THE J. M. SMUCKER COMPANY

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, unless otherwise noted, except per share data)

Note 1: Basis of Presentation

The unaudited condensed consolidated financial statements of The J. M. Smucker Company (Company, we, us, or our) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments of a normal recurring nature considered necessary for a fair presentation have been included.

Operating results for the nine-month period ended January 31, 2015, are not necessarily indicative of the results that may be expected for the year ending April 30, 2015. For further information, reference is made to the consolidated financial statements and notes included in our Annual Report on Form 10-K for the year ended April 30, 2014.

Note 2: Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) 2014-09, *Revenue from Contracts with Customers (Topic 606)*. ASU 2014-09 will be effective for us on May 1, 2017, and will require either retrospective application to each prior reporting period presented or retrospective application with the cumulative effect of initially applying the standard recognized at the date of adoption. We are currently evaluating the impact the application of ASU 2014-09 will have on our financial statements and disclosures.

Note 3: Subsequent Event

On February 3, 2015, we entered into a definitive agreement to acquire Big Heart Pet Brands (Big Heart Pet) in a cash and stock transaction preliminarily valued at approximately \$5.8 billion. Big Heart Pet is the largest stand-alone producer, distributor, and marketer of premium-quality, branded pet food and pet snacks in the United States. Under the terms of the agreement, we will issue approximately 17.9 million shares of our common stock to the shareholders of Blue Acquisition Group, Inc., Big Heart Pet s holding company, and pay \$1.3 billion in cash, subject to a working capital adjustment. We will also assume Big Heart Pet s net debt of approximately \$2.6 billion. Committed financing for the transaction is a \$5.5 billion 364-day senior unsecured bridge loan, which we expect to refinance with a combination of a bank term loan and long-term bonds.

The transaction is expected to close by the end of March, subject to customary closing conditions. The estimated transaction value of \$5.8 billion may change at the time we issue shares of our common stock based on the current price of the shares on the closing date.

Based on the assumed debt structure, we anticipate combined debt at closing of approximately \$6.5 billion, which is expected to result in annual interest expense of approximately \$200.0. Upon closing, we expect to refinance Big Heart Pet s net debt of approximately \$2.6 billion and are evaluating refinancing a portion of our existing debt. This would require total make-whole payments and other related financing costs that would reduce earnings in the fourth quarter by approximately \$190.0 to \$220.0. The actual amount of make-whole payments would depend on economic conditions at the time the refinancing occurs.

In addition, we expect to incur approximately \$225.0 in other one-time costs related to the transaction, of which approximately \$150.0 are expected to be cash charges. These one-time costs are anticipated to be incurred primarily over the next three years, with approximately one-half of the costs expected to be recognized in fiscal 2016.

Table of Contents

On February 24, 2015, we entered into a series of forward starting interest rate swap agreements to hedge a portion of the interest rate risk related to our anticipated issuance of long-term bonds. The notional hedged amount was approximately \$1.1 billion, with expected maturity tenors of 10, 20, and 30 years. The swap agreements are designated as cash flow hedges, where changes in fair value are recorded in other comprehensive income.

Upon close of the transaction, we will have a new reportable segment for the pet food and snacks business. See Note 7: Reportable Segments for additional information.

Note 4: Acquisitions

On September 2, 2014, we acquired Sahale Snacks, Inc. (Sahale), a privately-held manufacturer and marketer of premium, branded nut and fruit snacks for \$80.5, net of a working capital adjustment. The purchase price was allocated to the underlying assets acquired and liabilities assumed based upon their estimated fair values at the date of acquisition. The purchase price allocation includes total intangible assets of \$30.4. To the extent the purchase price exceeded the estimated fair value of the net identifiable tangible and intangible assets acquired, the excess was allocated to goodwill. Preliminary valuations resulted in Sahale goodwill of \$47.9, of which \$43.1 was assigned to the U. S. Retail Consumer Foods segment and \$4.8 was assigned to the International, Foodservice, and Natural Foods segment.

The results of operations for the acquired business are included in the condensed consolidated financial statements from the date of the transaction and did not have a material impact on the quarter ended January 31, 2015, nor expected to materially affect results of operations for the year ending April 30, 2015.

During 2014, we completed two acquisitions for aggregate net cash consideration of \$101.8, net of working capital adjustments. Enray Inc. (Enray), a leading manufacturer and marketer of premium organic, gluten-free ancient grain products, was acquired in August 2013. Silocaf of New Orleans, Inc. (Silocaf), a strategic investment related to our green coffee supply chain, was acquired in September 2013.

The purchase price for each business acquired was allocated to the underlying assets acquired and liabilities assumed based upon their estimated fair values at the date of acquisition. The purchase price allocations include total intangible assets of \$37.6 for both Enray and Silocaf. To the extent the purchase price exceeded the estimated fair value of the net identifiable tangible and intangible assets acquired, the excess was allocated to goodwill. Valuations resulted in Enray goodwill of \$29.3, which was assigned to the International, Foodservice, and Natural Foods segment, and Silocaf goodwill of \$22.8, which was assigned to the U.S. Retail Coffee segment.

Note 5: Restructuring

During 2010, we announced plans to restructure our coffee and fruit spreads operations as part of our ongoing efforts to enhance the long-term strength and profitability of our leading brands. Since then, we expanded our restructuring plan to include the Canadian pickle and condiments operations and the capacity expansion of our peanut butter business. Pickle and condiments production was transitioned to third-party manufacturers during 2012. The consolidation of coffee production in New Orleans, Louisiana, related to these restructuring initiatives is complete, and the transitioned retail and foodservice fruit spreads volume is being produced at our new facility in Orrville, Ohio. All of the impacted facilities have been closed, resulting in the reduction of 850 full-time positions as anticipated.

We expect to incur total restructuring costs of approximately \$265.0 for the entire restructuring plan, of which \$257.5 has been incurred through January 31, 2015. The majority of the remaining costs are anticipated to be recognized this fiscal year and relate to the conversion of the Memphis, Tennessee, fruit spreads facility into a peanut butter plant,

which will begin production late this fiscal year.

Table of Contents

The following table summarizes the restructuring activity, including the liabilities recorded and the total amount expected to be incurred.

	Long-Lived		Site Preparation and				
	Asset Charges	Employee Separation	Equipment Relocation	Production Start-up	Other Costs	Total

Remaining expected restructuring charge	\$ 0.1	\$	\$ 2.1	\$ 3.9	\$ 1.4	\$ 7.5	

In the three and nine months ended January 31, 2015, total restructuring charges of \$3.6 and \$9.1, respectively, were reported in the Condensed Statements of Consolidated Income. Of the total restructuring charges, the majority were reported in other special project costs. In the three and nine months ended January 31, 2014, total restructuring charges of \$5.1 and \$17.1, respectively, were reported in the Condensed Statements of Consolidated Income. Of the total restructuring charges, \$1.6 and \$5.1 were reported in cost of products sold in the three and nine months ended January 31, 2014, respectively, while the remaining charges were reported in other special project costs.

Employee separation costs include severance, retention bonuses, and pension costs. Severance costs and retention bonuses are recognized over the estimated future service period of the affected employees. The obligation related to employee separation costs is included in current liabilities in the Condensed Consolidated Balance Sheets.

Other costs include professional fees, costs related to closing the facilities, and miscellaneous expenditures associated with the restructuring initiative and are expensed as incurred.

Note 6: Common Shares

The following table sets forth common share information.

January 31, 2015	April 30, 2014
------------------	-------------------

Common shares authorized	300,000,000	300,000,000
Common shares outstanding	101,763,058	101,697,400
Treasury shares	26,842,107	26,907,765

During the second quarter of 2015, the Board of Directors increased our shares authorized for repurchase by 5.0 million common shares, resulting in approximately 10.0 million common shares available for repurchase. During 2014, we repurchased 4.9 million common shares for \$495.0.

