**Address: 4th floor, HDFC Bank House, Senapati Bapat Marg, Lower Parel, Mumbai 400 013, India.**

(Name, telephone, e-mail and/or facsimile number and address of company contact person)

**Securities registered or to be registered pursuant to Section 12(b) of the Act:**

<b>Title of each class</b>	<b>Name of each exchange on which registered</b>
<b>American Depositary Shares, each representing three</b>	<b>The New York Stock Exchange</b>

**Equity Shares, Par value Rs. 2.0 per share**

**Securities registered or to be registered pursuant to Section 12(g) of the Act: Not Applicable**

**Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: Not Applicable**

Edgar Filing: HDFC BANK LTD - Form 20-F

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report:

**Equity Shares, as of March 31, 2018**      **2,595,090,267**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.    Yes      No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.    Yes      No

Note: Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.    Yes      No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).    Yes      No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or an emerging growth company. See definition of "large accelerated filer," "accelerated filer" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer      Accelerated filer      Non-accelerated filer      Emerging growth company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

The term "new or revised financial accounting standard" refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP      International Financial Reporting Standards as issued      Other

by the International Accounting Standards Board

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow:    Item 17      Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).    Yes      No

**Table of Contents****EXCHANGE RATES AND CERTAIN DEFINED TERMS**

In this document, all references to we , us , our , HDFC Bank or the Bank shall mean HDFC Bank Limited or where the context requires also to its subsidiaries whose financials are consolidated for accounting purposes. References to the U.S. or United States are to the United States of America, its territories and its possessions. References to India are to the Republic of India. References to the Companies Act in the document mean the Companies Act, 1956 (to the extent such enactment remains in force) and the Companies Act, 2013 (to the extent notified as of the date of this report) and all rules and regulations issued thereunder. References to \$ or US\$ or dollars or U.S. dollars are to the legal currency of the United States and references to Rs. , INR , rupees or Indian rupees are to the legal currency of India.

Our financial statements are presented in Indian rupees and in some cases translated into U.S. dollars. The financial statements and all other financial data included in this report, except as otherwise noted, are prepared in accordance with United States generally accepted accounting principles, or U.S. GAAP. U.S. GAAP differs in certain material respects from accounting principles generally accepted in India, the requirements of India's Banking Regulation Act and related regulations issued by the Reserve Bank of India ( RBI ) (collectively, Indian GAAP ), which form the basis of our statutory general purpose financial statements in India. Principal differences applicable to our business include: determination of the allowance for credit losses, classification and valuation of investments, accounting for deferred income taxes, stock-based compensation, employee benefits, loan origination fees, derivative financial instruments, business combinations and the presentation format and disclosures of the financial statements and related notes. References to a particular fiscal are to our fiscal year ended March 31 of such year.

Fluctuations in the exchange rate between the Indian rupee and the U.S. dollar will affect the U.S. dollar equivalent of the Indian rupee price of the equity shares on the Indian stock exchanges and, as a result, will affect the market price of our American Depositary Shares ( ADSs ) in the United States. These fluctuations will also affect the conversion into U.S. dollars by the depositary of any cash dividends paid in Indian rupees on the equity shares represented by ADSs.

During fiscal 2014, the rupee came under significant and sustained selling pressure driven by growing anxiety about domestic growth prospects and global risk aversion. The rupee depreciated in fiscal 2014 by 10.1% compared to the U.S. dollar. Investor expectations that reforms implemented by the Government of India (the Government ) will lead to an improvement in the long-term growth outlook helped to improve the rupee's performance, reducing the depreciation trend to 3.85% in fiscal 2015. During fiscal 2016, the rupee depreciated by 6.32% primarily reflecting global risk aversion and a strong U.S. dollar. However, in line with other emerging markets, which experienced currency appreciation in fiscal 2017, the Indian rupee also appreciated by 2.1% against the U.S. dollar. This was mainly attributed to repricing of the Indian assets by international investors (driven by domestic economic and political stability) alongside the disappointment relating to the U.S. reform agenda. In fiscal 2018, the rupee ranged between a high of Rs. 65.71 per US\$ 1.00 and a low of Rs. 63.38 per US\$ 1.00. Pressure developed in the last two quarters of fiscal 2018 as oil prices rose and trade war risks escalated globally. In the first quarter of fiscal 2019, the rupee depreciated by 5.1% against the U.S. dollar. Rising oil prices and consequently marginal deterioration of India's current account deficit, ( CAD ), slowdown in global trade volumes and a general risk aversion towards emerging market currencies (because of tariffs and trade war risks) have all affected the rupee negatively so far this fiscal year.

The following table sets forth, for the periods indicated, information concerning the exchange rates between Indian rupees and U.S. dollars based on the noon buying rate in the city of New York for cable transfers of Indian rupees as certified for customs purposes by the Federal Reserve Bank of New York:

<b>Fiscal Year</b>	<b>Period End<sup>(1)</sup></b>	<b>Average<sup>(1)(2)</sup></b>	<b>High</b>	<b>Low</b>
2014	60.00	60.35	68.80	53.65
2015	62.31	61.11	63.67	58.30
2016	66.25	65.39	68.84	61.99
2017	64.85	67.01	68.86	64.85
2018	65.11	64.46	65.71	63.38

- (1) The noon buying rate at each period end and the average rate for each period differed from the exchange rates used in the preparation of our financial statements.
- (2) Represents the average of the noon buying rate for all days during the period.

**Table of Contents**

The following table sets forth the high and low noon buying rate for the Indian rupee for each of the previous six months:

<b>Month</b>	<b>Period End</b>	<b>Average</b>	<b>High</b>	<b>Low</b>
January 2018	63.58	63.65	64.01	63.38
February 2018	65.20	64.43	65.20	63.93
March 2018	65.11	65.05	65.24	64.83
April 2018	66.50	65.67	66.92	64.92
May 2018	67.40	67.51	68.38	66.52
June 2018	68.46	67.79	68.81	66.87

Although we have translated selected Indian rupee amounts in this document into U.S. dollars for convenience, this does not mean that the Indian rupee amounts referred to could have been, or could be, converted to U.S. dollars at any particular rate, the rates stated above, or at all. Unless otherwise stated, all translations from Indian rupees to U.S. dollars are based on the noon buying rate in the City of New York for cable transfers in Indian rupees at US\$ 1.00 = Rs. 65.11 on March 30, 2018. The Federal Reserve Bank of New York certifies this rate for customs purposes on each date the rate is given. The noon buying rate on July 20, 2018 was Rs. 64.38 per US\$ 1.00.

**Table of Contents**

**FORWARD-LOOKING STATEMENTS**

We have included statements in this report which contain words or phrases such as will, aim, will likely result, believe, expect, will continue, anticipate, estimate, intend, plan, contemplate, seek to, future, should, will pursue and similar expressions or variations of these expressions, that are forward-looking statements. Actual results may differ materially from those suggested by the forward-looking statements due to certain risks or uncertainties associated with our expectations with respect to, but not limited to, our ability to implement our strategy successfully, the market acceptance of and demand for various banking services, future levels of our non-performing loans, our growth and expansion, the adequacy of our allowance for credit and investment losses, technological changes, volatility in investment income, our ability to market new products, cash flow projections, the outcome of any legal, tax or regulatory proceedings in India and in other jurisdictions we are or become a party to, the future impact of new accounting standards, our ability to pay dividends, the impact of changes in banking regulations and other regulatory changes on us in India and other jurisdictions, our ability to roll over our short-term funding sources and our exposure to market and operational risks. By their nature, certain of the market risk disclosures are only estimates and could be materially different from what may actually occur in the future. As a result, actual future gains, losses or impact on net income could materially differ from those that have been estimated.

In addition, other factors that could cause actual results to differ materially from those estimated by the forward-looking statements contained in this document include, but are not limited to: general economic and political conditions, instability or uncertainty in India and the other countries which have an impact on our business activities or investments caused by any factor, including terrorist attacks in India, the United States or elsewhere, anti-terrorist or other attacks by the United States, a United States-led coalition or any other country, tensions between India and Pakistan related to the Kashmir region or between India and China, military armament or social unrest in any part of India; the monetary and interest rate policies of the Government of India, natural calamities, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices; the performance of the financial markets in India and globally, changes in Indian and foreign laws and regulations, including tax, accounting and banking regulations, changes in competition and the pricing environment in India, and regional or general changes in asset valuations. For further discussion on the factors that could cause actual results to differ, see *Risk Factors*.

**Table of Contents****BUSINESS****Overview**

We are a new generation private sector bank in India. Our goal is to be the preferred provider of financial services to our customers in India across metro, urban, semi-urban and rural markets. Our strategy is to provide a comprehensive range of financial products and services to our customers through multiple distribution channels, with what we believe are high quality services, advanced technology platforms and superior execution.

We have three principal business activities: retail banking, wholesale banking and treasury operations. Our retail banking products include deposit products, loans, credit cards, debit cards, third-party mutual funds and insurance products, investment advice, bill payment services, loans to small and medium enterprises and other services. On the wholesale banking front, we offer customers a range of financing products, such as documentary credits and bank guarantees, foreign exchange and derivative products, investment banking services and corporate deposit products. We offer a range of deposit and transaction banking services, such as cash management, custodial and clearing bank services and correspondent banking. Our treasury operations manage our balance sheet, and include customer driven services such as advisory services related to foreign exchange and derivative transactions for corporate and institutional customers, supplemented by proprietary trading, including Indian Government securities. Further, our non-banking finance company ( NBFC ) subsidiary HDB Financial Services Limited ( HDBFSL ), offers loan and asset finance products including tractor loans, consumer loans and gold loans, as well as a range of business process outsourcing solutions. We provide our customers brokerage accounts through our subsidiary HDFC Securities Limited ( HSL ).

Our financial conditions and results of operation are affected by general economic conditions prevailing in India. The Indian economy is one of the largest economies in the world with a gross domestic product ( GDP ) at current market prices of an estimated Rs. 152.5 trillion for fiscal 2017 and an estimated Rs. 167.5 trillion for fiscal 2018. In recent years, India has become a popular destination for foreign direct investment ( FDI ), owing to its well-developed private corporate sector, large consumer market potential, large pool of well-educated and English speaking workers and well established legal systems. Overall, India attracted FDI (including reinvested earnings) of approximately US\$ 60.1 billion in fiscal 2017 and US\$ 55.6 billion in fiscal 2016 as compared to an average of US\$ 23.1 billion from fiscal 2001 through fiscal 2013. From April through September 2017, FDI equity inflows of US\$ 25.35 billion were received, representing a 17% increase over the same period in fiscal 2017. One measure of India's progress has been the upward trend in ease of doing business rankings, a measure published annually by the World Bank. In 2017, India jumped 30 places to the 100th spot and was ranked as one of the top 10 improvers year-over-year.

Although GDP grew at a slightly slower pace in fiscal 2017 than fiscal 2016 (with GDP growth of 7.1% compared to 8.2%), private final consumption grew at 7.3% for fiscal 2017. In the first quarter of fiscal 2018 GDP growth slowed down to a 13-quarter low at 5.6%, sharply lower than last year's 8.1% expansion in the same quarter. GDP growth bounced back to 6.3% in the second quarter of fiscal 2018 after declining for the last five quarters, and has further been pegged at 7.0% for the third quarter of fiscal 2018, and 7.7% for the fourth quarter of fiscal 2018. While many economic indicators suggest a revival is underway, we believe that the improvement going forward may only be gradual, undermined by structural problems such as weak private consumption and low capacity utilization.

On the other hand, inflation also moderated during fiscal 2017, with the average level of Consumer Price Inflation ( CPI ) declining to 4.5% in fiscal 2017 from 4.9% in fiscal 2016. CPI in fiscal 2018 was 3.6% on average. In line with market expectations, the RBI, in its monetary policy announcements on February 7 and April 5, 2018 kept rates unchanged, in February also announcing the linking of the base rate to the Marginal Cost of Funds based Lending Rate ( MCLR ) with effect from April 1, 2018.

Notwithstanding some positive reversal in private investment growth over the course of fiscal 2018 (rising to 14.4% in the fourth quarter from 9.1%, 6.1% and 0.8% in the third, second and first quarter of fiscal 2018, respectively), we believe incremental pick up in private capital expenditures is likely to be sector and sub-sector specific and very gradual. In contrast to these positive signs seen in private capital expenditure, there has been a continued slowdown in private consumption growth up to the fourth quarter of fiscal 2018, during which growth picked up slightly to 6.7% from 5.9% in the third quarter. Previously, private consumption had declined to 6.8% in the second and 6.9% in the first quarter of fiscal 2018 from 9.3% in the third quarter of fiscal 2017.

Global growth is expected to pick up in 2018, with the International Monetary Fund ( IMF ) projecting 2018 GDP growth of 3.7% compared to 3.2% registered in 2016, which we believe means external demand is more likely to support growth going forward. The IMF has forecasted India GDP growth of 7.4% and 7.9% for 2018 and 2019.

## **Table of Contents**

We are constantly working to develop new technology and improve the digital aspects of our business. For example, we have recently invested in a digital banking platform, Backbase, to give a single unified omni-channel experience to our customers for mobility banking, online banking, the public website and payments. We have implemented mobile data based networking options in semi-urban and rural areas where telecom infrastructure and data connectivity are weak, and other recent technological developments include mobile banking applications, person-to-person smartphone payment solutions, secure payment systems and a virtual relationship manager for high net worth customers.

We have grown rapidly since commencing operations in January 1995. As of March 31, 2018, we had 4,787 branches, 12,635 ATMs in 2,691 cities and towns and 43.6 million customers. On account of the expansion in our geographical reach and the resultant increase in market penetration, our assets have grown from Rs. 9,067.0 billion as of March 31, 2017 to Rs. 11,367.3 billion as of March 31, 2018. Our net income has increased from Rs. 140.5 billion for fiscal 2017 to Rs. 178.5 billion for fiscal 2018. Our loans and deposits as of March 31, 2018 were at Rs. 7,263.7 billion and Rs. 7,883.8 billion respectively. Across business cycles, we believe we have maintained a strong balance sheet and a low cost of funds. As of March 31, 2018, gross non-performing customer assets as a percentage of gross customer assets was 1.41%, while net non-performing customer assets constituted 0.61% of net customer assets. In addition, our net customer assets represented 96.2% of our deposits and our deposits represented 69.4% of our total liabilities and shareholders' equity. The average non-interest bearing current accounts and low-interest bearing savings accounts represented 42.2% of total deposits as of March 31, 2018. These low-cost deposits and the cash float associated with our transactional services led to an average cost of funds (including equity) of 4.4% for fiscal 2018. We had a return on equity (net income as a percentage of average total shareholders' equity) of 16.5% for fiscal 2018 and 14.9% for fiscal 2017, and at March 31, 2018 had a total capital adequacy ratio (calculated pursuant to RBI guidelines) of 14.82%. Our Common Equity Tier I ( CET-I ) ratio was 12.25% as at March 31, 2018.

## **About Our Bank**

HDFC Bank was incorporated in August 1994 and commenced operations as a scheduled commercial bank in January 1995. In 2000, we merged with Times Bank Limited and, in 2008, we acquired Centurion Bank of Punjab Limited ( CBoP ). We are part of the HDFC Group of companies established by our principal shareholder, Housing Development Finance Corporation Limited ( HDFC Limited ), a listed public limited company established under the laws of India. HDFC Limited is primarily engaged in financial services, including mortgages, property-related lending and deposit services. The subsidiaries and associated companies of HDFC Limited are also largely engaged in a range of financial services, including asset management, life insurance and general insurance. HDFC Limited and its subsidiaries (together, HDFC Group ) owned 20.93% of our outstanding equity shares as of March 31, 2018 and our Chairperson and Managing Director are nominated by HDFC Limited and appointed with the approval of our shareholders and the RBI. See also Principal Shareholders . We have no agreements with HDFC Limited or any of its group companies that restrict us from competing with them or that restrict HDFC Limited or any of its group companies from competing with our business. We currently distribute products of HDFC Limited and its group companies, such as home loans of HDFC Limited, life and general insurance products of HDFC Standard Life Insurance Company Limited and HDFC ERGO General Insurance Company Limited, respectively, and mutual funds of HDFC Asset Management Company Limited.

We have two subsidiaries: HDBFSL and HSL. HDBFSL is a non-deposit taking NBFC engaged primarily in the business of retail asset financing. HDBFSL's total assets and shareholders' equity as of March 31, 2018 were Rs. 447.5 billion and Rs. 62.0 billion, respectively. HDBFSL's net income was Rs. 9.5 billion for fiscal 2018. As of March 31, 2018, HDBFSL had 1,165 branches across 831 cities in India. HSL is primarily in the business of providing brokerage and other investment services through the internet and other channels. HSL's total assets and shareholders' equity as of March 31, 2018 were Rs. 16.4 billion and Rs. 10.0 billion, respectively. HSL's net income was Rs. 3.4 billion for fiscal 2018. On December 1, 2016, Atlas Documentary Facilitators Company Private Ltd. which

provided back office transaction processing services to us, and its subsidiary HBL Global Private Ltd. which provided direct sales support for certain products of the Bank, amalgamated with HDBFSL.

Our principal corporate and registered office is located at HDFC Bank House, Senapati Bapat Marg, Lower Parel, Mumbai 400 013, India. Our telephone number is 91-22-6652-1000. Our agent in the United States for the 2001, 2005, 2007 and 2015 ADS offerings is Depositary Management Corporation, 570 Lexington Avenue, New York, NY 10022.

---

**Table of Contents**
**Our Competitive Strengths**

We attribute our growth and continuing success to the following competitive strengths:

***We have a strong brand and extensive reach through a large distribution network***

At HDFC Bank, we are focused on understanding our customers' financial needs and providing them with relevant banking solutions. We are driven by our core values - customer focus, operational excellence, product leadership, sustainability and people. This has helped us grow and achieve our status as one of the largest private sector banks in India, while delivering value to our customers, stakeholders, employees and our community. HDFC Bank is one of the most trusted and preferred bank brands in India. We have been acknowledged as India's Most Valuable Brand by BrandZ for the fourth consecutive year and were named the Best Domestic Bank - India by the Asiamoney India Banking Awards in 2017. We have capitalized on our strong brand by establishing an extensive branch network throughout India serving a broad range of customers in urban, semi-urban and rural regions. As of March 31, 2018, we had 4,787 branches and 12,635 ATMs in 2,691 cities and towns and over 43.6 million customers, and of our total branches, 53% were in the semi-urban and rural areas. Our branch network is further complemented by our digital strategy, including online and mobile banking solutions, to provide our customers with access to on-demand banking services, which we believe allows us to develop strong and loyal relationships with our customers. We are leveraging new technology to offer all banking solutions through the digital platform, which can be accessed by customers across devices of their choice.

***We provide a wide range of products and high quality service to our clients in order to meet their banking needs***

Whether in retail banking, wholesale banking or treasury operations, we consider ourselves a one-stop shop for our customers' banking needs. We consider our high quality service offerings to be a vital component of our business and believe in pursuing excellence in execution through multiple internal initiatives focused on continuous improvement. This pursuit of high quality service and operational execution directly supports our ability to offer a wide range of banking products.

Our retail banking products include deposit products, retail loans (such as vehicle and personal loans), and other products and services, such as private banking, depositary accounts, brokerage services, foreign exchange services, distribution of third party products (such as insurance and mutual funds), bill payments and sales of gold and silver bullion. In addition, we are the largest credit card issuer in India with 10.7 million cards outstanding as of March 31, 2018, and the second largest card issuer (across both debit and credit cards) amongst private sector banks in India, with 35.0 million total cards outstanding as of March 31, 2018. On the wholesale banking side, we offer customers working capital loans, term loans, bill collections, letters of credit, guarantees, foreign exchange and derivative products and investment banking services. We also offer a range of deposit and transaction banking services such as cash management, custodial and clearing bank services and correspondent banking. We believe our large scale and low cost of funding enable us to pursue high-quality wholesale financing opportunities competitively and at an advantage compared to our peers. We collect taxes for the Government and are bankers to companies in respect of issuances of equity shares and bonds to the public. Our NBFC subsidiary HDBFSL offers loan and asset finance products including tractor loans, consumer loans and gold loans, as well as business process outsourcing solutions such as forms processing, documents verification and back-office services.

We are able to provide this wide range of products across our branch network, meaning we can provide our targeted rural customers with banking products and services similar to those provided to our urban customers, which we believe gives us a competitive advantage. Our wide range of products and focus on superior service and execution also create multiple cross-selling opportunities for us and, we believe, promote customer retention.

***We have achieved robust and consistent financial performance while maintaining a healthy asset quality during our growth***

On account of our superior operational execution, broad range of products, expansion in our geographical reach and the resulting increase in market penetration through our extensive branch network, our assets have grown from Rs. 9,067.0 billion as of March 31, 2017 to Rs. 11,367.3 billion as of March 31, 2018. Our net interest margin was 4.6% in fiscal 2017 and 4.7% in fiscal 2018. Our current and savings account deposits as a percentage of our total deposits were 43.5% as of March 31, 2018, and we believe this strong current and savings account profile has enabled us to tap into a low cost funding base. In addition to the significant growth in our assets and net revenue, we remain focused on maintaining a healthy asset quality. We continue to have low levels of non-performing customer assets as compared to the average levels in the Indian banking industry. Our gross non-performing customer assets as a percentage of total customer assets was 1.41% as of March 31, 2018 and our net non-performing customer assets was 0.61% of net customer assets as of March 31, 2018. Our net income has increased from Rs. 140.5 billion for fiscal 2017 to Rs. 178.5 billion for fiscal 2018. Net income as a percentage of average total shareholders' equity was 14.9% in fiscal 2017 and 16.5% in fiscal 2018 and net income as a percentage of average total assets was 1.7% in fiscal 2017 and 1.9% in fiscal 2018. We believe the combination of strong net income growth, robust deposit-taking, a low cost of funds and prudent risk management has enabled us to generate attractive returns on capital.

---

**Table of Contents**
***We have an advanced technology platform***

We continue to make substantial investments in our advanced technology platform and systems and expand our electronically linked branch network. We have implemented mobile data based networking options in semi-urban and rural areas where telecom infrastructure and data connectivity are weak. These networks have enabled us to improve our core banking services in such areas and provide a link between our branches and data centers.

Our aim has always been to improve customer experience through digital innovation as an *Experiential Leader* and we are constantly working to develop new technology and improve the digital aspects of our business. We have recently invested in a digital banking platform, Backbase, to give a single unified omni-channel experience to our customers for mobility banking, online banking, the public website and payments. The first phase of our mobile banking app has been rolled out to consumers, while our forward outlook and initiatives taken in in artificial intelligence-led conversational banking have helped us introduce information, assistance and commerce chatbots. Furthermore, with the pilot launch of *IRA* (Intelligent Robotic Assistant), an interactive humanoid placed in a branch to help in servicing, we set a benchmark for what we believe to be a best in class digital experience for customers. Other recent major technological developments include *LITE App* (a bilingual mobile banking application that does not require an internet connection); *Missed Call Recharge* to top-up prepaid mobile phone minutes; a person-to-person smartphone payment solution called *Chillr*; *PayZapp with SmartBuy*, a payment system to improve the Bank's e-commerce processing capabilities; and the creation of a virtual relationship manager for high net worth customers. We have also rolled out product innovations like pre-approved personal loans for salaried accounts granted in as little as 10 seconds and *Digital Loan Against Securities (LAS)* in under three minutes in three easy steps.

We have a dedicated digital innovation team to research and experiment with technology, which hosts a *Digital Innovation Summit* annually to attract new talent and business opportunities from the financial technology space. In addition, we have developed robust data analytic capabilities that allow us to cross-sell our products to customers through both traditional relationship management and interactive, on-demand methods depending on how customers choose to interact with us. We believe that our direct banking platforms are stable and robust, enabling new ways to connect with our customers to cross-sell various products and improve customer retention.

We believe the increased availability of internet access and broadband connectivity across India requires a comprehensive digital strategy to proactively develop new methods of connecting with customers. We are in the process of putting in place advance models of these methods that we term *BBC* (*Biometrics BlockChain*) in a *BBC Initiative*, together with conversational banking which is already in place (for example, our service *Missed Call Commerce and Conversational Banking (MCCB)*). We believe the *BBC Initiative*, which is most relevant for our connected customers, can help protect customer identity and establish authenticity (*Biometrics*) and promote secure and efficient interactions between customers and us (*Blockchain*), with an improved customer experience coming through artificial intelligence initiatives (*Conversational Banking*). For our customers with intermittent, limited or even no connectivity, or customers with evolving digital needs or preferences, we have introduced the *MCCB* service model and *HDFC Bank LITE Banking* (multilingual). We are continuously striving to improve our customers' banking experience, offering them a range of products tailored to their financial needs and making it easier for them to access and transact their banking accounts with the Bank.

In recent years we have been honored for our commitment to technology, including the *Cisco-CNBC TV 18 Digitizing India Award* for Innovations in the Financial Industry and Digital Banking, the *IBA Banking Technology Award* for Best Bank- IT Risk and Cyber Security Initiatives in 2017 the *Best Bank Banking Technology Excellence Award* from *IDRBT Banking Technology* and the *Businessworld Digital Leadership Award 2017* for Best Analytics Implementation. We believe our *Experiential Leadership* strategy and culture of innovation and development will be a crucial strength in remaining competitive in the years to come.

***We have an experienced management team***

Many of the members of our management have had a long tenure with us, which gives us a deep bench of experienced managers. They have substantial experience in banking or other industries and share our common vision of excellence in execution. Having a management team with such breadth and depth of experience is well suited to leverage the competitive strengths we have already developed across our large, diverse and growing branch network as well as allowing our management team to focus on creating new opportunities for our business. See also *Management* .

## **Table of Contents**

### **Our Business Strategy**

Our business strategy emphasizes the following elements:

#### ***Increase our market share of India's expanding banking and financial services industry***

In addition to benefiting from the overall growth in India's economy and financial services industry, we believe we can increase our market share by continuing to focus on our competitive strengths, including our strong HDFC Bank brand and our extensive branch and ATM networks, to increase our market penetration. We believe we can expand our market share by focusing on developing our digital offerings to target mass markets across India. We believe digital offerings will position us well to capitalize on growth in India's banking and financial services sector, arising from India's emerging middle class and growing number of bankable households. We believe we can also capture an increased market share by expanding our branch footprint, particularly by focusing on rural and semi-urban areas. As of March 31, 2018, we had 4,787 branches and 12,635 ATMs in 2,691 cities and towns. We believe these areas represent a significant opportunity for our continued growth as we expand banking services to those areas which have traditionally been underserved and which, by entering such markets, will enable us to establish new customer bases. We also believe that delivering banking services which are integrated with our existing business and product groups helps us to provide viable opportunities to the sections of the rural and semi-urban customer base that is consistent with our targeted customer profile throughout India.

#### ***Continue our investments in technology to support our digital strategy***

We believe the increased availability of internet access and broadband connectivity across India requires a comprehensive digital strategy to proactively develop new methods of reaching our customers. As a result, we are continuously investing in technology as a means of improving our customers' banking experience, offering them a range of products tailored to their financial needs and making it easier for them to interact with their banking accounts with us. We believe our culture of innovation and development to be crucial to remaining competitive. As part of our dedication to digitization and technological development, we have appointed a digital innovation team to research, develop and experiment with new technologies. In February 2017, we hosted our Digital Innovation Summit to tap into emerging technological trends and innovations in the financial technology space.

While we currently provide a range of options for customers to access their accounts, including internet banking, telephone banking, and banking applications on mobile devices, we believe additional investments in our technology infrastructure to further develop our digital strategy will allow us to cross-sell a wider range of products on our digital platform in response to our customers' needs and thereby expand our relationship with our customers across a range of customer segments. We believe a comprehensive digital strategy will provide benefits in developing long-term customer relationships by allowing customers to interact with us and access their accounts wherever and whenever they desire.

#### ***Cross-sell our broad financial product portfolio across our customer base***

We are able to offer our complete suite of financial products across our branch network, including in our rural locations. By matching our broad customer base with our ability to offer our complete suite of products to both rural and urban customers across the retail banking, wholesale banking and treasury product lines, we believe that we can continue to generate organic growth by cross-selling different products by proactively offering our customers complementary products as their relationships with us develop and their financial needs grow and evolve.

#### ***Maintain strong asset quality through disciplined credit risk management***

We have maintained high quality loan and investment portfolios through careful targeting of our customer base, and by putting in place what we believe are comprehensive risk assessment processes and diligent risk monitoring and remediation procedures. Our gross non-performing customer assets as a percentage of gross customer assets was 1.41% as of March 31, 2018 and our net non-performing customer assets as a percentage of net customer assets was 0.61% as of March 31, 2018. We believe we can maintain strong asset quality appropriate to the loan portfolio composition while achieving growth.

**Table of Contents*****Maintain a low cost of funds***

We believe we can maintain a relatively low-cost funding base as compared to our competitors, by leveraging our strengths and expanding our base of retail savings and current deposits and increasing the free float generated by transaction services, such as cash management and stock exchange clearing. Our non-interest bearing current and low-interest bearing savings account deposits were 43.5% of our total deposits as of March 31, 2018. Our average cost of funds (including equity) was 4.6% for fiscal 2017 and 4.4% for fiscal 2018.

**Our Principal Business Activities**

Our principal business activities consist of retail banking, wholesale banking and treasury operations. The following table sets forth our net revenues attributable to each area for the last three fiscals:

	2016		Year ended March 31, 2017		2018		
			(in millions, except percentages)				
Retail banking	Rs. 304,223.4	82.7%	Rs. 351,345.6	82.8%	Rs. 414,894.0	US\$ 6,372.2	81.6%
Wholesale banking	48,340.9	13.1%	63,367.2	14.9%	77,623.6	1,192.2	15.3%
Treasury operations	15,099.8	4.2%	9,457.5	2.3%	15,842.2	243.3	3.1%
Net revenue	Rs. 367,664.1	100.0%	Rs. 424,170.3	100.0%	Rs. 508,359.8	US\$ 7,807.7	100.0%

**Retail Banking*****Overview***

We consider ourselves a one-stop shop for the financial needs our customers. We provide a comprehensive range of financial products including deposit products, loans, credit cards, debit cards, third-party mutual funds and insurance products, investment advice, bill payment services and other services. Our retail banking loan products include loans to small and medium enterprises for commercial vehicles, construction equipment and other business purposes. We group these loans as part of our retail banking business considering, among other things, the customer profile, the nature of the product, the differing risks and returns, our organization structure and our internal business reporting mechanism. Such grouping ensures optimum utilization and deployment of specialized resources in our retail banking business. We also have specific products designed for lower income individuals through our Sustainable Livelihood Initiative. Through this initiative, we reach out to the un-banked and under-banked segments of the Indian population in rural areas. We actively market our services through our branches and alternate sales channels, as well as through our relationships with automobile dealers and corporate clients. We follow a multi-channel strategy to reach out to our customers bringing to them choice, convenience and what we believe to be a superior experience. Innovation has been the springboard of growth in this segment and so has a strong focus on analytics and customer relationship management, which we believe has helped us to understand our customers better and offer tailor-made solutions. We further believe that these factors lead to better customer engagement.

As of March 31, 2018, we had 4,787 branches and 12,635 ATMs in 2,691 cities and towns. We also provide telephone, internet and mobile banking to our customers. We plan to continue to expand our branch and ATM network as well as our other distribution channels, subject to regulatory guidelines/approvals.

***Retail Loans and Other Asset Products***

We offer a wide range of retail loans, including loans for the purchase of automobiles, personal loans, retail business banking loans, loans for the purchase of commercial vehicles and construction equipment finance, two-wheeler loans, credit cards and loans against securities. Our retail loans, of which 26.1% were unsecured, made up 70.7% of our gross loans as of March 31, 2018. Apart from our branches, we use our ATMs and the internet to promote our loan products and we employ additional sales methods depending on the type of products. We perform our own credit analysis of the borrowers and the value of the collateral if the loan is secured. See *Risk Management Credit Risk Retail Credit Risk* . We also buy mortgage and other asset-backed securities and invest in retail loan portfolios through assignments. In addition to taking collateral, in most cases, we obtain debit instructions / post-dated checks covering repayments at the time a retail loan is made. It is a criminal offense in India to issue a bad check. Our unsecured personal loans, which are not supported by any collateral, are a greater credit risk for us than our secured loan portfolio. We may be unable to collect in part or at all on an unsecured personal loan in the event of non-payment by the borrower. Accordingly, personal loans are granted at a higher contracted interest rate since they carry a higher credit risk as compared to secured loans. Also see *Risk Factors Our unsecured loan portfolio is not supported by any collateral that could help ensure repayment of the loan, and in the event of non-payment by a borrower of one of these loans, we may be unable to collect the unpaid balance* .

**Table of Contents**

The following table shows the gross book value and share of our retail credit products:

	At March 31, 2018 Value (in millions)		% of Total Value
<b>Retail Assets:</b>			
Auto loans	Rs. 885,234.7	US\$ 13,596.0	16.9%
Personal loans / Credit Cards	1,187,127.1	18,232.6	22.7%
Retail business banking	1,305,219.8	20,046.4	24.9%
Commercial vehicle and construction equipment finance	595,813.6	9,150.9	11.4%
Housing loans	362,718.1	5,570.9	6.9%
Other Retail Loans	877,251.3	13,473.4	16.8%
Total retail loans	5,213,364.6	80,070.2	99.6%
Mortgage-backed securities	84.9	1.3	%
Asset-backed securities	18,670.7	286.8	0.4%
Total retail assets	Rs. 5,232,120.2	US\$ 80,358.3	100.0%

Note: The figures above exclude securitized-out receivables. Mortgaged-backed securities and asset-backed securities are reflected at fair values.

*Auto Loans*

We offer loans at fixed interest rates for financing new and used automobile purchases. In addition to our general marketing efforts for retail loans, we market this product through our relationships with car dealers, direct sales agents, corporate packages and joint promotion programs with automobile manufacturers. We believe that we are a leader in the auto loans segment.

*Personal Loans and Credit Cards*

We offer unsecured personal loans at fixed rates to specific customer segments, including salaried individuals and self-employed professionals. In addition, we offer unsecured personal loans to small businesses and individual businessmen.

We also offer credit cards from the VISA, MasterCard and Diners platforms, including gold, silver, corporate, business, platinum, titanium, signature, world, black, infinite, credit cards under the classification of corporate cards, business cards, co-brand cards, premium retail cards and super premium retail cards. During fiscal 2017, the Bank launched three product variants Regalia First Credit Card, Freedom Credit Card and the Bharat Cashback Credit Card. The launch of Regalia First is to enable the bank to cater to the needs of the rapidly growing super premium customer segment, the Freedom Credit Card caters to the youth segment of the country with an offering that meets their needs and the Bharat Cashback Credit Card caters to customers who had not previously had credit cards. We had approximately 8.5 million and 10.7 million cards outstanding as of March 31, 2017 and March 31, 2018, respectively. We believe that we are a leader in the credit cards segment.

*Retail Business Banking*

We address the borrowing needs of the community of small businessmen primarily located near our bank branches by offering facilities such as credit lines, term loans for expansion or addition of facilities and discounting of receivables. We classify these business banking loans as a retail product. Such lending is typically secured with current assets as well as immovable property and fixed assets in some cases. We also offer letters of credit, guarantees and other basic trade finance products, foreign exchange and cash management services to such businesses.

## **Table of Contents**

### *Commercial Vehicles and Construction Equipment Finance*

We provide secured financing for commercial vehicles and provide working capital, bank guarantees and trade advances to transport operators. In addition to funding domestic assets, we also finance imported assets for which we open foreign letters of credit and offer treasury services, such as forward exchange covers. We coordinate with manufacturers to jointly promote our financing options to their clients. We have a strong market presence in the commercial vehicle financing business.

### *Housing Loans*

We provide home loans through an arrangement with our principal shareholder HDFC Limited. Under this arrangement, we source loans for HDFC Limited through our branches. HDFC Limited approves and disburses the loans, which are kept on their books, and we receive a sourcing fee for these loans. We have an option, but not an obligation, to purchase up to 70% of the fully disbursed home loans sourced under this arrangement through either the issue of mortgage-backed pass through certificates ( PTCs ) or a direct assignment of the loans. The balance is retained by HDFC Limited.

### *Other Retail Loans*

#### *Two-Wheeler Loans*

We offer loans for financing the purchase of scooters and motorcycles. We market this product in ways similar to our marketing of auto loans.

#### *Loans Against Securities*

We offer loans against equity shares, mutual fund units, bonds and other securities that are on our approved list. We limit our loans against equity shares to Rs. 2.0 million per retail customer in line with regulatory guidelines and limit the amount of our total exposure secured by particular securities. We lend only against shares in book-entry (dematerialized) form, which ensures that we obtain perfected and first-priority security interests. The minimum margin for lending against shares is prescribed by the RBI.

#### *Loan Assignments*

We purchase loan portfolios, generally in India, from other banks, financial institutions and financial companies, which are similar to asset-backed securities, except that such loans are not represented by PTCs. Some of these loans also qualify toward our directed lending obligations.

#### *Kisan Gold Card (Agri Loans)*

Under the Kisan Gold Card, funds are extended to farmers in accordance with the RBI's Kisan Credit Card scheme in order to assist the farmers in financing certain farming expenses, such as the production of crops, post-harvest repair and maintenance and the domestic consumption needs of the farmers. The amount of funding available is based on the farmer's cropping pattern, the amount of land under utilization and the scale of financing and asset costs. The Bank offers both cash credit and term loan facilities under this product.

#### *Loans Against Gold Jewelry*

We offer loans against gold jewelry to specific customer segments, including women and farmers. Such loans are offered with monthly interest payments and a bullet maturity. These loans also have margin requirements in the event of a decrease in the value of the gold collateral due to fluctuations in market prices of gold. Loans against gold jewelry are also extended to existing auto loan, personal loan or home loan customers in order to cater to their additional funding needs.

We also offer loans which primarily include overdrafts against time deposits, health care equipment financing loans, tractor loans and loans to self-help groups.

**Table of Contents****Retail Deposit Products**

Retail deposits provide us with a low cost, stable funding base and have been a key focus area for us since commencing operations. Retail deposits represented approximately 74.0% of our total deposits as of March 31, 2018. The following chart shows the book value of our retail deposits by our various deposit products:

	At March 31, 2018		% of total
	Value (in millions)		
Savings	Rs. 2,193,458.7	US\$ 33,688.5	37.6%
Current	744,366.1	11,432.4	12.8%
Time	2,896,641.5	44,488.4	49.6%
Total	Rs. 5,834,466.3	US\$ 89,609.3	100.0%

Our individual retail account holders have access to the benefits of a wide range of direct banking services, including debit and ATM cards, access to internet and phone banking services, access to our growing branch and ATM network, access to our other distribution channels and eligibility for utility bill payments and other services. Our retail deposit products include the following:

Savings accounts, which are demand deposits, primarily for individuals and trusts.

Current accounts, which are non-interest bearing checking accounts designed primarily for business customers. Customers have a choice of regular and premium product offerings with different minimum average quarterly account balance requirements.

Time deposits, which pay a fixed return over a predetermined time period.

We also offer special value-added accounts, which offer our customers added value and convenience. These include a time deposit account that allows for automatic transfers from a time deposit account to a savings account, as well as a time deposit account with an automatic overdraft facility.

We had mobilized US\$ 3.4 billion in special Foreign Currency Non-Resident ( FCNR ) deposits from non-resident Indian ( NRI ) clients under the RBI swap window in fiscal 2014. A major portion of these deposits were issued for a 3-year tenor and by fiscal 2018, US\$ 3.03 billion of the FCNR deposits were redeemed.

**Other Retail Services and Products*****Debit Cards***

We had approximately 23.6 million and 24.3 million debit cards outstanding as of March 31, 2017 and March 31, 2018, respectively. The cards can be used at ATMs and point-of-sales terminals in India and in other countries across the world.

***Individual Depository Accounts***

We provide depository accounts to individual retail customers for holding debt and equity instruments. Securities traded on the Indian exchanges are generally not held through a broker's account or in a street name. Instead, an individual has his or her own account with a depository participant. Depository participants, including us, provide services through the major depositories established by the two major stock exchanges. Depository participants record ownership details and effectuate transfers in book-entry form on behalf of the buyers and sellers of securities. We provide a complete package of services, including account opening, registration of transfers and other transactions and information reporting.

***Mutual Fund Sales***

We offer our retail customers units in most of the large and reputable mutual funds in India. In some cases, we earn front-end commissions for new sales and additional fees in subsequent years. We distribute mutual fund products primarily through our branches and our private banking advisors.

## **Table of Contents**

### ***Insurance***

We have arrangements with HDFC Standard Life Insurance Company Limited and HDFC ERGO General Insurance Company Limited to distribute their life insurance and general insurance products, respectively, to our customers, and have recently entered into similar distribution arrangements with other insurance companies. We earn commissions on new premiums collected as well as some trailing income in subsequent years in certain cases while the policy is still in force. Our commission income for fiscal 2018 included fees of Rs. 11,923.4 million in respect of life insurance business, of which Rs. 4,067.7 million was for displaying publicity materials at the Bank's branches/ATMs, and Rs. 2,034.3 million of fees in respect of general insurance business.

### ***Investment Advice***

We offer our customers a broad range of investment advice, including advice regarding the purchase of Indian debt, equity shares and mutual funds. We provide our high net worth private banking customers with a personal investment advisor who can consult with them on their individual investment needs. We have also created a virtual relationship manager for our high net worth customers, which is available at any time through a secure video interface.

### ***Bill Payment Services***

We offer our customers utility bill payment services for leading utility companies, including electricity, telephone and internet service providers. Customers can also review and access their bill details through our direct banking channels. We believe this is a valuable convenience that we offer our customers. We offer these services to customers through multiple distribution channels – ATMs, telephone banking, internet banking and mobile telephone banking.

### ***Corporate Salary Accounts***

We offer Corporate Salary Accounts, which allow employers to make salary payments to a group of employees with a single transfer. We then transfer the funds into the employees' individual accounts and offer them preferred services, such as lower minimum balance requirements. As of March 31, 2018, these accounts constituted 29% of our savings deposits by value.

### ***Non-Resident Indian Services***

Non-resident Indians are an important target market segment for us given their relative affluence and strong ties with family members in India. Our non-resident deposits amounted to Rs. 728.6 billion as of March 31, 2017 and Rs 817.9 billion as of March 31, 2018.

### ***Retail Foreign Exchange***

We purchase foreign currency from and sell foreign currency to retail customers in the form of cash, traveler's checks, demand drafts, foreign exchange cards and other remittances. We also carry out foreign currency check collections.

### **Customers and Marketing**

We identify and target distinct market customer segments for our retail services. We market our products through our branches, online through our website, through telemarketing and through our dedicated sales team for niche market segments. We also use third-party agents and direct sales associates to market certain products and to identify prospective customers.

Additionally, we obtain new customers through joint marketing efforts with our wholesale banking department, such as our Corporate Salary Account package and we cross-sell several retail products to our customers. We also market our auto loan and two-wheeler loan products through joint efforts with relevant manufacturers and distributors.

We have programs that target other particular segments of the retail market. For example, our private and preferred banking programs provide customized financial planning to high net worth individuals. Private banking customers receive a personal investment advisor who serves as their single-point contact and compiles personalized portfolio tracking products, including mutual fund and equity tracking statements. Our private banking program also offers equity investment advisory products. While not as service-intensive as our private banking program, preferred banking offers similar services to a slightly broader target segment. Top revenue-generating customers of our preferred banking program are channeled into our private banking program. As of March 31, 2018, 33% of our retail deposit customers contributed 80% of our retail deposits.

## **Table of Contents**

We also have a strong commitment to financial inclusion programs to extend banking services to underserved populations. Our Sustainable Livelihood Initiative targets lower income individuals to finance their economic activity, and also provide skill training, credit counseling, and market linkages for better price discovery. Through this initiative we reach out to the un-banked and under-banked segments of the Indian population.

## **Wholesale Banking**

### *Overview*

We provide our corporate and institutional clients a wide array of commercial banking products and transactional services.

Our principal commercial banking products include a range of financing products, documentary credits (primarily letters of credit) and bank guarantees, foreign exchange and derivative products, investment banking services and corporate deposit products. Our financing products include loans, overdrafts, bill discounting and credit substitutes, such as commercial paper, debentures, preference shares and other funded products. Our foreign exchange and derivatives products assist corporations in managing their currency and interest rate exposures.

For our commercial banking products, our customers include companies that are part of private sector business houses, public sector enterprises and multinational corporations, as well as small and mid-sized businesses. Our customers also include suppliers and distributors of corporations to whom we provide credit facilities and with whom we thereby establish relationships as part of a supply chain initiative for both our commercial banking products and transactional services. We aim to provide our corporate customers with high quality customized service. We have relationship managers who focus on particular clients and who work with teams that specialize in providing specific products and services, such as cash management and treasury advisory services.

Loans to small and medium enterprises, which are generally in the nature of loans for commercial vehicles, construction equipment and business purposes, are included as part of our retail banking business. We group these loans as part of our retail banking business considering, among other things, the customer profile, the nature of the product, the differing risks and returns, our organization structure and our internal business reporting mechanism. Such grouping ensures optimum utilization and deployment of specialized resources in our retail banking business.

Our principal transactional services include cash management services, capital markets transactional services and correspondent banking services. We provide physical and electronic payment and collection mechanisms to a range of corporations, financial institutions and government entities. Our capital markets transactional services include custodial services for mutual funds and clearing bank services for the major Indian stock exchanges and commodity exchanges. In addition, we provide correspondent banking services, including cash management services and funds transfers, to foreign banks and co-operative banks.

### ***Commercial Banking Products***

#### *Commercial Loan Products and Credit Substitutes*

Our principal financing products are working capital facilities and term loans. Working capital facilities primarily consist of cash credit facilities and bill discounting. Cash credit facilities are revolving credits provided to our customers that are secured by working capital such as inventory and accounts receivable. Bill discounting consists of short-term loans which are secured by bills of exchange that have been accepted by our customers or drawn on another bank. In many cases, we provide a package of working capital financing that may consist of loans and a cash

credit facility as well as documentary credits or bank guarantees. Term loans consist of short-term loans and medium-term loans which are typically loans of up to five years in duration. Over 90% of our loans are denominated in rupees with the balance being denominated in various foreign currencies, principally the U.S. dollar.

We also purchase credit substitutes, which are typically comprised of commercial paper and debentures issued by the same customers with whom we have a lending relationship in our wholesale banking business. Investment decisions for credit substitute securities are subject to the same credit approval processes as loans, and we bear the same customer risk as we do for loans extended to these customers. Additionally, the yield and maturity terms are generally directly negotiated by us with the issuer.

**Table of Contents**

The following table sets forth the asset allocation of our commercial loans and financing products by asset type. For accounting purposes, we classify commercial paper and debentures as credit substitutes (which in turn are classified as investments).

	2016	As of March 31,		
		2017	2018	2018
	(in millions)			
Gross commercial loans	Rs. 1,534,268.7	Rs. 1,939,948.4	Rs. 2,162,814.4	US\$ 33,217.8
Credit substitutes:				
Commercial paper	Rs. 258,006.4	Rs. 248,269.7	Rs. 34,248.6	US\$ 526.0
Non-convertible debentures	39,234.6	171,270.9	289,782.9	4,450.7
Total credit substitutes	Rs. 297,241.0	Rs. 419,540.6	Rs. 324,031.5	US\$ 4,976.7
Gross commercial loans plus credit substitutes	Rs. 1,831,509.7	Rs. 2,359,489.0	Rs. 2,486,845.9	US\$ 38,194.5

While we generally lend on a cash-flow basis, we also require collateral from a large number of our borrowers. As of March 31, 2018, approximately 68.9% of the aggregate principal amount of our gross wholesale loans was secured by collateral (approximately Rs. 673.3 billion in aggregate principal amount of loans were unsecured). However, collateral securing each individual loan may not be adequate in relation to the value of the loan. All borrowers must meet our internal credit assessment procedures, regardless of whether the loan is secured. See *Risk Management Credit Risk Wholesale Credit Risk* .

