Letter from the Chairman of the Board & President

Dear Shareholder:

As previously announced, on September 26, 2014, prior to the close of the reporting period, William Bill Gross, PIMCO s former Chief Investment Officer (CIO) and co-founder, resigned from the firm. PIMCO s Managing Directors elected Daniel Ivascyn to serve as Group Chief Investment Officer (Group CIO). In addition, PIMCO appointed Andrew Balls, CIO Global; Mark Kiesel, CIO Global Credit; Virginie Maisonneuve, CIO Global Equities; Scott Mather, CIO U.S. Core Strategies; and Mihir Worah, CIO Real Return and Asset Allocation. Outside of the reporting period on November 3, 2014, PIMCO announced that Marc Seidner will return to the firm effective November 12 in a new role as CIO Non-traditional Strategies and Head of Portfolio Management in the New York office. Under this leadership structure, Andrew and Mihir have additional managerial responsibility for PIMCO s Portfolio Management group and trade floor activities globally. Andrew will oversee Portfolio Management and trade floor activities in Europe and Asia-Pacific, and Mihir will oversee Portfolio Management and trade floor activities in the U.S. Furthermore, effective as of September 26, 2014, Alfred Murata and Mohit Mittal replaced Mr. Gross as portfolio managers for PIMCO High Income Fund. There have not been any changes to the portfolio management of PIMCO Global StocksPLUS<sup>®</sup> & Income Fund or PIMCO Dynamic Income Fund.

Douglas Hodge, PIMCO s Chief Executive Officer, and Jay Jacobs, PIMCO s President, will continue to serve as the firm s senior executive leadership team, spearheading PIMCO s business strategy, client service and the firm s operations.

These appointments are a further evolution of the structure that PIMCO established earlier in 2014, reflecting our belief that the best approach for PIMCO s clients and our firm is an investment leadership team of seasoned, highly skilled investors overseeing all areas of PIMCO s investment activities.

During his 43 years at PIMCO, Mr. Gross made great contributions to building the firm and delivering value to PIMCO s clients. Over this period, PIMCO developed into a global asset manager, expanding beyond core fixed income, now encompassing nearly 2,500 employees across 13 offices, including over 250 portfolio managers. Mr. Gross was also responsible for starting PIMCO s robust investment process, with a focus on long-term macroeconomic views and bottom-up security selection a process that is well institutionalized and will continue into PIMCO s future.

For the six-month reporting period ended September 30, 2014

Global economic growth was mixed during the fiscal six-month reporting period ended September 30, 2014. Against this backdrop and a host of geopolitical issues, U.S. equities generated positive returns, whereas international developed equities produced less robust results. The U.S. bond market posted a modest gain during the reporting period.

2 PIMCO CLOSED-END FUNDS

The Standard & Poor s 500 (S&P 500) Index, a proxy for the U.S. stock market, advanced 6.42%; the MSCI Europe, Australasia and Far East Index (EAFE) declined 2.03% in U.S. dollar terms; and the BofA Merrill Lynch U.S. High Yield Master II Index increased 0.59% for the six months ended September 30, 2014. The broad bond market, as measured by the Barclays U.S. Aggregate Bond Index, rose 2.21% while the Barclays U.S. Treasury Bond Index returned 1.70% during the reporting period.

After several years of positive growth, severe winter weather in parts of the country appeared to be a headwind for the U.S. economy in early 2014. Looking back, gross domestic product ( GDP ), the value of goods and services produced in the country, the broadest measure of economic activity and the principal indicator of economic performance, expanded at a 3.5% annual pace during the fourth quarter of 2013. According to the U.S. Commerce Department, GDP then contracted at an annual pace of 2.1% during the first quarter of 2014. However, this was a temporary setback, as GDP expanded at a 4.6% annual pace during the second quarter of 2014. This represented the strongest growth rate since the fourth quarter of 2011. According to the Commerce Department s initial estimate, released on October 30, 2014, GDP expanded at an annual pace of 3.5% during the third quarter.