Note 7: Reportable Segments

We operate in one industry: the manufacturing and marketing of food products. We have three reportable segments: U.S. Retail Coffee, U.S. Retail Consumer Foods, and International, Foodservice, and Natural Foods. The U.S. Retail Coffee segment primarily represents the domestic sales of *Folgers*[®], *Dunkin' Donuts*[®], *Millstone*[®], *Café Bustelo*[®], and *Café Pilon*[®] branded coffee; the U.S. Retail Consumer Foods segment primarily includes domestic sales of *Jif*[®], *Smucker's*[®], *Pillsbury*[®], *Crisco*[®], *Martha White*[®], *Hungry Jack*[®], and *Eagle Brand*[®] branded products; and the International, Foodservice, and Natural Foods segment is comprised of products distributed domestically and in foreign countries through retail channels, foodservice distributors and operators (e.g., restaurants, lodging, schools and universities, health care operators), and natural foods stores and distributors.

Table of Contents

Segment profit represents net sales, less direct and allocable operating expenses, and is consistent with the way in which we manage our segments. However, we do not represent that the segments, if operated independently, would report operating profit equal to the segment profit set forth below, as segment profit excludes certain operating expenses such as corporate administrative expenses and, effective May 1, 2014, unallocated gains and losses on commodity and foreign currency exchange derivative activities. Commodity and foreign currency exchange derivative gains and losses are reported in unallocated derivative gains and losses outside of segment operating results until the related inventory is sold. At that time, we reclassify the hedge gains and losses from unallocated derivative gains and losses to segment profit, allowing our segments to realize the economic effect of the hedge without experiencing any mark-to-market volatility. We would expect that any gain or loss in the estimated fair value of the derivatives would generally be offset by a change in the estimated fair value of the underlying exposures. Prior year results have been modified to exclude the unrealized gains and losses on commodity and foreign currency exchange derivatives to conform to the new definition.

(A) As of January 31, 2015, the cumulative amount of net derivative gains from economic hedges that has not yet been allocated to segment profit was \$3.7, including net gains of \$4.1 incurred prior to 2015. For additional information, see Note 12: Derivative Financial Instruments.

As disclosed in Note 3: Subsequent Event, we have entered into an agreement to acquire Big Heart Pet. The transaction is expected to close by the end of March, resulting in a new reportable segment for the pet food and snacks

business for fiscal 2015. There will be no impact to our current reportable segments, as there will be no changes to the internal way we manage and report those segments for fiscal 2015. However, as a result of leadership changes announced subsequent to January 31, 2015, we are currently evaluating the way we manage and report our business and the impact to reportable segments for fiscal 2016.

Table of Contents**Note 8: Debt and Financing Arrangements**

Long-term debt consists of the following:

	January 31, 2015	April 30, 2014
4.78% Senior Notes due June 1, 2014	\$	\$ 100.0
6.12% Senior Notes due November 1, 2015	24.0	24.0
6.63% Senior Notes due November 1, 2018	389.6	392.0
3.50% Senior Notes due October 15, 2021	802.2	763.8
5.55% Senior Notes due April 1, 2022	300.0	300.0
4.50% Senior Notes due June 1, 2025	400.0	400.0

Current portion of long-term debt	24.0	100.0
Total long-term debt, less current portion	\$ 1,891.8	\$ 1,879.8

The 3.50 percent Senior Notes were issued in a public offering and the remaining Senior Notes were privately placed. The Senior Notes are unsecured and interest is paid semiannually. Scheduled payments are required on the 5.55 percent Senior Notes, of which \$75.0 is due on April 1, 2016, and on the 4.50 percent Senior Notes, the first of which is \$100.0 due on June 1, 2020. We repaid the 4.78 percent Senior Notes on June 1, 2014. We may prepay at any time all or part of the Senior Notes at 100 percent of the principal amount thereof, together with accrued and unpaid interest, and any applicable make-whole amount. Based on current make-whole provisions, prepayment of a portion, or all of our Senior Notes could significantly reduce earnings in the fourth quarter as discussed in Note 3: Subsequent Event.

We have available a \$1.5 billion revolving credit facility with a group of 11 banks that matures in September 2018. Interest is payable either on a quarterly basis or at the end of the borrowing term. At January 31, 2015, we did not have a balance outstanding under the revolving credit facility.

During the second quarter of 2015, we entered into a commercial paper program under which we can issue short-term, unsecured commercial paper not to exceed \$1.0 billion at any time. The commercial paper program is backed by our revolving credit facility and reduces what we can borrow under the revolving credit facility by the amount of commercial paper outstanding. Commercial paper will be used as a continuing source of short-term financing for general corporate purposes. As of January 31, 2015, we had \$264.0 of short-term borrowings outstanding, all of which were issued under our commercial paper program at a weighted-average interest rate of 0.35 percent.

In the second quarter of 2014, we entered into an interest rate swap, with a notional amount of \$750.0, on the 3.50 percent Senior Notes due October 15, 2021, converting the Senior Notes from a fixed- to a variable-rate basis. The interest rate swap was designated as a fair value hedge of the underlying debt obligation. On January 16, 2015, we terminated the interest rate swap agreement prior to maturity. As a result of the early termination, we received \$58.1 in cash, which included \$4.6 of accrued and prepaid interest and a \$53.5 benefit that is deferred as a component of the carrying value of the long term debt and will be recognized ratably as a reduction to future interest expense over the remaining life of the related debt. At January 31, 2015 the remaining benefit of \$53.1 was recorded as an increase in the long-term debt balance. The fair value adjustment of the interest rate swap at April 30, 2014 was \$14.9 and was also recorded as an increase in the long-term debt balance. For additional information, see Note 12: Derivative

Financial Instruments.

Interest paid totaled \$18.0 and \$22.6 for the three months ended January 31, 2015 and 2014, respectively, and \$54.9 and \$67.8 for the nine months ended January 31, 2015 and 2014, respectively. This differs from interest expense due to the timing of payments, amortization of offering discounts, effect of interest rate swaps, amortization of debt issue costs, and interest capitalized.

Our debt instruments contain certain financial covenant restrictions including consolidated net worth, a leverage ratio, and an interest coverage ratio. Subsequent to January 31, 2015, we amended certain financial covenant restrictions related to the revolving credit facility upon closing of the pending acquisition discussed in Note 3: Subsequent Event. We are in compliance with all covenants.

Note 11: Contingencies

We, like other food manufacturers, are from time to time subject to various administrative, regulatory, and other legal proceedings arising in the ordinary course of business. We are currently a defendant in a variety of such legal proceedings. We cannot predict with certainty the ultimate results of these proceedings or reasonably determine a range of potential loss. Our policy is to accrue costs for contingent liabilities when such liabilities are probable and amounts can be reasonably estimated. Based on the information known to date, we do not believe the final outcome of these proceedings will have a material adverse effect on our financial position, results of operations, or cash flows.

Table of Contents**Note 12: Derivative Financial Instruments**

We are exposed to market risks, such as changes in commodity prices, foreign currency exchange rates, and interest rates. To manage the volatility related to these exposures, we enter into various derivative transactions. We have policies in place that define acceptable instrument types we may enter into and establish controls to limit our market risk exposure.

Commodity Price Management: We enter into commodity futures and options contracts to manage the price volatility and reduce the variability of future cash flows related to anticipated inventory purchases of key raw materials, notably green coffee, edible oils, and flour. We also enter into commodity futures and options contracts to manage price risk for energy input costs, including natural gas and diesel fuel. The derivative instruments generally have maturities of less than one year.

