, even if the price received is less than the original cost. Assuming we are not treated as a corporation for U.S. federal income tax purposes, a substantial portion of the amount realized on a sale of units, whether or not representing gain, may be ordinary income.

The decision of the United States Court of Appeals for the Fifth Circuit in *Tidewater Inc. v. United States* creates some uncertainty as to whether we will be classified as a partnership for U.S. federal income tax purposes.

In order for us to be classified as a partnership for U.S. federal income tax purposes, more than 90 percent of our gross income each year must be qualifying income under Section 7704 of the U.S. Internal Revenue Code of 1986, as amended (the *Code*). For this purpose, qualifying income includes income from providing marine transportation services to customers with respect to crude oil, natural gas and certain products thereof but does not include rental income from leasing vessels to customers.

The decision of the United States Court of Appeals for the Fifth Circuit in *Tidewater Inc. v. United States*, 565 F.3d 299 (5th Cir. 2009) held that income derived from certain time chartering activities should be treated as rental income rather than service income for purposes of a foreign sales corporation provision of the Code. However, the Internal Revenue Service (or *IRS*) stated in an Action on Decision (AOD 2010-001) that it disagrees with, and will not acquiesce to, the way that the rental versus services framework was applied to the facts in the *Tidewater* decision, and in its

Table of Contents

discussion stated that the time charters at issue in *Tidewater* would be treated as producing services income for purposes of the passive foreign investment company provisions of the Code. The IRS's statement with respect to *Tidewater* cannot be relied upon or otherwise cited as precedent by taxpayers. Consequently, in the absence of any binding legal authority specifically relating to the statutory provisions governing qualifying income under Section 7704 of the Code, there can be no assurance that the IRS or a court would not follow the *Tidewater* decision in interpreting the qualifying income provisions under Section 7704 of the Code. Nevertheless, we intend to take the position that our time charter income is qualifying income within the meaning of Section 7704 of the Code. No assurance can be given, however, that the IRS, or a court of law, will accept our position. As such, there is some uncertainty regarding the status of our time charter income as qualifying income and therefore some uncertainty as to whether we will be classified as a partnership for federal income tax purposes. Please read Item 10 Additional Information Taxation United States Tax Consequences Classification as a Partnership.

The after-tax benefit of an investment in the common units may be reduced if we are not treated as a partnership for U.S. federal income tax purposes.

The anticipated after-tax benefit of an investment in common units may be reduced if we are not treated as a partnership for U.S. federal income tax purposes. If we are not treated as a partnership for U.S. federal income tax purposes, we would be treated as a corporation for such purposes, and common unitholders could suffer material adverse tax or economic consequences, including the following:

The ratio of taxable income to distributions with respect to common units would increase because items would not be allocated to account for any differences between the fair market value and the basis of our assets at the time our common units are issued.

Common unitholders may recognize income or gain on any change in our status from a partnership to a corporation that occurs while they hold units.

We would not be permitted to adjust the tax basis of a secondary market purchaser in our assets under Section 743(b) of the Code. As a result, a person who purchases common units from a common unitholder in the secondary market may realize materially more taxable income each year with respect to the units. This could reduce the value of common unitholders' common units.

Common unitholders would not be entitled to claim any credit against their U.S. federal income tax liability for non-U.S. income tax liabilities incurred by us.

As to the U.S. source portion of our income attributable to transportation that begins or ends (but not both) in the United States, we will be subject to U.S. tax on such income on a gross basis (that is, without any allowance for deductions) at a rate of 4 percent. The imposition of this tax would have a negative effect on our business and would result in decreased cash available for distribution to common unitholders.

We also may be considered a passive foreign investment company (or *PFIC*) for U.S. federal income tax purposes. U.S. shareholders of a PFIC are subject to an adverse U.S. federal income tax regime with respect to the income derived by the PFIC, the distributions they receive from the PFIC, and the gain, if any, they derive from the sale or other disposition of their interests in the PFIC.

Please read Item 10 Additional Information Taxation United States Tax Consequences Possible Classification as a Corporation.

U.S. tax-exempt entities and non-U.S. persons face unique U.S. tax issues from owning common units that may result in adverse U.S. tax consequences to them.

Investments in common units by U.S. tax-exempt entities, including individual retirement accounts (known as *IRAs*), other retirements plans and non-U.S. persons raise issues unique to them. Assuming we are classified as a partnership for U.S. federal income tax purposes, virtually all of our income allocated to organizations exempt from U.S. federal income tax will be unrelated business taxable income and generally will be subject to U.S. federal income tax. In addition, non-U.S. persons may be subject to a 4 percent U.S. federal income tax on the U.S. source portion of our gross income attributable to transportation that begins or ends (but not both) in the United States, or distributions to them may be reduced on account of withholding of U.S. federal income tax by us in the event we are treated as having a fixed place of business in the United States or otherwise earn U.S. effectively connected income, unless an exemption applies and they file U.S. federal income tax returns to claim such exemption.

The sale or exchange of 50 percent or more of our capital or profits interests in any 12-month period will result in the termination of our partnership for U.S. federal income tax purposes.

We will be considered to have been terminated for U.S. federal income tax purposes if there is a sale or exchange of 50 percent or more of the total interests in our capital or profits within any 12-month period. Our termination would, among other things, result in the closing of our taxable year for all unitholders and could result in a deferral of depreciation deductions allowable in computing our taxable income. Please read Item 10 Additional Information Taxation United States Tax Consequences Disposition of Common Units Constructive Termination.

Some of our subsidiaries that are or have been classified as corporations for U.S. federal income tax purposes might be treated as passive foreign investment companies, which could result in additional taxes to our unitholders.

Certain of our subsidiaries that are or have been classified as corporations for U.S. federal income tax purposes could be treated as passive foreign investment companies (or *PFICs*) for U.S. federal income tax purposes. U.S. shareholders of a PFIC are subject to an adverse U.S. federal income tax regime with respect to the income derived by the PFIC, the distributions they receive from the PFIC, and the gain, if any, they derive from the sale or other disposition of their interests in the PFIC. We have received a ruling from the IRS that our subsidiary Teekay LNG Holdco L.L.C. will be classified as a CFC rather than a PFIC as long as it is wholly-owned by a U.S. partnership. Our subsidiaries DHJS Hull No. 2007-001 L.L.C. and DHJS Hull No. 2007-002 L.L.C. are also owned by our U.S. partnership and, for the period of time during which they were classified as corporations for U.S. federal income tax purposes, we intend to take the position that these subsidiaries should also be treated as CFCs rather than PFICs. Effective January 1, 2014, both DHJS Hull No. 2007-001 L.L.C. and DHJS Hull No. 2007-002 L.L.C. have elected to be disregarded for U.S. federal

Table of Contents

income tax purposes. As a result, effective January 1, 2014, Teekay LNG Holdco L.L.C. is the only subsidiary entity classified as a corporation for U.S. federal income tax purposes. Moreover, we believe and intend to take the position that these subsidiaries were not PFICs at any time prior to being owned by our U.S. partnership. No assurance can be given, however, that the IRS, or a court of law, will accept this position. Please read Item 10 Additional Information Taxation United States Tax Consequences Taxation of our Subsidiary Corporations.

Teekay Corporation owns less than 50 percent of our outstanding equity interests, which could cause certain of our subsidiaries and us to be subject to additional tax.

Certain of our subsidiaries are and have been classified as corporations for U.S. federal income tax purposes. As such, these subsidiaries would be subject to U.S. federal income tax on the U.S. source portion of our income attributable to transportation that begins or ends (but not both) in the United States if they fail to qualify for an exemption from U.S. federal income tax (the *Section 883 Exemption*). Teekay Corporation indirectly owns less than 50 percent of certain of our subsidiaries and our outstanding equity interests. Consequently, we expect these subsidiaries failed to qualify for the Section 883 Exemption in 2013 and that Teekay LNG Holdco L.L.C., our sole remaining regarded corporate subsidiary as of January 1, 2014, will fail to qualify for the Section 883 Exemption in subsequent tax years. Any resulting imposition of U.S. federal income taxes will result in decreased cash available for distribution to common unitholders. Please read Item 10 Additional Information Taxation United States Tax Consequences Taxation of our Subsidiary Corporations.

In addition, if we are not treated as a partnership for U.S. federal income tax purposes, we expect that we also would fail to qualify for the Section 883 Exemption in subsequent tax years and that any resulting imposition of U.S. federal income taxes would result in decreased cash available for distribution to common unitholders.

The Internal Revenue Service (or IRS) may challenge the manner in which we value our assets in determining the amount of income, gain, loss and deduction allocable to the unitholders, which could adversely affect the value of the common units.

A unitholder's taxable income or loss with respect to a common unit each year will depend upon a number of factors, including the nature and fair market value of our assets at the time the holder acquired the common unit, whether we issue additional units or whether we engage in certain other transactions, and the manner in which our items of income, gain, loss and deduction are allocated among our partners. For this purpose, we determine the value of our assets and the relative amounts of our items of income, gain, loss and deduction allocable to our unitholders and our general partner as holder of the incentive distribution rights by reference to the value of our interests, including the incentive distribution rights. The IRS may challenge any valuation determinations that we make, particularly as to the incentive distribution rights, for which there is no public market. In addition, the IRS could challenge certain other aspects of the manner in which we determine the relative allocations made to our unitholders and to the general partner as holder of our incentive distribution rights. A successful IRS challenge to our valuation or allocation methods could increase the amount of net taxable income and gain realized by a unitholder with respect to a common unit. Any such IRS challenge, whether or not successful, could adversely affect the value of our common units.

Common unitholders may be subject to income tax in one or more non-U.S. countries, including Canada, as a result of owning our common units if, under the laws of any such country, we are considered to be carrying on business there. Such laws may require common unitholders to file a tax return with, and pay taxes to, those countries. Any foreign taxes imposed on us or any of our subsidiaries will reduce our cash available for distribution to common unitholders.

We intend that our affairs and the business of each of our subsidiaries is conducted and operated in a manner that minimizes foreign income taxes imposed upon us and our subsidiaries or which may be imposed upon you as a result of owning our common units. However, there is a risk that common unitholders will be subject to tax in one or more countries, including Canada, as a result of owning our common units if, under the laws of any such country, we are considered to be carrying on business there. If common unitholders are subject to tax in any such country, common unitholders may be required to file a tax return with, and pay taxes to, that country based on their allocable share of our income. We may be required to reduce distributions to common unitholders on account of any withholding obligations imposed upon us by that country in respect of such allocation to common unitholders. The United States may not allow a tax credit for any foreign income taxes that common unitholders directly or indirectly incur. Any foreign taxes imposed on us or any of our subsidiaries will reduce our cash available for common unitholders.

Item 4. Information on the Partnership

A. Overview, History and Development

Overview and History

Teekay LNG Partners L.P. is an international provider of marine transportation services for LNG, LPG and crude oil. We were formed in 2004 by Teekay Corporation (NYSE: TK), a leading provider of marine services to the global oil and natural gas industries, to expand its operations in the LNG shipping sector. Our primary growth strategy focuses on expanding our fleet of LNG and LPG carriers under long-term, fixed-rate charters. In executing our growth strategy, we may engage in vessel or business acquisitions or enter into joint ventures and partnerships with companies that may provide increased access to emerging opportunities from global expansion of the LNG and LPG sectors. We seek to leverage the expertise, relationships and reputation of Teekay Corporation and its affiliates to pursue these opportunities in the LNG and LPG sectors and may consider other opportunities to which our competitive strengths are well suited. Although we may acquire additional crude oil tankers from time to time, we view our conventional tanker fleet primarily as a source of stable cash flow as we seek to continue to expand our LNG and LPG operations.

In February 2013 we entered we entered into a joint venture agreement with Belgium-based Exmar NV to own and charter-in LPG carriers with a primary focus on the mid-size gas carrier segment. For additional information, please see Item 5. Operating and Financial Review and Prospects Management's Discussion and Analysis of Financial Condition and Results of Operations Significant Developments in 2013 and early 2014.

Table of Contents

As of December 31, 2013, our fleet, excluding newbuildings, consisted of 29 LNG carriers (including the six MALT LNG Carriers, four RasGas 3 LNG Carriers, four Angola LNG Carriers, two Exmar LNG Carriers that are all accounted for under the equity method), nine Suezmax-class crude oil tankers, 21 LPG carriers (including 16 Exmar LPG Carriers that are accounted for under the equity method) and one Handymax product tanker, all of which are double-hulled. Our fleet is young, with an average age of approximately six years for our LNG carriers, approximately nine years for our conventional tankers (Suezmax and Handymax), and approximately 12 years for our LPG carriers, compared to world averages of 11, eight and 16 years, respectively, as of December 31, 2013.

Our fleets of LNG and LPG carriers currently have approximately 4.6 million and 0.7 million cubic meters of total capacity, respectively. The aggregate capacity of our conventional tanker fleet is approximately 1.4 million deadweight tonnes (or *dwt*).

We were formed under the laws of the Republic of The Marshall Islands as a limited partnership, Teekay LNG Partners L.P., on November 3, 2004 and maintain our principal executive headquarters at 4th Floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08, Bermuda. Our telephone number at such address is (441) 298-2530.

B. Operations

Our Charters

We generate revenues by charging customers for the transportation of their LNG, LPG and crude oil using our vessels. The majority of these services are provided through either a time-charter or bareboat charter contract, where vessels are chartered to customers for a fixed period of time at rates that are generally fixed but may contain a variable component based on inflation, interest rates or current market rates.

Our vessels mainly primarily operate under long-term, fixed-rate charters primarily with major energy and utility companies and Teekay Corporation. The average remaining term for these charters is approximately 13 years for our LNG carriers, approximately 4 years for our conventional tankers (Suezmax and Handymax), and approximately 6 years for our LPG carriers (excluding five chartered-in Exmar LPG Carriers that operate on spot contracts), subject, in certain circumstances, to termination or vessel purchase rights.

Hire rate refers to the basic payment from the customer for the use of a vessel. Hire is payable monthly, in advance, in U.S. Dollars or Euros, as specified in the charter. The hire rate generally includes two components – a capital cost component and an operating expense component. The capital component typically approximates the amount we are required to pay under vessel financing obligations and, for four of our conventional tankers, adjusts for changes in the floating interest rates relating to the underlying vessel financing. The operating component, which adjusts annually for inflation, is intended to compensate us for vessel operating expenses.

In addition, we may receive additional revenues beyond the fixed hire rate when current market rates exceed specified amounts under our time-charter for four Suezmax tankers.

Hire payments may be reduced or, under some charters, we must pay liquidated damages, if the vessel does not perform to certain of its specifications, such as if the average vessel speed falls below a guaranteed speed or the amount of fuel consumed to power the vessel under normal circumstances exceeds a guaranteed amount. Historically, we have had few instances of hire rate reductions, and only one in our joint venture with Exmar, that had a material impact on our operating results in prior years.

When a vessel is off-hire or not available for service the customer generally is not required to pay the hire rate and we are responsible for all costs. Prolonged off-hire may lead to vessel substitution or termination of the time-charter. A vessel will be deemed to be off-hire if it is in dry dock. We must periodically dry dock each of our vessels for inspection, repairs and maintenance and any modifications to comply with industry certification or governmental requirements. In addition, a vessel generally will be deemed off-hire if there is a loss of time due to, among other things: operational deficiencies; equipment breakdowns; delays due to accidents, crewing strikes, certain vessel detentions or similar problems; or our failure to maintain the vessel in compliance with its specifications and contractual standards or to provide the required crew.

Liquefied Gas Segment

LNG Carriers

The LNG carriers in our liquefied gas segment compete in the LNG market. LNG carriers are usually chartered to carry LNG pursuant to time-charter contracts, where a vessel is hired for a fixed period of time, usually between 20 and 25 years, and the charter rate is payable to the owner on a monthly basis. LNG shipping historically has been transacted with long-term, fixed-rate time-charter contracts. LNG projects require significant capital expenditures and typically involve an integrated chain of dedicated facilities and cooperative activities. Accordingly, the overall success of an LNG project depends heavily on long-range planning and coordination of project activities, including marine transportation. Most shipping requirements for new LNG projects continue to be provided on a long-term basis, though the level of spot voyages (typically consisting of a single voyage), short-term time-charters and medium-term time-charters have grown in the past few years.

In the LNG market, we compete principally with other private and state-controlled energy and utilities companies that generally operate captive fleets, and independent ship owners and operators. Many major energy companies compete directly with independent owners by transporting LNG for third parties in addition to their own LNG. Given the complex, long-term nature of LNG projects, major energy companies historically have transported LNG through their captive fleets. However, independent fleet operators have been obtaining an increasing percentage of charters for new or expanded LNG projects as some major energy companies have continued to divest non-core businesses.

LNG carriers transport LNG internationally between liquefaction facilities and import terminals. After natural gas is transported by pipeline from production fields to a liquefaction facility, it is supercooled to a temperature of approximately negative 260 degrees Fahrenheit. This process reduces its volume to approximately 1/600th of its volume in a gaseous state. The reduced volume facilitates economical storage and transportation by ship over long distances, enabling countries with limited natural gas reserves or limited access to long-distance transmission pipelines to import natural gas. LNG carriers include a sophisticated containment system that holds the LNG and provides insulation to reduce the amount of LNG that boils off naturally. The natural boil off is either used as fuel to power the engines on the ship or it can be reliquefied and put back into the tanks. LNG is transported overseas in specially built tanks on double-hulled ships to a receiving terminal, where it is offloaded and stored in insulated tanks. In regasification facilities at the receiving terminal, the LNG is returned to its gaseous state (or *regasified*) and then shipped by pipeline for distribution to natural gas customers.

Table of Contents

With the exception of the *Arctic Spirit* and *Polar Spirit* which are the only two ships in the world that utilize the Ishikawajima Harima Heavy Industries Self Supporting Prismatic Tank IMO Type B (or *IHI SPB*) independent tank technology, the remainder of our fleet makes use of one of the Gaz Transport and Technigaz (or *GTT*) membrane containment systems. The *GTT* membrane systems are used in the majority of LNG tankers now being constructed. New LNG carriers are generally expected to have a lifespan of approximately 35 to 40 years. Unlike the oil tanker industry, there currently are no regulations that require the phase-out from trading of LNG carriers after they reach a certain age. As at December 31, 2013, our LNG carriers had an average age of approximately six years, compared to the world LNG carrier fleet average age of approximately 11 years. In addition, as at that date, there were approximately 386 vessels in the world LNG fleet and approximately 112 additional LNG carriers under construction or on order for delivery through 2017.

The following table provides additional information about our LNG carriers as of December 31, 2013:

Vessel	Capacity (cubic meters)	Delivery	Ownership	Charterer	Expiration of Charter ⁽¹⁾

Table of Contents

- (1) Each of our time-charters are subject to certain termination and purchase provisions.
 - (2) We lease the vessel under a lease arrangement and have an ownership interest of 70%. Please read Item 18 Financial Statements: Note 4 Leases and Restricted Cash.
 - (3) The charterer has one option to extend the term for an additional five years.
 - (4) The charterer has two options to extend the term for an additional five years each.
 - (5) The charterer has three options to extend the term for an additional five years each.
 - (6) The charterer has an option to extend the term for one additional year and at the end of the charter period the charterer has an obligation to repurchase each vessel at a fixed price.
 - (7) The charterer has three options to extend the term for one, five and five additional years, respectively.
 - (8) The charterer has one option to extend the term for one additional year.
 - (9) The RasGas 3 LNG Carriers are accounted for under the equity method.
 - (10) The Exmar LNG Carriers are accounted for under the equity method.
 - (11) The Angola LNG Carriers are accounted for under the equity method.
 - (12) The MALT LNG Carriers are accounted for under the equity method.
 - (13) The charterer has four options to extend the term for an additional five years each.
 - (14) Repsol YPF, S.A. novated their charter contract to Shell Spain LNG S.A.U. in March 2014.
- The following table presents the percentage of our consolidated voyage revenues from LNG customers that accounted for more than 10% of our consolidated voyage revenues during 2013, 2012 and 2011.

	Year Ended December 31,		
	2013	2012	2011
Ras Laffan Liquefied Natural Gas Company Ltd.	17%	18%	18%
Repsol YPF, S.A.	13%	13%	14%
The Tangguh Production Sharing Contractors	12%	12%	12%

No other LNG customer accounted for 10% or more of our revenues during any of these periods. The loss of any significant customer or a substantial decline in the amount of services requested by a significant customer could harm our business, financial condition and results of operations.

Each LNG carrier that is owned by us is encumbered by a mortgage relating to the vessel's financing. Each of the *Al Marrouna*, *Al Areesh*, *Al Daayen* and *Excalibur* is considered to be subject to a capital lease. Please read Item 18 Financial Statements: Note 4 Leases and Restricted Cash.

LPG Carriers

LPG shipping involves the transportation of three main categories of cargo: liquid petroleum gases including propane, butane and ethane; petrochemical gases including ethylene, propylene and butadiene; and ammonia.

As of December 31, 2013, our LPG carriers had an average age of approximately 12 years, compared to the world LPG carrier fleet average age of approximately 16 years. The worldwide LPG tanker fleet consisted of approximately 1,268 vessels and approximately 171 additional LPG vessels were on order for delivery through 2017. LPG carriers range in size from approximately 250 to approximately 90,000 cubic meters. Approximately 52% of the number of vessels in the worldwide fleet are less than 5,000 cubic meters in size. New LPG carriers are generally expected to have a lifespan of approximately 30 to 35 years.

LPG carriers are mainly chartered to carry LPG on time-charters, on contracts of affreightment or spot voyage charters. The two largest consumers of LPG are residential users and the petrochemical industry. Residential users,

particularly in developing regions where electricity and gas pipelines are not developed, do not have fuel switching alternatives and generally are not LPG price sensitive. The petrochemical industry, however, has the ability to switch between LPG and other feedstock fuels depending on price and availability of alternatives.

Table of Contents

The following table provides additional information about our LPG carriers as of December 31, 2013, which does not include our 50% ownership interest in 12 newbuildings scheduled for delivery between 2014 and 2018:

- (1) Exmar LPG BVBA has reached an agreement to sell Flanders Harmony. The expected delivery to the new owner is scheduled in the second quarter of 2014.
- (2) Temse was sold and delivered to its new owner in March 2014.
- (3) The Berlian Ekuator was redelivered to its owner in January 2014.
- (4) CoA refers to contracts of affreightment.
- (5) The CoA for these vessels are with Statoil ASA, CSSA Chartering and Shipping Services SA and Shell Int. Trading & Shipping Co. Ltd.

Table of Contents**Conventional Tanker Segment**

Oil has been the world's primary energy source for decades. Seaborne crude oil transportation is a mature industry. The two main types of oil tanker operators are major oil companies (including state-owned companies) that generally operate captive fleets, and independent operators that charter out their vessels for voyage or time-charter use. Most conventional oil tankers controlled by independent fleet operators are hired for one or a few voyages at a time at fluctuating market rates based on the existing tanker supply and demand. These charter rates are extremely sensitive to this balance of supply and demand, and small changes in tanker utilization have historically led to relatively large short-term rate changes. Long-term, fixed-rate charters for crude oil transportation, such as those applicable to our conventional tanker fleet, are less typical in the industry. As used in this discussion, conventional oil tankers exclude those vessels that can carry dry bulk and ore, tankers that currently are used for storage purposes and shuttle tankers that are designed to transport oil from offshore production platforms to onshore storage and refinery facilities.

Oil tanker demand is primarily a function of several factors, primarily the locations of oil production, refining and consumption and world oil demand and supply, while oil tanker supply is primarily a function of new vessel deliveries, vessel scrapping and the conversion or loss of tonnage.

The majority of crude oil tankers range in size from approximately 80,000 to approximately 320,000 dwt. Suezmax tankers, which typically range from 120,000 to 200,000 dwt, are the mid-size of the various primary oil tanker types. As of December 31, 2013, the world tanker fleet included 447 conventional Suezmax tankers, representing approximately 14% of worldwide oil tanker capacity, excluding tankers under 10,000 dwt.

As of December 31, 2013, our conventional tankers had an average age of approximately nine years, which is consistent with the average age for the world conventional tanker fleet. New conventional tankers generally are expected to have a lifespan of approximately 25 to 30 years, based on estimated hull fatigue life.

The following table provides additional information about our conventional oil tankers as of December 31, 2013:

Tanker ⁽¹⁾	Capacity (dwt)	Delivery	Our Ownership	Charterer	Expiration of Charter
<i>Operating Conventional tankers:</i>					
Algeciras Spirit	149,999	2000	Capital lease ⁽²⁾	CEPSA	Feb. 2014 ⁽³⁾
Huelva Spirit	149,999	2001	Capital lease ⁽²⁾	CEPSA	Apr. 2014 ⁽³⁾
Teide Spirit	149,999	2004	Capital lease ⁽²⁾	CEPSA	Oct. 2017 ⁽³⁾
Toledo Spirit	159,342	2005	Capital lease ⁽²⁾	CEPSA	Jul. 2018 ⁽³⁾
European Spirit	151,849	2003	100%	ConocoPhillips Shipping LLC	Sep. 2015 ⁽⁴⁾
African Spirit	151,736	2003	100%	ConocoPhillips Shipping LLC	Nov. 2015 ⁽⁴⁾
Asian Spirit	151,693	2004	100%	ConocoPhillips Shipping LLC	Jan. 2016 ⁽⁴⁾
Bermuda Spirit	159,000	2009	100%	Centrofin Management Inc.	May. 2021 ⁽⁵⁾
Hamilton Spirit	159,000	2009	100%	Centrofin Management Inc.	Jun. 2021 ⁽⁵⁾
Alexander Spirit	40,083	2007	100%	Caltex Australian Petroleum Pty Ltd.	Mar. 2020
Total Capacity:	1,422,700				

- (1) The conventional tankers listed in the table are all Suezmax tankers, with the exception of the *Alexander Spirit* which is a Handymax tanker.
- (2) We are the lessee under a capital lease arrangement and may be required to purchase the vessel after the end of the lease terms for a fixed price. Please read Item 18 Financial Statements: Note 4 Leases and Restricted Cash.
- (3) Compania Espanole de Petroleos, S.A. (or *CEPSA*) has the right to terminate the time-charter 13 years after the original delivery date without penalty. Expiration date assumes the termination at the end of year 13 of the charter contract; however, if the charterer does not exercise its annual termination rights, from the end of year 13 onwards, the charter contract could extend to 20 years after the original delivery date. On February 28, 2014, CEPSA terminated the charter contract for the *Algeciras Spirit* and sold the vessel.
- (4) The term of the time-charter is 12 years from the original delivery date, which may be extended at the customer's option for up to an additional six years. In addition, the customer has the right to terminate the time-charter upon notice and payment of a cancellation fee. Either party also may require the sale of the vessel to a third party at any time, subject to the other party's right of first refusal to purchase the vessel.
- (5) Centrofin Management Inc. has the option to purchase the two vessels, which right is exercisable after the end of five years and every year thereafter until the end of the charter agreement.

CEPSA accounted for 12% of our 2013, 2012 and 2011 consolidated voyage revenues. No other conventional tanker customer accounted for 10% or more of our revenues during any of these periods. The loss of any significant customer or a substantial decline in the amount of services requested by a significant customer could harm our business, financial condition and results of operations.

Business Strategies

Our primary business objective is to increase distributable cash flow per unit by executing the following strategies:

Expand our LNG and LPG business globally. We seek to capitalize on opportunities emerging from the global expansion of the LNG and LPG sectors by selectively targeting:

projects which involve medium-to long-term, fixed-rate charters;

Table of Contents

cost-effective LNG and LPG newbuilding contracts;

joint ventures and partnerships with companies that may provide increased access to opportunities in attractive LNG and LPG importing and exporting geographic regions;

strategic vessel and business acquisitions; and

specialized projects in adjacent areas of the business, including floating storage and regasification units (or *FSRUs*).

Provide superior customer service by maintaining high reliability, safety, environmental and quality standards. LNG and LPG project operators seek LNG and LPG transportation partners that have a reputation for high reliability, safety, environmental and quality standards. We seek to leverage our own and Teekay Corporation's operational expertise to create a sustainable competitive advantage with consistent delivery of superior customer service.

Manage our conventional tanker fleet to provide stable cash flows. The remaining terms for our existing long-term conventional tanker charters are one to eight years. We believe the fixed-rate time-charters for our tanker fleet provide us stable cash flows during their terms and a source of funding for expanding our LNG and LPG operations. Depending on prevailing market conditions during and at the end of each existing charter, we may seek to extend the charter, enter into a new charter, operate the vessel on the spot market or sell the vessel, in an effort to maximize returns on our conventional tanker fleet while managing residual risk.

Safety, Management of Ship Operations and Administration

Teekay Corporation, through its subsidiaries, assists us in managing our ship operations, other than the vessels owned or chartered-in by our joint ventures with Exmar, which are commercially and technically managed by Exmar and two of the Angola LNG Carriers, which are commercially and technically managed by NYK Energy Transport (Atlantic) Ltd. Safety and environmental compliance are our top operational priorities. We operate our vessels in a manner intended to protect the safety and health of the employees, the general public and the environment. We seek to manage the risks inherent in our business and are committed to eliminating incidents that threaten the safety and integrity of our vessels, such as groundings, fires, collisions and petroleum spills. In 2007, Teekay Corporation introduced a behavior-based safety program called *Safety in Action* to further enhance the safety culture in our fleet. We are also committed to reducing our emissions and waste generation. In 2008, Teekay Corporation introduced the Quality Assurance and Training Officers (or *QATO*) Program to conduct rigorous internal audits of our processes and provide the seafarers with onboard training. In 2010, Teekay Corporation introduced the *Operational Leadership* campaign to reinforce commitment to personal and operational safety.

Teekay Corporation has achieved certification under the standards reflected in International Standards Organization's (or *ISO*) 9001 for Quality Assurance, ISO 14001 for Environment Management Systems, Occupational Health and Safety Advisory Services 18001 for Occupational Health and Safety, and the IMO's International Management Code for the Safe Operation of Ships and Pollution Prevention (or *ISM Code*) conforming to the definition of ISM Code in Item 4 Information on the Partnership: C Regulations International Maritime Organization on a fully integrated basis.

As part of Teekay Corporation's compliance with the ISM Code, all of our vessels' safety management certificates are maintained through ongoing internal audits performed by our certified internal auditors and intermediate external audits performed by the classification society Det Norske Veritas. Subject to satisfactory completion of these internal and external audits, certification is valid for five years.

We have established key performance indicators to facilitate regular monitoring of our operational performance. We set targets on an annual basis to drive continuous improvement, and we review performance indicators quarterly to determine if remedial action is necessary to reach our targets.

In addition to our operational experience, Teekay Corporation's in-house global shore staff performs, through its subsidiaries, the full range of technical, commercial and business development services for our LNG and LPG operations. This staff also provides administrative support to our operations in finance, accounting and human resources. We believe this arrangement affords a safe, efficient and cost-effective operation.

Critical ship management functions undertaken by subsidiaries of Teekay Corporation are:

vessel maintenance;

crewing;

purchasing;

shipyard supervision;

insurance; and

financial management services.

These functions are supported by onboard and onshore systems for maintenance, inventory, purchasing and budget management.

In addition, Teekay Corporation's day-to-day focus on cost control is applied to our operations. In 2003, Teekay Corporation and two other shipping companies established a purchasing cooperation agreement called the TBW Alliance, which leverages the purchasing power of the combined fleets, mainly in such commodity areas as marine lubricants, coatings and chemicals and gases. Through our arrangements with Teekay Corporation, we benefit from this purchasing alliance.

We believe that the generally uniform design of some of our existing and newbuilding vessels and the adoption of common equipment standards provides operational efficiencies, including with respect to crew training and vessel management, equipment operation and repair, and spare parts ordering.

Table of Contents

Risk of Loss, Insurance and Risk Management

The operation of any ocean-going vessel carries an inherent risk of catastrophic marine disasters, death or injury of persons and property losses caused by adverse weather conditions, mechanical failures, human error, war, terrorism, piracy and other circumstances or events. In addition, the transportation of crude oil, petroleum products, LNG and LPG is subject to the risk of spills and to business interruptions due to political circumstances in foreign countries, hostilities, labor strikes and boycotts. The occurrence of any of these events may result in loss of revenues or increased costs.

We carry hull and machinery (marine and war risks) and protection and indemnity insurance coverage to protect against most of the accident-related risks involved in the conduct of our business. Hull and machinery insurance covers loss of or damage to a vessel due to marine perils such as collision, grounding and weather. Protection and indemnity insurance indemnifies us against liabilities incurred while operating vessels, including injury to our crew or third parties, cargo loss and pollution. The current maximum amount of our coverage for pollution is \$1 billion per vessel per incident. We also carry insurance policies covering war risks (including piracy and terrorism) and, for some of our LNG carriers, loss of revenues resulting from vessel off-hire time due to a marine casualty. We believe that our current insurance coverage is adequate to protect against most of the accident-related risks involved in the conduct of our business and that we maintain appropriate levels of environmental damage and pollution insurance coverage. However, we cannot guarantee that all covered risks are adequately insured against, that any particular claim will be paid or that we will be able to procure adequate insurance coverage at commercially reasonable rates in the future. More stringent environmental regulations have resulted in increased costs for, and may result in the lack of availability of, insurance against risks of environmental damage or pollution.

We use in our operations Teekay Corporation's thorough risk management program that includes, among other things, risk analysis tools, maintenance and assessment programs, a seafarers competence training program, seafarers workshops and membership in emergency response organizations. We believe we benefit from Teekay Corporation's commitment to safety and environmental protection as certain of its subsidiaries assist us in managing our vessel operations.

Flag, Classification, Audits and Inspections

Our vessels are registered with reputable flag states, and the hull and machinery of all of our vessels have been Classed by one of the major classification societies and members of International Association of Classification Societies Ltd (or IACS): BV, Lloyd's Register of Shipping or American Bureau of Shipping.

The applicable classification society certifies that the vessel's design and build conforms to the applicable Class rules and meets the requirements of the applicable rules and regulations of the country of registry of the vessel and the international conventions to which that country is a signatory. The classification society also verifies throughout the vessel's life that it continues to be maintained in accordance with those rules. In order to validate this, the vessels are surveyed by the classification society, in accordance to the classification society rules, which in the case of our vessels follows a comprehensive five year special survey cycle, renewed every fifth year. During each five-year period the vessel undergoes annual and intermediate surveys, the scrutiny and intensity of which is primarily dictated by the age of the vessel. As our vessels are modern and we have enhanced the resiliency of the underwater coatings of each vessel hull and marked the hull to facilitate underwater inspections by divers, their underwater areas are inspected in a dry-dock at five year intervals. In-water inspection is carried out during the second or third annual inspection (i.e. during an Intermediate Survey).

In addition to class surveys, the vessel's flag state also verifies the condition of the vessel during annual flag state inspections, either independently or by additional authorization to class. Also, port state authorities of a vessel's port of call are authorized under international conventions to undertake regular and spot checks of vessels visiting their jurisdiction.

Processes followed onboard are audited by either the flag state or classification society acting on behalf of the flag state to ensure that they meet the requirements of the ISM Code. DNV typically carries out this task. We also follow an internal process of internal audits undertaken at each office and vessel annually.

We follow a comprehensive inspections scheme supported by our sea staff, shore-based operational and technical specialists and members of our QATO program. We carry out a minimum of two such inspections annually, which helps ensure us that:

our vessels and operations adhere to our operating standards;

the structural integrity of the vessel is being maintained;

machinery and equipment is being maintained to give reliable service;

we are optimizing performance in terms of speed and fuel consumption; and

the vessel's appearance supports our brand and meets customer expectations.

Our customers also often carry out vetting inspections under the Ship Inspection Report Program, which is a significant safety initiative introduced by the Oil Companies International Marine Forum to specifically address concerns about sub-standard vessels. The inspection results permit charterers to screen a vessel to ensure that it meets their general and specific risk-based shipping requirements.