Economic growth in non-U.S. developed countries was mixed during the reporting period. Growth in the eurozone was tepid and falling inflation triggered concerns of deflation in the region. Against this backdrop, in June 2014 the European Central Bank (ECB) cut interest rates from 0.25% to a new low of 0.15% and announced it would charge commercial banks 0.10% to keep money at the ECB. In September 2014, the ECB reduced rates to another record low of 0.05% and announced that it would begin charging commercial banks 0.20% to keep money at the ECB. Japan s economy grew sharply during the first quarter of 2014, partially driven by increased spending ahead of the country s April 1, 2014 sales tax increase. Japan s economy then contracted during the second quarter of 2014.

Outlook

PIMCO s forecast for the next 12 months in the U.S. predicts a continuation of the economic recovery. With the ongoing assistance of easy monetary policy, combined with healthy private financial sector balance sheets, we believe the U.S. economy is poised to grow between 2.5% and 3.0% in the coming calendar year. We expect to see corporate capital expenditures accelerate on the back of rising pricing power and expected returns on newly invested capital. We expect very gradually rising wages and product prices, which will allow the Fed to maintain its accommodative monetary policy for another 12 months or so. One potential wildcard for the economy in both the U.S. and abroad is geopolitical issues in Ukraine, the Middle East and elsewhere.

While we believe the U.S. cyclical outlook is becoming more sure-footed and self-sustaining, our cyclical growth and inflation outlooks for the eurozone and Japan

Letter from the Chairman of the Board & President (Cont.)

remain captive to significant policy dissonance and geopolitical risk. In the eurozone, expansionary fiscal policy has largely been absent in the post-financial crisis. We expect the ECB to continue to ease monetary policy over the cyclical horizon via some form of quantitative easing during 2015. In Japan, policy dissonance is not quite as pronounced as in the eurozone, but demographic conditions and debt deflation are somewhat worse. We expect the Bank of Japan to continue its current rapid pace of balance sheet expansion for the balance of 2014, with some possibility of faster expansion in 2015, depending on the global economic environment.

On the following pages of this PIMCO Closed-End Funds Semi-Annual Report, please find specific details regarding investment performance and a discussion of factors that most affected performance over the six-month reporting period ended September 30, 2014.

Thank you for investing with us. We value your trust and will continue to work diligently to meet your investment needs. If you have questions regarding any of your PIMCO Closed-End Funds investments, please contact your financial advisor or call the Funds shareholder servicing agent at (844) 33-PIMCO (844-337-4626). We also invite you to visit our website at www.pimco.com/investments to learn more about our views and global thought leadership.

We remain dedicated to serving your investment needs.

Sincerely,

Hans W. Kertess

Chairman of the Board of Trustees

Peter G. Strelow

President, Principal Executive Officer

4 PIMCO CLOSED-END FUNDS

#### **Important Information About the Funds**

We believe that bond funds have an important role to play in a well-diversified investment portfolio. It is important to note, however, that in an environment where interest rates may trend upward, rising rates would negatively impact the performance of most bond funds, and fixed-income securities held by a Fund are likely to decrease in value. A number of factors can cause interest rates to rise (e.g., central bank monetary policies, inflation rates, general economic conditions, etc.). Accordingly, changes in interest rates can be sudden, and there is no guarantee that Fund Management will anticipate such movement.

As of the date of this report, interest rates in the U.S. are at or near historically low levels. As such, bond funds may currently face an increased exposure to the risks associated with rising interest rates. This is especially true since the Federal Reserve Board has begun tapering its quantitative easing program. Further, while the U.S. bond market has steadily grown over the past three decades, dealer inventories of corporate bonds have remained relatively stagnant. As a result, there has been a significant reduction in the ability of dealers to make markets in corporate bonds. All of the factors mentioned above, individually or collectively, could lead to increased volatility and/or lower liquidity in the fixed income markets, which could result in increased losses to a Fund. Bond funds and individual bonds with a longer duration (a measure of the sensitivity of a security s price to changes in interest rates) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities or funds with shorter durations. In addition, in the current low interest rate environment, the market price of the Funds common shares may be particularly sensitive to changes in interest rates or the perception that there will be a change in interest rates.