Effective May 1, 2014, we elected to no longer qualify commodity derivatives for hedge accounting treatment and as a result the derivative gains and losses are immediately recognized in earnings. Prior to 2015, certain of our derivative instruments met the hedge criteria and were accounted for as cash flow hedges. The mark-to-market gains and losses on qualifying hedges were deferred and included as a component of accumulated other comprehensive loss to the extent effective, and reclassified to cost of products sold in the period during which the hedged transaction affected earnings. The deferred net gains included in accumulated other comprehensive loss, net of tax, were \$18.3 at April 30, 2014, and \$0.4 at January 31, 2015. Although we no longer perform the assessments required to achieve hedge accounting for derivative positions, we believe all of our commodity derivatives are economic hedges of our risk exposure.

The commodities hedged have a high inverse correlation to price changes of the derivative commodity instrument. Thus, we would expect that any gain or loss in the estimated fair value of the derivatives would generally be offset by an increase or decrease in the estimated fair value of the underlying exposure.

Foreign Currency Exchange Rate Hedging: We utilize foreign currency forwards and options contracts to manage the effect of foreign currency exchange fluctuations on future cash payments primarily related to purchases of certain raw materials and finished goods in Canada. The contracts generally have maturities of less than one year.

Effective May 1, 2014, we elected to no longer qualify instruments used to manage foreign currency exchange exposures for hedge accounting treatment. Prior to 2015, instruments used to manage foreign currency exchange exposures did not qualify for hedge accounting treatment and the change in value of these instruments was immediately recognized in cost of products sold.

Interest Rate Hedging: We utilize derivative instruments to manage changes in the fair value and cash flows of our debt. Interest rate swaps mitigate the risk associated with the underlying hedged item. At the inception of the contract, the instrument is evaluated and documented for hedge accounting treatment. If the contract is designated as a cash flow hedge, the mark-to-market gains and losses on the swap are deferred and included as a component of accumulated other comprehensive loss to the extent effective, and reclassified to interest expense in the period during which the hedged transaction affects earnings. If the contract is designated as a fair value hedge, the interest rate swap would be recognized at fair value on the balance sheet and changes in the fair value would be recognized in interest expense. Generally, changes in the fair value of the derivative are equal to changes in the fair value of the underlying debt and have no impact on earnings.

During 2014, we entered into an interest rate swap on the 3.50 percent Senior Notes due October 15, 2021, which was designated as a fair value hedge and used to hedge against the changes in the fair value of the debt. We received cash

flows from the counterparty at a fixed rate and paid the counterparty variable rates based on LIBOR. On January 16, 2015, we terminated the interest rate swap on the 3.50 percent Senior Notes prior to maturity. As a result of the early termination, we received \$58.1 in cash, which included \$4.6 of accrued and prepaid interest. The remaining benefit was deferred and will be recognized over the remaining life of the underlying debt as a reduction of future interest expense and will be recognized as follows: \$2.2 in 2015, \$7.4 in 2016, \$7.6 in 2017, \$7.8 in 2018, \$8.0 in 2019, \$8.1 in 2020, \$8.4 in 2021, and \$4.0 in 2022. For additional information, see Note 8: Debt and Financing Arrangements.

Table of Contents

The following table sets forth the gross fair value amounts of derivative instruments recognized in the Condensed Consolidated Balance Sheets.

	January 31, 2015				April 30, 2014		
	Other Current Assets	Other Current Liabilities	Other Noncurrent Assets	Other Noncurrent Liabilities	Other Current Assets	Other Current Liabilities	Other Noncurrent Liabilities
Derivatives designated as hedging instruments:							
Interest rate contract	\$	\$	\$	\$	\$ 18.0	\$	\$ 3.1
Commodity contracts					23.4	10.9	
Total derivatives designated as hedging instruments	\$	\$	\$	\$	\$ 41.4	\$ 10.9	\$ 3.1
Derivatives not designated as hedging instruments:							
Commodity contracts	\$ 4.9	\$ 14.1	\$ 0.1	\$ 0.1	\$ 11.6	\$ 5.8	\$
Foreign currency exchange contracts	13.1				1.4	0.7	
Total derivatives not designated as hedging instruments	\$ 18.0	\$ 14.1	\$ 0.1	\$ 0.1	\$ 13.0	\$ 6.5	\$
Total derivative instruments	\$ 18.0	\$ 14.1	\$ 0.1	\$ 0.1	\$ 54.4	\$ 17.4	\$ 3.1

We have elected to not offset fair value amounts recognized for our exchange-traded commodity derivative instruments and our cash margin accounts executed with the same counterparty that are generally subject to enforceable netting agreements. We are required to maintain cash margin accounts in connection with funding the settlement of our open positions. At January 31, 2015 and April 30, 2014, we maintained cash margin account balances of \$20.3 and \$8.1, respectively, included in other current assets in the Condensed Consolidated Balance Sheets. The change in the cash margin account balances is included in other net, investing in the Condensed Statements of Consolidated Cash Flows. In the event of default and immediate net settlement of all of our open positions with individual counterparties, all of our derivative liabilities would be fully offset by either our derivative asset positions or margin accounts based on the net asset or liability position with our individual counterparties.

The following table presents information on pre-tax commodity contract gains and losses recognized on derivatives designated as cash flow hedges prior to May 1, 2014, and pre-tax losses related to the termination of a prior interest rate swap.

	Three Months Ended January 31,		Nine Months Ended January 31,	
	2015	2014	2015	2014
Gains (losses) recognized in other comprehensive loss (effective portion)	\$	\$	\$	\$
	9.6	(5.7)	28.4	(18.4)

Gains (losses) reclassified from accumulated other comprehensive loss to cost of products sold (effective portion)

Losses reclassified from accumulated other comprehensive loss to interest expense (effective portion)	(0.1)	(0.1)	(0.4)	(0.4)
---	-------	-------	-------	-------

Change in accumulated other comprehensive loss	\$ (9.5)	\$ 10.3	\$ (28.0)	\$ 12.7
--	----------	---------	-----------	---------

Included as a component of accumulated other comprehensive loss were deferred pre-tax net gains of \$0.7 and \$29.1 at January 31, 2015 and April 30, 2014, respectively, related to commodity contracts. The related tax expense recognized in accumulated other comprehensive loss was \$0.3 and \$10.8 at January 31, 2015 and April 30, 2014, respectively. The entire amount included in accumulated other comprehensive loss is expected to be recognized in earnings this fiscal year as the related commodities are sold.

Also, included as a component of accumulated other comprehensive loss were deferred pre-tax losses of \$4.4 and \$4.8 at January 31, 2015 and April 30, 2014, respectively, related to the termination of a prior interest rate swap in October 2011 on the 3.50 percent Senior Notes due October 15, 2021. The related tax benefit recognized in accumulated other comprehensive loss was \$1.6 and \$1.7 at January 31, 2015 and April 30, 2014, respectively. Approximately \$0.6 of the pre-tax loss will be recognized over the next 12 months.

Table of Contents

The following table presents the net gains and losses recognized in cost of products sold on derivatives not designated as qualified hedging instruments.

	Three Months Ended January 31,		Nine Months Ended January 31,	
	2015	2014	2015	2014
(Losses) gains on commodity contracts	\$ (13.9)	\$ 0.9	(34.3)	\$ (2.2)

Total (losses) gains recognized in cost of products sold	\$ (2.2)	\$ 3.8	\$ (20.2)	\$ 2.6

Commodity and foreign currency exchange derivative gains and losses are reported in unallocated derivative gains and losses outside of segment operating results until the related inventory is sold. At that time, we reclassify the hedge gains and losses from unallocated derivative gains and losses to segment profit, allowing our segments to realize the economic effect of the hedge without experiencing any mark-to-market volatility. The following table presents the activity in unallocated derivative gains and losses.