We believe that the heightened environmental and quality concerns of insurance underwriters, regulators and charterers will generally lead to greater scrutiny, inspection and safety requirements on all vessels in the oil tanker and LNG and LPG carrier markets and will accelerate the scrapping or phasing out of older vessels throughout these markets.

Overall we believe that our relatively new, well-maintained and high-quality vessels provide us with a competitive advantage in the current environment of increasing regulation and customer emphasis on quality of service.

Table of Contents**C. Regulations*****General***

Our business and the operation of our vessels are significantly affected by international conventions and national, state and local laws and regulations in the jurisdictions in which our vessels operate, as well as in the country or countries of their registration. Because these conventions, laws and regulations change frequently, we cannot predict the ultimate cost of compliance or their impact on the resale price or useful life of our vessels. Additional conventions, laws, and regulations may be adopted that could limit our ability to do business or increase the cost of our doing business and that may materially adversely affect our operations. We are required by various governmental and quasi-governmental agencies to obtain permits, licenses and certificates with respect to our operations. Subject to the discussion below and to the fact that the kinds of permits, licenses and certificates required for the operations of the vessels we own will depend on a number of factors, we believe that we will be able to continue to obtain all permits, licenses and certificates material to the conduct of our operations.

International Maritime Organization (or IMO)

The IMO is the United Nations agency for maritime safety. IMO regulations relating to pollution prevention for oil tankers have been adopted by many of the jurisdictions in which our tanker fleet operates. Under IMO regulations and subject to limited exceptions, a tanker must be of double-hull construction, be of a mid-deck design with double-side construction or be of another approved design ensuring the same level of protection against oil pollution. All of our tankers are double hulled.

Many countries, but not the United States, have ratified and follow the liability regime adopted by the IMO and set out in the International Convention on Civil Liability for Oil Pollution Damage, 1969, as amended (or *CLC*). Under this convention, a vessel's registered owner is strictly liable for pollution damage caused in the territorial waters of a contracting state by discharge of persistent oil (e.g. crude oil, fuel oil, heavy diesel oil or lubricating oil), subject to certain defenses. The right to limit liability to specified amounts that are periodically revised is forfeited under the CLC when the spill is caused by the owner's actual fault or when the spill is caused by the owner's intentional or reckless conduct. Vessels trading to contracting states must provide evidence of insurance covering the limited liability of the owner. In jurisdictions where the CLC has not been adopted, various legislative regimes or common law governs, and liability is imposed either on the basis of fault or in a manner similar to the CLC.

IMO regulations also include the International Convention for Safety of Life at Sea (or *SOLAS*), including amendments to SOLAS implementing the International Ship and Port Facility Security Code (or *ISPS*), the ISM Code, the International Convention on Load Lines of 1966, and, specifically with respect to LNG and LPG carriers, the International Code for Construction and Equipment of Ships Carrying Liquefied Gases in Bulk (the *IGC Code*). SOLAS provides rules for the construction of and equipment required for commercial vessels and includes regulations for safe operation. Flag states which have ratified the convention and the treaty generally employ the classification societies, which have incorporated SOLAS requirements into their class rules, to undertake surveys to confirm compliance.

SOLAS and other IMO regulations concerning safety, including those relating to treaties on training of shipboard personnel, lifesaving appliances, radio equipment and the global maritime distress and safety system, are applicable to our operations. Non-compliance with IMO regulations, including SOLAS, the ISM Code, ISPS and the IGC Code, may subject us to increased liability or penalties, may lead to decreases in available insurance coverage for affected vessels and may result in the denial of access to or detention in some ports. For example, the U.S. Coast Guard and European Union authorities have indicated that vessels not in compliance with the ISM Code will be prohibited from

trading in U.S. and European Union ports. The ISM Code requires vessel operators to obtain a safety management certification for each vessel they manage, evidencing the shipowner's development and maintenance of an extensive safety management system. Each of the existing vessels in our fleet is currently ISM Code-certified, and we expect to obtain safety management certificates for each newbuilding vessel upon delivery.

LNG and LPG carriers are also subject to regulation under the IGC Code. Each LNG and LPG carrier must obtain a certificate of compliance evidencing that it meets the requirements of the IGC Code, including requirements relating to its design and construction. Each of our LNG and LPG carriers is currently IGC Code certified.

Annex VI to the IMO's International Convention for the Prevention of Pollution from Ships (or *Annex VI*) sets limits on sulfur oxide and nitrogen oxide emissions from ship exhausts and prohibits emissions of ozone depleting substances, emissions of volatile compounds from cargo tanks and the incineration of specific substances. Annex VI also includes a world-wide cap on the sulfur content of fuel oil and allows for special areas to be established with more stringent controls on sulfur emissions.

The IMO has issued guidance regarding protecting against acts of piracy off the coast of Somalia. We comply with these guidelines.

In addition, the IMO has proposed (by the adoption in 2004 of the International Convention for the Control and Management of Ships' Ballast Water and Sediments (or the *Ballast Water Convention*)) that all tankers of the size we operate that are built starting in 2012 contain ballast water treatment systems, and that all other similarly sized tankers install treatment systems in order to comply with their first renewal or renewal survey after 2016 in order to comply with the renewal survey required for the International Oil Pollution Prevention certificate. This convention has not yet entered into force, but when it becomes effective, we estimate that the installation of ballast water treatment systems on our tankers may cost between \$2 million and \$3 million per vessel.

European Union (or EU)

Like the IMO, the EU has adopted regulations phasing out single-hull tankers. All of our tankers are double-hulled. On May 17, 2011 the European commission carried out a number of dawn raids, or unannounced inspections, at the offices of some of the world's largest container line operators starting an antitrust investigation. We are not directly affected by this investigation and believe that we are compliant with antitrust rules. Nevertheless, it is possible that the investigation could be widened and new companies and practices come under scrutiny within the EU.

Table of Contents

The EU has also adopted legislation (Directive 2009/16/EC on Port State Control) that: bans from European waters manifestly sub-standard vessels (defined as vessels that have been detained twice by EU port authorities, in the preceding two years); creates obligations on the part of EU member port states to inspect minimum percentages of vessels using these ports annually; provides for increased surveillance of vessels posing a high risk to maritime safety or the marine environment; and provides the EU with greater authority and control over classification societies, including the ability to seek to suspend or revoke the authority of negligent societies (Directive 2009/15/EC). Two new regulations were introduced by the European Commission in September 2010, as part of the implementation of the Port State Control Directive. These came into force on January 1, 2011 and introduce a ranking system (published on a public website and updated daily) displaying shipping companies operating in the EU with the worst safety records. The ranking is judged upon the results of the technical inspections carried out on the vessels owned by a particular shipping company. Those shipping companies that have the most positive safety records are rewarded by subjecting them to fewer inspections, whilst those with the most safety shortcomings or technical failings recorded upon inspection will in turn be subject to a greater frequency of official inspections to their vessels.

The EU has, by way of Directive 2005/35/EC, which has been amended by Directive 2009/123/EC created a legal framework for imposing criminal penalties in the event of discharges of oil and other noxious substances from ships sailing in its waters, irrespective of their flag. This relates to discharges of oil or other noxious substances from vessels. Minor discharges shall not automatically be considered as offences, except where repetition leads to deterioration in the quality of the water. The persons responsible may be subject to criminal penalties if they have acted with intent, recklessly or with serious negligence and the act of inciting, aiding and abetting a person to discharge a polluting substance may also lead to criminal penalties.

The EU has adopted regulations requiring the use of low sulfur fuel. Currently, vessels are required to burn fuel with sulfur content not exceeding 1% (while within EU member states territorial seas, exclusive economic zones and pollution control zones that are included in SO_x Emission Control Areas). Beginning January 1, 2015, vessels are required to burn fuel with sulfur content not exceeding 0.1% while within EU member states territorial seas, exclusive economic zones and pollution control zones that are included in SO_x Emission Control Areas. Other jurisdictions have also adopted regulations requiring the use of low sulfur fuel. The California Air Resources Board (or *CARB*) requires vessels to burn fuel with 0.1% sulfur content or less within 24 nautical miles of California as of January 1, 2014. IMO regulations require that, as of January 1, 2015, all vessels operating within Emissions Control Areas (or *ECA*) worldwide must comply with 1.00% sulfur requirements. Currently, the only grade of fuel meeting this low sulfur content requirement is low sulfur marine gas oil (or *LSMGO*). Since July 1, 2010, the applicable sulfur content limits in the North Sea, the Baltic Sea and the English Channel sulfur control areas have been 0.1%. Certain modifications were completed on our Suezmax tankers in order to optimize operation on *LSMGO* of equipment originally designed to operate on Heavy Fuel Oil (or *HFO*), and to ensure our compliance with the Directive. In addition, *LSMGO* is more expensive than *HFO* and this impacts the costs of operations. However, for vessels employed on fixed-term business, all fuel costs, including any increases, are borne by the charterer.

The EU has recently adopted Regulation (EU) No 1257/2013 which imposes rules regarding ship recycling and management of hazardous materials on vessels. The Regulation includes requirements to recycle vessels in an environmentally sound manner at certain approved recycling facilities, so as to minimize the adverse effects of recycling on human health and the environment. The Regulation also contains rules to control and properly manage hazardous materials on vessels and prohibits or restricts the installation or use of certain hazardous materials on vessels. The Regulation aims to ratify the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships adopted by the IMO in 2009 (which has not entered into force). It applies to vessels flying the flag of a Member State. In addition, certain of its provisions also apply to vessels flying the flag of a third country calling at a port or anchorage of a Member State. For example, when calling at a port or anchorage of a Member State, the vessels flying the flag of a third country will be required, amongst other things, to have on board an inventory of

hazardous materials which complies with the requirements of the Regulation and to be able to submit to the relevant authorities of that Member State a copy of a statement of compliance issued by the relevant authorities of the country of their flag and verifying the inventory. The Regulation will generally become effective between December 31, 2015 and December 31, 2018, although certain of its provisions are set to become effective on December 31, 2014 and certain others on December 31, 2020.

United States

The United States has enacted an extensive regulatory and liability regime for the protection and cleanup of the environment from oil spills, including discharges of oil cargoes, bunker fuels or lubricants, primarily through the Oil Pollution Act of 1990 (or *OPA 90*) and the Comprehensive Environmental Response, Compensation and Liability Act (or *CERCLA*). *OPA 90* affects all owners, bareboat charterers, and operators whose vessels trade to the United States or its territories or possessions or whose vessels operate in United States waters, which include the U.S. territorial sea and 200-mile exclusive economic zone around the United States. *CERCLA* applies to the discharge of hazardous substances rather than oil and imposes strict joint and several liability upon the owners, operators or bareboat charterers of vessels for cleanup costs and damages arising from discharges of hazardous substances. We believe that petroleum products and LNG and LPG should not be considered hazardous substances under *CERCLA*, but additives to oil or lubricants used on LNG or LPG carriers might fall within its scope.

Under *OPA 90*, vessel owners, operators and bareboat charters are responsible parties and are jointly, severally and strictly liable (unless the oil spill results solely from the act or omission of a third party, an act of God or an act of war and the responsible party reports the incident and reasonably cooperates with the appropriate authorities) for all containment and cleanup costs and other damages arising from discharges or threatened discharges of oil from their vessels. These other damages are defined broadly to include:

natural resources damages and the related assessment costs;

real and personal property damages;

net loss of taxes, royalties, rents, fees and other lost revenues;

lost profits or impairment of earning capacity due to property or natural resources damage;

net cost of public services necessitated by a spill response, such as protection from fire, safety or health hazards; and

loss of subsistence use of natural resources.

Table of Contents

OPA 90 limits the liability of responsible parties in an amount it periodically updates. The liability limits do not apply if the incident was proximately caused by violation of applicable U.S. federal safety, construction or operating regulations, including IMO conventions to which the United States is a signatory, or by the responsible party's gross negligence or willful misconduct, or if the responsible party fails or refuses to report the incident or to cooperate and assist in connection with the oil removal activities. Liability under CERCLA is also subject to limits unless the incident is caused by gross negligence, willful misconduct or a violation of certain regulations. We currently maintain for each of our vessel's pollution liability coverage in the maximum coverage amount of \$1 billion per incident. A catastrophic spill could exceed the coverage available, which could harm our business, financial condition and results of operations.

Under OPA 90, with limited exceptions, all newly built or converted tankers delivered after January 1, 1994 and operating in U.S. waters must be double-hulled. All of our tankers are double-hulled.

OPA 90 also requires owners and operators of vessels to establish and maintain with the United States Coast Guard (or *Coast Guard*) evidence of financial responsibility in an amount at least equal to the relevant limitation amount for such vessels under the statute. The Coast Guard has implemented regulations requiring that an owner or operator of a fleet of vessels must demonstrate evidence of financial responsibility in an amount sufficient to cover the vessel in the fleet having the greatest maximum limited liability under OPA 90 and CERCLA. Evidence of financial responsibility may be demonstrated by insurance, surety bond, self-insurance, guaranty or an alternate method subject to approval by the Coast Guard. Under the self-insurance provisions, the shipowner or operator must have a net worth and working capital, measured in assets located in the United States against liabilities located anywhere in the world, that exceeds the applicable amount of financial responsibility. We have complied with the Coast Guard regulations by using self-insurance for certain vessels and obtaining financial guaranties from a third party for the remaining vessels. If other vessels in our fleet trade into the United States in the future, we expect to obtain guaranties from third-party insurers.

OPA 90 and CERCLA permit individual U.S. states to impose their own liability regimes with regard to oil or hazardous substance pollution incidents occurring within their boundaries, and some states have enacted legislation providing for unlimited strict liability for spills. Several coastal states, such as California and Alaska require state-specific evidence of financial responsibility and vessel response plans. We intend to comply with all applicable state regulations in the ports where our vessels call.

Owners or operators of vessels, including tankers operating in U.S. waters are required to file vessel response plans with the Coast Guard, and their tankers are required to operate in compliance with their Coast Guard approved plans. Such response plans must, among other things:

address a worst case scenario and identify and ensure, through contract or other approved means, the availability of necessary private response resources to respond to a worst case discharge ;

describe crew training and drills; and

identify a qualified individual with full authority to implement removal actions.

We have filed vessel response plans with the Coast Guard and have received its approval of such plans. In addition, we conduct regular oil spill response drills in accordance with the guidelines set out in OPA 90. The Coast Guard has

announced it intends to propose similar regulations requiring certain vessels to prepare response plans for the release of hazardous substances.

OPA 90 and CERCLA do not preclude claimants from seeking damages resulting from the discharge of oil and hazardous substances under other applicable law, including maritime tort law. Such claims could include attempts to characterize the transportation of LNG or LPG aboard a vessel as an ultra-hazardous activity under a doctrine that would impose strict liability for damages resulting from that activity. The application of this doctrine varies by jurisdiction.

The United States Clean Water Act also prohibits the discharge of oil or hazardous substances in U.S. navigable waters and imposes strict liability in the form of penalties for unauthorized discharges. The Clean Water Act imposes substantial liability for the costs of removal, remediation and damages and complements the remedies available under OPA 90 and CERCLA discussed above.

Our vessels that discharge certain effluents, including ballast water, in U.S. waters must obtain a Clean Water Act permit from the Environmental Protection Agency (or *EPA*) titled the Vessel General Permit and comply with a range of effluent limitations, best management practices, reporting, inspections and other requirements. The current Vessel General Permit incorporates Coast Guard requirements for ballast water exchange and includes specific technology-based requirements for vessels, and includes an implementation schedule to require vessels to meet the ballast water effluent limitations by the first drydocking after January 1, 2014 or January 1, 2016, depending on the vessel size. Vessels that are constructed after December 1, 2013 are subject to the ballast water numeric effluent limitations immediately upon the effective date of the 2013 Vessel General Permit. Several U.S. states have added specific requirements to the Vessel General Permit and, in some cases, may require vessels to install ballast water treatment technology to meet biological performance standards.

Greenhouse Gas Regulation

In February 2005, the Kyoto Protocol to the United Nations Framework Convention on Climate Change (or the *Kyoto Protocol*) entered into force. Pursuant to the Kyoto Protocol, adopting countries are required to implement national programs to reduce emissions of greenhouse gases. In December 2009, more than 27 nations, including the United States, entered into the Copenhagen Accord. The Copenhagen Accord is non-binding, but is intended to pave the way for a comprehensive, international treaty on climate change. In July 2011 the IMO adopted regulations imposing technical and operational measures for the reduction of greenhouse gas emissions. These new regulations formed a new chapter in Annex VI and became effective on January 1, 2013. The new technical and operational measures include the Energy Efficiency Design Index, which is mandatory for newbuilding vessels, and the Ship Energy Efficiency Management Plan, which is mandatory for all vessels. In addition, the IMO is evaluating various mandatory measures to reduce greenhouse gas emissions from international shipping, which may include market-based instruments or a carbon tax. The EU also has indicated that it intends to propose an expansion of an existing EU emissions trading regime to include emissions of greenhouse gases from vessels, and individual countries in the EU may impose additional requirements. In the United States, the EPA issued an endangerment finding regarding greenhouse gases under the Clean Air Act. While this finding in itself does not impose any requirements on our industry, it authorizes the EPA to regulate directly greenhouse gas emissions through a rule-making process. In addition, climate change initiatives are being considered in the United States Congress and by individual states. Any passage of new climate control legislation or other regulatory initiatives by the IMO, EU, the United States or other countries or states where we operate that restrict emissions of greenhouse gases could have a significant financial and operational impact on our business that we cannot predict with certainty at this time.

Table of Contents**Vessel Security**

The ISPS was adopted by the IMO in December 2002 in the wake of heightened concern over worldwide terrorism and became effective on July 1, 2004. The objective of ISPS is to enhance maritime security by detecting security threats to ships and ports and by requiring the development of security plans and other measures designed to prevent such threats. Each of the existing vessels in our fleet currently complies with the requirements of ISPS and MTSA.

D. Properties

Other than our vessels, we do not have any material property.

E. Organizational Structure

Our sole general partner is Teekay GP L.L.C., which is a wholly-owned subsidiary of Teekay Corporation (NYSE: TK). Teekay Corporation also controls its public subsidiaries Teekay Offshore Partners L.P. (NYSE: TOO) and Teekay Tankers Ltd. (NYSE: TNK).

The following is a list of our significant subsidiaries as at December 31, 2013:

Name of Significant Subsidiary	Ownership	State or Jurisdiction of Incorporation
Teekay LNG Finance Corporation	100%	Marshall Islands
Teekay LNG Operating L.L.C.	100%	Marshall Islands
Teekay Luxembourg S.a.r.l.	100%	Luxembourg
Teekay Spain S.L.	100%	Spain
Teekay Shipping Spain S.L.	100%	Spain
Teekay II Iberia S.L.	100%	Spain
Teekay Servicios Maritimos, S.L.	100%	Spain
Teekay Nakilat Holdings Corporation	100%	Marshall Islands
Teekay Nakilat (III) Holdings Corporation	100%	Marshall Islands
Teekay LNG US GP L.L.C.	100%	Marshall Islands
Teekay LNG Holdings L.P.	99%	United States
Teekay Tangguh Holdings Corporation	99%	Marshall Islands
Teekay Tangguh Borrower L.L.C.	99%	Marshall Islands
Teekay LNG Holdco L.L.C.	99%	Marshall Islands
Teekay Nakilat Corporation	70%	Marshall Islands
Al Areesh Inc.	70%	Marshall Islands
Al Daayen Inc.	70%	Marshall Islands
Al Marrouna Inc.	70%	Marshall Islands
Teekay Nakilat (II) Limited	70%	United Kingdom
Teekay Nakilat Replacement Purchaser L.L.C.	70%	Marshall Islands
Teekay BLT Corporation	69%	Marshall Islands
Tangguh Hiri Finance Ltd.	69%	Marshall Islands
Tangguh Sago Finance Ltd.	69%	Marshall Islands

Tanggung Hiri Operating Ltd.	69%	Marshall Islands
Tanggung Sago Operating Ltd.	69%	Marshall Islands
Single ship-owning subsidiaries	99% - 100%	(1)

(1) We have 24 single ship-owning subsidiaries of which four of the subsidiaries were incorporated in Spain and the remaining 20 subsidiaries were incorporated in the Marshall Islands.

Item 4A. Unresolved Staff Comments

Item 5. Operating and Financial Review and Prospects

Management's Discussion and Analysis of Financial Condition and Results of Operations

General

Teekay LNG Partners L.P. is an international provider of marine transportation services for liquefied natural gas (or *LNG*), liquefied petroleum gas (or *LPG*) and crude oil. We were formed in 2004 by Teekay Corporation, a leading provider of marine services to the global oil and natural gas industries, to expand its operations in the LNG shipping sector. Our primary growth strategy focuses on expanding our fleet of LNG and LPG carriers under long-term, fixed-rate charters. In executing our growth strategy, we may engage in vessel or business acquisitions or enter into joint ventures and partnerships with companies that may provide increased access to emerging opportunities from global expansion of the LNG and LPG sectors. We seek to leverage the expertise, relationships and reputation of Teekay Corporation and its affiliates to pursue these opportunities in the LNG and LPG sectors and may consider other opportunities to which our competitive strengths are well suited. Although we may acquire additional crude oil tankers from time to time, we view our conventional tanker fleet primarily as a source of stable cash flow as we seek to expand our LNG and LPG operations.

SIGNIFICANT DEVELOPMENTS IN 2013 AND EARLY 2014

Sale of Vessels

Compania Espanole de Petroles, S.A. (or *CEPSA*), the charterer (who is also the owner) of the *Tenerife Spirit* and *Algeciras Spirit*, conventional vessels under capital lease, reached an agreement to sell the vessels to a third-party in November 2013 and January 2014, respectively. On redelivery of the vessels, the charter contract with us was terminated. The *Tenerife Spirit* and *Algeciras Spirit* were delivered to their new owners in December 2013 and February 2014, respectively. As a result of these sales, we have recorded a restructuring charge of \$1.8 million for the year ended December 31, 2013 relating to seafarer severance payments associated with these two vessels.

LNG Newbuildings

On August 5, 2013, we agreed to acquire a 155,900-cubic meter (or *cbm*) LNG carrier newbuilding from Norway-based Awilco LNG ASA (or *Awilco*) that was constructed by Daewoo Shipbuilding & Marine Engineering Co., Ltd., (or *DSME*) in South Korea. Upon the vessel's delivery on September 16, 2013, Awilco sold the vessel to us and we chartered the vessel back to Awilco on a five-year fixed-rate charter contract (plus a one-year extension option) with a fixed-price purchase obligation at the end of the charter. We financed the acquisition from our existing liquidity and have since secured a long-term debt facility. On September 24, 2013, we agreed to acquire a second 155,900 cbm LNG carrier newbuilding from Awilco. Upon delivery on November 28, 2013, Awilco sold the vessel to us and we chartered the vessel back to Awilco on a four-year fixed rate charter contract (plus a one year extension option) with a fixed-price purchase obligation at the end of the charter. We financed the acquisition with a portion of the proceeds, generated from our October 2013 equity offering and we have also since secured a separate long-term debt facility for this vessel. The purchase price of each vessel is \$205 million less a \$51 million upfront prepayment of charter hire by Awilco (inclusive of a \$1.0 million upfront fee), which is in addition to the daily bareboat charter rate.

On July 18 and November 19, 2013, we exercised options with DSME to construct a total of three LNG carrier newbuildings for a total cost of approximately \$637 million. These newbuilding vessels will be equipped with the M-type, Electronically Controlled, Gas Injection (or *MEGI*) twin engines, which are expected to be significantly more fuel efficient and have lower emission levels than other engines currently being utilized in LNG shipping. We intend

to secure charter contracts for these vessels prior to their delivery in 2017. In connection with the exercise of the two options on July 18, 2013, we obtained options to order up to three additional LNG carrier newbuildings that expire in May 2014.

On June 6, 2013, we were awarded five-year time-charter contracts with Cheniere Marketing L.L.C. (or *Cheniere*) for the two 173,400 cbm LNG carrier newbuildings that we ordered in December 2012. The newbuilding LNG carriers, also equipped with MEGI twin engines, are currently under construction by DSME and are scheduled to deliver in the first half of 2016. Upon delivery, the vessels will commence their five-year charters with Cheniere, which will export LNG from its Sabine Pass LNG export facility in Louisiana, USA.

Equity Offerings

On October 7, 2013, we completed a public offering of 3.45 million common units (including 0.45 million common units issued upon exercise of the underwriters' over-allotment option) at a price of \$42.62 per unit, for gross proceeds of approximately \$150.0 million (including our general partner's 2% proportionate capital contribution). We used the net proceeds from the offering of approximately \$144.8 million to prepay a portion of our outstanding debt under two of our revolving credit facilities that was used to fund our newbuilding installments and to fund the acquisition of the second LNG carrier newbuilding from Awilco.

On July 30, 2013, we issued 0.9 million common units in a private placement to an institutional investor for net proceeds, including our general partner's 2% proportionate capital contribution, of \$40.8 million. We used the proceeds from the private placement to fund the first installment payments on two newbuilding LNG carriers ordered in July 2013 and for general partnership purposes.

Norwegian Bond Offering

On September 3, 2013, we issued in the Norwegian bond market Norwegian Kroner (or *NOK*) 900 million in senior unsecured bonds that mature in September 2018 and bear interest at NIBOR plus a margin of 4.35%. The aggregate principal amount of the bonds is equivalent to approximately U.S. \$150 million and we entered into a cross currency swap agreement to swap all interest and principal payments into U.S. Dollars, with the interest payments fixed at a rate of 6.43%. We are using the proceeds of the bonds for general partnership purposes. The bonds are listed on the Oslo Stock Exchange.

Table of Contents

Joint Venture Refinancing

During June 2013, our joint venture with Marubeni Corporation (or the *Teekay LNG-Marubeni Joint Venture*) sold an aggregate amount of \$195 million of 4.11% senior secured notes through the U.S. private placement market to refinance the debt secured by the *Meridian Spirit* LNG carrier. These notes will mature in 2030. The remaining five LNG carriers were refinanced through two separate term loan facilities in June and July 2013 totaling \$768 million. These debt facilities, which bear interest at LIBOR plus margins ranging from 0.50% to 3.15%, mature between 2017 and 2021. Combined with the *Meridian Spirit* U.S. private placement notes, these three facilities total \$963 million and replace the previous \$1.06 billion bridge facility that matured in August 2013.

Continuous Offering Program

On May 22, 2013, we implemented a continuous offering program (or *COP*) under which we may issue new common units, representing limited partner interests, at market prices up to a maximum aggregate amount of \$100 million. Through December 31, 2013, we sold an aggregate of 0.1 million common units under the COP, generating proceeds of approximately \$4.9 million (including our general partner's 2% proportionate capital contribution of approximately \$0.1 million and net of approximately \$0.1 million of commissions and \$0.4 million of other offering costs). We used the net proceeds from the issuance of these common units for general partnership purposes.

Exmar LPG Joint Venture

On February 12, 2013, we entered into a joint venture agreement with Belgium-based Exmar NV (or *Exmar*) to own and charter-in LPG carriers with a primary focus on the mid-size gas carrier segment. The joint venture entity, called Exmar LPG BVBA, took economic effect as of November 1, 2012 and, as of March 31, 2014, includes 22 owned LPG carriers (including 12 newbuildings scheduled for delivery between 2014 and 2018) and four chartered-in LPG carriers. For our 50% ownership interest in the joint venture, including newbuilding payments made prior to the November 1, 2012 economic effective date of the joint venture, we invested approximately \$133 million in exchange for equity and a shareholder loan and assumed approximately \$108 million of our pro rata share of the existing debt and lease obligations as of the economic effective date. These debt and lease obligations are secured by certain vessels in the Exmar LPG BVBA fleet. Exmar continues to commercially and technically manage and operate the vessels. Since control of Exmar LPG BVBA is shared jointly between Exmar and us, we account for Exmar LPG BVBA using the equity method.

Important Financial and Operational Terms and Concepts

We use a variety of financial and operational terms and concepts when analyzing our performance. These include the following:

Voyage Revenues. Voyage revenues currently include revenues from charters accounted for under operating and direct financing leases. Voyage revenues are affected by hire rates and the number of calendar-ship-days a vessel operates. Voyage revenues are also affected by the mix of business between time and voyage charters. Hire rates for voyage charters are more volatile, as they are typically tied to prevailing market rates at the time of a voyage.

Voyage Expenses. Voyage expenses are all expenses unique to a particular voyage, including any bunker fuel expenses, port fees, cargo loading and unloading expenses, canal tolls, agency fees and commissions. Voyage expenses are typically paid by the customer under charters and by us under voyage charters.

Net Voyage Revenues. Net voyage revenues represent voyage revenues less voyage expenses. Because the amount of voyage expenses we incur for a particular charter depends upon the type of the charter, we use net voyage revenues to improve the comparability between periods of reported revenues that are generated by the different types of charters. We principally use net voyage revenues, a non-GAAP financial measure, because it provides more meaningful information to us about the deployment of our vessels and their performance than voyage revenues, the most directly comparable financial measure under GAAP.

Vessel Operating Expenses. Under all types of charters and contracts for our vessels, except for bareboat charters, we are responsible for vessel operating expenses, which include crewing, ship management services, repairs and maintenance, insurance, stores, lube oils and communication expenses. The two largest components of our vessel operating expenses are crew costs and repairs and maintenance. We expect these expenses to increase as our fleet matures and to the extent that it expands.

Income from Vessel Operations. To assist us in evaluating our operations by segment, we sometimes analyze the income we receive from each segment after deducting operating expenses, but prior to the inclusion or deduction of equity income, interest expense, taxes, foreign currency and derivative gains or losses and other income (expense). For more information, please read Item 18 Financial Statements: Note 3 Segment Reporting.

Dry docking. We must periodically dry dock each of our vessels for inspection, repairs and maintenance and any modifications required to comply with industry certification or governmental requirements. Generally, we dry dock each of our vessels every two and a half to five years, depending upon the type of vessel and its age. In addition, a shipping society classification intermediate survey is performed on our LNG carriers between the second and third year of a five-year dry-docking period. We capitalize a substantial portion of the costs incurred during dry docking and for the survey, and amortize those costs on a straight-line basis from the completion of a dry docking or intermediate survey over the estimated useful life of the dry dock. We expense as incurred costs for routine repairs and maintenance performed during dry docking or intermediate survey that do not improve or extend the useful lives of the assets. The number of dry dockings undertaken in a given period and the nature of the work performed determine the level of dry-docking expenditures.

Depreciation and Amortization. Our depreciation and amortization expense typically consists of the following three components:

charges related to the depreciation of the historical cost of our fleet (less an estimated residual value) over the estimated useful lives of our vessels;

charges related to the amortization of dry-docking expenditures over the useful life of the dry dock; and

charges related to the amortization of the fair value of the time-charters acquired in a 2004 acquisition of LNG carriers (over the expected remaining terms of the charters).

Table of Contents

Revenue Days. Revenue days are the total number of calendar days our vessels were in our possession during a period less the total number of off-hire days during the period associated with major repairs, dry dockings or special or intermediate surveys. Consequently, revenue days represents the total number of days available for the vessel to earn revenue. Idle days, which are days when the vessel is available to earn revenue, yet is not employed, are included in revenue days. We use revenue days to explain changes in our net voyage revenues between periods.

Calendar-Ship-Days. Calendar-ship-days are equal to the total number of calendar days that our vessels were in our possession during a period. As a result, we use calendar-ship-days primarily in explaining changes in vessel operating expenses and depreciation and amortization.

Utilization. Utilization is an indicator of the use of our fleet during a given period, and is determined by dividing our revenue days by our calendar-ship-days for the period.

Restricted Cash Deposits. Under capital lease arrangements for three of our LNG carriers, we (a) borrowed under term loans and deposited the proceeds into restricted cash accounts and (b) entered into capital leases, also referred to as bareboat charters, for the vessels. The restricted cash deposits, together with interest earned on the deposits, will equal the remaining amounts we owe under the lease arrangements, including our obligation to purchase the vessels at the end of the lease terms, where applicable. For more information, please read Item 18 Financial Statements: Note 4 Leases and Restricted Cash.

RESULTS OF OPERATIONS

Items You Should Consider When Evaluating Our Results of Operations

Some factors that have affected our historical financial performance and may affect our future performance are listed below:

The amount and timing of dry docking of our vessels can significantly affect our revenues between periods. Our vessels are off-hire at various points of time due to scheduled and unscheduled maintenance. During the years ended December 31, 2013, 2012 and 2011, we had 135, 23 and 133 off-hire days, respectively, relating to dry docking on our vessels that are consolidated. The financial impact from these periods of off-hire, if material, is explained in further detail below. Six of our consolidated vessels, where there will be associated off-hire, are scheduled for dry docking in 2014.

The size of our fleet changes. Our historical results of operations reflect changes in the size and composition of our fleet due to certain vessel deliveries and sales. Please read Liquefied Gas Segment and Conventional Tanker Segment below and Significant Developments in 2013 and Early 2014 above for further details about certain prior and future vessel deliveries and sales.

Vessel operating and other costs are facing industry-wide cost pressures. The shipping industry continues to experience a global manpower shortage of qualified seafarers in certain sectors due to growth in the world fleet and competition for qualified personnel. In recent years, upward pressure on manning costs has temporarily stabilized and resulted in lower wage increases than has been seen in the past. However, this situation will likely not continue in the long term. Going forward, there may be significant increases in crew

compensation as vessel and officer supply dynamics continue to change. In addition, factors such as pressure on commodity and raw material prices, as well as changes in regulatory requirements could also contribute to operating expenditure increases. We continue to take action aimed at improving operational efficiencies, and to temper the effect of inflationary and other price escalations, however increases to operational costs are still likely to occur in the future.

Our financial results are affected by fluctuations in the fair value of our derivative instruments. The change in fair value of our derivative instruments is included in our net income as the majority of our derivative instruments are not designated as hedges for accounting purposes. These changes may fluctuate significantly as interest rates, foreign exchange rates and spot tanker rates fluctuate relating to our interest rate swaps, cross currency swaps and to the agreement we have with Teekay Corporation relating to the time charter contract for the *Toledo Spirit* Suezmax tanker. Please read Item 18 Financial Statements: Note 11(c) Related Party Transactions and Note 12 Derivative Instruments. The unrealized gains or losses relating to changes in fair value of our derivative instruments do not impact our cash flows.

Our financial results are affected by fluctuations in currency exchange rates. Under GAAP, all foreign currency-denominated monetary assets and liabilities (including cash and cash equivalents, restricted cash, accounts receivable, accounts payable, accrued liabilities, unearned revenue, advances from affiliates, obligations under capital lease and long-term debt) are revalued and reported based on the prevailing exchange rate at the end of the period. These foreign currency translations fluctuate based on the strength of the U.S. Dollar relative mainly to the Euro and NOK and are included in our results of operations. The translation of all foreign currency-denominated monetary assets and liabilities at each reporting date results in unrealized foreign currency exchange gains or losses but do not impact our cash flows.

Five of our Suezmax tankers earn revenues based partly on spot market rates. The time-charter contracts for five of our Suezmax tankers, the *Algeciras Spirit*, *Huelva Spirit*, *Teide Spirit*, *Bermuda Spirit* and *Hamilton Spirit* contain a component providing for additional revenues to us beyond the fixed-hire rate when spot market rates exceed certain threshold amounts. Accordingly, even though declining spot market rates will not result in our receiving less than the fixed-hire rate, our results of operations and cash flow from operations will be influenced, by the variable component of the charters in periods where the spot market rates exceed the threshold amounts.