We price our loans based on a combination of our own cost of funds, market rates, tenor of the loan, our rating of the customer and the overall revenues from the customer. An individual loan is priced on a fixed or floating rate and the pricing is based on a margin that depends on, among other factors, the credit assessment of the borrower. We are required to follow the marginal cost of funds based lending rate system while pricing our loans. For a detailed discussion of these requirements, see *Supervision and Regulation Regulations Relating to Making Loans* .

The RBI requires banks to lend to specific sectors of the economy. For a detailed discussion of these requirements, see *Supervision and Regulation Directed Lending* .

*Bill Collection, Documentary Credits and Bank Guarantees*

We provide bill collection, documentary credit facilities and bank guarantees for our corporate customers. Documentary credits and bank guarantees are typically provided on a revolving basis. The following table sets forth, for the periods indicated, the value of transactions processed with respect to our bill collection, documentary credits and bank guarantees:

	2016	As of March 31,		
		2017	2018	2018
	(in millions)			
Bill collection	Rs. 3,595,361.1	Rs. 4,003,047.4	Rs. 4,345,163.8	US\$ 66,735.7
Documentary credits	982,710.6	1,172,946.1	1,262,413.0	19,388.9
Bank guarantees	241,990.0	226,961.8	289,821.8	4,451.3
Total	Rs. 4,820,061.7	Rs. 5,402,955.3	Rs. 5,897,398.6	US\$ 90,575.9

*Bill collection:* We provide bill collection services for our corporate clients in which we collect bills on behalf of a corporate client from the bank of our client's customer. We do not advance funds to our client until receipt of payment.

*Documentary credits:* We issue documentary credit facilities on behalf of our customers for trade financing, sourcing of raw materials and capital equipment purchases.

*Bank guarantees:* We provide bank guarantees on behalf of our customers to guarantee their payment or performance obligations. A small part of our guarantee portfolio consists of margin guarantees to brokers issued in favor of stock exchanges.

**Table of Contents***Foreign Exchange and Derivatives*

Our foreign exchange and derivative product offering to our customers covers a range of products, including foreign exchange and interest rate transactions and hedging solutions, such as spot and forward foreign exchange contracts, forward rate agreements, currency swaps, currency options and interest rate derivatives. These transactions enable our customers to transfer, modify or reduce their foreign exchange and interest rate risks. A specified group of relationship managers from our treasury front office works on such product offerings jointly with the relationship managers from Wholesale Banking.

Forward exchange contracts are commitments to buy or sell foreign currency at a future date at the contracted rate. Currency swaps are commitments to exchange cash flows by way of interest in one currency against another currency and exchange of principal amounts at maturity based on predetermined rates. Rupee interest rate swaps are commitments to exchange fixed and floating rate cash flows in rupees. A forward rate agreement gives the buyer the ability to determine the underlying rate of interest for a specified period commencing on a specified future date (the settlement date) when the settlement amount is determined being the difference between the contracted rate and the market rate on the settlement date. Currency options give the buyer the right, but not an obligation, to buy or sell specified amounts of currency at agreed rates of exchange on or before a specified future date.

We enter into forward exchange contracts, currency options, forward rate agreements, currency swaps and rupee interest rate swaps with our customers, similar to our transactions with inter-bank participants. To support our clients activities, we are an active participant in the Indian inter-bank foreign exchange market. We also trade, to a more limited extent, for our own account. We also engage in proprietary trades of interest rate swaps and use them as part of our asset liability management.

The following table presents the aggregate notional principal amounts of our outstanding foreign exchange and derivative contracts with our customers as of March 31, 2016, 2017 and 2018, together with the fair values on each reporting date.

	As of March 31,							
	2016		2017		2018		2018	
	Notional	Fair Value	Notional	Fair Value	Notional	Fair Value	Notional	Fair Value
	(In millions)							

Interest rate swaps and forward rate agreements	Rs. 528,589.7	Rs. (2,165.2)	Rs. 704,131.9	Rs. (34.6)	Rs. 1,106,546.0	Rs. 1,847.5	US\$ 16,994.9	US\$ 28.4
Forward exchange contracts, currency swaps, currency options	Rs. 809,002.2	Rs. 3,166.4	Rs. 738,919.5	Rs. (312.9)	Rs. 864,449.8	Rs. (5,261.4)	US\$ 13,276.7	US\$ (80.8)

*Investment Banking*

Our Investment Banking Group offers services in the debt and equity capital markets. The group has arranged project financing for clients across various sectors including telecom, toll roads, healthcare, energy, real estate and cement. The group advised on aggregate issuances of over Rs. 770.6 billion worth of rupee denominated corporate bonds across public sector undertakings, financial institutions and the Bank's corporate clients during fiscal 2018, becoming the second largest corporate bond arranger in the market for fiscal 2018. In the equity capital markets business, the group concluded initial public offerings of a small finance bank, an insurance company and a road infrastructure company; a rights issue of a steel company and a QIP of a cement company during fiscal 2018. In the advisory business, we advise clients in the infrastructure, financial services, industrials and healthcare sectors.

#### *Wholesale Deposit Products*

As of March 31, 2018, we had wholesale deposits aggregating over Rs. 2,049.3 billion, which represented 26.0% of our total deposits. We offer both non-interest bearing current accounts and time deposits. We are allowed to vary the interest rates on our wholesale deposits based on the size of the deposit (for deposits greater than Rs. 10.0 million), provided the rates booked on a day are the same for all customers of that deposit size for that maturity. See *Selected Statistical Information* for further information about our total deposits.

#### **Transactional Services**

##### *Cash Management Services*

We believe that the Indian market is one of the most promising Cash Management Services ( CMS ) markets. However, it is also marked by some distinctive characteristics and challenges such as a vast geography, a large number of small business-intensive towns, a large unorganized sector in various business supply chains, and infrastructural limitations for accessibility to many parts of the country. Over the years, such challenges have made it a daunting task for CMS providers in the country to uncover the business potential and extend suitable services and product solutions to the business community.

## **Table of Contents**

We have been providing CMS to our customers from diverse industry segments. We believe that we have been consistently aligning our product and services strategy to meet our customers' needs. This, we believe, has helped us to keep ahead of competitors and retain a satisfied customer base that is growing by the year.

We offer traditional and new age electronic banking products and experience an increasing demand for electronic banking services. While we believe that we have been one of the leading banks in the traditional CMS market, we believe that we have also been able to forge a similar position in the new age CMS market, i.e. electronic cash management, and we also believe that we have aligned our product offering with changing and dynamic customer needs. As of the date hereof, over 70% of our transactions are done on the electronic platform.

Today we believe that we are a leading service provider of electronic banking products with a large share of business across customer segments. We have, thus, been able to reduce our transaction costs while maintaining our fees and float levels.

We have also implemented a straight-through processing solution to link our wholesale banking and retail banking systems. This has led to reduced manual intervention in transferring funds between the corporate accounts which are in the wholesale banking system and beneficiary accounts residing in retail banking systems. This initiative helps reduce transaction costs. We have a large number of commercial clients using our corporate internet banking for financial transactions with their vendors, dealers and employees who bank with us.

### ***Clearing Bank Services for Stock and Commodity Exchanges***

We serve as a cash-clearing bank for major stock and commodity exchanges in India, including the National Stock Exchange of India Limited and the BSE Limited. As a clearing bank, we provide the exchanges or their clearing corporations with a means for collecting cash payments due to them from their members or custodians and a means of making payments to these institutions. We make payments once the broker or custodian deposits the funds with us. In addition to benefiting from the cash float, which reduces our overall cost of funds, we also earn commissions on such services in certain cases.

### ***Custodial Services***

We provide custodial services principally to Indian mutual funds, as well as to domestic and international financial institutions. These services include safekeeping of securities and collection of dividend and interest payments on securities. Most of the securities under our custody are in book-entry (dematerialized) form, although we provide custody for securities in physical form as well for our wholesale banking clients. We earn revenue from these services based on the value of assets under safekeeping and the value of transactions handled.

### ***Correspondent Banking Services***

We act as a correspondent bank for co-operative banks, foreign banks and select private banks. We provide cash management services, funds transfer services, such as letters of credit, foreign exchange transactions and foreign check collection. We earn revenue on a fee-for-service basis and benefit from the cash float, which reduces our overall cost of funds.

We are well-positioned to offer this service to co-operative banks, foreign banks and select private banks in light of the structure of the Indian banking industry and our position within it. Co-operative banks are generally restricted to a particular state and foreign banks / some private banks have limited branch networks. The customers of these banks frequently need services in other areas of the country where their own banks cannot provide. Because of our

technology platforms, our geographical reach and the electronic connectivity of our branch network, we can provide these banks with the ability to provide such services to their customers.

***Tax Collections***

We have been appointed by the Government of India to collect direct taxes. In fiscals 2017 and 2018 we collected Rs. 2,158 billion and Rs. 2,613 billion, respectively, of direct taxes for the Government of India. We are also appointed to collect Goods and Services Tax ( GST ) and excise duties in India. In fiscals 2017 and 2018 we collected Rs. 1,522 billion and Rs. 1,874 billion, respectively, of such indirect taxes for the Government of India and relevant state governments. We earn a fee from the Government of India for each tax collection and benefit from the cash float. We hope to expand our range of transactional services by providing more services to government entities.

**Table of Contents****Treasury****Overview**

Our treasury group manages our balance sheet, including our maintenance of reserve requirements and the management of market and liquidity risk. Our treasury group also provides advice and execution services to our corporate and institutional customers with respect to their foreign exchange and derivatives transactions. In addition, our treasury group seeks to optimize profits from our proprietary trading, which is principally concentrated on Indian government securities.

Our client-based activities consist primarily of advising corporate and institutional customers and transacting spot and forward foreign exchange contracts and derivatives. Our primary customers are multinational corporations, large and medium sized domestic corporations, financial institutions, banks and public sector undertakings. We also advise and enter into foreign exchange contracts with some small companies and NRIs.

The following describes our activities in the foreign exchange and derivatives markets, domestic money markets and debt securities desk and equities market. See also **Risk Management** for a discussion of our management of market risk.

**Foreign Exchange and Derivatives**

We enter into forward exchange contracts, currency options, forward rate agreements, currency swaps and rupee interest rate swaps with inter-bank participants. To support our clients' activities, we are an active participant in the Indian inter-bank foreign exchange market. We also trade, to a more limited extent, for our own account. We also engage in proprietary trades of rupee-based interest rate swaps and use them as part of our asset liability management. Forward exchange contracts are commitments to buy or sell foreign currency at a future date at the contracted rate. Currency swaps are commitments to exchange cash flows by way of interest in one currency against another currency and exchange of principal amounts at maturity based on predetermined rates. Rupee interest rate swaps are commitments to exchange fixed and floating rate cash flows in rupees. A forward rate agreement gives the buyer the ability to determine the underlying rate of interest for a specified period commencing on a specified future date (the settlement date) when the settlement amount is determined being the difference between the contracted rate and the market rate on the settlement date. Currency options give the buyer the right, but not an obligation, to buy or sell specified amounts of currency at agreed rates of exchange on or before a specified future date.

The following table presents the aggregate notional principal amounts of our outstanding foreign exchange and derivative inter-bank contracts as of March 31, 2016, 2017 and 2018 together with the fair values on each reporting date:

	As of March 31,							
	2016		2017		2018		2018	
	Notional	Fair Value	Notional	Fair Value	Notional	Fair Value	Notional	Fair Value
	(In millions)							
Interest rate swaps and forward rate	Rs. 1,678,786.7	Rs. 1,552.1	Rs. 1,687,375.9	Rs. 411.3	Rs. 1,980,227.2	Rs. (750.2)	US\$ 30,413.6	US\$ (11.5)

agreements								
Forward

options	Rs. 4,844,850.6	Rs. 4,087.3	Rs. 4,291,942.7	Rs. (5,907.2)	Rs. 3,876,140.5	Rs. (1,124.3)	US\$ 59,532.2	US\$ (17.3)

***Domestic Money Market and Debt Securities Desk***

Our principal activity in the domestic money market and debt securities market is to ensure that we comply with our reserve requirements. These consist of a cash reserve ratio, which we meet by maintaining balances with the RBI, and a statutory liquidity ratio, which we meet by purchasing Indian government securities. See also Supervision and Regulation Legal Reserve Requirements . Our local currency desk primarily trades Indian government securities for our own account. We also participate in the inter-bank call deposit market and engage in limited trading of other debt instruments.

***Equities Market***

We trade a limited amount of equities of Indian companies for our own account. As of March 31, 2018, we had an internal aggregate approved limit of Rs. 300 million for market purchases and Rs. 100 million (defined as a sub-limit of the aggregate approved limit) for primary purchases of equity investments for proprietary trading and Rs. 100 million (defined as a sub-limit of the aggregate approved limit) for investment in index funds or equity mutual funds for proprietary trading. Our exposure as of March 31, 2018 was within these limits. We set limits on the amount invested in any individual company as well as stop-loss limits.

---

**Table of Contents**
**Distribution Channels**

We deliver our products and services through a variety of distribution channels, including branches, ATMs, telephone, mobile telephone and internet banking.

***Branches***

As of March 31, 2018, we had a total of 4,787 branches covering 2,691 cities and towns, which includes 33 banking outlets that were manned by our business correspondents. All of our branches are electronically linked so that our customers can access their accounts from any branch regardless of where they have their accounts.

Almost all of our branches focus exclusively on providing retail services and products, though a few also provide wholesale banking services. The range of products and services available at each branch depends in part on the size and location of the branch. We offer various banking services to our customers through our arrangements with correspondent banks and exchange houses in overseas locations.

As part of its branch licensing conditions, the RBI requires that at least 25% of all incremental branches added during the year be located in unbanked rural areas that do not have a brick and mortar structure of any scheduled commercial bank for customer-based banking transactions. As per the guidelines of the RBI, a rural area is defined as a center with a population up to 9,999. As of March 31, 2018, 516 of our branches are in unbanked areas. With the objective of liberalizing and rationalizing the branch licensing process, the RBI granted general permission, effective from October 2013, to banks like us to open branches in Tier 1 to Tier 6 centers, subject to a requirement to report to the RBI and other prescribed conditions. In May 2017, the RBI further liberalized the branch authorization policy. See *Supervision and Regulation Regulations Relating to the Opening of Branches* .

We have representative offices in the United Arab Emirates and Kenya and have a wholesale banking branch in Bahrain. We also have a full service banking branch in Hong Kong. In August 2014, we opened a branch in the Dubai International Financial Center ( DIFC ) in Dubai to offer advisory services to NRIs regarding treasury products, trade finance, loans and other related services. Through these branches, we provide services to NRIs, Indian corporates and their affiliates to cater to their international banking requirements. The Bank also opened an International Financial Service Centre Banking Unit at the Gujarat International Finance Tec-City ( GIFT ) in June 2017. The unit is regulated by the RBI.

***Automated Teller Machines***

As of March 31, 2018, we had a total of 12,635 ATMs, of which 5,867 were located at our branches or extension counters and 6,768 were located off site, including at large residential developments, or on major roads in metropolitan areas.

Customers can use our ATMs for a variety of functions, including withdrawing cash, monitoring bank balances, and paying utility bills. Customers can access their accounts from any of the HDFC Bank ATMs or non-HDFC Bank ATMs. ATM cards issued by American Express or other banks in the Rupay, Visa, MasterCard, Maestro, Cirrus, Citrus or Discover Financial Services networks can be used in our ATMs and we receive a fee for each transaction. Our debit cards can be used on ATMs of other banks while our ATM cards can be used on most of the ATM networks.

***Telephone Banking***

We provide telephone banking services to our customers in 2,691 cities and towns as at March 31, 2018. Customers can access their accounts over the phone through our 24-hour automated voice response system and can order check books, conduct balance inquiries and order stop payments of checks. In select cities, customers can also engage in financial transactions (such as opening deposits and ordering demand drafts). In certain cities, the Bank also has staff available during select hours to assist customers who want to speak directly to one of the Bank's telephone bankers.

***Mobile Banking***

Our mobile banking platform offers anytime, anywhere banking services to our customers through handheld devices, such as smartphones and even basic feature phones. Using our mobile banking platform, customers can perform enquiry based non-financial transactions such as balance enquiries, requests for account statements and requests for mini-statements of their transactions. We offer our customers the ability to carry out variety of financial transactions from their mobile phones. Customers can carry out financial transactions, such as transferring funds within and outside the Bank, and mobile commerce using their HDFC Bank account by downloading this application on their mobile phones. Mobile banking is available across several mobile operating systems, including Android, iOS, Windows and Blackberry.

## **Table of Contents**

### ***Internet Banking***

Our net banking seeks to be a virtual manifestation of a physical branch. Through our internet banking channel, customers can perform various transactions, such as access account information, track transactions, request check books, request stop check payments, transfer funds between accounts and to third parties who maintain accounts with us or other banks, open fixed deposits, give instructions for the purchase and sale of units in mutual funds, pay bills and make demand draft requests. Customers can apply for cards and pre-approved loans online and even view details of existing ones. We encourage customer use of our internet banking service by offering some key services for free or at a lower cost.

### **Risk Management**

Risk is inherent in our business and sound risk management is critical to our success. The major types of risk we face are credit risk, market risk, liquidity risk, interest rate risk and operational risk. We have developed and implemented comprehensive policies and procedures to identify, assess, monitor and manage our risk.

#### ***Credit Risk***

Credit risk is the possibility of loss due to the failure of any counterparty to abide by the terms and conditions of any financial contract with us. We identify and manage this risk through (a) our target defined markets, (b) our credit approval process, (c) our post-disbursement monitoring and (d) our remedial management procedures. We have a comprehensive centralized risk management function, independent of our operations and business units.

The asset quality of the Indian banking industry continued to be under severe pressure during fiscal 2017 and majority of fiscal 2018 due to macroeconomic factors as well as sector-specific issues. The banking industry on an overall basis saw a sharp increase in stress and non-performing assets. We did not witness any significant deterioration in overall asset quality.

#### ***Retail Credit Risk***

We offer a range of retail products, such as auto loans, personal loans, credit cards, business banking, two-wheeler loans, loans against securities and commercial vehicle loans. Our retail credit policy and approval process are designed to accommodate the high volumes of relatively homogeneous, small value transactions in retail loans. There are product programs for each of these products, which define the target markets, credit philosophy and process, detailed underwriting criteria for evaluating individual credits, exception reporting systems and individual loan exposure caps.

For individual customers to be eligible for a loan, minimum credit parameters, so defined, are to be met for each product. Any deviations need to be approved at the designated levels. The product parameters have been selected based on the perceived risk characteristics specific to the product. The quantitative parameters considered include income, residence stability, the nature of the employment/business, while the qualitative parameters include accessibility and profile. Our credit policies and product programs are based on a statistical analysis of our own experience and industry data, in combination with the judgement of our senior officers.

The retail credit risk team manages credit risk in retail assets and has the following constituents:

(a) *Central Risk Unit*: The central risk unit drives credit risk management centrally for retail assets. It is responsible for formulating policies and evaluates proposals for launch of new products and new geographies. The central risk

unit also conducts periodic reviews that cover our portfolio management information system, credit management information system and post-approval reviews. The product risk teams conduct detailed studies on portfolio performance in each customer segment.

(b) *Retail Underwriting*: This unit is primarily responsible for approving individual credit exposures and ensuring portfolio composition and quality. The unit ensures implementation of all policies and procedures, as applicable.

(c) *Risk Intelligence and Control*: This unit is responsible for the sampling of documents to ensure prospective borrowers with fraudulent intent are prevented from availing themselves of loans. The unit initiates market reference checks to avoid a recurrence of fraud and financial losses.

(d) *Retail Collections Unit*: This unit is responsible for the remedial management of problem exposures in retail assets. The collections unit uses specific strategies for various segments and products for remedial management.

---

## **Table of Contents**

We mine data on our borrower account behavior as well as static data regularly to monitor the portfolio performance of each product segment regularly, and use these as inputs in revising our product programs, target market definitions and credit assessment criteria to meet our twin objectives of combining volume growth and maintenance of asset quality.

Our vehicle loans, personal loans, loan against gold and loan against securities are generally secured on the asset financed. Retail business banking loans are secured with current assets as well as immovable property and fixed assets in some cases. However, collateral securing each individual loan may not be adequate in relation to the value of the loan. If the customer fails to pay, we would, as applicable, liquidate collateral and/or set off accounts. In most cases, we obtain direct debit instructions or post-dated checks from the customer. It is a criminal offense in India to issue a bad check.

### ***Wholesale Credit Risk***

The wholesale credit risk team, within the Risk Management Group, is primarily responsible for implementing the credit risk strategy approved by the Board, developing procedures and systems for managing credit risk, carrying out an independent assessment of credit risk, approving individual credit exposures and ensuring portfolio composition and quality. In addition to the credit approval process, there is also an independent framework for the review and approval of credit ratings.

For our wholesale banking products, we target leading private businesses and public sector enterprises in the country, subsidiaries of multinational corporations and leaders in the small and medium enterprises (SME) segment. We also have product-specific offerings for entities engaged in the capital markets and commodities businesses.

We consider the credit risk of our counterparties comprehensively. Accordingly, our credit policies and procedures apply not only to credit exposures but also to credit substitutes and contingent exposures. Our Credit Policies & Procedure Manual and Credit Program (Credit Policies) are central in controlling credit risk in various activities and products. These articulate our credit risk strategy and thereby the approach for credit origination, approval and maintenance. The Credit Policies generally address such areas as target markets, portfolio mix, prudential exposure ceilings, concentration limits, price and non-price terms, structure of limits, approval authorities, exception reporting system, prudential accounting and provisioning norms. Each credit is evaluated by the business units against the credit standards prescribed in our Credit Policies. They are then subjected to a greater degree of risk analysis based on product type and customer profile by credit risk specialists in the Risk Management Group.

We have in place a process of risk-grading each borrower according to its financial health and the performance of its business and each borrower is graded on an alphanumeric rating scale of HDB 1 to HDB 10 (HDB 1 indicating the highest and HDB 10 the lowest rating; we further classify HDB 1 to HDB 7 as investment grade ratings, while HDB 8 or lower are classified as non-investment grade ratings). We have specific models applicable to each significant segment of wholesale credit (e.g. large corporate, SME-manufacturing, SME-services and NBFCs). Each model assesses the overall risk over four major categories: industry risk, business risk, management risk and financial risk. The aggregate weighted score based on the assessment under each of these four risk categories corresponds to a specific alphanumeric rating.

Based on what we believe is an adequately comprehensive risk assessment, credit exposure limits are set on individual counterparties. These limits take into account the overall potential exposure on the counterparty, be it on balance sheet or off balance sheet, across the banking book and the trading book, including foreign exchange and derivatives exposures. These limits are reviewed in detail at annual or more frequent intervals.

We do not extend credit on the judgment of one officer alone. Our credit approval process is based on a three-tier approval system that combines credit approval authorities and discretionary powers. The required three approvals are provided by credit approvers who derive their authority from their credit skills and experience. The level for approval of a credit varies depending upon the grading of the borrower, the quantum of facilities required and whether we have been dealing with the customer by providing credit facilities in the past. As such, initial approvals would typically require a higher level of approval for a borrower with the same grading and for sanctioning the same facility.

To ensure adequate diversification of risk, concentration limits have been set up in terms of:

a) *Borrower/business group*: Exposure to a borrower/business group is subject to the general ceilings established by the RBI from time to time, or specific approval by the RBI. The exposure-ceiling limit for a single borrower is 15% of a bank's capital funds. This limit may be exceeded by an additional 5% (i.e. up to 20%), provided the additional credit exposure is on account of lending to infrastructure projects. The exposure-ceiling limit in the case of a borrower group is 40% of a bank's capital funds. This limit may be exceeded by an additional 10% (i.e., up to 50%), provided the additional credit exposure is on account of extensions of credit for infrastructure projects. In addition to the above exposure limit, a bank may, in exceptional circumstances and with the approval of its board, consider increasing its exposure to a borrower up to an additional 5% of its capital funds. Exposures (both lending and investment, including off balance sheet exposures) of a bank to a single NBFC, NBFC-Asset Financing Company ( AFC ), or NBFC-Infrastructure Finance Company ( IFC ) should not exceed 10%, 15% and 15%, respectively, of a bank's capital funds. A bank may, however, assume exposures on a single NBFC, NBFC-AFC, or NBFC-IFC up to 15%, 20% and 20%, respectively, of its capital funds, provided the exposure in excess of 10%, 15% and 15% (referred to above) is on account of funds that the NBFC, NBFC-AFC, or NBFC-IFC has lent out to the infrastructure sector. In December 2016, the RBI issued the Large Exposure Framework, which aims to align the exposure norms for Indian Banks with the Basel Committee on Banking Supervision ( BCBS ). The guidelines are required to be fully implemented by March 31, 2019. See *Supervision and Regulation Large Exposures Framework* .

**Table of Contents**

b) *Industry*: Exposure to any one industry cannot exceed 12% of aggregate exposures. For this purpose, advances and investments as well as non-fund based exposures are aggregated. Retail advances are exempt from this exposure limit. Further, exposure to banks and state sponsored financial institutions is capped at a level of 25%.

c) *Risk grading*: In addition to the exposure ceilings described above, we have set quantitative ceilings on aggregate funded plus non-funded exposure (excluding retail assets) specific to each risk rating category at the portfolio level.

While we primarily make our credit decisions on a cash flow basis, we also obtain security for a significant portion of credit facilities extended by us as a second potential remedy. This can take the form of a floating charge on the movable assets of the borrower or a (first or residual) charge on the fixed assets and properties owned by the borrower. We may also require guarantees and letters of support from the flagship companies of the group in cases where facilities are granted based on our comfort level or relationship with the parent company.

We have a process for regular monitoring of all accounts at several levels. These include periodic calls on the customer, plant visits, credit reviews and monitoring of secondary data. These are designed to detect any early warning signals of deterioration in credit quality so that we can take timely corrective action.

The RBI restricts us from lending to companies with which we have any directors in common. In addition, the RBI requires that we direct a portion of our lending to certain specified sectors ( Priority Sector Lending or PSL ). See also Supervision and Regulation Directed Lending .

***Market Risk***

Market risk refers to the potential loss on account of adverse changes in market variables or other risk factors which affect the value of financial instruments that we hold. The financial instruments may include investment in money market instruments, debt securities (such as gilts, bonds and PTCs), equities, foreign exchange products and derivative instruments (both linear and non-linear products).

The market variables which affect the valuation of these instruments typically include interest rates, credit spreads, equity prices, commodity prices, exchange rates and implied volatilities. Any change in the relevant market risk variable has an adverse or favorable impact on the valuation depending on the direction of the change and the type of position held (long or short). While the positions are taken with a view to earn from the upside potential, there is always a possibility of downside risk. Thus, we must constantly review the positions to ensure that the risk on account of such positions is within our overall risk appetite. The Bank's overall risk appetite for various risks is defined by the Internal Capital Adequacy Assessment Process ( ICAAP ) review committee, by stipulating specific risk appetite for each category of risk. The risk appetite for trading risk is set through a pre-approved treasury limits package as well as through specific trading limits for a few product programs. In addition, the Bank's risk limits are guided by the Interbank Counterparty Exposure limit and the Bank's Asset Liability Management ( ALM ) limits prescribe the appetite for liquidity risk and interest rate risk in the banking book ( IRRBB ). The process for monitoring and reviewing risk exposure is outlined in the various risk policies.

The market risk department formulates procedures for portfolio risk valuation, assesses market risk factors along with the trading portfolio and recommends various market risk controls relating to limits and trigger levels for the treasury (including investment banking portfolios for primary undertaking and distribution) and non-treasury positions. The treasury mid-office is responsible for monitoring and reporting market risks arising from the trading desks. The market data cell in the mid-office maintains market data, performs market data scan to check market data sanctity and verifies the rates submitted by the treasury front office for polling various benchmarks.

---

## Table of Contents

Our Board of Directors has delegated the responsibility for market risk management of the balance sheet on an ongoing basis to the Asset Liability Committee ( ALCO ). This committee, which is chaired by the Managing Director and includes the heads of the business groups, generally meets fortnightly. The ALCO reviews the product pricing for deposits and assets as well as the maturity profile and mix of our assets and liabilities. It articulates the interest rate view and decides on future business strategy with respect to interest rates. It reviews and sets funding policy, also reviews developments in the markets and the economy and their impact on the balance sheet and business along with review of the trading levels. Moreover, it reviews the utilization of liquidity and interest rate risk limits set by the Board of Directors and decides on the inter-segment transfer pricing policy.

The financial control department is responsible for collecting data, preparing regulatory and analytical reports and monitoring whether the interest rate and other policies and limits established by the ALCO are being observed. Our treasury group also assists in implementing our asset liability strategy and in providing information to the ALCO.

### *Policies and Procedures Trading and Asset Liability Management Risks*

The following sections briefly describe our policies and procedures with respect to trading risk (price risk) and ALM risk (interest rate risk in the banking book and liquidity risk).

#### *I. Trading Risk*

Trading risk is the risk arising from price fluctuations due to market factors, such as changes in interest rates, equity prices, commodity prices, exchange rates and the variations in their implied volatilities in respect of the trading portfolio held by the Bank. The trading portfolio includes holdings in the held-for-trading and available-for-sale-portfolios, as per RBI guidelines and consists of positions in bonds, securities, currencies, interest rate swaps and options, cross-currency interest rate swaps and currency options.

The trading risk is managed by putting in place a sound process for price validation and by setting various limits or trigger levels, such as value at risk limits, stop loss trigger levels, price value per basis point (PV01) limits, option Greek limits, position limits, namely, intraday and net overnight forex open position as well as gap limits (aggregate and individual gap limits). Additional controls such as order size and outstanding exposure limits are prescribed, wherever applicable, based on case by case review. Moreover, measures such as investment limits and deal size thresholds are prescribed as part of the investment policy for managing outstanding investment or trading positions.

The treasury limits are reviewed by the market risk department and presented to the Risk Policy and Monitoring Committee ( RPMC ) for its recommendation to the Board of Directors for approval. The limits are reviewed annually or more frequently (depending on market conditions) or upon introduction of new products.

The market risk policy sets the framework for market risk monitoring. The risk on account of semi-liquid or illiquid positions in trading is recognized in the non-standard product policy as part of the market risk policy. The non-standard product policy stipulates requirements for case specific evaluation of risk exposure in respect of non-standard products (that is, products which are not part of the standard product list decided by treasury and the market risk department). Additionally, limits have been assigned to restrict the aggregate exposure in non-standard positions. Further, the stress testing policy prescribes the stress scenarios that are applied on the outstanding trading positions to recognize and analyze the impact of the stress conditions on the trading portfolio. Stress tests are based on historical scenarios as well as on sensitivity factors, such as an assessment based on hypothetical/judgmental scenarios.

Validation of valuation models applied for validation of trading products are conducted by the treasury analytics team, which are then reviewed by the market risk department and governed by the Board of Directors approved independent valuation model validation policy. The Valuation Committee is apprised of the model validation results in its quarterly meetings. Moreover, the market data of major interest rate curves, captured in the valuation systems, are compared against an independent market data source on month-end basis for accurate valuation pursuant to the Independent Valuation Model Validation Policy of the Bank.

## *II. Asset Liability Management*

The ALM risk management process consists of management of liquidity risk and IRRBB. Liquidity risk is the risk that the Bank may not be able to fund increases in assets or meet obligations as they fall due without incurring unacceptable losses. IRRBB refers to the potential adverse financial impact on the Bank's banking book from changes in interest rates. The banking book is comprised of assets and liabilities that are incurred to create a steady income flow or to fulfill statutory obligations. Such assets and liabilities are generally held to maturity. The Bank carries various assets, liabilities and off-balance sheet items across markets, maturities and benchmarks, exposing it to risks from changing interest rates. The Bank's objective is to maintain liquidity risk and IRRBB within certain tolerance limits. The ALM limits are reviewed by the market risk department and presented to the RPMC for its recommendation to the Board of Directors for approval. The limits are reviewed at least annually.

## **Table of Contents**

### *Structure and Organization*

The ALM risk management process of the Bank operates in the following hierarchical manner:

#### *Board of Directors*

The Board has the overall responsibility for management of liquidity and interest rate risk. The Board decides the strategy, policies and procedures of the Bank to manage liquidity and interest rate risk, including setting the Bank's risk tolerance and limits.

#### *Risk Policy & Monitoring Committee of the Board*

The RPMC is a Board-level committee, which supports the Board by supervising the implementation of risk strategy. It guides the development of policies, procedures and systems for managing risk. It ensures that these are adequate and appropriate to changing business conditions, the structure and needs of the Bank and the risk appetite of the Bank. It ensures that frameworks are established for assessing and managing liquidity and interest rate risks faced by the Bank. The RPMC meets at least once every quarter. The RPMC's role includes inter-alia:

1. to review and recommend for Board approval, the liquidity and interest rate risk policies or any other amendment thereto;
2. to ratify excess utilization of Board approved limits; and
3. to review the results of stress tests.

#### *Asset Liability Committee ( ALCO )*

The ALCO is the decision-making unit responsible for ensuring adherence to the risk tolerance and limits set by the Board, as well as implementing the Bank's liquidity and interest rate risk management strategy in line with the Bank's risk management objectives and risk tolerance. The ALCO is also responsible for balance sheet planning from a risk-return perspective, including strategic management of interest rate and liquidity risks. The role of the ALCO includes the following:

product pricing for deposits and customer advances;

deciding the desired maturity profile and mix of incremental assets and liabilities;

articulating the Bank's interest rate view and deciding on its future business strategy;

reviewing and articulating funding strategy;

ensuring adherence to the liquidity and interest rate risk limits set by the Board of Directors;

determining the structure, responsibilities and controls for managing liquidity and interest rate risk;

ensuring operational independence of risk management function;

reviewing stress test results; and

deciding on the transfer pricing policy of the Bank.

#### *ALM Support Group*

The ALM support group is responsible for analyzing, monitoring, and reporting the relevant risk profiles to senior management and relevant committees. The ALM support group comprises the balance sheet management desk (Treasury), market risk department, treasury mid-office and Finance and Control.

#### *Risk Measurement Systems and Reporting*

##### *Liquidity Risk*

Liquidity risk is measured using the flow approach and the stock approach. The flow approach involves comprehensive tracking of cash flow mismatches, whereas the stock approach involves the measurement of critical ratios in respect of liquidity risk.

For measuring and managing net funding requirements, the use of a maturity ladder and calculation of cumulative surplus or deficit of funds at selected maturity dates has been adopted as a standard tool. The time buckets for classification of assets and liabilities for the purposes of this statement is as per the RBI's prescribed guidelines.

**Table of Contents**

Stock approach involves measurement of certain critical ratios in respect of liquidity risk. Based on the RBI guidelines, a set of liquidity ratios under stock approach are monitored on a periodic basis.

In addition, the Bank is required to maintain Liquidity Coverage Ratio. The regulatory minimum requirement for the ratio is 80% starting from January 1, 2017 (which was 70% between Jan 2016 to Dec 2016) and will rise in equal steps of 10% each year to reach 100% on January 1, 2019.

Analysis of liquidity risk also involves examining how funding requirements are likely to be affected under crisis scenarios. The Bank has a Board approved liquidity stress framework guided by regulatory instructions. The Bank has an extensive intraday liquidity risk management framework for monitoring intraday positions during the day.

*Interest Rate Risk in Banking Book*

Interest rate risk is the risk where changes in market interest rates affect a bank's financial position. Changes in interest rates impact a bank's earnings through changes in its net interest income ( NII ). Changes in interest rates also impact a bank's market value of equity ( MVE ) or net worth through changes in the economic value of its rate sensitive assets, liabilities and off-balance sheet positions. The interest rate risk, when viewed from these two perspectives, is known as earnings perspective and economic value perspective, respectively.

The Bank measures and controls IRRBB using both the earnings perspective (measured using the traditional gap analysis method) and the economic value perspective (measured using the duration gap analysis method) as detailed below. These methods involve grouping of rate sensitive assets ( RSA ) and rate sensitive liabilities ( RSL ), including off-balance sheet items, based on the maturity or repricing dates.

The Bank classifies an asset or liability as rate sensitive if:

- i. within the time interval under consideration, there is a cash flow;
- ii. the interest rate resets or reprices contractually during the interval; and
- iii. the RBI changes the interest rates in cases where interest rates are administered.

A significant portion of non-maturing deposits are grouped in the over 1 year to 3 year category. Non-rate sensitive liabilities and assets primarily comprise capital, reserves and surplus, other liabilities, cash and balances with the RBI, current account balances with banks, fixed assets and other assets.

The banking book is represented by excluding from the total book the trading book (i.e., on and off-balance sheet items) and the commensurate liabilities in the form of short-term borrowings and deposits.

**Earnings Perspective (impact on net interest income)**

The traditional gap analysis ( TGA ) method measures the level of a bank's exposure to interest rate risk in terms of sensitivity of its NII to interest rate movements over a one-year horizon. It involves bucketing of all RSA, RSL and off-balance sheet items maturing or getting repriced in the next year and computing changes of income under 200

basis points upward and downward parallel rate shocks over a year's horizon.

Economic Value Perspective (impact on market value of equity)

While earnings perspective calculates the short-term impact of the rate changes, the Economic Value Perspective calculates the long-term impact on the MVE of the Bank through changes in the economic value of its rate sensitive assets, liabilities and off-balance sheet positions. Economic value perspective is measured using the duration gap analysis method ( DGA ). DGA involves computing of the modified duration gap between RSA and RSL and thereby the Duration of Equity ( DoE ). The DoE is a measure of sensitivity of MVE to changes in interest rates. Using the DoE, the Bank estimates the change in MVE under 200 basis points upward and downward parallel rate shocks.

## **Table of Contents**

### **Operational Risk Management**

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. The way operational risk is managed has the potential to positively or negatively impact the Bank's customers, financial performance and reputation. The Bank has put in place Board-approved governance and organizational structure with clearly defined roles and responsibilities to mitigate operational risk arising from the Bank's business and operations.

#### *Organizational Structure for Managing Operational Risk*

The RPMC reviews and recommends to the Board of Directors the overall operational risk management framework for the Bank. The Operational Risk Management Committee, which is headed by the Deputy Managing Director and consists of senior management functionaries (including the Chief Risk Officer, Group Head Audit, Group Head Operations and senior representatives from all the relevant business verticals), oversees the implementation of the operational risk management framework approved by the Board. An independent operational risk management department is responsible for implementation of the framework across the Bank. The operational risk management policy stipulates the roles and responsibilities of employees, business units, operations and support function in managing operational risk.

#### *Risk Measurement and Monitoring*

While the day-to-day operational risk management lies with business lines, operations and support functions, the operational risk management department is responsible for designing tools and techniques for identification and monitoring of operational risk across the Bank consistent with the framework approved by the Board. The unit also ensures operational risk exposures are captured and reported to the relevant levels of the management for initiating suitable risk mitigations in order to contain operational risk exposures within acceptable levels. The internal audit department provides independent assurance of the effectiveness of governance, risk management and internal controls to achieve the Bank's risk management and control objectives.

The Bank applies a number of risk management techniques to effectively manage operational risks. These techniques include:

A bottom-up risk assessment process, risk control self-assessment, to identify high risk areas so that the Bank can initiate timely remedial measures. This assessment is conducted annually to update senior management of the risk level across the Bank.

The employment of key risk indicators to alert the Bank of impending problems in a timely manner. The key risk indicators allow monitoring of the control environment as well as operational risk exposures and also trigger risk mitigation actions.

Subjecting material operational risk losses to a detailed risk analysis in order to identify areas of risk exposure and gaps in controls based on which appropriate risk mitigating actions are initiated.

Conducting a scenario analysis annually to derive information on hypothetical severe loss situations. The Bank uses this information for risk management purposes, as well as for analyzing the possible financial impact.

Periodic reporting of risk assessment and monitoring to senior management to ensure timely actions are initiated at all levels.

#### *Capital Requirement*

Currently, the Bank follows the basic indicator approach for computing operational risk capital. The Bank has devised an operational risk measurement system compliant with an advanced measurement approach ( AMA ) for estimating operational risk capital for the standalone bank. The RBI has granted in-principle approval to the bank to migrate to AMA for calculating operational risk capital charge in parallel to the basic indicator approach followed currently.

#### **Competition**

We face intense competition in all of our principal lines of business. Our primary competitors are large public sector banks, other private sector banks, foreign banks and, in some product areas, NBFCs. In addition, new entrants into the financial services industry, including companies in the financial technology sector, may further intensify competition in the business environments, especially in the digital business environment, in which we operate. In February 2013, the RBI issued guidelines for the entry of new banks in the private sector, including eligibility criteria, capital requirements, shareholding structure, business plan and corporate governance practices. Pursuant to these guidelines, in fiscal 2016 IDFC Bank and Bandhan Bank commenced banking operations.

In November 2014, the RBI released guidelines for the licensing of payments banks and small finance banks in the private sector. Since promulgation, such banks have been established and operational pursuant to these guidelines, which have increased competition in the markets in which we operate.

## **Table of Contents**

In August 2016, the RBI released final guidelines for on-tap Licensing of Universal Banks in the Private Sector. The guidelines aim at moving from the current stop and go licensing approach (wherein the RBI notifies the licensing window during which a private entity may apply for a banking license) to a continuous or on-tap licensing regime. Among other things, the new guidelines specify conditions for the eligibility of promoters, corporate structure and foreign shareholdings. One of the key features of the new guidelines is that, unlike the February 2013 guidelines (mentioned above), the new guidelines make the Non-Operative Financial Holding Company structure non-mandatory in the case of promoters being individuals or standalone promoting/converting entities which do not have other group entities. See *Supervision and Regulation Entry of new banks in the private sector* .

### ***Retail Banking***

In retail banking, our principal competitors are large public sector banks, which have much larger deposit bases and branch networks than ours, other new generation private sector banks, old generation private sector banks, foreign banks and NBFCs in the case of retail loan products. The retail deposit share of foreign banks is small in comparison to the public sector banks. However, some foreign banks have a significant presence among NRIs and also compete for non-branch-based products.

In mutual fund sales and other investment related products, our principal competitors are brokers, foreign banks and other new private sector banks.

### ***Wholesale Banking***

Our principal competitors in wholesale banking are public and new private sector banks as well as foreign banks. The large public sector banks have traditionally been the market leaders in commercial lending. Foreign banks have focused primarily on serving the needs of multinational companies and Indian corporations with cross-border financing requirements, including trade and transactional services and foreign exchange products and derivatives, while the large public sector banks have extensive branch networks and large local currency funding capabilities.

### ***Treasury***

In our treasury advisory services for corporate clients, we compete principally with foreign banks in foreign exchange and derivatives, as well as public sector banks and new generation private sector banks in the foreign exchange and money markets business.

### **Employees**

The number of our employees was 88,253 as of March 31, 2018. Most of our employees are located in India. We consider our relationship with our employees to be positive. Further to our acquisition of CBoP in 2008, several employees of CBoP continue to be part of a labor union. These employees represent less than 1% of our total employee strength.

Our compensation structure has fixed as well as variable pay components. Our variable pay plans are comprised of periodic performance linked pay (PLP), annual performance linked bonus and employee stock option plans.

In addition to basic compensation, employees are eligible to participate in our provident fund and other employee benefit plans. The provident fund, to which both we and our employees contribute, is a savings scheme required by government regulation under which the fund is required to pay to employees a minimum annual return, which is 8.55% at present. If such return is not generated internally by the fund, we are liable for the difference. Our provident

fund has generated sufficient funds internally to meet the annual return requirement since inception of the fund. We have also set up a superannuation fund to which we contribute defined amounts. We also contribute specified amounts to a pension fund in respect of certain of our former-CBoP employees. In addition, we contribute specified amounts to a gratuity fund set up pursuant to Indian statutory requirements.

We focus on training our employees on a continuous basis. We have training centers, where we conduct regular training programs for our employees. Management and executive trainees generally undergo up to eight-week training modules covering most aspects of banking. We offer courses conducted by both internal and external faculty. In addition to ongoing on-the-job training, we provide employees courses in specific areas or specialized operations on an as-needed basis.

### **Properties**

Our registered office and corporate headquarters is located at HDFC Bank House, Senapati Bapat Marg, Lower Parel, Mumbai 400 013, India. In addition to the corporate office, we have administrative offices in most of the metros and some other major cities in India.

**Table of Contents**

As of March 31, 2018, we had a network consisting of 4,787 branches and 12,635 ATMs, including 6,768 at non-branch locations. These facilities are located throughout India with the exception of three branches which are located in Bahrain, Hong Kong and Dubai. We also have representative offices in the United Arab Emirates and Kenya. The Bank set up and commenced business in an International Financial Service Centre Banking Unit at the Gujarat International Finance Tec-City in June 2017. This branch is treated as an overseas branch.

**Intellectual Property**

We utilize a number of different forms of intellectual property in our business including our HDFC Bank brand and the names of the various products we provide to our customers. We believe that we currently own, have licensed or otherwise possess the rights to use all intellectual property and other proprietary rights, including all trademarks, domain names, copyrights, patents and trade secrets used in our business.

**Legal Proceedings**

We are involved in a number of legal proceedings in the ordinary course of our business, including certain spurious or vexatious proceedings with significant financial claims present on the face of the complaint but that we believe lack any merit based on the historical dismissals of similar claims. Accordingly, we believe there are currently no legal proceedings, which if adversely determined, might materially affect our financial condition or the results of our operations.

---

**Table of Contents****RISK FACTORS**

You should carefully consider the following risk factors in evaluating us and our business.

**Risks Relating to our Business**

*A slowdown in economic growth in India would cause us to experience slower growth in our asset portfolio and deterioration in the quality of our assets.*

Our performance and the quality and growth of our assets are dependent on the health of the overall Indian economy, which is, in turn, linked to global economic conditions. Economic growth in India is affected by inflation, interest rates, external trade, capital flows and, given India's dependence on imported oil for its energy needs, oil prices. The Indian economy in general and the agricultural sector in particular are also impacted by weather conditions, including the level and timing of monsoon rainfall. Investments by the corporate sector in India are affected by Government policies and decisions, including those relating to awards of licenses, access to land and natural resources and the protection of the environment. A slowdown in global growth and volatility in global financial markets could contribute to a weakness in the Indian financial and economic environment.

The global economy is expected to recover this year, with the IMF predicting global growth to recover to 3.9% in 2018 from 3.2% in 2016 and 3.7% in 2017, with growth in developed economies like the United States in particular picking up to 2.9% in 2018 from 2.3% in 2017. While emerging markets and developing economies are expected to record slightly higher growth at 4.9% in 2018 compared to 4.7% in 2017, the IMF expects China to see a moderation in its growth rate (from 6.9% in 2017 to 6.6% in 2018) and were this slowdown to be sharp, it could also have some negative implications for emerging markets, including India, through trade channels and impact on investors sentiment.

In addition, the continuation of a tighter monetary policy in the United States could further undermine financial stability in an emerging market economy like India, particularly if coupled with the start of tightening monetary policies in both the U.K. and the EU. Such economic conditions, including current and expected political uncertainties in the Eurozone, in particular, the negotiations between U.K. and EU policymakers following the U.K.'s vote to leave the European Union, could result in heightened volatility and risk on sentiment which could adversely affect our business, including our ability to grow our asset portfolio, the quality of our assets and our ability to implement our strategy. India also faces major challenges in sustaining its growth rate, including the need for substantial infrastructure development and improved access to healthcare and education.

