**Summary financial and operating data**

The following table sets forth our summary financial and operating data as of and for the years ended December 31, 2014, 2015 and 2016 and as of June 30, 2017 and for the six months ended June 30, 2016 and 2017. This financial data was derived from our audited consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2016 and from our unaudited consolidated financial statements and related notes included in our Quarterly Report on Form 10-Q for the six months ended June 30, 2017. The financial data set forth below should be read in conjunction with those consolidated financial statements and the notes thereto, which are incorporated by reference into this prospectus supplement and the accompanying base prospectus and have been filed with the SEC. The other data and operating statistics have been derived from our financial records.

We believe that investors benefit from having access to the same financial measures utilized by management. In the following tables, we present the financial measure of distributable cash flow, which is not prepared in accordance with generally accepted accounting principles ( GAAP ). Our partnership agreement requires that all of our available cash, less amounts reserved by our general partner's board of directors, be distributed to our limited partners on a quarterly basis. Management uses distributable cash flow to determine the amount of cash our operations generated that is available for distribution to our limited partners (before any reserves established by our general partner's board of directors) and for recommending to our general partner's board of directors the amount of cash distributions to be paid each period. We also use distributable cash flow as the basis for calculating our equity-based incentive pay. A reconciliation of distributable cash flow to net income, the nearest comparable GAAP measure, is included in the following tables.

In addition to distributable cash flow, the non-GAAP measures of operating margin (in the aggregate and by segment) and adjusted EBITDA are presented in the following tables. We compute the components of operating margin and adjusted EBITDA using amounts that are determined in accordance with GAAP. Reconciliations of operating margin to operating profit and adjusted EBITDA to net income, which are the nearest comparable GAAP financial measures, are included in the following tables. Reconciliations of segment operating margin to segment operating profit are included in our Annual Report on Form 10-K for the year ended December 31, 2016 and our Quarterly Report on Form 10-Q for the period ended June 30, 2017. Operating margin is an important measure of the economic performance of our core operations. Operating profit, alternatively, includes depreciation and amortization expense and general and administrative expense that management does not consider when evaluating the core profitability of an operation. Adjusted EBITDA is an important measure utilized by management and the investment community to assess the financial results of an entity.

**Table of Contents**

Since the non-GAAP measures presented here include adjustments specific to us, they may not be comparable to similarly-titled measures of other companies.