Our financial results reflect the consolidation of the subsidiaries of Teekay Corporation (or the Skaugen Multigas Subsidiaries) that owned the two Multigas vessels Teekay Corporation purchased from Skaugen (or the Skaugen Multigas Carriers) prior to our purchase of interests in the Skaugen Multigas Subsidiaries. In July 2008, the Skaugen Multigas Subsidiaries signed contracts for the purchase of the two Skaugen Multigas Carriers from subsidiaries of Skaugen. As described below, we had agreed to acquire the Skaugen Multigas Subsidiaries that own the Skaugen Multigas Carriers from Teekay Corporation upon delivery of the vessels. After July

Table of Contents

2008 and before the delivery of the vessels, we consolidated the Skaugen Multigas Subsidiaries as they were variable interest entities and we were the primary beneficiary during this period. We acquired 100% of the shares of the two Skaugen Multigas Carriers on June 15, 2011 and October 17, 2011, respectively. Please read Item 18 Financial Statements: Notes 11(d) Related Party Transactions and Note 13(a) Commitments and Contingencies.

Year Ended December 31, 2013 versus Year Ended December 31, 2012***Liquefied Gas Segment***

As at December 31, 2013, our liquefied gas segment fleet, including newbuildings, included 34 LNG carriers and 33 LPG/Multigas carriers, in which our interests ranged from 33% to 100%. However, the table below only includes 13 LNG carriers and five LPG/Multigas carriers. The table excludes five newbuilding LNG carriers under construction and the following vessels accounted for under the equity method: (i) six MALT LNG Carriers, (ii) four Angola LNG Carriers, (iii) four RasGas 3 LNG Carriers, (iv) two Exmar LNG Carriers and (v) 28 Exmar LPG Carriers.

The following table compares our liquefied gas segment's operating results for 2013 and 2012, and compares its net voyage revenues (which is a non-GAAP financial measure) for 2013 and 2012, to voyage revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days and revenue days for our liquefied gas segment:

(in thousands of U.S. Dollars, except revenue days, calendar-ship-days and percentages)	Year Ended December 31,		
	2013	2012	% Change
Voyage revenues	285,694	278,511	2.6
Voyage expenses	407	66	(516.7)
Net voyage revenues	285,287	278,445	2.5
Vessel operating expenses	55,459	50,124	10.6
Depreciation and amortization	71,485	69,064	3.5
General and administrative ⁽¹⁾	13,913	13,224	5.2
Income from vessel operations	144,430	146,033	(1.1)
Operating Data:			
Revenue Days (A)	5,919	5,833	1.5
Calendar-Ship-Days (B)	5,981	5,856	2.1
Utilization (A)/(B)	99.0%	99.6%	

⁽¹⁾ Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to each segment based on estimated use of resources).

Our liquefied gas segment's total calendar-ship-days increased by 2% to 5,981 days in 2013 from 5,856 days in 2012, as a result of the acquisition and delivery of two LNG carriers from Awilco (or the *Awilco LNG Carriers*), *Wilforce* and *Wilpride*, on September 16, 2013 and November 28, 2013, respectively.

During 2013, the *Arctic Spirit* and *Catalunya Spirit* were off-hire for 41 and 21 days, respectively, for scheduled dry dockings, compared to the *Hispania Spirit* being off-hire for approximately 21 days for a scheduled dry docking in

2012.

Net Voyage Revenues. Net voyage revenues increased during 2013 compared to 2012, primarily as a result of:

an increase of \$5.0 million as a result of the acquisition and delivery of the Awilco LNG Carriers on September 16, 2013 and November 28, 2013;

an increase of \$3.2 million due to the effect on our Euro-denominated revenues from the strengthening of the Euro against the U.S. Dollar compared to the prior year;

an increase of \$2.0 million during 2013 due to operating expense and dry-docking recovery adjustments under our charter provisions for the *Tangguh Hiri* and *Tangguh Sago*;

an increase of \$1.4 million due to the *Hispania Spirit* being off-hire for 21 days in 2012 for a scheduled dry docking; and

an increase of \$0.9 million due to a reduction of revenue in the prior year to compensate the charterer of the *Galicia Spirit* for delaying its scheduled dry docking in 2012;
partially offset by:

a decrease of \$2.1 million due to the *Arctic Spirit* being off-hire for 41 days in 2013 for a scheduled dry docking;

a decrease of \$2.0 million due to the *Catalunya Spirit* being off-hire for 21 days in 2013 for a scheduled dry docking;

Table of Contents

a decrease of \$1.1 million relating to an off-hire adjustment incurred for the *Arctic Spirit* associated with its dry docking in 2013; and

a decrease of \$0.8 million due to one less calendar day during 2013 compared to the prior year.

Vessel Operating Expenses. Vessel operating expenses increased during 2013 compared to 2012, primarily as a result of:

an increase of \$2.1 million during 2013 as a result of higher manning costs due to wage increases in certain of our LNG carriers;

an increase of \$1.8 million due to main engine overhauls and spares and consumables purchased for the *Tangguh Hiri* and *Tangguh Sago* for the dry docking of these vessels in 2013 (however, we had a corresponding increase in our revenues relating to operating expense adjustments in our charter provisions); and

an increase of \$1.0 million primarily due to the effect on our Euro-denominated crew manning expenses from the strengthening of the Euro against the U.S. Dollar during 2013 compared to 2012 (a portion of our vessel operating expenses are denominated in Euros, which is primarily due to the nationality of our crew).

Depreciation and Amortization. Depreciation and amortization increased during 2013 compared to 2012, primarily as a result of amortization of dry-dock expenditures incurred throughout 2012 and 2013.

Conventional Tanker Segment

As at December 31, 2013, our fleet includes 9 Suezmax-class double-hulled conventional crude oil tankers and one Handymax Product tanker, six of which we own and four of which we lease under capital leases. All of our conventional tankers operate under fixed-rate charters. The *Bermuda Spirit* s and *Hamilton Spirit* s time-charter contracts were amended in the fourth quarter of 2012 to reduce the daily hire rate on each by \$12,000 per day for a duration of 24 months, commencing October 1, 2012. However, if during this renegotiated period, the Suezmax tanker spot rates exceed the renegotiated charter rate, the charterer will pay us the excess amount up to a maximum of the original charter rate. The full impact of the change in hire rates is not fully reflected in the table below as the change in the lease payments are being recognized on a straight-line basis over the term of the lease.

In addition, CEPSA, the charterer (who was also the owner) of our conventional vessels under capital lease reached an agreement for the third-party sale of the *Tenerife Spirit* and *Algeciras Spirit* in November 2013 and January 2014, respectively. On redelivery of the vessels, the charter contract with the Partnership was terminated. The *Tenerife Spirit* and *Algeciras Spirit* were delivered to their new owners in December 2013 and February 2014, respectively. The time-charter contract for *Huelva Spirit*, one of the three remaining Suezmax tankers we lease under a capital lease, on charter to CEPSA has a cancellation option first exercisable in April 2014. We were notified by the charterer of their intention to terminate the charter contract for the *Huelva Spirit* and proceed with the sale of the vessel. Upon sale of the vessels, we will not be required to pay the balance of the capital lease obligations as the vessels under capital leases will be returned to the owner and the capital lease obligations will be concurrently extinguished. We did not record a gain or loss on the sale of the *Tenerife Spirit* and we do not expect to record a gain or loss on future sales of vessels under capital lease. When the vessels are sold to a third party, we will be subject to seafarer severance related

costs.

The following table compares our conventional tanker segment's operating results for the years ended December 31, 2013 and 2012, and compares its net voyage revenues (which is a non-GAAP financial measure) for the years ended December 31, 2013 and 2012 to voyage revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days and revenue days for our conventional tanker segment:

(in thousands of U.S. Dollars, except revenue days, calendar-ship-days and percentages)	Year Ended December 31,		
	2013	2012	% Change
Voyage revenues	113,582	114,389	(0.7)
Voyage expenses	2,450	1,706	43.6
Net voyage revenues	111,132	112,683	(1.4)
Vessel operating expenses	44,490	44,412	0.2
Depreciation and amortization	26,399	31,410	(16.0)
General and administrative ⁽¹⁾	6,531	5,736	13.9
Restructuring charge	1,786		100.0
Write down of vessels		29,367	(100.0)
Income from vessel operations	31,926	1,758	1,716.0
Operating Data:			
Revenue Days (A)	3,921	4,026	(2.6)
Calendar-Ship-Days (B)	3,994	4,026	(0.8)
Utilization (A)/(B)	98.2%	100.0%	

- ⁽¹⁾ Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to each segment based on estimated use of corporate resources).

Table of Contents

Net Voyage Revenues. Net voyage revenues decreased during 2013 compared to 2012, primarily as a result of:

a decrease of \$2.5 million due to the *African Spirit*, *Asian Spirit* and *European Spirit* being off-hire for 26, 22 and 25 days, respectively, as a result of scheduled dry dockings during 2013;

a decrease of \$0.9 million relating to a full year of the reduced charter rates on the *Bermuda Spirit* and *Hamilton Spirit* in 2013 compared to one quarter in the prior year as the renegotiated charter rates commenced on October 1, 2012;

a decrease of \$0.6 million as the conventional spot market rates decreased compared to the prior year which impacts the revenue earned by the *Toledo Spirit* relating to the time-charter agreement between us and CEPSA (however, we had a corresponding increase in our realized gain on a related derivative with Teekay Corporation; therefore this decrease and future decreases or increases related to this agreement did not and will not affect our cash flow or net income); and

a decrease of \$0.6 million due to the sale of the *Tenerife Spirit* on December 10, 2013;
partially offset by:

an increase of \$2.9 million during 2013 due to adjustments to the daily charter rates based on inflation and an increase in interest rates in accordance with the time-charter contracts for the Suezmax tankers subject to capital leases (however, under the terms of these capital leases, we had corresponding increases in our lease payments, which are reflected as increases to interest expense; therefore, these and future similar interest rate adjustments do not affect our cash flow or net income).

Vessel Operating Expenses. Vessel operating expenses remained consistent between 2013 and 2012.

Depreciation and Amortization. Depreciation and amortization decreased during 2013 compared to 2012, as a result of:

a decrease of \$7.2 million due to the effect of vessel write-downs in the fourth quarter of 2012 relating to the *Algeciras Spirit*, *Huelva Spirit* and *Tenerife Spirit*;
partially offset by:

an increase of \$2.8 million due to the accelerated amortization, commencing in the fourth quarter of 2012, of the intangible assets relating to the charter contracts of the *Algeciras Spirit*, *Huelva Spirit* and *Tenerife Spirit*, as we expect the life of these intangible assets to be shorter than originally assumed in prior periods.

Restructuring Charge. The restructuring charge of \$1.8 million for the year ended December 31, 2013 was related to the seafarer severance payments upon CEPSA selling our vessels under capital lease, the *Tenerife Spirit* and *Algeciras*

Spirit.

Other Operating Results

General and Administrative Expenses. General and administrative expenses increased 7.8% to \$20.4 million for 2013, from \$19.0 million for 2012, primarily due to timing of accounting recognition of certain restricted unit awards as a result of certain senior personnel meeting retirement eligibility criteria. Please read Item 18 Financial Statements: Note: 16 Unit-based compensation.

Equity Income. Equity income increased to \$123.3 million for 2013, from \$78.9 million for 2012, as set forth in the table below:

(in thousands of U.S. Dollars)	Angola LNG Carriers	Exmar LNG Carriers	Exmar LPG Carriers	MALT LNG Carriers	RasGas 3 LNG Carriers	Total Equity Income
Year ended December 31, 2013	29,178	10,650	17,415	43,428	22,611	123,282
Year ended December 31, 2012	13,015	7,994		39,349	18,508	78,866
Difference	16,163	2,656	17,415	4,079	4,103	44,416

Equity income increased by \$44.4 million from the prior year, primarily as a result of:

an increase of \$17.4 million due to the acquisition of a 50% ownership interest in Exmar LPG BVBA in February 2013;

an increase of \$16.2 in our 33% investment in the four Angola LNG Carriers, primarily due to the change in unrealized gains on derivative instruments as a result of long-term LIBOR benchmark interest rates increasing, as compared to 2012;

an increase of \$7.6 million from a full year of operations from our 52% ownership interest in the six LNG carriers from A.P. Moller Maersk A/S (the *MALT LNG Carriers*) which was acquired in February 2012;

an increase of \$4.1 million in our 40% investment in the RasGas 3 LNG Carriers, primarily due to the change in unrealized gains on derivative instruments as a result of long-term LIBOR benchmark interest rates increasing, as compared to 2012; and

an increase of \$2.7 million due to higher net income from our 50% investment in the Exmar LNG Carriers primarily resulting from a provision from a customer's claim relating to the two LNG carriers in 2012 and from the off-hire of *Excalibur* for scheduled dry docking during 2012;

Table of Contents

partially offset by:

a decrease of \$2.4 million primarily due to the dry docking of the *Methane Spirit* during March 2013 resulting in 28 off-hire days and higher interest margins upon completion of debt refinancing within the MALT LNG Carriers in June and July 2013; and

a decrease of \$1.0 million relating to the ineffective portion of the hedge accounted interest rate swap within the MALT LNG Carriers that was entered into during 2013.

Interest Expense. Interest expense increased to \$55.7 million for 2013, from \$54.2 million for 2012. Interest expense primarily reflects interest incurred on our capital lease obligations and long-term debt. This increase was primarily the result of:

an increase of \$5.8 million as a result of the NOK bond issuances in May 2012 and September 2013;

an increase of \$1.8 million due to an interest rate adjustment on our Suezmax tanker capital lease obligations (however, as described above, under the terms of the time-charter contracts for these vessels, we have a corresponding increase in charter receipts, which are reflected as an increase to voyage revenues); and

an increase of \$0.5 million relating to a new debt facility used to fund the delivery of the first Awilco LNG Carrier in late-2013;

a decrease of \$6.4 million due to principal debt repayments made during 2013 and 2012 on our USD and EURO denominated debt and decreases in LIBOR compared to the prior year.

Interest Income. Interest income decreased to \$3.0 million in 2013, from \$3.5 million for 2012. These changes were primarily the result of:

a decrease of \$1.2 million due to lower LIBOR relating to our restricted cash deposits;
partially offset by:

an increase of \$0.6 million due to interest earned on our \$81.7 million of advances due from Exmar LPG BVBA, see Item 18 Financial Statements: Note 6(b) Advances to Joint Venture Partner and Equity Accounted Joint Ventures.

Realized and Unrealized Loss on Derivative Instruments. Net realized and unrealized losses on derivative instruments decreased to \$14.0 million for 2013, from \$29.6 million for 2012 as set forth in the table below.

(in thousands of U.S. Dollars)	Year Ended December 31, 2013			Year Ended December 31, 2012		
	Realized gains (losses)	Unrealized gains (losses)	Total	Realized gains (losses)	Unrealized gains (losses)	Total
Interest rate swap agreements	(38,089)	18,868	(19,221)	(37,427)	5,200	(32,227)
Toledo Spirit time-charter derivative	1,521	3,700	5,221	907	1,700	2,607
	(36,568)	22,568	(14,000)	(36,520)	6,900	(29,620)

As at December 31, 2013 and 2012, we had interest rate swap agreements with an aggregate average net outstanding notional amount of approximately \$870.4 million and \$902.9 million, respectively, with average fixed rates of 4.6% for both periods. The realized losses relating to our interest rate swaps increased by \$0.7 million between 2013 and 2012 mainly as a result of decreases in the EURIBOR and LIBOR compared to the prior year.

Long-term forward LIBOR benchmark interest increased during 2013, which resulted in us recognizing an unrealized gain of \$93.9 million from our interest rate swaps associated with our U.S. Dollar-denominated long-term debt and capital leases and an unrealized loss of \$84.7 million from our interest rate swaps associated with our restricted cash deposits.

Long-term forward LIBOR benchmark interest decreased during 2012, which resulted in us recognizing an unrealized gain of \$5.9 million from our interest rate swaps associated with our restricted cash deposits and an unrealized loss of \$34.4 million on our interest rate swaps associated with our U.S. Dollar-denominated long-term debt and capital leases. The unrealized loss of \$34.4 million was offset by a transfer of \$49.2 million of previously recognized unrealized losses to realized losses related to actual cash settlements that led to a net gain of \$14.8 million from our U.S. Dollar-denominated long-term debt and capital leases.

Long-term forward EURIBOR benchmark interest increased during 2013 and decreased during 2012, which resulted in an unrealized gain of \$9.7 million and an unrealized loss of \$15.5 million, respectively, from our interest rate swaps associated with our Euro-denominated long-term debt.

The projected average forward tanker rates in 2013 decreased compared to 2012, which resulted in a \$3.7 million unrealized gain on our Toledo Spirit time-charter derivative. The Toledo Spirit time-charter derivative is the agreement with Teekay Corporation under which Teekay Corporation pays us any amounts payable to the charterer of the *Toledo Spirit* as a result of spot rates being below the fixed rate, and we pay Teekay Corporation any amounts payable to us by the charterer of the *Toledo Spirit* as a result of spot rates being in excess of the fixed rate (see Item 18 Financial Statements: Note 12 Derivative Instruments).

Table of Contents

Foreign Currency Exchange Losses. Foreign currency exchange losses were \$15.8 million and \$8.2 million for 2013 and 2012, respectively. These foreign currency exchange losses, substantially all of which were unrealized, are due primarily to the relevant period-end revaluation of our NOK-denominated debt and our Euro-denominated term loans and restricted cash for financial reporting purposes and the realized and unrealized losses and gains on our cross currency swaps. Losses on NOK-denominated and Euro-denominated monetary liabilities reflect a weaker U.S. Dollar against the NOK and Euro on the date of revaluation or settlement compared to the rate in effect at the beginning of the period. Gains on NOK-denominated and Euro-denominated monetary liabilities reflect a stronger U.S. Dollar against the NOK and Euro on the date of revaluation or settlement compared to the rate in effect at the beginning of the period.

For 2013, foreign currency exchange losses include realized losses of \$0.3 million and unrealized losses of \$15.4 million on our cross currency swaps and unrealized gains of \$12.3 million on the revaluation of our NOK-denominated debt. For 2013, foreign currency exchange losses also include the revaluation of our Euro-denominated restricted cash, debt and capital leases resulting in an unrealized loss of \$12.5 million.

For 2012, foreign currency exchange losses include realized gains of \$0.3 million and unrealized losses of \$2.7 million on our cross currency swap and unrealized losses of \$0.8 million on the revaluation of our NOK-denominated debt. For 2012, foreign currency exchange losses also include the revaluation of our Euro-denominated restricted cash, debt and capital leases resulting in an unrealized loss of \$4.7 million.

Other Income (Expense). Other income remained consistent between 2013 and 2012.

Income Tax Expense. Income tax expense increased to \$5.2 million for 2013, from \$0.6 million for 2012, primarily as a result of:

an increase of \$3.9 million as a result of recognizing a full valuation allowance on the deferred tax assets relating to our Spanish subsidiaries in 2013, as they no longer meet the recognition criteria for deferred tax assets; and

an increase of \$0.9 million as a result of a reduction in the valuation allowance in 2012 relating to the RasGas II LNG Carriers' deferred tax assets.

Other Comprehensive Income (OCI). OCI of \$0.1 million in 2013 relates to an unrealized gain on the valuation of an interest rate swap which was entered into during 2013 and accounted for using hedge accounting within the equity accounted Teekay LNG-Marubeni Joint Venture.

Year Ended December 31, 2012 versus Year Ended December 31, 2011***Liquefied Gas Segment***

As at December 31, 2012, our liquefied gas segment fleet included 27 LNG carriers and five LPG/Multigas carriers, in which our interests ranged from 33% to 100%. However, the table below only includes 11 LNG carriers and five LPG/Multigas carriers. The table excludes the following vessels accounted for under the equity method: (i) six MALT LNG Carriers, (ii) four Angola LNG Carriers, (iii) four RasGas 3 LNG Carriers and (iv) two Exmar LNG Carriers.

The following table compares our liquefied gas segment's operating results for 2012 and 2011, and compares its net voyage revenues (which is a non-GAAP financial measure) for 2012 and 2011, to voyage revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days and revenue days for our liquefied gas segment:

(in thousands of U.S. Dollars, except revenue days, calendar-ship-days and percentages)	Year Ended December 31,		
	2012	2011	% Change
Voyage revenues	278,511	269,408	3.4
Voyage expenses (recoveries)	66	(87)	(175.9)
Net voyage revenues	278,445	269,495	3.3
Vessel operating expenses	50,124	51,640	(2.9)
Depreciation and amortization	69,064	62,889	9.8
General and administrative ⁽¹⁾	13,224	9,518	38.9
Income from vessel operations	146,033	145,448	0.4
Operating Data:			
Revenue Days (A)	5,833	5,061	15.3
Calendar-Ship-Days (B)	5,856	5,126	14.2
Utilization (A)/(B)	99.6%	98.7%	

- ⁽¹⁾ Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to each segment based on estimated use of resources).

Table of Contents

Our liquefied gas segment's total calendar-ship-days increased by 14% to 5,856 days in 2012 from 5,126 days in 2011, as a result of the delivery of two multigas carriers, the *Norgas Unikum* and *Norgas Vision*, on June 15, 2011 and October 17, 2011, respectively, and the delivery of an LPG carrier, the *Norgas Camilla*, on September 15, 2011.

During 2012, the *Hispania Spirit* was off-hire for approximately 21 days relating to a scheduled dry docking, compared to two LNG carriers off-hire for 61 days relating to scheduled dry dockings in 2011.

Net Voyage Revenues. Net voyage revenues increased during 2012 compared to 2011, primarily as a result of:

an increase of \$9.8 million due to the deliveries of the *Norgas Unikum*, *Norgas Camilla* and *Norgas Vision* in 2011;

an increase of \$3.2 million due to the *Arctic Spirit* and *Polar Spirit* being off-hire for 11 days and 50 days, respectively, in 2011 for scheduled dry dockings;

an increase of \$1.6 million due to operating expense recovery adjustments under charter provisions and increases in the charter-hire rates for the *Tangguh Hiri* and *Tangguh Sago* at the beginning of 2012; and

an increase of \$0.8 million due to one additional calendar day during 2012; partially offset by:

a decrease of \$4.2 million due to the effect on our Euro-denominated revenues from the weakening of the Euro against the U.S. Dollar in 2012 compared to 2011;

a decrease of \$1.4 million due to the *Hispania Spirit* being off-hire for 21 days in the second quarter of 2012 for a scheduled dry docking;

a decrease of \$0.8 million due to a decrease in the hire rates for the *Arctic Spirit* and *Polar Spirit* as a result of crewing rate adjustments; and

a net decrease of \$0.5 million relating to payments in 2012 and 2011 for delaying the scheduled dry docking of the *Galicia Spirit* in 2012 and the *Catalunya Spirit* in 2011.

Vessel Operating Expenses. Vessel operating expenses decreased during 2012 compared to 2011, primarily as a result of:

a decrease of \$1.5 million primarily due to the effect on our Euro-denominated crew manning expenses from the weakening of the Euro against the U.S. Dollar during 2012 compared to 2011 (a portion of our vessel operating expenses are denominated in Euros, which is primarily due to the nationality of our crew); and

a decrease of \$0.9 million due to the cancellation of loss of hire insurance on the *Tangguh Hiri* and *Tangguh Sago* in the third quarter of 2011 and lower insurance premiums on certain LNG carriers.

Depreciation and Amortization. Depreciation and amortization increased during 2012 compared to 2011, primarily as a result of:

an increase of \$3.3 million as a result of amortization of dry-dock expenditures incurred in 2011 and the first and second quarters of 2012; and

an increase \$2.9 million due to the deliveries of the *Norgas Unikum*, *Norgas Camilla* and *Norgas Vision* in 2011.

Conventional Tanker Segment

As at December 31, 2012, our fleet included ten Suezmax-class double-hulled conventional crude oil tankers and one Handymax product tanker. All of our conventional tankers operate under long-term, fixed-rate time-charters. The *Bermuda Spirit s* and *Hamilton Spirit s* time-charter contracts were amended in the fourth quarter of 2012 to reduce the daily hire rate on each vessel by \$12,000 for a duration of 24 months, commencing October 1, 2012. However, if during this renegotiated period the Suezmax tanker spot rates exceed the renegotiated charter rate, the charterer will pay us the excess amount up to a maximum of the original charter rate. The impact of the change in hire rates is not fully reflected in the table below as the change in the lease payments are being recognized on a straight-line basis over the term of the lease.

In addition, during the fourth quarter of 2012, we determined that three of the five Suezmax tankers on charter to CEPSA were impaired and consequently we recognized an impairment loss in the amount of \$29.4 million. Please read Item 18 Financial Statements: Note 18 Write Down of Vessels.

The following table compares our conventional tanker segment's operating results for the years ended December 31, 2012 and 2011, and compares its net voyage revenues (which is a non-GAAP financial measure) for the years ended December 31, 2012 and 2011 to voyage revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days and revenue days for our conventional tanker segment:

Table of Contents

(in thousands of U.S. Dollars, except revenue days, calendar-ship-days and percentages)	Year Ended December 31,		
	2012	2011	% Change
Voyage revenues	114,389	111,061	3.0
Voyage expenses	1,706	1,474	15.7
Net voyage revenues	112,683	109,587	2.8
Vessel operating expenses	44,412	45,539	(2.5)
Depreciation and amortization	31,410	29,524	6.4
General and administrative ⁽¹⁾	5,736	6,469	(11.3)
Write down of vessels	29,367		100.0
Income from vessel operations	1,758	28,055	(93.7)
Operating Data:			
Revenue Days (A)	4,026	3,941	2.2
Calendar-Ship-Days (B)	4,026	4,015	0.3
Utilization (A)/(B)	100.0%	98.2%	

⁽¹⁾ Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to each segment based on estimated use of corporate resources).

Net Voyage Revenues. Net voyage revenues increased during 2012 compared to 2011, primarily as a result of:

an increase of \$2.4 million due to adjustments to the daily charter rates based on inflation and an increase in interest rates in accordance with the time-charter contracts for five Suezmax tankers (however, under the terms of the related capital leases, we had corresponding increases in our lease payments, which are reflected as increases to interest expense; therefore, these and future similar interest rate adjustments do not affect our cash flow or net income);

an increase of \$1.7 million due to the *Huelva Spirit* being off-hire for 72 days in 2011 for a scheduled dry dock; and

an increase of \$0.5 million relating to the *Alexander Spirit* for crew manning adjustments in the charter-hire rates; the crew manning adjustments increased due to higher crewing costs and the strengthening of the Australian Dollar against the U.S. Dollar compared to 2011;

partially offset by:

a decrease of \$1.0 million relating to lower revenues earned by the *Toledo Spirit* relating to the agreement between us and CEPSA for the Toledo Spirit time-charter contract (however, we had a corresponding increase in our realized gain on a related derivative with Teekay Corporation; therefore this decrease and future decreases or increases related to this agreement did not and will not affect our cash flow or net income); and

a decrease of \$0.7 million relating to the reduced charter rates on the *Bermuda Spirit* and *Hamilton Spirit*, commencing in the fourth quarter of 2012.

Vessel Operating Expenses. Vessel operating expenses decreased during 2012 compared to 2011, primarily as a result of a decrease of \$1.0 million due to the effect on our Euro-denominated crew manning expenses from the weakening of the Euro against the U.S. Dollar during 2012 compared to 2011 (a portion of our vessel operating expenses are denominated in Euros, which is primarily due to the nationality of our crew).

Depreciation and Amortization. Depreciation and amortization increased during 2012 compared to 2011, as a result of:

an increase of \$1.2 million due to the accelerated amortization of the intangible assets relating to the charter contracts of five Suezmax tankers as we expect the life of these intangible assets will be shorter than originally assumed; and

an increase of \$0.5 million due to a full year of amortization of dry-dock expenditures incurred in 2011.

Write down of Vessels. Write down of vessels was \$29.4 million for the year ended December 31, 2012, resulting from impairment of three Suezmax tankers on charter to CEPSA.

Other Operating Results

General and Administrative Expenses. General and administrative expenses increased 18.6% to \$19.0 million for 2012, from \$16.0 million for 2011, primarily as a result of:

an increase of \$3.0 million primarily as a result of an agreement executed with Teekay Corporation for business development services as of January 2012; and

Table of Contents

an increase of \$0.7 million as a result of a one-time procurement fee received in 2009 being fully amortized by the end of the first quarter of 2012;
partially offset by:

a decrease of \$0.9 million relating to the one-time management fee charged to us by Teekay Corporation in the first quarter of 2011, associated with the portion of stock-based compensation grants to Teekay Corporation's former Chief Executive Officer that had not yet vested prior to the date of his retirement. The general and administrative expenses for our Liquefied Gas segment increased whereas general and administrative expenses decreased for our Conventional Tanker segment in 2012 as compared to 2011 as a result of our growth in the liquefied gas market, including our equity accounted joint ventures, over 2012, which requires a higher level of administrative support.

Equity Income. Equity income was \$78.9 million for 2012, compared to \$20.6 million for 2011, as set forth in the table below:

(in thousands of U.S. Dollars)	Angola LNG Carriers	Exmar LNG Carriers	MALT LNG Carriers	RasGas 3 LNG Carriers	Total Equity Income
Year ended December 31, 2012	13,015	7,994	39,349	18,508	78,866
Year ended December 31, 2011	(40)	10,238	(833)	11,219	20,584
Difference	13,055	(2,244)	40,182	7,289	58,282

Equity income increased by \$58.3 million from the prior year, primarily as a result of:

an increase of \$40.2 million due to the acquisition of a 52% ownership interest in the six MALT LNG Carriers in February 2012;

an increase of \$11.4 million due to an unrealized gain on derivative instruments in 2012 compared to an unrealized loss on derivatives in 2011 in our 40% investment in the RasGas 3 LNG Carriers and our 33% investment in the Angola LNG Project; and

an increase of \$8.7 million due to our 33% investment in the Angola LNG Project that we acquired upon delivery of the four Angola LNG Carriers in the third and fourth quarters of 2011 and the first quarter of 2012;
partially offset by:

a decrease of \$2.2 million mainly due to a provision from a customer's claim relating to the two Exmar LNG Carriers in 2012 and from the off-hire of *Excalibur* for scheduled dry docking during 2012; partially offset

by off-hire days during 2011 as a result of in-water surveys performed on both LNG carriers.

Interest Expense. Interest expense increased to \$54.2 million for 2012, from \$49.9 million for 2011. Interest expense primarily reflects interest incurred on our capital lease obligations and long-term debt. This increase was primarily the result of:

an increase of \$6.0 million as a result of the NOK bond issuance in May 2012;

an increase of \$3.1 million as a result of refinancing one of our debt facilities with a higher margin than the previous debt facility;

an increase of \$2.3 million due to an increase in our borrowings upon our acquisitions of three LPG/Multigas vessels during the second, third and fourth quarters of 2011;

an increase of \$1.2 million due to increased LIBOR and a higher principal debt balance due to draws on an existing debt facility during 2012; and

an increase of \$0.6 million due to an interest rate adjustment on our five Suezmax tanker capital lease obligations (however, as described above, under the terms of the time-charter contracts for these vessels, we have a corresponding increase in charter receipts, which are reflected as an increase to voyage revenues); partially offset by:

a decrease of \$5.1 million due to the maturity of the *Madrid Spirit* capital lease in the fourth quarter of 2011 (the *Madrid Spirit* was financed pursuant to a Spanish tax lease arrangement, under which we borrowed under a term loan and deposited the proceeds into a restricted cash account and entered into a capital lease for the vessel; as a result, this decrease in interest expense from the capital lease is offset by a corresponding decrease in the interest income from restricted cash); and

a decrease of \$4.0 million due to lower EURIBOR relating to Euro-denominated debt.

Interest Income. Interest income decreased to \$3.5 million in 2012, from \$6.7 million for 2011. These changes were primarily the result of:

a decrease of \$4.4 million due to the repayment of the capital lease on one of our LNG carriers, the *Madrid Spirit*, during the fourth quarter of 2011, which was funded from restricted cash;

Table of Contents

partially offset by:

an increase of \$1.2 million due to increased LIBOR and restricted cash deposits during 2012 primarily relating to a \$30.0 million security deposit associated with the debt facility for the MALT LNG Carriers. *Realized and Unrealized Loss on Derivative Instruments*. Net realized and unrealized losses on derivative instruments decreased to a loss of (\$29.6) million for 2012, from a loss of (\$63.0) million for 2011 as set forth in the table below.

(in thousands of U.S. Dollars)	Year Ended December 31, 2012			Year Ended December 31, 2011		
	Realized gains (losses)	Unrealized gains (losses)	Total	Realized gains (losses)	Unrealized gains (losses)	Total
Interest rate swap agreements	(37,427)	5,200	(32,227)	(62,660)	(9,677)	(72,337)
Toledo Spirit time-charter derivative	907	1,700	2,607	(93)	9,400	9,307
	(36,520)	6,900	(29,620)	(62,753)	(277)	(63,030)

As at December 31, 2012 and 2011, we had interest rate swap agreements with an aggregate average net outstanding notional amount of approximately \$902.9 million and \$948.6 million, respectively, with average fixed rates of 4.6% and 4.8%, respectively. The decrease in realized losses from 2011 to 2012 relating to our interest rate swaps were primarily due to the settlement of our interest rate swaps relating to the debt on the *Madrid Spirit* for \$22.6 million in 2011 and higher short-term variable benchmark interest rates in 2012 compared to 2011.

During 2012, we recognized an unrealized gain on our interest rate swaps associated with our U.S. Dollar-denominated long-term debt and capital leases. The net unrealized gain resulted from the transfer of \$49.2 million of previously recognized unrealized losses to realized losses related to actual cash settlements, offset by an incremental \$34.4 million of unrealized losses relating to further declines in long-term LIBOR benchmark interest rates relative to the prior year. Long-term LIBOR benchmark interest rates declined during 2011; which resulted in us incurring an unrealized loss of \$154.1 million from our U.S. Dollar-denominated long-term debt and capital leases. The net unrealized loss was partially offset by a \$51.8 million unrealized gain resulting from interest rate swaps settlements made during the year.

Long-term forward EURIBOR benchmark interest rates declined during 2012 and 2011, which resulted in us incurring unrealized losses of \$15.5 million and \$0.4 million, respectively, from our interest rates swaps associated with our Euro-denominated long-term debt.

Long-term forward LIBOR benchmark interest rates declined during 2012 and 2011, which resulted in us recognizing unrealized gains of \$5.9 million and \$93.0 million from our interest rate swaps associated with our restricted cash deposits, respectively.

The projected average forward tanker rates in 2012 decreased compared to 2011, which resulted in a \$1.7 million unrealized gain on our Toledo Spirit time-charter derivative. The Toledo Spirit time-charter derivative is the agreement with Teekay Corporation under which Teekay Corporation pays us any amounts payable to the charterer of the *Toledo Spirit* as a result of spot rates being below the fixed rate, and we pay Teekay Corporation any amounts

payable to us by the charterer of the *Toledo Spirit* as a result of spot rates being in excess of the fixed rate (see Item 18 Financial Statements: Note 12 Derivative Instruments).

Foreign Currency Exchange (Losses) Gains. Foreign currency exchange (losses) gains were (\$8.2) million and \$10.3 million for 2012 and 2011, respectively. These foreign currency exchange (losses) gains, substantially all of which were unrealized, are due primarily to the relevant period-end revaluation of our NOK-denominated debt and our Euro-denominated term loans, capital leases and restricted cash for financial reporting purposes and the realized and unrealized (losses) gains on our cross currency swap. Losses on NOK-denominated and Euro-denominated monetary liabilities reflect a weaker U.S. Dollar against the NOK and Euro on the date of revaluation or settlement compared to the rate in effect at the beginning of the period. Gains on NOK-denominated and Euro-denominated monetary liabilities reflect a stronger U.S. Dollar against the NOK and Euro on the date of revaluation or settlement compared to the rate in effect at the beginning of the period.