The use of derivatives may subject the Funds to greater volatility than investments in traditional securities. The Funds may use derivative instruments for hedging purposes or as part of an investment strategy. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, call risk, credit risk, management risk and the risk that a Fund could not close out a position when it would be most advantageous to do so. Certain derivative transactions may have a leveraging effect on a Fund. For example, a small investment in a derivative instrument may have a significant impact on a Fund s exposure to interest rates, currency exchange rates or other investments. As a result, a relatively small price movement in a derivative instrument may cause an immediate and substantial loss or gain, which translates into heightened volatility in the Fund. A Fund may engage in such transactions regardless of whether the Fund owns the asset, instrument or components of the index underlying the derivative instrument. A Fund may invest a significant portion of its assets in these types of instruments. If it does, a Fund s investment exposure could far exceed the value of its portfolio securities and its investment performance could be primarily dependent upon securities it does not own.

A Fund s use of leverage creates the opportunity for increased income for the Fund s common shareholders, but also creates special risks. Leverage is a speculative technique that may expose a Fund to greater risk and increased costs. If shorter-term interest rates rise relative to the rate of return on a Fund s portfolio, the interest and other costs to the Fund of leverage could exceed the rate of return on the debt obligations and other investments held by the Fund, thereby reducing return to the Fund s common shareholders. In addition, fees and expenses of any form of leverage used by a Fund will be borne entirely by its common shareholders (and not by preferred shareholders, if any) and will reduce the investment return of the Fund s common shares. There can be no assurance that a Fund s use of leverage will result in a higher yield on its common shares, and it may result in losses. Leverage creates several major types of risks for a Fund s common shareholders,

#### Important Information About the Funds (Cont.)

including: (1) the likelihood of greater volatility of net asset value and market price of the Fund s common shares, and of the investment return to the Fund s common shareholders, than a comparable portfolio without leverage; (2) the possibility either that the Fund s common share dividends will fall if the interest and other costs of leverage rise, or that dividends paid on the Fund s common shares will fluctuate because such costs vary over time; and (3) the effects of leverage in a declining market or a rising interest rate environment, as leverage is likely to cause a greater decline in the net asset value of the Fund s common shares than if the Fund were not leveraged and may result in a greater decline in the market value of the Fund s common shares.

A Fund s investments in and exposure to foreign securities involve special risks. For example, the value of these investments may decline in response to unfavorable political and legal developments, unreliable or untimely information or economic and financial instability. Foreign securities may experience more rapid and extreme changes in value than investments in securities of U.S. issuers. The securities markets of many foreign countries are relatively small, with a limited number of companies representing a small number of industries. Issuers of foreign securities are usually not subject to the same degree of regulation as U.S. issuers. Reporting, accounting, auditing and custody standards of foreign countries differ, in some cases significantly, from U.S. standards. Also, nationalization, expropriation or other confiscation, the Fund could lose its entire investment in foreign securities. In the event of nationalization, expropriation or other confiscation, the Fund could lose its entire investment in foreign securities. These risks may be increased when investing in emerging markets. For example, if a Fund invests in emerging market debt, it may face increased exposure to interest rate, liquidity, volatility, and redemption risk due to the specific economic, political, geographical, or legal background of the foreign issuer.

Investments in loans are generally subject to risks similar to those of investments in other types of debt obligations, including, among others, credit risk, interest rate risk, variable and floating rate securities risk, and, as applicable, risks associated with mortgage-related securities. In addition, in many cases loans are subject to the risks associated with below-investment grade securities. In the case of a loan participation or assignment, a Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Fund may be subject to the credit risk of both the borrower and the lender that is selling the loan agreement. In the event of the insolvency of the lender selling a loan participation, a Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. The Funds may be subject to heightened or additional risks and potential liabilities and costs by investing in mezzanine and other subordinated loans or acting as an originator of loans, including those arising under bankruptcy, fraudulent conveyance, equitable subordination, lender liability, environmental and other laws and regulations, and risks and costs associated with debt servicing and taking foreclosure actions associated with the loan. This may include significant legal and due diligence expenses, which will be indirectly borne by the Fund and its shareholders. A Fund may pay fees and expenses associated with originating a loan, including significant legal and due diligence expenses, irrespective of whether the loan transaction is ultimately consummated or closed.