	Three Months Ended January 31,		Nine Months Ended January 31,	
	2015	2014	2015	2014
Net (losses) gains on mark-to-market valuation of unallocated derivative positions	\$ (2.2)	\$ 3.8	\$ (20.2)	\$ 2.6
Net losses on derivative positions reclassified to segment operating profit	15.6	0.2	19.8	4.5
Net mark-to-market valuation of certain derivative positions recognized in unallocated derivative gains (losses)	\$ 13.4	\$ 4.0	\$ (0.4)	\$ 7.1

The cumulative unallocated derivative gains of \$3.7 at January 31, 2015, included net gains of \$4.1 incurred prior to 2015. As of January 31, 2015, net realized gains of \$8.5 were included in cumulative unallocated derivative gains.

The following table presents the gross contract notional value of outstanding derivative contracts.

	January 31, 2015	April 30, 2014
Commodity contracts	\$ 423.8	\$ 790.3
Foreign currency exchange contracts	118.5	158.1
Interest rate contract		750.0

Note 13: Other Financial Instruments and Fair Value Measurements

Financial instruments, other than derivatives, that potentially subject us to significant concentrations of credit risk consist principally of cash investments, short-term borrowings, and trade receivables. The carrying value of these

financial instruments approximates fair value. Our other financial instruments, with the exception of long-term debt, are recognized at estimated fair value in the Condensed Consolidated Balance Sheets.

The following table provides information on the carrying amounts and fair values of our financial instruments.

	January 31, 2015		April 30, 2014	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Other investments	\$ 55.8	\$ 55.8	\$ 55.4	\$ 55.4
Derivative financial instruments net	3.9	3.9	33.9	33.9
Long-term debt	(1,915.8)	(2,135.7)	(1,979.8)	(2,239.1)

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Valuation techniques are based on observable and unobservable inputs. Observable inputs reflect readily obtainable data from independent sources, while unobservable inputs reflect our market assumptions.

Table of Contents

The following tables summarize the fair values and the levels within the fair value hierarchy in which the fair value measurements fall for our financial instruments.

(A) Other investments consist of funds maintained for the payment of benefits associated with nonqualified retirement plans. The funds include equity securities listed in active markets, municipal obligations valued by a third party using valuation techniques that utilize inputs which are derived principally from or corroborated by observable market data, and money market funds with maturities of three months or less.

Based on the short-term nature of these money market funds, carrying value approximates fair value. As of January 31, 2015, our municipal obligations are scheduled to mature as follows: \$6.3 in 2015, \$0.5 in 2016, \$1.6 in 2017, \$1.1 in 2018, and the remaining \$29.1 in 2019 and beyond.

- (B) Level 1 commodity contract and foreign currency exchange derivatives are valued using quoted market prices for identical instruments in active markets. Level 2 commodity contract and foreign currency exchange derivatives are valued using quoted prices for similar assets or liabilities in active markets. The Level 2 interest rate contract derivative is valued using the income approach, observable Level 2 market expectations at the measurement date, and standard valuation techniques to convert future amounts to a single discounted present value. Level 2 inputs for the interest rate contract are limited to quoted prices for similar assets or liabilities in active markets and inputs other than quoted prices that are observable for the asset or liability. For additional information, see Note 12: Derivative Financial Instruments.
- (C) Long-term debt is comprised of public Senior Notes classified as Level 1 and private Senior Notes classified as Level 2. The public Senior Notes are traded in an active secondary market and valued using quoted prices. The value of the private Senior Notes is based on the net present value of each interest and principal payment calculated, utilizing an interest rate derived from a fair market yield curve. For additional information, see Note 8: Debt and Financing Arrangements.

Table of Contents**Note 14: Income Taxes**

During the three-month and nine-month period ended January 31, 2015, the effective income tax rate varied from the U.S. statutory income tax rate primarily due to the domestic manufacturing deduction, partially offset by state income taxes.

Within the next 12 months, it is reasonably possible that we could decrease our unrecognized tax benefits by an additional \$0.4, primarily as a result of expiring statute of limitations periods.

Of the total gains and losses reclassified from accumulated other comprehensive loss, \$0.4 of expense was reclassified to interest expense related to the interest rate swap terminated in October 2011 for the nine months ended January 31, 2015 and 2014.
- (B) Amortization of net losses was reclassified from accumulated other comprehensive loss to selling, distribution, and administrative expenses.

Note 16: Guarantor and Non-Guarantor Financial Information

Our 3.50 percent Senior Notes due October 15, 2021, are fully and unconditionally guaranteed, on a joint and several basis, by J.M. Smucker LLC and The Folgers Coffee Company (the subsidiary guarantors), which are 100 percent wholly-owned subsidiaries of the Company. A subsidiary guarantor will be released from its obligations under the indenture governing the notes (a) if we exercise our legal or covenant defeasance option or if our obligations under the indenture are discharged in accordance with the terms of the indenture or (b) upon delivery of an officer's certificate to the trustee that the subsidiary guarantor does not guarantee our obligations under any of our other primary senior indebtedness and that any other guarantees of such primary senior indebtedness of the subsidiary guarantor have been released other than through discharges as a result of payment by such guarantor on such guarantees.

Table of Contents

Condensed consolidating financial statements for the Company, the subsidiary guarantors, and the other subsidiaries of the Company that are not guaranteeing the indebtedness under the 3.50 percent Senior Notes (the non-guarantor subsidiaries) are provided below. The principal elimination entries relate to investments in subsidiaries and intercompany balances and transactions, including transactions with our 100 percent wholly-owned subsidiary guarantors and non-guarantor subsidiaries. We have accounted for investments in subsidiaries using the equity method.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.**

(Dollars in millions, unless otherwise noted, except per share data)

This discussion and analysis deals with comparisons of material changes in the unaudited condensed consolidated financial statements for the three-month and nine-month periods ended January 31, 2015 and 2014. Results for the quarter and nine months ended January 31, 2015 and 2014, include Sahale Snacks, Inc. (Sahale) since the completion of the acquisition on September 2, 2014, Enray Inc. (Enray) since the completion of the acquisition on August 20, 2013, and the impact of our licensing and distribution agreement with Cumberland Packing Corp. (Cumberland), which commenced on July 1, 2013.

(A) Refer to Non-GAAP Measures located on page 29 for a reconciliation to the comparable GAAP financial measure.

Net sales in the third quarter of 2015 decreased 2 percent, compared to the third quarter of 2014, reflecting decreased volume, most significantly in the U.S. Retail Coffee segment and in our private label businesses. Operating income decreased 3 percent in the third quarter of 2015, compared to the third quarter of 2014, and decreased 8 percent excluding the impact of restructuring and merger and integration costs and unallocated gains and losses on commodity and foreign currency exchange derivatives (certain items affecting comparability). The declines were attributed to the impact of a reduction in gross profit driven by the U.S. Retail Coffee segment. Net income per diluted share decreased 1 percent in the third quarter of 2015, as compared to the third quarter of 2014, while income per diluted share excluding certain items affecting comparability decreased 6 percent over the same period. Both per share measures reflect the benefit of a decrease in weighted-average common shares outstanding as a result of our share repurchase activities during the second half of 2014.

Table of Contents

Net sales in the first nine months of 2015 decreased 3 percent, compared to the first nine months of 2014, reflecting volume declines in the U.S. Retail Coffee segment. Operating income and operating income excluding certain items affecting comparability both decreased 4 percent over the same period. Net income per diluted share and income per diluted share excluding certain items affecting comparability both increased 1 percent in the first nine months of 2015, as compared to the first nine months of 2014. Both per share measures reflect the benefit of a decrease in weighted-average common shares outstanding as a result of our share repurchase activities during 2014 and a reduction in interest expense.