In fiscal 2015, the Government introduced a new methodology for estimating the gross domestic product (GDP) and also began publishing sector data on a gross value added basis. According to the new methodology, India's GDP grew by 7.5% in fiscal 2015, 8.0% in fiscal 2016, 7.1% in fiscal 2017 and 6.6% in fiscal 2018. In addition, the RBI entered into a monetary policy framework agreement with the Government of India, affirming that the RBI would pursue a consumer inflation target of 4% with an upper tolerance level of 6% and lower limit of 2% for the five years ending March 31, 2021. Actual inflation readings so far have remained within the RBI's target zone—consumer price inflation declined to 4.5% in fiscal 2017 from 4.9% in fiscal 2016 and averaged 3.6% during fiscal 2018.

However, a return to a tighter interest rate regime on account of inflation, other market factors such as higher oil prices or changes in the conduct of monetary policy may put a constraint on economic growth in India. Any prolonged slowdown may adversely impact credit growth and the level of non-performing and restructured loans. If the Indian economy deteriorates, our asset base may erode, which would result in a material decrease in our net profits and total assets.

***If we are unable to manage our rapid growth, our operations may suffer and our performance may decline.***

We have grown rapidly over the last three fiscals. Our loan growth rate has been significantly higher than that of the Indian banking industry. Our loans in the three-year period ended March 31, 2017 grew at a compounded annual growth rate of approximately 22.9%. The compounded annual growth for the Indian banking industry for the same period is approximately 6.4%. The growth in our business is partly attributable to the expansion of our branch network. As at March 31, 2013, we had a branch network comprised of 3,062 branches, which increased to 4,787 branches as at March 31, 2018. Section 23 of the Banking Regulation Act, 1949 (the Banking Regulation Act ) provides that banks must obtain the prior approval of the RBI to open new branches. Further, the RBI may cancel a license for violations of the conditions under which it was granted. The RBI issues instructions and guidelines to banks on branch authorization from time to time. With the objective of liberalizing the branch licensing process, the RBI, effective October 2013, granted general permission to banks, including us, to open branches in Tier 1 to Tier 6 centers, subject to a requirement to report to the RBI and certain other conditions. In May 2017, the RBI has further liberalized the branch authorization policy. See *Supervision and Regulation Regulations Relating to the Opening of Branches* . If we are unable to perform in a manner satisfactory to the RBI in any of these centers or comply with the specified conditions, it may have an impact on the number of branches we will be able to open, which would, in turn, have an impact on our future growth.

**Table of Contents**

In addition, our rapid growth has placed, and if it continues, will place, significant demands on our operational, credit, financial and other internal risk controls including:

recruiting, training and retaining sufficient skilled personnel;

upgrading, expanding and securing our technology platform;

developing and improving our products and delivery channels;

preserving our asset quality as our geographical presence increases and customer profile changes;

complying with regulatory requirements such as the Know Your Customer ( KYC ) norms; and

maintaining high levels of customer satisfaction.

If our internal risk controls are insufficient to sustain our rapid rate of growth, if we fail to properly manage our rapid growth, or if we fail to perform adequately in any of the above areas, our operations would suffer and our business, results of operations and financial position would be materially adversely affected.

***Our business is particularly vulnerable to interest rate risk and volatility in interest rates could adversely affect our net interest margin, the value of our fixed income portfolio, our treasury income and our financial performance.***

Our results of operations depend to a great extent on our net interest revenue. During fiscal 2018, net interest revenue after allowances for credit losses represented 71.6% of our net revenue. Changes in market interest rates affect the interest rates charged on our interest-earning assets differently from the interest rates paid on our interest-bearing liabilities and also affect the value of our investments. An increase in interest rates could result in an increase in interest expense relative to interest revenue if we are not able to increase the rates charged on our loans, which would lead to a reduction in our net interest revenue and net interest margin. Further, an increase in interest rates could negatively affect demand for our loans and credit substitutes and we may not be able to achieve our volume growth, which could adversely affect our net income. A decrease in interest rates could result in a decrease in interest revenue relative to interest expense due to the repricing of our loans at a pace faster than the rates we pay on our interest-bearing liabilities. The quantum of the changes in interest rates for our assets and liabilities may also be different.

The combination of global disinflationary pressures (a result of falling commodity prices and subdued growth), better supply management of food items, including prudent food stock management, appropriate monetary policy action and subdued global commodity prices have helped to keep domestic inflation in check in recent years, thereby causing consumer price index inflation to decrease from levels of 8.25% in March 2014 to 5.25% in March 2015 to 4.83% in March 2016 to 3.89% in March 2017. For March 2018, although inflation was higher it remained within the RBI's target zone at 4.3%. The softening in inflation led the RBI to cut the policy repo rate by 75 basis points in fiscal 2016, by another 50 bps in fiscal 2017, and by 25 basis points in fiscal 2018. In addition, in order to make the liquidity situation more comfortable, the RBI also conducted net open market operation ( OMO ) with purchases of Rs. 1.1

trillion in fiscal 2017 and sales of Rs. 0.9 trillion in fiscal 2016. Moreover, the demonetization of the 500 and 1000 rupee notes also provided the system with ample liquidity. In response to the declining policy rates, easing liquidity conditions, the benchmark bond yield eased during most of fiscals 2016 and 2017. However, recent yields have increased on concerns of higher inflation and looming fiscal concerns at both the center and state level. Further, considering the higher inflationary pressures, the RBI has increased the policy repo rate to 6.25% in June 2018.

**Table of Contents**

On a going-forward basis, there are certain trends that could change interest rates or lead to increase in interest rate volatility. If the fiscal deficit for states is higher than the fiscal deficit target, or if crude oil prices remain relatively high, or if global interest rates rise rapidly, the RBI could raise rates in the current fiscal. A further narrowing of liquidity surplus (domestically or globally) could lead to further rise in bond yields in fiscal 2019. These trends could be more intense than we expect, or interest rates and bond yields could change as a result of a number of different factors which we cannot predict at this time. Any volatility in interest rates could thereby adversely affect our net interest margin, the value of our fixed income portfolio, our treasury income and our financial performance. See

*Selected Statistical Information Analysis of Changes in Interest Revenue and Interest Expense* and *Selected Statistical Information Yields, Spreads and Margins* .

***If the level of non-performing loans in our portfolio increases, we will be required to increase our provisions, which would negatively impact our income.***

Our gross non-performing loans and non-performing credit substitutes represented 1.41% of our gross customer assets as of March 31, 2018. Our non-performing loans and non-performing credit substitutes net of specific provisions represented 0.61% of our net customer assets portfolio as of March 31, 2018. Our management of credit risk involves having appropriate credit policies, underwriting standards, approval processes, loan portfolio monitoring, remedial management and the overall architecture for managing credit risk. In the case of our secured loan portfolio, the frequency of the valuation of collateral may vary based on the nature of the loan and the type of collateral. A decline in the value of collateral or an inappropriate collateral valuation increases the risk in the secured loan portfolio because of inadequate coverage of collateral. As of March 31, 2018, 72.4% of our loan book was partially or fully secured by collateral. Our risk mitigation and risk monitoring techniques may not be accurate or appropriately implemented and we may not be able to anticipate future economic and financial events, leading to an increase in our non-performing loans. See *Note 10 Loans* in our consolidated financial statements.

Provisions are created by a charge to expense, and represent our estimate for loan losses and risks inherent in the credit portfolio. See *Selected Statistical Information Non-performing Loans* . The determination of an appropriate level of loan losses and provisions required inherently involves a degree of subjectivity and requires that we make estimates of current credit risks and future trends, all of which may undergo material changes. Our provisions may not be adequate to cover any further increase in the amount of non-performing loans or any further deterioration in our non-performing loan portfolio. Further, as part of its supervision process, the RBI assesses our asset classification and provisioning requirements. In the event that additional provisioning is required by the RBI, our net income, balance sheet and capital adequacy could be affected, which could have a material adverse impact on our business, future financial performance, shareholders' equity and the price of our equity shares. As part of an RBI supervisory process, the RBI has identified certain modifications in respect of our asset classification for three of our accounts. One of these accounts has since been upgraded to standard account classification. Any imposition in the future of even more stringent regulatory requirements or any directives by the RBI on the methodology of classification of non-performing loans may result in a significant increase in our non-performing loans in the future. If we are not able to continue to reduce our existing non-performing loans, or if there is a significant increase in the amount of new loans classified as non-performing loans as a result of a change in the methodology of non-performing loans classification mandated by the RBI or otherwise, our asset quality may deteriorate, our provisioning for probable losses may increase and our business, future financial performance and the trading price of our equity shares and ADSs could be adversely affected. In addition, we are a relatively young bank operating in a growing economy and we have yet not experienced a significant and prolonged downturn in the economy.

A number of factors outside of our control affect our ability to control and reduce non-performing loans. These factors include developments in the Indian economy, domestic or global turmoil, global competition, changes in interest rates and exchange rates and changes in regulations, including with respect to regulations requiring us to lend to certain

sectors identified by the RBI or the Government of India. For example, recently, certain state governments have announced waiver of amounts due under agricultural loans provided by the banks. Demands for similar waivers have been raised by farmers in other states as well. Also, in the past, the central and state governments have waived farm loans from time to time to provide some respite to the debt-ridden agricultural sector. It is unclear when the governments will compensate the banks for the waivers so announced. Further, such frequent farm waivers may create expectations of future waivers among the farmers and lead to a delay in or cessation of loan repayments, which may lead to a rise in our non-performing loans. These factors, coupled with other factors such as volatility in commodity markets, declining business and consumer confidence and decreases in business and consumer spending, could impact the operations of our customers and in turn impact their ability to fulfill their obligations under the loans granted to them by us. In addition, the expansion of our business may cause our non-performing loans to increase and the overall quality of our loan portfolio to deteriorate. If our non-performing loans increase, we will be required to increase our provisions, which would result in our net income being less than it otherwise would have been and would adversely affect our financial condition.

**Table of Contents**

***We have high concentrations of exposures to certain customers and sectors and if any of these exposures were to become non-performing, the quality of our portfolio could be adversely affected and our ability to meet capital requirements could be jeopardized.***

We calculate customer and industry exposure (i.e. the loss we could incur due to the downfall of a customer or an industry) in accordance with the policies established by the RBI, computed based on our Indian GAAP financial statements. In the case of customer exposures, we aggregate the higher of the outstanding balances of, or limits on, funded and non-funded exposures. As of March 31, 2018, our largest single customer exposure was Rs. 91.0 billion, representing 9.8% of our capital funds, and our ten largest customer exposures totaled Rs. 651.4 billion, representing 69.9% of our capital funds, in each case, computed in accordance with RBI guidelines. None of our ten largest customer exposures were classified as non-performing as of March 31, 2018. However, if any of our ten largest customer exposures were to become non-performing, our net income would decline and, due to the magnitude of the exposures, our ability to meet capital requirements could be jeopardized. See *Management's Discussion and Analysis of Financial Condition and Results of Operations* for a detailed discussion on customer exposures. In December 2016, the RBI released a framework for large exposures with limits on exposure of banks to single counterparty and a group of connected counterparties. Under this framework, the sum of all the exposure values of a bank to a single counterparty must not be higher than 20% of the bank's available eligible capital base at all times and the sum of all the exposure values of a bank to a group of connected counterparties must not be higher than 25% of the bank's available eligible capital base at all times. This framework is expected to be implemented in full by April 1, 2019 and the extant exposure norms applicable for credit exposure to individual borrowers or to groups of companies under the same management control will no longer be applicable from that date. Banks are required to gradually adjust their exposures so as to comply with the limits given in the framework for large exposures. In August 2016, the RBI issued guidelines proposing limits on the aggregate exposure of the banking system to large borrowers, with lending beyond the specified limits attracting higher risk weights and provisioning. These guidelines which are effective from April 1, 2017, and our focus on controlling and reducing concentration risk, may restrict our ability to grow our business with some customers, and require us to reduce our exposure to some groups.

Further, in February 2018, the RBI released a revised framework for resolution of stressed assets ( Revised Framework ) repealing the existing instructions on resolution of stressed assets including the Framework for Revitalising Distressed Assets , Corporate Debt Restructuring Scheme , Flexible Structuring of Existing Long Term Project Loans , Strategic Debt Restructuring Scheme , Change in Ownership outside SDR , and Scheme for Sustainable Structuring of Stressed Assets. The Revised Framework requires all lenders, including us, to put in place policies, approved by the board of directors of the lender, for resolution of stressed assets, including the timelines for resolution. As soon as there is a default in the borrower entity's account with any lender, all lenders, either singly or jointly, shall be required to initiate steps to cure the default. Specifically, in respect of accounts to which the lenders have an aggregate exposure of more than Rs. 20 billion, the lenders are to implement a resolution plan within a certain period, failing which they are required to file an insolvency application, singly or jointly, under the Insolvency and Bankruptcy Code, 2016. See *Supervision and Regulations Resolution of Stressed Assets* . If the lenders fail to meet such timelines, such lenders will be subject to stringent supervisory review and enforcement actions by the RBI, including higher provisioning on such accounts and monetary penalties.

As of March 31, 2018, our largest industry concentrations, based on RBI guidelines, were as follows: NBFC/financial intermediaries (4.8%), retail trade (4.4%), banks and financial institutions (4.2%) and, automobile & auto ancillary (3.9%). In addition, as of March 31, 2018, 22.4% of our exposures were consumer loans. Industry-specific difficulties in these or other sectors may increase our level of non-performing customer assets. If we experience a downturn in an industry in which we have concentrated exposure, our net income will likely decline significantly and our financial condition may be materially adversely affected. As of March 31, 2018, our non-performing loans and credit substitutes as a percentage of total non-performing customer assets in accordance with U.S. GAAP were concentrated

in the following industries: Wholesale trade- non industrial (14.0%), agriculture production-food (11.2%), food and beverage (6.4%), retail trade (5.8%) and agriculture allied (5.7%). In addition, 14.0% of our non-performing customer assets were consumer loans.

**Table of Contents**

***We are required to undertake directed lending under RBI guidelines. Consequently, we may experience a higher level of non-performing loans in our directed lending portfolio, which could adversely impact the quality of our loan portfolio, our business and the price of our equity shares and ADSs. Further, in the case of any shortfall in complying with these requirements, we may be required to invest in deposits of Indian development banks as directed by the RBI. These deposits yield low returns, thereby impacting our profitability.***

The RBI prescribes guidelines on PSL in India. Under these guidelines, banks in India are required to lend 40.0% of their adjusted net bank credit ( ANBC ) or the credit equivalent amount of off-balance sheet exposures ( CEOBE ), whichever is higher, as defined by the RBI and computed in accordance with Indian GAAP figures, to certain eligible sectors categorized as priority sectors. The RBI has issued revised priority sector lending norms applicable from fiscal 2016 onwards. The priority sector requirements must be met as of March 31 of each year with reference to the higher of the ANBC and the CEOBE as of the corresponding date of the preceding year. From fiscal 2017, PSL achievement is required to be evaluated at the end of the fiscal based on the average of priority sector target /sub-target achievement as at the end of each quarter of that fiscal. See *Supervision and Regulation Directed Lending* . Under the guidelines, scheduled commercial banks having any shortfall in lending to the priority sector shall be allocated amounts for contribution to the Rural Infrastructure Development Fund ( RIDF ) established with National Bank for Agriculture and Rural Development ( NABARD ) and other Funds with NABARD, National Housing Bank ( NHB ), Small Industries Development Bank of India ( SIDBI ) or Micro Units Development & Refinance Agency Limited ( MUDRA ), as decided by the RBI from time to time. The interest rates on such deposits may be lower than the interest rates which the Bank would have obtained by investing these funds at its discretion.

Further, the RBI has directed banks to maintain direct lending to non-corporate farmers at the banking system's average level for the last three years, which would be notified by the RBI at the beginning of each year. The target for fiscal 2018 was 11.78%. Failure to maintain these lending levels to non-corporate farmers will attract penalties. The RBI has also directed banks to continue to pursue the target of 13.5% of ANBC towards lending to borrowers who constituted the direct agriculture lending category under the earlier guidelines. If we fail to adhere to the RBI's policies and directions, we may be subject to penalties, which may adversely affect our results of operations. Furthermore, the RBI can make changes to the types of loans that qualify under the PSL scheme. Changes that reduce the types of loans that can qualify toward meeting our PSL targets could increase shortfalls under the overall target or under certain sub-targets.

Our total PSL achievement for fiscal 2018 stood at 41.2% and our achievement of direct lending to non-corporate farmers stood at 14.6% for fiscal 2018 as against a requirement of 40% and 11.78%, respectively. However, in fiscal 2018 agricultural loans made to small and marginal farmers were 7.3% of ANBC, against the requirement of 8.0%, with a shortfall of Rs. 96 billion. Advances to sections termed weaker by the RBI were 10.2% against the requirement of 10.0%. Our achievement stood at 14.7% compared to a target of 13.5% of ANBC towards lending to borrowers, who constituted the direct agriculture lending category under the earlier guidelines.

We may experience a higher level of non-performing assets in our directed lending portfolio, particularly in loans to the agricultural sector, small enterprises and weaker sections, where we are less able to control the portfolio quality and where economic difficulties are likely to affect our borrowers more severely. Our gross non-performing assets in the directed lending sector as a percentage to gross loans were 0.6% as of March 31, 2018 (as compared to 0.4% as of March 31, 2017). Further expansion of the PSL scheme could result in an increase of non-performing assets due to our limited ability to control the portfolio quality under the directed lending requirements.

In addition to the PSL requirements, the RBI has encouraged banks in India to have a financial inclusion plan for expanding banking services to rural and unbanked centers and to customers who currently do not have access to banking services. The expansion into these markets involves significant investments and recurring costs. The

profitability of these operations depends on our ability to generate business volumes in these centers and from these customers. Future changes by the RBI in the directed lending norms may result in our inability to meet the PSL requirements as well as require us to increase our lending to relatively more risky segments and may result in an increase in non-performing loans.

***We may be unable to foreclose on collateral in a timely fashion or at all when borrowers default on their obligations to us, or the value of collateral may decrease, any of which may result in failure to recover the expected value of collateral security, increased losses and a decline in net income.***

Although we typically lend on a cash-flow basis, many of our loans are secured by collateral, which consists of liens on inventory, receivables and other current assets, and in some cases, charges on fixed assets, such as property, movable assets (such as vehicles) and financial assets (such as marketable securities). As of March 31, 2018, 72.4% of our loans were partially or fully secured by collateral. We may not be able to realize the full value of the collateral, due to, among other things, stock market volatility, changes in economic policies of the Indian government, obstacles and delays in legal proceedings, borrowers and guarantors not being traceable, the Bank's records of borrowers and guarantors addresses being ambiguous or outdated and defects in the perfection of collateral and fraudulent transfers by borrowers. In the event that a specialized regulatory agency gains jurisdiction over the borrower, creditor actions can be further delayed. In addition, the value of collateral may be less than we expect or may decline. For example, the global economic slowdown and other domestic factors had led to a downturn in real estate prices in India, which negatively impacted the value of our collateral.

**Table of Contents**

The RBI has introduced various mechanisms, from time to time, to enable the lenders to timely resolve and initiate recovery with regards to stressed assets. In February 2018, RBI released a revised framework for resolution of stressed assets providing a simplified generic framework for resolution of stressed assets to harmonise the process of resolving stressed assets with the insolvency resolution process provided under the Insolvency and Bankruptcy Code, 2016 and the rules prescribed thereunder (the Insolvency and Bankruptcy Code ). See *Supervision and Regulations Resolution of Stressed Assets* .

The Insolvency and Bankruptcy Code was introduced in December 1, 2016, with the aim to provide for the efficient and timely resolution of insolvency of all persons, including companies, partnership firms, limited liability partnerships and individuals. For further details, see *Supervision and Regulation Insolvency and Bankruptcy Code* . However, given the limited experience of this framework, there can be no assurance that we will be able to successfully implement the above-mentioned mechanisms and recover the amounts due to us in full. The inability to foreclose on such loan dues or otherwise liquidate our collateral may result in failure to recover the expected value of such collateral security, which may, in turn, give rise to increased losses and a decline in net income.

***Our unsecured loan portfolio is not supported by any collateral that could help ensure repayment of the loan, and in the event of non-payment by a borrower of one of these loans, we may be unable to collect the unpaid balance.***

We offer unsecured personal loans and credit cards to the retail customer segment, including salaried individuals and self-employed professionals. In addition, we offer unsecured loans to small businesses and individual businessmen. Unsecured loans are a greater credit risk for us than our secured loan portfolio because they may not be supported by realizable collateral that could help ensure an adequate source of repayment for the loan. Although we normally obtain direct debit instructions or postdated checks from our customers for our unsecured loan products, we may be unable to collect in part or at all in the event of non-payment by a borrower. Further, any expansion in our unsecured loan portfolio could require us to increase our provision for credit losses, which would decrease our earnings. Also see *Business Retail Banking Retail Loans and Other Asset Products* .

***Our and our customers exposure to fluctuations in foreign currency exchange rates could adversely affect our operating results.***

Foreign currency exchange rates depend on various factors and can be volatile and difficult to predict. We enter into derivative contracts with our borrowers to manage their foreign currency exchange risk exposure. Volatility in these exchange rates may lead to losses in derivative transactions for our borrowers. On maturity or on premature termination of the derivative contracts and under certain circumstances, we may have to bear these losses. The use of derivative financial instruments may also generate obligations for us to make additional cash payments, which would negatively affect our liquidity. Any losses suffered by our customers as a result of fluctuations in foreign currency exchange rates may have a materially adverse effect on our business, financial position or results of operations.

***We may not adequately assess, monitor and manage risks inherent in our business, and any failure to manage risks could adversely affect our business, financial position or results of operations.***

We are exposed to a variety of risks, including liquidity risk, interest rate risk, credit risk, operational risk (including fraud) and legal risk (including actions taken by our own employees). The effectiveness of our risk management is limited by the quality and timeliness of available data and other factors outside of our control.

For example, our hedging strategies and other risk management techniques may not be fully effective in mitigating risks in all market environments or against all types of risk, including risks that are unidentified or unanticipated. Some methods of managing risks are based upon observed historical market behavior. As a result, these methods may

not predict future risk exposures, which could be greater than the historical measures indicated. Other risk management methods depend upon an evaluation of information regarding markets, customers or other matters. This information may not in all cases be accurate, complete, up-to-date or properly evaluated. As part of our ordinary decision making-process, we rely on various models for risk and data analysis. These models are based on historical data and supplemented with managerial input and comments. There are no assurances that these models and the data they analyze are accurate or adequate to guide our strategic and operational decisions and protect us from risks. Any deficiencies or inaccuracies in the models or the data might have a material adverse effect on our business, financial condition or results of operation.

**Table of Contents**

Additionally, management of operational, legal or regulatory risk requires, among other things, policies and procedures to ensure certain prohibited actions are not taken and to properly record and verify a number of transactions and events. Although we believe we have established such policies and procedures, they may not be fully effective and we cannot guarantee that our employees will follow these policies and procedures in all circumstances. Unexpected shortcomings in these policies and procedures or a failure to follow them may have a materially adverse effect on our business, financial position or results of operations.

Our future success will depend, in part, on our ability to respond to new technological advances and emerging banking and finance industry standards and practices on a cost-effective and timely basis. The development and implementation of such technology entails significant technical and business risks. There can be no assurance that we will successfully implement new technologies or adapt its transaction-processing systems to customer requirements or emerging market standards. Failure to properly monitor, assess and manage risks, could lead to losses which may have an adverse effect on our future business, financial position or results of operations.

***In order to support and grow our business, we must maintain a minimum capital adequacy ratio, and a lack of access to the capital markets may prevent us from maintaining an adequate ratio.***

As of March 31, 2018, the RBI requires a minimum capital adequacy ratio of 10.875% (including capital conservation buffer) of our total risk-weighted assets. We adopted the Basel III capital regulations effective April 1, 2013. Our capital adequacy ratio, calculated in accordance with Indian GAAP, was 14.82% as of March 31, 2018. Our CET-I ratio was 12.25% as of March 31, 2018. Our ability to support and grow our business would be limited by a declining capital adequacy ratio. While we anticipate accessing the capital markets to offset declines in our capital adequacy ratio, we may be unable to access the markets at the appropriate time or the terms of any such financing may be unattractive due to various reasons attributable to changes in the general environment, including political, legal and economic conditions.

The Basel Committee on Banking Supervision issued a comprehensive reform package entitled "Basel III: A global regulatory framework for more resilient banks and banking systems" in December 2010. In May 2012, the RBI released guidelines on implementation of the Basel III capital regulations in India and in July 2015, the RBI issued a master circular consolidating all relevant guidelines on Basel III. The key items covered under these guidelines include: i) improving the quality, consistency and transparency of the capital base; ii) enhancing risk coverage; iii) grading the enhancement of the total capital requirement; iv) introducing a capital conservation buffer and countercyclical buffer; and v) supplementing the risk-based capital requirement with a leverage ratio. One of the major changes in the Basel III capital regulations is that the Tier I capital will predominantly consist of common equity of the banks, which includes common shares, reserves and stock surplus. Innovative instruments and perpetual non-cumulative preference shares will not be considered a part of CET-I capital. Basel III also defines criteria for instruments to be included in Tier II capital to improve their loss absorbency. The guidelines also set out criteria for loss absorption through the conversion or write-off of all non-common equity regulatory capital instruments at the point of non-viability. The point of non-viability is defined as a trigger event upon the occurrence of which non-common equity Tier I and Tier II instruments issued by banks in India may be required to be, at the option of the RBI, written off or converted into common equity. Additionally, the guidelines have set out criteria for loss absorption through the conversion or write-off of Additional Tier I capital instruments at a pre-specified trigger level. For Additional Tier I instruments issued before March 31, 2019, i.e., before the full implementation of Basel III there would be two pre-specified triggers. A lower pre-specified trigger at CET-I of 5.5% of risk weighted assets ( RWAs ) will apply and remain effective before March 31, 2019; from this date the trigger will be raised at CET-I of 6.125% of RWAs for all such instruments. Additional Tier I instruments issued on or after March 31, 2019 will have only one pre-specified trigger at CET-I of 6.125% of RWAs. The capital requirement, including the capital conservation buffer, will be 11.5% once these guidelines are fully phased in. Domestic systemically important banks ( D-SIB ) are required

to maintain additional CET-I capital requirement ranging from 0.2% to 0.8% of risk weighted assets. We have been classified a D-SIB and we are required to maintain additional CET-I of 0.15% with effect from April 1, 2018 and will be required to maintain additional CET-I of 0.20% from April 1, 2019, respectively. See *Supervision and Regulation Domestic Systemically Important Banks* . Banks will also be required to have an additional capital requirement towards countercyclical capital buffer varying between 0% and 2.5% of the risk weighted assets as and when announced by the RBI. The transitional arrangements began from April 1, 2013 and the guidelines will be fully phased-in and implemented as of March 31, 2019. Additionally, the Basel III Liquidity Coverage Ratio ( LCR ), which is a measure of the Bank's high quality liquid assets compared to its anticipated cash outflows over a 30-day stressed period, began applying in a phased manner that started with a minimum requirement of 60% from January 1, 2015 and will reach a minimum of 100% on January 1, 2019. These various requirements including requirements to increase capital to meet increasing capital adequacy ratios could require us to forego certain business opportunities.

**Table of Contents**

We believe that the demand for Basel III compliant debt instruments such as Tier II capital eligible securities may be limited in India. In the past, the RBI has reviewed and made amendments in its guidelines on Basel III capital regulations with a view to facilitating the issuance of non-equity regulatory capital instruments by banks under the Basel III framework. It is unclear what effect, if any, these amendments may have on the issuance of Basel III compliant securities or if there will be sufficient demand for such securities. It is also possible that the RBI could further amend the eligibility criteria of such instruments in the future if the objectives identified by the RBI are not met, which would create additional uncertainty regarding the market for Basel III compliant securities in India.

If we are unable to meet the new and revised requirements, including both requirements applicable to banks generally and requirements imposed on us as a D-SIB, our business, future financial performance and the price of our ADSs and equity shares could be adversely affected.

***We rely on third parties, including service providers, overseas correspondent banks and other Indian banks, who may not perform their obligations satisfactorily or in compliance with law.***

Our business leads us to rely on different types of third parties, which exposes us to risks. For example, we enter into outsourcing arrangements with third party vendors, in compliance with the RBI guidelines on outsourcing. These vendors provide services which include, among others, cash management services, software services, client sourcing, debt recovery services and call center services. However, we cannot guarantee that there will be no disruptions in the provision of such services or that these third parties will adhere to their contractual obligations. Additionally, we also rely on our overseas correspondent banks to facilitate international transactions, and the Indian banking industry as a whole is inter-dependent in facilitating domestic transactions. There is no assurance that our overseas correspondent banks or our domestic banking partners will not fail or face financial problems (such as financial problems arising out of or in relation to frauds uncovered in early 2018 at one of India's public sector banks). If there is a disruption in the third-party services, or if the third-party service providers discontinue their service agreement with us, our business, financial condition and results of operations will be adversely affected. In case of any dispute with any of the foregoing parties, we cannot assure you that the terms of our arrangements with such parties will not be breached, which may result in costs such as litigation costs or the costs of entering into agreements with third parties in the same industry, and such costs may materially and adversely affect our business, financial condition and results of operations. We may also suffer from reputational and legal risks if one of these third parties acts unethically or unlawfully, and if any bank in India, especially a private bank, or any of our key overseas correspondent banks were to fail, this could materially and adversely affect our business, financial condition, growth prospects or the price of our equity shares.

***HDFC Limited holds a significant percentage of our share capital and can exercise influence over board decisions that could directly or indirectly favor the interests of HDFC Limited over our interests.***

HDFC Group owned 20.93% of our equity as of March 31, 2018. So long as HDFC Group holds at least a 20% equity stake in us, HDFC Limited is entitled to nominate two directors, our Chairperson and Managing Director, to our Board of Directors. These two directors are not required to retire by rotation and their appointments are subject to RBI approval. Shyamala Gopinath has been re-appointed as part-time Non-Executive Chairperson for three years with effect from January 2, 2018. Keki Mistry, the Vice Chairman and Chief Executive Officer of HDFC Limited is a member of our Board of Directors. While we are professionally managed and overseen by an independent board of directors, HDFC Limited can exercise influence over our board and over matters subject to a shareholder vote, which could result in decisions that favor HDFC Limited or result in us foregoing opportunities to the benefit of HDFC Limited. Such decisions may restrict our growth or harm our financial condition.

In the past, there have been reports in the Indian media suggesting that we may merge with financial institutions, including HDFC Limited. We consider business combination opportunities as they arise. At present, we are not actively considering a business combination with any financial institution. Any significant business combination would involve compliance with regulatory requirements and shareholder and regulatory approvals.

Additionally, on July 15, 2014, the RBI issued guidelines in relation to the issuance of long-term bonds with a view to encouraging financing of infrastructure and affordable housing. Regulatory incentives in the form of an exemption from the reserve requirements and a relaxation in PSL norms are stipulated as being restricted to bonds that are used to incrementally finance long-term infrastructure projects and loans for affordable housing. Any incremental infrastructure or affordable housing loans acquired from other financial institutions, such as those that could be involved in a business combination with HDFC Limited, to be reckoned for regulatory incentives will require the prior approval of the RBI. We cannot predict the impact any potential business combination would have on our business, financial condition, growth prospects or the prices of our equity shares.

**Table of Contents**

***We may face conflicts of interest relating to our promoter and principal shareholder, HDFC Limited, which could cause us to forego business opportunities and consequently have an adverse effect on our financial performance.***

HDFC Limited is primarily engaged in financial services, including home loans, property-related lending and deposit products. The subsidiaries and associated companies of HDFC Limited are also largely engaged in a range of financial services, including asset management, life and other insurance and mutual funds. Although we have no agreements with HDFC Limited or any other HDFC Group companies that restrict us from offering products and services that are offered by them, our relationship with these companies may cause us not to offer products and services that are already offered by other HDFC Group companies and may effectively prevent us from taking advantage of business opportunities. See Note 28 *Related Party Transactions* in our consolidated financial statements for a summary of transactions we have engaged in with HDFC Limited during fiscal 2018. We currently distribute products of HDFC Limited and its group companies. If we stop distributing these products or forego other opportunities because of our relationship with HDFC Limited, it could have a material adverse effect on our financial performance.

***HDFC Limited may prevent us from using the HDFC Bank brand if they reduce their shareholding in us to below 5%.***

As part of a shareholder agreement executed when HDFC Bank was formed, HDFC Limited has the right to prevent us from using HDFC as part of our name or brand if HDFC Limited reduces its shareholding in HDFC Bank to an amount below 5% of our outstanding share capital. If HDFC Limited were to exercise this right, we would be required to change our name and brand, which could require us to expend significant resources to establish new branding and name recognition in the market as well as undertake efforts to rebrand our branches and our digital presence. This could have a material adverse effect on our financial performance.

***RBI guidelines relating to ownership in private banks could discourage or prevent a change of control or other business combination involving us, such as with HDFC Limited, which could restrict the growth of our business and operations.***

RBI guidelines prescribe a policy framework for the ownership and governance of private sector banks. Under the Banking Regulation Act, a shareholder presently cannot exercise voting rights in excess of 15% of the total voting rights, which ceiling on voting rights may be increased in a phased manner up to 26% by the RBI. In May 2016, the RBI issued the Reserve Bank of India (Ownership in Private Sector Banks) Directions, 2016. These guidelines prescribe requirements regarding shareholding and voting rights in relation to all private sector banks licensed by the RBI to operate in India. The guidelines specify the following ownership limits for shareholders based on their categorization:

- (i) In the case of individuals and non-financial entities (other than promoters / a promoter group), 10% of the paid up capital. However, in the case of promoters being individuals and non-financial entities in existing banks, the permitted promoter / promoter group shareholding shall be as prescribed under the February 2013 guidelines, i.e., 15%.
- (ii) In the case of entities from the financial sector, other than regulated or diversified or listed, 15% of the paid-up capital.

(iii) In the case of regulated, well diversified, listed entities from the financial sector shareholding by supranational institutions, public sector undertaking or governments, up to 40% of the paid-up capital is permitted for both promoters / a promoter group and non-promoters.

The RBI may permit increase of stake beyond the limits mentioned above on a case-to-case basis under circumstances such as relinquishment by existing promoters, rehabilitation, restructuring of problem, weak banks, entrenchment of existing promoters or in the interest of the bank or in the interest of consolidation in the banking sector.

Such restrictions could discourage or prevent a change in control, merger, consolidation, takeover or other business combination involving us, which might be beneficial to our shareholders. The RBI's approval is required for the acquisition or transfer of a bank's shares, which will increase the aggregate holding (direct and indirect, beneficial or otherwise) of an individual or a group to the equivalent of 5% or more of its total paid-up capital. The RBI, when considering whether to grant an approval, may take into account all matters that it considers relevant to the application, including ensuring that shareholders whose aggregate holdings are above specified thresholds meet fitness and propriety tests, as prescribed by the RBI. The RBI has accorded its approval for HDFC Limited to hold more than 10% of our stock. HDFC Limited's substantial stake in us could discourage or prevent another entity from exploring the possibility of a combination with us. These obstacles to potentially synergistic business combinations could negatively impact our share price and have a material adverse effect on our ability to compete effectively with other large banks and consequently our ability to maintain and improve our financial condition.

**Table of Contents**

Additionally, under the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (the "SEBI Listing Regulations"), all related party transactions will require approval from the audit committee. Further, all material related party transactions (based on the threshold provided under the SEBI Listing Regulations) will require shareholders' approval. Further, pursuant to the SEBI Listing Regulations a related party is unable to vote with regard to the approval of these transactions. For transactions with HDFC Limited shareholder approvals have been obtained for fiscal 2018. However, if we are unable to obtain the necessary shareholder approvals for transactions with HDFC Limited in the future, we would be required to forego certain opportunities, which could have a material adverse effect on our financial performance.

***Foreign investment in our shares may be restricted due to regulations governing aggregate foreign investment in the Bank's paid-up equity share capital.***

Aggregate foreign investment from all sources in a private sector bank is permitted up to 49% of the paid-up capital under the automatic route. This limit can be increased to 74% of the paid-up capital with prior approval from the Government of India. Pursuant to a letter dated February 4, 2015, the Foreign Investment Promotion Board has approved foreign investment in the Bank up to 74% of its paid-up capital. The approval is subject to examination by the RBI for compounding on the change of foreign shareholding since April 2010. If we are subject to any penalties or an unfavorable ruling by the RBI, this could have an adverse effect on our results of operation and financial condition. The RBI had previously imposed a restriction on the purchase of equity shares of the Bank by foreign investors, under its circular dated March 19, 2012. On February 16, 2017, the RBI lifted such restriction since the foreign shareholding in the Bank was below the maximum prescribed percentage of 74%. Thereafter the RBI notified by press release on February 17, 2017, and by separate letter to us dated February 28, 2017, that the foreign shareholding in all forms in the Bank crossed the said limit of 74% again. This was due to secondary market purchases of the Bank's equity shares during this period. Consequently, the RBI re-imposed the restrictions on the purchase of the Bank's equity shares by foreign investors. Further, SEBI has also enquired regarding the measures that the Bank has taken and will take in respect of breaches of the maximum prescribed percentage of foreign shareholding in the Bank, by its letter dated March 9, 2018. As of March 31, 2018, foreign investment in the Bank, including the shareholdings of HDFC Limited and its subsidiaries, constituted 72.62% of the paid-up capital of the Bank. The restrictions on the purchases of the Bank's equity shares could negatively affect the price of our shares and could limit the ability of investors to trade our shares in the market. These limitations and any consequent regulatory actions may also negatively affect the Bank's ability to raise additional capital to meet its capital adequacy requirements or to fund future growth through future issuances of additional equity shares, which could have a material adverse effect on our business and financial results. See *Supervision and Regulation Foreign Ownership Restriction*.

***Our success depends in large part upon our management team and skilled personnel and our ability to attract and retain such persons.***

We are highly dependent on our management team, including the efforts of our Chairperson, our Managing Director, our Deputy Managing Director, our Executive Director and members of our senior management. Our future performance is dependent on the continued service of these persons. We also face a continuing challenge to recruit and retain a sufficient number of skilled personnel, particularly if we continue to grow. Competition for management and other skilled personnel in our industry is intense, and we may not be able to attract and retain the personnel we need in the future. The loss of key personnel may restrict our ability to grow and consequently have a material adverse impact on our results of operations and financial position.

***We have previously been subject to penalties imposed by the RBI. Any regulatory investigations, fines, sanctions, and requirements relating to conduct of business and financial crime could negatively affect our business and financial results, or cause serious reputational harm.***

The RBI is empowered under the Banking Regulation Act to impose penalties on banks and their employees to enforce applicable regulatory requirements. In fiscal 2014, the RBI imposed penalties on us and many other banks for certain irregularities and violations discovered by the RBI during its scrutiny conducted in the first half of 2013, namely, non-observance of certain safeguards in respect of arrangement of at par payment of checks drawn by cooperative banks, exceptions in the periodic review of risk profiling of account holders, non-adherence to KYC rules for walk-in customers (non-customers) including for the sale of third party products, the sale of gold coins for cash in excess of Rs. 50,000 in certain cases and the non-submission of proper information as required by the RBI. We paid a penalty of Rs. 45.0 million in June 2013. Further, in this regard, the Financial Intelligence Unit (India) (the FIU), in January 2015, levied a fine on us of Rs. 2.6 million relating to our failure to detect and report attempted suspicious transactions. We filed an appeal against the order before the appellate tribunal stating that there were only roving enquiries made by the reporters of the media and there were no instances of any attempted suspicious transactions. Pursuant to the directions of the appellate tribunal, the Bank created a fixed deposit of Rs. 2.6 million in favor of the FIU. In June 2017, the appellate tribunal dismissed the penalty levied by the FIU and observed that the prescribed matter fell within the provisions of section 13(2)(a) of the Prevention of Money Laundering Act, 2002 ( PMLA ), 2002 (pursuant to which a warning was required to be given to the Bank), and that the matter did not fall within section 13(2)(d) of the PMLA (pursuant to which monetary penalties can be imposed on failure to comply with certain obligations under the PMLA) as mentioned by the FIU. The appellate tribunal further ordered that the fixed deposit created by the Bank as per the interim order of the appellate tribunal be released. In a letter dated September 8, 2017, we requested FIU's consent for liquidation of the Rs. 2.6 million fixed deposit receipt given the resolution of the case. FIU has responded to us on October 25, 2017, advising that it has challenged the appellate tribunal's order to release the fixed deposit receipt. They advised that the appeal, including application for stay, is to be listed before the Delhi High Court in due course and accordingly at this stage our request to liquidate the fixed deposit receipt is premature. The matter has now been listed for hearing on December 6, 2018 for further proceedings See *Supervision and Regulation - Penalties* .

**Table of Contents**

Additionally, during fiscal 2014, the RBI investigated a corporate borrower's loan and current accounts maintained with 12 Indian banks, including us. Based on its assessment, the RBI, in its press release dated July 25, 2014, levied penalties totaling Rs. 15 million on the 12 Indian banks. The penalty levied on us was Rs. 0.5 million on the grounds that we failed to exchange information about the conduct of the corporate borrower's account with other banks at intervals as prescribed in the RBI guidelines on Lending under Consortium Arrangement/Multiple Banking Arrangements. In October 2015, there were media reports about irregularities in advance import remittances in various banks, further to which the RBI had conducted a scrutiny of the transactions carried out by us. In April 2016, the RBI issued a show cause notice to us to which we submitted our detailed response. After considering our submissions, the RBI imposed a penalty of Rs. 20.0 million on us in July 2016, which we paid, on account of pendency in receipt of bills of entry relating to advance import remittances made and lapses in adhering to KYC/Anti-Money Laundering (AML) guidelines in this respect. See *Supervision and Regulation Penalties*. We cannot predict the initiation or outcome of any further investigations by other authorities or different investigations by the RBI. The penalties imposed by the RBI have generated adverse publicity for our business. Such adverse publicity, or any future scrutiny, investigation, inspection or audit which could result in fines, public reprimands, damage to our reputation, significant time and attention from our management, costs for investigations and remediation of affected customers, may materially adversely affect our business and financial results.

***Transactions with counterparties in countries designated as state sponsors of terrorism by the U.S. State Department, the Government of India or other countries, or with persons targeted by U.S., Indian, EU or other economic sanctions may cause potential customers and investors to avoid doing business with us or investing in our securities, harm our reputation or result in regulatory action which could materially and adversely affect our business.***

We engage in business with customers and counterparties from diverse backgrounds. In light of U.S., Indian, EU and other sanctions, it cannot be ruled out that some of our customers or counterparties may become the subject of sanctions. Such sanctions may result in our inability to gain or retain such customers or counterparties or receive payments from them. In addition, the association with such individuals or countries may damage our reputation or result in significant fines. This could have a material adverse effect on our business, financial results and the prices of our securities.

These laws, regulations and sanctions or similar legislative or regulatory developments may further limit our business operations. If we were determined to have engaged in activities targeted by certain U.S., Indian, EU or other statutes, regulations or executive orders, we could lose our ability to open or maintain correspondent or payable-through accounts with U.S. financial institutions, among other potential sanctions. In addition, depending on sociopolitical developments, even though we take measures designed to ensure compliance with applicable laws and regulations, our reputation may suffer due to our association with certain restricted targets. The above circumstances could have a material adverse effect on our business, financial results and the prices of our securities.

***Material changes in Indian banking regulations may adversely affect our business and our future financial performance.***

We operate in a highly regulated environment in which the RBI extensively supervises and regulates all banks. Our business could be directly affected by any changes in policies for banks in respect of directed lending, reserve requirements and other areas. For example, the RBI could change its methods of enforcing directed lending standards so as to require more lending to certain sectors, which could require us to change certain aspects of our business. In addition, we could be subject to other changes in laws and regulations, such as those affecting the extent to which we can engage in specific business, those that reduce our income through a cap on either fees or interest rates chargeable to our customers, or those affecting foreign investment in the banking industry, as well as changes in other

government policies and enforcement decisions, income tax laws, foreign investment laws and accounting principles. Laws and regulations governing the banking sector may change in the future and any changes may adversely affect our business, our future financial performance and the price of our equity shares and ADSs.

**Table of Contents**

***Our funding is primarily short- and medium-term and if depositors do not roll over deposited funds upon maturity our net income may decrease.***

Most of our funding requirements are met through short-term and medium-term funding sources, primarily in the form of retail deposits. Short-term deposits are those with a maturity not exceeding one year. Medium-term deposits are those with a maturity of greater than one year but not exceeding three years. See *Selected Statistical Information Funding* . However, a portion of our assets have long-term maturities, which sometimes causes funding mismatches. As of March 31, 2018, 37.1% of our loans are expected to mature within the next one year and 45.0% of our loans are expected to mature between the next one to three years. As of March 31, 2018, 42.2% of our deposits are expected to mature within the next year and 39.3% of our deposits are expected to mature between the next one to three years. In our experience, a substantial portion of our customer deposits has been rolled over upon maturity and has been, over time, a stable source of funding. However, if a substantial number of our depositors do not roll over deposited funds upon maturity, our liquidity position will be adversely affected and we may be required to seek more expensive sources of funding to finance our operations, which would result in a decline in our net income and have a material adverse effect on our financial condition. We may also face a concentration of deposits by our larger depositors. Any sudden or large withdrawals by such large depositors may impact our liquidity position.

***Any increase in interest rates would have an adverse effect on the value of our fixed income securities portfolio and could have a material adverse effect on our net income.***

Any increase in interest rates would have an adverse effect on the value of our fixed income securities portfolio and could have a material adverse effect on our net revenue. Policy rates were successively increased from February 2010 to March 2012 during which period the bout of interest rate tightening in India was faster than in many other economies. The RBI raised key policy rates from 5.25% (repo rate) in April 2010 to 8.5% in October 2011. However, key policy rates were eased from 8.0% (repo rate) in April 2012 to 7.25% in May 2013. In July 2013, the RBI increased the rate for borrowings under its marginal standing facility (which was introduced by the RBI in fiscal 2012) from 100 basis points to 300 basis points above the repo rate. This rate was eased from 200 basis points above the repo rate in September 2013 to 100 basis points above repo rate in October 2013. In contrast, the policy rates were tightened from 7.5% (repo rate) in September 2013 to 8.0% in January 2014. The RBI reduced the policy repo rate again to 7.75% in January 2015, further reducing it to 7.5% in March 2015, 7.25% in June 2015, 6.75% in September 2015, 6.5% in April 2016, 6.25% in October 2016, and 6.00% in August 2017, before increasing it to 6.25% in June 2018. We are, however, more structurally exposed to interest rate risk than banks in many other countries because of certain mandated reserve requirements of the RBI. See *Supervision and Regulation Legal Reserve Requirements* . These requirements result in Indian banks, such as ourselves, maintaining (as per RBI guidelines currently in force) a portion of our liabilities in bonds issued by the Government (19.5% as of June 2018, computed as per guidelines issued by the RBI). We are also required to maintain 4% of our liabilities (computed as per guidelines issued by the RBI) by way of a balance with the RBI. This, in turn, means that we could be adversely impacted by a rise in interest rates, especially if the rise were sudden or sharp. A rise in yields on fixed income securities, including government securities, will likely adversely impact our profitability. The aforementioned requirements would also have a negative impact on our net interest income and net interest margins since interest earned on our investments in government issued securities is generally lower than that earned on our other interest earning assets.