#### 6 PIMCO CLOSED-END FUNDS

Mortgage-related and other asset-backed securities often involve risks that are different from or more acute than risks associated with other types of debt instruments. Generally, rising interest rates tend to extend the duration of fixed rate mortgage-related securities, making them more sensitive to changes in interest rates. As a result, in a period of rising interest rates, if a Fund holds mortgage-related securities, it may exhibit additional volatility since individual mortgage holders are less likely to exercise prepayment options, thereby putting additional downward pressure on the value of these securities and potentially causing the fund to lose money. This is known as extension risk. Mortgage-backed securities can be highly sensitive to rising interest rates, such that even small movements can cause an investing Fund to lose value. Mortgage-backed securities, and in particular those not backed by a government guarantee, are subject to credit risk. In addition, adjustable and fixed rate mortgage-related securities are subject to prepayment risk. When interest rates decline, borrowers may pay off their mortgages sooner than expected. This can reduce the returns of the Funds because the Funds may have to reinvest that money at the lower prevailing interest rates. The Funds investments in other asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets. Payment of principal and interest on asset-backed securities may not have the benefit of any security interest in the related assets.

High-yield bonds (commonly referred to as junk bonds) typically have a lower credit rating than other bonds. Lower-rated bonds generally involve a greater risk to principal than higher-rated bonds. Further, markets for lower-rated bonds are typically less liquid than for higher-rated bonds, and public information is usually less abundant in such markets. Thus, high yield investments increase the chance that a Fund will lose money. The credit quality of a particular security or group of securities does not ensure the stability or safety of the overall portfolio. The Funds may hold defaulted securities that may involve special considerations including bankruptcy proceedings, other regulatory and legal restrictions affecting the Funds ability to trade, and the availability of prices from independent pricing services or dealer quotations. Defaulted securities are often illiquid and may not be actively traded. Sale of securities in bankrupt companies at an acceptable price may be difficult and differences compared to the value of the securities used by the Funds could be material.

Certain Funds may invest in securities and instruments that are economically tied to Russia. Investments in Russia are subject to political, economic, legal, market and currency risks, as well as the risk that economic sanctions may be imposed by the United States and/or other countries. Such sanctions which may impact companies in many sectors, including energy, financial services and defense, among others may negatively impact a Fund s performance and/or ability to achieve its investment objective. For example, certain transactions may be prohibited and/or existing investments may become illiquid (e.g., in the event that transacting in certain existing investments is prohibited).

The common shares of the Funds trade on the New York Stock Exchange. As with any stock, the price of a Fund s common shares will fluctuate with market conditions and other factors. If you sell your common shares of a Fund, the price received may be more or less than your original investment. Shares of closed-end management investment companies frequently trade at a discount from their net asset value. The common shares of a Fund may trade at a price that is less than the initial offering price and/or the net asset value of such shares.

Important Information About the Funds (Cont.)

The Funds may be subject to various risks in addition to those described above. Some of these risks may include, but are not limited to, the following: asset allocation risk, credit risk, stressed securities risk, distressed and defaulted securities risk, corporate bond risk, market risk, issuer risk, liquidity risk, equity securities and related market risk, mortgage-related and other asset-backed securities risk, extension risk, prepayment risk, privately issued mortgage-related securities risk, mortgage market/subprime risk, foreign (non-U.S.) investment risk, emerging markets risk, currency risk, redenomination risk, non-diversification risk, management risk, municipal bond risk, inflation-indexed security risk, senior debt risk, loans, participations and assignments risk, reinvestment risk, real estate risk, U.S. Government securities risk, foreign (non-U.S.) government securities risk, valuation risk, segregation and cover risk, focused investment risk, credit default swaps risk, event-linked securities risk, inflation/deflation risk, regulatory risk, tax risk, recent economic conditions risk, market disruptions and geopolitical risk, potential conflicts of interest-allocation of investment opportunities, repurchase agreements risk, securities risk, zero-coupon bond and payment-in-kind securities risk, portfolio turnover risk, smaller company risk, short sale risk and convertible securities risk. A description of certain of these risks is available in the Notes to Financial Statements of this Report.

The geographical classification of foreign securities in this report are classified by the country of incorporation of a holding. In certain instances, a security s country of incorporation may be different from its country of economic exposure.

On each individual Fund Summary page in this Shareholder Report the Common Share Average Annual Total Return table and Common Share Cumulative Returns (if applicable) measure performance assuming that all dividend and capital gain distributions were reinvested. Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions. Total return for a period of more than one year represents the average annual total return. Performance at market price will differ from results at NAV. Although market price returns tend to reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about the Fund, market conditions, supply and demand for the Fund s shares, or changes in the Fund s dividends. Performance shown is net of fees and expenses.