Amounts may not add due to rounding.

(A) Net sales adjusted for certain noncomparable items is a non-GAAP measure used in evaluating performance internally. This measure provides useful information to investors because it enables comparison of results on a year-over-year basis. Net sales adjusted for certain noncomparable items in the table above excludes the impact of the Sahale acquisition, the incremental impact of the Enray acquisition and the Cumberland distribution agreement, and foreign currency exchange.

Net sales decreased 2 percent in the third quarter of 2015, compared to the third quarter of 2014. Volume gains were realized in *Jif* peanut butter, *Crisco* oils, *Smucker's* fruit spreads, and *Smucker's Uncrustables*[®] frozen sandwiches and were offset by declines in *Folgers* coffee and private label canned milk and natural beverages, as well as the impact of the exited private label foodservice hot beverage business.

Net price realization was 1 percentage point higher in the third quarter of 2015, compared to the third quarter of 2014, as coffee list price increases were mostly offset by lower net pricing for peanut butter and oils. Sales mix was unfavorable during the same period driven by the volume declines in the U.S. Retail Coffee segment, and represented 1 percentage point of the net sales decrease. Foreign currency exchange also represented 1 percentage point of the net sales decrease, while the acquired Sahale business contributed \$12.8 to net sales in the third quarter of 2015.

The net sales decrease of 3 percent in the first nine months of 2015, compared to the first nine months of 2014, was primarily due to the impact of volume declines in the U.S. Retail Coffee segment driven by the *Folgers* brand and the impact of the private label foodservice hot beverage business exits. Volume declines were also realized in the *Pillsbury* baking brand, while gains were realized in *Jif* peanut butter and *Crisco* oils.

Unfavorable sales mix and foreign currency exchange each represented 1 percentage point of the net sales decrease. Sahale and the incremental impact of Enray and Cumberland contributed a combined \$46.6 to net sales in the first nine months of 2015. The impact of net price realization was essentially neutral as lower net price realization on the *Jif* and *Crisco* brands offset higher net price realization on the *Folgers* brand.

Table of Contents**Operating Income**

The following table presents the components of operating income as a percentage of net sales.

Other operating (income) expense net				
Operating income	17.7%	18.0%	16.5%	16.6%

Amounts may not add due to rounding.

Gross profit decreased \$22.3, or 4 percent, in the third quarter of 2015, compared to the third quarter of 2014, driven by the impact of commodity costs relative to net price realization offset somewhat by a \$9.4 favorable change in unallocated derivative gains and losses. Excluding certain items affecting comparability, which primarily consisted of the impact of unallocated derivative gains and losses, gross profit decreased \$34.2, or 6 percent, over the same period.

Higher overall commodity costs were attributed to green coffee which more than offset lower peanut and oil costs. Overall net price realization was also higher but did not offset the impact of the higher costs and was the main contributor to the gross profit decline. Most significantly, higher net coffee pricing did not offset the higher green coffee costs while lower net pricing on peanut butter and oils exceeded the benefit of lower costs for those commodities. Lower volume, unfavorable mix, and foreign currency exchange also contributed to the gross profit decline to a lesser extent.

Selling, distribution, and administrative (SD&A) expenses decreased \$13.0, or 5 percent, in the third quarter of 2015, compared to the third quarter of 2014, primarily due to an \$18.7 decrease in marketing expense. General and administrative expenses increased 10 percent in the third quarter of 2015, compared to 2014, and included \$4.4 of deal costs related to the pending acquisition of Big Heart Pet Brands, mainly consisting of professional fees. (See Subsequent Event located on page 26.) Excluding these pre-announcement deal costs, general and administrative expenses increased 4 percent during the same period.

Operating income decreased \$8.4, or 3 percent, in the third quarter of 2015, compared to the third quarter of 2014, reflecting a favorable change in certain items affecting comparability. Excluding certain items affecting comparability in both periods, operating income decreased \$21.5, or 8 percent.

Driven by lower volume and unfavorable mix, gross profit decreased \$52.6, or 3 percent, in the first nine months of 2015, compared to the first nine months of 2014, and decreased \$50.7, or 3 percent, excluding certain items affecting comparability.

Overall the net impact of commodity costs and net price realization was essentially neutral to gross profit. Lower peanut costs were not fully offset by lower net prices in the first nine months of 2015, compared to 2014. This benefit was mostly offset by the impact of higher green coffee costs which were not fully recovered by higher net price realization.

SD&A expenses decreased \$27.7, or 4 percent, in the first nine months of 2015, compared to the first nine months of 2014, driven by a \$36.3 decrease in marketing expense, which was primarily due to reductions in both U.S. retail market segments. The decrease in marketing was partially offset by a 5 percent increase in general and administrative expenses, which was driven by an increase in supply chain support costs and the pre-announcement deal costs, partially offset by a reduction in incentive compensation expense in 2015.

Table of Contents

Operating income decreased \$26.1, or 4 percent, in the first nine months of 2015, compared to the first nine months of 2014, and decreased \$26.7, or 4 percent, excluding certain items affecting comparability.

Interest Expense Net

Net interest expense decreased \$12.3 in the first nine months of 2015, compared to the first nine months of 2014, reflecting the impact of long-term debt repayments made over the last 12 months and an interest rate swap entered into during the second quarter of 2014, converting a portion of our long-term debt from a fixed- to a variable-rate basis. On January 16, 2015, we terminated the interest rate swap resulting in a net settlement gain of \$53.5. At January 31, 2015, the unamortized benefit of \$53.1 will reduce future interest expense through October 15, 2021.

Segment Results

Effective May 1, 2014, commodity and foreign currency exchange derivative gains and losses are reported in unallocated derivative gains and losses outside of segment operating results until the related inventory is sold. At that time, we reclassify the hedge gain or loss from unallocated derivative gains and losses to segment profit, allowing our segments to realize the economic effect of the hedge without experiencing any mark-to-market volatility. Prior year results have been modified to exclude the unrealized gains and losses on commodity and foreign currency exchange derivatives.

U.S. Retail Coffee						

The U.S. Retail Coffee segment net sales decreased 1 percent in the third quarter of 2015, compared to the third quarter of 2014, as lower volume was mostly offset by higher net price realization, reflecting list price increases taken during fiscal 2015, and favorable sales mix. List price increases taken include 9 percent in June 2014 on the majority of our packaged coffee offerings and 8 percent in January 2015 on our *K-Cup*[®] packs. Segment volume decreased 8 percent in the third quarter of 2015, compared to the third quarter of 2014, primarily driven by a 9 percent decrease in the *Folgers* brand. The *Folgers* brand volume decline was attributed to consumer response to higher promoted price points on shelf for its roast and ground coffee offerings, competitive activity, and reduced promotional effectiveness. The *Dunkin' Donuts* packaged coffee volume was flat in the quarter, and the *Café Bustelo* brand volume increased 5

percent. Volume and net sales of *Keurig*[®] portion packs decreased 3 percent and 8 percent, respectively, in the third quarter of 2015, compared to the third quarter of 2014.

The U.S. Retail Coffee segment profit decreased \$30.6 in the third quarter of 2015, compared to the third quarter of 2014, reflecting lower sales volume and the impact of higher costs, which were not fully offset by higher net prices. The unfavorable price to cost relationship was driven by increased promotional spending in support of *K-Cup*[®] packs and *Dunkin' Donuts* packaged coffee. A reduction in marketing expense contributed favorably to segment profit in the third quarter of 2015, compared to 2014.