***Further competition and the development of advanced payment systems by our competitors would adversely impact our cash float and decrease fees we receive in connection with cash management services.***

The Indian market for cash management services ( CMS ) is marked by some distinctive characteristics and challenges such as a vast geography, a large number of small business-intensive towns, a large unorganized sector in various business supply chains, and infrastructural limitations for accessibility to many parts of the country. Over the years,

such challenges have made it a daunting task for CMS providers in the country to uncover the business potential and extend suitable services and product solutions to the business community.

We have been able to retain and increase our share of business in cash management services through traditional product offerings as well as by offering new age electronic banking services. With new entrants in the payment space such as new payment banks now being granted licenses to conduct business and certain financial technology companies, the competition in the payments landscape is likely to increase. Any increased competition within the payment space, any introduction of a more advanced payment system in India, or an inability for us to sustain our technology investments, may have a material adverse effect on our financial condition.

**Table of Contents**

***We could experience a decline in our revenue generated from activities on the equity markets if there is a prolonged or significant downturn on the Indian stock exchanges, and we may face difficulties in getting regulatory approvals necessary to conduct our business if we fail to meet regulatory limits on capital market exposures.***

We provide a variety of services and products to participants involved with the Indian stock exchanges. These include working capital funding and margin guarantees to share brokers, personal loans secured by shares, initial public offering finance for retail customers, stock exchange clearing services, collecting bankers to various public offerings and depository accounts. If there is a prolonged or significant downturn on the Indian stock exchanges, our revenue generated by offering these products and services may decrease, which would have a material adverse effect on our financial condition.

We are required to maintain our capital market exposures within the limits as prescribed by the RBI. Our capital market exposures are comprised primarily of investments in equity shares, loans to share brokers and financial guarantees issued to stock exchanges on behalf of share brokers.

As per RBI norms, a bank's capital market exposure is limited to 40% of its net worth under Indian GAAP as of March 31 of the previous year, both on a consolidated and non-consolidated basis. Our capital market exposure as of March 31, 2018 was 22.8% of our net worth on a non-consolidated basis and 24.0% on a consolidated basis, in each case, under Indian GAAP. See *Supervision and Regulation Large Exposures Framework*. If we fail to meet these regulatory limits in the future, we may face difficulties in obtaining other regulatory approvals necessary to conduct our normal course of business, which would have a material adverse effect on our business and operations.

***Any failure or material weakness of our internal control system could cause significant errors, which may have a materially adverse effect on our reputation, business, financial position or results of operations.***

We are responsible for establishing and maintaining adequate internal measures commensurate with our size and complexity of operations. Our internal or concurrent audit functions are equipped to make an independent and objective evaluation of the adequacy and effectiveness of internal controls on an ongoing basis to ensure that business units adhere to our policies, compliance requirements and internal circular guidelines. While we periodically test and update, as necessary, our internal control systems, we are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to guarantee effective internal controls in all circumstances. Given our high volume of transactions, it is possible that errors may repeat or compound before they are discovered and rectified. Our systems and internal control procedures that are designed to monitor our operations and overall compliance may not identify every instance of non-compliance or every suspicious transaction. If internal control weaknesses are identified, our actions may not be sufficient to fully correct such internal control weakness. We face operational risks in our various businesses and there may be losses due to deal errors, settlement problems, pricing errors, inaccurate reporting, breaches of confidentiality, fraud and failure of mission critical systems or infrastructure. Any error tampering or manipulation could result in losses that may be difficult to detect. As a result, we may come under additional regulatory scrutiny or be the target of enforcement actions, or suffer monetary losses or adverse reputation effects which, in each case, could be material, and could have a material adverse effect on our business, financial position or results of operation.

For example, certain unpublished price sensitive information ( UPSI ) relating to our financial results for the three months ended December 31, 2015 and the three months ended June 30, 2017 was leaked through the WhatsApp mobile app ahead of the official publication of such results. Following this leak, we received an order from SEBI on February 23, 2018 directing us, among others, to (i) submit a report on our current systems and controls relating to the protection of UPSI and how such systems and controls have been strengthened since the aforementioned leak and

(ii) conduct an internal inquiry into the leakage of UPSI relating to our financial results and submit a report in relation thereto. In accordance with the SEBI order, we filed both reports with SEBI on May 30, 2018. Any additional action by SEBI in connection with its investigation and our respective reports could subject us to further scrutiny or enforcement actions and have a material adverse effect on our reputation, business, financial position or results of operation.

***Significant fraud, system failure or calamities would disrupt our revenue generating activities in the short-term and could harm our reputation and adversely impact our revenue-generating capabilities.***

Our business is highly dependent on our ability to efficiently and reliably process a high volume of transactions across numerous locations and delivery channels. We place heavy reliance on our technology infrastructure for processing this data and therefore ensuring the security of this system and its availability is of paramount importance. Our systemic and operational controls may not be adequate to prevent any adverse impact from frauds, errors, hacking and system failures. A significant system breakdown or system failure caused by intentional or unintentional acts would have an adverse impact on our revenue-generating activities and lead to financial loss. Our reputation could be adversely affected by fraud committed by employees, customers or outsiders, or by our perceived inability to properly manage fraud-related risks. Our inability or perceived inability to manage these risks could lead to enhanced regulatory oversight and scrutiny. Fraud or system failures by other Indian banking institutions (such as frauds uncovered in early 2018 at one of India's public sector banks) could also adversely affect our reputation and revenue-generating activity by reflecting negatively on our industry more generally, and in certain circumstances we could be required to absorb losses arising from intentional or unintentional acts by third party institutions. We have established a geographically remote disaster recovery site to support critical applications, and we believe that we would be able to restore data and resume processing in the event of a significant system breakdown or failure. However, it is possible the disaster recovery site may also fail or it may take considerable time to make the system fully operational and achieve complete business resumption using the alternate site. Therefore, in such a scenario where the primary site is also completely unavailable, there may be significant disruption to our operations, which would materially adversely affect our reputation and financial condition.

**Table of Contents*****Our business and financial results could be impacted materially by adverse results in legal proceedings.***

Legal proceedings, including lawsuits, investigations by regulatory authorities and other inspections or audits, could result in judgments, fines, public reprimands, damage to our reputation, significant time and attention from our management, costs for investigations and remediation of affected customers, or other adverse effects on our business and financial results. We establish reserves for legal claims when payments associated with claims become probable and the costs can be reasonably estimated. We may still incur legal costs for a matter even if we have not established a reserve. In addition, the actual cost of resolving a legal claim may be substantially higher than any amounts reserved for that matter. The ultimate resolution of any pending or future legal proceeding, depending on the remedy sought and granted, could materially adversely affect our results of operations and financial condition. See *Business Legal Proceedings* .

***We may breach third party intellectual property rights.***

We may be subject to claims by third parties, both inside and outside India, if we breach their intellectual property rights by using slogans, names, designs, software or other such rights, which are of a similar nature to the intellectual property these third parties may have registered. Any legal proceedings which result in a finding that we have breached third parties' intellectual property rights, or any settlements concerning such claims, may require us to provide financial compensation to such third parties or make changes to our marketing strategies or to the brand names of our products, which may have a materially adverse effect on our business prospects, reputation, results of operations and financial condition.

***Negative publicity could damage our reputation and adversely impact our business and financial results.***

Reputational risk, or the risk to our business, earnings and capital from negative publicity, is inherent in our business. The reputation of the financial services industry in general has been closely monitored as a result of the financial crisis and other matters affecting the financial services industry. Negative public opinion about the financial services industry generally or us specifically could adversely affect our ability to attract and retain customers, and may expose us to litigation and regulatory action. Negative publicity can result from our actual or alleged conduct in any number of activities, including lending practices, mortgage servicing and foreclosure practices, corporate governance, regulatory compliance, mergers and acquisitions and related disclosure, sharing or inadequate protection of customer information, and actions taken by government regulators and community organizations in response to that conduct. Although we take steps to minimize reputational risk in dealing with customers and other constituencies, we, as a large financial services organization with a high industry profile, are inherently exposed to this risk.

***We face cyber threats, such as hacking, phishing and trojans, attempting to exploit our network to disrupt services to customers and/or theft or leaking of sensitive internal Bank data or customer information. This may cause damage to our reputation and adversely impact our business and financial results.***

We offer internet banking services to our customers. Our internet banking channel includes multiple services such as electronic funds transfer, bill payment services, usage of credit cards on-line, requesting account statements, and requesting check books. We are therefore exposed to various cyber threats related to these services or to other sensitive Bank information, with such threats including: a) phishing and trojans targeting our customers, whereby fraudsters send unsolicited mails to our customers seeking account-sensitive information or infecting customer computers in an attempt to search and export account-sensitive information; b) hacking, whereby attackers seek to hack into our website with the primary intention of causing reputational damage to us by disrupting services; c) data theft whereby cyber criminals attempt to intrude into our network with the intention of stealing our data or information or to extort money; and d) leaking, whereby sensitive internal Bank data or customer information is

inappropriately disclosed by parties entitled to access it. Attempted cyber threats fluctuate in frequency but are generally increasing in frequency, and while certain of the foregoing events have occurred in the past, we cannot guarantee they will not reoccur in the future. As the sophistication of cyber incidents continues to evolve, we will likely be required to expend additional resources to continue to modify or enhance our protective measures or to investigate and remediate any vulnerability to cyber incidents. In addition, certain cyber incidents, such as surveillance, may remain undetected for an extended period. There is also the risk of our customers incorrectly blaming us and terminating their accounts with us for a cyber-incident which might have occurred on their own system or with that of an unrelated third party. Any cyber security breach could also subject us to additional regulatory scrutiny and expose us to civil litigation and related financial liability.

**Table of Contents**

***A failure, inadequacy or security breach in our information technology and telecommunication systems may adversely affect our business, results of operation or financial condition.***

Our ability to operate and remain competitive depends in part on our ability to maintain and upgrade our information technology systems and infrastructure on a timely and cost-effective basis, including our ability to process a large number of transactions on a daily basis. Our operations also rely on the secure processing, storage and transmission of confidential and other information in its computer systems and networks. Our financial, accounting or other data processing systems and management information systems or our corporate website may fail to operate adequately or become disabled as a result of events that may be beyond our control or may be vulnerable to unauthorized access, computer viruses or other attacks. See *We face cyber threats, such as hacking, phishing and trojans, attempting to exploit our network to disrupt services to customers and/or theft of sensitive internal Bank data or customer information. This may cause damage to our reputation and adversely impact our business and financial results* . Further, the information available to and received by our management through its existing systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations. If any of these systems are disabled or if there are other shortcomings or failures in our internal processes or systems, it may disrupt our business or impact our operational efficiencies, and render us liable to regulatory intervention or damage to its reputation. The occurrence of any such events may adversely affect our business, results of operation and financial condition.

***Our business is highly competitive, which makes it challenging for us to offer competitive prices to retain existing customers and solicit new business, and our strategy depends on our ability to compete effectively.***

We face strong competition in all areas of our business, and some of our competitors are larger than we are. We compete directly with large public and private sector banks, some of which are larger than we are based on certain metrics such as customer assets and deposits, branch network and capital. These banks are becoming more competitive as they improve their customer services and technology. In addition, we compete directly with foreign banks, which include some of the largest multinational financial companies in the world. See *We may face increased competition as a result of revised guidelines that relax restrictions on foreign ownership and participation in the Indian banking industry, and the entry of new banks in the private sector which could cause us to lose existing business or be unable to compete effectively for new business.* . In addition, new entrants into the financial services industry, including companies in the financial technology sector, may further intensify competition in the business environments, especially in the digital business environment, in which we operate, and as a result, we may be forced to adapt our business to compete more effectively. There can be no assurance that we will be able to respond effectively to current or future competition or that the technological investments we make in response to such competition will be successful. Due to competitive pressures, we may be unable to successfully execute our growth strategy and offer products and services (whether current or new offerings) at reasonable returns and this may adversely impact our business. If we are unable to retain and attract new customers, our revenue and net income will decline, which could materially adversely affect our financial condition. See *Business Competition* .

***We may face increased competition as a result of revised guidelines that relax restrictions on foreign ownership and participation in the Indian banking industry, and the entry of new banks in the private sector which could cause us to lose existing business or be unable to compete effectively for new business.***

The Government of India regulates foreign ownership in private sector banks. Foreign ownership up to 49% of the paid-up capital is permitted in Indian private sector banks under the automatic route and this limit can be increased up to 74% with prior approval of the Government of India. However, under the Banking Regulation Act, read together with the Reserve Bank of India (Ownership in Private Sector Banks) Directions, 2016, a shareholder cannot exercise voting rights in excess of 15% of the total voting rights. The ceiling on voting rights may be increased in a phased

manner up to 26% by the RBI. The RBI has also from time to time issued various circulars and regulations regarding ownership of private banks and licensing of new private sector banks in India. See *Supervision and Regulation Entry of new banks in the private sector* . Reduced restrictions on foreign ownership of Indian banks could increase the presence of foreign banks in India, increased competition in the industry in which we operate.

In February 2013, the RBI released guidelines for the licensing of new banks in the private sector. The RBI permitted private sector entities owned and controlled by Indian residents and entities in the public sector in India to apply to the RBI for a license to operate a bank through a wholly-owned non-operative financial holding company ( NOFHC ) route, subject to compliance with certain specified criteria. Such a NOFHC was permitted to be the holding company of a bank as well as any other financial services entity, with the objective that the holding company ring-fences the regulated financial services entities in the group, including the bank, from other activities of the group. Pursuant to these guidelines, in fiscal 2016 IDFC Bank and Bandhan Bank commenced banking operations.

**Table of Contents**

In November 2014, the RBI released guidelines for the licensing of payments banks and small finance banks in the private sector. Since promulgation, such banks have been established and operational pursuant to these guidelines, which have increased competition in the markets in which we operate.

In August 2016, the RBI released final guidelines for on-tap Licensing of Universal Banks in the Private Sector. The guidelines aim at moving from the current stop and go licensing approach (wherein the RBI notifies the licensing window during which a private entity may apply for a banking license) to a continuous or on-tap licensing regime. Among other things, the new guidelines specify conditions for the eligibility of promoters, corporate structure and foreign shareholdings. One of the key features of the new guidelines is that, unlike the February 2013 guidelines (mentioned above), the new guidelines make the NOFHC structure non-mandatory in the case of promoters being individuals or standalone promoting/converting entities which do not have other group entities.

In May 2016, the RBI issued the Reserve Bank of India (Ownership in Private Sector Banks) Directions, 2016. These guidelines prescribe requirements regarding shareholding and voting rights in relation to all private sector banks licensed by the RBI to operate in India. See *Supervision and Regulation Entry of new banks in the private sector* .

Any growth in the presence of foreign banks or new banks in the private sector may increase the competition that we face and, as a result, have a material adverse effect on our business and financial results.

***If the goodwill recorded in connection with our acquisitions becomes impaired, we may be required to record impairment charges, which would decrease our net income and total assets.***

In accordance with U.S. GAAP, we have accounted for our acquisitions using the purchase method of accounting. We recorded the excess of the purchase price over the fair value of the assets and liabilities of the acquired companies as goodwill. U.S. GAAP requires us to test goodwill for impairment at least annually, or more frequently if events or changes in circumstances indicate that goodwill may be impaired. Goodwill is tested by initially estimating fair value of the reporting unit and then comparing it against the carrying amount including goodwill. If the carrying amount of a reporting unit exceeds its estimated fair value, we are required to record an impairment loss. The amount of impairment and the remaining amount of goodwill, if any, is determined by comparing the implied fair value of the reporting unit as of the test date against the carrying value of the assets and liabilities of that reporting unit as of the same date. See Notes 2u and 2v, Summary of significant accounting policies Business combination and Summary of significant accounting policies Goodwill and other intangibles , in our consolidated financial statements.

***Many of our branches have been recently added to our branch network and are not operating with the same efficiency as compared to the rest of our existing branches, which adversely affects our profitability.***

As at March 31, 2013, we had 3,062 branches and as at March 31, 2018, we had 4,787 branches, a significant increase in the number of branches. Some of the newly added branches are currently operating at a lower efficiency level as compared with our established branches. While we believe that the newly added branches will achieve the productivity benchmark set for our entire network over time, the success in achieving our benchmark level of efficiency and productivity will depend on various internal and external factors, some of which are not under our control. The sub-optimal performance of the newly added branches, if continued over an extended period of time, would have a material adverse effect on our profitability.

***Deficiencies in accuracy and completeness of information about customers and counterparties may adversely impact us.***

We rely on accuracy and completeness of information about customers and counterparties while carrying out transactions with them or on their behalf. We may also rely on representations as to the accuracy and completeness of such information. For example, we may rely on reports of independent auditors with respect to financial statements, and decide to extend credit based on the assumption that the customer's audited financial statements conform to generally accepted accounting principles and present fairly, in all material respects, the financial condition, results of operations and cash flows of the customer. Our financial condition and results of operations could be negatively impacted by reliance on information that is inaccurate or materially misleading. This may affect the quality of information available to us about the credit history of our borrowers, especially individuals and small businesses. As a result, our ability to effectively manage our credit risk may be adversely affected.

***We present our financial information differently in other markets or in certain reporting contexts.***

In India, our equity shares are traded on the BSE Limited (the "BSE") and National Stock Exchange of India Limited (the "NSE"). BSE and NSE rules, in connection with other applicable Indian laws, require us to report our financial results in India in Indian GAAP. Because of the difference in accounting principles and presentation, certain financial information available in our required filings in the United States may be presented differently than in the financial information we provide under Indian GAAP.

---

**Table of Contents**

Additionally, we make available information on our website and in our presentations in order to provide investors a view of our business through metrics similar to what our management uses to measure our performance. Some of the information we make available from time to time may be in relation to our unconsolidated or our consolidated results under Indian GAAP or under U.S. GAAP. Potential investors should read any notes or disclaimers to such financial information when evaluating our performance to confirm how the information is being presented, since the information that may have been prepared with a different presentation may not be directly comparable.

Scheduled commercial banks in India, including us, insurers / insurance companies and non-banking financial companies will be required to prepare financial statements under Indian Accounting Standards, as per the implementation roadmap drawn up by the Ministry of Corporate Affairs. In addition, we may adopt IFRS for the purposes of our filings pursuant to the Securities Exchange Act of 1934 (the Exchange Act ). If we do, we may be adversely affected by this transition.

The Ministry of Corporate Affairs, in its press release dated January 18, 2016, issued a roadmap for the implementation of Indian Accounting Standards ( IND-AS ) converged with International Financial Reporting Standards as issued by the International Accounting Standards Board ( IFRS ) with certain carve-outs for scheduled commercial banks, insurance companies and non-banking financial companies (the 2016 Roadmap ). The 2016 Roadmap required such institutions to prepare IND-AS-based financial statements for accounting periods commencing on or after April 1, 2018, and to prepare comparative financial information for accounting periods commencing on or after April 1, 2017. The RBI, in its circular dated February 11, 2016, required all scheduled commercial banks to comply with IND-AS for financial statements for the same periods stated above. The RBI does not permit banks to adopt IND-AS earlier than these timelines. In April 2018, the RBI deferred the effective date for implementation of IND-AS by one year at which point the necessary legislative amendments are expected to have been completed. Earlier, in June 2017, the Insurance Regulatory and Development Authority of India had deferred the effective date for implementation of IND-AS accounting model in the insurance sector by two years.

In conjunction with the implementation of IND-AS for our local Indian results, we may adopt IFRS for the purposes of our filings pursuant to Section 13 or 15(d) of, and our reports pursuant to Rule 13a-16 or 15d-16 under, the Exchange Act. Should we choose to do so, our first year of reporting in accordance with IFRS would be for the accounting period commencing on April 1, 2019 and, as such, we would be permitted to file two years, rather than three years, of statements of income, changes in shareholders' equity and cash flows prepared in accordance with IFRS.

The new accounting standards are expected to change, among other things, our methodologies for estimating allowances for probable loan losses and classifying and valuing our investment portfolio, as well as our revenue recognition policy. It is possible that our financial condition, results of operations and changes in shareholders' equity may appear materially different under IND-AS or IFRS than under Indian or U.S. GAAP, respectively. Further, during the transition to reporting under the new standards, we may encounter difficulties in the ongoing implementation of the new standards and development of our management information systems. Given the increased competition for the small number of IFRS-experienced accounting personnel in India, it may be difficult for us to employ the appropriate accounting personnel to assist us in preparing IND-AS or IFRS financial statements. Moreover, there is no significant body of established practice from which we may draw when forming judgments regarding the application of the new accounting standards. There can be no assurance that the Bank's controls and procedures will be effective in these circumstances or that a material weakness in internal control over financial reporting will not occur. Further, failure to successfully adopt IND-AS or IFRS could adversely affect the Bank's business, financial condition and results of operations.

***Statistical, industry and financial data obtained from industry publications and other third-party sources may be incomplete or unreliable.***

We have not independently verified certain data obtained from industry publications and other third-party sources referred to in this document and therefore, while we believe them to be true, we cannot assure you that they are complete or reliable. Such data may also be produced on different bases from those used in the industry publications we have referenced. Therefore, discussions of matters relating to India, its economy and the industries in which we currently operate are subject to the caveat that the statistical and other data upon which such discussions are based may be incomplete or unreliable.

---

**Table of Contents****Risks Relating to India*****Financial instability in other countries may cause increased volatility in the Indian financial market.***

The Indian market and the Indian economy are influenced by the economic and market conditions in other countries, particularly the emerging market countries in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other markets may cause increased volatility in the Indian financial market and, more generally, in the Indian economy. Any financial instability or disruptions could also have a negative impact on the Indian economy and could harm the Bank's business, its future financial performance and the prices of its equity shares and ADSs.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. In particular, sub-prime mortgage loans in the United States have experienced increased rates of delinquency, foreclosure and loss. The recent history of financial crises which have affected both emerging and developed economies has given rise to heightened liquidity and credit concerns and caused an increase in volatility in the global credit and financial markets. Developments in the Eurozone have further exacerbated concerns relating to liquidity and volatility in global capital markets.

Developments in the Eurozone during the past couple of years have exacerbated the ongoing global economic crisis. Large budget deficits and rising public debts have triggered sovereign debt crisis in multiple European countries that resulted in the bailout of certain economies and increased the risk of government debt defaults, forcing governments to undertake aggressive budget cuts and austerity measures. On the back of this crisis, the U.K. voted to leave the European Union in 2016, prompting a plunge in the pound sterling and a credit rating downgrade. The outcome of the U.K. referendum created fear of potential further exits from the European Economic and Monetary Union. While some of these apprehensions have been alleviated by favorable outcomes of subsequent Dutch and French elections, election results in Germany and Italy (where anti-EU parties gained support) and the rise of separatists in Catalonia in Spain show that these fears still persist. Moreover, the terms of the U.K.'s exit from the European Union are in the process of being negotiated and this uncertainty regarding the future of the relationship between the U.K. and the European Union could keep financial markets on edge. In addition, the sovereign ratings of various European Union countries have been downgraded since 2012. Financial markets and the supply of credit could continue to be negatively impacted by ongoing concerns surrounding the sovereign debts and fiscal deficits of European countries, the possibility of further downgrades of, or defaults on, sovereign debt, concerns regarding a slowdown in growth in certain economies, as well as uncertainties regarding the stability and overall standing of the European Monetary Union. These and other related events have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, the widening of credit spreads and a lack of price transparency.

In response to such developments, legislators and financial regulators in the United States, Europe and other jurisdictions, including India, have implemented several policy measures designed to add stability to the financial markets. However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current adverse conditions in the global credit markets continue or if there is any significant financial disruption, this could cause increased volatility in the Indian financial market and have an adverse effect on our business, future financial performance and the trading price of our equity shares and ADSs.

***Any adverse change in India's credit rating, or the credit rating of any country in which our foreign branches are located, by an international rating agency could adversely affect our business and profitability.***

The Bank is rated BBB- by Standard & Poor's (S&P) and Baa2 by Moody's, two international rating agencies. In the case of the international rating agencies, the ratings of all Indian banks are capped at the sovereign rating (that is, BBB- by S&P and Baa2 by Moody's). In India, the Bank is rated AAA by CRISIL, CARE and India Ratings (the Indian arm of Fitch Ratings), which are the highest credit ratings assigned on the domestic scale.

There is a risk that the Bank's ratings may be downgraded when the rating agencies revise their outlook on India's sovereign rating or when there is a significant deterioration in the Bank's existing financial strength and business position. The Bank's rating may also be revised when the rating agencies undertake changes to their rating methodologies. For instance, in April 2015, Moody's revised its bank rating methodology and the assessment of government support to banks, following which the ratings of several banks globally, including Indian banks, were revised. Following this methodology change, the Bank's rating was revised to Baa3 from Baa2 so as to cap it at the Indian sovereign rating.

**Table of Contents**

In addition, the rating of our foreign branches may be impacted by the sovereign rating of the country in which those branches are located, particularly if the sovereign rating is below India's rating. Pursuant to applicable ratings criteria published by S&P, the rating of any bond issued in a jurisdiction is capped by the host country rating. Accordingly, any revision to the sovereign rating of the countries in which our branches are located to below India's rating could impact the rating of our foreign branches and any securities issued from those branches. For example, in fiscal 2016, declining oil prices caused the credit ratings of many oil exporting countries to be downgraded and we had outstanding bonds issued from a branch in such a country which were negatively affected by such downgrade.

Going forward, the sovereign ratings outlook for India will remain dependent on the growth of the economy and the inflation environment, as well as exercise of adequate fiscal restraint by the government. Any adverse change in India's credit rating, or the credit rating of any country in which our foreign branches are located, by international rating agencies may adversely impact our business financial position and liquidity, limit our access to capital markets, and increase our cost of borrowing.

***If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.***

Any change in Indian tax laws, including the upward revision to the currently applicable normal corporate tax rate of 30% along with applicable surcharge and cess, could affect our tax burden. Other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds and long-term capital gains on equity shares, if withdrawn in the future, may no longer be available to us. Any adverse order passed by the appellate authorities/tribunals/courts would have an impact on our profitability.

As of July 1, 2017, GST in India replaced taxes levied by central and state governments with a unified tax regime in respect of certain goods and services for all of India. However, given the recent introduction of the GST in India, there is no established practice regarding the implementation of, and compliance with, GST. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented.

Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures and/or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of GST may have a material adverse effect on our business, financial condition and results of operations.

The General Anti-Avoidance Rules ( GAAR ) have come into effect from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to us, it may have an adverse tax impact on us.

The Finance Bill, 2018, which was earlier approved by the Parliament has been enacted and came into effect from April 1, 2018. The exemption previously granted in respect of payment of long term capital gains tax was withdrawn and such tax became payable by the investors from April 1, 2018. We cannot predict whether any tax laws or regulations impacting our products will be enacted, what the nature and impact of the specific terms of any such laws or regulations will be or whether, if at all, any laws or regulations would have a material adverse effect on our

business, financial condition and results of operations.

***Any volatility in the exchange rate may lead to a decline in India's foreign exchange reserves and may affect liquidity and interest rates in the Indian economy, which could adversely impact us.***

Capital flows picked up substantially during fiscal 2017, reflecting a reassessment of investor expectations about future domestic growth prospects following the election of a pro-reform government in 2014. While the CAD remained a main area of concern over fiscal 2012 and fiscal 2013, it shrunk sharply in fiscal 2014 to 1.7% of GDP, and fell further in fiscal 2016 to 0.7% of GDP, respectively. A sharp contraction in the oil imports bill on the back of a near 50% decline in global crude prices was the main reason behind the improvement in the current account position. However, with the recent rise in oil prices, we expect CAD to have been approximately 1.8% in fiscal 2018.

---

**Table of Contents**

During fiscal 2014, the rupee came under significant and sustained selling pressure driven by growing anxiety about domestic growth prospects and global risk aversion. The rupee depreciated in fiscal 2014 by 10.1% compared to the U.S. dollar. Investor expectations that reforms implemented by the Government will lead to an improvement in the long-term growth outlook helped to improve the rupee's performance, reducing the depreciation trend to 3.85% in fiscal 2015. During fiscal 2016, the rupee depreciated by 6.32% primarily reflecting global risk aversion and a strong U.S. dollar. However, in line with other emerging markets, which experienced currency appreciation in fiscal 2017, the Indian rupee also appreciated by 2.1% against the U.S. dollar. This was mainly attributed to repricing of the Indian assets by international investors (driven by domestic economic and political stability) alongside the disappointment relating to the U.S. reform agenda. In fiscal 2018, the rupee ranged between a high of Rs.65.71 per US\$1.00 and a low of Rs.63.38 per US\$1.00. Pressure developed in the last two quarters of fiscal 2018 as oil prices rose and trade war risks escalated globally. In the first quarter of fiscal 2019, the rupee depreciated by 5.1% against the U.S. dollar. Rising oil prices and consequently marginal deterioration of India's CAD, slowdown in global trade volumes and a general risk aversion towards emerging market currencies (because of tariffs and trade war risks) have all affected the rupee negatively so far this fiscal year. Going forward, the Indian rupee may be impacted by factors such as: (a) the tightening in U.S. monetary policy, (b) the rise in protectionist voices across the world (c) uncertainty surrounding the United Kingdom's exit from the European Union, (d) the slower pace of growth in China, (e) the revival of the domestic economy and f) rise in oil prices.

Further, global risk aversion could mean a continuation of the rotation of global fund flows from emerging markets to U.S. markets over the medium term. The Indian rupee may be more vulnerable than other emerging market currencies on the back of a deterioration in the CAD and an increase in inflation rates in the second half of fiscal 2019.

Nevertheless, it remains a possibility that the RBI will intervene in the foreign exchange markets to stamp out excess volatility in the exchange rate in the event of potential shocks, such as an increase in U.S. interest rates or a break-down in the negotiations between EU and U.K. policymakers. Any such intervention by the RBI may result in a decline in India's foreign exchange reserves and, subsequently, reduce the amount of liquidity in the domestic financial system, which would, in turn, cause domestic interest rates to rise.

Further, any increased volatility in capital flows may also affect monetary policy decision-making. For instance, a period of net capital outflows might force the RBI to keep monetary policy tighter than optimal to guard against currency depreciation.

***Political instability or changes in the central and state governments in India could delay the liberalization of the Indian economy and adversely affect economic conditions in India generally, which would impact our financial results and prospects.***

Since 1991, successive Indian governments have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector. Nevertheless, the roles of the Indian central and state governments in the Indian economy as producers, consumers and regulators remain significant as independent factors in the Indian economy. The election of a pro-business majority government in May 2014 has marked a distinct increase in expectations for policy and economic reforms among certain aspects of the Indian economy. There is no guarantee that the current government will be able to enact an optimal set of reforms or that any such reforms would continue or succeed if there were a change in the current majority leadership in the government in the future. There is also no guarantee that the government will announce an optimal set of reforms or policies in the future. In November 2016, the government undertook demonetization of high denomination notes of Rs. 500 and Rs. 1,000. Short-term disruptions that the cash squeeze caused, may have weighed down on the economy. The rate of economic liberalization is subject to change and specific laws and policies affecting banking and finance companies, foreign investment, currency exchange and other matters affecting investment in our securities are continuously evolving as well. In addition, the GST was implemented in India in July 2017 and replaced multiple cascading taxes levied by the

Indian central and state governments. Any significant change in India's economic liberalization, deregulation policies or other major economic reforms could adversely affect business and economic conditions in India generally and our business in particular.

***Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries would negatively affect the Indian market where our shares trade and lead to a loss of confidence and impair travel, which could reduce our customers' appetite for our products and services.***

Terrorist attacks, such as those in Mumbai in November 2008, and other acts of violence or war may negatively affect the Indian markets on which our equity shares trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, make travel and other services more difficult and, as a result, ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan or between India and China might result in investor concern about stability in the region, which could adversely affect the price of our equity shares and ADSs.

India has also witnessed civil disturbances in recent years and future civil unrest as well as other adverse social, economic and political events in India could have an adverse impact on us. Such incidents also create a greater perception that investment in Indian companies involves a higher degree of risk, which could have an adverse impact on our business and the price of our equity shares and ADSs.

**Table of Contents*****Natural calamities, climate change and health epidemics could adversely affect the Indian economy, or the economy of other countries where we operate, our business and the price of our equity shares and ADSs.***

India has experienced natural calamities such as earthquakes, floods and droughts in the past few years. The extent and severity of these natural disasters determine their impact on the Indian economy. In particular, climatic and weather conditions, such as the level and timing of monsoon rainfall, impact the agricultural sector, which constituted approximately 15% of India's GDP in 2017. Prolonged spells of below or above normal rainfall or other natural calamities, or global or regional climate change, could adversely affect the Indian economy and our business, especially our rural portfolio. Similarly, global or regional climate change in India and other countries where we operate could result in change in weather patterns and frequency of natural calamities like droughts, floods and cyclones, which could affect the economy of India, the countries where we operate and our operations in those countries.

Health epidemics could also disrupt our business. In fiscal 2010, there were outbreaks of swine flu, caused by the H1N1 virus, in certain regions of the world, including India and several countries in which we operate. Any future outbreak of health epidemics may restrict the level of business activity in affected areas, which may in turn adversely affect our business and the price of our equity shares and ADSs could be adversely affected.

***Investors may have difficulty enforcing foreign judgments in India against the Bank or its management.***

We are a limited liability company incorporated under the laws of India. Substantially all of the Bank's directors and executive officers and some of the experts named herein are residents of India and a substantial portion of the assets of the Bank and such persons are located in India. As a result, it may not be possible for investors to effect service of process on the Bank or such persons in jurisdictions outside of India, or to enforce against them judgments obtained in courts outside of India predicated upon civil liabilities of the Bank or such directors and executive officers under laws other than Indian Law.

In addition, India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Recognition and enforcement of foreign judgments is provided for under section 13 and section 44A of the Indian Civil Procedure Code (the Civil Procedure Code). Section 44A of the Civil Procedure Code provides that where a foreign judgment has been rendered by a superior court in any country or territory outside India that the Government has, by notification, declared to be a reciprocating territory, that judgment may be enforced in India by proceedings in execution as if it had been rendered by the relevant court in India. However, section 44A of the Civil Procedure Code is applicable only to monetary decrees not being in the nature of any amounts payable in respect of taxes or other charges of a like nature or in respect of a fine or other penalty and is not applicable to arbitration awards.

The United States has not been declared by the government to be a reciprocating territory for the purposes of section 44A of the Civil Procedure Code. However, the United Kingdom has been declared by the government to be a reciprocating territory and the High Courts in England as the relevant superior courts. A judgment of a court in a jurisdiction which is not a reciprocating territory, such as the United States, may be enforced only by a new suit upon the judgment and not by proceedings in execution. Section 13 of the Civil Procedure Code provides that a foreign judgment shall be conclusive as to any matter thereby directly adjudicated upon except: (i) where it has not been pronounced by a court of competent jurisdiction; (ii) where it has not been given on the merits of the case; (iii) where it appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where it has been obtained by fraud; or (vi) where it sustains a claim founded on a breach of any law in force in India. The suit must be brought in India within three years from the date of

the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if it viewed the amount of damages awarded as excessive or inconsistent with Indian practice. A party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to repatriate outside India any amount recovered pursuant to execution. Any judgment in a foreign currency would be converted into Indian rupees on the date of the judgment and not on the date of the payment. The Bank cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

---

**Table of Contents****Risks Relating to the ADSs and Equity Shares**

***Historically, our ADSs have traded at a premium to the trading prices of our underlying equity shares, a situation which may not continue.***

Historically, our ADSs have traded on the New York Stock Exchange (the NYSE) at a premium to the trading prices of our underlying equity shares on the Indian stock exchanges. See *Price Range of Our American Depositary Shares and Equity Shares* for the underlying data. We believe that this price premium has resulted from the relatively small portion of our market capitalization previously represented by ADSs, restrictions imposed by Indian law on the conversion of equity shares into ADSs, and an apparent preference for investors to trade dollar-denominated securities. Over time, some of the restrictions on issuance of ADSs imposed by Indian law have been relaxed and we expect that other restrictions may be relaxed in the future. It is possible that in the future our ADSs will not trade at any premium to our equity shares and could even trade at a discount to our equity shares.

***Investors in ADSs will not be able to vote.***

Investors in ADSs will have no voting rights, unlike holders of equity shares. Under the deposit agreement, the depositary will abstain from voting the equity shares represented by the ADSs. If you wish, you may withdraw the equity shares underlying the ADSs and seek to vote (subject to Indian restrictions on foreign ownership) the equity shares you obtain upon withdrawal. However, this withdrawal process may be subject to delays and additional costs and you may not be able to redeposit the equity shares. For a discussion of the legal restrictions triggered by a withdrawal of equity shares from the depositary facility upon surrender of ADSs, see *Restrictions on Foreign Ownership of Indian Securities* and *Description of American Depositary Shares Voting Rights*.

***Your ability to withdraw equity shares from the depositary facility is uncertain and may be subject to delays.***

India's restrictions on foreign ownership of Indian companies limit the number of equity shares that may be owned by foreign investors and generally require government approval for foreign investments. Investors who withdraw equity shares from the ADSs depositary facility for the purpose of selling such equity shares will be subject to Indian regulatory restrictions on foreign ownership upon withdrawal. The withdrawal process may be subject to delays. For a discussion of the legal restrictions triggered by a withdrawal of equity shares from the depositary facility upon surrender of ADSs, see *Restrictions on Foreign Ownership of Indian Securities*.

***Restrictions on deposit of equity shares in the depositary facility could adversely affect the price of our ADSs.***

Under current Indian regulations, an ADSs holder who surrenders ADSs and withdraws equity shares may deposit those equity shares again in the depositary facility in exchange for ADSs. An investor who has purchased equity shares in the Indian market may also deposit those equity shares in the ADSs program. However, the deposit of equity shares may be subject to securities law restrictions and the restriction that the cumulative aggregate number of equity shares that can be deposited as of any time cannot exceed the cumulative aggregate number represented by ADSs converted into underlying equity shares as of such time. These restrictions increase the risk that the market price of our ADSs will be below that of our equity shares.

***There is a limited market for the ADSs.***

Although our ADSs are listed and traded on the NYSE, any trading market for our ADSs may not be sustained, and there is no assurance that the present price of our ADSs will correspond to the future price at which our ADSs will trade in the public market. Indian legal restrictions may also limit the supply of ADSs. The only way to add to the

supply of ADSs would be through an additional issuance. We cannot guarantee that a market for the ADSs will continue.

***Conditions in the Indian securities market may affect the price or liquidity of our equity shares and ADSs.***

The Indian securities markets are smaller and more volatile than securities markets in more developed economies. The Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Currently, prices of securities listed on Indian exchanges are displaying signs of volatility linked among other factors to the uncertainty in the global markets and the rising inflationary and interest rate pressures domestically. The governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Future fluctuations or trading restrictions could have a material adverse effect on the price of our equity shares and ADSs.

**Table of Contents*****Settlement of trades of equity shares on Indian stock exchanges may be subject to delays.***

The equity shares represented by our ADSs are listed on the NSE and BSE. Settlement on these stock exchanges may be subject to delays and an investor in equity shares withdrawn from the depository facility upon surrender of ADSs may not be able to settle trades on these stock exchanges in a timely manner.

***You may be subject to Indian taxes arising out of capital gains.***

Generally, capital gains, whether short-term or long-term, arising on the sale of the underlying equity shares in India are subject to Indian capital gains tax. Investors are advised to consult their own tax advisers and to carefully consider the potential tax consequences of an investment in ADSs. See also *Taxation* .

***You may be unable to exercise preemptive rights available to other shareholders.***

A company incorporated in India must offer its holders of equity shares preemptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless these rights have been waived by at least 75.0% of the company's shareholders present and voting at a shareholders' general meeting. U.S. investors in our ADSs may be unable to exercise preemptive rights for our equity shares underlying our ADSs unless a registration statement under the Securities Act of 1933 (the *Securities Act* ) is effective with respect to those rights or an exemption from the registration requirements of the Securities Act is available. Our decision to file a registration statement will depend on the costs and potential liabilities associated with any registration statement as well as the perceived benefits of enabling U.S. investors in our ADSs to exercise their preemptive rights and any other factors we consider appropriate at the time. We do not commit to filing a registration statement under those circumstances. If we issue any securities in the future, these securities may be issued to the depository, which may sell these securities in the securities markets in India for the benefit of the investors in our ADSs. There can be no assurance as to the value, if any, the depository would receive upon the sale of these securities. To the extent that investors in our ADSs are unable to exercise preemptive rights, their proportional interests in us would be reduced.

***Financial difficulty and other problems in certain financial institutions in India could adversely affect our business and the price of our equity shares and ADSs.***

We are exposed to the risks of the Indian financial system by being a part of the system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. Such *systemic risk* , may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with which we interact on a daily basis. Any such difficulties or instability of the Indian financial system in general could create an adverse market perception about Indian financial institutions and banks and adversely affect our business. Our transactions with these financial institutions expose us to various risks in the event of default by a counterparty, which can be exacerbated during periods of market illiquidity.

***Because the equity shares underlying our ADSs are quoted in rupees in India, you may be subject to potential losses arising out of exchange rate risk on the Indian rupee and risks associated with the conversion of rupee proceeds into foreign currency.***

Fluctuations in the exchange rate between the U.S. dollar and the Indian rupee may affect the value of your investment in our ADSs. Specifically, if the relative value of the Indian rupee to the U.S. dollar declines, each of the following values will also decline:

the U.S. dollar equivalent of the Indian rupee trading price of our equity shares in India and, indirectly, the U.S. dollar trading price of our ADSs in the United States;

the U.S. dollar equivalent of the proceeds that you would receive upon the sale in India of any equity shares that you withdraw from the depository; and

the U.S. dollar equivalent of cash dividends, if any, paid in Indian rupees on the equity shares represented by our ADSs.

***There may be less information available on Indian securities markets than securities markets in developed countries.***

There is a difference between the level of regulation and monitoring of the Indian securities markets and the activities of investors, brokers and other participants and that of markets in the United States and other developed economies. The Securities and Exchange Board of India ( SEBI ) and the stock exchanges are responsible for improving disclosure and other regulatory standards for the Indian securities markets. The SEBI has issued regulations and guidelines on disclosure requirements, insider trading and other matters. There may, however, be less publicly available information about Indian companies than is regularly made available by public companies in developed economies.

**Table of Contents*****HDFC Limited's significant holdings could have an effect on the trading price of our equity shares and ADSs.***

HDFC Limited and its subsidiaries hold a significant portion of our equity, and are entitled to certain rights to appoint directors to our Board. While we are professionally managed and overseen by an independent board of directors, HDFC Limited can exercise influence over our board and over matters subject to a shareholder vote that could directly or indirectly favor the interests of HDFC Limited over our interests. See *HDFC Limited holds a significant percentage of our share capital and can exercise influence over board decisions that could directly or indirectly favor the interests of HDFC Limited over our interests* and *We may face conflicts of interest relating to our promoter and principal shareholder, HDFC Limited, which could cause us to forego business opportunities and consequently have an adverse effect on our financial performance.* HDFC Limited's concentration of ownership may adversely affect the trading price of our equity shares to the extent investors perceive a disadvantage in owning stock of a company with a significant shareholder.

***Investors may be subject to Indian taxes arising out of capital gains on the sale of equity shares.***

Under current Indian tax laws and regulations, capital gains arising from the sale of shares in an Indian company are generally taxable in India. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no Securities Transaction Tax ( STT ) has been paid, are subject to long term capital gains tax in India. Until March 31, 2018, any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months was not subject to capital gains tax in India if STT was paid on the transaction. STT is levied on and collected by a domestic stock exchange on which the equity shares are sold. However, with the enactment of the Finance Act, 2018, ( Finance Act ) the exemption previously granted in respect of payment of long term capital gains tax has been withdrawn and such taxes are now payable by the investors with effect from April 1, 2018. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident.

Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of equity shares.

***Future issuances or sales of equity shares and ADSs could significantly affect the trading price of our equity shares and ADSs.***

The future issuance of shares by us or the disposal of shares by any of our major shareholders, or the perception that such issuance or sales may occur, may significantly affect the trading price of our equity shares and ADSs. There can be no assurance that we will not issue further shares or that the major shareholders will not dispose of, pledge or otherwise encumber their shares.

***Foreign Account Tax Compliance Act withholding may affect payments on our equity shares and ADSs.***

Sections 1471 through 1474 of the Internal Revenue Code of 1986, as amended (the Internal Revenue Code ) (provisions commonly known as FATCA or the Foreign Account Tax Compliance Act) impose (a) certain reporting and due diligence requirements on foreign financial institutions ( FFIs ) and, (b) potentially require such FFIs to deduct a 30% withholding tax from (i) certain payments from sources within the United States, and (ii) foreign passthru payments (which is not yet defined in current guidance) made to certain FFIs that do not comply with such reporting and due diligence requirements or certain other payees that do not provide required information. We as well as relevant intermediaries such as custodians and depositary participants are classified as FFIs for these purposes. The

United States has entered into a number of intergovernmental agreements ( IGAs ) with other jurisdictions which may modify the operation of this withholding. India has entered into a Model 1 IGA with the United States for giving effect to FATCA, and Indian FFIs, including us, are generally required to comply with FATCA based on the terms of the IGA and relevant rules made pursuant thereto.

Under current guidance it is not clear whether or to what extent payments on ADSs or equity shares will be considered foreign passthru payments subject to FATCA withholding or the extent to which withholding on foreign passthru payments will be required under the applicable IGA. Investors should consult their own tax advisers on how the FATCA rules may apply to payments they receive in respect of the ADSs or equity shares.

Should any withholding tax in respect of FATCA be deducted or withheld from any payments arising to any investor, neither we nor any other person will pay additional amounts as a result of the deduction or withholding.

**Table of Contents****PRICE RANGE OF OUR AMERICAN DEPOSITARY SHARES AND EQUITY SHARES**

Our ADSs, each representing three equity shares, par value Rs. 2.0 per equity share, are listed on the NYSE under the symbol **HDB**. Our equity shares, including those underlying the ADSs, are listed on the NSE under the symbol **HDFCBANK** and the BSE under the code 500180. Our fiscal quarters end on June 30 of each year for the first quarter, September 30 for the second quarter, December 31 for the third quarter and March 31 for the fourth quarter.

July 1, 2018 to July 20, 2018	2,220.0	2,063.3	34.1	31.7	2,116,789

The closing price for our equity shares on the National Stock Exchange was Rs. 2,189.1 per share on July 20, 2018.

As of March 31, 2018, there were 532,368 holders of record of our equity shares, including the shares underlying ADSs and GDRs, of which 640 had registered addresses in the United States and held an aggregate of 857,102 equity shares representing 0.12% of our shareholders. In our records, only the depository, JPMorgan Chase Bank, N.A., is the shareholder with respect to equity shares underlying the ADSs and GDRs.

Upon our acquisition of Centurion Bank of Punjab ( CBoP ) in 2008, CBoP had global depository receipts (GDRs) outstanding, representing the right to receive shares in CBoP, which, upon the consummation of the acquisition, converted into our GDRs, representing the right to receive our shares. As of March 31, 2018, there were 22,860,766 GDRs outstanding, representing 11,430,383 shares of the Bank (in aggregate 0.44% of our paid-up capital).

**Table of Contents**

**DESCRIPTION OF EQUITY SHARES**

**The Company**

We are registered under Corporate Identity Number L65920MH1994PLC080618 with the Registrar of Companies, Maharashtra State, India. Our Memorandum of Association permits us to engage in a wide variety of activities, including all the activities in which we currently engage or intend to engage, as well as other activities in which we currently have no intention of engaging.

Our authorized share capital is Rs.6,500,000,000 consisting of 3,250,000,000 equity shares of Rs.2 each.

**Dividends**

Under Indian law and subject to the Banking Regulation Act, a company pays dividends upon a recommendation by its board of directors and approval by a majority of its shareholders at the annual general meeting of shareholders held within six months of the end of each fiscal year. The shareholders have the right to decrease but not increase the dividend amount recommended by the Board of Directors. Dividends are generally declared as a percentage of par value (on a per share basis) and distributed and paid to shareholders. The Companies Act provides that shares of a company of the same class must receive equal dividend treatment.