The following table discloses the commencement of operations of each Fund:

	Commencement
Fund Name	of Operations
PIMCO Global StocksPlus <sup>®</sup> & Income Fund	05/31/05
PIMCO High Income Fund	04/30/03
PIMCO Dynamic Income Fund	05/30/12

An investment in a Fund is not a deposit of a bank and is not guaranteed or insured by the Federal Deposit Insurance Corporation or any other government agency. It is possible to lose money on investments in the Funds.

#### 8 PIMCO CLOSED-END FUNDS

PIMCO has adopted written proxy voting policies and procedures (Proxy Policy) as required by Rule 206(4)-6 under the Investment Advisers Act of 1940. The Proxy Policy has been adopted by the Funds as the policies and procedures that PIMCO will use when voting proxies on behalf of the Funds. A description of the policies and procedures that PIMCO uses to vote proxies relating to portfolio securities of each Fund, and information about how each Fund voted proxies relating to portfolio securities held during the most recent twelve-month period ended June 30, are available without charge, upon request, by calling the Funds at (844) 33-PIMCO (844-337-4626), on the Funds website at www.pimcofunds.com/closedendfunds, and on the Securities and Exchange Commission s (SEC) website at http://www.sec.gov.

Each Fund files a complete schedule of its portfolio holdings with the SEC for the first and third quarters of its fiscal year on Form N-Q. A copy of each Fund s Form N-Q is available on the SEC s website at http://www.sec.gov and may be reviewed and copied at the SEC s Public Reference Room in Washington, D.C., and is available without charge, upon request by calling the Funds at (844) 33-PIMCO (844-337-4626) and on the Funds website at www.pimco.com/closedendfunds. Updated portfolio holdings information about a Fund will be available at www.pimco.com/closedendfunds approximately 15 calendar days after such Fund s most recent fiscal quarter end, and will remain accessible until such Fund files a Form N-Q or a shareholder report for the period which includes the date of the information. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

\* Cumulative return.

- (1) Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and the principal value of an investment will fluctuate. Total return, market price, NAV, market price distribution yield, and NAV distribution yield will fluctuate with changes in market conditions. For performance current to the most recent month-end, visit www.pimco.com or call (844) 33-PIMCO.
- (2) Distribution yields are not performance and are calculated by annualizing the most recent distribution per share and dividing by the NAV or Market Price, as applicable, as of the reported date. Distributions may be comprised of ordinary income, net capital gains, and/or a return of capital (ROC) of your investment in the Fund. Because the distribution rate may include a ROC, it should not be confused with yield or income. If the Fund estimates that a portion of its distribution may be comprised of amounts from sources other than net investment income, the Fund will notify shareholders of the estimated composition of such distribution through a Section 19 Notice. Please refer to the most recent Section 19 Notice, if applicable, for additional information regarding the composition of distributions. Please visit www.pimco.com for most recent Section 19 Notice, if applicable. Final determination of a distribution s tax character will be made on Form 1099 DIV sent to shareholders each January.
- (3) Represents regulatory leverage outstanding, as a percentage of total managed assets. Regulatory leverage may include preferred shares, reverse repurchase agreements, and other borrowings (collectively Leverage ). Total managed assets refer to total assets (including assets attributable to Leverage that may be outstanding) minus accrued liabilities (other than liabilities representing Leverage).