Table of Contents

The U.S. Retail Coffee segment net sales decreased 5 percent in the first nine months of 2015, compared to the first nine months of 2014, driven by a 9 percent volume decline, primarily due to a 10 percent decrease in the *Folgers* brand. Volume for the *Café Bustelo* brand increased 5 percent over the same period, while *Dunkin' Donuts* packaged coffee volume was flat. The impact of the volume decline was partially offset by favorable net price realization and sales mix. Through nine months, the benefit of the June 2014 list price increase was mostly offset by the impact of an increase in promotional spending. Volume and net sales of *Keurig*[®] portion packs increased 6 percent and 1 percent, respectively, in the first nine months of 2015, compared to the first nine months of 2014.

The U.S. Retail Coffee segment profit decreased \$65.0 in the first nine months of 2015, compared to the first nine months of 2014, primarily driven by the segment volume decline and *Keurig*[®] portion packs profitability, partially offset by a decrease in marketing and favorable mix. Excluding *Keurig*[®] portion packs, the net impact of higher green coffee costs and net price realization was essentially neutral to segment profit in the first nine months of 2015, compared to the first nine months of 2014. We anticipate an unfavorable relationship between net price realization and green coffee costs during the remainder of 2015, compared to the prior period.

U.S. Retail Consumer Foods

The U.S. Retail Consumer Foods segment volume increased 1 percent in the third quarter of 2015, compared to the third quarter of 2014. Segment net sales decreased 2 percent over the same period, driven by lower net price realization primarily for the *Jif* and *Crisco* brands. The Sahale business contributed \$10.3 to segment net sales in the third quarter of 2015.

Jif brand volume increased 7 percent and net sales decreased 4 percent in the third quarter of 2015, compared to the third quarter of 2014, due to a 7 percent list price decrease on the majority of peanut butter items in November 2014 and increased promotional spending. *Smucker's Uncrustables* frozen sandwiches volume and net sales both increased 10 percent. *Crisco* brand volume increased 1 percent as gains in oils offset declines in shortening, while net sales decreased 10 percent, impacted by a 9 percent list price decline taken in the fourth quarter of 2014. Volume for the *Pillsbury* brand was flat and net sales decreased 3 percent.

The U.S. Retail Consumer Foods segment profit increased \$9.4 in the third quarter of 2015, compared to the third quarter of 2014, reflecting a decrease in marketing expense. Overall lower commodity costs, primarily for peanuts and oils, were more than offset by lower net price realization which included increased promotional spending in the period.

The U.S. Retail Consumer Foods segment volume was flat in the first nine months of 2015, compared to the first nine months of 2014, and segment net sales decreased 2 percent over the same period, reflecting lower net price realization, primarily for the *Jif* and *Crisco* brands, partially offset by a \$16.3 contribution from the Sahale business.

Jif brand volume increased 4 percent in the first nine months of 2015, compared to the first nine months of 2014, while net sales was flat, impacted by the list price decline and increased promotional spending. *Smucker's Uncrustables* frozen sandwiches volume and net sales increased 15 percent and 14 percent, respectively. *Crisco* brand volume increased 4 percent, while net sales decreased 7 percent, impacted by the list price decline. Volume for the *Pillsbury* brand decreased 4 percent, and was the primary contributor to the overall flat segment volume, and net sales decreased 7 percent.

The U.S. Retail Consumer Foods segment profit increased \$44.4 in the first nine months of 2015, compared to the first nine months of 2014, partially driven by the net benefit of lower peanut costs. While costs were lower for most other commodities, they did not significantly benefit segment profit as they were mostly offset by lower net price

realization. Segment profit in the prior year was impacted by temporary incremental costs at our fruit spreads manufacturing facility and capacity expansion at our *Smucker's Uncrustables* facility.

Table of Contents

International, Foodservice, and Natural Foods

Net sales in the International, Foodservice, and Natural Foods segment decreased 3 percent in the third quarter of 2015, compared to the third quarter of 2014. Excluding the impacts of Sahale and foreign currency exchange, segment net sales decreased 1 percent and volume decreased 4 percent. The volume decline reflects the impact of the planned exit of our private label foodservice hot beverage business and decreases in private label natural foods beverages that offset gains in the *Smucker's* foodservice portion control items and the *Five Roses*® brand. Overall net price realization was higher, as the prior year was impacted by an unfavorable trade spending accrual adjustment of approximately \$10.0, and sales mix was unfavorable.

The International, Foodservice, and Natural Foods segment profit increased \$5.4 in the third quarter of 2015, compared to 2014. Segment profit in the prior year was reduced by the unfavorable trade spending accrual adjustment of approximately \$10.0. In 2015, higher costs were realized in Canada and were attributed to sourcing certain products from the U.S., reflecting the impact of a significantly weaker Canadian dollar compared to a year ago, and an increase in green coffee costs.

Net sales in the International, Foodservice, and Natural Foods segment decreased 2 percent in the first nine months of 2015, compared to the first nine months of 2014. Excluding the impacts of Sahale, Enray, Cumberland, and foreign currency exchange, segment net sales and volume decreased 3 percent and 4 percent, respectively. The volume decline reflects the impact of the planned exit of our private label foodservice hot beverage business and decreases in *Santa Cruz Organic*® beverages and the *Robin Hood*® and *Five Roses* brands, while gains were achieved in the *R. W. Knudsen Family*® brand.

The International, Foodservice, and Natural Foods segment profit decreased \$4.5 in the first nine months of 2015, compared to the first nine months of 2014, primarily due to the realization of higher costs in Canada, which were attributed to sourcing certain products from the U.S., reflecting the impact of a weaker Canadian dollar compared to a year ago, and an increase in green coffee costs.

Subsequent Event

On February 3, 2015, we entered into a definitive agreement to acquire Big Heart Pet Brands (Big Heart Pet) in a cash and stock transaction preliminarily valued at approximately \$5.8 billion. Big Heart Pet is the largest stand-alone producer, distributor, and marketer of premium-quality, branded pet food and pet snacks in the United States. Under the terms of the agreement, we will issue approximately 17.9 million shares of our common stock to the shareholders of Blue Acquisition Group, Inc., Big Heart Pet's holding company, and pay \$1.3 billion in cash, subject to a working capital adjustment. We will also assume Big Heart Pet's net debt of approximately \$2.6 billion. Committed financing for the transaction is a \$5.5 billion 364-day senior unsecured bridge loan, which we expect to refinance with a combination of a bank term loan and long-term bonds.

The transaction is expected to close by the end of March, subject to customary closing conditions. The estimated transaction value of \$5.8 billion may change at the time we issue shares of our common stock based on the current price of the shares on the closing date.

Based on the assumed debt structure, we anticipate combined debt at closing of approximately \$6.5 billion, which is expected to result in annual interest expense of approximately \$200.0. Upon closing, we expect to refinance Big Heart Pet's net debt of approximately \$2.6 billion and are evaluating refinancing a portion of our existing debt. This would require total make-whole payments and other related financing costs that would reduce earnings in the fourth quarter by approximately \$190.0 to \$220.0. The actual amount of make-whole payments would depend on economic

conditions at the time the refinancing occurs.

In addition, we expect to incur approximately \$225.0 in other one-time costs related to the transaction, of which approximately \$150.0 are expected to be cash charges. These one-time costs are anticipated to be incurred primarily over the next three years, with approximately one-half of the costs expected to be recognized in fiscal 2016.

Table of Contents

On February 24, 2015, we entered into a series of forward starting interest rate swap agreements to hedge a portion of the interest rate risk related to our anticipated issuance of long-term bonds. The notional hedged amount was approximately \$1.1 billion, with expected maturity tenors of 10, 20, and 30 years. The swap agreements are designated as cash flow hedges, where changes in fair value are recorded in other comprehensive income.