These distributions and payments are required to be deposited into a separate bank account within 5 days of the declaration of such dividend and paid to shareholders within 30 days of the annual general meeting where the resolution for declaration of dividends is approved.

The Companies Act states that any dividends that remain unpaid or unclaimed after that period are to be transferred to a special bank account. Any dividend amount that remains unclaimed for seven years from the date of the transfer is to be transferred by us to a fund, called the Investor Education and Protection Fund, created by the Government.

Our Articles of Association authorize our Board of Directors to declare interim dividends, the amount of which must be deposited in a separate bank account within five days and paid to the shareholders within 30 days of the declaration.

Under the Companies Act, final dividends payable can be paid only in cash to the registered shareholder at a record date fixed prior to the relevant annual general meeting, to his order or to the order of his banker.

Before paying any dividend on our shares, we are required under the Banking Regulation Act to write off all capitalized expenses (including preliminary expenses, organization expenses, share-selling commission, brokerage, amounts of losses incurred and any other item of expenditure not represented by tangible assets). We are permitted to declare dividends of up to 35.0% of net profit calculated under Indian GAAP without prior RBI approval subject to compliance with certain prescribed requirements. Further, upon compliance with the prescribed requirements, we are also permitted to declare interim dividends subject to the above-mentioned cap computed for the relevant accounting period.

Dividends may only be paid out of our profits for the relevant year arrived at after providing for depreciation or out of the profits of the company for any previous financial years arrived at after providing for depreciation and in certain contingencies out of the free reserves of the company, provided that in computing profits any amount representing unrealized gains, notional gains or revaluation of assets and any change in carrying amount of an asset or of a liability on measurement of the asset or the liability at fair value shall be excluded. Before declaring dividends, we are required

by the RBI to transfer 25% of our net profits (calculated under Indian GAAP) of each year to a reserve fund.

### **Bonus Shares**

In addition to permitting dividends to be paid out of current or retained earnings calculated under Indian GAAP, the Companies Act permits our Board of Directors, subject to the approval of our shareholders, to distribute to the shareholders, in the form of fully paid-up bonus equity shares, an amount transferred from the company's free reserves, securities premium account or the capital redemption reserve account. Bonus equity shares can be distributed only with the prior approval of the RBI. These bonus equity shares must be distributed to shareholders in proportion to the number of equity shares owned by them.

Bonus shares can only be issued if the company has not defaulted in payments of the employees, such as, contribution to provident fund, gratuity and bonus statutory dues or principal/interest payments on fixed deposits or debt securities issued by it. Bonus shares must not be issued in lieu of dividend. Further, listed companies are also required to follow the SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2009 (the SEBI ICDR Regulations ) for issuance of bonus shares.

## **Table of Contents**

### **Preemptive Rights and Issue of Additional Shares**

Subject to the Banking Regulation Act and other applicable guidelines issued by the RBI, the Companies Act gives shareholders the right to subscribe for new shares in proportion to their existing shareholdings unless otherwise determined by a resolution passed by three-fourths of the shareholders present and voting at a general meeting. Under the Companies Act and our Articles, in the event of an issuance of securities, subject to the limitations set forth above, we must first offer the new equity shares to the holders of equity shares on a fixed record date. The offer, required to be made by notice, must include:

the right, exercisable by the shareholders of record, to renounce the shares offered in favor of any other person;

the number of shares offered; and

the period of the offer, which may not be less than 15 days from the date of the offer and shall not exceed 30 days. If the offer is not accepted, it is deemed to have been declined.

Our Board of Directors is permitted to distribute equity shares not accepted by existing shareholders in the manner it deems beneficial for us in accordance with our Articles. Holders of ADSs may not be able to participate in any such offer. See *Description of American Depositary Shares Share Dividends and Other Distributions* .

### **General Meetings of Shareholders**

There are two types of general meetings of shareholders: annual general meetings and extraordinary general meetings. We are required to convene our annual general meeting within six months after the end of each fiscal year. We may convene an extraordinary general meeting when necessary or at the request of the shareholders holding on the date of the request at least 10% of our paid up capital. A general meeting is generally convened by our company secretary in accordance with a resolution of the Board of Directors. Written notice or notice via email or other permitted electronic means stating the agenda of the meeting must be given at least 21 clear days prior to the date set for the general meeting to the shareholders whose names are in the register at the record date. Shorter notice is permitted if consent is received from 95% of the members entitled to vote. Those shareholders who are not registered at the record date do not receive notice of this meeting and are not entitled to attend or vote at this meeting.

The annual general meeting is held in Mumbai, the city in which our registered office is located. General meetings other than the annual general meeting may be held at any location if so determined by a resolution of our Board of Directors.

### **Voting Rights**

Section 108 of the Companies Act and Rule 20 of the Companies (Management and Administration) Rules, 2014 deal with the exercise of right to vote by members by electronic means. In terms of Rule 20 of the Companies (Management and Administration) Rules, 2014, every listed company (other than a company referred to in Chapters XB or XC of the SEBI ICDR Regulations) is required to provide to its members facility to exercise their right to vote at general meetings by electronic means. Section 110 of the Companies Act allows such a company to transact all items of business at a general meeting, provided the company offers to its members a facility to exercise their right to

vote at general meetings by electronic means. The Ministry of Corporate Affairs, has clarified that voting by show of hands would not be allowable in cases where Rule 20 is applicable.

A shareholder has one vote for each equity share and voting may be on a poll or through electronic means or postal ballot. Under Section 12 of the Banking Regulation Act as amended with effect from January 18, 2013 by the Banking Laws Amendment Act, 2012, no person holding shares in a banking company shall, in respect of any shares held by such person, exercise voting rights on poll in excess of 10% of the total voting rights of all the shareholders of the banking company, provided that the RBI may increase, in a phased manner, such ceiling on voting rights from 10% to 26%. The Master Direction Ownership in Private Sector Banks, Directions, 2016, issued by the RBI on May 12, 2016, states that the current level of ceiling on voting rights is 15%. At a general meeting, upon a show of hands, every member holding shares and entitled to vote and present in person has one vote. Upon a poll, the voting rights of each shareholder entitled to vote and present in person or by proxy is in the same proportion as the capital paid up on each share held by such holder bears to the company's total paid up capital, subject to the limits prescribed under the Banking Regulation Act. Voting is by a show of hands, unless a poll is ordered by the Chairman of the meeting. However, voting by show of hands is not permitted for listed companies. The Chairman of the meeting has a casting vote.

Unless the Articles provide for a larger number, the quorum for a general meeting is: (a) five members present (in person or by proxy) if the number of members as of the date of the meeting is not more than one thousand; (b) fifteen members present (in person or by proxy) if the number of members as of the date of the meeting is more than one thousand but not more than five thousand; and (c) thirty members present (in person or by proxy) if the number of members as of the date of the meeting exceeds five thousand. Generally, resolutions may be passed by simple majority of the shareholders present and voting at any general meeting. However, resolutions such as an amendment to the organizational documents, commencement of a new line of business, an issue of additional equity shares (which is not a preemptive issue) and reductions of share capital, require that the votes cast in favor of the resolution (whether by show of hands or on a poll) are not less than three times the number of votes, if any, cast against the resolution. As provided in our Articles, a shareholder may exercise his voting rights by proxy to be given in the form prescribed by us. This proxy, however, is required to be lodged with us at least 48 hours before the time of the relevant meeting. A shareholder may, by a single power of attorney, grant general power of representation covering several general meetings. A corporate shareholder is also entitled to nominate a representative to attend and vote on its behalf at all general meetings. The Companies Act also provides for the passing of resolutions in relation to certain matters specified by the Government of India, by means of a postal ballot. A notice to all the shareholders must be sent along with a draft resolution explaining the reasons therefore and requesting the shareholders to send their assent or dissent in writing on a postal ballot within a period of 30 days from the date of dispatch of the notice. Shareholders may exercise their right to vote at general meetings, through postal ballot by sending their votes through the postal arrangements or through electronic means (e-voting), for which separate facilities are provided to the shareholders.

ADS holders have no voting rights with respect to the deposited shares.

---

**Table of Contents****Annual Report**

At least 21 clear days before an annual general meeting, we must circulate either a detailed or abridged version of our Indian GAAP audited financial accounts, together with the Directors' Report and the Auditor's Report, to the shareholders along with a notice convening the annual general meeting. We are also required under the Companies Act to make available upon the request of any shareholder our complete balance sheet and profit and loss account. The above-mentioned documents must also be made available for inspection at its registered office during working hours for a period of 21 days before the date of the annual general meeting. A statement containing the salient features of these documents in a prescribed manner (or copies of these documents) is required to be sent to every member of the company and to every debenture trustee at least 21 days before the date of the annual general meeting. Under the Companies Act, we must file with the Registrar of Companies our Indian GAAP balance sheet and profit and loss account within 30 days of the conclusion of the annual general meeting and our annual return within 60 days of the conclusion of that meeting.

**Register of Shareholders, Record Dates and Transfer of Shares**

The equity shares are in registered form. We maintain a register of our shareholders in Mumbai. We register transfers of equity shares on the register of shareholders upon presentation of certificates in respect of the transfer of equity shares held in physical form together with a transfer deed duly executed by the transferor and transferee. These transfer deeds are subject to stamp duty, which has been fixed at 0.25% of the transfer price.

For the purpose of determining equity shares entitled to annual dividends, the register of shareholders is closed for a period prior to the annual general meeting. The Companies Act and the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 permit us, pursuant to a resolution of our Board of Directors and upon at least seven days' advance notice to the stock exchanges, to set the record date and close the register of shareholders after seven days' public notice for not more than 30 days at a time, and for not more than 45 days in a year, in order for us to determine which shareholders are entitled to certain rights pertaining to the equity shares. Trading of equity shares and delivery of certificates in respect of the equity shares may, however, continue after the register of shareholders is closed.

**Transfer of Shares**

Shares held through depositories are transferred in the form of book entries or in electronic form in accordance with the regulations laid down by the SEBI. These regulations provide the regime for the functioning of the depositories and the participants and set out the manner in which the records are to be kept and maintained and the safeguards to be followed in this system. Transfers of beneficial ownership of shares held through a depository are exempt from stamp duty. We have entered into an agreement for such depository services with the National Securities Depository Limited and the Central Depository Services India Limited.

The SEBI requires that our equity shares for trading and settlement purposes be in book-entry form for all investors, except for transactions that are not made on a stock exchange and transactions that are not required to be reported to the stock exchange. Transfers of equity shares in book-entry form require both the seller and the purchaser of the equity shares to establish accounts with depository participants appointed by depositories established under the Depositories Act, 1996. Charges for opening an account with a depository participant, transaction charges for each trade and custodian charges for securities held in each account vary depending upon the practice of each depository participant. Upon delivery, the equity shares shall be registered in the name of the relevant depository on our books and this depository shall enter the name of the investor in its records as the beneficial owner. The transfer of beneficial ownership shall be done through the records of the depository. The beneficial owner shall be entitled to all rights and

benefits and subject to all liabilities in respect of his securities held by a depository.

The requirement to hold the equity shares in book-entry form will apply to the ADS holders when the equity shares are withdrawn from the depository facility upon surrender of the ADSs. In order to trade the equity shares in the Indian market, the withdrawing ADS holder will be required to comply with the procedures described above.

Our equity shares are freely transferable, subject to the provisions of the Companies Act under which, if a transfer of equity shares contravenes the provisions of Securities Contracts (Regulation) Act, 1956, the Securities and Exchange Board of India Act, 1992 or the regulations issued under it or any other law in force at the time, the National Company Law Tribunal may, on application made by us, a depository incorporated in India, an investor, the SEBI or certain other parties, direct a rectification of the register of records. It is a condition of our listing that we transfer equity shares and deliver share certificates duly endorsed for the transfer within 15 days of the date of lodgment of transfer. If a company without sufficient cause refuses to register a transfer of equity shares within 30 days from the date on which the instrument of transfer is delivered to the company, the transferee may appeal to the National Company Law Tribunal seeking to register the transfer of equity shares. The National Company Law Tribunal may, in its discretion, issue an interim order suspending the voting rights attached to the relevant equity shares before completing its investigation of the alleged contravention. Our Articles provide for certain restrictions on the transfer of equity shares, including granting power to the Board of Directors in certain circumstances, to refuse to register or acknowledge transfer of equity shares or other securities issued by us. Furthermore, the RBI requires us to obtain its approval before registering a transfer of equity shares in favor of a person which together with equity shares already held by him represent more than 5.0% of our share capital.

## **Table of Contents**

Our transfer agent, Datamatics Financial Services Limited, is located in Mumbai. Certain foreign exchange control and security regulations apply to the transfer of equity shares by a non-resident or a foreigner.

### **Disclosure of Ownership Interest**

The provisions of the Companies Act generally require beneficial owners of equity shares of Indian companies that are not holders of record to declare to the company details of the holder of record and holders of record to declare details of the beneficial owner. While it is unclear whether these provisions apply to holders of an Indian company's ADSs, investors who exchange ADSs for equity shares are subject to this provision. Failure to comply with these provisions would not affect the obligation of a company to register a transfer of equity shares or to pay any dividends to the registered holder of any equity shares in respect of which this declaration has not been made, but any person who fails to make the required declaration may be liable for an initial fine of up to Rs. 50,000 coupled with a further fine of up to Rs. 1,000 for each day this failure continues. However, under the Banking Regulation Act, a registered holder of any equity shares, except in certain conditions, shall not be liable to any suit or proceeding on the ground that the title to those equity shares vests in another person.

### **Acquisition by the Issuer of Its Own Shares**

The Companies Act permits a company to acquire its own equity shares and reduce its capital under certain circumstances. Such reduction of capital requires compliance with buy-back provisions specified in the Companies Act and by the SEBI.

ADS holders will be eligible to participate in a buy-back in certain cases. An ADS holder may acquire equity shares by withdrawing them from the depository facility and then sell those equity shares back to us. ADS holders should note that equity shares withdrawn from the depository facility may only be redeposited into the depository facility under certain circumstances.

There can be no assurance that the equity shares offered by an ADS investor in any buy-back of shares by us will be accepted by us. The position regarding participation of ADS holders in a buy-back is not clear. ADS investors are advised to consult their Indian legal advisers prior to participating in any buy-back by us, including in relation to any regulatory approvals and tax issues relating to the buy-back.

### **Liquidation Rights**

Subject to the rights of depositors, creditors and employees, in the event of our winding up, the holders of the equity shares are entitled to be repaid the amounts of capital paid up or credited as paid up on these equity shares. All surplus assets remaining belong to the holders of the equity shares in proportion to the amount paid up or credited as paid up on these equity shares, respectively, at the commencement of the winding up.

### **Acquisition of the Undertaking by the Government**

Under the Banking Regulation Act, the Government may, after consultation with the RBI, in the interest of our depositors or banking policy or better provision of credit generally or to a particular community or area, acquire our banking business. The RBI may acquire our business if it is satisfied that we have failed to comply with the directions given to us by the RBI or that our business is being managed in a manner detrimental to the interest of our depositors. Similarly, the Government of India may also acquire our business based on a report by the RBI.

**Table of Contents**

**Takeover Code**

Under the Securities and Exchange Board of India (Substantial Acquisitions of Shares & Takeovers) Regulations, 2011, as amended (the Takeover Code ), upon the acquisition of shares which taken together with the shares/voting rights already held aggregates 5% or more of the outstanding shares or voting rights of a publicly listed Indian company, a purchaser is required to notify the company and all the stock exchanges on which the shares of such company are listed. Such notification is also required when a person holds 5% or more of the outstanding shares or voting rights in a target company and there is a change in his holding either due to purchase or disposal of shares of 2% or more of the outstanding shares/voting rights in the target company or if such change results in shareholding falling below 5%, if there has been a change from the previous disclosure.

No acquisition of shares/voting rights by an acquirer in a target company which entitles the acquirer, together with persons acting in concert with them, to 25% or more of such shares or voting rights is permissible unless the acquirer makes a public announcement of an open offer for acquiring the shares of the target company in the manner provided in the Takeover Code. The public announcement of an open offer is also mandatory where an acquirer who, together with persons acting in concert with them, holds 25% of the shares/voting rights in the target company, but less than the maximum permissible non-public shareholding, seeks to acquire an additional 5% or more of the shares/voting rights in the target company during any fiscal year. However, the Takeover Code applies only to shares or securities convertible into shares which carry a voting right. This provision will apply to an ADS holder only once he or she converts the ADSs into the underlying equity shares.

In terms of the Takeover Code, the acquirer or holder of shares/voting rights in a target company shall in accordance with the Continual Disclosure requirements disclose to the target company and the stock exchanges the details of holdings of equity shares/voting rights if such holding of shares/voting rights is 25% or more of the outstanding shares/aggregate voting rights as at March 31 every year.

---

**Table of Contents**

**DESCRIPTION OF AMERICAN DEPOSITARY SHARES**

**American Depositary Shares**

JPMorgan Chase Bank, N.A., as depositary, issues the American Depositary Shares, or ADSs. Each ADS represents an ownership interest in three equity shares, which we have deposited with the custodian, as agent of the depositary, under the deposit agreement among ourselves, the depositary and each ADR holder. In the future, each ADS will also represent any securities, cash or other property deposited with the depositary but which it has not distributed directly to an ADR holder. The ADSs are evidenced by what is known as American Depositary Receipts or ADRs.

The depositary's office is located at 4 New York Plaza, Floor 12, New York, NY 10004.

Investors may hold ADSs either directly or indirectly through their broker or other financial institution. If an investor holds ADSs directly, by having an ADR certificate evidencing a specific number of ADSs registered in his name on the books of the depositary, or by holding an ADS in the depositary's direct registration system, he is an ADR holder. This description assumes that the investor holds his ADSs directly. If an investor holds the ADSs through his broker or financial institution nominee, he must rely on the procedures of such broker or financial institution to assert the rights of an ADR holder described in this section. Investors should consult with their broker or financial institution to find out what these procedures are.

Because the depositary's nominee will actually be the registered owner of the shares, investors must rely on the depositary to exercise the rights of a shareholder on their behalf. The obligations of the depositary and its agents are set out in the deposit agreement. The deposit agreement and the ADSs are governed by New York law.

The following is a summary of the material terms of the deposit agreement. Because it is a summary, it does not contain all the information that may be important to investors. For more complete information, investors should read the entire deposit agreement and the form of ADR, which contains the terms of the ADSs. Investors can read a copy of the amended and restated deposit agreement, which was filed as an exhibit to the registration statement on Form F-6 on September 9, 2015. Investors may also obtain a copy of the amended and restated deposit agreement at the Securities and Exchange Commission Office, Public Reference Room, which is located at 100 F Street, N.E., Washington, D.C. 20549. Investors may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330.

**Share Dividends and Other Distributions**

We may make various types of distributions with respect to our securities. The depositary has agreed to pay to the investor the cash dividends or other distributions it or the custodian receives on shares or other deposited securities, after deducting its charges and expenses. The investor will receive these distributions in proportion to the number of deposited securities that the investor's ADSs represent. To the extent practicable, the depositary will deliver such distributions to ADR holders in proportion to their interests in the following manner:

***Cash***

The depositary will distribute any U.S. dollars available to it resulting from a cash dividend or other cash distribution if this is practicable and can be done in a reasonable manner. The depositary will distribute this cash in a practicable manner, and may deduct any taxes required to be withheld, any expenses of converting foreign currency and transferring funds to the United States and other expenses and adjustments. If exchange rates fluctuate during a time when the depositary cannot convert a foreign currency, investors may lose some or all of the value of the distribution.

*Shares*

In the case of a distribution in shares, the depositary will issue additional ADRs to evidence the number of ADSs representing such shares. Only whole ADSs will be issued. The depositary will sell any shares which would result in fractional ADSs and distribute the net proceeds to the ADR holders entitled to them.

## **Table of Contents**

### ***Rights to Receive Additional Shares***

In the case of a distribution of rights to subscribe for additional shares or other rights, if we provide satisfactory evidence that the depositary may lawfully distribute the rights, the depositary may arrange for ADR holders to instruct the depositary as to the exercise of the rights. However, if we do not furnish such evidence, the depositary may:

sell the rights, if practicable, and distribute the net proceeds as cash; or

if it is not practicable to sell the rights, allow the rights to lapse, in which case ADR holders will receive nothing.

We have no obligation to file a registration statement under the Securities Act in order to make any rights available to ADR holders or furnish evidence that the depositary may lawfully make any rights available to ADR holders.

### ***Other Distributions***

In the case of a distribution of securities or property other than those described above, the depositary may either:

distribute such securities or property in any manner it deems equitable and practicable; or

to the extent the depositary deems distribution of such securities or property not to be equitable and practicable, sell such securities or property and distribute any net proceeds in the same way it distributes cash; or

Any U.S. dollars will be distributed by checks drawn on a bank in the United States for whole dollars and cents (fractional cents will be withheld without liability for interest and handled by the depositary in accordance with its then current practices).

The depositary may choose, after consultation with us, if practicable, any practical method of distribution for any specific ADR holder, including the distribution of foreign currency, securities or property, or it may retain those items, without paying interest on or investing them, on behalf of the ADR holder as deposited securities, in which case the ADSs will also represent the retained items.

The depositary is not responsible if it fails to determine that any distribution or action is lawful or reasonably practicable.

We cannot assure investors that the depositary will be able to convert any currency at a specified exchange rate or sell any property, rights, shares or other securities at a specified price, or that any of such transactions can be completed within a specified time period. All purchases and sales of securities will be handled by the depositary in accordance with its then current policies, which are currently set forth in the Depositary Receipt Sale and Purchase of Security section available at <https://www.adr.com/Investors/FindOutAboutDRs>, the location and contents of which the depositary shall be solely responsible for.

### **Deposit, Withdrawal and Cancellation**

The depositary issues ADSs upon the deposit of shares or evidence of rights to receive shares with the custodian after payment of the fees and expenses owing to the depositary in connection with such issuance.

Except for shares that we deposit, no shares may be deposited by persons located in India, residents of India or for, or on the account of, such persons. Under current Indian laws and regulations, the depositary cannot accept deposits of outstanding shares and issue ADRs evidencing ADSs representing such shares without prior approval of the Government of India. However, an investor who surrenders an ADS and withdraws shares may be permitted to re-deposit those shares in the depositary facility in exchange for ADSs and the depositary may accept deposits of outstanding shares purchased by a non-resident of India on the local stock exchange and issue ADSs representing those shares. However, in each case, the number of shares re-deposited or deposited cannot exceed the number represented by ADSs converted into underlying shares.

---

**Table of Contents**

Shares deposited in the future with the custodian must be accompanied by certain documents, including instruments showing that such shares have been properly transferred or endorsed to the person on whose behalf the deposit is being made. To the extent delivery of certificates is impracticable, the shares may be deposited by any other delivery means reasonably acceptable to the depository or custodian, including by way of crediting the shares to an account maintained by the custodian with us or an accredited intermediary acting as registrar for the shares.

We will inform the depository if any of the shares permitted to be deposited do not rank *pari passu* with other deposited securities and the depository will arrange for the issuance of temporary ADSs representing such shares until such time as the shares become fully fungible with the other deposited securities.

The custodian will hold all deposited shares for the account of the depository. ADR holders thus have no direct ownership interest in the shares and only have such rights as are contained in the deposit agreement. The custodian will also hold any additional securities, property and cash received on or in substitution for the deposited shares. The deposited shares and any such additional items are referred to as deposited securities .

Upon each deposit of shares, receipt of related delivery documentation and compliance with the other provisions of the deposit agreement, including the payment of the fees and charges of the depository and any taxes or other fees or charges owing, the depository will issue an ADR or ADRs in the name of the person entitled thereto evidencing the number of ADSs to which such person is entitled. All ADSs issued will be evidenced by way of registration in the depository's direct registration system, unless certificated ADRs are specifically requested by the holder. Rather than receiving a certificate, registered holders will receive periodic statements from the depository showing the number of ADSs to which they are entitled. Certificated ADRs will be delivered at the depository's designated transfer office.

When an investor turns in his ADR certificate at the depository's office, or provides proper instructions and documentation in the case of direct registration ADSs, the depository will, upon payment of certain applicable fees, charges and taxes, deliver the underlying shares. Delivery of deposited securities in certificated form will be made at the custodian's office or, at the investor's risk and expense, the depository may deliver such deposited securities at such other place as may be requested by the investor. A stamp duty will be payable by the relevant ADR holder in respect of any withdrawal of shares, unless the shares are held in dematerialized form. Any subsequent transfer by the holder of the shares after withdrawal will require the approval of the RBI, which approval must be obtained by the purchaser and us under the provisions of the Foreign Management Regulation Act, 1999 unless the transfer is on a stock exchange or in connection with an offer under the Indian takeover regulations.

The depository may only restrict the withdrawal of deposited securities in connection with:

temporary delays caused by closing the Bank's transfer books or those of the depository or the deposit of shares in connection with voting at a shareholders' meeting, or the payment of dividends;

the payment of fees, taxes and similar charges; or

compliance with any U.S. or foreign laws or governmental regulations relating to the ADRs or to the withdrawal of deposited securities.

This right of withdrawal may not be limited by any other provision of the deposit agreement.

## **Voting Rights**

Investors who hold ADRs have no voting rights with respect to the deposited equity shares. The depositary will abstain from exercising the voting rights of the deposited equity shares. The RBI examined the matter relating to the exercise of voting rights by the depositary and issued a circular dated February 5, 2007 pursuant to which the Bank furnished to the RBI a copy of its agreement with the depositary. We have given an undertaking to the RBI stating that we will not recognize voting by the depositary if the vote given by the depositary is in contravention of its agreement with us and that we or the depositary will not bring about any change in our depositary agreement without the prior approval of the RBI.

**Table of Contents**

Equity shares which have been withdrawn from the depositary facility and transferred on our register of shareholders to a person other than the depositary or its nominee may be voted by that person. However, such shareholders may not receive sufficient advance notice of shareholder meetings to enable them to withdraw the underlying shares and vote at such meetings.

**Record Dates**

The depositary may, after consultation with us, if practicable, fix record dates for the determination of the ADR holders, who will be entitled or obligated (as the case may be) to receive any distribution on or in respect of deposited securities, or to pay the fee assessed by the depositary for administration of the ADR program and any expenses provided for in the ADR, subject to the provisions of the deposit agreement.

**Reports and Other Communications**

The depositary will make available for inspection by ADR holders at the offices of the depositary and at the transfer office any written communications from us which are both received by the custodian or its nominee as a holder of deposited securities and made generally available to the holders of deposited securities. The depositary will distribute copies of such communications, or English translations or summaries thereof, to ADR holders when furnished by us.

**Fees and Charges for Holders of American Depositary Shares**

The depositary collects the following fees from holders of ADRs or intermediaries acting on their behalf:

<b>Category</b>	<b>Depositary actions</b>	<b>Associated fee</b>
(a) Issuing ADSs	Issuing ADSs upon deposits of shares, issuances in respect of share distributions, rights and other distributions, stock dividends, stock splits, mergers, exchanges of securities or any other transaction or event or other distribution affecting the ADSs or the deposited securities.	US\$5.00 for each 100 ADSs (or portion thereof) issued or delivered.
(b) Distributing dividends	Distribution of cash.	US\$0.02 or less per ADS.
(c) Distributing or selling securities	Distribution to ADR holders of securities received by the depositary or net proceeds from the sale of such securities.	US\$5.00 for each 100 ADSs (or portion thereof), the fee being in an amount equal to the fee for the execution and delivery of ADSs which would have been charged as a result of the deposit of such securities.
(d) Cancellation or reduction of ADSs	Acceptance of ADSs surrendered for withdrawal of deposited shares, or the cancellation or reduction of	US\$5.00 for each 100 ADSs (or portion thereof) reduced, canceled or surrendered (as the case may be).

Edgar Filing: HDFC BANK LTD - Form 20-F

ADSs for any other reason.

(e) Transferring, splitting or combining ADRs	Transfer, split or combination of depositary receipts.	US\$1.50 per ADR.
(f) General depositary services	Services performed by the depositary in administering the ADRs.	US\$0.01 per ADS per calendar year (or portion thereof).

**Table of Contents**

(g) Other	<p>Fees, charges and expenses incurred on behalf of holders in connection with:</p> <ul style="list-style-type: none"> <li>compliance with foreign exchange control regulations or any law or regulation relating to foreign investment;</li> <li>the servicing of shares or other deposited securities;</li> <li>the sale of securities;</li> <li>the delivery of deposited securities;</li> <li>the depositary or its custodians compliance with applicable law, rule or regulation;</li> <li>stock transfer or other taxes and other governmental charges;</li> <li>cable, telex and facsimile transmission and delivery charges;</li> <li>transfer or registration fees for the registration or transfer of deposited securities on any applicable register in connection with the deposit or withdrawal of deposited securities;</li> <li>the conversion of foreign currency into U.S. dollars (which are deducted by the depositary out of such foreign currency); or</li> <li>the fees of any division, branch or affiliate of the depositary utilized by the depositary to direct, manage and/or execute any public or private sale of securities under the deposit agreement.</li> </ul>	<p>The amount of such fees, charges and expenses incurred by the depositary and/or any of its agents.</p>
-----------	---	---

As provided in the amended and restated deposit agreement, the depositary may collect its fees for making cash and other distributions to holders by deducting fees from distributable amounts or by selling a portion of the distributable property. The depositary may generally refuse to provide services until its fees for those services are paid.

**Fees Paid by the Depositary to us**

***Direct and Indirect Payments***

The depositary has agreed to contribute certain reasonable direct and indirect expenses related to our ADS program incurred by us in connection with the program. Under certain circumstances, we may be required to repay to the

depository amounts contributed by them.

The table below sets forth the contribution received by us from the depository towards our direct and indirect expenses during fiscal 2018.

<b>Category</b>	<b>Contribution received</b>	
Legal, accounting fees and other expenses incurred in connection with our ADS program	US\$	4,230,946.17
	(approximately Rs. 275.5 million)	

## **Table of Contents**

### **Payment of Taxes**

ADR holders must pay any tax or other governmental charge payable by the custodian or the depositary on any ADS or ADR, deposited security or distribution, and by holding or having held an ADR, the holder and all prior holders, jointly and severally, agree to indemnify, defend and save harmless the depositary and its agents. If an ADR holder owes any tax or other governmental charge, the depositary may:

deduct the amount thereof from any cash distributions; or

sell deposited securities and deduct the amount owing from the net proceeds of such sale.

In either case the ADR holder remains liable for any shortfall. Additionally, if any tax or governmental charge is unpaid, the depositary may also refuse to effect any registration, registration of transfer, split-up or combination of deposited securities or withdrawal of deposited securities (except under limited circumstances mandated by securities regulations). If any tax or governmental charge is required to be withheld on any non-cash distribution, the depositary may sell the distributed property or securities to pay such taxes and distribute any remaining net proceeds to the ADR holders entitled to them.

### **Reclassifications, Recapitalizations and Mergers**

If we take certain actions that affect the deposited securities, including (1) any change in par value, split-up, consolidation, cancellation or other reclassification of deposited securities or (2) any recapitalization, reorganization, merger, consolidation, liquidation, receivership, bankruptcy or sale of all or substantially all of our assets, then the depositary may choose to:

amend the form of ADR;

distribute additional or amended ADRs;

distribute cash, securities or other property it has received in connection with such actions;

sell any securities or property received and distribute the proceeds as cash; or

take no action.

If the depositary does not choose any of the above options, any of the cash, securities or other property it receives will constitute part of the deposited securities and each ADS will then represent a proportionate interest in such property.

### **Amendment and Termination**

We may agree with the depositary to amend the deposit agreement and the ADSs without the consent of ADR holders for any reason. ADR holders must be given at least 30 days' notice of any amendment that imposes or increases any fees or charges (other than stock transfer or other taxes and other governmental charges, transfer or registration fees, cable, telex or facsimile transmission costs, delivery costs or other such expenses), or prejudices any substantial existing right of ADR holders. If an ADR holder continues to hold an ADR or ADRs after being notified of these changes, the ADR holder is deemed to agree to, and be bound by, such amendment. Notwithstanding the foregoing, an amendment can become effective before notice is given if this is necessary to ensure compliance with a new law, rule or regulation.

No amendment will impair an ADR holder's right to surrender its ADSs and receive the underlying securities, except in order to comply with mandatory provisions of applicable law. If a governmental or regulatory body adopts new laws, rules or regulations which require the deposit agreement or the ADS to be amended, the Bank and the depositary may make the necessary amendments, which could take effect before an ADR holder receives notice thereof.

The depositary may terminate the deposit agreement by giving the ADR holders at least 30 days' prior notice and it must do so at our request. After termination, the depositary's only responsibility will be (i) to deliver deposited securities to ADR holders who surrender their ADRs, and (ii) to hold or sell distributions received on deposited securities. As soon as practicable after the expiration of six months from the termination date, the depositary will sell the remaining deposited securities and hold the net proceeds of such sales, together with any other cash then held by it under the deposit agreement, in trust for the pro rata benefit of ADR holders who have not yet surrendered their ADRs. After making those sales, the depositary shall have no obligations except to account for such proceeds and other cash. The depositary will not be required to invest such proceeds or pay interest on them.

**Table of Contents**

**Limitations on Obligations and Liability to ADR Holders**

The deposit agreement expressly limits the obligations and liability of the depository, ourselves and our respective agents. Neither we nor the depository nor any such agent will be liable if:

any present or future law, rule, regulation, fiat, order or decree of the United States, the Republic of India or any other country, or of any governmental or regulatory authority or securities exchange or market or automated quotation system, the provisions of or regulation governing any deposited securities, any present or future provision of our charter, any act of God, war, terrorism, nationalization or other circumstance beyond its control shall prevent or delay, or shall cause it to be subject to any civil or criminal penalty in connection with any act which the deposit agreement or the ADRs provide shall be done or performed by it;

it exercises or fails to exercise discretion under the deposit agreement or the ADR;

it takes any action or inaction in reliance upon the advice of or information from legal counsel, accountants, any person presenting shares for deposit, any registered holder of ADRs, or any other person believed by it to be competent to give such advice or information;

it performs its obligations under the deposit agreement without gross negligence or willful misconduct; or

it relies upon any written notice, request, direction, instruction or document believed by it to be genuine and to have been signed, presented or given by the proper party or parties.

Neither the depository nor its agents have any obligation to appear in, prosecute or defend any action, suit or other proceeding in respect of any deposited securities or the ADRs. We and our agents shall only be obligated to appear in, prosecute or defend any action, suit or other proceeding in respect of any deposited securities or the ADRs, which in our opinion may involve us in expense or liability, if indemnity satisfactory to us against all expense (including fees and disbursements of counsel) and liability is furnished as often as we require.

The depository will not be liable for the price received in connection with any sale of securities or any delay or omission to act nor will the depository be responsible for any error or delay in action, omission to act, default or negligence on the part of the party retained in connection with any sale or proposed sale of securities.

The depository may own and deal in any class of securities and in ADSs.

**Disclosure of Interest in ADSs**

From time to time we may request ADR holders and beneficial owners of ADSs to provide information as to:

the capacity in which they own or owned ADSs;

the identity of any other persons then or previously interested in such ADSs; and

the nature of such interest and various other matters.

Investors in ADSs agree to provide any information requested by us or the depositary pursuant to the deposit agreement. The depositary has agreed to use reasonable efforts, without risk, liability or expense on the part of the depositary, to comply with written instructions received from us requesting that it forward any such requests to investors in ADSs and other holders and beneficial owners and to forward to us any responses to such requests to the extent permitted by applicable law.

We may restrict transfers of the shares where any such transfer might result in ownership of shares in contravention of, or exceeding the limits under, applicable law or our organizational documents. We may also instruct ADR holders that we are restricting the transfers of ADSs where such a transfer may result in the total number of shares represented by the ADSs beneficially owned by ADR holders contravening or exceeding the limits under the applicable law or our organizational documents. We reserve the right to instruct ADR holders to deliver their ADSs for cancellation and withdrawal of the shares underlying such ADSs and holders agree to comply with such instructions.

**Table of Contents**

**Requirements for Depositary Actions**

We, the depositary or the custodian may refuse to:

issue, register or transfer an ADR or ADRs;

effect a split-up or combination of ADRs;

deliver distributions on any such ADRs; or

permit the withdrawal of deposited securities (unless the deposit agreement provides otherwise), until the following conditions have been met:

the holder has paid all taxes, governmental charges and fees and expenses as required in the deposit agreement;

the holder has provided the depositary with any information it may deem necessary or proper, including, without limitation, proof of identity and the genuineness of any signature, and information as to citizenship, residence, exchange control approval, beneficial ownership of any securities, compliance with applicable law, regulations, provisions of or governing deposited securities and terms of the deposit agreement and the ADRs; and

the holder has complied with such regulations as the depositary may establish consistent with the deposit agreement.

The depositary may also suspend the issuance of ADSs, the deposit of shares, the registration, transfer, split-up or combination of ADRs, or the withdrawal of deposited securities (unless the deposit agreement provides otherwise), if the register for ADRs or any deposited securities is closed or if any such action is deemed advisable by the depositary.

**Books of Depositary**

The depositary or its agent will maintain a register for the registration, registration of transfer, combination and split-up of ADRs, which, in the case of registered ADRs, shall include the depositary's direct registration system. ADR holders may inspect the depositary's designated records at all reasonable times. Such register may be closed at any time from time to time, when deemed expedient by the depositary.

The depositary will maintain facilities for the delivery and receipt of ADRs.

**Pre-release of ADSs**

The depositary may issue ADSs prior to the receipt of shares and deliver shares prior to the receipt of ADSs for the withdrawal of deposited securities. Each such transaction is called a pre-release of the ADSs. A pre-release is closed out as soon as the underlying shares (or other ADSs) are delivered to the depositary. The depositary may pre-release ADSs only if:

the person or entity to whom ADSs or shares will be delivered:

represents that, at the time of the pre-release, the applicant or its customer owns the shares or ADSs to be delivered;

agrees to indicate the depositary as owner of such shares or ADSs in its records and to hold such shares or ADSs in trust for the depositary until they have been delivered to the depositary or custodian;

unconditionally guarantees to deliver the shares or ADSs to the depositary or custodian, as applicable;

agrees to any additional restrictions or requirements that the depositary deems appropriate; and

the depositary has received collateral for the full market value of the pre-released ADSs or shares.

In general, the number of pre-released ADSs and shares is limited to 30% of all ADSs outstanding at any given time (without giving effect to those ADSs issued prior to the receipt of shares). However, the depositary may change or disregard such limit from time to time as it deems appropriate. The depositary may also set limits with respect to the number of ADSs and shares involved in pre-release transactions with any one person on a case-by-case basis as it deems appropriate. The depositary may retain for its own account any compensation received by it in conjunction with pre-release transactions, including earnings on collateral but excluding the collateral itself.

### **The Depositary**

The depositary is JPMorgan Chase Bank, N.A., a commercial bank offering a wide range of banking services to its customers both domestically and internationally. JPMorgan Chase Bank, National Association is a wholly-owned bank subsidiary of JPMorgan Chase & Co., a Delaware corporation.

**Table of Contents****DIVIDEND POLICY**

We have paid dividends every year since fiscal 1997. The following table sets forth, for the periods indicated, the dividend per equity share and the total amount of dividends declared on the equity shares, both exclusive of dividend tax. All dividends were paid in rupees.

Relating to Fiscal Year	Dividend per equity share		Total amount of dividends declared (in millions)	
	Rs.	US\$	Rs.	US\$
2014	6.85	0.105	16,433.5	252.4
2015	8.00	0.123	20,052.0	308.0
2016	9.50	0.146	24,017.8	368.9
2017	11.00	0.169	28,188.0	432.9
2018	13.00	0.200	33,736.2	518.1

Our dividends are generally declared and paid in the fiscal following the fiscal to which they relate. Under Indian law, a company pays dividends upon a recommendation by its board of directors and approval by a majority of the shareholders at the annual general meeting of shareholders held within six months of the end of each fiscal year. The shareholders have the right to decrease but not to increase the dividend amount recommended by the Board of Directors.

We pay a 17.7647% direct tax in respect of dividends paid by us. In addition, we pay a 12.0% surcharge on 17.7647% direct tax and an add-on education cess at the rate of 3.0% (4.0% effective April 1, 2018) of the total dividend distribution tax and surcharge. These are direct taxes paid by us; these taxes are not payable by shareholders and are not withheld or deducted from the dividend payments set forth above. The tax rates imposed on us in respect of dividends paid in prior periods varied. Further, as per the provisions of Section 115BBDA of the Indian Income Tax Act, 1961, if the dividend income of a certain specified resident exceeds Rs. 1.0 million, such dividend would be taxed at the rate of 10% plus surcharge and education cess on any amount exceeding Rs. 1.0 million per shareholder.

Future dividends will depend on our revenues, cash flows, financial condition (including capital position) and other factors. ADS holders will be entitled to receive dividends payable in respect of the equity shares represented by ADSs. One ADS represents three equity shares. Cash dividends in respect of the equity shares represented by ADSs will be paid to the depository in Indian rupees and, except in certain instances, will be converted by the depository into U.S. dollars. The depository will distribute these proceeds to ADS holders. The equity shares represented by ADSs will rank equally with all other equity shares in respect of dividends.

For a description of regulation of dividends, see *Supervision and Regulation Special Provisions of the Banking Regulation Act Restrictions on Payment of Dividends* .

**Table of Contents****SELECTED FINANCIAL AND OTHER DATA**

The following tables set forth our selected financial and other data. Our selected income statement data for the fiscal years ended March 31, 2016, 2017 and 2018 and the selected balance sheet data as of March 31, 2017 and 2018 are derived from our audited financial statements included in this report. Our selected balance sheet data as of March 31, 2014, March 31, 2015 and March 31, 2016 and selected income statement data for the fiscal years ended March 31, 2014 and March 31, 2015 are derived from our audited financial statements not included in this report.

For the convenience of the reader, the selected financial data as of and for the year ended March 31, 2018 have been translated into U.S. dollars at the rate on such date of Rs. 65.11 per US\$1.00. The U.S. dollar equivalent information should not be construed to imply that the real amounts represent, or could have been or could be converted into, U.S. dollars at such rates or at any other rate.

You should read the following data with the more detailed information contained in Management's Discussion and Analysis of Financial Condition and Results of Operations and our financial statements. Footnotes to the following data appear below the final table.

	<b>Year ended March 31,</b>

Average total shareholders equity as a percentage of average total assets	11.3	11.6	12.1	11.7	11.2
<b>Asset quality:</b>					
Gross non-performing customer assets as a percentage of gross customer assets <sup>(10)</sup>	1.2	1.0	1.0	1.3	1.4
Net non-performing customer assets as a percentage of net customer assets <sup>(10)</sup>	0.6	0.4	0.4	0.6	0.6
Total allowance for credit losses as a percentage of gross non-performing credit assets	143.5	120.4	108.3	94.6	103.5

- (1) Represents the difference between total assets and total liabilities, reduced by noncontrolling interests in subsidiaries, divided by the number of shares outstanding at the end of each reporting period.
- (2) Includes placements with banks and financial institutions with original maturities of greater than three months.
- (3) Average balances are the average of daily outstanding amounts.
- (4) Represents the ratio of total dividends payable on equity shares relating to each fiscal year, excluding the dividend distribution tax, as a percentage of net income of that year. Dividends declared each year are typically paid in the following fiscal year. See *Dividend Policy*.
- (5) Represents the difference between yield on average interest-earning assets and cost of average interest-bearing liabilities. Yield on average interest-earning assets is the ratio of interest revenue to average interest-earning assets. Cost of average interest-bearing liabilities is the ratio of interest expense to average interest-bearing liabilities. For purposes of calculating spread, interest-bearing liabilities includes non-interest bearing current accounts.
- (6) Represents the ratio of net interest revenue to average interest-earning assets. The difference in net interest margin and spread arises due to the difference in the amount of average interest-earning assets and average interest-bearing liabilities. If average interest-earning assets exceed average interest-bearing liabilities, the net interest margin is greater than the spread. If average interest-bearing liabilities exceed average interest-earning assets, the net interest margin is less than the spread.
- (7) Represents the ratio of non-interest expense to the sum of net interest revenue after provision for credit losses and non-interest revenue.
- (8) Represents the ratio of non-interest expense to average total assets.
- (9) Calculated in accordance with RBI guidelines (Basel III Capital Regulations, generally referred to as Basel III ). See also *Supervision and Regulation* .

(10) Customer assets consist of loans and credit substitutes.

71

**Table of Contents****SELECTED STATISTICAL INFORMATION**

The following information should be read together with our financial statements included in this report as well as Management's Discussion and Analysis of Financial Condition and Results of Operations. Certain amounts presented in this section are in accordance with U.S. GAAP and certain figures are presented according to RBI guidelines where noted. Footnotes appear at the end of each related section of tables.

**Average Balance Sheet**

The table below presents the average balances for our assets and liabilities together with the related interest revenue and expense amounts, resulting in the presentation of the average yields and cost for each period. The average balance is the daily average of balances outstanding. The average yield on average interest-earning assets is the ratio of interest revenue to average interest-earning assets. The average cost of average interest-bearing liabilities is the ratio of interest expense to average interest-bearing liabilities. The average balances of loans include non-performing loans and are net of allowance for credit losses.

(1) The changes in net interest revenue between periods have been reflected as attributed either to average balance or average rate changes. For purposes of this table, changes which are due to both average balance and average rate have been allocated solely to changes in average rate.

**Table of Contents****Yields, Spreads and Margins**

The following table sets forth, for the periods indicated, the yields, spreads and interest margins on our interest-earning assets.

	Year ended March 31,		
	2016	2017	2018
	(in millions, except percentages)		
Interest revenue	Rs. 625,428.6	Rs. 725,554.3	Rs. 843,465.3
Average interest-earning assets	6,334,288.6	7,584,354.9	9,052,769.4
Interest expense	333,067.1	373,758.7	420,314.7
Average interest-bearing liabilities	5,130,083.6	6,104,324.6	7,260,929.1
Average total assets	6,776,037.8	8,099,122.2	9,634,335.7
Average interest-earning assets as a percentage of average total assets	93.5%	93.6%	94.0%
Average interest-bearing liabilities as a percentage of average total assets	75.7%	75.4%	75.4%
Average interest-earning assets as a percentage of average interest-bearing liabilities	123.5%	124.2%	124.7%
Yield	9.9%	9.6%	9.3%
Cost of funds <sup>(1)</sup>	5.6%	5.2%	4.9%
Spread <sup>(2)</sup>	4.1%	4.1%	4.2%
Net interest margin <sup>(3)</sup>	4.6%	4.6%	4.7%

(1) Excludes total shareholders' equity.

(2) Represents the difference between the yield on average interest-earning assets and the cost of average interest-bearing liabilities. The yield on average interest-earning assets is the ratio of interest revenue to average interest-earning assets. The cost of average interest-bearing liabilities is the ratio of interest expense to average interest-bearing liabilities. For purposes of calculating spread, interest-bearing liabilities include non-interest bearing current accounts.

(3) The net interest margin is the ratio of net interest revenue to average interest-earning assets. The difference in the net interest margin and spread arises due to the difference in the amount of average interest-earning assets and average interest-bearing liabilities. If average interest-earning assets exceed average interest-bearing liabilities, the net interest margin is greater than the spread. If average interest-bearing liabilities exceed average interest-earning assets, the net interest margin is less than the spread.

**Return on Equity and Assets**

The following table presents selected financial ratios for the periods indicated.