For 2012, foreign currency exchange losses include realized gains of \$0.3 million and unrealized losses of \$2.7 million on our cross currency swap and unrealized losses of \$0.8 million on the revaluation of our NOK-denominated debt. For 2012, foreign currency exchange (losses) gains also include the revaluation of our Euro-denominated restricted cash, debt and capital leases resulting in an unrealized loss of (\$4.7) million as compared to an unrealized gain of \$10.5 million for 2011.

Other Income (Expense). Other income (expense) increased to \$1.7 million for 2012 from (\$0.1) million in 2011, primarily as a result of:

an increase of \$0.8 million due to the amortization of a guarantee liability related to the acquisition of the six MALT LNG Carriers in February 2012; and

an increase of \$0.5 million due to an insurance settlement relating to a 2011 claim on the LNG carrier *Algeciras Spirit*.

Liquidity and Cash Needs

Our business model is to employ our vessels on fixed-rate contracts with major oil companies, with original terms typically between 10 to 25 years. The operating cash flow our vessels generate each quarter, excluding a reserve for maintenance capital expenditures and debt repayments, are generally paid out to our unitholders within approximately 45 days after the end of each quarter. Our primary short-term liquidity needs are to pay these quarterly distributions on our outstanding units, payment of operating expenses, dry-docking expenditures, debt service costs and to fund general working capital requirements. We anticipate that our primary sources of funds for our short-term liquidity needs will be cash flows from operations.

Table of Contents

Our long-term liquidity needs primarily relate to expansion and maintenance capital expenditures and debt repayment. Expansion capital expenditures primarily represent the purchase or construction of vessels to the extent the expenditures increase the operating capacity or revenue generated by our fleet, while maintenance capital expenditures primarily consist of dry-docking expenditures and expenditures to replace vessels in order to maintain the operating capacity or revenue generated by our fleet. Our primary sources of funds for our long-term liquidity needs are from cash from operations, long-term bank borrowings and other debt or equity financings, or a combination thereof. Consequently, our ability to continue to expand the size of our fleet is dependent upon our ability to obtain long-term bank borrowings and other debt, as well as raising equity.

Our revolving credit facilities and term loans are described in Item 18 Financial Statements: Note 9 Long-Term Debt. They contain covenants and other restrictions typical of debt financing secured by vessels, that restrict the ship-owning subsidiaries from: incurring or guaranteeing indebtedness; changing ownership or structure, including mergers, consolidations, liquidations and dissolutions; making dividends or distributions if we are in default; making capital expenditures in excess of specified levels; making certain negative pledges and granting certain liens; selling, transferring, assigning or conveying assets; making certain loans and investments; and entering into a new line of business. Certain of our revolving credit facilities and term loans require us to maintain financial covenants. If we do not meet these financial covenants, the lender may accelerate the repayment of the revolving credit facilities and term loans, thus having a significant impact our short-term liquidity requirements. As at December 31, 2013, we and our affiliates were in compliance with all covenants relating to our credit facilities and term loans.

As at December 31, 2013, our cash and cash equivalents were \$139.5 million, compared to \$113.6 million at December 31, 2012. Our total liquidity, which consists of cash, cash equivalents and undrawn medium-term credit facilities, was \$332.2 million as at December 31, 2013, compared to \$495.0 million as at December 31, 2012. The decrease in total liquidity is primarily due to the acquisitions of the Awilco LNG carriers in September and November 2013, the acquisition of our 50% interest in the Exmar LPG Carriers in February 2013, the newbuilding installment payments for the three newbuilding LNG carriers ordered in July and November 2013 and the newbuilding installment payments for vessels within Exmar LPG BVBA; partially offset by proceeds received as a result of the private placement in the third quarter of 2013, the NOK bond issuance in September 2013 and a new debt facility secured for the first Awilco LNG Carrier acquired in September 2013.

As of December 31, 2013, we had a working capital deficit of \$67.1 million. The working capital deficit includes a \$31.7 million current capital lease obligation for three Suezmax tankers, under which the owner has the option to require us to purchase the vessels. The owner also has cancellation rights, as the charterer, under the charter contracts for these Suezmax tankers. For one of the three Suezmax tankers, the cancellation option is first exercisable in April 2014. We were notified by the charterer of their intention to terminate the charter contract for the *Huelva Spirit* and proceed with the sale of the vessel. Upon sale of the vessel, we will not be required to repay the capital lease obligation as the vessel under capital lease will be returned to the owner and the capital lease obligation will be concurrently extinguished.

We expect to manage the remaining portion of our working capital deficit primarily with net operating cash flow generated in 2014 and, to a lesser extent, existing undrawn revolving credit facilities. As at December 31, 2013 we had undrawn medium-term credit facilities of \$192.7 million.

As described under Item 4 Information on the Company: C. Regulations Other Environmental Initiatives, passage of any climate control legislation or other regulatory initiatives that restrict emissions of greenhouse gases could have a significant financial and operational impact on our business, which we cannot predict with certainty at this time. Such regulatory measures could increase our costs related to operating and maintaining our vessels and require us to install new emission controls, acquire allowances or pay taxes related to our greenhouse gas emissions, or administer and

manage a greenhouse gas emissions program. In addition, increased regulation of greenhouse gases may, in the long term, lead to reduced demand for oil and gas and reduced demand for our services.

Cash Flows. The following table summarizes our cash flow for the periods presented:

(in thousands of U.S. Dollars)	Year Ended December 31,		
	2013	2012	2011
Net cash flow from operating activities	183,532	192,013	122,046
Net cash flow from financing activities	334,684	30,374	7,174
Net cash flow used for investing activities	(492,312)	(202,437)	(116,648)

Operating Cash Flows. Net cash flow from operating activities decreased to \$183.5 million in 2013 from \$192.0 million in 2012, primarily due to a greater number of off-hire days relating to scheduled dry dockings during 2013 compared to 2012, a corresponding increase in dry-docking expenditures and less dividends received from our equity accounted joint ventures during 2013. Net cash flow from operating activities increased to \$192.0 million in 2012 from \$122.0 million in 2011, primarily due to fewer off-hire days relating to scheduled dry dockings in 2012 compared to 2011, a corresponding decrease in dry-docking expenditures in 2012 and lower net cash flows in 2011 due to the settlement of our interest rate swaps relating to the debt on the *Madrid Spirit* upon refinancing this debt. Net cash flow from operating activities depends upon the timing and amount of dry-docking expenditures, repair and maintenance activity, the impact of vessel additions and dispositions on operating cash flows, foreign currency rates, changes in interest rates, timing of dividends from equity accounted investments, fluctuations in working capital balances and spot market hire rates (to the extent we have vessels operating in the spot tanker market or our hire rates are partially affected by spot market rates). The number of vessel dry dockings tends to vary each period depending on the vessel's maintenance schedule.

Financing Cash Flows. Our investments in vessels and equipment are financed primarily with term loans, capital lease arrangements and proceeds from issuance of securities. Proceeds from long-term debt were \$719.3 million, \$500.3 million and \$600.9 million, respectively, for 2013, 2012 and 2011. The proceeds from long-term debt for 2013 includes proceeds received from the issuance of our NOK 900 million senior unsecured bonds in September 2013 and a new debt facility secured for the first Awilco LNG Carrier acquired in September 2013. From time to time, we refinance our loans and revolving credit facilities. During 2013, we primarily used the proceeds from the issuance of securities and long-term debt to

Table of Contents

fund the acquisition of our 50% interest in the Exmar LPG Carriers for \$135.8 million (including a \$2.7 million acquisition fee); fund the acquisition of the Awilco LNG Carriers in September and November 2013 for \$205.0 million each less a \$51 million upfront prepayment of charter hire (inclusive of a \$1.0 million upfront fee) for each of the two vessels; fund construction costs of \$58.6 million for our three additional LNG newbuilding carriers ordered in July and November 2013; provide an advance of \$13.8 million to Exmar LPG BVBA for the purpose of funding newbuildings; prepay and repay outstanding debt under our revolving credit facilities; and fund general partnership purposes. During 2012, we primarily used the proceeds from long-term debt to fund the acquisition of our 52% interest in the six MALT LNG Carriers, to fund the first installment payment for two LNG newbuildings, to fund the acquisition of our 33% interest in the fourth Angola LNG Carrier, to prepay and repay outstanding debt under our revolving credit facilities and for general corporate purposes. During 2011, we refinanced the debt relating to the *Madrid Spirit* upon acquisition of the vessel when its capital lease ended. We also used the proceeds from long-term debt primarily to fund the acquisition of the first three Angola LNG Carriers, the acquisition of the two Skaugen Multigas Carriers and the last Skaugen LPG carrier.

On October 7, 2013, we completed a public offering of approximately 3.5 million common units at a price of \$42.62 per unit, for net proceeds of \$144.8. On July 30, 2013, we completed a direct equity placement of approximately 0.9 million common units for net proceeds of \$40.8 million. On May 22, 2013, we implemented a COP and sold an aggregate of approximately 0.1 million common units during 2013 for net proceeds of \$4.9 million. On September 10, 2012, we completed a public offering of approximately 4.8 million common units at a price of \$38.43 per unit, for net proceeds of \$182.3 million. On November 2, 2011, we completed a public equity offering of approximately 5.5 million common units at a price of \$33.40 per unit, for net proceeds of \$179.5 million. On April 8, 2011, we completed a public equity offering of approximately 4.3 million common units at a price of \$38.88 per unit, for net proceeds of \$161.7 million. Please read item 18 Financial Statements: Note 15 Total Capital and Net Income Per Unit.

Cash distributions paid during 2013 increased to \$215.4 million from \$195.9 million for the prior year. This increase was the result of:

an increase in the number of units eligible to receive the cash distribution as a result of the equity offerings during 2013 and 2012; and

an increase in our quarterly distribution to \$0.675 per unit from \$0.630 per unit starting with the second quarter distribution in 2012.

Cash distributions paid during 2012 increased to \$195.9 million from \$159.4 million for the prior year. This increase was the result of:

an increase in the number of units eligible to receive the cash distribution as a result of the equity offerings during 2012 and 2011; and

an increase in our quarterly distribution to \$0.675 per unit from \$0.630 per unit starting with the second quarter distribution in 2012.

After December 31, 2013, a cash distribution totaling \$58.9 million was declared with respect to the fourth quarter of 2013, which was paid in February 2014. This cash distribution reflected an increase in our quarterly distribution to \$0.6918 per unit from \$0.6750 per unit.

Investing Cash Flows Net cash flow used in investing activities increased to \$492.3 million in 2013 from \$202.4 million in 2012, primarily due to fund the acquisitions of two LNG carriers from Awilco in September and November 2013 of \$308.0 million, \$135.8 million to fund our 50% interest in the Exmar LPG Carriers and \$58.6 million incurred for our three additional LNG newbuilding carriers ordered in July and November 2013. During 2012, we used cash of \$151.0 million (including working capital contribution and acquisition costs) to fund the acquisition of our 52% interest in the six MALT LNG Carriers, \$38.6 million to fund the first installment payment for two LNG newbuildings and \$19.1 million for our acquisition of a 33% interest in the fourth and last Angola LNG Carrier. During 2011, we incurred \$64.7 million of capital expenditures for vessels and equipment. These expenditures represent construction payments for the two Skaugen Multigas Carrier newbuildings, the acquisition of the *Norgas Camilla* in September 2011 and capital modifications for certain of our vessels. In addition, during 2011 we used \$57.3 million for the purchase of Teekay Corporation's 33% ownership interest in three of the Angola LNG Carriers.

Credit Facilities

Our revolving credit facilities and term loans are described in Item 18 Financial Statements: Note 9 Long-Term Debt. Our term loans and revolving credit facilities contain covenants and other restrictions typical of debt financing secured by vessels, including, among others, one or more of the following that restrict the ship-owning subsidiaries from:

incurring or guaranteeing indebtedness;

changing ownership or structure, including mergers, consolidations, liquidations and dissolutions;

making dividends or distributions if we are in default;

making capital expenditures in excess of specified levels;

making certain negative pledges and granting certain liens;

selling, transferring, assigning or conveying assets;

making certain loans and investments; and

entering into a new line of business.

Certain loan agreements require a) that minimum levels of tangible net worth and aggregate liquidity be maintained, b) that we maintain certain ratios of vessel values as it relates to the relevant outstanding loan principal balance, c) that we provide for a maximum level of leverage and d) one of our subsidiaries to maintain restricted cash deposits. Our ship-owning subsidiaries may not, among other things, pay dividends or distributions if it is in default under its term

loans or revolving credit facilities. One of our term loans is guaranteed by Teekay Corporation and contains covenants that require Teekay Corporation to maintain the greater of a minimum liquidity (cash and cash equivalents) of at least \$50.0 million and 5.0% of Teekay Corporation's total consolidated debt which has recourse to Teekay Corporation. As at December 31, 2013, we and our affiliates were in compliance with all covenants relating to our credit facilities and capital leases.

Table of Contents

We have two facilities that require us to maintain vessel value to outstanding loan principal balance ratios of 110% and 115%, respectively. As at December 31, 2013, we had vessel value to outstanding loan principal balance ratios of 141% and 148%, respectively. The vessel values are determined using reference to second-hand market comparables or using a depreciated replacement cost approach. Since vessel values can be volatile, our estimates of market value may not be indicative of either the current or future prices that could be obtained if the Partnership sold any of the vessels.

Table of Contents**Contractual Obligations and Contingencies**

The following table summarizes our contractual obligations as at December 31, 2013:

	Total	2014	2015 and 2016	2017 and 2018	Beyond 2018
	(in millions of U.S. Dollars)				
U.S. Dollar-Denominated Obligations:					
Long-term debt ⁽¹⁾	1,173.8	80.6	218.0	533.6	341.6
Commitments under capital leases ⁽²⁾	140.1	66.4	15.5	58.2	
Commitments under capital leases ⁽³⁾	953.1	24.0	48.0	48.0	833.1
Commitments under operating leases ⁽⁴⁾	378.0	24.8	49.6	49.5	254.1
Newbuilding installments ⁽⁵⁾	952.8	89.7	434.6	428.5	
Total U.S. Dollar-denominated obligations	3,597.8	285.5	765.7	1,117.8	1,428.8
Euro-Denominated Obligations: ⁽⁶⁾					
Long-term debt ⁽⁷⁾	340.2	16.5	36.7	183.5	103.5
Total Euro-denominated obligations	340.2	16.5	36.7	183.5	103.5
Norwegian Kroner-Denominated Obligations:⁽⁶⁾					
Long-term debt ⁽⁸⁾	263.5			263.5	
Total Norwegian Kroner-Denominated obligations	263.5			263.5	
Totals	4,201.5	302.0	802.4	1,564.8	1,532.3

- (1) Excludes expected interest payments of \$17.2 million (2014), \$28.5 million (2015 and 2016), \$18.8 million (2017 and 2018) and \$11.6 million (beyond 2018). Expected interest payments are based on the existing interest rates (fixed-rate loans) and LIBOR at December 31, 2013, plus margins on debt that has been drawn that ranged up to 3.20% (variable-rate loans). The expected interest payments do not reflect the effect of related interest rate swaps that we have used as an economic hedge of certain of our variable-rate debt.
- (2) Includes, in addition to lease payments, amounts we may be required to pay to purchase four leased vessels from 2014 to the end of the period when cancellation options are first exercisable. The purchase price will be based on the unamortized portion of the vessel construction financing costs for the vessels, which are included in the table above. We expect to satisfy the purchase price by assuming the existing vessel financing, although we may be required to obtain separate debt or equity financing to complete the purchases if the lenders do not consent to our assuming the financing obligations. Subsequent to December 31, 2013, CEPSA reached an agreement to sell one of the vessels, the *Algeciras Spirit*, and upon redelivery to its new owner on February 28, 2014, the charter contract with us was terminated. As a result of the sale of the vessel, we were not required to pay the \$30.1 million balance of the capital lease obligation as the vessel under capital lease was returned to the owner and the capital lease obligation was concurrently extinguished. Please read Item 18 Financial Statements: Note 4 Leases

and Restricted Cash.

- (3) Existing restricted cash deposits of \$475.6 million, together with the interest earned on these deposits, are expected to be sufficient to repay the remaining amounts we currently owe under the lease arrangements.
- (4) We have corresponding leases whereby we are the lessor and expect to receive approximately \$332.6 million for these leases from 2014 to 2029. Please read Item 18 Financial Statements: Note 4 Leases and Restricted Cash.
- (5) In December 2012, July and November 2013, we entered into agreements for the construction of five LNG newbuildings. The remaining cost for these five newbuildings totals \$952.8 million, including estimated interest and construction supervision fees. The table above excludes 12 LPG newbuilding carriers scheduled for delivery between 2014 and 2018 that are within the joint venture between Exmar and us. As at December 31, 2013, our 50% share of the remaining cost for these 12 newbuildings total \$260.0 million, including estimated interest and construction supervision fees.
- (6) Euro-denominated and NOK-denominated obligations are presented in U.S. Dollars and have been converted using the prevailing exchange rate as of December 31, 2013.
- (7) Excludes expected interest payments of \$5.9 million (2014), \$10.8 million (2015 and 2016), \$7.8 million (2017 and 2018) and \$2.9 million (beyond 2018). Expected interest payments are based on EURIBOR at December 31, 2013, plus margins that ranged up to 2.25%, as well as the prevailing U.S. Dollar/Euro exchange rate as of December 31, 2013. The expected interest payments do not reflect the effect of related interest rate swaps that we have used as an economic hedge of certain of our variable-rate debt.
- (8) Excludes expected interest payments of \$16.9 million (2014), \$33.8 million (2015 and 2016) and \$17.6 million (2017 and 2018). Expected interest payments are based on NIBOR at December 31, 2013, plus a margins that range up to 5.25%, as well as the prevailing U.S. Dollar/NOK exchange rate as of December 31, 2013. The expected interest payments do not reflect the effect of the related cross currency swap that we have used as an economic hedge of our foreign exchange and interest rate exposure associated with our NOK-denominated long-term debt.

Table of Contents**Off-Balance Sheet Arrangements**

We have no off-balance sheet arrangements. The details of our equity accounted investments are shown in Item 18 Financial Statements: Note 5 – Equity Method Investments.

Critical Accounting Estimates

We prepare our consolidated financial statements in accordance with GAAP, which require us to make estimates in the application of our accounting policies based on our best assumptions, judgments and opinions. On a regular basis, management reviews the accounting policies, assumptions, estimates and judgments to ensure that our consolidated financial statements are presented fairly and in accordance with GAAP. However, because future events and their effects cannot be determined with certainty, actual results could differ from our assumptions and estimates, and such differences could be material. Accounting estimates and assumptions discussed in this section are those that we consider to be the most critical to an understanding of our financial statements, because they inherently involve significant judgments and uncertainties. For a further description of our material accounting policies, please read Item 18 – Financial Statements: Note 1 – Basis of Presentation and Significant Accounting Policies.

Vessel Lives and Impairment

Description. The carrying value of each of our vessels represents its original cost at the time of delivery or purchase less depreciation and impairment charges. We depreciate the original cost, less an estimated residual value, of our vessels on a straight-line basis over each vessel's estimated useful life. The carrying values of our vessels may not represent their market value at any point in time because the market prices of second-hand vessels tend to fluctuate with changes in charter rates and the cost of newbuildings. Both charter rates and newbuilding costs tend to be cyclical in nature.

We review vessels and equipment for impairment whenever events or circumstances indicate the carrying value of an asset, including the carrying value of the charter contract, if any, under which the vessel is employed, may not be recoverable. This occurs when the asset's carrying value is greater than the future undiscounted cash flows the asset is expected to generate over its remaining useful life. For a vessel under charter, the discounted cash flows from that vessel may exceed its market value, as market values may assume the vessel is not employed on an existing charter. If the estimated future undiscounted cash flows of an asset exceeds the asset's carrying value, no impairment is recognized even though the fair value of the asset may be lower than its carrying value. If the estimated future undiscounted cash flows of an asset is less than the asset's carrying value and the fair value of the asset is less than its carrying value, the asset is written down to its fair value. Fair value is calculated as the net present value of estimated future cash flows, which, in certain circumstances, will approximate the estimated market value of the vessel.

Our business model is to employ our vessels on fixed-rate contracts with major oil companies. These contracts generally have original terms between 10 to 25 years in length. Consequently, while the market value of a vessel may decline below its carrying value, the carrying value of a vessel may still be recoverable based on the future undiscounted cash flows the vessel is expected to obtain from servicing its existing contract and future contracts.

The following table presents by segment the aggregate market values and carrying values of certain of our vessels that we have determined have a market value that is less than their carrying value as of December 31, 2013. Specifically, the following table reflects all such vessels, except those operating on contracts where the remaining term is significant and the estimated future undiscounted cash flows relating to such contracts are sufficiently greater than the carrying value of the vessels such that we consider it unlikely an impairment would be recognized in the following year. Consequently, the vessels included in the following table generally include those vessels near the end of existing

charters or other operational contracts. While the market values of these vessels are below their carrying values, no impairment has been recognized on any of these vessels as the estimated future undiscounted cash flows relating to such vessels are greater than their carrying values.

We would consider the vessels reflected in the following table to be at a higher risk of future impairment. The estimated future undiscounted cash flows of the vessels reflected in the following table are significantly greater than their respective carrying values. Consequently, in these cases the following table would not necessarily represent vessels that would likely be impaired in the next 12 months, and the recognition of an impairment in the future for those vessels may primarily depend upon our deciding to dispose of the vessel instead of continuing to operate it. In deciding whether to dispose of a vessel, we determine whether it is economically preferable to sell the vessel or continue to operate it. This assessment includes an estimate of the net proceeds expected to be received if the vessel is sold in its existing condition compared to the present value of the vessel's estimated future revenue, net of operating costs. Such estimates are based on the terms of the existing charter, charter market outlook and estimated operating costs, given a vessel's type, condition and age. In addition, we typically do not dispose of a vessel that is servicing an existing customer contract.

(in thousands of U.S. Dollars, except number of vessels)

Reportable Segment	Number of Vessels	Market Values ⁽¹⁾	Carrying Values
		\$	\$
Conventional Tanker Segment ⁽²⁾	3	78,000	114,354

(1) Market values are determined using reference to second-hand market comparable values as at December 31, 2013. Since vessel values can be volatile, our estimates of market value may not be indicative of either the current or future prices we could obtain if we sold any of the vessels.

(2) Undiscounted cash flows are significantly greater than the carrying values.

Judgments and Uncertainties. Depreciation is calculated using an estimated useful life of 25 years for conventional tankers, 30 years for LPG Carriers and 35 years for LNG carriers, commencing at the date the vessel was originally delivered from the shipyard. However, the actual life of a vessel may be different than the estimated useful life, with a shorter actual useful life resulting in an increase in the quarterly depreciation and potentially resulting in an impairment loss. The estimated useful life of our vessels takes into account design life, commercial considerations and

Table of Contents

regulatory restrictions. Our estimates of future cash flows involve assumptions about future charter rates, vessel utilization, operating expenses, dry-docking expenditures, vessel residual values and the remaining estimated life of our vessels. Our estimated charter rates are based on rates under existing vessel contracts and market rates at which we expect we can re-charter our vessels. Our estimates of vessel utilization, including estimated off-hire time, are based on historical experience. Our estimates of operating expenses and dry-docking expenditures are based on historical operating and dry-docking costs and our expectations of future inflation and operating requirements. Vessel residual values are a product of a vessel's lightweight tonnage and an estimated scrap rate. The remaining estimated lives of our vessels used in our estimates of future cash flows are consistent with those used in the calculation of depreciation.

Certain assumptions relating to our estimates of future cash flows are more predictable by their nature in our historical experience, including estimated revenue under existing contract terms, on-going operating costs and remaining vessel life. Certain assumptions relating to our estimates of future cash flows require more discretion and are inherently less predictable, such as future charter rates beyond the firm period of existing contracts and vessel residual values, due to factors such as the volatility in vessel charter rates and vessel values. We believe that the assumptions used to estimate future cash flows of our vessels are reasonable at the time they are made. We can make no assurances, however, as to whether our estimates of future cash flows, particularly future vessel charter rates or vessel values, will be accurate.

Effect if Actual Results Differ from Assumptions. If we conclude that a vessel or equipment is impaired, we recognize a loss in an amount equal to the excess of the carrying value of the asset over its fair value at the date of impairment. The written-down amount becomes the new lower cost basis and will result in a lower annual depreciation expense than for periods before the vessel impairment.

Dry-docking Life

Description. We capitalize a portion of the costs we incur during dry docking and for an intermediate survey and amortize those costs on a straight-line basis over the useful life of the dry dock. We expense costs related to routine repairs and maintenance incurred during dry docking that do not improve operating efficiency or extend the useful lives of the assets.

Judgments and Uncertainties. Amortization of capitalized dry-dock expenditures requires us to estimate the period of the next dry docking and useful life of dry-dock expenditures. While we typically dry dock each vessel every five years and have a shipping society classification intermediate survey performed on our LNG and LPG carriers between the second and third year of the five-year dry-docking period, we may dry dock the vessels at an earlier date, with a shorter life resulting in an increase in the amortization.

Effect if Actual Results Differ from Assumptions. If we change our estimate of the next dry-dock date for a vessel, we will adjust our annual amortization of dry-docking expenditures. Amortization expense of capitalized dry-dock expenditures for 2013, 2012 and 2011 were \$13.4 million, \$13.1 million and \$9.6 million. As at December 31, 2013, 2012 and 2011 our capitalized dry-dock expenditures were \$27.2 million, \$7.5 million and \$19.6 million, respectively. A one-year reduction in the estimated useful lives of capitalized dry-dock expenditures would result in an increase in our current annual amortization by approximately \$2.4 million.

Goodwill and Intangible Assets

Description. We allocate the cost of acquired companies, including acquisitions of equity accounted investments, to the identifiable tangible and intangible assets and liabilities acquired, with the remaining amount being classified as goodwill. Certain intangible assets, such as time-charter contracts, are being amortized over time. Our future operating performance will be affected by the amortization of intangible assets and potential impairment charges related to

goodwill and intangibles. Accordingly, the allocation of purchase price to intangible assets and goodwill may significantly affect our future operating results.

Goodwill is not amortized, but reviewed for impairment at the reporting unit level on annual basis or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value a reporting unit below its carrying value. When goodwill is reviewed for impairment, we may elect to assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, including goodwill. Alternatively, we may bypass this step and use a fair value approach to identify potential goodwill impairment and, when necessary, measure the amount of impairment. The Partnership uses a discounted cash flow model to determine the fair value of reporting units, unless there is a readily determinable fair market value. Intangible assets are assessed for impairment when and if impairment indicators exist. An impairment loss is recognized if the carrying amount of an intangible asset is not recoverable and its carrying amount exceeds its fair value.

Judgments and Uncertainties. The allocation of the purchase price of acquired companies to intangible assets and goodwill requires management to make significant estimates and assumptions, including estimates of future cash flows expected to be generated by the acquired assets and the appropriate discount rate to value these cash flows. In addition, the process of evaluating the potential impairment of goodwill and intangible assets is highly subjective and requires significant judgment at many points during the analysis. The fair value of our reporting units was estimated based on discounted expected future cash flows using a weighted-average cost of capital rate. The estimates and assumptions regarding expected cash flows and the discount rate require considerable judgment and are based upon existing contracts, historical experience, financial forecasts and industry trends and conditions.

At December 31, 2013, we had one reporting unit with goodwill attributable to it. As of the date of this filing, we do not believe that there is a reasonable possibility that the goodwill attributable to this reporting unit might be impaired within the next year. However, certain factors that impact this assessment are inherently difficult to forecast and as such we cannot provide any assurances that an impairment will or will not occur in the future. An assessment for impairment involves a number of assumptions and estimates that are based on factors that are beyond our control. These are discussed in more detail in the following section entitled in Part I Forward-Looking Statements.

Amortization expense of intangible assets for each of the years 2013, 2012 and 2011 was \$13.1 million, \$11.0 million and \$9.6 million, respectively. If actual results are not consistent with our estimates used to value our intangible assets, we may be exposed to an impairment charge and a decrease in the annual amortization expense of our intangible assets.

Table of Contents

Valuation of Derivative Instruments

Description. Our risk management policies permit the use of derivative financial instruments to manage interest rate risk, foreign exchange risk and spot tanker market risk. Changes in fair value of derivative financial instruments that are not designated as cash flow hedges for accounting purposes are recognized in earnings.

Judgments and Uncertainties. A substantial majority of the fair value of our derivative instruments and the change in fair value of our derivative instruments from period to period result from our use of interest rate swap agreements. The fair value of our interest rate swap agreements is the estimated amount that we would receive or pay to terminate the agreements at the reporting date, taking into account current interest rates and the current credit worthiness of both us and the swap counterparties. The estimated amount is the present value of estimated future cash flows, being equal to the difference between the benchmark interest rate and the fixed rate in the interest rate swap agreement, multiplied by the notional principal amount of the interest rate swap agreement at each interest reset date.

The fair value of our interest and currency swap agreements at the end of each period are most significantly affected by the interest rate implied by the benchmark interest yield curve, including its relative steepness, and forward foreign exchange rates. Interest rates and foreign exchange rates have experienced significant volatility in recent years in both the short and long term. While the fair value of our interest and currency swap agreements are typically more sensitive to changes in short-term rates, significant changes in the long-term benchmark interest and foreign exchange rates also materially impact our interest and currency swap agreements.

The fair value of our interest and currency swap agreements are also affected by changes in our specific credit risk included in the discount factor. We discount our interest rate swap agreements with reference to the credit default swap spreads of similarly rated global industrial companies and by considering any underlying collateral. The process of determining credit worthiness requires significant judgment in determining which source of credit risk information most closely matches our risk profile.

The benchmark interest rate yield curve and our specific credit risk are expected to vary over the life of the interest rate swap agreements. The larger the notional amount of the interest rate swap agreements outstanding and the longer the remaining duration of the interest rate swap agreements, the larger the impact of any variability in these factors will be on the fair value of our interest rate swaps. We economically hedge the interest rate exposure on a significant amount of our long-term debt and for long durations. As such, we have historically experienced, and we expect to continue to experience, material variations in the period-to-period fair value of our derivative instruments.

The fair value of our derivative instrument relating to the agreement between us and Teekay Corporation for the Toledo Spirit time-charter contract is the estimated amount that we would receive or pay to terminate the agreement at the reporting date. This amount is estimated using the present value of our projected future spot market tanker rates, which has been derived from current spot market rates and long-term historical average rates.

Effect if Actual Results Differ from Assumptions. Although we measure the fair value of our derivative instruments utilizing the inputs and assumptions described above, if we were to terminate the agreements at the reporting date, the amount we would pay or receive to terminate the derivative instruments may differ from our estimate of fair value. If the estimated fair value differs from the actual termination amount, an adjustment to the carrying amount of the applicable derivative asset or liability would be recognized in earnings for the current period. Such adjustments could be material. See Item 18 Financial Statements: Note 12 Derivative Instruments for the effects on the change in fair value of our derivative instruments on our consolidated statements of income and comprehensive income.

Taxes

Description. We record a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized.

Judgments and Uncertainties. The future realization of deferred tax assets depends on the existence of sufficient taxable income of the appropriate character in either the carryback or carryforward period. This analysis requires, among other things, the use of estimates and projections in determining future reversals of temporary differences, forecasts of future profitability and evaluating potential tax-planning strategies.

Effect if Actual Results Differ from Assumptions. If we determined that we were able to realize a net deferred tax asset in the future, in excess of the net recorded amount, an adjustment to the deferred tax assets would typically increase our net income (or decrease our loss) in the period such determination was made. Likewise, if we determined that we were not able to realize all or a part of our deferred tax asset in the future, an adjustment to the deferred tax assets would typically decrease our net income (or increase our loss) in the period such determination was made. As at December 31, 2013, we had a valuation allowance of \$73.1 million (2012 \$85.9 million).

Item 6. Directors, Senior Management and Employees

Management of Teekay LNG Partners L.P.

Teekay GP L.L.C., our General Partner, manages our operations and activities. Unitholders are not entitled to elect the directors of our General Partner or directly or indirectly participate in our management or operation.

Our General Partner owes a fiduciary duty to our unitholders. Our General Partner is liable, as general partner, for all of our debts (to the extent not paid from our assets), except for indebtedness or other obligations that are expressly nonrecourse to it. Whenever possible, our General Partner intends to cause us to incur indebtedness or other obligations that are nonrecourse to it.

The directors of our General Partner oversee our operations. The day-to-day affairs of our business are managed by the officers of our General Partner and key employees of certain of our operating subsidiaries. Employees of certain subsidiaries of Teekay Corporation provide assistance to us and our operating subsidiaries pursuant to services agreements. Please read Item 7 Major Unitholders and Related Party Transactions.

The Chief Executive Officer and Chief Financial Officer of our General Partner, Peter Evensen, allocates his time between managing our business and affairs and the business and affairs of Teekay Corporation and its subsidiaries Teekay Offshore (NYSE: TOO) and Teekay Tankers Ltd. (NYSE: TNK) (or *Teekay Tankers*). Mr. Evensen is the President and Chief Executive Officer of Teekay Corporation. He also holds the roles of Chief

Table of Contents

Executive Officer and Chief Financial Officer of Teekay Offshore's general partner, Teekay Offshore GP L.L.C. The amount of time Mr. Evensen allocates between our business and the businesses of Teekay Corporation and Teekay Offshore varies from time to time depending on various circumstances and needs of the businesses, such as the relative levels of strategic activities of the businesses. We believe Mr. Evensen devotes sufficient time to our business and affairs as is necessary for their proper conduct.

Officers of our General Partner and those individuals providing services to us or our subsidiaries may face a conflict regarding the allocation of their time between our business and the other business interests of Teekay Corporation or its affiliates. Our General Partner seeks to cause its officers to devote as much time to the management of our business and affairs as is necessary for the proper conduct of our business and affairs.

Directors, Executive Officers and Key Employees

The following table provides information about the directors and executive officers of our General Partner and a key employee of our operating subsidiary Teekay Shipping Spain SL. Directors are elected for one-year terms. The business address of each of our directors and executive officers listed below is c/o 4th Floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08, Bermuda. The business address of our key employee of Teekay Shipping Spain SL is Musgo Street 5 28023, Madrid, Spain. Ages of the individuals are as of December 31, 2013.

Name	Age	Position
C. Sean Day	64	Chairman
Peter Evensen	55	Chief Executive Officer, Chief Financial Officer and Director
Robert E. Boyd	75	Director until March 11, 2014 ⁽¹⁾⁽²⁾⁽³⁾⁽⁶⁾
Beverlee F. Park	51	Director beginning March 11, 2014 ⁽¹⁾⁽³⁾⁽⁶⁾
Kenneth Hvid	45	Director until September 18, 2012 and rejoined on February 19, 2013 ⁽⁴⁾
Ida Jane Hinkley	63	Director ⁽¹⁾⁽²⁾⁽³⁾
Joseph E. McKechnie	55	Director beginning February 19, 2013 ⁽²⁾⁽⁵⁾
George Watson	66	Director ⁽¹⁾⁽²⁾⁽³⁾
Michael Balaski	57	Vice President
Andres Luna	57	Managing Director, Teekay Shipping Spain SL

(1) Member of Audit Committee.

(2) Member of Conflicts Committee.

(3) Member of Corporate Governance Committee.

(4) Mr. Kenneth Hvid resigned from the General Partner's Board effective September 18, 2012 to allow the Board to maintain a majority of independent directors and rejoined the Board on February 19, 2013.

(5) Mr. Joseph E. McKechnie joined the Board and Conflicts Committee on February 19, 2013, replacing Mr. Ihab J.M. Massoud, who retired from the Board effective September 14, 2012.

(6) Ms. Beverlee F. Park joined the Board, Governance Committee and role as Chair of Audit Committee on March 11, 2014, replacing Mr. Robert E. Boyd, who retired from the Board on the same day.