Financial Condition Liquidity and Capital Resources**Liquidity**

On an annual basis, our principal source of funds is cash generated from operations, supplemented by borrowings against our commercial paper program and revolving credit facility. Total cash and cash equivalents at January 31, 2015, was \$111.7, compared to \$153.5 at April 30, 2014.

We typically expect a significant use of cash to fund working capital requirements during the first half of each fiscal year, primarily due to the buildup of inventories to support the Fall Bake and Holiday period, the additional increase of coffee inventory in advance of the Atlantic hurricane season, and seasonal fruit procurement. We expect cash provided by operations in the second half of the fiscal year to significantly exceed the amount in the first half of the year, upon completion of the Fall Bake and Holiday period. Cash provided by operating activities in the third quarter of 2015 was \$427.7, compared to \$83.9 provided through the first half of 2015.

The following table presents selected cash flow information.

	Nine Months Ended January 31,	
	2015	2014
Net cash provided by operating activities	\$ 511.6	\$ 589.1
Net cash used for investing activities	(253.0)	(257.2)
Net cash used for financing activities	(278.4)	(405.2)
Net cash provided by operating activities	\$ 511.6	\$ 589.1
Additions to property, plant, and equipment	(162.1)	(148.9)
Free cash flow ^(A)	\$ 349.5	\$ 440.2

(A) Free cash flow is a non-GAAP measure used by management to evaluate the amount of cash available for debt repayment, dividend distribution, acquisition opportunities, share repurchases, and other corporate purposes. Cash provided by operating activities decreased \$77.5 in the first nine months of 2015, compared to the first nine months of 2014, primarily due to a greater amount of cash required to fund working capital in 2015. The increase in working capital requirements was mostly driven by higher green coffee costs in 2015, as compared to the prior year. Cash provided by operating activities in the first nine months of 2015 included the net proceeds from the settlement of an interest rate swap of \$53.5.

Cash used for investing activities in the first nine months of 2015 consisted primarily of \$162.1 in capital expenditures and \$80.5 related to the acquisition of Sahale. Cash used for investing activities in the first nine months of 2014 consisted primarily of \$148.9 in capital expenditures and \$101.8 related to the acquisitions of Enray and Silocaf of

New Orleans, Inc.

Cash used for financing activities in the first nine months of 2015 consisted primarily of quarterly dividend payments of \$189.0 and the \$100.0 repayment of the 4.78 percent Senior Notes. Cash used for financing activities in the first nine months of 2014 consisted primarily of the purchase of treasury shares for \$227.0 and quarterly dividend payments of \$177.4.

Table of Contents**Capital Resources**

The following table presents our capital structure.

	January 31, 2015	April 30, 2014
Current portion of long-term debt	\$ 24.0	\$ 100.0
Short-term borrowings	264.0	248.4
Long-term debt, less current portion	1,891.8	1,879.8
Total debt	\$ 2,179.8	\$ 2,228.2
Shareholders equity	5,224.2	5,029.6
Total capital	\$ 7,404.0	\$ 7,257.8

We have available a \$1.5 billion revolving credit facility with a group of 11 banks that matures in September 2018. Additionally, during the second quarter of 2015, we entered into a commercial paper program under which we can issue short-term, unsecured commercial paper not to exceed \$1.0 billion at any time. The commercial paper program is backed by our revolving credit facility and reduces what we can borrow under the revolving credit facility by the amount of commercial paper outstanding. As of January 31, 2015, we had \$264.0 of short-term borrowings outstanding, all of which were under our commercial paper program, at a weighted-average interest rate of 0.35 percent. As of February 26, 2015, we had \$208.0 of commercial paper borrowings, at a weighted-average interest rate of 0.35 percent, and no outstanding balance under the revolving credit facility. We are in compliance with all of our debt covenants. For additional information on our revolving credit facility, commercial paper program, and debt covenants, see Note 8: Debt and Financing Arrangements.

As of January 31, 2015, we had approximately 10.0 million common shares available for repurchase under Board of Directors authorizations, including 5.0 million common shares which were authorized in October 2014. We do not expect to repurchase any of these shares in the near term due to our plans to pay down the additional debt we anticipate in connection with the Big Heart Pet acquisition.

Absent any material acquisitions other than Big Heart Pet or other significant investments, we believe cash on hand, combined with cash provided by operations, new borrowings anticipated in connection with the Big Heart Pet acquisition, and borrowings available under our commercial paper program and revolving credit facility, will be sufficient to meet cash requirements for the next 12 months, including capital expenditures, the payment of quarterly dividends, interest and principal payments on debt outstanding and any new borrowings, potential make-whole payments, and one-time merger and integration costs. As of January 31, 2015, total cash and cash equivalents of \$97.1 was held by our international subsidiaries. We do not intend to repatriate these funds to meet any of these cash requirements. Should we repatriate these funds, we will be required to pay taxes based on the applicable U.S. tax rates net of any foreign tax credit consideration.

Table of Contents**Non-GAAP Measures**

We use non-GAAP financial measures including: net sales adjusted for the noncomparable impact of the Sahale acquisition, the incremental impact of the Enray acquisition and the Cumberland distribution agreement, and foreign currency exchange; gross profit, operating income, income, and income per diluted share, excluding certain items affecting comparability; and free cash flow, as key measures for purposes of evaluating performance internally. In addition, income per diluted share excluding certain items affecting comparability is used as a component of the Board of Director's measurement of performance for incentive compensation purposes. We believe that these measures provide useful information to investors because they are the measures we use to evaluate performance on a comparable year-over-year basis. Effective May 1, 2014, we have defined certain items affecting comparability to include restructuring and merger and integration costs (special project costs) and unallocated gains and losses on commodity and foreign currency exchange derivatives (unallocated derivative gains and losses) and modified prior year results to conform to the new definition. The special project costs in the table below relate to specific restructuring and merger and integration projects that are each nonrecurring in nature and can significantly affect the year-over-year assessment of operating results. Unallocated derivative gains and losses reflect the changes in fair value of our commodity and foreign currency exchange contracts and also affect comparability on a year-over-year basis. These non-GAAP financial measures are not intended to replace the presentation of financial results in accordance with U.S. generally accepted accounting principles (GAAP). Rather, the presentation of these non-GAAP financial measures supplements other metrics we use to internally evaluate our businesses and facilitate the comparison of past and present operations and liquidity. These non-GAAP financial measures may not be comparable to similar measures used by other companies and may exclude certain nondiscretionary expenses and cash payments. The following table reconciles certain non-GAAP financial measures to the comparable GAAP financial measure and prior years' measures have been revised to reflect the change discussed above. See page 27 for a reconciliation of free cash flow to the comparable GAAP financial measure.

Table of Contents**Off-Balance Sheet Arrangements and Contractual Obligations**

We do not have material off-balance sheet arrangements, financings, or other relationships with unconsolidated entities or other persons, also known as variable interest entities. Transactions with related parties are in the ordinary course of business and not material to our results of operations, financial condition, or cash flows.

The following table summarizes our contractual obligations by fiscal year at January 31, 2015.