	<b>Year ended March 31,</b>		
	<b>2016</b>	<b>2017</b>	<b>2018</b>
	<b>(in millions, except percentages)</b>		
Net income	Rs. 117,915.3	Rs. 140,529.8	Rs. 178,514.9
Average total assets	6,776,037.8	8,099,122.2	9,634,335.7
Average total shareholders equity	820,769.1	943,550.3	1,081,039.9
Net income as a percentage of average total assets	1.7%	1.7%	1.9%
Net income as a percentage of average total shareholders equity	14.4%	14.9%	16.5%
Average total shareholders equity as a percentage of average total assets	12.1%	11.7%	11.2%
Dividend payout-ratio	20.4%	20.1%	18.9%

**Residual Maturity Profile**

The following table sets forth, for the periods indicated, an analysis of the residual maturity profile of our investments in government and other debt securities classified as available-for-sale securities and their market yields.

	At March 31, 2018							
	Up to one year		One to five years		Five to ten years		More than ten years	
	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield
(in millions, except percentages)								
Government securities	Rs. 469,492.0	6.2%	Rs. 323,766.7	7.1%	Rs. 734,494.2	7.4%	Rs. 338,381.2	7.7%
Government securities outside India	4,217.0	1.2						
Other debt securities	83,665.5	7.4	228,310.7	7.9	19,774.5	8.4	448.0	8.1
Total debt securities, fair value	Rs. 557,374.5	6.4%	Rs. 552,077.4	7.4%	Rs. 754,268.7	7.4%	Rs. 338,829.2	7.7%
Total amortized cost	Rs. 557,314.1		Rs. 548,402.5		Rs. 762,418.9		Rs. 341,661.5	

**Table of Contents****Funding**

Our funding operations are designed to ensure stability, low cost of funding and effective liquidity management. The primary source of funding is deposits raised from retail customers, which were 79% and 74% of total deposits, as of March 31, 2017 and March 31, 2018, respectively. Wholesale banking deposits represented 21% and 26% of total deposits, as of March 31, 2017 and March 31, 2018, respectively.

**Total Deposits**

The following table sets forth, for the periods indicated, our average outstanding deposits and the percentage composition by each category of deposits. The average cost (interest expense divided by the average of the daily balance for the relevant period) of savings deposits was 4.0% in fiscal 2016, 4.0% in fiscal 2017 and 3.8% in fiscal 2018. The average cost of time deposits was 7.7% in fiscal 2016, 7.1% in fiscal 2017 and 6.5% in fiscal 2018. The average deposits for the periods set forth are as follows:

	2016		Year ended March 31, 2017		2018	
	Amount	% of total	Amount	% of total	Amount	% of total
	(in millions, except percentages)					
Current deposits	Rs. 620,340.4	12.6%	Rs. 784,108.7	13.4%	Rs. 946,157.4	14.0%
Savings deposits	1,258,166.0	25.6	1,598,619.0	27.4	1,919,734.0	28.2
Time deposits	3,043,349.1	61.8	3,455,253.7	59.2	3,929,805.4	57.8
Total	Rs. 4,921,855.5	100.0%	Rs. 5,837,981.4	100.0%	Rs. 6,795,696.8	100.0%

As of March 31, 2018, individual time deposits in excess of Rs. 0.1 million had a balance to maturity profile as follows:

**At March 31, 2018**  
**Up to three months**   **Three to six months**   **Six to twelve months**   **More than one year**  
(in millions)

Balance to maturity for time deposits exceeding Rs. 0.1 million each	Rs. 1,285,778.3	Rs. 967,785.5	Rs. 1,513,940.8	Rs. 514,521.4
--	-----------------	---------------	-----------------	---------------

**Short-term Borrowings**

The following table sets forth, for the periods indicated, information related to our short-term borrowings, which are comprised primarily of money-market borrowings. Short-term borrowings include securities sold under repurchase agreements.

Period end	Years ended March 31,		
	2016	2017	2018
	(in millions, except percentages)		
Period end	Rs. 559,622.4	Rs. 322,265.6	Rs. 917,201.7

Edgar Filing: HDFC BANK LTD - Form 20-F

Average balance during the period	Rs. 342,855.1	Rs. 403,939.0	Rs. 529,833.0
Maximum outstanding	Rs. 613,882.4	Rs. 696,832.3	Rs. 917,619.6
Average interest rate during the period <sup>(1)</sup>	4.8%	5.4%	5.0%
Average interest rate at period end <sup>(2)</sup>	5.2%	3.4%	5.1%

- (1) Represents the ratio of interest expense on short-term borrowings to the average of daily balances of short-term borrowings.
- (2) Represents the weighted average rate of short-term borrowings outstanding as of March 31, 2016, 2017 and 2018.

**Table of Contents****Subordinated Debt**

We also obtain funds from the issuance of unsecured non-convertible subordinated debt securities, which qualify as Tier I or Tier II risk-based capital under the RBI's guidelines for assessing capital adequacy. Subordinated debt (Lower Tier II capital), Upper Tier II capital and Innovative Perpetual Debt Instruments outstanding as of March 31, 2018 were Rs. 124.27 billion (previous year: Rs. 121.22 billion), Rs. 26.80 billion (previous year: Rs. 27.80 billion), and Rs. 80.00 billion (previous year: nil), respectively. The breakup of the same is shown hereunder:

Type	Currency	Year of issue	Year of maturity	Average tenor (years)	Interest rate (%)	Year of call	Step-up rate (%)	Face value (Rupees in billions)
LowerTierII	INR	2008-09	2018-19	10.0	10.70			11.50

40.4%	27.1%	16.9%	8.2%	8.2%	11.5%	15.7%	9.2%

- (1) Assets and liabilities are classified into the applicable maturity categories based on residual maturity unless specifically mentioned.
- (2) Cash on hand is classified in the 0-28 days category.
- (3) Cash and cash equivalents include balances with the RBI to satisfy its cash reserve ratio requirements. These balances are held in the form of overnight cash deposits but we classify these balances as part of the applicable maturity categories on a basis proportionate to the classification of related deposits.
- (4) Securities in the trading book are classified based on the expected time of realization for such investments. Units of open ended mutual funds, if any, are classified in 0-28 days category.
- (5) Securities held towards satisfying the statutory liquidity requirement prescribed by the RBI are classified based on the applicable maturity categories on a basis proportionate to the classification of related deposits.
- (6) Shares in the available-for-sale investment portfolio are classified in the over 5 years category. Units of open ended mutual funds, if any, are classified in 0-28 days category.
- (7) Includes net non-performing loans which are classified in the Over 3 years to 5 years and Over 5 years categories.
- (8) Ambiguous maturity overdrafts are classified under various maturity categories based on a historical behavioral analysis that we have performed to determine the appropriate maturity categorization of such advances.
- (9) Current and savings deposits are classified under various maturity categories based on a historical behavioral analysis that we have performed to determine the appropriate maturity categorization of such deposits.
- (10) Time deposits under Rs. 10 million are classified under various maturity categories based on the historical behavioral analysis that we have performed to determine the appropriate maturity categorization of such deposits taking into account rollovers and premature withdrawals. The rest have been classified under various maturity categories based on the residual maturity.
- (11) Includes short-term borrowings and long-term debt.
- (12) Cash floats are classified under various maturity categories based on the historical behavioral analysis that we have performed to determine the appropriate maturity categorization of such floats.
- (13) Other assets and other liabilities are classified under various maturity categories based on historical behavioral analysis that we have performed to determine the appropriate maturity categorization of such other assets and other liabilities.

For further information on how we manage our asset liability risk, see *Business Risk Management Market Risk* .

**Table of Contents****Loan Portfolio and Credit Substitutes**

As of March 31, 2018, our gross loan portfolio amounted to Rs. 7,376.2 billion. As of that date, our gross credit substitutes outstanding were Rs. 324.0 billion. Almost all our gross loans and credit substitutes are to borrowers in India and approximately 90% are denominated in rupees. For a description of our retail and wholesale loan products, see *Business Retail Banking Retail Loans and Other Asset Products* and *Business Wholesale Banking Commercial Banking Products Commercial Loan Products and Credit Substitutes* .

The following table sets forth, for the periods indicated, our gross loan portfolio classified by product group:

	2014	2015	At March 31, 2016 (in millions)	2017	2018
Retail loans	Rs. 2,188,337.7	Rs. 2,720,988.5	Rs. 3,458,565.7	Rs. 4,048,961.3	Rs. 5,213,364.6
Wholesale loans	1,039,923.6	1,222,460.6	1,534,268.7	1,939,948.4	2,162,814.4
Gross loans	Rs. 3,228,261.3	Rs. 3,943,449.1	Rs. 4,992,834.4	Rs. 5,988,909.7	Rs. 7,376,179.0
Credit substitutes (at fair value)	65,147.1	195,058.9	297,241.0	419,540.6	324,031.5
Gross loans plus credit substitutes	Rs. 3,293,408.4	Rs. 4,138,508.0	Rs. 5,290,075.4	Rs. 6,408,450.3	Rs. 7,700,210.5

**Maturity and Interest Rate Sensitivity of Loans and Credit Substitutes**

The following tables set forth, for the period indicated, the maturity and interest rate sensitivity of our loans and credit substitutes:

	At March 31, 2018		
	Due in one year or less	Due in one to five years (in millions)	Due after five years
Retail loans	Rs. 1,573,881.8	Rs. 3,308,893.4	Rs. 330,589.4
Wholesale loans	1,119,321.7	724,666.2	318,826.5
Gross loans	Rs. 2,693,203.5	Rs. 4,033,559.6	Rs. 649,415.9
Credit substitutes (at fair value)	77,881.9	225,927.1	20,222.5
Gross loans plus credit substitutes	Rs. 2,771,085.4	Rs. 4,259,486.7	Rs. 669,638.4

	At March 31, 2018		
	Due in one year or less	Due in one to five years (in millions)	Due after five years
Interest rate classification of loans by maturity:			
Variable rates	Rs. 505,197.7	Rs. 1,741,867.6	Rs. 636,766.4
Fixed rates	2,188,005.8	2,291,692.0	12,649.5
Gross loans	Rs. 2,693,203.5	Rs. 4,033,559.6	Rs. 649,415.9

Interest rate classification of credit substitutes by maturity:			
Variable rates	Rs.	Rs.	Rs.
Fixed rates	77,881.9	225,927.1	20,222.5

Interest rate classification of loans and credit substitutes by maturity:			
Variable rates	Rs. 505,197.7	Rs. 1,741,867.6	Rs. 636,766.4
Fixed rates	2,265,887.7	2,517,619.1	32,872.0
Gross loans and credit substitutes	Rs. 2,771,085.4	Rs. 4,259,486.7	Rs. 669,638.4

**Table of Contents*****Concentration of Loans and Credit Substitutes***

Pursuant to the guidelines of the RBI, our exposure to individual borrowers is limited to 15% of our capital funds (as defined by the RBI and calculated under Indian GAAP), and our exposure to a group of companies under the same management is limited to 40% of our capital funds. In the case of infrastructure projects, such as power, telecommunications, road and port projects, an additional exposure of up to 5% of capital funds is allowed in respect of individual borrowers and up to 10% in respect of group borrowers. We may, in exceptional circumstances and with the approval of our Board of Directors, consider enhancement of exposure to a borrower by a further 5% of capital funds. See *Supervision and Regulation Credit Exposure Limits* .

The following table sets forth, for the periods indicated, our gross loans and fair value of credit substitutes outstanding by the borrower's industry or economic activity and as a percentage of our gross loans and fair value of credit substitutes (where such percentage exceeds 2.0% of the total). For the purpose of industry-wise classification of retail loans, from fiscal 2015, the end use (i.e., business purpose or personal use) is taken into consideration. Accordingly, exposures to individual and non-individual borrowers, where the credit facilities are for business purposes, are being reported under the industry relating to the activity of the borrower. Where the credit facilities are for personal use, the exposure to the individual borrower is classified under Consumer Loans. From fiscal 2017, Agriculture and allied activities is classified under Agriculture Production - Food, Agriculture Production - Non food, Agriculture - Allied, and Animal Husbandry, respectively. Services are classified under Business Services, and Consumer Services, respectively, and Wholesale Trade is classified under Wholesale Trade - non consumer goods (now named as Wholesale Trade - Industrial), and Wholesale Trade-consumer goods (now named as Wholesale Trade - non industrial), respectively. Credit Card receivables and Housing Loans hitherto classified under retail loans are classified under Consumer Loans from fiscal 2017. From fiscal 2018, Agri produce trade is added by classifying certain sub segments from Wholesale Trade - industrial, Wholesale Trade-non industrial and Retail trade.

As of March 31, 2018, our ten largest exposures totaled approximately Rs. 651.4 billion and represented 69.9% of our capital funds as per RBI guidelines. The largest group of companies under the same management control accounted for 32.9% of our capital funds as per RBI guidelines.

**Table of Contents****Directed Lending**

The RBI has established guidelines requiring Indian banks to lend 40% of their adjusted net bank credit ( ANBC ), as computed in accordance with RBI guidelines, or the credit equivalent amount of off balance sheet exposures, whichever is higher, as of the corresponding date of the preceding year, to certain sectors called priority sectors. Priority sectors are broadly comprised of agriculture, micro enterprises and other PSL, which includes small and medium enterprises, residential mortgages, education, renewal energy and social infrastructure, among others, subject to satisfying certain criteria.

We are required to comply with the PSL requirements as of March 31 of each fiscal year, a date specified by the RBI for reporting. From fiscal 2017, the assessment of whether we have achieved the PSL requirements is made at the end of the fiscal year based on the average of priority sector target/sub-target achievement as at the end of each quarter. Accordingly, on the basis of average calculation, the bank's total PSL achievement for fiscal 2018 stood at 41.2%. However, in fiscal 2018, agricultural loans made to small and marginal farmers were 7.3% of ANBC, against the requirement of 8.0%, with a shortfall of Rs. 32.7 billion, and advances to sections termed weaker by the RBI were 10.2% against the requirement of 10.0%. The PSL master circular mentions that Scheduled Commercial Banks having any shortfall in lending to priority sector shall be allocated amounts for contribution to the RIDF established with NABARD and other Funds with NABARD, NHB, SIDBI or MUDRA Ltd., as decided by the RBI from time to time.

We may be required by the RBI to deposit with the Indian Development Banks certain amounts as specified by the RBI in the coming year due to the shortfall in certain sub-categories of priority sector lending targets. As of March 31, 2018, our total investments as directed by RBI in such deposits were Rs. 133.6 billion yielding returns ranging from 4% to 8.3%.

The following table sets forth, for the periods indicated, our directed lending broken down by sector:

	2014	2015	As of March 31, 2016 (in millions)	2017	2018
Directed lending:					
Agriculture	Rs. 324,173.2	Rs. 392,441.4	Rs. 528,672.4	Rs. 631,861.6	Rs. 735,135.0
Micro small and medium enterprises <sup>(1)</sup>	363,485.8	454,716.8	682,621.9	785,715.9	814,006.9

**Table of Contents****Recognition of Non-Performing Loans**

We classify our loan portfolio into loans that are performing and loans that are non-performing or impaired. We have categorized our gross loans based on their performance status as follows:

	2014	2015	At March 31, 2016 (in millions)	2017	2018
Performing	Rs. 3,198,574.8	Rs. 3,904,124.3	Rs. 4,939,851.7	Rs. 5,905,930.0	Rs. 7,267,461.7
Non-performing or impaired:					
On accrual status	271.8	2,431.2	4,291.3		
On non-accrual status	29,414.7	36,893.6	48,691.4	82,979.7	108,717.3
Total non-performing or impaired	29,686.5	39,324.8	52,982.7	82,979.7	108,717.3
Total	Rs. 3,228,261.3	Rs. 3,943,449.1	Rs. 4,992,834.4	Rs. 5,988,909.7	Rs. 7,376,179.0

We consider a loan to be performing when no principal or interest payment is three months or more past due and where we expect to recover all amounts due to us. In the case of wholesale loans, we also identify loans as non-performing or impaired even when principal or interest payments are less than three months past due but where we believe recovery of all principal and interest amounts is doubtful. Interest income from loans is recognized on an accrual basis using effective interest method when earned except in respect of loans placed on non-accrual status, for which interest income is recognized when received. Loans are placed on non-accrual status when interest or principal payments are three months past due.

Our methodology for determining specific and unallocated allowances is discussed separately below for each category of loans.

**Retail**

Our retail loan loss allowance consists of specific and unallocated allowances.

We establish a specific allowance on our retail loan portfolio based on factors such as the nature of the product, delinquency levels or the number of days the loan is past due and the nature of the security available. Additionally we monitor loan to value ratios for loans against securities. The loans are charged off against allowances typically when the account becomes 180 to 1,083 days past due depending on the type of loans. The defined delinquency levels at which major loan types are charged off are 180 days past due for personal loans, credit card receivables, auto loans, commercial vehicle and construction equipment finance, 720 days past due for housing loans and on a customer by customer basis in respect of retail business banking when we believe that any future cash flows from these loans are remote, including realization of collateral, if applicable, and where any restructuring or any other settlement arrangements are not feasible.

We also record unallocated allowances for retail loans by product type. Our retail loan portfolio is comprised of groups of large numbers of small value homogeneous loans. We establish an unallocated allowance for loans in each product group based on our estimate of the overall portfolio quality, asset growth, economic conditions and other risk factors. We estimate unallocated allowance for retail loans based on an internal credit slippage matrix, which measures our historic losses for our standard loan portfolio. Subsequent recoveries, if any, against write off cases are

adjusted to provision for credit losses in the consolidated statement of income.

**Table of Contents**

***Wholesale***

The allowance for wholesale loans consists of specific and unallocated components. The allowance for such credit losses is evaluated on a regular basis by us and is based upon our view of the probability of recovery of loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, factors affecting the industry which the loan exposure relates to and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. Loans are charged off against the allowance when management believes that the loan balance cannot be recovered. Subsequent recoveries, if any, against write off cases are adjusted to provision for credit losses in the consolidated statement of income.

We grade our wholesale loan accounts considering both qualitative and quantitative criteria. Wholesale loans are considered impaired when, based on current information and events, it is probable that we will be unable to collect scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by us in determining impairment include payment status, the financial condition of the borrower, the value of collateral held, and the probability of collecting scheduled principal and interest payments when due.

We establish specific allowances for each impaired wholesale loan customer in the aggregate for all facilities, including term loans, cash credits, bills discounted and lease finance, based on either the present value of expected future cash flows discounted at the loan's effective interest rate or the net realizable value of the collateral if the loan is collateral dependent.

Wholesale loans that experience insignificant payment delays and payment shortfalls are generally not classified as impaired but are placed on a surveillance watch list and closely monitored for deterioration. We determine the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, market information, and the amount of the shortfall in relation to the principal and interest owed.

The Bank has also established an unallocated allowance for wholesale standard loans based on the overall portfolio quality, asset growth, economic conditions and other risk factors. We estimate our wholesale unallocated allowance based on an internal credit slippage matrix, which measures our historic losses for our standard loan portfolio.

**Table of Contents****Analysis of Non-Performing Loans by Industry Sector**

The following table sets forth, for the periods indicated, our non-performing loans by borrowers' industry or economic activity in each of the respective periods and as a percentage of our loans in the respective industry or economic activity sector. These figures do not include credit substitutes, which we include for purposes of calculating our industry concentration for RBI reporting. See *Risk Factors* *We have high concentrations of exposures to certain customers and sectors and if any of these exposures were to become non-performing, the quality of our portfolio could be adversely affected and our ability to meet capital requirements could be jeopardized*.

Non performing loans	% of loans in industry	2015			As of March 31, 2016			2017

**Table of Contents**

As of March 31, 2018, our gross non-performing loan as a percentage of gross loans in the respective industries was the highest in glass and Glass Products, Wholesale Trade - Non Industrial and Paper, Printing & Stationery.

**Glass and Glass Products**

Due to existing competition and government policy, despite entry barriers, there is intense competition in the glass industry as the players face pricing pressures from domestic players as well as cheap imports from China, Indonesia and Saudi Arabia. The risk of substitution from PET bottles exists in the container glass segment. Also, since soda ash and natural gas are imported and dollar traded commodities, manufacturers are exposed to forex risks. The exchange rate from Rs. to US\$ has hit an all-time low of Rs. 69 per US\$ in May 2018, which does not bode well for importers.

**Wholesale Trade - Non Industrial**

A consortium of banks, including us, provide credit facilities to state governments for procurement of food grains under the Targeted Public Distribution and Other Welfare Schemes of the Government of India. The credit limit for procurement of food grains is authorized by the RBI and consented to by the Ministry of Finance under Article 293 (3) of the Constitution of India. The outstanding balance of the state governments generally do not exceed the food stock and receivables at any point in time. However, in the case of a state government, there was a gap between outstanding balance and the food stock and receivables. This gap has been funded by the consortium through a term loan repayable over 20 years in equated monthly installments with credit enhancements, including a letter of comfort from the Government of India.

**Paper, Printing & Stationery**

Paper demand has been slowing down on a global level due to rising digitization, penetration of e-books, e-newspapers, rising smartphone penetration, online advertisement etc. However, India's paperboard demand has experienced growth of 4.5-5.5% CAGR during 2012 to 2017. Increased government and corporate spending, which also provides a thrust on education, supports the demand growth but is limited mainly to urban areas. Under the free trade agreement with South Korea and ASEAN countries, import duties on paper, paperboard and newsprint have been reduced to 0%, leading to more than 40% increase in the imports from overseas suppliers. Further, prices of most books have increased due to increased GST on printing and related articles (12%). On the raw material side, the cost of wood and agricultural residue are increasing broadly due to increased demand for wood in other segments. Increasing input cost of wood and agricultural residue along with energy cost has resulted in declined profitability of certain industry players.

***Top Ten Non-Performing Loans***

As of March 31, 2018, we had 255 wholesale non-performing loans outstanding. Our top ten non-performing loans represented 23.0% of our gross non-performing loans and 0.3% of our gross loan portfolio.

The following table sets forth information regarding our ten largest non-performing loans. The table also sets forth our share of collateral value. We periodically obtain details of collateral from borrowers and external valuation reports and carry out certain procedures for updating and assessing fair values of collateral, however these procedures may not be conclusive to determine the precise net realizable values of any such collateral, which may be substantially less. None of the loans is collateral dependent (i.e. the borrower has no means of repaying the impaired loan other than the collateral). Interest payments not being serviced as of fiscal 2018 for these loans is because of specific factors which have temporarily resulted in inadequate cash flows. The fair value of the collateral and our share thereof and the present value of expected future cash flows from these loans are adequate to cover the principal outstanding net of

allowances for credit losses. Our top non-performing loan is to a state government which is backed by credit enhancements including letter of comfort from the Government of India.

At March 31, 2018

	Industry	Type of banking arrangement	Gross principal outstanding (in millions)	Principal outstanding net of allowance for credit losses	Our share of collateral value	Currently servicing all interest payments
Borrower 1	Wholesale Trade-Non Industrial	Consortium	Rs. 12,299.9	Rs. 11,119.9	Rs.	Yes
Borrower 2	Iron and Steel	Consortium	3,126.5	1,909.0	7,531.0	No
Borrower 3	Real Estate & Property Services	Multiple	2,502.7	810.7	3,209.4	No
Borrower 4	Glass & Glass Products	Consortium	1,950.2	1,191.6	5,044.0	No
Borrower 5	Food and Beverage	Multiple	1,350.3			No
Borrower 6	Infrastructure Development	Consortium	1,039.5	138.6	1,037.7	No
Borrower 7	Paper, Printing and Stationery	Multiple	810.7			No
Borrower 8	Wholesale Trade-Non Industrial	Multiple	699.5			No
Borrower 9	Paper, Printing and Stationery	Multiple	610.0			No
Borrower 10	Consumer Services	Multiple	563.2	209.4	400.1	No
			Rs. 24,952.5	Rs. 15,379.2		

**Table of Contents*****Restructuring of Non-Performing Loans***

Our non-performing loans are restructured on a case-by-case basis after our management has determined that restructuring is the best means of maximizing realization of the loan. These loans continue to be on a non-accrual basis and are reclassified as performing loans only after sustained performance under the loan's renegotiated terms for a period of at least one year.

The following table sets forth, as of the dates indicated, our non-performing loans that have been restructured through rescheduling of principal repayments and deferral or waiver of interest:

	<b>At March 31,</b>				
	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>
	<b>(in millions, except percentages)</b>				
Gross restructured loans	Rs. 3,382.3	Rs. 4,165.6	Rs. 4,245.8	Rs. 3,069.3	Rs. 3,012.9
Allowance for credit losses	2,687.4	2,056.9	2,090.2	686.4	1,561.7
Net restructured loan	Rs. 694.9	Rs. 2,108.7	Rs. 2,155.6	Rs. 2,382.9	Rs. 1,451.2
Gross restructured loans as a percentage of gross non-performing loans	11.4%	10.6%	8.0%	3.7%	2.8%
Net restructured loans as a percentage of net non-performing loans	7.7%	14.4%	9.8%	6.4%	3.1%

If there is a failure to meet payment or other terms of a restructured loan, it may be considered a failed restructuring, in which case it is no longer classified as a restructured loan. See Note 10 of the consolidated financial statements and see also *Supervision and Regulation Restructured Assets* and *Supervision and Regulation Resolution of Stressed Assets*.

***Remediation Strategy for Non-Performing Loans***

We focus on early problem recognition and active remedial management efforts in relation to our non-performing loans. Because we are involved primarily in working capital finance with respect to wholesale loans, we track our borrowers' performance and liquidity on an ongoing basis. This enables us to define remedial strategies proactively and manage our exposures to industries or customers that we believe are displaying deteriorating credit trends. Relationship managers lead the recovery effort together with strong support from the credit group in the corporate office in Mumbai. Recovery is pursued through, among others, legal processes, enforcement of collateral, negotiated one-time settlements and other similar strategies. The particular strategy pursued depends upon the level of cooperation of the borrower, our assessment of the borrower's management integrity and long-term viability, the credit structure and the role of other creditors.

**Table of Contents****Allowance for Credit Losses on Loans**

The following table sets forth, for the periods indicated, movements in our allowance for credit losses:

	<b>For the years ended March 31,</b>				
	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>
	<b>(in millions)</b>				
Specific allowance for credit losses at the beginning of the period	Rs. 16,466.9	Rs. 20,649.2	Rs. 24,709.0	Rs. 31,008.1	Rs. 45,730.1
Additions during the period					
Retail	16,815.3	19,615.7	24,446.1	34,723.4	50,794.5
Wholesale	2,276.1	4,248.1	2,071.6	6,561.8	4,054.2
Less allowances no longer required on account of write-offs	(14,909.1)	(19,804.0)	(20,218.6)	(26,563.2)	(37,978.3)
Specific allowance for credit losses at the end of period	Rs. 20,649.2	Rs. 24,709.0	Rs. 31,008.1	Rs. 45,730.1	Rs. 62,600.5
Unallocated allowance for credit losses at the beginning of the period	Rs. 17,227.3	Rs. 21,964.0	Rs. 22,625.1	Rs. 26,352.0	Rs. 32,766.8
Additions during the period	4,736.7	661.1	3,726.9	6,414.8	17,139.9
Unallocated allowance for credit losses at the end of the period	Rs. 21,964.0	Rs. 22,625.1	Rs. 26,352.0	Rs. 32,766.8	Rs. 49,906.7
Total allowance for credit losses at the beginning of the period	Rs. 33,694.2	Rs. 42,613.2	Rs. 47,334.1	Rs. 57,360.1	Rs. 78,496.9
Allowance no longer required on account of write-offs	(14,909.1)	(19,804.0)	(20,218.6)	(26,563.2)	(37,978.3)
Additions during the period	23,828.1	24,524.9	30,244.6	47,700.0	71,988.6
Total allowance for credit losses at the end of the period	Rs. 42,613.2	Rs. 47,334.1	Rs. 57,360.1	Rs. 78,496.9	Rs. 112,507.2

Movements in our allowances for credit losses charged to expense do not include recoveries against write-off cases amounting to Rs. 9,748.6 million and Rs. 12,590.8 million for fiscals 2017 and 2018, respectively. Allowances for credit losses for the periods presented have been disclosed net of recoveries.

The following table sets forth, for the periods indicated, the allocation of the total allowance for credit losses:

	<b>As of March 31,</b>				
	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>
	<b>(in millions)</b>				

Edgar Filing: HDFC BANK LTD - Form 20-F

<b>Wholesale</b>					
Allocated	Rs. 7,316.1	Rs. 8,083.8	Rs. 7,413.4	Rs. 11,713.5	Rs. 15,323.0
Unallocated	2,738.5	3,248.4	3,803.4	4,656.2	7,759.3
Subtotal	Rs. 10,054.6	Rs. 11,332.2	Rs. 11,216.8	Rs. 16,369.7	Rs. 23,082.3
<b>Retail</b>					
Allocated	13,333.1	16,625.2	23,594.7	34,016.6	47,277.5
Unallocated	19,225.5	19,376.7	22,548.6	28,110.6	42,147.4
Subtotal	Rs. 32,558.6	Rs. 36,001.9	Rs. 46,143.3	Rs. 62,127.2	Rs. 89,424.9
Allowance for credit losses	Rs. 42,613.2	Rs. 47,334.1	Rs. 57,360.1	Rs. 78,496.9	Rs. 112,507.2

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

*You should read the following discussion and analysis of our financial condition and results of operations together with our audited financial statements included in this report. The following discussion is based on our audited financial statements, which have been prepared in accordance with U.S. GAAP, and on information publicly available from the RBI and other sources.*

**Introduction**

***Overview***

We are a new generation private sector bank in India. Our principal business activities are retail banking, wholesale banking and treasury services. Our retail banking division provides various products such as deposit products, loans, credit cards, debit cards, third-party mutual funds and insurance products, investment advice, bill payment services and other services. Through our wholesale banking operations we provide products such as loans, deposit products, documentary credits, guarantees, bullion trading, debt syndication services and foreign exchange and derivative products. We also provide cash management services, clearing and settlement services for stock and commodity exchanges, tax and other collections for the Government, custody services and correspondent banking services. Our treasury services segment undertakes trading operations on the proprietary account (including investments in government securities), foreign exchange operations and derivatives trading both on the proprietary account and customer flows and borrowings.

***Certain Factors Affecting our Results of Operations***

Our revenue consists of interest and dividend revenue as well as non-interest revenue. Our interest and dividend revenue is primarily generated by interest on loans, interest or dividends from securities and interest from other activities. We offer a range of loans to retail customers and working capital and term loans to corporate customers. The primary components of our securities portfolio are statutory liquidity ratio investments, credit substitutes and other investments. Statutory liquidity ratio investments principally consist of Government of India treasury securities. Credit substitute securities typically consist of commercial paper and debentures issued by the same customers with whom we have a lending relationship in our wholesale banking business. Other investments include asset-backed securities, mortgage-backed securities, deposit certificates issued by banks, as well as equity securities and units of mutual funds. Interest revenue from other activities consists primarily of interest on our placements made to comply with the extant RBI guidelines on shortfalls in directed lending sub-limits and interest from inter-bank placements.

Two important measures of our results of operations are net interest revenue, which is equal to our interest and dividend revenue net of interest expense, and net interest revenue after allowance for credit losses. Interest expense includes interest on deposits as well as on borrowings. Our interest revenue and expense are affected by fluctuations in interest rates as well as volume of activity. Our interest expense is also affected by the extent to which we fund our activities with low-interest and non-interest bearing deposits, and the extent to which we rely on borrowings. Our allowance for credit losses is comprised of specific and unallocated allowances for loan loss. Impairments of credit substitutes are not included in our loan loss provision, but are reflected under Non-interest revenue other than temporary losses on available for sale securities in our consolidated statements of income.

We also use net interest margin and spread to measure our results. Net interest margin represents the ratio of net interest revenue to average interest-earning assets. Spread represents the difference between yield on average interest-earning assets and the cost of average interest-bearing liabilities, including current accounts which are

non-interest bearing.

Our non-interest revenue includes fee and commission income, realized gains and losses on sales of securities and spread from foreign exchange and derivative transactions and income from affiliates. Our principal sources of fee and commission revenue are retail banking services, retail asset fees and charges, credit card fees, home loan sourcing commissions, cash management services, documentary credits and bank guarantees and distribution of third party mutual funds and insurance products.

Our non-interest expense includes expenses for salaries and staff benefits, premises and equipment maintenance, depreciation and amortization, administrative and other expenses and amortization of intangible assets. The costs of outsourcing back office and other functions are included in administrative and other expenses.

**Table of Contents**

Our financial condition and results of operations are affected by general economic conditions prevailing in India. During fiscal 2017, economic growth moderated as compared to fiscal 2016. As per the estimates of the Indian Central Statistics Office ( CSO ), real GDP growth slowed down to 7.1% in fiscal 2017 from 8.2% in fiscal 2016. While the slowdown reflected the impact of demonetization, there was also an upward revision of previously reported growth for fiscal 2016 (from 7.6% earlier to 8.2%). This moderation intensified in the first quarter of fiscal 2018 as GDP growth slowed down to a 13-quarter low at 5.6%, sharply lower than last year's 8.1% expansion in the same quarter. The transitional impact of the GST and lingering residual effects of demonetization were in part responsible for the slowdown. As the negative effects of GST, demonetization shock and supply disruptions seem to be gradually fading, the economy seems to be slowly regaining momentum. The GDP growth bounced back to 6.3% in the second, 7.0% in the third and 7.7% in the fourth quarter of fiscal 2018. The 2018 Union Budget puts the focus of fiscal policy in the coming year on the revival of the rural economy and infrastructure expenditure. Notwithstanding some positive reversal in private investment growth over the course of fiscal 2018, (rising to 14.4% in the fourth quarter from 9.1%, 6.1% from 0.8% in Q3, Q2 and Q1 of fiscal 2018, respectively), we believe the incremental pick up in private capital expenditures is likely to be sector and sub-sector specific and very gradual.

While our results may not necessarily track the GDP figures directly, how the economy performs affects the environment in which we operate. For instance, a strong GDP growth may lead businesses to plan and invest confidently, in turn causing a stronger demand for bank credit. On the other hand, inflation also moderated during fiscal 2017, with the average level of CPI declining to 4.5% in fiscal 2017 from 4.9% in fiscal 2016. A range of supply side measures, including prudent food stock management, appropriate monetary policy action and subdued global commodity prices led to the decline in inflation. As a result of, inter alia, declining inflationary pressures, the RBI reduced the policy repo rate by 75 basis points from 7.5% to 6.75% in fiscal 2016, by 50 basis points from 6.75% to 6.25% in fiscal 2017 and by 25 basis points from 6.25% to 6.00% in fiscal 2018. Higher inflation generally leads to higher interest rates and raises the cost of funds for businesses, making it difficult for them to borrow. Higher interest rates also affect us as our spreads could compress. In June 2018, considering higher inflationary pressures, the RBI has increased the policy repo rate to 6.25%. Alternatively, a lower interest rate scenario, adds to the economic growth and is generally beneficial to the environment in which we operate, provided inflation is under control.

On the fiscal side, the government appears to be committed to fiscal consolidation by reducing the fiscal deficit from 4.5% in fiscal 2014 to 3.5% in fiscal 2017. However, given rising pressures on the fiscal side, the government strayed slightly from its fiscal consolidation path. The fiscal deficit as a percentage of GDP stood at 3.5% in fiscal 2018 versus the 3.2% target, and for fiscal 2019 the budget outlined a 3.3% fiscal deficit target. The focus of this year's budget has been primarily on the agriculture sector, reviving the rural economy, infrastructure, health, employment generation and smaller businesses. Declining fiscal deficits tend to have a favorable impact on our operations, as lower fiscal deficit allows the central bank to reduce rates, given a sustainable level of inflation and also does not crowd out private investments.

Notwithstanding the pace of growth in India, we believe we have maintained a strong balance sheet and a low cost of funds. As of March 31, 2018, net non-performing customer assets (which consist of loans and credit substitutes) constituted 0.6% of net customer assets. In addition, our net customer assets represented 96.2% of our deposits and our deposits represented 69.4% of our total liabilities and shareholders' equity. The average non-interest bearing current accounts and low-interest bearing savings accounts represented 42.2% of our average total deposits for the period ended March 31, 2018. These low-cost deposits and the cash float associated with our transactional services led to an average cost of funds (including equity) for fiscal 2018 of 4.4%.

The Ministry of Corporate Affairs, in its press release dated January 18, 2016, issued a roadmap for the implementation of Indian Accounting Standards ( IND-AS ) converged with International Financial Reporting Standards as issued by the International Accounting Standards Board ( IFRS ) with certain carve outs for scheduled

commercial banks, insurance companies and non-banking financial companies (the 2016 Roadmap ), which was subsequently confirmed by the RBI through its circular dated February 11, 2016. The 2016 Roadmap requires such institutions to prepare IND-AS-based financial statements for accounting periods commencing on or after April 1, 2018, with comparative financial information for accounting periods commencing on or after April 1, 2017. The implementation of IND-AS by banks requires certain legislative changes in the format of financial statements to comply with disclosures required by IND-AS. In April 2018, the RBI deferred the effective date for implementation of IND-AS by one year, by which point the necessary legislative amendments are expected to have been completed. Scheduled commercial banks in India, such as us, will now be required to prepare IND-AS based financial statements for accounting periods beginning from April 1, 2019 onwards with comparatives for periods beginning April 1, 2018.

In conjunction with the implementation of IND-AS for our local Indian results, we may adopt IFRS for the purposes of our filings pursuant to section 13 or 15(d) of, and our reports pursuant to rule 13a-16 or 15d-16 under, the Exchange Act. Should we choose to do so, our first year of reporting in accordance with IFRS would be for the accounting period commencing on April 1, 2019 and, as such, we would be permitted to file two years, rather than three years, of statements of income, changes in shareholders' equity and cash flows prepared in accordance with IFRS.

**Table of Contents**

The implementation of IND-AS is expected to result in significant changes to the way we prepare and present our financial statements under Indian GAAP. The areas that are expected to have significant accounting impact on the adoption of IND-AS are summarized below:

- (a) Financial assets shall be classified under amortized cost, fair value through other comprehensive income or fair value through profit/loss categories on the basis of the nature of the cash flows and the intention of holding the financial assets.
- (b) Interest will be recognized in the income statement using the effective interest method, whereby the coupon, fees net of transaction costs and all other premiums or discounts will be amortized over the life of the financial instrument.
- (c) Stock options will be required to be fair valued on the date of grant and be recognized as staff expense in the income statement over the vesting period of the stock options.
- (d) The impairment requirements of IND-AS 109, Financial Instruments, are based on an Expected Credit Loss (ECL) model that replaces the incurred loss model under the extant framework. We will be generally required to recognize either a 12-month or lifetime ECL, depending on whether there has been a significant increase in credit risk since initial recognition. IND-AS 109 will change our current methodology for calculating the provision for standard assets and non-performing assets (NPAs). We will be required to apply a three-stage approach to measure ECL on financial instruments accounted for at amortized cost or fair value through other comprehensive income. Financial assets will migrate through the following three stages based on the changes in credit quality since initial recognition:

**Stage 1: 12 months ECL**

For exposures which have not been assessed as credit-impaired or where there has not been a significant increase in credit risk since initial recognition, the portion of the ECL associated with the probability of default events occurring within the next twelve months will need to be recognized.

**Stage 2: Lifetime ECL not credit-impaired**

For credit exposures where there has been a significant increase in credit risk since initial recognition but are not credit-impaired, a lifetime ECL will need to be recognized.

**Stage 3: Lifetime ECL credit impaired**

Financial assets will be assessed as credit impaired when one or more events having a detrimental impact on the estimated future cash flows of that asset have occurred. For financial assets that have become credit impaired, a lifetime ECL will need to be recognized.

Interest revenue will be recognized at the original effective interest rate applied on the gross carrying amount for assets falling under stages 1 and 2 and on written down amount for the assets falling under stage 3.

- (e) Accounting impact on the application of IND-AS at the transition date shall be recognized in Equity.

**Critical Accounting Policies**

We have set forth below some of our critical accounting policies under U.S. GAAP. Investors should keep in mind that we prepare our general purpose financial statements in accordance with Indian GAAP and also report to the RBI

and the Indian stock exchanges in accordance with Indian GAAP. In certain circumstances, we may take action that is required or permitted by Indian banking regulations which may have consequences under Indian GAAP that may be different from those under U.S. GAAP.

*Allowance for Credit Losses*

We provide an allowance for credit losses based on management's best estimate of losses inherent in the loan portfolio which includes troubled debt restructuring. The allowance for credit losses consists of allowances for retail loans and wholesale loans.

*Retail*

Our retail loan loss allowance consists of specific and unallocated allowances.

---

**Table of Contents**

We establish a specific allowance on the retail loan portfolio based on factors such as the nature of the product, delinquency levels or the number of days the loan is past due and the nature of the security available. Additionally, we monitor loan to value ratios for loan against securities. The loans are charged off against allowances typically when the account becomes 180 to 1,083 days past due depending on the type of loan. The defined delinquency levels at which major loan types are charged off are 180 days past due for personal loans, credit card receivables, auto loans, commercial vehicle and construction equipment finance, 720 days past due for housing loans and on a customer by customer basis in respect of retail business banking when management believes that any future cash flows from these loans are remote including realization of collateral, if applicable, and where any restructuring or any other settlement arrangements are not feasible.

We also record unallocated allowances for retail loans by product type. Our retail loan portfolio is comprised of groups of large numbers of small value homogeneous loans. We establish an unallocated allowance for loans in each product group based on our estimate of the overall portfolio quality, asset growth, economic conditions and other risk factors. We estimate our unallocated allowance for retail loans based on an internal credit slippage matrix, which measures our historic losses for our standard loan portfolio. Subsequent recoveries, if any, against write-off cases, are adjusted to provision for credit losses in the consolidated statement of income.

*Wholesale*

The allowance for wholesale loans consists of specific and unallocated components. The allowance for such credit losses is evaluated on a regular basis by management and is based upon management's view of the probability of recovery of loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, factors affecting the industry which the loan exposure relates to and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. Loans are charged off against the allowance when management believes that the loan balance may not be recovered. Subsequent recoveries, if any, against write-off cases, are adjusted to provision for credit losses in the consolidated statement of income.

We grade our wholesale loan accounts considering both qualitative and quantitative criteria. Wholesale loans are considered impaired when, based on current information and events, it is probable that we will be unable to collect scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, the financial condition of the borrower, the value of collateral held, and the probability of collecting scheduled principal and interest payments when due.

We establish specific allowances for each impaired wholesale loan customer in the aggregate for all facilities, including term loans, cash credits, bills discounted and lease finance, based on either the present value of expected future cash flows discounted at the loan's effective interest rate or the net realizable value of the collateral if the loan is collateral dependent.

Wholesale loans that experience insignificant payment delays and payment shortfalls are generally not classified as impaired but are placed on a surveillance watch list and closely monitored for deterioration. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, market information, and the amount of the shortfall in relation to the principal and interest owed.

We have also established an unallocated allowance for wholesale standard loans based on the overall portfolio quality, asset growth, economic conditions and other risk factors. We estimate our wholesale unallocated allowance based on an internal credit slippage matrix, which measures our historic losses for our standard loan portfolio.

***Revenue Recognition***

Interest income from loans and from investments is recognized on an accrual basis using effective interest method when earned except in respect of loans or investments placed on non-accrual status, where it is recognized when received. Nominal loan application fees are charged which offset the related costs incurred. Fees and commissions from guarantees issued are amortized over the contractual period of the commitment, provided the amounts are collectible. Dividends from investments are recognized when declared. Realized gains and losses on sale of securities are recorded on the trade date and are determined using the weighted average cost method. Other fees and income are recognized when earned, which is when the service that results in the income has been provided. We amortize the annual fees on credit cards over the contractual period of the fees.

---

**Table of Contents*****Investments in Securities***

Investments consist of securities purchased as part of our treasury operations, such as government securities and other debt and equity securities, and investments purchased as part of our wholesale banking operations, such as credit substitute securities issued by our wholesale banking customers. Credit substitute securities typically consist of commercial paper and short-term debentures issued by the same customers with whom we have a lending relationship in our wholesale banking business. Investment decisions for credit substitute securities are subject to the same credit approval processes as for loans, and we bear the same customer credit risk as we do for loans extended to those customers. Additionally, the yield and maturity terms are generally directly negotiated by us with the issuer. As our exposures to such securities are similar to our exposures on our loan portfolio, additional disclosures have been provided on impairment status in note 8 of the consolidated financial statements and on concentrations of credit risk in note 12 of the consolidated financial statements.

All other securities including mortgage and asset-backed securities are actively managed as part of our treasury operations. The issuers of such securities are either government, public financial institutions or private issuers. These investments are typically purchased from the market, and debt securities are generally publicly rated.

Securities that are held principally for resale in the near term are classified as held for trading ( HFT ) and are carried at fair value, with changes in fair value recorded in net income. Debt securities that management has the positive intent and ability to hold to maturity are classified as held to maturity ( HTM ) and are carried at amortized cost.

Equity securities with readily determinable fair values and all debt securities that are not classified as HTM or HFT are classified as available for sale ( AFS ) and are carried at fair value. Unrealized gains and losses on such securities, net of applicable taxes, are reported in accumulated other comprehensive income (loss), a separate component of shareholders' equity.

Fair values are based on market quotations where a market quotation is available or otherwise based on present values at current interest rates for such investments.

Transfers between categories are recorded at fair value on the date of the transfer.

Declines in the fair values of held to maturity and available for sale securities below their carrying value that are other than temporary are reflected in net income as realized losses, based on management's best estimate of the fair value of the investment. We conduct a review each year to identify other than temporary declines based on an evaluation of all significant factors. Our review of impairment generally entails identification and evaluation of investments that have indications of possible impairment, analysis of individual investments that have fair values of less than 95% of amortized cost, including consideration of the length of time the investment has been in an unrealized loss position, analysis of evidential matter, including an evaluation of factors or triggers that would or could cause individual investments to have other than temporary impairment and documentation of the results of these analyses, as required under business policies. Estimates of any declines in the fair values of credit substitute securities that are other than temporary are measured on a case-by-case basis together with loans to those customers. We do not recognize an impairment for debt securities if the cause of the decline is related solely to interest rate increase and we do not intend to sell the security and it is not more likely than not that we will be required to sell the security before recovery of its amortized cost basis.

***Business Combination***

We account for acquired businesses using the purchase method of accounting which requires that the assets acquired and liabilities assumed be recorded at the date of acquisition at their respective fair values. The application of the purchase method requires certain estimates and assumptions, especially concerning the determination of the fair values of the acquired intangible and tangible assets, as well as the liabilities assumed at the date of the acquisition. The judgments made in the context of the purchase price allocation can materially impact our future results of operations. The valuations are based on information available at the acquisition date. Purchase consideration in excess of Bank's interest and the acquiree's net fair value of identifiable assets and liabilities is recognized as goodwill.

**Table of Contents*****Goodwill and Other Intangibles***

Under applicable accounting guidance, goodwill is reviewed at the reporting unit level for potential impairment at least on an annual basis at the end of the reporting period, or more frequently if events or circumstances indicate a potential impairment. This analysis is a two-step process. The first step of the goodwill impairment test compares the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, then the goodwill of the reporting unit is considered not impaired; however, if the carrying amount of the reporting unit exceeds its fair value, the second step is to be performed. The second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated possible impairment. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination, which is the excess of the fair value of the reporting unit, as determined in the first step, over the aggregate fair values of the individual assets, liabilities and identifiable intangibles as if the reporting unit was being acquired in a business combination. The adjustments to measure the assets, liabilities and intangibles at fair value are for the purpose of measuring the implied fair value of goodwill and such adjustments are not reflected in the consolidated balance sheet. If the implied fair value of goodwill exceeds the goodwill assigned to the reporting unit, there is no impairment. If the goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded for the excess. An impairment loss recognized cannot exceed the amount of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted. ASC 350-20 Goodwill stipulates that goodwill of a reporting unit shall be tested on an annual basis and in the interim period under certain circumstances. Accordingly, we have determined that we will test the goodwill on our books for impairment at annual rests, unless circumstances warrant us to carry out impairment tests in an interim period. We examined our goodwill that had arisen on acquisition of CBoP for possible impairment as of March 31, 2018. The results of the first step of the impairment test showed no indication of impairment. Accordingly, we did not perform the second step of the impairment test.