Certain biographical information about each of these individuals is set forth below:

C. Sean Day has served as Chairman of Teekay GP L.L.C. since it was formed in November 2004. Mr. Day has also served as Chairman of the Board for Teekay Corporation since September 1999, and Teekay Offshore GP L.L.C. since it was formed in August 2006, and Teekay Tankers Ltd. since it was formed in October 2007 until June 2013.

From 1989 to 1999, he was President and Chief Executive Officer of Navios Corporation, a large bulk shipping company based in Stamford, Connecticut. Prior to this, Mr. Day held a number of senior management positions in the shipping and finance industry. He is currently serving as a Director of Kirby Corporation and Chairman of Compass Diversified Holdings. Mr. Day is engaged as a consultant to Kattegat Limited, the parent company of Teekay's largest shareholder, to oversee its investments, including that in the Teekay group of companies.

Peter Evensen has served as Chief Executive Officer and Chief Financial Officer of Teekay GP L.L.C. since it was formed in November 2004 and as a Director since January 2005. He has also served as Chief Executive Officer, Chief Financial Officer, a Director of Teekay Offshore GP L.L.C., formed in August 2006 and as a Director of Teekay Tankers Ltd., formed in October 2007. Effective April 1, 2011, he assumed the position of President and Chief Executive Officer of Teekay Corporation and also became a Director of Teekay Corporation. Mr. Evensen joined Teekay Corporation in May 2003 as Senior Vice President, Treasurer and Chief Financial Officer. He was appointed Executive Vice President and Chief Strategy Officer of Teekay Corporation in 2006. Mr. Evensen has over 25 years experience in banking and shipping finance. Prior to joining Teekay Corporation, Mr. Evensen was Managing Director and Head of Global Shipping at J.P. Morgan Securities Inc., and worked in other senior positions for its predecessor firms. His international industry experience includes positions in New York, London and Oslo.

Robert E. Boyd has served as a Director of Teekay GP L.L.C. since January 2005 until he retired from the Board on March 11, 2014. From May 1999 until his retirement in March 2004, Mr. Boyd was employed as the Senior Vice President and Chief Financial Officer of Teknion Corporation, a company engaged in the design, manufacture and marketing of office systems and office furniture products. From 1991 to 1999, Mr. Boyd was employed by The Oshawa Group Limited, a company engaged in the wholesale and retail distribution of food products and real estate activities, where his positions included Executive Vice President-Financial and Chief Financial Officer. Prior to 1991, Mr. Boyd held senior financial positions with several major companies, including Gulf Oil Corporation.

Table of Contents

Beverlee F. Park joined the board of Teekay GP L.L.C. as a Director and Chair of our Audit Committee on March 11, 2014. She has served at the board, CEO, COO and CFO level in publicly-traded, private and Crown corporations and has experience in an array of operating environments in both the domestic and offshore markets. Ms. Park was elected as a Fellow of the Institute of Chartered Accountants of British Columbia in 2012. She has served on and acted as Chair of various audit committees. Ms. Park is currently a board member of InTransit BC and several community boards, including the Simon Fraser University Beedie School of Business Dean's Advisory Board and the Simon Fraser University Community Corporation.

Kenneth Hvid served as a Director of Teekay GP L.L.C. from April 1, 2011 to September 18, 2012, when he resigned from this position to allow the Board to maintain a majority of independent Directors. Mr. Hvid rejoined the Board as a Director of Teekay GP L.L.C. on February 19, 2013. Since April 2011, he has served as Executive Vice President and Chief Strategy Officer of Teekay Corporation and as a Director of Teekay Offshore GP L.L.C. He joined Teekay Corporation in October 2000 and was responsible for leading its global procurement activities until he was promoted in 2004 to Senior Vice President, Teekay Gas Services. During this time, Mr. Hvid was involved in leading Teekay Corporation through its entry and growth in the LNG business. He held this position until the beginning of 2006, when he was appointed President of the Teekay Shuttle and Offshore division of Teekay Corporation. In this role, he was responsible for Teekay Corporation's global shuttle tanker and floating storage and offtake business and related offshore activities. Mr. Hvid has 25 years of global shipping experience, 12 of which were spent with A.P. Moller in Copenhagen, San Francisco and Hong Kong. In 2007 Mr. Hvid joined the Board of Directors of Gard P&I (Bermuda) Ltd.

Ida Jane Hinkley has served as a Director of Teekay GP L.L.C. since January 2005. From 1998 to 2001, she served as Managing Director of Navion Shipping AS, a shipping company at that time affiliated with the Norwegian state-owned oil company Statoil ASA (and subsequently acquired by Teekay Corporation's in 2003). From 1980 to 1997, Ms. Hinkley was employed by the Gotaas-Larsen Shipping Corporation, an international provider of marine transportation services for crude oil and gas (including LNG), serving as its Chief Financial Officer from 1988 to 1992 and its Managing Director from 1993 to 1997. She currently serves as a non-executive director on the Board of Premier Oil plc, a London Stock Exchange listed oil exploration and production company. From 2007 to 2008 she served as a non-executive director on the Board of Revus Energy ASA, a Norwegian listed oil company. In December, 2012 Ms. Hinkley was appointed non-executive director of Vesuvius plc, a London Stock Exchange listed engineering company.

Joseph E. McKechnie joined the board of Teekay GP L.L.C. on February 19, 2013. Mr. McKechnie is a retired United States Coast Guard Officer, having served for more than 23 years, many of which focused on marine safety and security with an emphasis on LNG. In 2000 he joined Tractebel LNG North America (formerly Cabot LNG) in Boston, Massachusetts as the Vice President of Shipping, where he oversaw the LNG shipping operations for the Port of Boston. From 2006 to 2011, Mr. McKechnie was transferred to London and then Paris to continue his work with SUEZ, (the parent company of Tractebel) and ultimately GDF-SUEZ, as the Senior Vice President of Shipping, and Deputy Head of the Shipping Department. He is a former member of the Board of Directors of Society of International Gas Tankers and Terminal Operators, and Gaz-Ocean, the GDF-SUEZ Owned LNG vessel operating company. In 2011, he left GDF-SUEZ following the successful merger of GDF and SUEZ, and ultimately formed J.E. McKechnie LLC in early 2011.

George Watson has served as a Director of Teekay GP L.L.C. since January 2005. He currently serves as Executive Chairman of Critical Control Solutions Inc. (formerly WNS Emergent), a provider of information control applications for the energy sector. He held the position of CEO of Critical Control from 2002 to 2007. From February 2000 to July 2002, he served as Executive Chairman at VerticalBuilder.com Inc. Mr. Watson served as President and Chief Executive Officer of TransCanada Pipelines Ltd. from 1993 to 1999 and as its Chief Financial Officer from 1990 to

1993.

Michael Balaski has served as Vice President of Teekay GP L.L.C. since December 6, 2011. He was also appointed Vice President of Teekay Offshore GP L.L.C. on December 6, 2011. In 2011, he retired as a partner in the Tax Services Group of PricewaterhouseCoopers LLP (PwC) in Vancouver, where he was a member of the International Tax Group specializing in the international shipping sector. Mr. Balaski was a partner of PwC Canada for over ten years. During that time, he worked closely with Teekay Corporation, spending much of his working time at Teekay Corporation's office.

Andres Luna has served as the Managing Director of Teekay Shipping Spain SL since April 2004. Mr. Luna joined Alta Shipping, S.A., a former affiliate company of Naviera F. Tapias S.A., in September 1992 and served as its General Manager until he was appointed Commercial General Manager of Naviera F. Tapias S.A. in December 1999. He also served as Chief Executive Officer of Naviera F. Tapias S.A. from July 2000 until its acquisition by Teekay Corporation in April 2004, when it was renamed Teekay Shipping Spain. Mr. Luna's responsibilities with Teekay Spain have included business development, newbuilding contracting, project management, development of its LNG business and the renewal of its tanker fleet. He has been in the shipping business since his graduation as a naval architect from Madrid University in 1981.

Annual Executive Compensation

Because the Chief Executive Officer and Chief Financial Officer of our General Partner, Peter Evensen, is an employee of Teekay Corporation, his compensation (other than any awards under the long-term incentive plan described below) is set and paid by Teekay Corporation, and we reimburse Teekay Corporation for time he spends on partnership matters. In addition, Michael Balaski is the Vice President of our General Partner. His compensation is set and paid by our General Partner, and we reimburse our General Partner for time he spends on our partnership matters. During 2013, the aggregate amount for which we reimbursed Teekay Corporation for compensation expenses of the officers of the General Partner incurred on our behalf and for compensation earned by the one key employee of Teekay Spain listed above was approximately \$1.8 million. These amounts were paid primarily in U.S. Dollars or in Euros, but are reported here in U.S. Dollars using an exchange rate 1.38 U.S. Dollar for each Euro, the exchange rates on December 31, 2013. Teekay Corporation's annual bonus plan, in which each of the Officers participates, considers both company performance, team performance and individual performance (through comparison to established targets).

Compensation of Directors

Officers of our General Partner or Teekay Corporation who also serve as directors of our General Partner do not receive additional compensation for their service as directors. During 2013, each non-management director received compensation for attending meetings of the Board of Directors, as well as committee meetings. Non-management directors received a director fee of \$50,000 for the year and common units with a value of approximately \$50,000 for the year. The Chairman received an additional annual fee of \$37,000 and common units with a value of approximately

Table of Contents

\$87,500. In addition, members of the audit, conflicts and governance committees each received a committee fee of \$5,000 for the year, and the chairs of the audit committee, conflicts committee and governance committee received an additional fee of \$10,000, \$10,000, and \$5,000, respectively, for serving in that role. Each director is fully indemnified by us for actions associated with being a director to the extent permitted under Marshall Islands law.

During 2013, the five non-management directors received, in the aggregate, \$337,500 in cash fees for their services as directors, plus reimbursement of their out-of-pocket expenses. In March 2013, our general partner's Board of Directors granted to the five non-management directors an aggregate of 7,233 common units.

2005 Long-Term Incentive Plan

Our General Partner adopted the Teekay LNG Partners L.P. 2005 Long-Term Incentive Plan for employees and directors of and consultants to our General Partner and employees and directors of and consultants to its affiliates, who perform services for us. The plan provides for the award of restricted units, phantom units, unit options, unit appreciation rights and other unit or cash-based awards. In 2013, the General Partner awarded 36,878 restricted units to the employees who provide services to our business. The restricted units vest evenly over a three year period from the grant date.

Board Practices

Teekay GP L.L.C., our General Partner, manages our operations and activities. Unitholders are not entitled to elect the directors of our General Partner or directly or indirectly participate in our management or operation.

Our General Partner's board of directors (or *the Board*) currently consists of seven members. Directors are appointed to serve until their successors are appointed or until they resign or are removed.

There are no service contracts between us and any of our directors providing for benefits upon termination of their employment or service.

The Board has the following three committees: Audit Committee, Conflicts Committee, and Corporate Governance Committee. The membership of these committees and the function of each of the committees are described below. Each of the committees is currently comprised of independent members and operates under a written charter adopted by the Board. The committee charters for the Audit Committee, the Conflicts Committee and the Corporate Governance Committee are available under the [Partnership Governance](#) link on the About Us page of our web site at www.teekaylng.com. During 2013, the Board held seven meetings. Each director attended all Board meetings and each committee member attended all applicable committee meetings with the exception of one board member not attending one committee meeting.

Audit Committee. The Audit Committee of our General Partner is composed of three or more directors, each of whom must meet the independence standards of the New York Stock Exchange (or *NYSE*) and the SEC. This committee was comprised of directors Robert E. Boyd (Chair), Ida Jane Hinkley and George Watson, until March 11, 2014. Effective March 11, 2014, Beverlee F. Park joined the committee as chair, replacing Mr. Boyd who retired on the same day from the board. All members of the committee are financially literate and the Board has determined that Mr. Boyd and Ms. Park qualify as audit committee financial experts.

The Audit Committee assists the Board in fulfilling its responsibilities for general oversight of:

the integrity of our financial statements;

our compliance with legal and regulatory requirements;

the independent auditors' qualifications and independence; and

the performance of our internal audit function and independent auditors.

Conflicts Committee. The Conflicts Committee of our General Partner is comprised of George Watson (Chair), Robert E. Boyd, until March 11, 2014, Joseph E. McKechnie and Ida Jane Hinkley. The members of the Conflicts Committee may not be officers or employees of our General Partner or directors, officers or employees of its affiliates, and must meet the heightened NYSE and SEC director independence standards applicable to audit committee membership and certain other requirements.

The Conflicts Committee:

reviews specific matters that the Board believes may involve conflicts of interest; and

determines if the resolution of the conflict of interest is fair and reasonable to us.

Any matters approved by the Conflicts Committee will be conclusively deemed to be fair and reasonable to us, approved by all of our partners, and not a breach by our General Partner of any duties it may owe us or our unitholders. The Board is not obligated to seek approval of the Conflicts Committee on any matter, and may determine the resolution of any conflict of interest itself.

Corporate Governance Committee. The Corporate Governance Committee of our General Partner is composed of at least two directors, a majority of whom must meet the director independence standards established by the NYSE. This committee is currently comprised of directors, Ida Jane Hinkley (Chair), Robert E. Boyd (until March 11, 2014 when he was replaced by Beverlee F. Park) and George Watson.

Table of Contents

The Corporate Governance Committee:

oversees the operation and effectiveness of the Board and its corporate governance;

develops and recommends to the Board corporate governance principles and policies applicable to us and our General Partner and monitors compliance with these principles and policies and recommends to the Board appropriate changes; and

oversees director compensation and the long-term incentive plan described above.

Crewing and Staff

As of December 31, 2013, approximately 1,400 seagoing staff served on our vessels and approximately 15 staff served on shore in technical, commercial and administrative roles in various countries. Certain subsidiaries of Teekay Corporation employ the crews, who serve on the vessels pursuant to agreements with the subsidiaries, and Teekay Corporation subsidiaries also provide on-shore advisory, operational and administrative support to our operating subsidiaries pursuant to service agreements. Please read Item 7 Major Unitholders and Related Party Transactions.

We regard attracting and retaining motivated seagoing personnel as a top priority. Like Teekay Corporation, we offer our seafarers competitive employment packages and comprehensive benefits and opportunities for personal and career development, which relates to a philosophy of promoting internally.

Teekay Corporation has entered into a Collective Bargaining Agreement with the Philippine Seafarers Union, an affiliate of the International Transport Workers Federation (or *ITF*), and a Special Agreement with ITF London, which cover substantially all of the officers and seamen that operate our Bahamian-flagged vessels. Our Spanish officers and seamen for our Spanish-flagged vessels are covered by two different collective bargaining agreements (one for Suezmax tankers and one for LNG carriers) with Spain's Union General de Trabajadores and Comisiones Obreras, and the Filipino crewmembers employed on our Spanish-flagged LNG and Suezmax tankers are covered by the Collective Bargaining Agreement with the Philippine Seafarers Union. We believe Teekay Corporation's and our relationships with these labor unions are good.

Our commitment to training is fundamental to the development of the highest caliber of seafarers for our marine operations. Teekay Corporation has agreed to allow our personnel to participate in its training programs. Teekay Corporation's cadet training approach is designed to balance academic learning with hands-on training at sea. Teekay Corporation has relationships with training institutions in Canada, Croatia, India, Latvia, Norway, Philippines, Turkey and the United Kingdom. After receiving formal instruction at one of these institutions, our cadets' training continues on board on one of our vessels. Teekay Corporation also has a career development plan that we follow, which was designed to ensure a continuous flow of qualified officers who are trained on its vessels and familiarized with its operational standards, systems and policies. We believe that high-quality crewing and training policies will play an increasingly important role in distinguishing larger independent shipping companies that have in-house or affiliate capabilities from smaller companies that must rely on outside ship managers and crewing agents on the basis of customer service and safety. As such, we have recently completed our new LNG training facility in Glasgow and is now fully operational.

Unit Ownership

The following table sets forth certain information regarding beneficial ownership, as of December 31, 2013, of our units by all directors and officers of our General Partner, key employees of Teekay Spain as a group and to certain employees of Teekay Corporation's subsidiaries. The information is not necessarily indicative of beneficial ownership for any other purpose. Under SEC rules, a person or entity beneficially owns any units that the person has the right to acquire as of March 2, 2014 (60 days after December 31, 2013) through the exercise of any unit option or other right. Unless otherwise indicated, each person has sole voting and investment power (or shares such powers with his or her spouse) with respect to the units set forth in the following table. Information for all persons listed below is based on information delivered to us.

Identity of Person or Group	Common Units Owned	Percentage of Common Units Owned ⁽³⁾
All directors and officers as a group (7 persons) (1) (2)	130,593	0.18%

- (1) Excludes units owned by Teekay Corporation, which controls us and on the board of which serve the directors of our General Partner, C. Sean Day, Peter Evensen and Kenneth Hvid. Peter Evensen is the Chief Executive Officer of Teekay Corporation, the Chief Executive Officer and Chief Financial Officer of Teekay Offshore GP L.L.C., and a director of Teekay GP L.L.C., Teekay Offshore GP L.L.C. and Teekay Tankers Ltd. Kenneth Hvid is a director of Teekay GP L.L.C. and Teekay Offshore GP L.L.C. Mr. Hvid is also Chief Strategy Officer and Executive Vice President of Teekay Corporation. Please read Item 7 Major Unitholders and Related Party Transactions for more detail.
- (2) Each director, executive officer and key employee beneficially owns less than 1% of the outstanding common units. Under SEC rules a person beneficially owns any units as to which the person has or shares voting or investment power.
- (3) Excludes the 2% general partner interest held by our General Partner, a wholly owned subsidiary of Teekay Corporation.

Item 7. Major Unitholders and Related Party Transactions

Major Unitholders

The following table sets forth information regarding beneficial ownership, as of March 1, 2014, of our common units by each person we know to beneficially own more than 5% of the outstanding common units. The number of units beneficially owned by each person is determined under SEC rules and the information is not necessarily indicative of beneficial ownership for any other purpose. Under SEC rules a person beneficially owns

Table of Contents

any units as to which the person has or shares voting or investment power. In addition, a person beneficially owns any units that the person or entity has the right to acquire as of April 30, 2014 (60 days after March 1, 2014) through the exercise of any unit option or other right. Unless otherwise indicated, each unitholder listed below has sole voting and investment power with respect to the units set forth in the following table.

Identity of Person or Group	Common Units Owned	Percentage of Common Units Owned ⁽¹⁾
Teekay Corporation ⁽¹⁾	25,208,274	34.0%
Neuberger Berman LLC	4,746,536	6.4%
Oppenheimer Funds, Inc.	4,326,192	5.8%

(1) Excludes the 2% general partner interest held by our General Partner, a wholly owned subsidiary of Teekay Corporation.

Teekay Corporation has the same voting rights with respect to common units it owns as our other unitholders. We are controlled by Teekay Corporation. We are not aware of any arrangements, the operation of which may at a subsequent date result in a change in control of us.

Related Party Transactions

- a) We have entered into an amended and restated omnibus agreement with Teekay Corporation, our General Partner, our operating company, Teekay LNG Operating L.L.C., Teekay Offshore and related parties. The following discussion describes certain provisions of the omnibus agreement.

Noncompetition. Under the omnibus agreement, Teekay Corporation and Teekay Offshore have agreed, and have caused their controlled affiliates (other than us) to agree, not to own, operate or charter LNG carriers. This restriction does not prevent Teekay Corporation, Teekay Offshore or any of their controlled affiliates (other than us) from, among other things:

acquiring LNG carriers and related time-charters as part of a business and operating or chartering those vessels if a majority of the value of the total assets or business acquired is not attributable to the LNG carriers and related time-charters, as determined in good faith by the board of directors of Teekay Corporation or the conflict committee of the board of directors of Teekay Offshore's general partner; however, if at any time Teekay Corporation or Teekay Offshore completes such an acquisition, it must offer to sell the LNG carriers and related time-charters to us for their fair market value plus any additional tax or other similar costs to Teekay Corporation or Teekay Offshore that would be required to transfer the LNG carriers and time-charters to us separately from the acquired business;

owning, operating or chartering LNG carriers that relate to a bid or award for a proposed LNG project that Teekay Corporation or any of its subsidiaries has submitted or hereafter submits or receives; however, at least 180 days prior to the scheduled delivery date of any such LNG carrier, Teekay Corporation must offer

to sell the LNG carrier and related time-charter to us, with the vessel valued at its fully-built-up cost, which represents the aggregate expenditures incurred (or to be incurred prior to delivery to us) by Teekay Corporation to acquire or construct and bring such LNG carrier to the condition and location necessary for our intended use, plus a reasonable allocation of overhead costs related to the development of such project and other projects that would have been subject to the offer rights set forth in the omnibus agreement but were not completed; or

acquiring, operating or chartering LNG carriers if our General Partner has previously advised Teekay Corporation or Teekay Offshore that the board of directors of our General Partner has elected, with the approval of its conflicts committee, not to cause us or our subsidiaries to acquire or operate the carriers.

In addition, under the omnibus agreement we have agreed not to own, operate or charter crude oil tankers or the following offshore vessels dynamically positioned shuttle tankers, floating storage and off-take units or floating production, storage and off-loading units, in each case that are subject to contracts with a remaining duration of at least three years, excluding extension options. This restriction does not apply to any of the conventional tankers in our current fleet, and the ownership, operation or chartering of any oil tankers that replace any of those oil tankers in connection with certain events. In addition, the restriction does not prevent us from, among other things:

acquiring oil tankers or offshore vessels and any related time-charters or contracts of affreightment as part of a business and operating or chartering those vessels, if a majority of the value of the total assets or business acquired is not attributable to the oil tankers and offshore vessels and any related charters or contracts of affreightment, as determined by the conflicts committee of our General Partner's board of directors; however, if at any time we complete such an acquisition, we are required to promptly offer to sell to Teekay Corporation the oil tankers and time-charters or to Teekay Offshore the offshore vessels and time-charters or contracts of affreightment for fair market value plus any additional tax or other similar costs to us that would be required to transfer the vessels and contracts to Teekay Corporation or Teekay Offshore separately from the acquired business; or

acquiring, operating or chartering oil tankers or offshore vessels if Teekay Corporation or Teekay Offshore, respectively, has previously advised our General Partner that it has elected not to acquire or operate those vessels.

Table of Contents

Rights of First Offer on Suezmax Tankers, LNG Carriers and Offshore Vessels. Under the omnibus agreement, we have granted to Teekay Corporation and Teekay Offshore a 30-day right of first offer on any proposed (a) sale, transfer or other disposition of any of our conventional tankers, in the case of Teekay Corporation, or certain offshore vessels in the case of Teekay Offshore, or (b) re-chartering of any of our conventional tankers or offshore vessels pursuant to a time-charter or contract of affreightment with a term of at least three years if the existing charter expires or is terminated early. Likewise, each of Teekay Corporation and Teekay Offshore has granted a similar right of first offer to us for any LNG carriers it might own. These rights of first offer do not apply to certain transactions.

- b) C. Sean Day is the Chairman of our General Partner, Teekay GP L.L.C. He also is the Chairman of Teekay Corporation and Teekay Offshore GP L.L.C. (the general partner of Teekay Offshore Partners L.P., a publicly held partnership controlled by Teekay Corporation). He served as a Chairman of Teekay Tankers Ltd., a publicly held corporation controlled by Teekay Corporation, from 2007 to June 2013.

Peter Evensen is the Chief Executive Officer and Chief Financial Officer and a director of Teekay GP L.L.C. and Teekay Offshore GP L.L.C. Mr. Evensen is also the President and Chief Executive Officer of Teekay Corporation and a director of Teekay Corporation. Mr. Evensen is also a director of Teekay Tankers Ltd. and was the Executive Vice President of Teekay Tankers Ltd. until April 1, 2011.

Effective April 1, 2011, Kenneth Hvid was appointed director of Teekay GP L.L.C. and held this position until September 18, 2012 when he resigned to allow the Board to maintain a majority of independent directors. Mr. Hvid rejoined the Board on February 19, 2013. Mr. Hvid is also Executive Vice President, Chief Strategy Officer of Teekay Corporation and director of Teekay Offshore GP L.L.C.

Michael Balaski is the Vice President of Teekay Offshore GP L.L.C. and Teekay GP L.L.C.

Because Mr. Evensen is an employee of Teekay Corporation or another of its subsidiaries, his compensation (other than any awards under our long-term incentive plan) is set and paid by Teekay Corporation or such other applicable subsidiary. Pursuant to our partnership agreement, we have agreed to reimburse Teekay Corporation or its applicable subsidiary for time spent by Mr. Evensen on our management matters as our Chief Executive Officer and Chief Financial Officer. Because Mr. Balaski is an employee of our general partner, his compensation is set and paid by our general partner. Pursuant to our partnership agreement, we have agreed to reimburse our general partner for his time spent by Mr. Balaski on our partnership matters.

- c) The *Arctic Spirit* and *Polar Spirit* are employed on long-term charter contracts with subsidiaries of Teekay Corporation. In addition, we and certain of our subsidiaries have entered into services agreements with subsidiaries of Teekay Corporation pursuant to which the Teekay Corporation subsidiaries have agreed to provide certain non-strategic administrative services to us, such as crew training, advisory, technical and administrative services that supplement existing capabilities of the employees of our operating subsidiaries; business development services; and strategic consulting and advisory services to our operating subsidiaries relating to our business, unless the provision of those services would materially interfere with Teekay Corporation's operations. These services are to be provided in a commercially reasonable manner and upon the reasonable request of our General Partner or our operating subsidiaries, as applicable. The Teekay Corporation subsidiaries that are parties to the services agreements may provide these services directly or may subcontract for certain of these services with other entities, including other Teekay Corporation subsidiaries. We pay a reasonable, arm's-length fee for the services that include reimbursement of the

reasonable cost of any direct and indirect expenses the Teekay Corporation subsidiaries incur in providing these services. Finally, we reimburse our General Partner for expenses incurred by our General Partner that are necessary for the conduct of our business. Such related party transactions were as follows for the periods indicated:

	Year Ended		
	December 31, 2013	December 31, 2012	December 31, 2011
	\$	\$	\$
Revenues ⁽¹⁾	34,573	37,630	35,068
Vessel operating expenses ⁽²⁾	10,847	10,319	10,452
General and administrative ⁽²⁾⁽³⁾	11,959	11,939	7,757

- (1) Commencing in 2008, the *Arctic Spirit* and *Polar Spirit* were time-chartered to Teekay Corporation at a fixed-rate for a period of ten years (plus options exercisable by Teekay Corporation to extend up to an additional 15 years).
- (2) Includes ship management and crew training services provided by Teekay Corporation. The cost of ship management services provided by Teekay Corporation of \$7.2 million for the year ended December 31, 2013 has been presented as vessel operating expenses (for more information, please read Item 18 Financial Statements: Note 1 Basis of Presentation and Significant Accounting Policies). The amounts reclassified from general and administrative to vessel operating expenses in the comparative periods to conform to the presentation adopted in the current period were \$7.8 million and \$7.7 million for the years ended December 31, 2012 and 2011, respectively.
- (3) Includes commercial, strategic, advisory, business development and administrative management fees charged by Teekay Corporation and reimbursements to Teekay Corporation and our General Partner for costs incurred on our behalf.
- d) Our Suezmax tanker the *Toledo Spirit* operates pursuant to a time-charter contract that increases or decreases the otherwise fixed-hire rate established in the charter depending on the spot charter rates that we would have earned had it traded the vessel in the spot tanker market. The time-charter contract ends in August 2025, although the charterer has the right to terminate the time-charter in July 2018. We have entered into an agreement with Teekay Corporation under which Teekay Corporation pays us any amounts payable to the charterer as a result of spot rates being below the fixed rate, and we pay Teekay Corporation any amounts payable to us as a result of spot rates being in excess of the fixed rate. The amounts receivable or payable to Teekay Corporation are settled at the end of each year (for more information, please read Item 18 Financial Statements: Note 2 Financial Instruments and Note 12 Derivative Instruments).

Table of Contents

- e) On July 28, 2008, Skaugen Multigas Subsidiaries signed contracts for the purchase of two technically advanced 12,000-cubic meter newbuilding Multigas vessels from subsidiaries of Skaugen and we agreed to acquire the Skaugen Multigas Subsidiaries from Teekay Corporation upon delivery.

On June 15, 2011 and October 17, 2011, the two Skaugen Multigas Carriers were delivered and commenced service under a 15-year, fixed-rate charters to Skaugen. On delivery, we concurrently acquired Teekay Corporation's 100% ownership interests in the Skaugen Multigas Subsidiaries for a purchase price of \$114.5 million. These transactions were concluded between entities under common control and, thus, the assets acquired were recorded at historical book value. The excess of the combined purchase price over the combined book value of the assets of \$8.2 million was accounted for as an equity distribution to Teekay Corporation.

- f) During September and October 2011, we sold 1% of our ownership interest in our Skaugen Multigas Subsidiaries and the Skaugen LPG Carriers at that time to our General Partner for approximately \$1.8 million.
- g) In December 2007, a consortium in which Teekay Corporation had a 33% ownership interest agreed to charter the four Angola LNG Carriers for a period of 20 years to Angola LNG Supply Services LLC. The consortium entered into agreements to construct the four LNG carriers at a total cost of \$906.2 million (of which Teekay Corporation's 33% portion was \$299.0 million), excluding capitalized interest. The vessels are chartered at fixed rates, with inflation adjustments, commencing upon delivery of the vessels. In March 2011, we agreed to acquire Teekay Corporation's 33% ownership interest in these vessels and related charter contracts upon delivery of each vessel.

The four Angola LNG Carriers delivered during August 2011 to January 2012 and commenced their 20-year, fixed-rate charters to Angola LNG Supply Services. Concurrently, we acquired Teekay Corporation's 33% ownership interest in these four vessels and related charter contracts for a total equity purchase price of \$76.4 million (net of assumed debt of \$258.6 million). This transaction was concluded between entities under common control and, thus, the assets acquired were recorded at historical book value. The excess of the purchase price over the book value of the assets (including the fair market value of the interest rate swap associated with debt secured by the fourth vessel) of \$46.2 million and \$15.9 million was accounted for as an equity distribution to Teekay Corporation in 2011 and 2012, respectively. Our investments in the Angola LNG Carriers are accounted for using the equity method.

- h) In February 2012, we incurred a \$7.0 million charge relating to a one-time fee to Teekay Corporation for its support in our successful acquisition of our 52% interest in six LNG carriers (for more information, please read Item 18 Financial Statements: Note 5 Equity Method Investments). This acquisition fee is reflected as part of investments in and advances to equity accounted joint ventures in our consolidated balance sheets.
- i) In March 2013, we incurred a \$2.7 million charge relating to a fee to Teekay Corporation for its support in our successful acquisition of its 50% interest in Exmar LPG BVBA carriers (for more information, please read Item 18 Financial Statements: Note 5 Equity Method Investments). This acquisition fee is reflected as part of investments in and advances to equity accounted joint ventures in our consolidated balance sheets.

- j)

We entered into services agreements with certain subsidiaries of Teekay Corporation pursuant to which the Teekay Corporation subsidiaries provide us with shipbuilding and site supervision services relating to the five LNG newbuildings we own. These costs are capitalized and included as part of advances on newbuilding contracts in our consolidated balance sheets. As at December 31, 2013 and 2012, shipbuilding and site supervision costs provided by Teekay Corporation subsidiaries totaled \$0.2 million and nil, respectively.

- k) As at December 31, 2013 and 2012, non-interest bearing advances to affiliates totaled \$6.6 million and \$13.9 million, respectively, and non-interest bearing advances from affiliates totaled \$19.3 million and \$12.1 million, respectively. These advances are unsecured and have no fixed repayment terms.

Item 8. Financial Information

A. Consolidated Financial Statements and Other Financial Information

Consolidated Financial Statements and Notes

Please see Item 18 Financial Statements below for additional information required to be disclosed under this Item.

Legal Proceedings

From time to time we have been, and expect to continue to be, subject to legal proceedings and claims in the ordinary course of our business, principally personal injury and property casualty claims. These claims, even if lacking merit, could result in the expenditure of significant financial and managerial resources. We are not aware of any legal proceedings or claims that we believe will have, individually or in the aggregate, a material adverse effect on us.

Cash Distribution Policy

Rationale for Our Cash Distribution Policy

Our partnership agreement requires us to distribute all of our available cash (as defined in our partnership agreement) within approximately 45 days after the end of each quarter. This cash distribution policy reflects a basic judgment that our unitholders are better served by our distributing our cash available after expenses and reserves rather than our retaining it. Because we believe we will generally finance any capital investments from external financing sources, we believe that our investors are best served by our distributing all of our available cash.

Table of Contents

Limitations on Cash Distributions and Our Ability to Change Our Cash Distribution Policy

There is no guarantee that unitholders will receive quarterly distributions from us. Our distribution policy is subject to certain restrictions and may be changed at any time, including:

Our distribution policy is subject to restrictions on distributions under our credit agreements. Specifically, our credit agreements contain material financial tests and covenants that we must satisfy. Should we be unable to satisfy these restrictions under our credit agreements, we would be prohibited from making cash distributions to unitholders notwithstanding our stated cash distribution policy.

The board of directors of our General Partner has the authority to establish reserves for the prudent conduct of our business and for future cash distributions to our unitholders, and the establishment of those reserves could result in a reduction in cash distributions to unitholders from levels we anticipate pursuant to our stated distribution policy.

Even if our cash distribution policy is not modified or revoked, the amount of distributions we pay under our cash distribution policy and the decision to make any distribution is determined by our General Partner, taking into consideration the terms of our partnership agreement.

Under Section 51 of the Marshall Islands Limited Partnership Act, we may not make a distribution to unitholders if the distribution would cause our liabilities to exceed the fair value of our assets.

We may lack sufficient cash to pay distributions to our unitholders due to increases in our general and administrative expenses, principal and interest payments on our outstanding debt, tax expenses, the issuance of additional units (which would require the payment of distributions on those units), working capital requirements and anticipated cash needs.

While our partnership agreement requires us to distribute all of our available cash, our partnership agreement, including provisions requiring us to make cash distributions, may be amended. Our partnership agreement can be amended with the approval of a majority of the outstanding common units, voting as a class (including common units held by affiliates of our General Partner).

Minimum Quarterly Distribution

Common unitholders are entitled under our partnership agreement to receive a minimum quarterly distribution of \$0.4125 per unit, or \$1.6500 per year, to the extent we have sufficient cash from our operations after establishment of cash reserves and payment of fees and expenses, including payments to our General Partner. Our General Partner has the authority to determine the amount of our available cash for any quarter. This determination must be made in good faith. There is no guarantee that we will pay the minimum quarterly distribution on the common units in any quarter, and we will be prohibited from making any distributions to unitholders if it would cause an event of default, or an event of default exists, under our credit agreements.

Our cash distributions were \$0.6300 per unit in 2011, then increased to \$0.6750 per unit effective for the second quarter of 2012 and further increased to \$0.6918 effective for the first quarter of 2014.

Incentive Distribution Rights

Incentive distribution rights represent the right to receive an increasing percentage of quarterly distributions of available cash from operating surplus (as defined in our partnership agreement) after the minimum quarterly distribution and the target distribution levels have been achieved. Our General Partner currently holds the incentive distribution rights, but may transfer these rights separately from its general partner interest, subject to restrictions in our partnership agreement.

The following table illustrates the percentage allocations of the additional available cash from operating surplus among the unitholders and our General Partner up to the various target distribution levels. The amounts set forth under **Marginal Percentage Interest in Distributions** are the percentage interests of the unitholders and our General Partner in any available cash from operating surplus we distribute up to and including the corresponding amount in the column **Quarterly Distribution Target Amount**, until available cash from operating surplus we distribute reaches the next target distribution level, if any. The percentage interests shown for the unitholders and our General Partner for the minimum quarterly distribution are also applicable to quarterly distribution amounts that are less than the minimum quarterly distribution. The percentage interests shown for our General Partner include its 2% general partner interest and assume the General Partner has not transferred the incentive distribution rights.