#### 10 PIMCO CLOSED-END FUNDS

Portfolio Insights

- » The global developed equity markets produced mixed results during the six months ended September 30, 2014. Over this period, the U.S. stock market returned 6.42%, as measured by the S&P 500 Index. Solid demand and corporate profits that often exceeded expectations supported U.S. equities. International developed equities, as measured by the MSCI EAFE Index, declined 2.03% for the six months ended September 30, 2014. They were negatively impacted by slowing growth in many countries, other than the U.S., and increasing risk aversion, or flight to quality.
- » The overall fixed income market generated a modest gain during the reporting period. The fixed income market was volatile at times as investor sentiment was impacted by incoming economic data, changing expectations regarding future monetary policy and a number of geopolitical issues. All told, longer-term U.S. Treasury yields declined during the six-month period, with the yield on the benchmark 10-year Treasury bond falling from 2.72% to 2.49%. Against this backdrop, the overall taxable fixed income market, as measured by the Barclays U.S. Aggregate Bond Index, gained 2.21% during the six months ended September 30, 2014.
- » Holdings of agency and non-agency mortgage-backed securities contributed to performance as these securities benefited from continued improvement in the U.S. housing market. The Fund s currency strategies, led by relative short euro and yen positions, contributed to returns as those currencies depreciated versus the U.S. dollar. The Fund benefited from earning a higher yield than the money market financing rate priced into the equity index derivatives that were used to capture the returns of the S&P 500 Index and MSCI EAFE Index.
- » Returns from holdings of high yield securities were positive but modest, as coupon income was partially offset by lower prices. An allocation to select emerging market corporate bonds also contributed modestly to returns.
- » A curve-steepening strategy detracted from performance, as the U.S. Treasury yield curve flattened, with longer-term rates declining, whereas short-term rates increased. A defensive option strategy, involving the sale of call options and purchase of puts on S&P 500 futures contracts, hurt performance as U.S. equities rallied during the six-month reporting period.

- (2) Distribution yields are not performance and are calculated by annualizing the most recent distribution per share and dividing by the NAV or Market Price, as applicable, as of the reported date. Distributions may be comprised of ordinary income, net capital gains, and/or a return of capital (ROC) of your investment in the Fund. Because the distribution rate may include a ROC, it should not be confused with yield or income. If the Fund estimates that a portion of its distribution may be comprised of amounts from sources other than net investment income, the Fund will notify shareholders of the estimated composition of such distribution through a Section 19 Notice. Please refer to the most recent Section 19 Notice, if applicable, for additional information regarding the composition of distributions. Please visit www.pimco.com for most recent Section 19 Notice, if applicable. Final determination of a distribution s tax character will be made on Form 1099 DIV sent to shareholders each January.
- (3) Represents regulatory leverage outstanding, as a percentage of total managed assets. Regulatory leverage may include preferred shares, reverse repurchase agreements, and other borrowings (collectively Leverage ). Total managed assets refer to total assets (including assets attributable to Leverage that may be outstanding) minus accrued liabilities (other than liabilities representing Leverage).

Portfolio Insights

- » The overall fixed income market generated a modest gain during the reporting period. The fixed income market was volatile at times as investor sentiment was impacted by incoming economic data, changing expectations regarding future monetary policy and a number of geopolitical issues. All told, longer-term U.S. Treasury yields declined during the six-month period, with the yield on the benchmark 10-year Treasury bond falling from 2.72% to 2.49%. Against this backdrop, the overall taxable fixed income market, as measured by the Barclays U.S. Aggregate Bond Index, gained 2.21% during the six months ended September 30, 2014.
- » After a strong start, high yield bonds gave back a large portion of their gains as the reporting period progressed. All told, the U.S. high yield corporate bond market returned 0.49% during the six-month period, as measured by the Barclays U.S. Corporate High Yield Index. The high yield market initially benefited from solid investor demand and low defaults. While fundamentals did not meaningfully change, investor risk aversion and, admittedly, tighter valuations, triggered selloffs in July and September 2014.
- » The Fund s allocation to non-agency mortgage-backed securities was a significant contributor to strong absolute return of the Fund. They were supported by positive supply/demand technicals and continuously improving home prices. The Fund s exposure to select bank capital securities was rewarded given their attractive income. The Fund s emerging market debt exposure was beneficial for performance as their yields declined. Elsewhere, the Fund s exposure to taxable municipal bonds was also additive to performance, as the broader municipal market has done very well over the past six months on general improvement in outlook and decline in Treasury yields.
- » Despite the Fund s short exposure to the long end part of the curve, which has hurt the performance, overall increased duration exposure with interest rate swaps contributed positively to performance as Treasury rates declined.

\* Cumulative return.