Intangible assets consist of branch network representing contractual and non-contractual customer relationships, customer list, core deposit intangible and favorable leases. These are amortized over their estimated useful lives. Amortization of intangible assets is computed in a manner that best reflects the economic benefits of the intangible assets as follows:

	Useful lives (years)	Amortization method
Branch network	6	Straight-line
Customer lists	2	Straight-line
Core deposit	5	Straight-line
Favorable leases	1 to 15	Straight-line

For intangible assets subject to amortization, impairment is recognized if the carrying amount is not recoverable and the carrying amount exceeds the fair value of the intangible asset.

Branch network intangible represents the benefit that we received through the acquisition of a ready branch network from CBoP as opposed to having to build a new one. The fair value attributable to the branch network intangible is the difference in the present values of the earnings (net of costs) that we would have generated if we had set up our own branches /ATMs (the Hypothetical New Branch Network Earnings ) and the earnings (net of costs) that were generated because of the acquisition of CBoP (the CBoP Branch Network Earnings ). Similar streams of revenues and operating costs (and therefore profits) from CBoP s existing customer base and loan portfolio (includes net interest income, fees and commission) have been considered in determining the values of the Hypothetical New Branch Network Earnings

and the CBoP Branch Network Earnings. Other assets including intangibles such as customer list, core deposits, loans, premises and equipment have been considered as assets of Hypothetical New Branch Network Earnings and the CBoP Branch Network Earnings and the value of these assets have been included in both of the networks. The aforesaid present values to compute the said intangible assets was intended to capture the advantages that we received through the acquisition of a ready branch network from CBoP (as opposed to having to build a new one) in terms of time and of avoiding the administrative process required to obtaining branch licenses from the RBI. We calculated the value of the customer list intangible through the cost approach by considering the estimated direct unit costs to source these customers multiplied by the number of customers. We used the cost savings approach, i.e. the difference between the estimated cost of funds on deposit (interest cost and net maintenance costs) and the estimated cost of an equal amount of funds from an alternative source to calculate the core deposit intangible. The valuation of favorable leases intangibles was based on the cost saving to us and future economic benefit until the lease expiry.

---

**Table of Contents*****Fair Value Measurements***

FASB ASC 820 (Topic 820) Fair Value Measures and Disclosures establishes a fair value hierarchy structure that prioritizes the inputs to valuation techniques used to determine the fair value of an asset or liability. ASC 820 distinguishes between inputs that are based on observed market data and unobservable inputs that reflect market participants' assumptions. It emphasizes the use of valuation methodologies that maximize market inputs. For financial instruments carried at fair value, the best evidence of fair value is a quoted price in an actively traded market (Level 1). Where the market for a financial instrument is not active, valuation techniques are used. The majority of valuation techniques use market inputs that are either observable or indirectly derived from and corroborated by observable market data for substantially the full term of the financial instrument (Level 2). Because Level 1 and Level 2 instruments are determined by observable inputs, less judgment is applied in determining their fair values. In the absence of observable market inputs, the financial instrument is valued based on valuation techniques that feature one or more significant unobservable inputs (Level 3). The determination of the level of fair value hierarchy within which the fair value measurement of an asset or a liability is classified often requires judgment. We consider the following factors in developing the fair value hierarchy:

whether the asset or liability is transacted in an active market with a quoted market price that is readily available;

the size of transactions occurring in an active market;

the level of bid-ask spreads;

whether only a few transactions are observed over a significant period of time;

whether the inputs to the valuation techniques can be derived from or corroborated with market data; and

whether significant adjustments are made to the observed pricing information or model output to determine the fair value.

Level 1 inputs are unadjusted quoted prices in active markets that the reporting entity has the ability to access at the measurement date for the identical assets or liabilities. A financial instrument is classified as a Level 1 measurement if it is listed on an exchange. We regard financial instruments such as equity securities and bonds listed on the primary exchanges of a country to be actively traded.

Level 2 inputs are inputs that are observable either directly or indirectly, such as quoted prices for similar assets and liabilities in active markets, for substantially the full term of the financial instrument but do not qualify as Level 1 inputs. We generally classify derivative contracts and investments in debt securities, units of mutual funds, mortgage-backed securities and asset-backed securities as Level 2 measurements. Currently, substantially all such items qualify as Level 2 measurements. Level 2 items are fair valued using quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 inputs are unobservable estimates that management expects market participants would use to determine the fair value of the asset or liability. That is, Level 3 inputs incorporate market participants' assumptions about risk and the risk premium required by market participants in order to bear that risk. We develop Level 3 inputs based on the best information available in the circumstances.

If quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time.

We review and update our fair value hierarchy classifications semi-annually. Changes from one half year to the next related to the observability of inputs to a fair value measurement may result in a reclassification between hierarchy levels. Imprecision in estimating unobservable market inputs can impact the amount of revenue, loss or changes in common shareholder's equity recorded for a particular financial instrument. Furthermore, while we believe our valuation methods are appropriate, the use of different methodologies or assumptions to determine the fair value of certain financial assets and liabilities could result in a different estimate of fair value at the reporting date. See Note 32 of the consolidated financial statements, *Fair Value Measurement* for further details including the classification hierarchy associated with assets and liabilities measured at fair value.

**Table of Contents**

As of March 31, 2018, our Level 3 instruments recorded at fair value on a recurring basis were available-for-sale mortgage and asset-backed securities aggregating Rs. 18,534.6 million. The Level 3 instruments comprised 0.8% of our total securities portfolio and 0.2% of our total assets, as of March 31, 2018. The valuation of these mortgage and asset-backed securities is dependent on the estimated cash flows that the underlying trust would pay out. The cash flows for mortgage and asset-backed securities are discounted at the yield-to-maturity rates and credit spreads published by Fixed Income Money Market and Derivatives Association on month ends. There were no transfers between Level 1, 2 and 3 during fiscal 2017. Available-for-sale securities aggregating Rs. 6.6 billion and classified as Level 1 as of March 31, 2017 were transferred to Level 2 during fiscal 2018.

A control framework has been established, which is designed to ensure that fair values are either determined or validated by a function independent of the risk-taker. To that end, the ultimate responsibility for the validation of the valuation model rests with the treasury analytics section. The valuation model is also reviewed by the market risk department. The middle office department, which functions independent of the risk taker, is responsible for reporting fair values. Wherever necessary the valuation model is vetted through independent experts. In addition, the model prices are compared with market maker quotes. The types of valuation techniques used include present value based models, Black-Scholes valuation models, including variations and interest rate models as used by market practitioners. Where appropriate the models are calibrated to market prices. The models used, apply appropriate control processes and procedures to ensure that the derived inputs are used to value only those instruments that share similar risk to the relevant benchmark indexes and therefore demonstrate a similar response to market factors. Market data used along with interpolation techniques are as per market conventions.

The validation process consists of an independent validation of the pricing model. The pricing model validation for significant product variants is conducted using an external validation agency or authority. In addition the model prices are also validated by comparing with market maker quotes. All market data conventions are adhered to in terms of yield curve components, volatility surfaces and calibration instruments.

***Recently Issued Accounting Pronouncements Not Yet Effective***

In May 2014, the FASB issued ASU No. 2014-09 Revenue from Contracts with Customers (Topic 606) . This update modifies the principles for revenue recognition in transactions involving contracts with customers. On March 17, 2016, the FASB issued Accounting Standards Update No. 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net) , that clarifies how to apply revenue recognition guidance related to whether an entity is a principal or an agent. In April 2016, the FASB issued ASU 2016-10, Revenue from Contracts with Customers (Topic 606) . This update clarifies in regard to identifying performance obligations and licensing. In May 2016, the FASB issued ASU 2016-12, Revenue from Contracts with Customers (Topic 606) . The above referred guidance will be effective for the interim and annual reporting periods beginning after December 15, 2017. The Bank expects to adopt the guidance in fiscal 2019. The ASU requires that revenue from contracts with customers is to be recognized upon transfer of goods and services in the amount of consideration expected to be recognized and transfer of nonfinancial assets, unless those contracts are within the scope of other guidance. The ASU also clarifies the guidance related to reporting revenue as a principal versus net as an agent. The ASU also requires new qualitative and quantitative disclosures, including disaggregation of revenues and descriptions of performance obligations. On adoption we will describe our key sources of revenue that are within the scope of the new guidance, and include qualitative disclosures to describe how revenue is recognized for the types of services performed. We do not expect our accounting policies to change materially since the principals of revenue recognition are essentially consistent with our present guidance and practices. The Bank has examined the effect that the guidance will likely have on other revenue streams as well as changes in disclosures required by the new guidance is not expected to be material on the Bank's financial condition or results of operations.

In January 2016, the FASB issued ASU 2016-01 Financial Instruments- Overall (Subtopic 825-10) . The update requires all equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under the equity method of accounting or those that result in consolidation of the investee). However, an entity may choose to measure equity investments that do not have readily determinable fair values at cost minus impairment, if any. The amendments also require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. The amendments also require separate presentation of financial assets and financial liabilities by measurement category and form of financial asset. This guidance is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Bank expects to adopt the guidance in fiscal 2019. The preliminary examination carried out by the Bank indicates that the adoption of this guidance is not expected to have a material impact on the Bank's financial condition, results of operations, or disclosures.

In February 2016, the FASB issued ASU 2016-02 Leases (Topic 842) . The update generally requires recognition of lease assets and lease liabilities on the balance sheet and disclosure of key information about leasing arrangements. In particular, the guidance requires a lessee, of operating or finance leases, to recognize on the balance sheet a liability to make lease payments and a right-of-use asset representing its right to use the underlying asset for the lease term. However, for leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election not to recognize lease assets and lease liabilities. Under previous GAAP, a lessee was not required to recognize lease assets and lease liabilities arising from operating leases. The guidance will be effective for the interim and annual reporting periods beginning after December 15, 2018 and early adoption is permitted. The Bank does not plan to early adopt the ASU. The Bank expects to adopt the guidance in fiscal 2020. In January 2018, the FASB released an exposure draft wherein an amendment is proposed, if accepted, would allow the option to apply provisions of the ASU prospectively as of the effective date, without adjusting comparative periods presented. The Bank expects to recognize lease liabilities and corresponding assets at their present value predominantly related to all of the Rs. 79.3 billion of future minimum lease payments required under operating leases as disclosed in Note 27. However, these Leases which will be subject to consolidated balance sheet recognition and their initial measurement is under our evaluation. The effect of the adoption will depend on the lease portfolio at the time of transition.

---

**Table of Contents**

In March 2016, the FASB issued ASU 2016-04 Liabilities Extinguishments of Liabilities (Subtopic 405-20): Recognition of Breakage for Certain Prepaid Stored-Value Products . The update addresses the current and potential future diversity in practice related to de-recognition of a prepaid stored-value product liability that may be unused wholly or partially for an indefinite time period. The current amendments specify how prepaid stored-value product liabilities within the update s scope should be derecognized, thereby eliminating the current and potential future diversity in practice. The amendments in this update are to be applied either using a modified retrospective transition method by means of a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year in which the guidance is effective or retrospectively to each period presented. The guidance will be effective for the interim and annual reporting periods beginning after December 15, 2017. The Bank expects to adopt the guidance in fiscal 2019. This guidance will not impact the Bank s financial condition, results of operations, or disclosures.

In June 2016, the FASB issued ASU 2016-13 Financial Instruments Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments . The ASU introduces a new accounting model, the Current Expected Credit Losses model ( CECL ), which requires earlier recognition of credit losses, while also providing transparency about credit risk. The CECL model utilizes a lifetime expected credit loss measurement objective for the recognition of credit losses for loans, held to maturity securities and other receivables at the time the financial asset is originated or acquired. The expected credit losses is required to be adjusted each period for changes in expected lifetime credit losses. The update requires use of judgment in determining the relevant information and estimation methods that are appropriate for measurement of expected credit losses which is to be based on relevant information about past events, historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. In regard to Available-for-Sale Debt Securities, the credit losses is required to be recorded through an allowance and the ASU limits the amount of the allowance for credit losses to the amount by which fair value is below amortized cost. The amendments in the ASU are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. While early adoption is permitted beginning fiscal 2020, we do not expect to elect that option. The Bank expects to adopt the guidance in fiscal 2021. The amendments represent a significant departure from the existing GAAP. The Bank expects the update will result in an increase in the allowance for credit losses given the change to estimated losses over the contractual life adjusted for expected prepayments with an anticipated material impact from longer duration portfolios, as well as the addition of an allowance for debt securities. The Bank is evaluating the effect the ASU 2016-13 will have on its Consolidated Financial Statements and related disclosures which will also depend on the nature of the Bank s portfolio s at the date of adoption.

In August 2016, the FASB issued ASU 2016-15 Statement of Cash Flows (Topic 230) . This is intended to reduce the diversity in practice around how certain transactions are classified within the statement of cash flows. The amendments in the ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Bank expects to adopt the guidance in fiscal 2019. The preliminary evaluation carried out by the Bank indicate that the guidance will not have a material impact, on the presentation and classification in the consolidated statement of cash flows. The adoption of this guidance is not expected to have any impact on the Bank s financial condition, results of operations, except for presentation classification in the Consolidated Statement of Cash Flows.

In October 2016, the FASB issued ASU 2016-16 Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory . In accordance with this guidance, an entity should recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. The amendments in the ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted. The Bank expects to adopt the guidance in fiscal 2019. This guidance is not expected to impact the Bank s financial condition, results of operations, or disclosures.

In November 2016, the FASB issued ASU 2016-18 Statement of Cash Flows (Topic 230) Restricted Cash . The amendments in this update require that a statement of cash flows explain the change during the period in the total of cash, cash equivalents and amounts generally described as restricted cash or restricted cash equivalents. Amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The amendments in the ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted. The Bank expects to adopt the guidance in fiscal 2019. The update is to be applied using a retrospective transition method for each period presented. The update will not affect the Bank's financial condition, or results of operations, except the disclosures pertaining to restricted cash and restricted cash equivalents which is to be included with cash and cash equivalents while reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows.

In January 2017, the FASB issued ASU No. 2017-01 Business Combinations (Topic 805) - Clarifying the Definition of a Business . The amendment in this update narrows the definition of a business by introducing a quantitative screen as the first step, such that if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or a group of similar identifiable assets, the set of transferred assets and activities is not a business. If the first step is not met, then an entity needs to evaluate whether the set meets the requirement that a business include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs. The amendments in the ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The amendment in this update will be applied prospectively, with early adoption permitted. The Bank expects to adopt the guidance in fiscal 2019. The impact of this update will depend upon the acquisition and disposal activities of the Bank, if any.

---

**Table of Contents**

In January 2017, the FASB issued ASU No. 2017-04 Intangibles-Goodwill and Other (Topic 350) - Simplifying the Test for Goodwill Impairment . The amendment in this update simplifies the subsequent measurement of goodwill impairment by eliminating the requirement to calculate the implied fair value of goodwill (i.e., the current Step 2 of the goodwill impairment test) to measure a goodwill impairment charge. The impairment test is simply the comparison of the fair value of a reporting unit with its carrying amount (the current Step 1), with the impairment charge being the deficit in fair value but not exceeding the total amount of goodwill allocated to that reporting unit. The simplified one-step impairment test applies to all reporting units (including those with zero or negative carrying amounts). The amendments in the ASU are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. The Bank expects to adopt the guidance in fiscal 2021. Early adoption is permitted for interim and annual goodwill impairment testing dates after January 1, 2017. The impact of the amendments in this update will depend upon the performance of the reporting units and the market conditions impacting the fair value of each reporting unit going forward.

In March 2017, the FASB issued ASU 2017-07 Compensation Retirement Benefits (Topic 715) - Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost . The amendment in this update changes the income statement presentation of net benefit expense and also requires restating the Company's financial statements for each of the earlier periods presented in annual and interim financial statements. The amendment requires that only the service cost component of net benefit expense be included in the Compensation and benefits line on the income statement. The other components of net benefit expense will be required to be presented outside of the Compensation and benefits line and will be presented in other operating expense. The total Operating expenses will not change. The new standard also changes the components of net benefit expense that are eligible for capitalization when employee costs are capitalized in connection with various activities, such as internally developed software, construction-in-progress, and loan origination costs. The amendments in this update are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The amendments in this update is to be applied retrospectively for the presentation of the service cost component and the other components of net periodic pension cost and net periodic postretirement benefit cost in the income statement and prospectively, on and after the effective date, for the capitalization of the service cost component of net periodic pension cost and net periodic postretirement benefit in assets. The Bank expects to adopt the guidance in fiscal 2019. This guidance is not expected to impact the Bank's financial condition and results of operations.

In March 2017, the FASB issued ASU 2017-08 Receivables Nonrefundable Fees and Other Costs (Subtopic 310-20)-Premium Amortization on Purchased Callable Debt Securities . This update amends the amortization period for certain purchased callable debt securities held at a premium. The update requires entities to amortize premiums on debt securities by the first call date when the securities have fixed and determinable call dates and prices. ASU 2017-08 does not change the accounting for discounts, which continue to be recognized over the contractual life of a security. The amendments in the ASU are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period but such adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. Adoption of the ASU is on a modified retrospective basis through a cumulative effect adjustment to retained earnings as of the beginning of the year of adoption. The Bank expects to adopt the guidance in fiscal 2020. The impact of this ASU will depend upon the position of purchased callable debt securities held at a premium on date of adoption.

In May 2017, the FASB issued ASU 2017-09 Compensation - Stock Compensation (Topic 718) - Scope of Modification Accounting. The amendment in this update clarifies when changes to the terms or conditions of a share-based payment award must be accounted for as modifications. Under ASU 2017-09, an entity will not apply modification accounting to a share-based payment award if all of the following are the same immediately before and after the change: (i) the award's fair value, (ii) the award's vesting conditions and (iii) the award's classification as an equity or liability instrument. The amendments in the ASU are effective for fiscal years beginning after December 15,

2017, including interim periods within those fiscal years. Early adoption is permitted. The Bank expects to adopt the guidance in fiscal 2019. The impact of this update will depend upon the modification, if any, to the terms or conditions of a share-based payment award on or after adoption of the guidance in fiscal 2019.

In August 2017, the FASB issued ASU No. 2017-12 Derivatives and Hedging (Topic 815) - Targeted Improvements to Accounting for Hedging Activities . The amendment in the update better aligns the accounting and reporting of hedging relationships with the economics of risk management activities. ASU 2017-12 provides administrative reliefs to simplify the application of hedge accounting. The amendments in the ASU are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. The transition requirements and elections in this update is to be applied to hedging relationships existing on the date of adoption. The amendment in the update requires the effect of adoption to be reflected as of the beginning of the fiscal year of adoption. The Bank expects to adopt the guidance in fiscal 2019. This guidance is not expected to impact the Bank's financial condition and results of operations.

**Table of Contents****Fiscal Year Ended March 31, 2018 Compared to Fiscal Year Ended March 31, 2017****Net Interest Revenue after Allowance for Credit Losses**

Our net interest revenue after allowances for credit losses increased by 15.9% from Rs. 313.8 billion in fiscal 2017 to Rs. 363.8 billion in fiscal 2018. Our net interest margin was 4.7% for fiscal 2018. The following table sets out the components of net interest revenue after allowance for credit losses:

	2017		Year ended March 31, 2018		Increase/ Decrease	% Increase/ Decrease
	Rs.		Rs.	(in million, except percentages)		
Interest on loans	Rs.	552,686.8	Rs.	667,458.7	Rs. 114,771.9	20.8
Interest on securities, including dividends and interest on trading assets		159,660.4		162,258.3	2,597.9	1.6
Other interest revenue		13,207.1		13,748.3	541.2	4.1
<b>Total interest and dividend revenue</b>		<b>725,554.3</b>		<b>843,465.3</b>	<b>117,911.0</b>	<b>16.3</b>
Interest on deposits		308,078.3		326,717.8	18,639.5	6.1
Interest on short-term borrowings		21,821.9		26,004.4	4,182.5	19.2
Interest on long-term debt		43,781.1		67,297.5	23,516.4	53.7
Other interest expense		77.4		295.0	217.6	281.1
<b>Total interest expense</b>		<b>373,758.7</b>		<b>420,314.7</b>	<b>46,556.0</b>	<b>12.5</b>
<b>Net interest revenue</b>	<b>Rs.</b>	<b>351,795.6</b>	<b>Rs.</b>	<b>423,150.6</b>	<b>Rs. 71,355.0</b>	<b>20.3</b>
Less: Allowance for credit losses:						
Retail		31,341.7		52,577.0	21,235.3	67.8
Wholesale		6,609.7		6,820.8	211.1	3.2
<b>Total</b>	<b>Rs.</b>	<b>37,951.4</b>	<b>Rs.</b>	<b>59,397.8</b>	<b>Rs. 21,446.4</b>	<b>56.5</b>
<b>Net interest revenue after allowance for credit losses</b>	<b>Rs.</b>	<b>313,844.2</b>	<b>Rs.</b>	<b>363,752.8</b>	<b>Rs. 49,908.6</b>	<b>15.9</b>

**Interest and Dividend Revenue**

Interest income on loans increased by 20.8%, primarily due to an increase in our average loan book. The average balance of our total loan book increased by 26.2% from Rs. 5,156.0 billion in fiscal 2017 to Rs. 6,507.4 billion in fiscal 2018. Our average balance of retail loans increased by 27.1% from Rs. 3,641.1 billion in fiscal 2017 to Rs. 4,629.2 billion in fiscal 2018. The growth in retail loans was across the product segments. Our average balance of wholesale loans increased by 24.0% from Rs. 1,514.9 billion in fiscal 2017 to Rs. 1,878.2 billion in fiscal 2018. Retail loan yields decreased to 11.1% in fiscal 2018 as compared to 11.5% in fiscal 2017. Wholesale loan yields decreased from 8.9% in fiscal 2017 to 8.1% in fiscal 2018.

Interest on securities, including dividends, increased by 1.6% from Rs. 159.7 billion in fiscal 2017 to Rs. 162.3 billion in fiscal 2018. This was primarily driven by an increase in the average balance of investments. The average balance of our investments increased by Rs. 111.3 billion from Rs. 2,152.5 billion in fiscal 2017 to Rs. 2,263.8 billion in fiscal 2018. This increase was partially offset by a decline in yield on investments from 7.4% in fiscal 2017 to 7.2% in fiscal 2018.

Other interest revenue increased by 4.1% from Rs. 13.2 billion in fiscal 2017 to Rs. 13.7 billion in fiscal 2018, primarily due to an increase in our average balance of cash equivalents and term placements. Average balance of our cash equivalents and term placements increased by 2.1% from Rs. 275.8 billion in fiscal 2017 to Rs. 281.5 billion in fiscal 2018.

**Table of Contents*****Interest Expense***

Our interest expense on deposits increased by 6.1% from Rs. 308.1 billion in fiscal 2017 to Rs. 326.7 billion in fiscal 2018. This increase was primarily due to an increase in our average interest bearing deposits, which increased by 15.7% from Rs. 5,053.9 billion in fiscal 2017 to Rs. 5,849.5 billion in fiscal 2018. This increase was partially offset by a decline in the average cost of our deposits, including non-interest bearing deposits, which decreased from 5.3% in fiscal 2017 to 4.8% in fiscal 2018.

The average balance of our savings account deposits increased from Rs. 1,598.6 billion in fiscal 2017 to Rs. 1,919.7 billion in fiscal 2018 and the average balance of our time deposits increased from Rs. 3,455.3 billion in fiscal 2017 to Rs. 3,929.8 billion in fiscal 2018. Cost of time deposits decreased from 7.1% in fiscal 2017 to 6.5% in fiscal 2018.

Interest expense on our short-term borrowings increased by 20.1% from Rs. 21.9 billion in fiscal 2017 to Rs. 26.3 billion in fiscal 2018 on account of an increase in our average balance of short-term borrowings and offset by a decrease in the cost of our short-term borrowings. The average balance of our short-term borrowings increased by 31.2% from Rs. 403.9 billion in fiscal 2017 to Rs. 529.8 billion in fiscal 2018. The cost of our short-term borrowings decreased from 5.4% in fiscal 2017 to 5.0% in fiscal 2018. Interest expense on our long-term debt increased by 53.7% primarily on account of an increase in our average balance of long-term debt from Rs. 646.5 billion in fiscal 2017 to Rs. 881.6 billion in fiscal 2018. This increase was further augmented by an increase in the cost of our long-term debt, which increased from 6.8% in fiscal 2017 to 7.6% in fiscal 2018. During fiscal 2018, we raised debt capital instruments eligible for inclusion in Additional Tier I and Tier II capital under the Basel III capital regulations amounting to Rs. 80.0 billion and Rs. 20.0 billion respectively.

***Allowance for Credit Losses***

Our loan loss allowance for credit losses consists of specific and unallocated components. Allowances for credit losses increased by 56.5% from Rs. 38.0 billion in fiscal 2017 to Rs. 59.4 billion in fiscal 2018.

Our loan loss allowance for credit losses in our retail loan portfolio increased by 67.8% from Rs. 31.3 billion in fiscal 2017 to Rs. 52.6 billion in fiscal 2018. Our specific loan loss allowance increased from Rs. 25.8 billion in fiscal 2017 to Rs. 38.6 billion in fiscal 2018. This increase was primarily due to higher allowances in our agriculture and personal loans segments. The increase was further augmented by higher retail unallocated allowances, which increased from Rs. 5.6 billion in fiscal 2017 to Rs. 14.0 billion in fiscal 2018. This increase was attributable to the growth in our retail loan portfolio and an increase in our estimate of losses primarily in our agriculture and auto loans segments, partially offset by a decrease in our estimate of losses primarily in our personal loans and credit cards segment.

Our loan loss allowance for credit losses in our wholesale loan portfolio increased by 3.2% from Rs. 6.6 billion in fiscal 2017 to Rs. 6.8 billion in fiscal 2018. Our specific loan loss allowance decreased from Rs. 5.8 billion in fiscal 2017 to Rs. 3.7 billion in fiscal 2018. Our wholesale unallocated loan loss allowance increased from Rs. 0.9 billion in fiscal 2017 to Rs. 3.1 billion in fiscal 2018. This increase was attributable to the growth in our wholesale loan portfolio and estimated losses thereon.

**Table of Contents****Non-Interest Revenue**

Our non-interest revenue increased by 31.1% from Rs. 110.3 billion in fiscal 2017 to Rs. 144.6 billion in fiscal 2018. The following table sets forth the components of our non-interest revenue:

	Years ended March 31,			
	2017	2018	Increase/ Decrease	% Increase/ Decrease
	(in million, except percentages)			
Fees and commissions	Rs. 94,120.3	Rs. 120,060.9	Rs. 25,940.6	27.6
Realized gains/(loss) on AFS securities	9,592.8	10,704.1	1,111.3	11.6
Trading securities gains/(loss), net	467.2	(63.4)	(530.6)	(113.6)
Foreign exchange transactions	11,282.7	6,209.5	(5,073.2)	(45.0)
Derivatives gains/(loss)	(5,738.5)	6,742.6	12,481.1	(217.5)
Other	601.6	953.3	351.7	58.5
<b>Total non-interest revenue</b>	<b>Rs. 110,326.1</b>	<b>Rs. 144,607.0</b>	<b>Rs. 34,280.9</b>	<b>31.1</b>

Fees and commissions increased by 27.6% from Rs. 94.1 billion in fiscal 2017 to Rs. 120.1 billion in fiscal 2018, primarily on account of an increase in fees and charges on retail assets, fees on debit and credit cards and commissions on distribution of mutual funds and insurance products.

The gain on AFS securities was primarily attributable to the sale of government of India securities.

In fiscal 2018, derivative transactions (unadjusted for credit spread) resulted in a gain of Rs. 6.0 billion, primarily on account of a gain of Rs. 6.9 billion from forward exchange contracts due to mark-to-market gains and gains on cancellations of forward exchange contracts. In fiscal 2018, currency swaps and currency options resulted in a loss of Rs. 1.9 billion (unadjusted for credit spreads), partially offset by a gain of Rs. 1.0 billion (unadjusted for credit spreads) from interest rate derivatives and forward rate agreements. In fiscal 2017, derivative transactions (unadjusted for credit spread) resulted in a loss of Rs. 5.8 billion, primarily on account of a loss of Rs. 4.4 billion from forward exchange contracts due to mark-to-market loss, partially offset by gains on cancellations of forward exchange contracts. In fiscal 2017, currency swaps resulted in a loss of Rs. 2.4 billion (unadjusted for credit spread), partially offset by a gain of Rs. 1.0 billion (unadjusted for credit spread) from currency options, interest rate derivatives, and forward rate agreements. The gain from derivative transactions (including gain of Rs. 0.8 billion on account of credit spread) was Rs. 6.7 billion as compared to a loss from derivative transactions (net of gain of Rs. 0.1 billion on account of credit spread) of Rs. 5.7 billion in fiscal 2017. Income from foreign exchange transactions amounted to Rs. 6.2 billion during fiscal 2018 as compared to Rs. 11.3 billion during fiscal 2017. As a result, income from foreign exchange transactions and derivatives increased from Rs. 5.5 billion in fiscal 2017 to Rs. 13.0 billion in fiscal 2018.

**Table of Contents****Non-Interest Expense**

Our non-interest expense was comprised of the following:

	Years ended March 31,							
	2017	2018	Increase/ Decrease	% Increase/ Decrease	2017 % of net revenues	2018 % of net revenues	2017 % of net revenues	2018 % of net revenues
	(in million, except percentages)							
Salaries and staff benefits	Rs. 93,060.5	Rs. 98,714.6	Rs. 5,654.1	6.1	21.9	19.4		
Premises and equipment	28,024.2	29,816.9	1,792.7	6.4	6.6	5.9		
Depreciation and amortization	8,876.9	9,678.9	802.0	9.0	2.1	1.9		
Administrative and other	74,240.2	93,042.0	18,801.8	25.3	17.5	18.3		
Amortization of intangibles	3.0	1.0	(2.0)	(66.7)	0.0	0.0		
<b>Total non-interest expense</b>	<b>Rs. 204,204.8</b>	<b>Rs. 231,253.4</b>	<b>Rs. 27,048.6</b>	<b>13.2</b>	<b>48.1</b>	<b>45.5</b>		

Total non-interest expense increased by 13.2% from Rs. 204.2 billion in fiscal 2017 to Rs. 231.3 billion in fiscal 2018. Our net interest revenue after allowances for credit losses increased by 15.9% from Rs. 313.8 billion in fiscal 2017 to Rs. 363.8 billion in fiscal 2018. As a result, our non-interest expense as a percentage of our net revenues was 45.5% in fiscal 2018 as compared to 48.1% in fiscal 2017.

Salaries and staff benefits increased by 6.1% from Rs. 93.1 billion in fiscal 2017 to Rs. 98.7 billion in fiscal 2018 primarily attributable to wage revisions. The number of our employees increased from 84,325 as of March 31, 2017 to 88,253 as of March 31, 2018

Premises and equipment costs increased by 6.4% from Rs. 28.0 billion in fiscal 2017 to Rs. 29.8 billion in fiscal 2018 on account of an increase in rent, electricity, equipment maintenance and other infrastructure costs. Depreciation and amortization expenses increased from Rs. 8.9 billion in fiscal 2017 to Rs. 9.7 billion in fiscal 2018.

**Table of Contents**

Administrative and other expenses increased by 25.3% from Rs. 74.2 billion in fiscal 2017 to Rs. 93.0 billion in fiscal 2018, primarily on account of higher cards related costs backed by an increase in cards spends, expenditure for the purchase of priority sector lending certificates and insurance expenses. As of March 31, 2018, we had 4,787 branches and 12,635 ATMs across 2,691 locations, which increased from 4,715 branches and 12,260 ATMs across 2,657 locations as of March 31, 2017. This also led to an overall increase in our non-interest expense. We continued to amortize the intangible assets (i.e., favorable leases) that were acquired on the merger of CBoP over their estimated remaining useful life. This amortization resulted in a charge of Rs. 1.0 million in fiscal 2018.

**Income Tax**

Our income tax expense, net of interest earned on income tax refunds, increased by 24.0%, from Rs. 79.2 billion in fiscal 2017 to Rs. 98.3 billion in fiscal 2018. Our effective tax rate was 36.0% in fiscal 2017 and 35.5% in fiscal 2018. The effective tax rate was lower in fiscal 2018 primarily on account of lower stock-based compensation in fiscal 2018 as compared to in fiscal 2017.

The following table gives a reconciliation of the Indian statutory income tax rate to our annual effective income tax rate for fiscals 2017 and 2018:

	<b>Year ended March 31,</b>	
	<b>2017</b>	<b>2018</b>
Effective statutory income tax rate	34.61%	34.61%
Adjustments to reconcile statutory income tax rate to effective income tax rate:		
Stock-based compensation (net of forfeitures)	1.29	0.82
Income exempt from taxes	(0.45)	(0.19)
Effect of change in statutory tax rate		(0.08)
Other, net	0.57	0.30
<b>Annual effective income tax rate</b>	<b>36.02%</b>	<b>35.46%</b>

**Net Income**

As a result of the foregoing factors, our net income after taxes increased by 27.0% from Rs. 140.5 billion in fiscal 2017 to Rs. 178.5 billion in fiscal 2018.

**Table of Contents****Fiscal Year Ended March 31, 2017 Compared to Fiscal Year Ended March 31, 2016****Net Interest Revenue after Allowance for Credit Losses**

Our net interest revenue after allowances for credit losses increased by 15.9% from Rs. 270.8 billion in fiscal 2016 to Rs. 313.8 billion in fiscal 2017. Our net interest margin was 4.6% for fiscal 2017. The following table sets out the components of net interest revenue after allowance for credit losses:

	Year ended March 31,			
	2016	2017	Increase/ Decrease	% Increase/ Decrease
	(in million, except percentages)			
Interest on loans	Rs. 470,818.5	Rs. 552,686.8	Rs. 81,868.3	17.4
Interest on securities, including dividends and interest on trading assets	141,722.3	159,660.4	17,938.1	12.7
Other interest revenue	12,887.8	13,207.1	319.3	2.5
<b>Total interest and dividend revenue</b>	<b>625,428.6</b>	<b>725,554.3</b>	<b>100,125.7</b>	<b>16.0</b>
Interest on deposits	283,764.7	308,078.3	24,313.6	8.6
Interest on short-term borrowings	16,265.2	21,821.9	5,556.7	34.2
Interest on long-term debt	32,811.0	43,781.1	10,970.1	33.4
Other interest expense	226.2	77.4	(148.8)	(65.8)
<b>Total interest expense</b>	<b>333,067.1</b>	<b>373,758.7</b>	<b>40,691.6</b>	<b>12.2</b>
<b>Net interest revenue</b>	<b>Rs. 292,361.5</b>	<b>Rs. 351,795.6</b>	<b>Rs. 59,434.1</b>	<b>20.3</b>
Less: Allowance for credit losses:				
Retail	19,103.0	31,341.7	12,238.7	64.1
Wholesale	2,428.3	6,609.7	4,181.4	172.2
<b>Total</b>	<b>Rs. 21,531.3</b>	<b>Rs. 37,951.4</b>	<b>Rs. 16,420.1</b>	<b>76.3</b>
<b>Net interest revenue after allowance for credit losses</b>	<b>Rs. 270,830.2</b>	<b>Rs. 313,844.2</b>	<b>Rs. 43,014.0</b>	<b>15.9</b>

**Interest and Dividend Revenue**

Interest income on loans increased by 17.4%, primarily due to an increase in our average loan book. The average balance of our total loan book increased by 20.5% from Rs. 4,278.2 billion in fiscal 2016 to Rs. 5,156.0 billion in fiscal 2017. Our average balance of retail loans increased by 20.4% from Rs. 3,023.6 billion in fiscal 2016 to Rs. 3,641.1 billion in fiscal 2017. The growth in retail loans was across the product segments. Our average balance of wholesale loans increased by 20.8% from Rs. 1,254.5 billion in fiscal 2016 to Rs. 1,514.9 billion in fiscal 2017. Retail loan yields were 11.5% in fiscal 2017 as compared to 11.7% in fiscal 2016. Wholesale loan yields decreased from 9.3% in fiscal 2016 to 8.9% in fiscal 2017.

Interest on securities, including dividends, increased by 12.7% from Rs. 141.7 billion in fiscal 2016 to Rs. 159.7 billion in fiscal 2017, due to an increase of Rs. 331.7 billion in the average balance of investments offset by decrease in yields from 7.8% in fiscal 2016 to 7.4% in fiscal 2017.

Other interest revenue increased by 2.5% from Rs. 12.9 billion in fiscal 2016 to Rs. 13.2 billion in fiscal 2017, primarily due to an increase in our average balance of cash equivalents and term placements. Average balance of our cash equivalents and term placements increased by 17.2% from Rs. 235.3 billion in fiscal 2016 to Rs. 275.8 billion in fiscal 2017. This increase was partially offset by a decrease in the yield on average balance of cash equivalents and term placements, which declined from 5.5% in fiscal 2016 to 4.8% in fiscal 2017.

***Interest Expense***

Our interest expense on deposits increased by 8.6% from Rs. 283.8 billion in fiscal 2016 to Rs. 308.1 billion in fiscal 2017 primarily due to an increase in average interest bearing deposits by 17.5% from Rs. 4,301.5 billion in fiscal 2016 to Rs. 5,053.9 billion in fiscal 2017. Our average cost of deposits, including non-interest bearing deposits, decreased from 5.8% in fiscal 2016 to 5.3% in fiscal 2017.

**Table of Contents**

The average balance of our savings account deposits increased from Rs. 1,258.2 billion in fiscal 2016 to Rs. 1,598.6 billion in fiscal 2017 and the average balance of our time deposits increased from Rs. 3,043.3 billion in fiscal 2016 to Rs. 3,455.3 billion in fiscal 2017. Cost of time deposits decreased from 7.7% in fiscal 2016 to 7.1% in fiscal 2017. Interest expense on our short-term borrowings increased by 32.8% from Rs. 16.5 billion in fiscal 2016 to Rs. 21.9 billion in fiscal 2017 on account of an increase in our average balance of short-term borrowings and further augmented by an increase in the cost of our short-term borrowings. The average balance of our short-term borrowings increased by 17.8% from Rs. 342.9 billion in fiscal 2016 to Rs. 403.9 billion in fiscal 2017. The cost of our short-term borrowings increased from 4.8% in fiscal 2016 to 5.4% in fiscal 2017. Interest expense on our long-term debt increased by 33.4% primarily on account of an increase in our average balance of long-term debt from Rs. 485.7 billion in fiscal 2016 to Rs. 646.5 billion in fiscal 2017. Cost of our long-term debt remained stable at 6.8% in fiscal 2017 as compared to that in fiscal 2016.

***Allowance for Credit Losses***

Our loan loss allowance for credit losses consists of specific and unallocated components. Allowances for credit losses increased by 76.3% from Rs. 21.5 billion in fiscal 2016 to Rs. 38.0 billion in fiscal 2017.

Our loan loss allowance for credit losses in our wholesale loan portfolio increased by 172.2% from Rs. 2.4 billion in fiscal 2016 to Rs. 6.6 billion in fiscal 2017. Our specific loan loss allowance increased from Rs. 1.9 billion in fiscal 2016 to Rs. 5.8 billion in fiscal 2017. This was primarily on account of classification of our share in a loan to a state government, as non-performing. A consortium of banks, including us, provide credit facilities to state governments for procurement of food grains under the Targeted Public Distribution and Other Welfare Schemes of the Government of India. The credit limit for procurement of food grains is authorized by the RBI and consented to by the Ministry of Finance under Article 293 (3) of the Constitution of India. The outstanding balance of the state governments generally do not exceed the food stock and receivables at any point in time. However, in the case of this state government, there was a gap between the outstanding balance and the food stock and receivables. This gap has been funded by the consortium through a term loan repayable over 20 years in equated monthly installments with credit enhancements, including a letter of comfort from the Government of India. As of March 31, 2017, this term loan has been serviced in accordance with the terms of the sanction. Our wholesale unallocated loan loss allowance increased from Rs. 0.6 billion in fiscal 2016 to Rs. 0.9 billion in fiscal 2017.

Our loan loss allowance for credit losses in our retail loan portfolio increased by 64.1% from Rs. 19.1 billion in fiscal 2016 to Rs. 31.3 billion in fiscal 2017. Our specific loan loss allowance increased from Rs. 15.9 billion in fiscal 2016 to Rs. 25.8 billion in fiscal 2017. The increase was primarily due to higher allowances in our personal loans and credit card segment. This increase was further augmented by higher retail unallocated allowances, which increased from Rs. 3.2 billion in fiscal 2016 to Rs. 5.6 billion in fiscal 2017. This increase was attributable to the growth in our retail loan portfolio and expected losses thereon.

***Non-Interest Revenue***

Our non-interest revenue increased by 13.9% from Rs. 96.8 billion in fiscal 2016 to Rs. 110.3 billion in fiscal 2017. The following table sets forth the components of our non-interest revenue:

		Years ended March 31,		
2016	2017	Increase/ Decrease	% Increase/ Decrease	

<b>(in million, except percentages)</b>							
Fees and commissions	Rs.	83,762.8	Rs.	94,120.3	Rs.	10,357.5	12.4
Realized gains/(loss) on AFS securities		5,591.1		9,592.8		4,001.7	71.6
Trading securities gains/(loss), net		1,519.3		467.2		(1,052.1)	(69.2)
Foreign exchange transactions		(10,145.4)		11,282.7		21,428.1	*
Derivatives gains/(loss)		15,067.2		(5,738.5)		(20,805.7)	(138.1)
Other		1,038.9		601.6		(437.3)	(42.1)
<b>Total non-interest revenue</b>	<b>Rs.</b>	<b>96,833.9</b>	<b>Rs.</b>	<b>110,326.1</b>	<b>Rs.</b>	<b>13,492.2</b>	<b>13.9</b>

\* *Not meaningful*

Fees and commissions increased by 12.4% from Rs. 83.8 billion in fiscal 2016 to Rs. 94.1 billion in fiscal 2017, primarily on account of an increase in fees and commissions generated by the retail segment. This increase was largely attributable to fees on debit and credit cards, transactional charges, fees on deposit accounts, fees on retail assets and commissions on distribution of mutual funds and insurance products

**Table of Contents**

The gain on AFS securities was primarily attributable to the sale of government of India securities.

In fiscal 2017, derivative transactions (unadjusted for credit spread) resulted in a loss of Rs. 5.8 billion, primarily on account of a loss of Rs. 4.4 billion from forward exchange contracts due to mark-to-market loss partially offset by gains on cancellations of forward exchange contracts. In fiscal 2017, currency swaps resulted in a loss of Rs. 2.4 billion (unadjusted for credit spread) partially offset by a gain of Rs. 1.0 billion (unadjusted for credit spread) from currency options, interest rate derivatives, and forward rate agreements. In fiscal 2016, derivative transactions (unadjusted for credit spread) resulted in a gain of Rs. 15.4 billion, primarily on account of a gain of Rs. 15.1 billion from forward exchange contracts due to mark-to-market gains and gains on cancellations of forward exchange contracts. This was further augmented by a gain of Rs. 1.4 billion (unadjusted for credit spread) from currency options, currency swaps and forward rate agreements and partially offset by a loss of Rs. 1.0 billion (unadjusted for credit spread) from interest rate derivatives. Loss from derivative transactions (net of gain of Rs. 0.1 billion on account of credit spread) was Rs. 5.7 billion in fiscal 2017 as compared to a gain of Rs. 15.1 billion from derivative transactions (net of loss of Rs. 0.3 billion on account of credit spread) in fiscal 2016. Income from foreign exchange transactions amounted to positive Rs. 11.3 billion during fiscal 2017 as compared to negative Rs. 10.1 billion during fiscal 2016. As a result, income from foreign exchange transactions and derivatives increased from Rs. 4.9 billion in fiscal 2016 to Rs. 5.5 billion in fiscal 2017.

**Non-Interest Expense**

Our non-interest expense was comprised of the following:

	2016		2017		Years ended March 31,			
					Increase/ Decrease	% Increase Decrease	2016 % of net revenues	2017 % of net revenues
	(in million, except percentages)		(in million, except percentages)		(in million, except percentages)		(in million, except percentages)	
Salaries and staff benefits	Rs. 85,932.9	Rs. 93,060.5	Rs. 7,127.6	8.3	23.4	21.9		
Premises and equipment Depreciation and amortization	24,102.6	28,024.2	3,921.6	16.3	6.6	6.6		
Administrative and other	7,427.5	8,876.9	1,449.4	19.5	2.0	2.1		
Amortization of intangibles	64,607.3	74,240.2	9,632.9	14.9	17.6	17.5		
	7.0	3.0	(4.0)	(57.1)	0.0	0.0		
<b>Total non-interest expense</b>	<b>Rs. 182,077.3</b>	<b>Rs. 204,204.8</b>	<b>Rs. 22,127.5</b>	<b>12.2</b>	<b>49.6</b>	<b>48.1</b>		

Total non-interest expense increased by 12.2% from Rs. 182.1 billion in fiscal 2016 to Rs. 204.2 billion in fiscal 2017. As of March 31, 2017, we had 4,715 branches and 12,260 ATMs across 2,657 locations, which increased from 4,520 branches and 12,000 ATMs across 2,587 locations as of March 31, 2016. This along with the growth in our loan portfolio resulted in higher infrastructure, administrative and staff expenses resulting in an overall increase in our non-interest expense. Our net interest revenue after allowances for credit losses increased by 15.9% from Rs. 270.8 billion in fiscal 2016 to Rs. 313.8 billion in fiscal 2017. As a result, our non-interest expense as a percentage of our net revenues was 48.1% in fiscal 2017 as compared to 49.6% in fiscal 2016.

Salaries and staff benefits increased by 8.3% from Rs. 85.9 billion in fiscal 2016 to Rs. 93.1 billion in fiscal 2017. This increase was primarily attributable to annual wage revisions.

Premises and equipment costs increased by 16.3% from Rs. 24.1 billion in fiscal 2016 to Rs. 28.0 billion in fiscal 2017 on account of an increase in rent, electricity, security, equipment maintenance and other infrastructure costs relating to the expanded branch network. Depreciation and amortization expenses increased from Rs. 7.4 billion in fiscal 2016 to Rs. 8.9 billion in fiscal 2017.

**Table of Contents**

Administrative and other expenses increased by 14.9% from Rs. 64.6 billion in fiscal 2016 to Rs. 74.2 billion in fiscal 2017 primarily on account of higher operating expenses for our cards and transactional banking businesses, insurance and printing and stationery expenses. We continued to amortize the intangible assets (i.e., favorable leases) that were acquired on the merger of CBoP over their estimated remaining useful life. This amortization resulted in a charge of Rs. 3.0 million in fiscal 2017.

**Income Tax**

Our income tax expense, net of interest earned on income tax refunds, increased by 17.3%, from Rs. 67.5 billion in fiscal 2016 to Rs. 79.2 billion in fiscal 2017. Our effective tax rate was 36.4% in fiscal 2016 and 36.0% in fiscal 2017. The effective tax rate was lower in fiscal 2017 primarily on account of lower stock-based compensation in fiscal 2017 as compared to in fiscal 2016.