	Quarterly Distribution Target Amount (per unit)	Marginal Percentage Interest in Distributions	
		Unitholder	General Partner
Minimum Quarterly Distribution	\$0.4125	98%	2%
First Target Distribution	Up to \$0.4625	98%	2%
Second Target Distribution	Above \$0.4625 up to \$0.5375	85%	15%
Third Target Distribution	Above \$0.5375 up to \$0.6500	75%	25%
Thereafter	Above \$0.6500	50%	50%

Item 9. The Offer and Listing

Our common units are listed on the NYSE under the symbol TGP. The following table sets forth the high and low prices for our common units on the NYSE for each of the periods indicated.

Years Ended	Dec. 31, 2013	Dec. 31, 2012	Dec. 31, 2011	Dec. 31, 2010	Dec. 31, 2009
High	\$ 45.42	\$ 42.26	\$ 41.50	\$ 38.25	\$ 26.91
Low	37.73	33.00	28.61	19.75	15.13

Quarters Ended	Mar. 31, 2014	Dec. 31, 2013	Sept. 30, 2013	June 30, 2013	Mar. 31, 2013	Dec. 31, 2012	Sept. 30, 2012	June 30, 2012	Mar. 31, 2012
High	\$ 42.92	\$ 44.96	\$ 45.42	\$ 45.06	\$ 42.60	\$ 38.60	\$ 41.41	\$ 42.26	\$ 40.44
Low	39.03	38.17	41.18	38.32	37.73	34.50	37.00	34.68	33.00

Months Ended	Mar.31, 2014	Feb. 28, 2014	Jan. 31, 2014	Dec. 31, 2013	Nov. 30, 2013	Oct. 31, 2013
High	\$ 41.96	\$ 41.99	\$ 42.92	\$ 42.96	\$ 41.98	\$ 44.96
Low	39.35	39.03	39.30	38.17	39.81	40.22

Item 10. Additional Information**Memorandum and Articles of Association**

The information required to be disclosed under Item 10B is incorporated by reference to our Registration Statement on Form 8-A/A filed with the SEC on September 29, 2006.

Material Contracts

The following is a summary of each material contract, other than material contracts entered into in the ordinary course of business, to which we or any of our subsidiaries is a party, for the two years immediately preceding the date of this Annual Report, each of which is included in the list of exhibits in Item 19:

- (a) Agreement dated December 7, 2005, for a U.S. \$137,500,000 Revolving Credit Facility between Asian Spirit L.L.C., African Spirit L.L.C., and European Spirit L.L.C., Den Norske Bank ASA and various other banks. This facility bears interest at LIBOR plus a margin of 0.50%. The amount available under the facility reduces by \$4.4 million semi-annually, with a bullet reduction of \$57.7 million on maturity in April 2015. The credit facility may

be used for general partnership purposes and to fund cash distributions. Our obligations under the facility are secured by a first-priority mortgage on three of our Suezmax tankers and a pledge of certain shares of the subsidiaries operating the Suezmax tankers.

- (b) Amended and Restated Omnibus agreement with Teekay Corporation, Teekay Offshore, our General Partner and related parties Please read Item 7 Major Unitholders and Related Party Transactions for a summary of certain contract terms.
- (c) We and certain of our operating subsidiaries have entered into services agreements with certain subsidiaries of Teekay Corporation pursuant to which the Teekay Corporation subsidiaries provide us and our operating subsidiaries with certain non-strategic services such as, crew training, advisory, technical and administrative services that supplement existing capabilities of the employees of our operating subsidiaries. Teekay Corporation subsidiaries also provide business development services and strategic consulting and advisory services. All these services are charged at reasonable fee that includes reimbursement of the reasonable cost of any direct and indirect expenses they incur in providing these services. Please read Item 7 Major Unitholders and Related Party Transactions for a summary of certain contract terms.
- (d) Syndicated Loan Agreement between Naviera Teekay Gas III, S.L. (formerly Naviera F. Tapias Gas III, S.A.) and Caixa de Aforros de Vigo Ourense e Pontevedra, as Agent, dated as of October 2, 2000, as amended. This facility was used to make restricted cash deposits that fully fund payments under a capital lease for one of our LNG carriers, the *Catalunya Spirit*. Interest payments are based on EURIBOR plus a margin. The term loan matures in 2023 with monthly payments that reduce over time.
- (e) Credit Facility Agreement between Naviera Teekay Gas IV, S.L. (formerly Naviera F. Tapias Gas IV, S.A.) and Chase Manhattan International Limited, as Agent, dated as of December 21, 2001, as amended. This facility was used to make restricted cash deposits that fully fund payments under a capital lease for one of our LNG carriers, the *Madrid Spirit*. Interest payments are based on EURIBOR plus a margin. The term loan was terminated in 2011.
- (f) Teekay LNG Partners L.P. 2005 Long-Term Incentive Plan. Please read Item 6 Directors, Senior Management and Employees for a summary of certain plan terms.

Table of Contents

- (g) Agreement dated August 23, 2006, for a U.S. \$330,000,000 Secured Revolving Loan Facility between Teekay LNG Partners L.P., ING Bank N.V. and other banks. This facility bears interest at LIBOR plus a margin of 0.55%. The amount available under the facility reduces semi-annually by amounts ranging from \$4.3 million to \$8.4 million, with a bullet reduction of \$188.7 million on maturity in August 2018. The revolver is collateralized by first-priority mortgages granted on two of our LNG carriers. The credit facility may be used for general partnership purposes and to fund cash distributions.
- (h) Agreement dated June 30, 2008, for a U.S. \$172,500,000 Secured Revolving Loan Facility between Arctic Spirit L.L.C., Polar Spirit L.L.C and DnB Nor Bank A.S.A. and other banks. This facility bears interest at LIBOR plus a margin of 0.80%. The amount available under the facility reduces by \$6.1 million semi-annually, with a balloon reduction of \$56.6 million on maturity in June 2018. The revolver is collateralized by first-priority mortgages granted on two of our LNG carriers. The credit facility may be used for general partnership purposes and to fund cash distributions.
- (i) Deed of Amendment and Restatement dated October 10, 2008, relating to a Loan Agreement for a U.S. \$92,400,000 Buyer Credit and a U.S. \$117,600,000 Commercial Loan between MiNT LNG I, Ltd., BNP Paribas S.A., and other banks and financial institutions. The Buyers Credit bears interest at LIBOR plus a margin of 0.78% and the Commercial Loan bears interest at LIBOR plus a margin of 1.30%. In addition, a commitment fee will be charged at the rate of 0.25% and 0.45% on undrawn and uncanceled amounts of the Buyer Credit and Commercial Loan, respectively. The amount available under the facilities reduces quarterly by amounts ranging from \$1.2 million to \$2.5 million. The Commercial Loan is due by one installment on maturity in 2023.
- (j) Deed of Amendment and Restatement dated October 10, 2008, relating to a Loan Agreement for a U.S. \$92,400,000 Buyer Credit and a U.S. \$117,600,000 Commercial Loan between MiNT LNG II, Ltd., BNP Paribas S.A., and other banks and financial institutions. The Buyers Credit bears interest at LIBOR plus a margin of 0.78% and the Commercial Loan bears interest at LIBOR plus a margin of 1.30%. In addition, a commitment fee will be charged at the rate of 0.25% and 0.45% on undrawn and uncanceled amounts of the Buyer Credit and Commercial Loan, respectively. The amount available under the facilities reduces quarterly by amounts ranging from \$1.2 million to \$2.5 million. The Commercial Loan is due by one installment on maturity in 2023.
- (k) Deed of Amendment and Restatement dated October 10, 2008, relating to a Loan Agreement for a U.S. \$92,400,000 Buyer Credit and a U.S. \$117,600,000 Commercial Loan between MiNT LNG III, Ltd., BNP Paribas S.A., and other banks and financial institutions. The Buyers Credit bears interest at LIBOR plus a margin of 0.78% and the Commercial Loan bears interest at LIBOR plus a margin of 1.30%. In addition, a commitment fee will be charged at the rate of 0.25% and 0.45% on undrawn and uncanceled amounts of the Buyer Credit and Commercial Loan, respectively. The amount available under the facilities reduces quarterly by amounts ranging from \$1.2 million to \$2.5 million. The Commercial Loan is due by one installment on maturity in 2023.
- (l) Deed of Amendment and Restatement dated October 10, 2008, relating to a Loan Agreement for a U.S. \$92,400,000 Buyer Credit and a U.S. \$117,600,000 Commercial Loan between MiNT LNG IV, Ltd., BNP Paribas S.A., and other banks and financial institutions. The Buyers Credit bears interest at LIBOR plus a margin of 0.78% and the Commercial Loan bears interest at LIBOR plus a margin of 1.30%. In addition, a

commitment fee will be charged at the rate of 0.25% and 0.45% on undrawn and uncanceled amounts of the Buyer Credit and Commercial Loan, respectively. The amount available under the facilities reduces quarterly by amounts ranging from \$1.2 million to \$2.5 million. The Commercial Loan is due by one installment on maturity in 2024.

- (m) Agreement dated October 27, 2009, for a U.S. \$122,000,000 million credit facility that is secured by the Skaugen LPG Carriers and the Skaugen Multigas Carriers. Interest payments under the facility are based on three months LIBOR plus 2.75% and require quarterly payments. This loan facility is collateralized by first priority mortgages on the five vessels to which the loans relate to, together with certain other related security and is guaranteed by us. The loans have varying maturities through 2018.
- (n) Agreement dated March 17, 2010, for a U.S. \$255,528,228 million senior loan and U.S. \$80,000,000 million junior loan secured loan agreement between Bermuda Spirit L.L.C., Hamilton Spirit L.L.C, Summit Spirit L.L.C., Zenith Spirit L.L.C., and Credit Agricole CIB Bank. The facility was used to finance up to 80% of the shipyard contract price for the *Bermuda Spirit* and the *Hamilton Spirit*. Interest payments on one tranche under the loan facility are based on six month LIBOR plus 0.30%, while interest payments on the second tranche are based on six-month LIBOR plus 0.70%. One tranche reduces in semi-annual payments while the other tranche correspondingly is drawn up every six months with a final \$20 million bullet payment per vessel due 12 years and six months from each vessel delivery date. This loan facility is collateralized by first-priority mortgages on the two vessels to which the loan relates, together with certain other related security and is guaranteed by Teekay Corporation.
- (o) Agreement dated September 30, 2011, for a EURO 149,933,766 Credit Facility between Naviera Teekay Gas IV S.L.U., ING Bank N.V. and other banks and financial institutions. This facility bears interest at EURIBOR plus a margin of 2.25%. The amount available under the facility reduces monthly by amounts ranging from \$0.4 million to \$0.7 million, with a bullet reduction of \$104.4 million on maturity in 2018. The loan facility is guaranteed by us.
- (p) Agreement dated February 17, 2012, for a US\$553,280,000 loan facility between Malt LNG Holdings ApS, DNB Bank ASA, ABN AMRO Bank N.V., Citigroup Global Markets Limited, Development Bank of Japan Inc., and various lenders. The loan bears interest at LIBOR plus a margin of 2.4% for the twelve months after execution and interest at LIBOR plus a margin of 3.0% for the remainder of the facility period. In addition, a commitment fee will be charged at the rate of 30% of the margin on undrawn and uncanceled amounts. This loan facility matured during 2013 and replaced with the facilities listed from (u) to (w) below.
- (q) Agreement dated February 17, 2012, for a US\$510,720,000 loan facility between Malt LNG Holdings ApS, Mizuho Corporate Bank, Ltd., Mizuho Corporate Bank, Ltd., and various lenders. The loan bears interest at LIBOR plus a margin of 0.35% and provides a commitment fee that will be charged at the rate of 0.1% on the undrawn and uncanceled amounts. This loan facility matured during 2013 and replaced with the facilities listed from (u) to (w) below.

Table of Contents

- (f) Agreement dated February 28, 2012; Teekay LNG Operating LLC and Marubeni Corporation entered into an agreement to acquire, through the Teekay LNG-Marubeni Joint Venture, 100% ownership of six LNG carriers from Maersk. Please read Item 18 Financial Statements: Note 5 Equity Method Investments.
- (s) Agreement dated April 30, 2012, for NOK 700,000,000, Senior Unsecured Bonds due May 2017, among, Teekay LNG Partners L.P. and Norsk Tillitsmann ASA.
- (t) Agreement dated February 12, 2013; Teekay Luxembourg S.a.r.l. entered into a share purchase agreement with Exmar NV and Exmar Marine NV to purchase 50% of the shares in Exmar LPG BVBA.
- (u) Agreement dated June 27, 2013, for US\$195,000,000 senior secured notes between Meridian Spirit ApS and Wells Fargo Bank Northwest N.A. The loan bears interest at fixed rate of 4.11%. The facility requires quarterly repayments through 2030.
- (v) Agreement dated June 28, 2013, for a US\$160,000,000 loan facility between Malt Singapore Pte. Ltd. and Commonwealth Bank of Australia. The loan bears interest at LIBOR plus a margin of 2.60%. The facility requires quarterly repayments, with a bullet payment on maturity in 2021.
- (w) Agreement dated July 30, 2013, for a US\$608,000,000 loan facility between Malt LNG Netherlands Holdings B.V. and DNB Bank ASA, acting as agent and security trustee. The loan bears interest at LIBOR plus a margin of 3.15% for Tranche A and LIBOR plus a margin of 0.5% for Tranche B. The facility requires quarterly repayments, with a bullet payment on maturity in 2017.
- (x) Agreement dated August 30, 2013, for NOK 900,000,000, Senior Unsecured Bonds due September 2018, among, Teekay LNG Partners L.P. and Norsk Tillitsmann ASA.
- (y) Agreement dated December 9, 2013, for a US\$125,000,000 secured credit facility between Wilforce L.L.C. and Credit Suisse AG and others. The loan bears interest at LIBOR plus a margin of 3.20%. The facility requires quarterly repayments, with a bullet payment in 2018.

Exchange Controls and Other Limitations Affecting Unitholders

We are not aware of any governmental laws, decrees or regulations, including foreign exchange controls, in the Republic of The Marshall Islands that restrict the export or import of capital, or that affect the remittance of dividends, interest or other payments to non-resident holders of our securities.

We are not aware of any limitations on the right of non-resident or foreign owners to hold or vote our securities imposed by the laws of the Republic of The Marshall Islands or our partnership agreement.

Taxation

Marshall Islands Tax Consequences. Because we and our subsidiaries do not, and we do not expect that we and our subsidiaries will, conduct business or operations in the Republic of The Marshall Islands, neither we nor our subsidiaries will be subject to income, capital gains, profits or other taxation under current Marshall Islands law. As a result, distributions by our subsidiaries to us will not be subject to Marshall Islands taxation. In addition, because all documentation related to our initial public offering and follow-on offerings were executed outside of the Republic of the Marshall Islands, under current Marshall Islands law, no taxes or withholdings are imposed by the Republic of The Marshall Islands on distributions, including upon a return of capital, made to unitholders, so long as such persons do not reside in, maintain offices in, nor engage in business in the Republic of The Marshall Islands. Furthermore, no stamp, capital gains or other taxes are imposed by the Republic of The Marshall Islands on the purchase, ownership or disposition by such persons of our common units.

United States Tax Consequences. The following discussion of certain material U.S. federal income tax considerations that may be relevant to common unitholders who are individual citizens or residents of the United States is based upon provisions of the U.S. Internal Revenue Code of 1986 (or the *Code*), legislative history, applicable U.S. Treasury Regulations (or *Treasury Regulations*), judicial authority and administrative interpretations, all as in effect on the date of this Annual Report, and which are subject to change, possibly with retroactive effect, or are subject to different interpretations. Changes in these authorities may cause the tax consequences to vary substantially from the consequences described below. Unless the context otherwise requires, references in this section we, our or us are references to Teekay LNG Partners, L.P.

This discussion is limited to unitholders who hold their units as capital assets for tax purposes. This discussion does not address all tax considerations that may be important to a particular unitholder in light of the unitholder's individual circumstances, or to certain categories of unitholders that may be subject to special tax rules, such as:

dealers in securities or currencies,

traders in securities that have elected the mark-to-market method of accounting for their securities,

persons whose functional currency is not the U.S. Dollar,

persons holding our units as part of a hedge, straddle, conversion or other synthetic security or integrated transaction,

certain U.S. expatriates,

financial institutions,

insurance companies,

Table of Contents

persons subject to the alternative minimum tax,

persons that actually or under applicable constructive ownership rules own 10 percent or more of our units; and

entities that are tax-exempt for U.S. federal income tax purposes

If a partnership (including any entity or arrangement treated as a partnership for U.S. federal income tax purposes) holds our common units, the tax treatment of a partner generally will depend upon the status of the partner and the activities of the partnership. If you are a partner in a partnership holding our common units, you should consult your own tax advisor about the U.S. federal income tax consequences of owning and disposing of the common units.

This discussion does not address any U.S. estate tax considerations or tax considerations arising under the laws of any state, local or non-U.S. jurisdiction. Each unitholder is urged to consult its own tax advisor regarding the U.S. federal, state, local and other tax consequences of the ownership or disposition of our common units.

Classification as a Partnership.

For purposes of U.S. federal income taxation, a partnership is not a taxable entity, and although it may be subject to withholding taxes on behalf of its partners under certain circumstances, a partnership itself incurs no U.S. federal income tax liability. Instead, each partner of a partnership is required to take into account his share of items of income, gain, loss, deduction and credit of the partnership in computing his U.S. federal income tax liability, regardless of whether cash distributions are made to him by the partnership. Distributions by a partnership to a partner generally are not taxable unless the amount of cash distributed exceeds the partner's adjusted tax basis in his partnership interest.

Section 7704 of the Code provides that publicly traded partnerships generally will be treated as corporations for U.S. federal income tax purposes. However, an exception, referred to as the Qualifying Income Exception, exists with respect to publicly traded partnerships whose qualifying income represents 90 percent or more of their gross income for every taxable year. Qualifying income includes income and gains derived from the transportation and storage of crude oil, natural gas and products thereof, including liquefied natural gas. Other types of qualifying income include interest (other than from a financial business), dividends, gains from the sale of real property and gains from the sale or other disposition of capital assets held for the production of qualifying income, including stock. We have received a ruling from the Internal Revenue Service (or *IRS*) that we requested in connection with our initial public offering that the income we derive from transporting LNG and crude oil pursuant to time charters existing at the time of our initial public offering is qualifying income within the meaning of Section 7704. A ruling from the *IRS*, while generally binding on the *IRS*, may under certain circumstances be revoked or modified by the *IRS* retroactively.

We estimate that less than 5 percent of our current income is not qualifying income and therefore we believe that we will be treated as a partnership for U.S. federal income tax purposes. However, this estimate could change from time to time for various reasons. Because we have not received an *IRS* ruling or an opinion of counsel that any (1) income we derive from transporting crude oil, natural gas and products thereof, including LNG, pursuant to bareboat charters or (2) income or gain we recognize from foreign currency transactions, is qualifying income, we are currently treating income from those sources as non-qualifying income. Under some circumstances, such as a significant change in foreign currency rates, the percentage of income or gain from foreign currency transactions in relation to our total gross income could be substantial. We do not expect income or gains from these sources and other income or gains that are not qualifying income to constitute 10 percent or more of our gross income for U.S. federal income tax purposes. However, it is possible that the operation of certain of our vessels pursuant to bareboat charters could, in the

future, cause our non-qualifying income to constitute 10 percent or more of our future gross income if such vessels were held in a pass-through structure. In order to preserve our status as a partnership for U.S. federal income tax purposes, we have received a ruling from the IRS that effectively allows us to conduct our bareboat charter operations in a subsidiary corporation.

Status as a Partner

The treatment of unitholders described in this section applies only to unitholders treated as partners in us for U.S. federal income tax purposes. Unitholders who have been properly admitted as limited partners of Teekay LNG Partners L.P. will be treated as partners in us for U.S. federal income tax purposes. In addition, assignees of common units who have executed and delivered transfer applications, and are awaiting admission as limited partners and unitholders whose common units are held in street name or by a nominee and who have the right to direct the nominee in the exercise of all substantive rights attendant to the ownership of their common units will be treated as partners in us for U.S. federal income tax purposes.

The status of assignees of common units who are entitled to execute and deliver transfer applications and thereby become entitled to direct the exercise of attendant rights, but who fail to execute and deliver transfer applications, is unclear. In addition, a purchaser or other transferee of common units who does not execute and deliver a transfer application may not receive some U.S. federal income tax information or reports furnished to record holders of common units, unless the common units are held in a nominee or street name account and the nominee or broker has executed and delivered a transfer application for those common units.

Under certain circumstances, a beneficial owner of common units whose units have been loaned to another may lose his status as a partner with respect to those units for U.S. federal income tax purposes.

In general, a person who is not a partner in a partnership for U.S. federal income tax purposes is not required or permitted to report any share of the partnership's income, gain, deductions or losses for such purposes, and any cash distributions received by such a person from the partnership therefore may be fully taxable as ordinary income. Unitholders not described here are urged to consult their own tax advisors with respect to their status as partners in us for U.S. federal income tax purposes.

Consequences of Unit Ownership

Flow-through of Taxable Income. Each unitholder is required to include in computing his taxable income his allocable share of our items of income, gain, loss, deduction and credit for our taxable year ending with or within his taxable year, without regard to whether we make corresponding cash distributions to him. Our taxable year ends on December 31. Consequently, we may allocate income to a unitholder as of December 31 of a given year, and the unitholder will be required to report this income on his tax return for his tax year that ends on or includes such date, even if he has not received a cash distribution from us as of that date.

Table of Contents

In addition, certain U.S. unitholders who are individuals, estates or trusts are required to pay an additional 3.8 percent tax on, among other things, the income allocated to them. Unitholders should consult their tax advisors regarding the effect, if any, of this tax on their ownership of our common units.

Treatment of Distributions. Distributions by us to a unitholder generally will not be taxable to the unitholder for U.S. federal income tax purposes to the extent of his tax basis in his common units immediately before the distribution. Our cash distributions in excess of a unitholder's tax basis generally will be considered to be gain from the sale or exchange of common units, taxable in accordance with the rules described under *Disposition of Common Units* below. Any reduction in a unitholder's share of our liabilities for which no partner, including the general partner, bears the economic risk of loss, known as nonrecourse liabilities, will be treated as a distribution of cash to that unitholder. A decrease in a unitholder's percentage interest in us because of our issuance of additional common units will decrease his share of our nonrecourse liabilities, and thus will result in a corresponding deemed distribution of cash. To the extent our distributions cause a unitholder's at risk amount to be less than zero at the end of any taxable year, he must recapture any losses deducted in previous years.

A non-pro rata distribution of money or property may result in ordinary income to a unitholder, regardless of his tax basis in his common units, if the distribution reduces the unitholder's share of our unrealized receivables, including depreciation recapture, and/or substantially appreciated inventory items, both as defined in the Code (or, collectively, *Section 751 Assets*). To that extent, he will be treated as having been distributed his proportionate share of the *Section 751 Assets* and having exchanged those assets with us in return for the non-pro rata portion of the actual distribution made to him. This latter deemed exchange will generally result in the unitholder's realization of ordinary income, which will equal the excess of (1) the non-pro rata portion of that distribution over (2) the unitholder's tax basis for the share of *Section 751 Assets* deemed relinquished in the exchange.

Basis of Common Units. A unitholder's initial U.S. federal income tax basis for his common units will be the amount he paid for the common units plus his share of our nonrecourse liabilities. That basis will be increased by his share of our income and by any increases in his share of our nonrecourse liabilities and decreased, but not below zero, by distributions from us, by the unitholder's share of our losses, by any decreases in his share of our nonrecourse liabilities and by his share of our expenditures that are not deductible in computing taxable income and are not required to be capitalized. A unitholder will have no share of our debt that is recourse to the general partner, but will have a share, generally based on his share of profits, of our nonrecourse liabilities.

Limitations on Deductibility of Losses. The deduction by a unitholder of his share of our losses will be limited to the tax basis in his units and, in the case of an individual unitholder or a corporate unitholder more than 50 percent of the value of the stock of which is owned directly or indirectly by five or fewer individuals or some tax-exempt organizations, to the amount for which the unitholder is considered to be at risk with respect to our activities, if that is less than his tax basis. In general, a unitholder will be at risk to the extent of the tax basis of his units, excluding any portion of that basis attributable to his share of our nonrecourse liabilities, reduced by any amount of money he borrows to acquire or hold his units, if the lender of those borrowed funds owns an interest in us, is related to the unitholder or can look only to the units for repayment. A unitholder must recapture losses deducted in previous years to the extent that distributions cause his at risk amount to be less than zero at the end of any taxable year. Losses disallowed to a unitholder or recaptured as a result of these limitations will carry forward and will be allowable to the extent that his tax basis or at risk amount, whichever is the limiting factor, is subsequently increased. Upon the taxable disposition of a unit, any gain recognized by a unitholder can be offset by losses that were previously suspended by the at risk limitation but may not be offset by losses suspended by the basis limitation. Any excess suspended loss above that gain is no longer utilizable.

The passive loss limitations generally provide that individuals, estates, trusts and some closely-held corporations and personal service corporations can deduct losses from a passive activity only to the extent of the taxpayer's income from the same passive activity. Passive activities generally are corporate or partnership activities in which the taxpayer does not materially participate. The passive loss limitations are applied separately with respect to each publicly traded partnership. Consequently, any passive losses we generate only will be available to offset our passive income generated in the future and will not be available to offset income from other passive activities or investments, including our investments or investments in other publicly traded partnerships, or salary or active business income. Passive losses that are not deductible because they exceed a unitholder's share of income we generate may be deducted in full when he disposes of his entire investment in us in a fully taxable transaction with an unrelated party. The passive activity loss rules are applied after other applicable limitations on deductions, including the at risk rules and the basis limitation.

Dual consolidated loss restrictions also may apply to limit the deductibility by a corporate unitholder of losses we incur. Corporate unitholders are urged to consult their own tax advisors regarding the applicability and effect to them of dual consolidated loss restrictions.

Limitations on Interest Deductions. The deductibility of a non-corporate taxpayer's investment interest expense generally is limited to the amount of that taxpayer's net investment income. For this purpose, investment interest expense includes, among other things, a unitholder's share of our interest expense attributed to portfolio income. The IRS has indicated that net passive income earned by a publicly traded partnership will be treated as investment income to its unitholders. In addition, the unitholder's share of our portfolio income will be treated as investment income.

Entity-Level Collections. If we are required or elect under applicable law to pay any U.S. federal, state or local or foreign income or withholding taxes on behalf of any present or former unitholder or the general partner, we are authorized to pay those taxes from our funds. That payment, if made, will be treated as a distribution of cash to the partner on whose behalf the payment was made. If the payment is made on behalf of a person whose identity cannot be determined, we are authorized to treat the payment as a distribution to all current unitholders. We are authorized to amend the partnership agreement in the manner necessary to maintain uniformity of intrinsic tax characteristics of units and to adjust later distributions, so that after giving effect to these distributions, the priority and characterization of distributions otherwise applicable under the partnership agreement are maintained as nearly as is practicable. Payments by us as described above could give rise to an overpayment of tax on behalf of an individual partner, in which event the partner would be required to file a claim in order to obtain a credit or refund of tax paid.

Allocation of Income, Gain, Loss, Deduction and Credit. In general, if we have a net profit, our items of income, gain, loss, deduction and credit will be allocated among the general partner and the unitholders in accordance with their percentage interests in us. At any time that incentive distributions are made to the general partner, gross income will be allocated to the general partner to the extent of these distributions. If we have a net loss for the entire year, that loss generally will be allocated first to the general partner and the unitholders in accordance with their percentage interests in us to the extent of their positive capital accounts and, second, to the general partner.

Table of Contents

Specified items of our income, gain, loss and deduction will be allocated to account for any difference between the tax basis and fair market value of any property held by the partnership immediately prior to an offering of common units, referred to in this discussion as Adjusted Property. The effect of these allocations to a unitholder purchasing common units in an offering essentially will be the same as if the tax basis of our assets were equal to their fair market value at the time of the offering. In addition, items of recapture income will be allocated to the extent possible to the partner who was allocated the deduction giving rise to the treatment of that gain as recapture income in order to minimize the recognition of ordinary income by some unitholders. Finally, although we do not expect that our operations will result in the creation of negative capital accounts, if negative capital accounts nevertheless result, items of our income and gain will be allocated in an amount and manner to eliminate the negative balance as quickly as possible.

An allocation of items of our income, gain, loss, deduction or credit, other than an allocation required by the Code to eliminate the difference between a partner's book capital account, which is credited with the fair market value of Adjusted Property, and tax capital account, which is credited with the tax basis of Adjusted Property, referred to in this discussion as the Book-Tax Disparity, generally will be given effect for U.S. federal income tax purposes in determining a partner's share of an item of income, gain, loss, deduction or credit only if the allocation has substantial economic effect. In any other case, a partner's share of an item will be determined on the basis of his interest in us, which will be determined by taking into account all the facts and circumstances, including:

this relative contributions to us;

the interests of all the partners in profits and losses;

the interest of all the partners in cash flow; and

the rights of all the partners to distributions of capital upon liquidation.

A unitholder's taxable income or loss with respect to a common unit each year will depend upon a number of factors, including (1) the nature and fair market value of our assets at the time the holder acquired the common unit, (2) whether we issue additional units or we engage in certain other transactions and (3) the manner in which our items of income, gain, loss, deduction and credit are allocated among our partners. For this purpose, we determine the value of our assets and the relative amounts of our items of income, gain, loss, deduction and credit allocable to our unitholders and our general partner as holder of the incentive distribution rights by reference to the value of our interests, including the incentive distribution rights. The IRS may challenge any valuation determinations that we make, particularly as to the incentive distribution rights, for which there is no public market. Moreover, the IRS could challenge certain other aspects of the manner in which we determine the relative allocations made to our unitholders and to the general partner as holder of our incentive distribution rights. A successful IRS challenge to our valuation or allocation methods could increase the amount of net taxable income and gain realized by a unitholder with respect to a common unit.

Section 754 Election. We have made an election under Section 754 of the Code to adjust a common unit purchaser's U.S. federal income tax basis in our assets (or *inside basis*) to reflect the purchaser's purchase price (or a *Section 743(b) adjustment*). The Section 743(b) adjustment belongs to the purchaser and not to other unitholders and does not apply to unitholders who acquire their common units directly from us. For purposes of this discussion, a unitholder's inside basis in our assets will be considered to have two components: (1) his share of our tax basis in our

assets (or *common basis*) and (2) his Section 743(b) adjustment to that basis.

In general, a purchaser's common basis is depreciated or amortized according to the existing method utilized by us. A positive Section 743(b) adjustment to that basis generally is depreciated or amortized in the same manner as property of the same type that has been newly placed in service by us. A negative Section 743(b) adjustment to that basis generally is recovered over the remaining useful life of the partnership's recovery property.

The calculations involved in the Section 743(b) adjustment are complex and will be made on the basis of assumptions as to the value of our assets and in accordance with the Code and applicable Treasury Regulations. We cannot assure you that the determinations we make will not be successfully challenged by the IRS and that the deductions resulting from them will not be reduced or disallowed altogether. Should the IRS require a different basis adjustment to be made, and should, in our judgment, the expense of compliance exceed the benefit of the election, we may seek consent from the IRS to revoke our Section 754 election. If such consent is given, a subsequent purchaser of units may be allocated more income than he would have been allocated had the election not been revoked.

Treatment of Short Sales. A unitholder whose units are loaned to a short seller who sells such units may be considered to have disposed of those units. If so, he would no longer be a partner with respect to those units until the termination of the loan and may recognize gain or loss from the disposition. As a result, any of our income, gain, loss, deduction or credit with respect to the units may not be reportable by the unitholder who loaned them and any cash distributions received by such unitholder with respect to those units may be fully taxable as ordinary income.

Unitholders desiring to assure their status as partners and avoid the risk of gain recognition from a loan to a short seller are urged to ensure that any applicable brokerage account agreements prohibit their brokers from borrowing their units.

Tax Treatment of Operations

Accounting Method and Taxable Year. We use the calendar year as our taxable year and the accrual method of accounting for U.S. federal income tax purposes. Each unitholder will be required to include in income his share of our income, gain, loss, deduction and credit for our taxable year ending within or with his taxable year. In addition, a unitholder who disposes of all of his units must include his share of our income, gain, loss, deduction and credit through the date of disposition in income for his taxable year that includes the date of disposition, with the result that a unitholder who has a taxable year ending on a date other than December 31 and who disposes of all of his units following the close of our taxable year but before the close of his taxable year must include his share of more than one year of our income, gain, loss, deduction and credit in income for the year of the disposition.

Table of Contents

Asset Tax Basis, Depreciation and Amortization. The tax basis of our assets will be used for purposes of computing depreciation and cost recovery deductions and, ultimately, gain or loss on the disposition of these assets. The U.S. federal income tax burden associated with any difference between the fair market value of our assets and their tax basis immediately prior to any offering of common units will be borne by the general partner and the existing limited partners.

To the extent allowable, we may elect to use the depreciation and cost recovery methods that will result in the largest deductions being taken in the earliest years after assets are placed in service. Property we subsequently acquire or construct may be depreciated using any method permitted by the Code.

If we dispose of depreciable property by sale, foreclosure or otherwise, all or a portion of any gain, determined by reference to the amount of depreciation previously deducted and the nature of the property, may be subject to the recapture rules and taxed as ordinary income rather than capital gain. Similarly, a unitholder who has taken cost recovery or depreciation deductions with respect to property we own likely will be required to recapture some or all of those deductions as ordinary income upon a sale of his interest in us.

The U.S. federal income tax consequences of the ownership and disposition of units will depend in part on our estimates of the relative fair market values, and the tax bases, of our assets at the time the holder acquired the common unit, we issue additional units or we engage in certain other transactions. Although we may from time to time consult with professional appraisers regarding valuation matters, we will make many of the relative fair market value estimates ourselves. These estimates and determinations of basis are subject to challenge and will not be binding on the IRS or the courts. If the estimates of fair market value or basis are later found to be incorrect, the character and amount of items of income, gain, loss, deductions or credits previously reported by unitholders might change, and unitholders might be required to adjust their tax liability for prior years and incur interest and penalties with respect to those adjustments.

Disposition of Common Units

Recognition of Gain or Loss. In general, gain or loss will be recognized on a sale of units equal to the difference between the amount realized and the unitholder's tax basis in the units sold. A unitholder's amount realized will be measured by the sum of the cash, the fair market value of other property received by him and his share of our nonrecourse liabilities. Because the amount realized includes a unitholder's share of our nonrecourse liabilities, the gain recognized on the sale of units could result in a tax liability in excess of any cash or property received from the sale.

Prior distributions from us in excess of cumulative net taxable income for a common unit that decreased a unitholder's tax basis in that common unit will, in effect, become taxable income if the common unit is sold at a price greater than the unitholder's tax basis in that common unit, even if the price received is less than his original cost. Except as noted below, gain or loss recognized by a unitholder on the sale or exchange of a unit generally will be taxable as capital gain or loss. Capital gain recognized by an individual on the sale of units held more than one year generally will be taxed at preferential tax rates.