- (1) Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and the principal value of an investment will fluctuate. Total return, market price, NAV, market price distribution yield, and NAV distribution yield will fluctuate with changes in market conditions. For performance current to the most recent month-end, visit www.pimco.com or call (844) 33-PIMCO.
- (2) Distribution yields are not performance and are calculated by annualizing the most recent distribution per share and dividing by the NAV or Market Price, as applicable, as of the reported date. Distributions may be comprised of ordinary income, net capital gains, and/or a return of capital (ROC) of your investment in the Fund. Because the distribution rate may include a ROC, it should not be confused with yield or income. If the Fund estimates that a portion of its distribution may be comprised of amounts from sources other than net investment income, the Fund will notify shareholders of the estimated composition of such distribution through a Section 19 Notice. Please refer to the most recent Section 19 Notice, if applicable, for additional information regarding the composition of distributions. Please visit www.pimco.com for most recent Section 19 Notice, if applicable. Final determination of a distribution s tax character will be made on Form 1099 DIV sent to shareholders each January.
- (3) Represents regulatory leverage outstanding, as a percentage of total managed assets. Regulatory leverage may include preferred shares, reverse repurchase agreements, and other borrowings (collectively Leverage ). Total managed assets refer to total assets (including assets attributable to Leverage that may be outstanding) minus accrued liabilities (other than liabilities representing Leverage).

#### 14 PIMCO CLOSED-END FUNDS

Portfolio Insights

- » The overall fixed income market generated a modest gain during the reporting period. The fixed income market was volatile at times as investor sentiment was impacted by incoming economic data, changing expectations regarding future monetary policy and a number of geopolitical issues. All told, longer-term U.S. Treasury yields declined during the six-month period, with the yield on the benchmark 10-year Treasury bond falling from 2.72% to 2.49%. Against this backdrop, the overall taxable fixed income market, as measured by the Barclays U.S. Aggregate Bond Index, gained 2.21% during the six months ended September 30, 2014.
- » After a strong start, high yield bonds and emerging market debt gave back a portion of their gains as the reporting period progressed. All told, the global high yield corporate bond market, as measured by the Barclays U.S. Corporate High Yield Index, returned 0.49%, compared to the global credit market advance of 2.90%, as measured by the Barclays Global Credit Hedged USD Index. In contrast, emerging market debt gained 3.69% during the reporting period, as measured by the JPMorgan EMBI Global Index.
- » The Fund s allocation to non-agency mortgage-backed securities was a significant contributor to results. They were supported by positive supply/demand technicals and continuously improving home prices. The Fund s emerging market debt exposure was beneficial to performance as yields declined. Elsewhere, the Fund s security selection in corporate bonds was additive for results as several pipeline operators outperformed. This, coupled with such bonds attractive yields, helped the Fund to generate income.
- » The Fund s yield curve positioning detracted from performance. Negative exposure to the long end of the yield curve was negative, as longer-term rates declined during the reporting period.
- » The Fund s exposure to financial credits did not meaningfully impact performance during the reporting period. The incremental yield offered by these securities was offset by spread widening.

\* Annualized

^ Reflects an amount rounding to less than one cent.

(a) Per share amounts based on average number of common shares outstanding during the year or period.

(b) Total investment return is calculated assuming a purchase of a common share at the market price on the first day and a sale of a common share at the market price on the last day of each year reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund s dividend reinvestment plan. Total investment return does not reflect brokerage commissions in connection with the purchase or sale of Fund shares.

(c) Calculated on the basis of income and expenses applicable to both common and preferred shares relative to the average net assets of common shareholders.

(d) Interest expense primarily relates to participation in reverse repurchase agreement transactions.

Schedule of Investments PIMCO Global StocksPLUS® & Income Fund (Cont.)

#### NOTES TO SCHEDULE OF INVESTMENTS (AMOUNTS IN THOUSANDS\*, EXCEPT NUMBER OF CONTRACTS, SHARES, AND UNITS):

\* A zero balance may reflect actual amounts rounding to less than one thousand.

^ Security is in default.

(a) Interest only security.

(b) Principal only security.

(c) When-issued security.

(d) Payment in-kind bond security.

(e) Coupon represents a weighted average yield to maturity.

(f) Perpetual maturity; date shown, if applicable, represents next contractual call date.

## (g) RESTRICTED SECURITIES:

(1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

(2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

(3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

(4) The prices and resulting values for credit default swap agreements on asset-backed securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement be closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced indices credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

(6) Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from OTC financial derivative instruments can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Principal Risks, in the Notes to Financial Statements for more information regarding master netting arrangements.
