senior in right of payment to indebtedness of the Issuer and the Guarantor, respectively, that is expressly subordinated in right of payment to the Notes or the guarantees, as applicable;

equal in right of payment to unsecured indebtedness of the Issuer and the Guarantor, respectively, that is not so subordinated; and

effectively junior in right of payment to secured indebtedness of the Issuer and the Guarantor, respectively, to the extent of the value of the assets securing such indebtedness, including the obligations under (i) the Guarantor's \$325.0 million aggregate principal amount of 5.625% senior secured notes due 2024, and (ii) the Guarantor's revolving credit facility of \$794.6 million (the Revolving Credit Facility), of which \$363.0 million was outstanding as of March 31, 2018, and the Guarantor's term loan facility of which \$203.7 million was outstanding as of March 31, 2018 (the Term Loan Facility, and, together with the Revolving Credit Facility, the Senior Secured Credit Facilities), and an accordion feature that allows the Guarantor to increase the Senior Secured Credit Facilities by an additional \$250.0 million, of which approximately \$150.3 million has been exercised as of March 31, 2018.

The following table sets forth the number of additional shares, if any, to be added to the exchange rate per \$1,000 principal amount of Notes for exchanges in connection with a make-whole fundamental change, for each stock price and effective date set forth below:

The exact stock prices and effective dates may not be set forth in the table above, in which case:

if the stock price is between two stock prices in the table or the effective date is between two effective dates in the table, the number of additional shares will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock prices and the earlier and later effective dates, as applicable, based on a 365- or 366-day year, as applicable;

if the stock price is greater than \$200.00 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the table above, as described in the Preliminary Prospectus Supplement), no additional shares will be added to the exchange rate; and

if the stock price is less than \$35.70 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the table above, as described in the Preliminary Prospectus Supplement), no additional shares will be added to the exchange rate.

Notwithstanding the foregoing, in no event will the exchange rate per \$1,000 principal amount of Notes exceed 28.0111 shares, subject to adjustment in the same manner as the exchange rate pursuant to the provisions described in the Preliminary Prospectus Supplement under the caption Description of Notes Exchange Rights Exchange Rate Adjustments.