A portion of a unitholder's amount realized may be allocable to unrealized receivables or to inventory items we own. The term unrealized receivables includes potential recapture items, including depreciation and amortization recapture. A unitholder will recognize ordinary income or loss to the extent of the difference between the portion of the unitholder's amount realized allocable to unrealized receivables or inventory items and the unitholder's share of our basis in such receivables or inventory items. Ordinary income attributable to unrealized receivables, inventory items and depreciation or amortization recapture may exceed net taxable gain realized upon the sale of a unit and may be

recognized even if a net taxable loss is realized on the sale of a unit. Thus, a unitholder may recognize both ordinary income and a capital loss upon a sale of units. Net capital losses generally may only be used to offset capital gains. An exception permits individuals to offset up to \$3,000 of net capital losses against ordinary income in any given year.

The IRS has ruled that a partner who acquires interests in a partnership in separate transactions must combine those interests and maintain a single adjusted tax basis for all those interests. Upon a sale or other disposition of less than all of those interests, a portion of that tax basis must be allocated to the interests sold using an equitable apportionment method. Treasury Regulations under Section 1223 of the Code allow a selling unitholder who can identify common units transferred with an ascertainable holding period to elect to use the actual holding period of the common units transferred. Thus, according to the ruling, a common unitholder will be unable to select high or low basis common units to sell as would be the case with corporate stock, but, according to the regulations, may designate specific common units sold for purposes of determining the holding period of units transferred. A unitholder electing to use the actual holding period of common units transferred must consistently use that identification method for all subsequent sales or exchanges of common units. A unitholder considering the purchase of additional units or a sale of common units purchased in separate transactions is urged to consult his tax advisor as to the possible consequences of this ruling and application of the regulations.

In addition, certain U.S. unitholders who are individuals, estates or trusts are required to pay an additional 3.8 percent tax on, among other things, capital gain from the sale or other disposition of their units. Unitholders should consult their tax advisors regarding the effect, if any, of this tax on their ownership of our common units.

Allocations Between Transferors and Transferees. In general, our taxable income or loss will be determined annually, will be prorated on a monthly basis and will be subsequently apportioned among the unitholders in proportion to the number of units owned by each of them as of the opening of the applicable exchange on the first business day of the month. However, gain or loss realized on a sale or other disposition of our assets other than in the ordinary course of business will be allocated among the unitholders on the first business day of the month in which that gain or loss is recognized. As a result of the foregoing, a unitholder transferring units may be allocated income, gain, loss, deduction and credit realized after the date of transfer. A unitholder who owns units at any time during a calendar quarter and who disposes of them prior to the record date set for a cash distribution for that quarter will be allocated items of our income, gain, loss and deductions attributable to months within that quarter in which the units were held but will not be entitled to receive that cash distribution.

Transfer Notification Requirements. A unitholder who sells any of his units, other than through a broker, generally is required to notify us in writing of that sale within 30 days after the sale (or, if earlier, January 15 of the year following the sale). A unitholder who acquires units generally is required to notify us in writing of that acquisition within 30 days after the purchase, unless a broker or nominee will satisfy such requirement. We are required to notify the IRS of any such transfers of units and to furnish specified information to the transferor and transferee. Failure to notify us of a transfer of units may lead to the imposition of substantial penalties.

Table of Contents

Constructive Termination. We will be considered to have been terminated for U.S. federal income tax purposes if there is a sale or exchange of 50 percent or more of the total interests in our capital and profits within a 12-month period. A constructive termination results in the closing of our taxable year for all unitholders. In the case of a unitholder reporting on a taxable year other than a calendar year, the closing of our taxable year may result in more than 12 months of our taxable income or loss being includable in his taxable income for the year of termination. We would be required to make new tax elections after a termination, including a new election under Section 754 of the Code, and a termination would result in a deferral of our deductions for depreciation. A termination could also result in penalties if we were unable to determine that the termination had occurred. Moreover, a termination might either accelerate the application of, or subject us to, tax legislation applicable to a newly formed partnership.

Foreign Tax Credit Considerations

Subject to detailed limitations set forth in the Code, a unitholder may elect to claim a credit against his liability for U.S. federal income tax for his share of foreign income taxes (and certain foreign taxes imposed in lieu of a tax based upon income) paid by us. Income allocated to unitholders likely will constitute foreign source income falling in the passive foreign tax credit category for purposes of the U.S. foreign tax credit limitation. The rules relating to the determination of the foreign tax credit are complex and unitholders are urged to consult their own tax advisors to determine whether or to what extent they would be entitled to such credit. A unitholder who does not elect to claim foreign tax credits may instead claim a deduction for his share of foreign taxes paid by us.

Tax-Exempt Organizations and Non-U.S. Investors

Investments in units by employee benefit plans, other tax-exempt organizations and non-U.S. persons, including nonresident aliens of the United States, non-U.S. corporations and non-U.S. trusts and estates (collectively, *non-U.S. unitholders*) raise issues unique to those investors and, as described below, may result in substantially adverse tax consequences to them.

Employee benefit plans and most other organizations exempt from U.S. federal income tax, including individual retirement accounts and other retirement plans, are subject to U.S. federal income tax on unrelated business taxable income. Virtually all of our income allocated to a unitholder that is such a tax-exempt organization will be unrelated business taxable income to it subject to U.S. federal income tax.

A non-U.S. unitholder may be subject to a 4 percent U.S. federal income tax on his share of the U.S. source portion of our gross income attributable to transportation that begins or ends (but not both) in the United States, unless either (a) an exemption applies and he files a U.S. federal income tax return to claim that exemption or (b) that income is effectively connected with the conduct of a trade or business in the United States (or *U.S. effectively connected income*). For this purpose, transportation income includes income from the use, hiring or leasing of a vessel to transport cargo, or the performance of services directly related to the use of any vessel to transport cargo. The U.S. source portion of our transportation income is deemed to be 50 percent of the income attributable to voyages that begin or end in the United States. Generally, no amount of the income from voyages that begin and end outside the United States is treated as U.S. source, and consequently none of our transportation income attributable to such voyages is subject to U.S. federal income tax. Although the entire amount of transportation income from voyages that begin and end in the United States would be fully taxable in the United States, we currently do not expect to have any transportation income from voyages that begin and end in the United States; however, there is no assurance that such voyages will not occur.

A non-U.S. unitholder may be entitled to an exemption from the 4 percent U.S. federal income tax or a refund of tax withheld on U.S. effectively connected income that constitutes transportation income if any of the following applies:

(1) such non-U.S. unitholder qualifies for an exemption from this tax under an income tax treaty between the United States and the country where such non-U.S. unitholder is resident; (2) in the case of an individual non-U.S. unitholder, he qualifies for the exemption from tax under Section 872(b)(1) of the Code as a resident of a country that grants an equivalent exemption from tax to residents of the United States; or (3) in the case of a corporate non-U.S. unitholder, it qualifies for the exemption from tax under Section 883 of the Code (or the *Section 883 Exemption*) (for the rules relating to qualification for the Section 883 Exemption, please read below under Possible Classification as a Corporation The Section 883 Exemption).

We may be required to withhold U.S. federal income tax, computed at the highest statutory rate, from cash distributions to non-U.S. unitholders with respect to their shares of our income that is U.S. effectively connected income. Our transportation income generally should not be treated as U.S. effectively connected income unless we have a fixed place of business in the United States and substantially all of such transportation income is attributable to either regularly scheduled transportation or, in the case of income derived from bareboat charters, is attributable to the fixed place of business in the United States. While we do not expect to have any regularly scheduled transportation or a fixed place of business in the United States, there can be no guarantee that this will not change. Under a ruling of the IRS, a portion of any gain recognized on the sale or other disposition of a unit by a non-U.S. unitholder may be treated as U.S. effectively connected income to the extent we have a fixed place of business in the United States and a sale of our assets would have given rise to U.S. effectively connected income. A non-U.S. unitholder would be required to file a U.S. federal income tax return to report his U.S. effectively connected income (including his share of any such income earned by us) and to pay U.S. federal income tax, or claim a credit or refund for tax withheld on such income. Further, unless an exemption applies, a non-U.S. corporation investing in units may be subject to a branch profits tax, at a 30 percent rate or lower rate prescribed by a treaty, with respect to its U.S. effectively connected income.

Non-U.S. unitholders must apply for and obtain a U.S. taxpayer identification number in order to file U.S. federal income tax returns and must provide that identification number to us for purposes of any U.S. federal income tax information returns we may be required to file. Non-U.S. unitholders are encouraged to consult with their own tax advisors regarding the U.S. federal, state and local tax consequences of an investment in units and any filing requirements related thereto.

Functional Currency

We are required to determine the functional currency of any of our operations that constitute a separate qualified business unit (or *QBU*) for U.S. federal income tax purposes and report the affairs of any QBU in this functional currency to our unitholders. Any transactions conducted by us other than in the U.S. Dollar or by a QBU other than in its functional currency may give rise to foreign currency exchange gain or loss. Further, if a QBU is required to maintain a functional currency other than the U.S. Dollar, a unitholder may be required to recognize foreign currency translation gain or loss upon a distribution of money or property from a QBU or upon the sale of common units, and items or income, gain, loss, deduction or credit allocated to the unitholder in such functional currency must be translated into the unitholder's functional currency.

Table of Contents

For purposes of the foreign currency rules, a QBU includes a separate trade or business owned by a partnership in the event separate books and records are maintained for that separate trade or business. The functional currency of a QBU is determined based upon the economic environment in which the QBU operates. Thus, a QBU whose revenues and expenses are primarily determined in a currency other than the U.S. Dollar will have a non-U.S. Dollar functional currency. We believe our principal operations constitute a QBU whose functional currency is the U.S. Dollar, but certain of our operations constitute separate QBUs whose functional currencies are other than the U.S. Dollar.

Proposed regulations (or the *Section 987 Proposed Regulations*) provide that the amount of foreign currency translation gain or loss recognized upon a distribution of money or property from a QBU or upon the sale of common units will reflect the appreciation or depreciation in the functional currency value of certain assets and liabilities of the QBU between the time the unitholder purchased his common units and the time we receive distributions from such QBU or the unitholder sells his common units. Foreign currency translation gain or loss will be treated as ordinary income or loss. A unitholder must adjust the U.S. federal income tax basis in his common units to reflect such income or loss prior to determining any other U.S. federal income tax consequences of such distribution or sale. A unitholder who owns less than a 5 percent interest in our capital or profits generally may elect not to have these rules apply by attaching a statement to his tax return for the first taxable year the unitholder intends the election to be effective. Further, for purposes of computing his taxable income and U.S. federal income tax basis in his common units, a unitholder will be required to translate into his own functional currency items of income, gain, loss or deduction of such QBU and his share of such QBU's liabilities. We intend to provide such information based on generally applicable U.S. exchange rates as is necessary for unitholders to comply with the requirements of the Section 987 Proposed Regulations as part of the U.S. federal income tax information we will furnish unitholders each year. However, a unitholder may be entitled to make an election to apply an alternative exchange rate with respect to the foreign currency translation of certain items. Unitholders who desire to make such an election should consult their own tax advisors.

Based upon our current projections of the capital invested in and profits of the non-U.S. Dollar QBUs, we believe that unitholders will be required to recognize only a nominal amount of foreign currency translation gain or loss each year and upon their sale of units. Nonetheless, the rules for determining the amount of translation gain or loss are not entirely clear at present as the Section 987 Proposed Regulations currently are not effective. Unitholders are urged to consult their own tax advisors for specific advice regarding the application of the rules for recognizing foreign currency translation gain or loss under their own circumstances. In addition to a unitholder's recognition of foreign currency translation gain or loss, the U.S. Dollar QBU will engage in certain transactions denominated in the Euro, which will give rise to a certain amount of foreign currency exchange gain or loss each year. This foreign currency exchange gain or loss will be treated as ordinary income or loss.

Information Returns and Audit Procedures

We intend to furnish to each unitholder, within 90 days after the close of each calendar year, specific U.S. federal income tax information, including a document in the form of IRS Form 1065, Schedule K-1, which sets forth his share of our items of income, gain, loss, deductions and credits as computed for U.S. federal income tax purposes for our preceding taxable year. In preparing this information, which will not be reviewed by counsel, we will take various accounting and reporting positions, some of which have been mentioned earlier, to determine each unitholder's share of such items of income, gain, loss, deduction and credit. We cannot assure you that those positions will yield a result that conforms to the requirements of the Code, Treasury Regulations or administrative interpretations of the IRS. We can not assure unitholders that the IRS will not successfully contend that those positions are impermissible. Any challenge by the IRS could negatively affect the value of the units.

We will be obligated to file U.S. federal income tax information returns with the IRS for any year in which we earn any U.S. source income or U.S. effectively connected income. In the event we were obligated to file a U.S. federal income tax information return but failed to do so, unitholders would not be entitled to claim any deductions, losses or credits for U.S. federal income tax purposes relating to us. Consequently, we may file U.S. federal income tax information returns for any given year. The IRS may audit any such information returns that we file. Adjustments resulting from an IRS audit of our return may require each unitholder to adjust a prior year's tax liability, and may result in an audit of his return. Any audit of a unitholder's return could result in adjustments not related to our returns as well as those related to our returns. Any IRS audit relating to our items of income, gain, loss, deduction or credit for years in which we are not required to file and do not file a U.S. federal income tax information return would be conducted at the partner-level, and each unitholder may be subject to separate audit proceedings relating to such items.

For years in which we file or are required to file U.S. federal income tax information returns, we will be treated as a separate entity for purposes of any U.S. federal income tax audits, as well as for purposes of judicial review of administrative adjustments by the IRS and tax settlement proceedings. For such years, the tax treatment of partnership items of income, gain, loss, deduction and credit will be determined in a partnership proceeding rather than in separate proceedings with the partners. The Code requires that one partner be designated as the Tax Matters Partner for these purposes. The partnership agreement names Teekay GP L.L.C. as our Tax Matters Partner.

The Tax Matters Partner will make some U.S. federal tax elections on our behalf and on behalf of unitholders. In addition, the Tax Matters Partner can extend the statute of limitations for assessment of tax deficiencies against unitholders for items reported in the information returns we file. The Tax Matters Partner may bind a unitholder with less than a 1 percent profits interest in us to a settlement with the IRS with respect to these items unless that unitholder elects, by filing a statement with the IRS, not to give that authority to the Tax Matters Partner. The Tax Matters Partner may seek judicial review, by which all the unitholders are bound, of a final partnership administrative adjustment and, if the Tax Matters Partner fails to seek judicial review, judicial review may be sought by any unitholder having at least a 1 percent interest in profits or by any group of unitholders having in the aggregate at least a 5 percent interest in profits. However, only one action for judicial review will go forward, and each unitholder with an interest in the outcome may participate.

A unitholder must file a statement with the IRS identifying the treatment of any item on his U.S. federal income tax return that is not consistent with the treatment of the item on an information return that we file. Intentional or negligent disregard of this consistency requirement may subject a unitholder to substantial penalties

Table of Contents

Special Reporting Requirements for Owners of Non-U.S. Partnerships.

A U.S. person who either contributes more than \$100,000 to us (when added to the value of any other property contributed to us by such person or a related person during the previous 12 months), or following a contribution owns, directly, indirectly or by attribution from certain related persons, at least a 10 percent interest in us, is required to file IRS Form 8865 with his U.S. federal income tax return for the year of the contribution to report the contribution and provide certain details about himself and certain related persons, us and any persons that own a 10 percent or greater direct interest in us. We will provide each unitholder with the necessary information about us and those persons who own a 10 percent or greater direct interest in us along with the Schedule K-1 information described previously.

In addition to the foregoing, a U.S. person who directly owns at least a 10 percent interest in us may be required to make additional disclosures on IRS Form 8865 in the event such person acquires, disposes or has his interest in us substantially increased or reduced. Further, a U.S. person who directly, indirectly or by attribution from certain related persons, owns at least a 10 percent interest in us may be required to make additional disclosures on IRS Form 8865 in the event such person, when considered together with any other U.S. persons who own at least a 10 percent interest in us, owns a greater than 50 percent interest in us. For these purposes, an interest in us generally is defined to include an interest in our capital or profits or an interest in our deductions or losses.

Significant penalties may apply for failing to satisfy IRS Form 8865 filing requirements and thus unitholders are advised to contact their tax advisors to determine the application of these filing requirements under their own circumstances.

In addition, individual citizens or residents of the United States who hold certain specified foreign financial assets, including units in a foreign partnership not held in an account maintained by a financial institution, with an aggregate value in excess of \$50,000, on the last day of a taxable year, or \$75,000 at anytime during that taxable year, may be required to report such assets on IRS Form 8938 with their U.S. federal income tax return for that taxable year. Penalties apply for failure to properly complete and file IRS Form 8938. Investors are encouraged to consult with your tax advisor regarding the potential application of this disclosure requirement.

Accuracy-related Penalties.

An additional tax equal to 20 percent of the amount of any portion of an underpayment of U.S. federal income tax attributable to one or more specified causes, including negligence or disregard of rules or regulations and substantial understatements of income tax, is imposed by the Internal Revenue Code. No penalty will be imposed, however, for any portion of an underpayment if it is shown that there was a reasonable cause for that portion and that the taxpayer acted in good faith regarding that portion.

A substantial understatement of income tax in any taxable year exists if the amount of the understatement exceeds the greater of 10 percent of the tax required to be shown on the return for the taxable year or \$5,000. The amount of any understatement subject to penalty generally is reduced if any portion is attributable to a position adopted on the return:

- (1) for which there is, or was, substantial authority ; or
- (2) as to which there is a reasonable basis and the pertinent facts of that position are disclosed on the return.

More stringent rules, including additional penalties and extended statutes of limitations, may apply as a result of our participation in listed transactions or reportable transactions with a significant tax avoidance purpose. While we do not anticipate participating in such transactions, if any item of income, gain, loss, deduction or credit included in the distributive shares of unitholders for a given year might result in an understatement of income relating to such a transaction, we will disclose the pertinent facts on a U.S. federal income tax information return for such year. In such event, we also will make a reasonable effort to furnish sufficient information for unitholders to make adequate disclosure on their returns and to take other actions as may be appropriate to permit unitholders to avoid liability for penalties.

Possible Classification as a Corporation

If we fail to meet the Qualifying Income Exception described above with respect to our classification as a partnership for U.S. federal income tax purposes, other than a failure that is determined by the IRS to be inadvertent and that is cured within a reasonable time after discovery, we will be treated as a non-U.S. corporation for U.S. federal income tax purposes. If previously treated as a partnership, our change in status would be deemed to have been effected by our transfer of all of our assets, subject to liabilities, to a newly formed non-U.S. corporation, in return for stock in that corporation, and then our distribution of that stock to our unitholders and other owners in liquidation of their interests in us. Unitholders that are U.S. persons would be required to file IRS Form 926 to report these deemed transfers and any other transfers they made to us while we were treated as a corporation and may be required to recognize income or gain for U.S. federal income tax purposes to the extent of certain prior deductions or losses and other items. Substantial penalties may apply for failure to satisfy these reporting requirements, unless the person otherwise required to report shows such failure was due to reasonable cause and not willful neglect.

If we were treated as a corporation in any taxable year, either as a result of a failure to meet the Qualifying Income Exception or otherwise, our items of income, gain, loss, deduction and credit would not pass through to unitholders. Instead, we would be subject to U.S. federal income tax based on the rules applicable to foreign corporations, not partnerships, and such items would be treated as our own. Any distribution made to a unitholder would be treated as taxable dividend income to the extent of our current and accumulated earnings and profits, a nontaxable return of capital to the extent of the unitholder's tax basis in his common units, and taxable capital gain thereafter. Section 743(b) adjustments to the basis of our assets would no longer be available to purchasers in the marketplace.

Taxation of Operating Income. We expect that substantially all of our gross income and the gross income of our corporate subsidiaries will be attributable to the transportation of LNG, LPG, ammonia, crude oil and related products. For this purpose, gross income attributable to transportation (or *Transportation Income*) includes income derived from, or in connection with, the use (or hiring or leasing for use) of a vessel to transport cargo, or the performance of services directly related to the use of any vessel to transport cargo, and thus includes both time charter and bareboat charter income.

Transportation Income that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States will be considered to be 50 percent derived from sources within the United States (or *U.S. Source International Transportation Income*). Transportation Income attributable to transportation that both begins and ends in the United States will be considered to be 100 percent derived from sources within the United States (or *U.S. Source Domestic Transportation Income*). Transportation Income attributable to transportation exclusively between non-U.S. destinations will be considered to be 100 percent derived from sources outside the United States. Transportation Income derived from sources outside the United States generally will not be subject to U.S. federal income tax.

Table of Contents

Based on our current operations and the operations of our subsidiaries, we expect substantially all of our Transportation Income to be from sources outside the United States and not subject to U.S. federal income tax. However, if we or any of our subsidiaries does earn U.S. Source International Transportation Income or U.S. Source Domestic Transportation, our income or our subsidiaries income may be subject to U.S. federal income taxation under one of two alternative tax regimes (the 4 percent gross basis tax or the net basis tax, as described below), unless the exemption from U.S. taxation under Section 883 of the Code (or the *Section 883 Exemption*) applies.

The Section 883 Exemption. In general, the Section 883 Exemption provides that if a non-U.S. corporation satisfies the requirements of Section 883 of the Code and the regulations thereunder (or the Section 883 Regulations), it will not be subject to the 4 percent gross basis tax or the net basis tax and branch profits taxes described below on its U.S. Source International Transportation Income. The Section 883 Exemption does not apply to U.S. Source Domestic Transportation Income.

A non-U.S. corporation will qualify for the Section 883 Exemption if, among other things, it is organized in a jurisdiction outside the United States that grants an equivalent exemption from tax to corporations organized in the United States (or an *Equivalent Exemption*); it meets one of three ownership tests described in the Section 883 Regulations (or the *Ownership Test*) and it meets certain substantiation, reporting and other requirements (or the *Substantiation Requirements*).

We are organized under the laws of the Republic of The Marshall Islands. The U.S. Treasury Department has recognized the Republic of The Marshall Islands as a jurisdiction that grants an Equivalent Exemption. We also believe that we will be able to satisfy the Substantiation Requirements necessary to qualify for the Section 883 Exemption. Consequently, our U.S. Source International Transportation Income (including for this purpose, any such income earned by our subsidiaries that have properly elected to be treated as partnerships or disregarded as entities separate from us for U.S. federal income tax purposes) would be exempt from U.S. federal income taxation provided we could satisfy the Ownership Test. However, we do not believe that we met the Ownership Test in 2013 and we do not expect to meet the Ownership Test in all succeeding years. As a result, in the event we were treated as a corporation, we would not qualify for the Section 883 Exemption and our U.S. Source International Transportation Income would not be exempt from U.S. federal income taxation.

The 4 Percent Gross Basis Tax. If we were to be treated as a corporation and if the Section 883 Exemption described above and the net basis tax described below does not apply, we would be subject to a 4 percent U.S. federal income tax on our U.S. Source International Transportation Income, without benefit of deductions. We estimate that, in this event, we would be subject to less than \$500,000 of U.S. federal income tax in 2014 and in each subsequent year (in addition to any U.S. federal income taxes on our subsidiaries, as described below) based on the amount of U.S. Source International Transportation Income we earned for 2013 and our expected U.S. Source International Transportation Income for subsequent years. The amount of such tax for which we would be liable for any year in which we were treated as a corporation for U.S. federal income tax purposes would depend upon the amount of income we earn from voyages into or out of the United States in such year, however, which is not within our complete control.

Net Basis Tax and Branch Profits Tax. We currently do not expect to have a fixed place of business in the United States. Nonetheless, if this were to change or we otherwise were treated as having such a fixed place of business in the United States, our U.S. Source International Transportation Income may be treated as effectively connected with the conduct of a trade or business in the United States (or *Effectively Connected Income*) if substantially all of our U.S. Source International Transportation Income is attributable to regularly scheduled transportation or, in the case of income derived from bareboat charters, is attributable to the fixed place of business in the United States. Based on our current operations, none of our potential U.S. Source International Transportation Income is attributable to regularly scheduled transportation or is derived from bareboat charters attributable to a fixed place of business in the United

States. As a result, if we were classified as a corporation, we do not anticipate that any of our U.S. Source International Transportation Income would be treated as Effectively Connected Income. However, there is no assurance that we would not earn income pursuant to regularly scheduled transportation or bareboat charters attributable to a fixed place of business in the United States in the future, which would result in such income being treated as Effectively Connected Income if we were classified as a corporation. Any income that we earn that is treated as Effectively Connected Income would be subject to U.S. federal corporate income tax (the highest statutory rate currently is 35.0 percent), unless the Section 883 Exemption (as discussed above) applied. The 4 percent U.S. federal income tax described above is inapplicable to Effectively Connected Income.

Unless the Section 883 Exemption applied, a 30 percent branch profits tax imposed under Section 884 of the Code also would apply to our earnings that result from Effectively Connected Income, and a branch interest tax could be imposed on certain interest paid or deemed paid by us.

On the sale of a vessel that has produced Effectively Connected Income, we could be subject to the net basis corporate income tax and to the 30 percent branch profits tax with respect to our gain not in excess of certain prior deductions for depreciation that reduced Effectively Connected Income. Otherwise, we would not expect to be subject to U.S. federal income tax with respect to the remainder of any gain realized on sale of a vessel because it is expected that any sale of a vessel will be structured so that it is considered to occur outside of the United States and so that it is not attributable to an office or other fixed place of business in the United States.

Consequences of Possible PFIC Classification.

A non-U.S. entity treated as a corporation for U.S. federal income tax purposes will be a passive foreign investment company (or *PFIC*) in any taxable year in which, after taking into account the income and assets of the corporation and certain subsidiaries pursuant to a look through rule, either (i) at least 75 percent of its gross income is passive income or (ii) at least 50 percent of the average value of its assets is attributable to assets that produce or are held for the production of passive income. For purposes of these tests, passive income includes dividends, interest and gains from the sale or exchange of investment property and rents and royalties other than rents and royalties that are received from unrelated parties in connection with the active conduct of a trade or business. For purposes of these tests, income derived from the performance of services does not constitute passive income.

Table of Contents

Based upon our current assets and operations, we do not believe that we would be considered to be a PFIC even if we were treated as a corporation. No assurance can be given, however, that the IRS would accept this position or that we would not constitute a PFIC for any future taxable year if we were treated as a corporation and there were to be changes in our assets, income or operations. In addition, the decision of the United States Court of Appeals for the Fifth Circuit in *Tidewater Inc. v. United States*, 565 F.3d 299 (5th Cir. 2009) held that income derived from certain time chartering activities should be treated as rental income rather than services income for purposes of a foreign sales corporation provision of the Code. However, the IRS stated in an Action on Decision (AOD 2010-001) that it disagrees with, and will not acquiesce to, the way that the rental versus services framework was applied to the facts in the *Tidewater* decision, and in its discussion stated that the time charters at issue in *Tidewater* would be treated as producing services income for PFIC purposes. The IRS's statement with respect to *Tidewater* cannot be relied upon or otherwise cited as precedent by taxpayers. Consequently, in the absence of any binding legal authority specifically relating to the statutory provisions governing PFICs, there can be no assurance that the IRS or a court would not follow the *Tidewater* decision in interpreting the PFIC provisions under the Code. Nevertheless, based on our current assets and operations, we believe that we would not now be nor would have ever been a PFIC even if we were treated as a corporation.

If we were to be treated as a PFIC for any taxable year during which a unitholder owns units, a U.S. unitholder generally would be subject to special rules (regardless of whether we continue thereafter to be a PFIC) resulting in increased tax liability with respect to (1) any excess distribution (i.e., the portion of any distributions received by a unitholder on our common units in a taxable year in excess of 125 percent of the average annual distributions received by the unitholder in the three preceding taxable years or, if shorter, the unitholder's holding period for the units) and (2) any gain realized upon the sale or other disposition of units. Under these rules:

the excess distribution or gain will be allocated ratably over the unitholder's aggregate holding period for the common units;

the amount allocated to the current taxable year and any taxable year prior to the taxable year we were first treated as a PFIC with respect to the unitholder would be taxed as ordinary income in the current taxable year;

the amount allocated to each of the other taxable years would be subject to U.S. federal income tax at the highest rate in effect for the applicable class of taxpayer for that year; and

an interest charge for the deemed deferral benefit would be imposed with respect to the resulting tax attributable to each such other taxable year.

In addition, for each year during which a U.S. unitholder holds units, we were treated as a PFIC, and the total value of all PFIC stock that such U.S. unitholder directly or indirectly owns exceeds certain thresholds, such unitholder would be required to file IRS Form 8621 with its annual U.S. federal income tax return to report its ownership of our units.

Certain elections, such as a qualified electing fund (or *QEF*) election or mark to market election, may be available to a unitholder if we were classified as a PFIC. If we determine that we are or will be a PFIC, we will provide unitholders with information concerning the potential availability of such elections.

Under current law, dividends received by individual citizens or residents of the United States from domestic corporations and qualified foreign corporations generally are treated as net capital gains and subject to U.S. federal income tax at reduced rates. However, if we were classified as a PFIC for our taxable year in which we pay a dividend, we would not be considered a qualified foreign corporation, and individuals receiving such dividends would not be eligible for the reduced rate of U.S. federal income tax.

Consequences of Possible Controlled Foreign Corporation Classification. If we were to be treated as a corporation for U.S. federal income tax purposes and if CFC Shareholders (generally, U.S. unitholders who each own, directly, indirectly or constructively, 10 percent or more of the total combined voting power of our outstanding shares entitled to vote) own directly, indirectly or constructively more than 50 percent of either the total combined voting power of our outstanding shares entitled to vote or the total value of all of our outstanding shares, we generally would be treated as a controlled foreign corporation (or a *CFC*).

CFC Shareholders are treated as receiving current distributions of their respective shares of certain income of the CFC without regard to any actual distributions and are subject to other burdensome U.S. federal income tax and administrative requirements but generally are not also subject to the requirements generally applicable to shareholders of a PFIC. In addition, a person who is or has been a CFC Shareholder may recognize ordinary income on the disposition of shares of the CFC. Although we do not believe we are or will become a CFC even if we were to be treated as a corporation for U.S. federal income tax purposes, U.S. persons purchasing a substantial interest in us should consider the potential implications of being treated as a CFC Shareholder in the event we become a CFC in the future.

The U.S. federal income tax consequences to U.S. Holders who are not CFC Shareholders would not change in the event we become a CFC in the future.

Taxation of Our Subsidiary Corporations

Our subsidiaries Teekay LNG Holdco L.L.C., DHJS Hull No. 2007-001 L.L.C and DHJS Hull No. 2007-002 L.L.C. have been classified as corporations for U.S. federal income tax purposes and have been subject to U.S. federal income tax based on the rules applicable to foreign corporations described above under Possible Classification as a Corporation Taxation of Operating Income, including, but not limited to, the 4 percent gross basis tax or the net basis tax if the Section 883 Exemption does not apply. We believe that the Section 883 Exemption would apply to our corporate subsidiaries only to the extent that it would apply to us if we were to be treated as a corporation. As such, we believe that the Section 883 Exemption did not apply for 2013 and would not apply in subsequent years and therefore, the 4 percent gross basis tax applied to our subsidiary corporations in 2013 and will apply to our subsidiary corporations in subsequent years. In this regard, we estimate that we will be subject to approximately \$100,000 or less of U.S. federal income tax in 2014 and in each subsequent year based on the amount of U.S. Source International Transportation Income these subsidiaries earned for 2013 and their expected U.S. Source International Transportation Income for 2014 and subsequent years. The amount of such tax for which they would be liable for any year will depend upon the amount of income they earn from voyages into or out of the United States in such year, which, however, is not within their complete control.

Table of Contents

As non-U.S. entities classified as corporations for U.S. federal income tax purposes, our subsidiary Teekay LNG Holdco L.L.C. could be considered a PFIC. We received a ruling from the IRS that Teekay LNG Holdco L.L.C. will be classified as a CFC rather than a PFIC as long as it is wholly-owned by a U.S. partnership.

DHJS Hull No. 2007-001 L.L.C and DHJS Hull No. 2007-002 L.L.C. are also owned by our U.S. partnership. Effective January 1, 2014, these subsidiaries have elected to be disregarded for U.S. federal income tax purposes. For the period of time during which these subsidiaries were classified as corporations for U.S. federal income tax purposes we intend to take the position that these subsidiaries should also be treated as CFCs rather than PFICs. Moreover, we believe and intend to take the position that these subsidiaries were not PFICs at any time prior to being owned by our U.S. partnership. No assurance can be given, however, that the IRS, or a court of law, will accept this position or would not follow the *Tidewater* decision in interpreting the PFIC provisions under the Code (as discussed above).

Canadian Federal Income Tax Consequences. The following discussion is a summary of the material Canadian federal income tax consequences under the *Income Tax Act* (Canada) (or the *Canada Tax Act*) that we believe are relevant to holders of common units who, for the purposes of the Canada Tax Act and the Canada-United States Tax Convention 1980 (or the *Canada-U.S. Treaty*), are at all relevant times resident in the United States and entitled to all of the benefits of the Canada U.S. Treaty and who deal at arm's length with us and Teekay Corporation (or *U.S. Resident Holders*). This discussion takes into account all proposed amendments to the Canada Tax Act and the regulations thereunder that have been publicly announced by or on behalf of the Minister of Finance (Canada) prior to the date hereof and assumes that such proposed amendments will be enacted substantially as proposed. However, no assurance can be given that such proposed amendments will be enacted in the form proposed or at all. This discussion assumes that we are, and will continue to be, classified as a partnership for United States federal income tax purposes.

A U.S. Resident Holder will not be liable to tax under the Canada Tax Act on any income or gains allocated by us to the U.S. Resident Holder in respect of such U.S. Resident Holder's common units, provided that for purposes of the Canada-U.S. Treaty, (a) we do not carry on business through a permanent establishment in Canada and (b) such U.S. Resident Holder does not hold such common units in connection with a business carried on by such U.S. Resident Holder through a permanent establishment in Canada.

A U.S. Resident Holder will not be liable to tax under the Canada Tax Act on any income or gain from the sale, redemption or other disposition of such U.S. Resident Holder's common units, provided that, for purposes of the Canada-U.S. Treaty, such common units do not, and did not at any time in the twelve-month period preceding the date of disposition, form part of the business property of a permanent establishment in Canada of such U.S. Resident Holder.

In this regard, we believe that our activities and affairs can be conducted in a manner that we will not be carrying on business in Canada and that U.S. Resident Holders should not be considered to be carrying on business in Canada for purposes of the Canada Tax Act or the Canada-U.S. Treaty solely by reason of the acquisition, holding, disposition or redemption of common units. We intend that this is and continues to be the case, notwithstanding that Teekay Shipping Limited (a subsidiary of Teekay Corporation that is resident and based in Bermuda) provides certain services to Teekay LNG Partners L.P. and obtains some or all such services under subcontracts with Canadian service providers. However, we cannot assure this result.

Other Taxation

We and our subsidiaries are subject to taxation in certain non-U.S. jurisdictions because we or our subsidiaries are either organized, or conduct business or operations, in such jurisdictions. We intend that our business and the business of our subsidiaries will be conducted and operated in a manner that minimizes taxes imposed upon us and our

subsidiaries. However, we cannot assure this result as tax laws in these or other jurisdictions may change or we may enter into new business transactions relating to such jurisdictions, which could affect our tax liability. Please read Item 18 Financial Statements: Note 11 Income Tax.

Documents on Display

Documents concerning us that are referred to herein may be inspected at our principal executive headquarters at 4th Floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08, Bermuda. Those documents electronically filed via the SEC's Electronic Data Gathering, Analysis, and Retrieval (or *EDGAR*) system may also be obtained from the SEC's website at www.sec.gov, free of charge, or from the SEC's Public Reference Section at 100 F Street, NE, Washington, D.C. 20549, at prescribed rates. Further information on the operation of the SEC public reference rooms may be obtained by calling the SEC at 1-800-SEC-0330.