	Total	2015	2016-2017	2018-2019	2020 and beyond
Long-term debt obligations	\$ 1,850.0	\$	\$ 136.5	\$ 451.0	\$ 1,262.5
Interest payments	489.7	21.5	169.0	157.1	142.1
Operating lease obligations	93.4	5.7	40.1	30.5	17.1
Purchase obligations	990.8	421.2	569.6		
Other liabilities	215.8	10.1	15.3	15.0	175.4
Total	\$ 3,639.7	\$ 458.5	\$ 930.5	\$ 653.6	\$ 1,597.1

Long-term debt obligations and interest payments in the above table exclude the impact of any interest rate swaps, offering discounts, or make-whole payments. Purchase obligations include agreements that are enforceable and legally bind us to purchase goods or services. Included in this category are certain obligations related to normal, ongoing purchase obligations in which we have guaranteed payment to ensure availability of raw materials and packaging supplies. We expect to receive consideration for these purchase obligations in the form of materials. These purchase obligations do not represent the entire anticipated purchases in the future, but represent only those items for which we are contractually obligated. Other liabilities in the above table mainly consist of projected commitments associated with our defined benefit pension plans and other postretirement benefits. The table excludes the liability for unrecognized tax benefits and tax-related net interest and penalties of approximately \$34.7 under Financial Accounting Standards Board Accounting Standards Codification 740, *Income Taxes*, since we are unable to reasonably estimate the timing of cash settlements with the respective taxing authorities.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are exposed to market risk related to changes in interest rates, foreign currency exchange rates, and commodity prices.

Interest Rate Risk: The fair value of our cash and cash equivalents at January 31, 2015, approximates carrying value. Exposure to interest rate risk on our long-term debt is mitigated due to fixed-rate maturities.

We utilize derivative instruments to manage changes in the fair value of our debt. Interest rate swaps mitigate the risk associated with the underlying hedged item. At the inception of the contract, the instrument is evaluated and documented for hedge accounting treatment. If the contract is designated as a cash flow hedge, the mark-to-market gains or losses on the swap are deferred and included as a component of accumulated other comprehensive loss to the extent effective, and reclassified to interest expense in the period during which the hedged transaction affects earnings. If the contract is designated as a fair value hedge, the swap would be recognized at fair value on the balance sheet, and changes in the fair value would be recognized in interest expense. Generally, changes in the fair value of the

derivative are equal to changes in the fair value of the underlying debt and have no net impact on earnings. We entered into an interest rate swap during 2014, designated as a fair value hedge, on a portion of fixed-rate Senior Notes in an effort to achieve a mix of variable- versus fixed-rate debt under favorable market conditions. On January 16, 2015, we terminated this interest rate swap agreement prior to maturity. As a result of the early termination, we received \$58.1 in cash, which included \$4.6 of accrued and prepaid interest and a \$53.5 benefit that is deferred as a component of the carrying value of the long term debt and will be recognized ratably as a reduction to future interest expense over the remaining life of the related debt. At January 31, 2015 the remaining benefit of \$53.1 was recorded as an increase in the long-term debt balance.

Table of Contents

Based on our overall interest rate exposure as of and during the three and nine months ended January 31, 2015, including derivatives and other instruments sensitive to interest rates, a hypothetical 10 percent movement in interest rates would not materially affect our results of operations. In measuring interest rate risk by the amount of net change in the fair value of our financial liabilities, a hypothetical 1 percent decrease in interest rates at January 31, 2015, would increase the fair value of our long-term debt by \$79.5.

Foreign Currency Exchange Risk: We have operations outside the U.S. with foreign currency denominated assets and liabilities, primarily denominated in Canadian currency. Because we have foreign currency denominated assets and liabilities, financial exposure may result, primarily from the timing of transactions and the movement of exchange rates. The foreign currency balance sheet exposures as of January 31, 2015, are not expected to result in a significant impact on future earnings or cash flows.

We utilize foreign currency exchange forwards and options contracts to manage the price volatility of foreign currency exchange fluctuations on future cash payments in Canada, primarily related to purchases of certain raw materials and finished goods. The contracts generally have maturities of less than one year. Effective May 1, 2014, we elected to no longer qualify instruments used to manage foreign currency exchange exposures for hedge accounting treatment. Therefore, the gains and losses on all foreign currency forwards and options contracts are immediately recognized in cost of products sold. Based on our hedged foreign currency positions as of January 31, 2015, a hypothetical 10 percent change in exchange rates would result in a \$12.3 loss of fair value.

Revenues from customers outside the U.S., subject to foreign currency exchange, represented 8 percent of net sales during the nine-month period ended January 31, 2015. Thus, certain revenues and expenses have been, and are expected to be, subject to the effect of foreign currency fluctuations, and these fluctuations may have an impact on operating results.

Commodity Price Risk: We use certain raw materials and other commodities that are subject to price volatility caused by supply and demand conditions, political and economic variables, weather, investor speculation, and other unpredictable factors. To manage the volatility related to anticipated commodity purchases, we use futures and options with maturities of generally less than one year. Effective May 1, 2014, we elected to no longer qualify commodity derivatives for hedge accounting treatment. As a result, the gains and losses on all commodity derivatives are immediately recognized in cost of products sold.

The following sensitivity analysis presents our potential loss of fair value resulting from a hypothetical 10 percent change in market prices related to commodities.

	January 31, 2015	April 30, 2014
High	\$ 22.8	\$ 22.7
Low	4.6	5.7
Average	13.5	11.9

The estimated fair value was determined using quoted market prices and was based on our net derivative position by commodity for the previous four quarters. The calculations are not intended to represent actual losses in fair value that we expect to incur. In practice, as markets move, we actively manage our risk and adjust hedging strategies as appropriate. The commodities hedged have a high inverse correlation to price changes of the derivative commodity instrument; thus, we would expect that any gain or loss in the estimated fair value of its derivatives would generally be offset by an increase or decrease in the estimated fair value of the underlying exposures.

These risks and uncertainties include, but are not limited to, the following:

volatility of commodity markets from which raw materials, particularly green coffee beans, peanuts, soybean oil, wheat, milk, corn, and sugar, are procured and the related impact on costs;

risks associated with derivative and purchasing strategies we employ to manage commodity pricing risks, including the risk that such strategies could result in significant losses and adversely impact our liquidity;

crude oil price trends and their impact on transportation, energy, and packaging costs;

the availability of reliable transportation, which may be affected by the cost of fuel, regulations affecting the industry, labor shortages, service failures by third-party service providers, accidents, or natural disasters, on acceptable terms;

our ability to successfully implement and realize the full benefit of price changes that are intended to ultimately fully recover cost, including the competitive, retailer, and consumer response, and the impact of the timing of the price changes to profits and cash flow in a particular period;

the success and cost of introducing new products and the competitive response;

the success and cost of marketing and sales programs and strategies intended to promote growth in our businesses;

general competitive activity in the market, including competitors pricing practices and promotional spending levels;

the impact of food security concerns involving either our products or our competitors' products;

the impact of accidents, extreme weather, and natural disasters, including crop failures and storm damage;

the concentration of certain of our businesses with key customers and suppliers, including single-source suppliers of certain key raw materials, such as packaging for our *Folgers* coffee products, and finished goods, such as *K-Cup*[®] packs, and the ability to manage and maintain key relationships;

the loss of significant customers, a substantial reduction in orders from these customers, or the bankruptcy of any such customer;

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures. Our management, including our principal executive officer and principal financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of January 31, 2015 (the Evaluation Date). Based on that evaluation, our principal executive officer and principal financial officer have concluded that, as of the Evaluation Date, our disclosure controls and procedures were effective in ensuring that information required to be disclosed in reports that we file or submit under the Exchange Act is (1) recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and (2) accumulated and communicated to management, including the chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Controls. There were no changes in our internal control over financial reporting that occurred during the quarter ended January 31, 2015, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1A. Risk Factors.

Our business, operations, and financial condition are subject to various risks and uncertainties. The risk factors described in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended April 30, 2014, should be carefully considered, together with the other information contained or incorporated by reference in this Quarterly Report on Form 10-Q and in our other filings with the Securities and Exchange Commission, in connection with evaluating the Company, our business, and the forward-looking statements contained in this Quarterly Report. Additional risks and uncertainties not presently known to us or that we currently deem immaterial also may affect us. The occurrence of any of these known or unknown risks could have a material adverse impact on our business, financial condition, and results of operations.