Item 11. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

We are exposed to the impact of interest rate changes primarily through our borrowings that require us to make interest payments based on LIBOR, EURIBOR or NIBOR. Significant increases in interest rates could adversely affect our operating margins, results of operations and our ability to service our debt. From time to time, we use interest rate swaps to reduce our exposure to market risk from changes in interest rates. The principal objective of these contracts is to minimize the risks and costs associated with our floating-rate debt.

We are exposed to credit loss in the event of non-performance by the counterparties to the interest rate swap agreements. In order to minimize counterparty risk, we only enter into derivative transactions with counterparties that are rated A- or better by Standard & Poor's or A3 or better by Moody's at the time of the transactions. In addition, to the extent practical, interest rate swaps are entered into with different counterparties to reduce concentration risk.

The table below provides information about our financial instruments at December 31, 2013, that are sensitive to changes in interest rates. For long-term debt and capital lease obligations, the table presents principal payments and related weighted-average interest rates by expected maturity dates. For interest rate swaps, the table presents notional amounts and weighted-average interest rates by expected contractual maturity dates.

Table of Contents

	Expected Maturity Date							Fair Value	Fair Value Liability Rate ⁽¹⁾
	2014	2015	2016	2017	2018	There-after	Total		
	(in millions of U.S. Dollars, except percentages)								
Long-Term Debt:									
Variable-Rate (\$U.S.) ⁽²⁾	55.7	111.3	56.9	57.6	426.2	324.0	1,031.7	(952.5)	1.3%
Variable-Rate (Euro) ^{(3) (4)}	16.5	17.7	19.0	20.4	163.1	103.5	340.2	(313.9)	1.8%
Variable-Rate (NOK) ^{(4) (5)}				115.3	148.2		263.5	(274.2)	6.4%
Fixed-Rate Debt (\$U.S.)	24.9	24.9	24.9	24.9	24.9	17.6	142.1	(142.9)	5.3%
Average Interest Rate	5.4%	5.4%	5.4%	5.4%	5.4%	5.0%	5.3%		
Capital Lease Obligations⁽⁶⁾									
Variable-Rate (\$U.S.) ⁽⁷⁾	62.0	4.4	4.6	28.3	26.2		125.5	(125.5)	7.0%
Average Interest Rate ⁽⁸⁾	8.5%	5.4%	5.4%	4.6%	6.4%		7.0%		
Interest Rate Swaps:									
Contract Amount (\$U.S.) ^{(6) (9)}	19.9	20.6	21.2	152.0	51.8	314.8	580.3	(102.3)	5.5%
Average Fixed-Pay Rate ⁽²⁾	5.6%	5.6%	5.6%	5.3%	5.2%	5.7%	5.5%		
Contract Amount (Euro) ^{(4) (10)}	16.5	17.7	19.0	20.4	163.0	103.6	340.2	(31.7)	3.1%
Average Fixed-Pay Rate ⁽³⁾	3.1%	3.1%	3.1%	3.1%	2.6%	3.8%	3.1%		

- (1) Rate refers to the weighted-average effective interest rate for our long-term debt and capital lease obligations, including the margin we pay on our floating-rate debt and the average fixed pay rate for our interest rate swap agreements. The average interest rate for our capital lease obligations is the weighted-average interest rate implicit in our lease obligations at the inception of the leases. The average fixed pay rate for our interest rate swaps excludes the margin we pay on our drawn floating-rate debt, which as of December 31, 2013 ranged from 0.30% to 3.20%. Please read Item 18 Financial Statements: Note 9 Long-Term Debt.
- (2) Interest payments on U.S. Dollar-denominated debt and interest rate swaps are based on LIBOR.
- (3) Interest payments on Euro-denominated debt and interest rate swaps are based on EURIBOR.
- (4) Euro-denominated and NOK-denominated amounts have been converted to U.S. Dollars using the prevailing exchange rate as of December 31, 2013.
- (5) Interest payments on our NOK-denominated debt and on our cross currency swaps are based on NIBOR. Our NOK 700 million and NOK 900 million debt have been economically hedged with cross currency swaps, to swap all interest and principal payments into U.S. Dollars, with the respective interest payments fixed at a rate of 6.88% and 6.43%, and the transfer of principal locked in at \$125.0 million and \$150.0 million upon maturity.

Please see below in the foreign currency fluctuation section and read Item 18 Financial Statements: Note 12 Derivative Instruments.

- (6) Under the terms of the capital leases for the RasGas II LNG Carriers (see Item 18 Financial Statements: Note 4 Leases and Restricted Cash), we are required to have on deposit, subject to a variable rate of interest, an amount of cash that, together with interest earned on the deposit, will equal the remaining amounts owing under the variable-rate leases. The deposits, which as at December 31, 2013 totaled \$475.6 million, and the lease obligations, which as at December 31, 2013 totaled \$472.8 million, have been swapped for fixed-rate deposits and fixed-rate obligations. Consequently, Teekay Nakilat is not subject to interest rate risk from these obligations and deposits and, therefore, the lease obligations, cash deposits and related interest rate swaps have been excluded from the table above. As at December 31, 2013, the contract amount, fair value and fixed interest rates of these interest rate swaps related to Teekay Nakilat's capital lease obligations and restricted cash deposits were \$404.5 million and \$469.0 million, (\$66.8) million and \$81.1 million, and 4.9% and 4.8%, respectively.
- (7) The amount of capital lease obligations represents the present value of minimum lease payments together with our purchase obligation, as applicable.
- (8) The average interest rate is the weighted-average interest rate implicit in the capital lease obligations at the inception of the leases. Interest rate adjustments on these leases have corresponding adjustments in charter receipts under the terms of the charter contracts to which these leases relate to.
- (9) The average variable receive rate for our U.S. Dollar-denominated interest rate swaps is set at 3-month or 6-month LIBOR.
- (10) The average variable receive rate for our Euro-denominated interest rate swaps is set at 1-month EURIBOR.

Table of Contents**Spot Market Rate Risk**

One of our Suezmax tankers, the *Toledo Spirit*, operates pursuant to a time-charter contract that increases or decreases the otherwise fixed-rate established in the charter depending on the spot charter rates that we would have earned had we traded the vessel in the spot tanker market. The remaining term of the time-charter contract was 12 years as of December 31, 2013, although the charterer has the right to terminate the time-charter in July 2018. We have entered into an agreement with Teekay Corporation under which Teekay Corporation pays us any amounts payable to the charterer as a result of spot rates being below the fixed rate, and we pay Teekay Corporation any amounts payable to us from the charterer as a result of spot rates being in excess of the fixed rate. The amounts receivable or payable to from Teekay Corporation are settled at the end of each year. At December 31, 2013, the fair value of this derivative asset was \$6.3 million and the change from reporting period to period has been reported in realized and unrealized loss on derivative instruments.

Foreign Currency Fluctuations

Our functional currency is U.S. Dollars because primarily all of our revenues and most of our operating costs are in U.S. Dollars. Our results of operations are affected by fluctuations in currency exchange rates. The volatility in our financial results due to currency exchange rate fluctuations is attributed primarily to foreign currency revenues and expenses, our Euro-denominated loans and restricted cash deposits and our NOK-denominated bonds. A portion of our voyage revenues are denominated in Euros. A portion of our vessel operating expenses and general and administrative expenses are denominated in Euros, which is primarily a function of the nationality of our crew and administrative staff. We have Euro-denominated interest expense and Euro-denominated interest income related to our Euro-denominated loans of 247.6 million Euros (\$340.2 million) and Euro-denominated restricted cash deposits of 13.6 million Euros (\$18.7 million), respectively, as at December 31, 2013. We also incur NOK-denominated interest expense on our NOK-denominated bonds; however, we entered into cross currency swaps and pursuant to these swaps we receive the principal amount in NOK on the maturity date of the swap, in exchange for payment of a fixed U.S. Dollar amount. In addition, the cross currency swaps exchange a receipt of floating interest in NOK based on NIBOR plus a margin for a payment of U.S. Dollar fixed interest. The purpose of the cross currency swaps is to economically hedge the foreign currency exposure on the payment of interest and principal of our NOK bonds due in 2017 through 2018, and to economically hedge the interest rate exposure. We have not designated, for accounting purposes, these cross currency swaps as cash flow hedges of its NOK-denominated bonds due in 2017 through 2018. Please read Item 18 Financial Statements: Note 12 Derivative Instruments. At December 31, 2013, the fair value of the derivative liabilities was \$18.2 million and the change from the date of issuance in May 2012 and September 2013 to the reporting period has been reported in foreign currency exchange (loss) gain. As a result, fluctuations in the Euro and NOK relative to the U.S. Dollar have caused, and are likely to continue to cause, fluctuations in our reported voyage revenues, vessel operating expenses, general and administrative expenses, interest expense, interest income, realized and unrealized loss on derivative instruments and foreign currency exchange (loss) gain.

Item 15. Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934, as amended (or the *Exchange Act*)) that are designed to ensure that (i) information required to be disclosed in our reports that are filed or submitted under the Exchange Act, are recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and (ii) information required to be disclosed by us in the reports we file or submit under the Exchange Act is accumulated and communicated to our management, including the principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

We conducted an evaluation of our disclosure controls and procedures under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer. Based on the evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective as of December 31, 2013.

The Chief Executive Officer and Chief Financial Officer do not expect that our disclosure controls or internal controls will prevent all error and all fraud. Although our disclosure controls and procedures were designed to provide reasonable assurance of achieving their objectives, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within us have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based partly on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining for us adequate internal controls over financial reporting.

Our internal controls are designed to provide reasonable assurance as to the reliability of our financial reporting and the preparation and presentation of the consolidated financial statements for external purposes in accordance with

accounting principles generally accepted in the United States. Our internal controls over financial reporting include those policies and procedures that: 1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; 2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with U.S. generally accepted accounting principles, and that our receipts and expenditures are being made in accordance with authorizations of management and the directors; and 3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our consolidated financial statements.

We conducted an evaluation of the effectiveness of our internal control over financial reporting based upon the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. This evaluation included review of the documentation of controls, evaluation of the design effectiveness of controls, testing of the operating effectiveness of controls and a conclusion on this evaluation.

Because of its inherent limitations, internal controls over financial reporting may not prevent or detect misstatements even when determined to be effective and can only provide reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate. Based on the evaluation, management has determined that the internal control over financial reporting was effective as of December 31, 2013.

Our independent auditors, KPMG LLP, a registered independent public accounting firm, has audited the accompanying consolidated financial statements and our internal control over financial reporting. Their attestation report on the effectiveness of our internal control over financial reporting can be found on page F-2 of this Annual Report.

During 2013, there were no changes in our internal controls that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**Item 16A. Audit Committee Financial Expert**

The Board of Directors of our General Partner has determined that director Robert E. Boyd qualified, and Ms. Beverlee F. Park, who replaced Mr. Boyd when he retired from the Board of Directors of our General Partner on March 11, 2014, qualifies as an audit committee financial expert and is independent under applicable NYSE and SEC standards.

Item 16B. Code of Ethics

We have adopted Standards of Business Conduct that include a Code of Ethics for all our employees and the employees and directors of our General Partner. This document is available under About Us Partnership Governance from the Home Page of our web site (www.teekaylng.com). We intend to disclose, under About us Partnership Governance in the About Us section of our web site, any waivers to or amendments of our Standards of Business Conduct for the benefit of any directors and executive officers of our General Partner.

Item 16C. Principal Accountant Fees and Services

Our principal accountant for 2013 and 2012 was KPMG LLP, Chartered Accountants. The following table shows the fees we paid or accrued for audit and audit-related services provided by KPMG LLP for 2013 and 2012.

	2013	2012
Fees (in thousands of U.S. Dollars)	\$	\$
Audit Fees ⁽¹⁾	837	719
Audit-Related Fees ⁽²⁾	10	10
Other ⁽³⁾	50	
Total	897	729

(1) Audit fees represent fees for professional services provided in connection with the audit of our consolidated financial statements, review of our quarterly consolidated financial statements, audit services provided in connection with other statutory audits and professional services in connection with the review of our regulatory filings for our equity offerings.

(2) Audit-related fees relate to other accounting consultations.

(3) Other fees relate to due diligence on business development activities.

No fees for tax services were provided to the Partnership by the auditor during the term of their appointments in 2013 and 2012.

The Audit Committee of our General Partner's Board of Directors has the authority to pre-approve permissible audit, audit-related and non-audit services not prohibited by law to be performed by our independent auditors and associated fees. Engagements for proposed services either may be separately pre-approved by the Audit Committee or entered into pursuant to detailed pre-approval policies and procedures established by the Audit Committee, as long as the Audit Committee is informed on a timely basis of any engagement entered into on that basis. The Audit Committee pre-approved all engagements and fees paid to our principal accountant in 2013.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Unitholders of Teekay LNG Partners L.P.

We have audited the accompanying consolidated balance sheets of Teekay LNG Partners L.P. and subsidiaries (the Partnership) as of December 31, 2013 and 2012, and the related consolidated statements of income and comprehensive income, cash flows, and changes in total equity for each of the years in the three-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Partnership as of December 31, 2013 and 2012, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Partnership's internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control-Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated April 29, 2014 expressed an unqualified opinion on the effectiveness of the Partnership's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Unitholders of Teekay LNG Partners L.P.

We have audited Teekay LNG Partners L.P. and subsidiaries (the Partnership) internal control over financial reporting as of December 31, 2013, based on the criteria established in Internal Control Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Partnership's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting in the accompanying Form 20-F. Our responsibility is to express an opinion on the Partnership's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Partnership maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013 based on the criteria established in Internal Control Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Partnership as at December 31, 2013 and 2012, and the related consolidated statements of income and comprehensive income, cash flows, and changes in total equity for each of the years in the three-year period ended December 31, 2013, and our report dated April 29, 2014, expressed an unqualified opinion on those consolidated financial statements.

The consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (or *GAAP*). These financial statements include the accounts of Teekay LNG Partners L.P. (or the *Partnership*), which is a limited partnership organized under the laws of the Republic of The Marshall Islands, its wholly owned or controlled subsidiaries and certain variable interest entities for which Teekay LNG Partners L.P. or its subsidiaries are the primary beneficiaries (see Note 13a). Significant intercompany balances and transactions have been eliminated upon consolidation. The preparation of consolidated financial statements in conformity with *GAAP* requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

In order to more closely align the Partnership's presentation to that of many of its peers, the cost of ship management services of \$7.8 million for the year ended December 31, 2013 has been presented as vessel operating expenses in the Partnership's consolidated statements of income and comprehensive income. Prior to 2013, the Partnership included these amounts in general and administrative expenses. All such costs incurred in comparative periods have been reclassified from general and administrative expenses to vessel operating expenses to conform to the presentation adopted in the current period. The amounts reclassified were \$8.2 million and \$8.1 million for the years ended December 31, 2012 and 2011, respectively. In addition, certain of the other comparative figures have been reclassified to conform to the presentation adopted in the current period.

Foreign currency

The consolidated financial statements are stated in U.S. Dollars and the functional currency of the Partnership and its subsidiaries is the U.S. Dollar. Transactions involving other currencies during the year are converted into U.S. Dollars using the exchange rates in effect at the time of the transactions. At the balance sheet date, monetary assets and liabilities that are denominated in currencies other than the U.S. Dollar are translated to reflect the year-end exchange rates. Resulting gains or losses are reflected separately in the accompanying consolidated statements of income and comprehensive income.

Operating revenues and expenses

The lease element of time-charters and bareboat charters accounted for as operating leases are recognized by the Partnership daily over the term of the charter as the applicable vessel operates under the charter. The lease element of the Partnership's time-charters that are accounted for as direct financing leases are reflected on the balance sheets as net investments in direct financing leases. The lease revenue is recognized over the lease term using the effective interest rate method and is included in voyage revenues. The Partnership recognizes revenues from the non-lease element of time-charter contracts daily as services are performed. The Partnership does not recognize revenues during days that the vessel is off-hire.

Voyage expenses are all expenses unique to a particular voyage, including bunker fuel expenses, port fees, cargo loading and unloading expenses, canal tolls, agency fees and commissions. Vessel operating expenses include crewing, ship management services, repairs and maintenance, insurance, stores, lube oils and communication expenses. Voyage expenses and vessel operating expenses are recognized when incurred.

Cash and cash equivalents

The Partnership classifies all highly-liquid investments with a maturity date of three months or less when purchased as cash and cash equivalents.

Accounts receivable and allowance for doubtful accounts

Accounts receivable are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts is the Partnership's best estimate of the amount of probable credit losses in existing accounts receivable. The Partnership determines the allowance based on historical write-off experience and customer economic data. The Partnership reviews the allowance for doubtful accounts regularly and past due balances are reviewed for collectability. Account balances are charged off against the allowance when the Partnership believes that the receivable will not be recovered.

Advances to Joint Venture Partner and Equity Accounted Joint Ventures

The Partnership's loan receivables are recorded at cost. The premium paid over the outstanding principal amount, if any, is amortized to interest income over the term of the loan using the effective interest rate method. The Partnership analyzes its loans for impairment during each reporting period. A loan is impaired when, based on current information and events, it is probable that the Partnership will be unable to collect all amounts due according to the contractual terms of the loan agreement. Factors the Partnership considers in determining that a loan is impaired include, among other things, an assessment of the financial condition of the debtor, payment history of the debtor, general economic conditions, the credit rating of the debtor, and any information provided by the debtor regarding their ability to repay the loan. When a loan is impaired, the Partnership measures the amount of the impairment based on the present value of expected future cash flows discounted at the loan's effective interest rate and recognizes the resulting impairment in earnings.

Table of Contents

TEEKAY LNG PARTNERS L.P. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(all tabular amounts stated in thousands of U.S. Dollars, except unit and per unit data or unless otherwise indicated)

Vessels and equipment

All pre-delivery costs incurred during the construction of newbuildings, including interest and supervision and technical costs, are capitalized. The acquisition cost and all costs incurred to restore used vessels purchased by the Partnership to the standards required to properly service the Partnership's customers are capitalized.

Depreciation is calculated on a straight-line basis over a vessel's estimated useful life, less an estimated residual value. Depreciation is calculated using an estimated useful life of 25 years for conventional tankers, 30 years for liquefied petroleum gas (or *LPG*) carriers and 35 years for liquefied natural gas (or *LNG*) carriers, from the date the vessel is delivered from the shipyard, or a shorter period if regulations prevent the Partnership from operating the vessels for 25 years, 30 years, or 35 years, respectively. Depreciation of vessels and equipment for the years ended December 31, 2013, 2012 and 2011 aggregated \$71.4 million, \$76.4 million and \$73.2 million, respectively. Depreciation and amortization includes depreciation on all owned vessels and amortization of vessels accounted for as capital leases.

Vessel capital modifications include the addition of new equipment or can encompass various modifications to the vessel which are aimed at improving or increasing the operational efficiency and functionality of the asset. This type of expenditure is amortized over the estimated useful life of the modification. Expenditures covering recurring routine repairs and maintenance are expensed as incurred.

Interest costs capitalized to vessels and equipment for the years ended December 31, 2013, 2012 and 2011 aggregated \$1.3 million, \$24 thousand and \$3.1 million, respectively.

Gains on vessels sold and leased back under capital leases are deferred and amortized over the remaining estimated useful life of the vessel. Losses on vessels sold and leased back under capital leases are recognized immediately to the extent that the fair value of the vessel at the time of sale-leaseback is less than its book value.

Generally, the Partnership dry docks each of its vessels every five years. In addition, a shipping society classification intermediate survey is performed on the Partnership's LNG and LPG carriers between the second and third year of the five-year dry-docking period. The Partnership capitalizes certain costs incurred during dry docking and for the survey and amortizes those costs on a straight-line basis from the completion of a dry docking or intermediate survey over the estimated useful life of the dry dock. The Partnership includes in capitalized dry docking those costs incurred as part of the dry docking to meet regulatory requirements, or expenditures that either add economic life to the vessel, increase the vessel's earning capacity or improve the vessel's operating efficiency. The Partnership expenses costs related to routine repairs and maintenance performed during dry docking that do not improve operating efficiency or extend the useful lives of the assets.

Dry-docking activity for the three years ended December 31, 2013, 2012 and 2011 is summarized as follows:

	Year Ended December 31,		
	2013	2012	2011
	\$	\$	\$
Balance at January 1,	28,821	34,449	24,393
Cost incurred for dry docking	27,203	7,493	19,638
Sale of vessel (<i>note 4</i>)	(2,285)		
Dry-dock amortization	(13,411)	(13,121)	(9,582)
Balance at December 31,	40,328	28,821	34,449

Vessels and equipment that are held and used are assessed for impairment when events or circumstances indicate the carrying amount of the asset may not be recoverable. If the asset's net carrying value exceeds the net undiscounted cash flows expected to be generated over its remaining useful life, the carrying amount of the asset is reduced to its estimated fair value. The estimated fair value for the Partnership's impaired vessels is determined using discounted cash flows or appraised values. In cases where an active second hand sale and purchase market does not exist, the Partnership uses a discounted cash flow approach to estimate the fair value of an impaired vessel. In cases where an active second hand sale and purchase market exists, an appraised value is generally the amount the Partnership would expect to receive if it were to sell the vessel. Such appraisal is normally completed by the Partnership.

Investments in joint ventures

The Partnership's investments in joint ventures are accounted for using the equity method of accounting. Under the equity method of accounting, investments are stated at initial cost and are adjusted for subsequent additional investments and the Partnership's proportionate share of earnings or losses and distributions. The Partnership evaluates its investment in joint ventures for impairment when events or circumstances indicate that the carrying value of such investments may have experienced an other-than-temporary decline in value below its carrying value. If the estimated fair value is less than the carrying value, the carrying value is written down to its estimated fair value and the resulting impairment is recorded in the Partnership's consolidated statements of income and comprehensive income.

Debt issuance costs

Debt issuance costs, including fees, commissions and legal expenses, are presented as other assets and are deferred and amortized on an effective interest rate method over the term of the relevant loan. Amortization of debt issuance costs is included in interest expense.

Table of Contents

TEEKAY LNG PARTNERS L.P. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(all tabular amounts stated in thousands of U.S. Dollars, except unit and per unit data or unless otherwise indicated)

Goodwill and intangible assets

Goodwill is not amortized, but reviewed for impairment at the reporting unit level on an annual basis or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. When goodwill is reviewed for impairment, the Partnership may elect to assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, including goodwill. Alternatively, the Partnership may bypass this step and use a fair value approach to identify potential goodwill impairment and, when necessary, measure the amount of impairment. The Partnership uses a discounted cash flow model to determine the fair value of reporting units, unless there is a readily determinable fair market value. Intangible assets are assessed for impairment when and if impairment indicators exist. An impairment loss is recognized if the carrying amount of an intangible asset is not recoverable and its carrying amount exceeds its fair value.

The Partnership's finite life intangible assets consist of acquired time-charter contracts and are amortized on a straight-line basis over the remaining term of the time-charters. Finite life intangible assets are assessed for impairment when events or circumstances indicate that the carrying value may not be recoverable.

Derivative instruments

All derivative instruments are initially recorded at fair value as either assets or liabilities in the accompanying consolidated balance sheet and subsequently remeasured to fair value, regardless of the purpose or intent for holding the derivative. The method of recognizing the resulting gain or loss is dependent on whether the derivative contract is designed to hedge a specific risk and whether the contract qualifies for hedge accounting. The Partnership does not apply hedge accounting to its derivative instruments, except for certain types of interest rate swaps that it may enter into in the future and for one interest rate swap in its equity accounted joint venture between the Partnership and Marubeni Corporation (or the *Teekay LNG-Marubeni Joint Venture*) (see Note 5).

When a derivative is designated as a cash flow hedge, the Partnership formally documents the relationship between the derivative and the hedged item. This documentation includes the strategy and risk management objective for undertaking the hedge and the method that will be used to assess the effectiveness of the hedge. Any hedge ineffectiveness is recognized immediately in earnings, as are any gains and losses on the derivative that are excluded from the assessment of hedge effectiveness. The Partnership does not apply hedge accounting if it is determined that the hedge was not effective or will no longer be effective, the derivative was sold or exercised, or the hedged item was sold, repaid or no longer possible of occurring.

For derivative financial instruments designated and qualifying as cash flow hedges, changes in the fair value of the effective portion of the derivative financial instruments are initially recorded as a component of accumulated other comprehensive income in total equity. In the periods when the hedged items affect earnings, the associated fair value changes on the hedging derivatives are transferred from total equity to the corresponding earnings line item in the

consolidated statements of income and comprehensive income. The ineffective portion of the change in fair value of the derivative financial instruments is immediately recognized in earnings in the consolidated statements of income and comprehensive income. If a cash flow hedge is terminated and the originally hedged item is still considered possible of occurring, the gains and losses initially recognized in total equity remain there until the hedged item impacts earnings, at which point they are transferred to the corresponding earnings line item (e.g. interest expense) in the consolidated statements of income and comprehensive income. If the hedged items are no longer possible of occurring, amounts recognized in total equity are immediately transferred to the earnings item in the consolidated statements of income and comprehensive income.

For derivative financial instruments that are not designated or that do not qualify as hedges under Financial Accounting Standards Board (or *FASB*) Accounting Standards Codification (or *ASC*) 815, *Derivatives and Hedging*, the changes in the fair value of the derivative financial instruments are recognized in earnings. Gains and losses from the Partnership's non-designated interest rate swaps, cross currency swaps and the Partnership's agreement with Teekay Corporation for the Suezmax tanker the *Toledo Spirit* (see Note 11c) are recorded in realized and unrealized loss on derivative instruments in the Partnership's consolidated statements of income and comprehensive income.

Income taxes

The Partnership accounts for income taxes using the liability method. All but two of the Partnership's Spanish-flagged vessels are subject to the Spanish Tonnage Tax Regime (or *TTR*). Under this regime, the applicable tax is based on the weight (measured as net tonnage) of the vessel and the number of days during the taxable period that the vessel is at the Partnership's disposal, excluding time required for repairs. The income the Partnership receives with respect to the remaining two Spanish-flagged vessels is taxed in Spain at a rate of 30%. However, these two vessels are registered in the Canary Islands Special Ship Registry. Consequently, the Partnership is allowed a credit, equal to 90% of the tax payable on income from the commercial operation of these vessels, against the tax otherwise payable. This effectively results in an income tax rate of approximately 3% on income from the operation of these two Spanish-flagged vessels.

The Partnership recognizes the benefits of uncertain tax positions when it is more-likely-than-not that a tax position taken or expected to be taken in a tax return will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. If a tax position meets the more-likely-than-not recognition threshold, it is measured to determine the amount of benefit to recognize in the financial statements. The Partnership recognizes interest and penalties related to uncertain tax positions in income tax expense in the Partnership's consolidated statements of income and comprehensive income.

Table of Contents**TEEKAY LNG PARTNERS L.P. AND SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(all tabular amounts stated in thousands of U.S. Dollars, except unit and per unit data or unless otherwise indicated)

Guarantees

Guarantees issued by the Partnership, excluding those that are guaranteeing its own performance, are recognized at fair value at the time the guarantees are issued and are presented in the Partnership's consolidated balance sheets as other long-term liabilities. The liability recognized on issuance is amortized to other income (expense) on the Partnership's consolidated statements of income and comprehensive income as the Partnership's risk from the guarantees declines over the term of the guarantee. If it becomes probable that the Partnership will have to perform under a guarantee, the Partnership will recognize an additional liability if the amount of the loss can be reasonably estimated.

Accumulated other comprehensive income

The following table contains the changes in the balance of the Partnership's only component of accumulated other comprehensive income for the periods presented:

	Qualifying Cash Flow Hedging Instruments \$
Balance as at December 31, 2011 and 2012	
Other comprehensive income	131
Balance as at December 31, 2013	131

2. Financial Instruments

a) Fair Value Measurements

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

Cash and cash equivalents and restricted cash The fair value of the Partnership's cash and cash equivalents and restricted cash approximates its carrying amounts reported in the consolidated balance sheets.

Interest and cross currency swap agreements The fair value of the Partnership's derivative instruments is the estimated amount that the Partnership would receive or pay to terminate the agreements at the reporting date, taking into account current interest rates, foreign exchange rates and the current credit worthiness of both the Partnership and the derivative counterparties. The estimated amount is the present value of future cash flows. The Partnership transacts all of its derivative instruments through investment-grade rated financial institutions at the time of the transaction and requires no collateral from these institutions. Given the current volatility in the credit markets, it is reasonably possible that the amount recorded as a derivative liability could vary by a material amount in the near term.

Other derivative The Partnership's other derivative agreement is between Teekay Corporation and the Partnership and relates to hire payments under the time-charter contract for the Suezmax tanker *Toledo Spirit* (see Note 11c). The fair value of this derivative agreement is the estimated amount that the Partnership would receive or pay to terminate the agreement at the reporting date, based on the present value of the Partnership's projection of future spot market tanker rates, which have been derived from current spot market tanker rates and long-term historical average rates. As projections of future spot rates are specific to the Partnership, these are considered Level 3 inputs for the purposes of estimating the fair value.

Long-term debt The fair values of the Partnership's fixed-rate and variable-rate long-term debt is either based on quoted market prices or estimated using discounted cash flow analyses based on rates currently available for debt with similar terms and remaining maturities and the current credit worthiness of the Partnership.

The Partnership categorizes the fair value estimates by a fair value hierarchy based on the inputs used to measure fair value. The fair value hierarchy has three levels based on the reliability of the inputs used to determine fair value as follows:

Level 1. Observable inputs such as quoted prices in active markets;

Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Table of Contents

TEEKAY LNG PARTNERS L.P. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(all tabular amounts stated in thousands of U.S. Dollars, except unit and per unit data or unless otherwise indicated)

The following table includes the estimated fair value and carrying value of those assets and liabilities that are measured at fair value on a recurring and non-recurring basis, as well as the estimated fair value of the Partnership's financial instruments that are not accounted for at a fair value on a recurring basis.

		December 31, 2013		December 31, 2012	
		Carrying	Fair	Carrying	Fair
		Amount	Value	Amount	Value
	Fair Value	Asset	Asset	Asset	Asset
	Hierarchy	(Liability)	(Liability)	(Liability)	(Liability)
	Level	\$	\$	\$	\$
Recurring:					
Cash and cash equivalents and restricted cash	Level 1	636,779	636,779	642,166	642,166
Derivative instruments (note 12)					
Interest rate swap agreements assets	Level 2	81,119	81,119	165,687	165,687
Interest rate swap agreements liabilities	Level 2	(200,762)	(200,762)	(304,220)	(304,220)
Cross currency swap agreement	Level 2	(18,236)	(18,236)	(2,623)	(2,623)
Other derivative	Level 3	6,344	6,344	1,100	1,100
Other:					
Advances to equity accounted joint ventures (note 6b)	(i)	85,135	(i)		
Advances to joint venture partner (note 6a)	(ii)	14,364	(ii)	14,004	(ii)
Long-term debt public (note 9)	Level 1	(263,534)	(274,240)	(125,791)	(129,439)
Long-term debt non-public (note 9)	Level 2	(1,513,973)	(1,409,252)	(1,287,562)	(1,170,788)

- (i) The advances to equity accounted joint ventures together with the Partnership's equity investments in the joint ventures form the net aggregate carrying value of the Partnership's interests in the joint ventures in these consolidated financial statements. The fair values of the individual components of such aggregate interests are not determinable.
- (ii) The Partnership owns a 99% interest in Teekay Tangguh Borrower LLC (or *Teekay Tangguh*), which owns a 70% interest in Teekay BLT Corporation (or the *Teekay Tangguh Joint Venture*), essentially giving the Partnership a 69% interest in the Teekay Tangguh Joint Venture. The advances from the Teekay Tangguh Joint Venture to the joint venture partner together with the joint venture partner's equity investment in the Teekay Tangguh Joint Venture form the net aggregate carrying value of the joint venture partner's interest in the Teekay Tangguh Joint Venture in these consolidated financial statements. The fair value of the individual components of such aggregate interest is not determinable; however, these advances have been repaid subsequent to

December 31, 2013.

Changes in fair value during the years ended December 31, 2013 and 2012 for the Partnership's other derivative asset (liability), the Toledo Spirit time-charter derivative, which is described below and is measured at fair value on a recurring basis using significant unobservable inputs (Level 3), are as follows:

	Year Ended December 31,	
	2013	2012
	\$	\$
Fair value at beginning of period	1,100	(600)
Realized and unrealized gains included in earnings	5,221	2,607
Settlements	23	(907)
Fair value at end of period	6,344	1,100

The Partnership's Suezmax tanker the *Toledo Spirit* operates pursuant to a time-charter contract that increases or decreases the otherwise fixed-hire rate established in the charter depending on the spot charter rates that the Partnership would have earned had it traded the vessel in the spot tanker market. In order to reduce the variability of its revenue under the *Toledo Spirit* time-charter, the Partnership entered into an agreement with Teekay Corporation under which Teekay Corporation pays the Partnership any amounts payable to the charterer of the *Toledo Spirit* as a result of spot rates being below the fixed rate, and the Partnership pays Teekay Corporation any amounts payable to the Partnership by the charterer of the *Toledo Spirit* as a result of spot rates being in excess of the fixed rate. The estimated fair value of this other derivative is based in part upon the Partnership's projection of future spot market tanker rates, which has been derived from current spot market tanker rates and long-term historical average rates as well as an estimated discount rate. The estimated fair value of this other derivative as of December 31, 2013 is based upon an average daily tanker rate of \$21,256 (December 31, 2012 - \$25,409) over the remaining duration of the charter contract and a discount rate of 8.4% (December 31, 2012 - 8.8%). In developing and evaluating this estimate, the Partnership considers the current tanker market fundamentals as well as the short and long-term outlook. A higher or lower average daily tanker rate would result in a higher or lower fair value liability or a lower or higher fair value asset. A higher or lower discount rate would result in a lower or higher fair value asset or liability.

(all tabular amounts stated in thousands of U.S. Dollars, except unit and per unit data or unless otherwise indicated)

b) Financing Receivables

The following table contains a summary of the Partnership's loan receivables and other financing receivables by type of borrower and the method by which the Partnership monitors the credit quality of its financing receivables on a quarterly basis.

Class of Financing Receivable	Credit Quality Indicator	Grade	December 31, December 31,	
			2013	2012
			\$	\$
Direct financing leases	Payment activity	Performing	699,695	403,386
Other receivables:				
Long-term receivable included in other assets	Payment activity	Performing	8,095	1,704
Advances to equity accounted joint ventures (<i>note 6b</i>)	Other internal metrics	Performing	85,135	
Advances to joint venture partner (<i>note 6a</i>)	Other internal metrics	Performing	14,364	14,004
			807,289	419,094

3. Segment Reporting

The Partnership has two reportable segments, its liquefied gas segment and its conventional tanker segment. The Partnership's liquefied gas segment consists of LNG and LPG/Multigas carriers which generally operate under long-term, fixed-rate charters to international energy companies and Teekay Corporation (see Note 11a). As at December 31, 2013, the Partnership's liquefied gas segment consisted of 29 LNG carriers (including 16 LNG carriers included in joint ventures that are accounted for under the equity method), and 21 LPG/Multigas carriers (including 16 LPG carriers included in a joint venture that is accounted for under the equity method). The Partnership's conventional tanker segment consisted of nine Suezmax-class crude oil tankers (excluding the *Tenerife Spirit* that was sold in December 2013) and one Handymax product tanker which generally operate under long-term, fixed-rate time-charter contracts to international energy and shipping companies. Segment results are evaluated based on income from vessel operations. The accounting policies applied to the reportable segments are the same as those used in the preparation of the Partnership's consolidated financial statements.

The following table presents voyage revenues and percentage of consolidated voyage revenues for the Partnership's top five customers during any of the periods presented.

(U.S. Dollars in millions)	Year Ended December 31, 2010	Year Ended December 31, 2011	Year Ended December 31, 2011
Ras Laffan Liquefied Natural Gas Company Ltd.