The following table gives a reconciliation of the Indian statutory income tax rate to our annual effective income tax rate for fiscals 2016 and 2017:

	<b>Year ended March 31,</b>	
	<b>2016</b>	<b>2017</b>
Effective statutory income tax rate	34.61%	34.61%
Adjustments to reconcile statutory income tax rate to effective income tax rate:		
Stock-based compensation (net of forfeitures)	2.35	1.29
Income exempt from taxes	(0.61)	(0.45)
Effect of change in statutory tax rate	(0.15)	
Other, net	0.20	0.57
Annual effective income tax rate	36.40%	36.02%

**Net Income**

As a result of the foregoing factors, our net income after taxes increased by 19.2% from Rs. 117.9 billion in fiscal 2016 to Rs. 140.5 billion in fiscal 2017.

**Liquidity and Capital Resources**

Our growth is financed by a combination of cash generated from operations, increases in our customer deposits, borrowings and new issuances of equity capital and other securities qualifying as Tier I and Tier II capital.

**Table of Contents**

The following table sets forth our cash flows from operating activities, investing activities and financing activities in a condensed format. We have aggregated certain line items set forth in the cash flow statement that is part of our financial statements included elsewhere in this report in order to facilitate an understanding of significant trends in our business.

	Year ended March 31,		
	2016	2017	2018
	(in million)		
<b>Cash Flows from Operating Activities:</b>

***Cash Flows from Operating Activities***

Our net cash provided by operating activities reflects our net income, adjustments for tax and non-cash charges (such as depreciation and amortization), as well as changes in other assets and liabilities. Our net cash provided by operating activities decreased from Rs. 379.3 billion in fiscal 2017 to Rs. 94.3 billion in fiscal 2018, mainly due to lower cash flows in fiscal 2018 as compared to fiscal 2017. This was largely a result of a decrease in our bills payable and remittances in transit and an increase in our investments held for trading, partially offset by an increase in our net income.

**Table of Contents*****Cash Flows from Investing Activities***

We used our cash from operations and financing activities primarily to invest in our loan book and debt securities. Loans originated and purchased, net of principal collections and repayments, increased from Rs. 1,025.6 billion in fiscal 2017 to Rs. 1,418.8 billion in fiscal 2018, largely on account of an increase in both retail and wholesale loan portfolios. The increase in investments in fiscal 2018 was Rs. 149.6 billion, primarily on account of an increase in available-for-sale Government of India securities, partially offset by a decrease in our investments in credit substitutes and other debt securities.

***Cash Flows from Financing Activities***

Our primary sources of cash flows from financing activities are deposits and, to a lesser extent, borrowings. Our total deposits increased by 22.6% from Rs. 6,431.3 billion in fiscal 2017 to Rs. 7,883.8 billion in fiscal 2018. There was a 33.3% increase in our time deposits from Rs. 3,341.9 billion in fiscal 2017 to Rs. 4,455.7 billion in fiscal 2018. Of the US \$ 3.4 billion FCNR deposits, raised in fiscal 2014 under the RBI swap window, US \$ 3.03 billion were redeemed up to March 2018. Savings account deposits increased by 15.6% from Rs. 1,935.8 billion as of March 31, 2017 to Rs. 2,238.0 billion as of March 31, 2018. Our non-interest-bearing current account deposits increased by 3.2% from Rs. 1,153.7 billion as of March 31, 2017 to Rs. 1,190.1 billion as of March 31, 2018. Savings account deposits at Rs. 2,238.0 billion and current account deposits at Rs. 1,190.1 billion accounted for 43.5% of total deposits as of March 31, 2018. Our short-term borrowings increased by Rs. 456.9 billion from Rs. 322.3 billion in fiscal 2017 to Rs. 779.2 billion in fiscal 2018. Our long-term debt increased by 27.6% from Rs. 730.9 billion in fiscal 2017 to Rs. 932.9 billion in fiscal 2018. During fiscal 2018, we raised debt capital instruments eligible for inclusion in Additional Tier I capital and Tier II capital under the Basel III capital regulations amounting to Rs. 80.0 billion and Rs. 20.0 billion, respectively. During fiscal 2018, we also raised Rs. 23.0 billion by an overseas issuance of Rupee denominated bonds.

**Fiscal Year Ended March 31, 2017 Compared to Fiscal Year Ended March 31, 2016*****Cash Flows from Operating Activities***

Our net cash provided by operating activities reflects our net income, adjustments for tax and non-cash charges (such as depreciation and amortization), as well as changes in other assets and liabilities. Our net cash provided by operating activities increased from Rs. 170.1 billion in fiscal 2016 to Rs. 379.3 billion in fiscal 2017, mainly due to higher cash flows in fiscal 2017 as compared to fiscal 2016. Higher cash flows were largely a result of an increase in our net income, bills payable, remittances in transit and a decrease in our investments held for trading.

***Cash Flows from Investing Activities***

We used our cash from operations and financing activities primarily to invest in our loan book and debt securities. The increase in loans originated and purchased, net of principal collections and repayments was Rs. 1,044.9 billion in fiscal 2016 and Rs. 1,025.6 billion in fiscal 2017, largely on account of increase in both retail and wholesale loan portfolios. The increase in investments in fiscal 2017 was Rs. 202.9 billion, primarily on account of an increase in available-for-sale Government of India securities and in our investments in credit substitutes.

***Cash Flows from Financing Activities***

Our primary sources of cash flows from financing activities are deposits and, to a lesser extent, borrowings. Our total deposits increased by 17.8% from Rs. 5,457.9 billion in fiscal 2016 to Rs. 6,431.3 billion in fiscal 2017. Savings

account deposits at Rs. 1,935.8 billion and current account deposits at Rs. 1,153.7 billion accounted for 48% of total deposits as of March 31, 2017. There was a 7.9% increase in our time deposits from Rs. 3,096.6 billion in fiscal 2016 to Rs. 3,341.9 billion in fiscal 2017. Of the US \$ 3.4 billion FCNR deposits, raised in fiscal 2014 under the RBI swap window, US \$ 3.0 billion matured during fiscal 2017. Savings account deposits increased by 30.9% from Rs. 1,478.9 billion as of March 31, 2016 to Rs. 1,935.8 billion as of March 31, 2017. Our non-interest-bearing deposits increased by 30.7% from Rs. 882.4 billion as of March 31, 2016 to Rs. 1,153.7 billion as of March 31, 2017. Our savings account and non-interest bearing deposits also grew on account of the demonetization exercise carried out by the RBI. Our short-term borrowings increased by Rs. 68.7 billion from Rs. 253.6 billion in fiscal 2016 to Rs. 322.3 billion in fiscal 2017. There was an increase in long-term debt from Rs. 522.3 billion in fiscal 2016 to Rs. 730.9 billion in fiscal 2017. During fiscal 2017, we raised long-term debt amounting to Rs. 335.0 billion including the long-term debt of Rs. 67.0 billion for lending to the affordable housing sector and financing infrastructure project loans.

**Table of Contents****Financial Condition****Assets**

The following table sets forth the principal components of our assets as of March 31, 2017 and March 31, 2018:

	As of March 31,		Increase/ (decrease)	% Increase/ (decrease)
	2017	2018		
	(in million except percentages)			
Cash and cash equivalents	Rs. 430,708.6	Rs. 574,151.0	Rs. 143,442.4	33.3
Term placements	131,069.5	139,875.9	8,806.4	6.7
Investments held for trading	35,363.7	167,513.9	132,150.2	373.7
Investments available for sale	2,111,385.6	2,222,711.0	111,325.4	5.3
Securities purchased under agreements to resell	50,000.0	650,018.6	600,018.6	1,200.0
Loans, net	5,910,412.8	7,263,671.8	1,353,259.0	22.9
Accrued interest receivable	67,356.6	77,894.7	10,538.1	15.6
Property and equipment	38,969.3	38,968.1	(1.2)	
Intangibles	2.0	1.0	(1.0)	(50.0)
Goodwill	74,937.9	74,937.9		
Other assets	216,774.5	157,564.9	(59,209.6)	(27.3)
<b>Total assets</b>	<b>Rs. 9,066,980.5</b>	<b>Rs. 11,367,308.8</b>	<b>Rs. 2,300,328.3</b>	<b>25.4</b>

Our total assets increased by 25.4% from Rs. 9,067.0 billion as of March 31, 2017 to Rs. 11,367.3 billion as of March 31, 2018.

Our cash and cash equivalents increased from Rs. 430.7 billion as of March 31, 2017 to Rs. 574.2 billion as of March 31, 2018, primarily on account of net cash provided by our operating and financing activities, partially offset by net cash used in our investing activities. Cash and cash equivalents comprise of cash, balances due from banks and deposits that have original maturities of 90 days or less. We are also required to maintain cash balances with the RBI to meet our cash reserve ratio requirement. Banks in India, including us, are required to maintain a specific percentage of our demand and time liabilities by way of a balance in a current account with the RBI. This is to maintain the solvency of the banking system.

Term placements consist of placements with banks and financial institutions in the ordinary course of business. These have original maturities for periods ranging between three months and fifteen years. Term placements increased primarily on account of increase in our placements with central government bodies. Placements with central government bodies are made to comply with the extant RBI guidelines on shortfalls in priority sector lending sub-limits and account for 95.5% of term placements as of March 31, 2018.

Securities held under the trading portfolio are for trading purposes and are generally sold within 90 days from purchase. Investments held for trading increased by 373.7% from Rs. 35.4 billion as of March 31, 2017 to Rs. 167.5 billion as of March 31, 2018 primarily on account of the increase in our investments in mutual fund units and corporate bonds.

Investments available for sale increased by 5.3% primarily on account of an increase in our Government securities, partially offset by a decrease in our investments in commercial papers.

Net loans increased primarily on account of an increase in our retail loan portfolio. Our gross retail loan portfolio increased by 28.8% from Rs. 4,049.0 billion as of March 31, 2017 to Rs. 5,213.4 billion as of March 31, 2018. The growth in retail loans was across product segments. Our gross wholesale loan book increased by 11.5% from Rs. 1,940.0 billion as of March 31, 2017 to Rs. 2,162.8 billion as of March 31, 2018.

**Table of Contents**

Accrued interest receivable increased by 15.6% from Rs. 67.4 billion as at March 31, 2017 to Rs. 77.9 billion as of March 31, 2018, primarily on account of an increase in our loans and investment securities.

Our property and equipment decreased by Rs 1.2 million. We added 195 branches and 260 ATMs in fiscal 2017 and 72 branches and 375 ATMs in fiscal 2018.

We acquired a branch network representing contractual and non-contractual customer relationships, customer lists, core deposits and favorable leases as identified intangible assets on account of our acquisition of CBoP in 2008. These intangibles amounted to Rs. 16.0 billion as of the date of acquisition. We have amortized these intangibles over their estimated remaining useful life, resulting in a charge of Rs. 3.0 million and Rs. 1.0 million in fiscals 2017 and 2018, respectively. Consequently, these intangibles were carried at an amortized value of Rs. 2.0 million and Rs. 1.0 million as of March 31, 2017 and March 31, 2018, respectively.

We paid a purchase consideration of Rs. 102.8 billion to acquire the net assets of CBoP at a fair value of Rs. 27.8 billion, thereby recognizing unidentified intangibles (goodwill) of Rs. 74.9 billion during fiscal 2009. The primary purpose of the acquisition was to realize potential synergies, growth opportunities and cost savings from combining our businesses. The goodwill arising from the business combination is tested on an annual basis for impairment. The said goodwill has not been impaired as of March 31, 2018 and has been carried forward at the same value as the value at the acquisition date.

Other assets decreased by 27.3% from Rs. 216.8 billion as of March 31, 2017 to Rs. 157.6 billion as of March 31, 2018, primarily on account of a decrease in derivatives from Rs. 139.2 billion as of March 31, 2017 to Rs. 50.8 billion as of March 31, 2018. This was largely attributable to a decrease in mark-to-market gains from forward exchange contracts.

**Liabilities and Shareholders Equity**

The following table sets forth the principal components of our liabilities and shareholders equity as of March 31, 2017 and March 31, 2018:

	As of March 31,		Increase/	Increase/
	2017	2018	(decrease)	(decrease)
	(in million, except percentages)			%
<b>Liabilities</b>				
Interest bearing deposits	Rs. 5,277,644.0	Rs. 6,693,649.3	Rs. 1,416,005.3	26.8
Non-interest bearing deposits	1,153,678.9	1,190,102.2	36,423.3	3.2
<b>Total deposits</b>	<b>6,431,322.9</b>	<b>7,883,751.5</b>	<b>1,452,428.6</b>	<b>22.6</b>
Securities sold under repurchase agreements		138,000.0	138,000.0	*
Short-term borrowings	322,265.6	779,201.7	456,936.1	141.8
Accrued interest payable	44,487.6	65,514.4	21,026.8	47.3
Long-term debt	730,920.7	932,906.3	201,985.6	27.6
Accrued expenses and other liabilities	510,082.6	391,441.6	(118,641.0)	(23.3)

<b>Total liabilities</b>	<b>8,039,079.4</b>	<b>10,190,815.5</b>	<b>2,151,736.1</b>	<b>26.8</b>
Non-controlling interest in subsidiaries	1,847.5	2,329.7	482.2	26.1
HDFC Bank Limited shareholders equity	1,026,053.6	1,174,163.6	148,110.0	14.4
<b>Total liabilities and shareholders equity</b>	<b>Rs. 9,066,980.5</b>	<b>Rs. 11,367,308.8</b>	<b>Rs. 2,300,328.3</b>	<b>25.4</b>

\* *Not meaningful*

**Table of Contents**

Our total liabilities increased by 26.8% from Rs. 8,039.1 billion as of March 31, 2017 to Rs. 10,190.8 billion as of March 31, 2018. This increase was primarily attributable to the growth in our deposits and borrowings. The increase in our interest-bearing deposits was on account of an increase in time deposits and savings deposits. Time deposits increased by 33.3% from Rs. 3,341.9 billion as of March 31, 2017 to Rs. 4,455.7 billion as of March 31, 2018. We had mobilized US \$3.4 billion in special FCNR deposits from NRI clients under the RBI swap window in fiscal 2014. A major portion of these deposits were issued for a 3-year tenor. These came up for redemption starting fiscal 2017 and US\$ 3.03 billion of the FCNR deposits were redeemed up to March 31, 2018. Savings account deposits increased by 15.6% from Rs. 1,935.8 billion as of March 31, 2017 to Rs. 2,238.0 billion as of March 31, 2018. Our non-interest bearing demand deposits increased by 3.2% from Rs. 1,153.7 billion as of March 31, 2017 to Rs. 1,190.1 billion as of March 31, 2018. In fiscal 2017, there was a spurt in our savings account and non-interest bearing demand deposits largely attributable to the demonetization exercise carried out by the RBI, whereby the Rs. 500 and Rs. 1,000 denominations of bank notes ceased to be legal tender with effect from November 9, 2016.

Most of our funding requirements are met through short-term and medium-term funding sources. Of our total non-equity sources of funding, primarily comprised of deposits and borrowings, deposits accounted for 77.4%, short-term borrowings accounted for 7.6% and long-term debt accounted for 9.2% as of March 31, 2018. Our short-term borrowings, comprised primarily of money market borrowings, increased by Rs. 456.9 billion from Rs. 322.3 billion as of March 31, 2017 to Rs. 779.2 billion as of March 31, 2018. Our long-term debt increased by 27.6% from Rs. 730.9 billion as of March 31, 2017 to Rs. 932.9 billion as of March 31, 2018. During fiscal 2018, we raised debt capital instruments eligible for inclusion in Additional Tier I capital and Tier II capital under the Basel III capital regulations amounting to Rs. 80.0 billion and Rs. 20.0 billion respectively. During fiscal 2018 we also raised Rs. 23.0 billion by an overseas issuance of Rupee denominated bonds.

Accrued interest payable increased by Rs. 21.0 billion from Rs. 44.5 billion as of March 31, 2017 to Rs. 65.5 billion as of March 31, 2018. This increase was primarily on account of interest accrued on our long-term debt.

Accrued expenses and other liabilities decreased by 23.3% from Rs. 510.1 billion as of March 31, 2017 to Rs. 391.4 billion as of March 31, 2018. This was largely attributable to a decrease in our derivatives, bills payable and remittances in transit.

Shareholders' equity increased on exercise of 32,544,550 stock options by employees and an increase in our retained earnings partially offset by a decrease in our accumulated other comprehensive income (primarily on account of mark-to-market losses on available for sale securities).

**Table of Contents****Capital**

We are a banking company within the meaning of the Indian Banking Regulation Act, 1949, registered with and subject to supervision by the RBI. Failure to meet minimum capital requirements could lead to regulatory actions by the RBI that, if undertaken, could have a material effect on our financial position. The RBI issued detailed guidelines for implementation of Basel III capital regulations in May 2012. The minimum capital requirements under Basel III are being phased-in as per the guidelines prescribed by the RBI. Accordingly, we are required to maintain a minimum common equity tier I ratio of 7.375%, a minimum total Tier I capital ratio of 8.875% and a minimum total capital ratio of 10.875% (each including capital conservation buffer of 1.875%) as of March 31, 2018.

During fiscal 2018, the RBI identified us as a Domestic-Systemically Important Bank ( D-SIB ), under the bucketing structure as provided in the D-SIB framework. As an identified D-SIB, we are required to maintain additional CET-I capital of 0.15% effective April 1, 2018 and will be required to maintain additional CET-I capital of 0.20% effective April 1, 2019.

Our regulatory capital and capital adequacy ratios measured in accordance with Indian GAAP and calculated under Basel III as of March 31, 2017 and March 31, 2018 are as follows:

	2017	As of March 31, 2018	
		(in million, except percentages)	
		2018	2018
Tier I capital	Rs. 818,293.0	Rs. 1,060,049.0	US\$ 16,280.9
Tier II capital	113,026.6	125,354.7	1,925.3
<b>Total capital</b>	<b>Rs. 931,319.6</b>	<b>Rs. 1,185,403.7</b>	<b>US\$ 18,206.2</b>
Total risk weighted assets	Rs. 6,400,299.3	Rs. 8,001,259.8	US\$ 122,888.3
Capital ratios of the Bank:			
Common Equity Tier I	12.79%	12.25%	12.25%
Tier I	12.79%	13.25%	13.25%
Total capital	14.55%	14.82%	14.82%
Minimum capital ratios required by the RBI:*			
Tier I	8.25%	8.875%	8.875%
Total capital	10.25%	10.875%	10.875%

\* The Tier I and Total capital ratio includes capital conservation buffer.

**Table of Contents****Capital Expenditure**

Our capital expenditures consist principally of expenditures relating to our branch network expansion, as well as investments in our technology and communications infrastructure. Our capital expenditure was Rs. 9.2 billion in fiscal 2018. We have current plans for capital expenditures of approximately Rs. 20.2 billion in fiscal 2019. Our budgeted capital expenditure is primarily to expand our branch and ATM network, to upgrade and expand our hardware, data center, network and other systems, to add new equipment in and expand our existing premises and to relocate our branches and back-offices. We may use these budgeted amounts for other purposes depending on, among other factors the business environment prevailing at the time, and consequently our actual capital expenditures may be higher or lower than our budgeted amounts.

**Financial Instruments and Off-Balance Sheet Arrangements**

Our foreign exchange and derivative product offerings to our customers cover a range of products, including foreign exchange and interest rate transactions and hedging solutions, such as spot and forward foreign exchange contracts, forward rate agreements, currency swaps, currency options, and interest rate derivatives. These transactions enable our customers to transfer, modify or reduce their foreign exchange and interest rate risks. A specified group of relationship managers from our Treasury front office works on such product offerings jointly with the relationship managers from Wholesale Banking.

We enter into forward exchange contracts, currency options, forward rate agreements, currency swaps and rupee interest rate swaps with inter-bank participants, similar to our Wholesale Banking business, where we enter into such transactions with our customers. To support our clients' activities, we are an active participant in the Indian inter-bank foreign exchange market. We also trade, to a more limited extent, for our own account. We also engage in proprietary trades of rupee-based interest rate swaps and use them as part of our asset liability management.

Forward exchange contracts are commitments to buy or sell foreign currency at a future date at the contracted rate. A currency option is a contract where the purchaser of the option has the right but not the obligation to either purchase or sell and the seller of the option agrees to sell or purchase an agreed amount of a specified currency at a price agreed in advance and denominated in another currency on a specified date or by an agreed date in the future. A forward rate agreement is a financial contract between two parties to exchange interest payments for a notional principal amount on a settlement date, for a specified period from a start date to a maturity date. Currency swaps are commitments to exchange cash flows by way of interest in one currency against another currency and exchanges of principal amounts at maturity (or on specified intermittent dates) based on predetermined rates. Rupee interest rate swaps are commitments to exchange fixed and floating rate cash flows in rupees.

We earn profit on customer transactions by way of a margin as a mark-up over the inter-bank exchange or interest rate. We earn profit on inter-bank transactions by way of a spread between the purchase rate and the sale rate. These profits are recorded as income from foreign exchange and derivative transactions. The Bank's Board of Directors imposes limits on our ability to hold overnight positions in foreign exchange and derivatives and the same are intimated to RBI. The following table presents the aggregate notional principal amounts of the Bank's outstanding forward exchange and derivative contracts as of March 31, 2018, together with the fair values on each reporting date:

<b>As of March 31, 2018</b>					
<b>Notional</b>	<b>Gross Assets</b>	<b>Gross Liabilities</b>	<b>Net Fair Value</b>	<b>Notional</b>	<b>Net Fair Value</b>
<b>(In million)</b>					

Edgar Filing: HDFC BANK LTD - Form 20-F

Currency swaps	161,301.3	4,929.0	4,882.5	46.5	2,477.4	0.7
Forward exchange contracts	4,344,675.7	33,423.3	39,357.1	(5,933.8)	66,728.2	(91.1)
<b>Total</b>	<b>Rs. 7,827,363.5</b>	<b>Rs. 50,836.2</b>	<b>Rs. 56,124.7</b>	<b>Rs. (5,288.5)</b>	<b>US\$ 120,217.4</b>	<b>US\$ (81.2)</b>

We have not designated the above derivative contracts as accounting hedges and accordingly the contracts are recorded at fair value on the balance sheet with subsequent changes in fair value recorded in earnings.

**Table of Contents****Guarantees and Documentary Credits**

As a part of our commercial banking activities, we issue documentary credits and guarantees. Documentary credits, such as letters of credit, enhance the credit standing of our customers. Guarantees generally represent irrevocable assurances that we will make payments in the event that the customer fails to fulfill its financial or performance obligations. Financial guarantees are obligations to pay a third-party beneficiary where a customer fails to make payment towards a specified financial obligation. Performance guarantees are obligations to pay a third-party beneficiary where a customer fails to perform a non-financial contractual obligation. The nominal values of guarantees and documentary credits for the dates set forth below were as follows:

	2017	As of March 31, 2018 (In million)	2018
Nominal values:			
Bank guarantees:			
Financial guarantees	Rs. 202,430.1	Rs. 237,417.3	US\$ 3,646.4
Performance guarantees	166,964.2	214,088.3	3,288.1
Documentary credits	359,613.7	395,452.7	6,073.6
<b>Total</b>	<b>Rs. 729,008.0</b>	<b>Rs. 846,958.3</b>	<b>US\$ 13,008.1</b>

Guarantees and documentary credits outstanding increased by 16.2% to Rs. 847.0 billion as of March 31, 2018 from Rs. 729.0 billion as of March 31, 2017, principally due to growth in our trade finance business.

**Undrawn commitments**

The Bank has outstanding undrawn commitments to provide loans and financing to customers. These loan commitments aggregated to Rs. 419.0 billion and Rs. 452.0 billion (US\$ 6.9 billion) as of March 31, 2017 and March 31, 2018, respectively. Among other things, the making of a loan is subject to a review of the creditworthiness of the customer at the time the customer seeks to borrow, at which time the Bank has the unilateral right to decline to make the loan. If the Bank were to make such loans, the interest rates would be dependent on the lending rates in effect when the loans were disbursed. Further, the Bank has unconditional cancellable commitments aggregating to Rs. 2,159.0 billion and Rs. 2,738.5 billion (US\$ 42.1 billion) as of March 31, 2017 and March 31, 2018, respectively. See also note 24 to our consolidated financial statements included elsewhere in this report.

**Contractual Obligations and Commercial Commitments**

The table below summarizes our principal contractual obligations as of March 31, 2018:

**Contractual Obligations**

	Payments due by period, as of March 31, 2018				After 5 years
	Total	Less than 1 year	1-3 years (in million)	3-5 years	
Subordinated debt <sup>(a)</sup>	Rs. 151,063.5	Rs. 12,999.6	Rs.	Rs. 6,000.0	Rs. 132,063.9

Edgar Filing: HDFC BANK LTD - Form 20-F

Other long-term debt	701,845.5	159,123.2	322,809.0	70,169.7	149,743.6
Operating leases <sup>(b)</sup>	79,346.3	10,124.2	18,174.9	14,791.5	36,255.7
Short-term borrowings	779,201.7	779,201.7			
Securities sold under repurchase agreements	138,000.0	138,000.0			
Unconditional purchase obligations <sup>(c)</sup>	5,196.7	5,196.7			
<b>Total</b>	<b>Rs. 1,854,653.7</b>	<b>Rs. 1,104,645.4</b>	<b>Rs. 340,983.9</b>	<b>Rs. 90,961.2</b>	<b>Rs. 318,063.2</b>

- (a) Scheduled maturities of subordinated debt do not include perpetual bonds of Rs. 79,997.3 million (net of debt issuance cost).
- (b) Operating leases are principally for the lease of office, branch and ATM premises, residential premises for executives and office equipments.
- (c) Unconditional purchase obligations principally constitute the capital expenditure commitments made as of March 31, 2018. See *Note 27 Commitments and contingencies* of our consolidated financial statements.

**Table of Contents****Commercial Commitments**

Our commercial commitments consist principally of letters of credit, guarantees, forward exchange and derivative contracts.

We have recognized a liability of Rs. 2.8 billion as of March 31, 2018, in accordance with FASB ASC 460-10 in respect of guarantees issued or modified. Based on historical trends, in accordance with FASB ASC 450, we have recognized a liability of Rs. 2.5 billion as of March 31, 2018.

As part of our risk management activities, we continuously monitor the creditworthiness of customers as well as guarantee exposures. However, if a customer fails to perform a specified obligation to a beneficiary, the beneficiary may draw upon the guarantee by presenting documents that are in compliance with the guarantee. In that event, we make payment on account of the defaulting customer to the beneficiary, up to the full notional amount of the guarantee. The customer is obligated to reimburse us for any such payment. If the customer fails to pay, we would, as applicable, liquidate collateral and/or set off accounts; if insufficient collateral is held, we recognize a loss.

The residual maturities of the above commitments as of March 31, 2018 are set forth in the following table:

<b>Amount of commitment expiration per period, as of March 31, 2018</b>					
	<b>Total amounts Committed*</b>	<b>Up to 1 year</b>	<b>1-3 years (in million)</b>	<b>3-5 years</b>	<b>Over 5 years</b>
Documentary credits	Rs. 395,452.7	Rs. 374,805.5	Rs. 20,132.7	Rs. 446.7	Rs. 67.8
Guarantees	451,505.6	310,257.4	109,916.6	18,781.5	12,550.1
Forward exchange and derivative contracts	7,827,363.5	5,874,226.3	886,716.4	891,452.5	174,968.3
<b>Total</b>	<b>Rs. 8,674,321.8</b>	<b>Rs. 6,559,289.2</b>	<b>Rs. 1,016,765.7</b>	<b>Rs. 910,680.7</b>	<b>Rs. 187,586.2</b>

\* Denotes nominal values of documentary credits and guarantees and notional principal amounts of forward exchange and derivative contracts.

**Extent of dependence on single customer exposures**

Our exposure to a borrower is subject to the regulatory limits established by the RBI from time to time, or specific approval by RBI. The exposure-ceiling limit for a single borrower is 15% of our capital funds. This limit may be exceeded by an additional 5% (i.e. up to 20%) provided the additional credit exposure is on account of infrastructure or by an additional 10% (i.e. up to 25%) provided the credit exposure is to oil companies to whom bonds have been issued by the Government of India. In addition to the above exposure limit, we may, in exceptional circumstances, with the approval of the Board, consider increasing our exposure to a borrower up to an additional 5% of the capital funds. Our exposure to a single NBFC or NBFC-asset financing companies ( AFC ) should not exceed 10.0% or 15.0%, respectively, of our capital funds. We may, however, assume exposures on a single NBFC or NBFC-AFC up to 15.0% or 20.0%, respectively, if it is on account of funds on-lent by the NBFC or NBFC-AFC to the infrastructure sector. Our exposure to infrastructure finance companies ( IFC ) should not exceed 15.0% of our capital funds. However, this may be exceeded by an additional 5% (i.e. up to 20%) if the same is on account of funds on-lent by the IFC to the infrastructure sector.

**Table of Contents**

Our exposures to our ten largest borrowers as of March 31, 2018, computed as per RBI guidelines, based on the higher of the outstanding balances of or limits on, funded and non-funded exposures as per Indian GAAP were as follows. None of these exposures were impaired as of March 31, 2018:

Borrower	Industry	March 31, 2018		Total Exposure	Total Exposure
		Funded Exposure	Non-Funded Exposure		
		(in million)			
Borrower 1	Coal & Petroleum Products	Rs. 11,615.0	Rs. 79,373.2	Rs. 90,988.2	US\$ 1,397.5
Borrower 2	NBFC / Financial Intermediaries	80,006.2	87.1	80,093.3	1,230.1
Borrower 3	Coal & Petroleum Products	27,567.3	48,406.0	75,973.3	1,166.8
Borrower 4	Telecom	59,631.9	13,790.6	73,422.5	1,127.7
Borrower 5	NBFC / Financial Intermediaries	70,012.7		70,012.7	1,075.3
Borrower 6	Iron and Steel	34,673.6	22,396.4	57,070.0	876.5
Borrower 7	Non-ferrous Metals	13,054.6	43,324.0	56,378.6	865.9
Borrower 8	Engineering	6,001.5	48,749.4	54,750.9	840.9
Borrower 9	Power	44,367.1	3,300.0	47,667.1	732.1
Borrower 10	NBFC / Financial Intermediaries	45,000.0		45,000.0	691.1

Of the total exposure to these ten borrowers, approximately 51% was secured by collateral. As of March 31, 2018, of our exposure to our ten largest borrowers, exposure to 5 borrowers was equal to or more than 5% of our capital funds and was mainly comprised of large credit facilities to these borrowers.

There were no exposures that exceeded the regulatory ceiling established by RBI.

**Cross border exposures**

The RBI requires banks in India to implement RBI prescribed guidelines on country risk management in respect of those countries where a bank has net funded exposure in excess of a prescribed percentage of its total assets. In the normal course of business, we have both direct and indirect exposure to risks related to counter parties and entities in foreign countries. We monitor such cross-border exposures on an ongoing basis. As of March 31, 2018, our aggregate country risk exposure was 3% of our total assets and our net funded exposure to any other country did not exceed 1% of our total assets.

**Cyber Security**

We offer internet banking services to our customers. Our internet banking channel includes multiple services such as electronic funds transfer, bill payment services, usage of credit cards on-line, requesting account statements and requesting check books. We are therefore exposed to cyber threats, such as hacking, phishing and trojans, targeting our customers, wherein fraudsters send unsolicited mails to our customers seeking account sensitive information; hacking, wherein hackers seek to hack into our website with the primary intention of causing reputational damage to us; and data theft, wherein cyber criminals may intrude into our network with the intention of stealing our internal data or our customer information or to extort money.

We have implemented various measures to mitigate risks that emanate from offering online banking to our customers. These are briefly enumerated below:

Phishing: We identify phishing sites and trojans targeting our customers and then shut down such sites. Forensic information such as customers details which may have been compromised are retrieved from such sites and acted upon. We have implemented Secure Access which provides an additional layer of security in addition to the customer identification (id) and password requirement for internet banking transactions. This system evaluates every transaction based on our risk model and helps us to determine whether the incumbent transaction is genuine or suspicious. Should the transaction be deemed suspicious, the system has the option of either declining the transaction or asking for additional authentication. As a practice, we send awareness mails to our customers educating them about phishing and the measures that they need to take to protect themselves from falling prey to it.

Hacking and Data Theft: We have implemented firewalls and intrusion prevention system at the perimeter of our network to block any attempts made to hack or intrude into our network. Our 24 by 7 security operations center analyzes logs of its perimeter defenses to identify any attempts made to intrude into our network. We have an incident management process to ensure that in the event of any incident, relevant stakeholders are made aware of what their role is in resolving the incident. We also test our internet-facing infrastructure and applications for vulnerability. Any vulnerability thus identified is remediated in a time-bound manner. We have defined baseline security standards for the technologies in use. These standards were created taking into consideration industry-best practices and are reviewed on a regular basis to counter new threat vectors and avoid obsolescence. We have also subscribed to anti- DDOS services (Distributed Denial Of Services).

**Table of Contents**

We have also undertaken internal data security measures that are taken with respect to breaches or theft of material or sensitive customer data. These are briefly enumerated below:

**Data Loss Prevention (DLP):** Information is an important asset of any organization that supports business processes and management decisions. Usage and protection of business information can be heavily influenced by individuals in the end user environment, where most of the corporate data is processed, shared and stored. We have implemented enterprise solutions such as DLP to monitor sensitive data stored, transmitted and shared by users, and to prevent and detect data breaches. Individual business functions are also involved in incident reviews which helps create a sense of ownership and awareness amongst our employees.

**Laptop Encryption:** Data Encryption helps ensure that business-critical and sensitive data does not fall into the wrong hands, thereby preventing reputational damage or curtailing any monetary losses. The cost arising out of loss of data residing in a laptop is far higher than the cost of replacing the actual device. We have therefore implemented a laptop encryption tool on the Bank's laptops.

**MANAGEMENT**

**Directors and Senior Management**

Our Memorandum and Articles of Association ( Articles ) provide that, until otherwise determined by the general meeting of shareholders, the number of our directors shall not be less than 3 or more than 15, excluding directors appointed pursuant to the terms of issued debt. Our Board of Directors consisted of 10 members as of March 31, 2018.

As per the Indian Companies Act, 2013 (the Companies Act ), unless the Articles provide for the retirement of all directors at every annual general meeting, not less than two-thirds of the total number of directors shall be persons whose period of office is liable to determination by retirement of directors by rotation. However, any retiring director may be re-appointed by resolution of the shareholders. Pursuant to the Companies Act, every company shall have at least one director who has stayed in India for a total period of not less than 182 days in the previous calendar year (i.e. an Indian resident).

Under the terms of our Articles, our promoter, Housing Development Finance Corporation Limited ( HDFC Limited ), has a right to nominate the non-retiring directors to our Board , so long as HDFC Limited, its subsidiaries or any other company promoted by HDFC Limited, either singly or in the aggregate, holds not less than 20% of our paid-up equity share capital . The directors so nominated by HDFC Limited currently are the Chairperson and the Managing Director of the Bank.

The Banking Regulation Act, 1949 ( the Banking Regulation Act ) and subsequent RBI notification dated November 24, 2016 requires that not less than 51% of the board members shall consist of persons who have specialized knowledge or practical experience in one or more of the following areas: accounting, finance, agriculture and rural economy, banking, co-operation, economics, law, small-scale industry, information technology, payment and settlement systems, human resources, risk management, business management and any other matter which in the opinion of the RBI will be useful to the banking company. Of these, not less than two directors shall have specialized knowledge or practical experience in respect of agriculture and the rural economy, co-operation or small-scale industry. Mr. Malay Patel is the Independent Director on the Board having specialized knowledge and practical experience in small scale industry and Mr. Umesh Chandra Sarangi is the Independent Director on the Board having specialized knowledge and practical experience in agriculture and rural economy. Mr. Srikanth Nadhamuni is the Non-Executive Director on the Board of the Bank having expertise in Information Technology.

Interested directors may not vote at board proceedings, except in relation to contracts or arrangements with a company in which that director (or two or more directors together) holds not more than 2% of the paid-up share capital.

None of our directors or members of our senior management holds 1% or more of our equity shares.

**Table of Contents**

Our Board of Directors, as of March 31, 2018, comprised of:

<b>Name</b>	<b>Position</b>	<b>Age</b>
Mrs. Shyamala Gopinath	Part-time Non-Executive Chairperson	68
Mr. Bobby Parikh	Non-Executive Director	54
Mr. Keki Mistry	Non-Executive Director	63
Mr. Partho Datta	Non-Executive Director	69
Mr. Malay Patel	Non-Executive Director	41
Mr. Aditya Puri	Managing Director	67
Mr. Paresh Sukthankar	Deputy Managing Director	55
Mr. Kaizad Bharucha	Executive Director	52
Mr. Umesh Chandra Sarangi	Non-Executive Director	66
Mr. Srikanth Nadhamuni	Non-Executive Director	54

The following are brief biographies of our directors:

**Mrs. Shyamala Gopinath** is the part-time Non-Executive Chairperson of the Bank. She holds a master's degree in commerce and is a certified associate of the Indian Institute of Bankers. She has 39 years of experience in financial sector policy formulation in different capacities at the RBI. As Deputy Governor of the RBI for seven years and a member of the RBI's board of directors, she guided and influenced national policies in diverse areas such as regulation and supervision of financial sector, financial markets, and capital account management. During 2001 to 2003, she worked as senior financial sector expert in the then Monetary Affairs and Exchange Department of the International Monetary Fund (Financial Institutions Division). She is an independent director in a few listed and unlisted companies including not for profit entities. She served as the Chairperson on the Advisory Board on Bank, Commercial and Financial Frauds for two years from 2012 to 2014 and the Corporate Bonds and Securitisation Advisory Committee of SEBI from August 2011 until January 2018. She currently chairs the Board of Governors of Indian Institute of Management, Raipur.

**Mr. Aditya Puri** is and has been the Managing Director of the Bank since September 1994. He holds a bachelor's degree in commerce from Punjab University and is an associate member of ICAI. Prior to joining the Bank, he was the chief executive officer of Citibank, Malaysia from 1992 to 1994. He has over 40 years of experience in the banking sector in India and abroad. He was named amongst the best 30 chief executive officers in the world in the Barron's list for the years 2015 and 2017. He is the Non-Executive Chairman of HDBFSL, a subsidiary of the Bank.

---

**Table of Contents**

**Mr. Paresh Sukthankar** is the Deputy Managing Director of the Bank. He completed his graduation from Sydenham College, Mumbai and holds a bachelor of commerce degree from the University of Mumbai. He has done his masters in management studies from Jamnalal Bajaj Institute (Mumbai). He has also completed the Advanced Management Program from Harvard Business School. He has been associated with the Bank since its inception. At the Bank, he has direct or supervisory oversight over various key areas of the Bank including Credit, Risk Management, Finance, Human Resources, Investor Relations, Corporate Communications, Corporate Social Responsibility and Information Security.

**Mr. Kaizad Bharucha** is an Executive Director of the Bank. He holds a bachelor of commerce degree from the University of Mumbai. He has been associated with the Bank since 1995. In his current position as Executive Director, he is responsible for Wholesale Banking covering areas of Corporate Banking, Emerging Corporate Group, Business Banking, Healthcare Finance, Agricultural Lending and Department for Special Operations. In his previous position as Group Head Credit & Market Risk, he was responsible for the Risk Management activities in the Bank, which are Credit Risk, Market Risk, Debt Management, Risk Intelligence and Control functions. He is a career banker with over three decades of banking experience. Prior to joining the Bank, he worked at SBI Commercial and International Bank in various areas including Trade Finance and Corporate Banking. He has represented HDFC Bank as a member of the working group constituted by the RBI to examine the role of Credit Information Bureau and on the sub-committee with regard to the adoption of the Basel II guidelines.

**Mr. Bobby Parikh** is an Independent Non-Executive Director of the Bank. He has been associated with the Bank as a Director since January, 2011. He is a qualified chartered accountant from the Institute of Chartered Accountants of India ( ICAI ) and holds a bachelor's degree in commerce from the University of Mumbai. Mr. Parikh was a Senior Partner with BMR & Associates LLP and led its financial services practice. Prior to joining BMR & Associates LLP, Mr. Parikh was also the Chief Executive Officer of Ernst & Young in India and held that responsibility until December 2003. Mr. Parikh worked with Arthur Andersen for over 17 years and was its Country Managing Partner until the Andersen practice combined with that of Ernst & Young in June 2002. Mr. Parikh is a director on the boards of BMR Business Solutions Pvt Ltd, Tax and Advisors Pvt Ltd, BMR Global Services Pvt Ltd, Indostar Capital Finance Ltd, Aviva Life Insurance Company Ltd, Aditya Birla Sun Life Asset Management Company Ltd, Sembcorp Green Infra Ltd, Sembcorp Energy India Ltd and a designated partner of Avaana Partner Advisors LLP and partner of Bobby Parikh Associates. He is one of the financial experts on the Audit Committee of the Bank.

**Mr. Malay Patel** is an Independent Non-Executive Director of the Bank. He holds a major in engineering (Mechanical) from Rutgers University, Livingston, NJ, USA. He is a director on the board of directors of Eewa Engineering Company Private Limited, a company in the plastics and packaging industry. He has been involved in varied roles such as export, import, procurement, sales and marketing, among others, in Eewa Engineering Company Private Limited. He has knowledge and practical experience in matters relating to small scale industries in terms of Section 10-A (2)(a) of the Banking Regulation Act, 1949.

**Mr. Partho Datta** is an Independent Non-Executive Director of the Bank. He is an associate member of the ICAI. He joined Indian Aluminum Company Limited ( INDAL ) and was with INDAL and its parent company in Canada for 25 years and held positions as Treasurer, Chief Financial Officer and Director Finance during his tenure. He joined the Chennai based Murugappa Group thereafter as the head of Group Finance and was a member of the Management Board, as well as Director in several Murugappa Group companies. Post retirement from the Murugappa Group, he was an advisor to the Government appointed board of directors of Satyam Computers Services Limited during the restoration process and has also been engaged in providing business/strategic and financial consultancy on a selective basis. He is one of the financial experts on the Audit Committee of the Board.

**Table of Contents**

**Mr. Keki Mistry** is a Non-Executive Director of the Bank. He holds a bachelor's degree in commerce from the University of Mumbai. He is a fellow member of the ICAI. In the year 1981, he joined HDFC Limited. He was inducted to the board of directors of HDFC Limited as an executive director in 1993 and is currently the vice chairman and chief executive officer of HDFC Limited. He is the Chairman of the CII National Council on Corporate Governance and also a member of the Committee on Corporate Governance set up by SEBI.

**Mr. Umesh Chandra Sarangi** is an Independent Non-Executive Director of the Bank. He holds a master's degree in Science (Botany). He has 35 years of experience in the Indian Administrative Services. As the erstwhile chairman of the National Bank for Agricultural and Rural Development from December 2007 to December 2010, he focused on rural infrastructure, accelerated initiatives such as microfinance, financial inclusion, watershed development and tribal development. He has been appointed as a Director having specialized knowledge and experience in agriculture and rural economy pursuant to Section 10-A (2)(a) of the Banking Regulation Act, 1949.

**Mr. Srikanth Nadhamuni** is a Non-Executive Director of the Bank. He holds a master's degree in Electrical Engineering from Louisiana State University. He presently is the Chairman of Novopay Solutions Private Limited, a company involved in the area of mobile payments and is the chief executive officer of Khosla Labs Private Limited, a start-up incubator. He has also been a co-founder of e-Governments Foundation, which aims to improve governance in Indian cities, creation of Municipal enterprise resource planning suite which improves service delivery of cities. He was the Head (Technology Development) UID Project, beginning in 2009, where he participated in the design and development of the world's largest biometric based ID system.

**Corporate Governance**

***Audit Committee***

The Audit Committee of the Bank, as of March 31, 2018, has Mrs. Shyamala Gopinath, Mr. Partho Datta, Mr. Bobby Parikh and Mr. Umesh Chandra Sarangi as its members. During the year, Mr. A. N. Roy ceased to be a member of the Committee pursuant to his resignation as Director of the Bank. Each member of the Audit Committee is an Independent Director. The Audit Committee is chaired by Mr. Bobby Parikh. The Audit Committee met eight times during fiscal 2018.

The terms of reference of the Audit Committee include, inter alia, the following:

- a. Overseeing the Bank's financial reporting process and disclosure of financial information to ensure that the financial statement is correct, sufficient and credible;
  - b. Recommending the appointment and removal of external auditors and the fixing of their fees;
  - c. Reviewing with management the annual financial statements and auditors report before their submission to the Board, with special emphasis on accounting policies and practices, compliance with accounting standards disclosure of related party transactions and other legal requirements relating to financial statements;
  - d. Reviewing the adequacy of the Audit and Compliance functions, including their policies, procedures, techniques and other regulatory requirements; and
  - e. Any other terms of reference as may be included from time to time in the Companies Act, 2013 and Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (the SEBI Listing Regulations), including any amendments or re-enactments thereof from time to time.
- The Board has also adopted a charter for the Audit Committee in connection with certain U.S. regulatory standards as the Bank's securities are also listed on the New York Stock Exchange.

**Table of Contents**

***Nomination and Remuneration Committee***

The terms of reference of the Nomination and Remuneration Committee include scrutinizing the nominations of the directors with reference to their qualifications and experience, to identify fit and proper persons and assess their competency and reviewing the compensation levels of the Bank's employees vis-à-vis other banks and the banking industry in general.

The criteria for assessing the competency of the persons nominated are as follows:

Academic qualifications;

Previous experience;

Track record; and

Integrity of the candidate.

For assessing the integrity and suitability, features like criminal records, financial position, civil actions undertaken to pursue personal debts, refusal of admission to and expulsion from professional bodies, sanctions applied by regulators or similar bodies and previous questionable business practices are considered.

The Bank's compensation policy provides a fair and consistent basis for motivating and rewarding employees appropriately according to their job profile or role size, performance, contribution, skill and competence.

The Nomination and Remuneration Committee also formulates criteria for the evaluation of performance of individual Directors including Independent Directors, the Board of Directors and its committees. The criteria for the evaluation of performance of Directors (including Independent Directors) include personal attributes, such as attendance at meetings, communication skills, leadership skills and adaptability, and professional attributes such as their understanding of the Bank's core business and strategic objectives, industry knowledge, independent judgment, and adherence to the Bank's Code of Conduct, ethics and values. Mrs. Shyamala Gopinath, Mr. Partho Datta and Mr. Bobby Parikh were the members of the Nomination and Remuneration Committee as of March 31, 2018. During the year, Mr. A. N. Roy ceased to be a member of the Committee pursuant to his resignation as Director of the Bank. All members of the Nomination and Remuneration Committee are Independent Directors. The Nomination and Remuneration Committee is chaired by Mr. Bobby Parikh. The Committee met seven times during fiscal 2018.

***Stakeholders Relationship Committee***

The Stakeholders Relationship Committee, approves and monitors the transfer, transmission, splitting and consolidation of shares and considers requests for dematerialization of shares. Allotments of shares to employees exercising stock options granted under the various Employees Stock Option Schemes ( ESOSs ), which are made in terms of the powers delegated by the Board in this regard. The Stakeholders Relationship Committee also monitors the redress of grievances from shareholders relating to matters such as the transfer of shares, non-receipt of our annual report and dividends, etc.

As of March 31, 2018, the Stakeholders Relationship Committee consisted of Mr. Umesh Chandra Sarangi, Mr. Malay Patel, Mr. Aditya Puri and Mr. Paresh Sukthankar. The Stakeholders Relationship Committee is chaired by Mr. Umesh Chandra Sarangi, who is an Independent Director. During the year, Mr. A. N. Roy and Mrs. Renu Karnad ceased to be members of the Committee pursuant to their resignation as Directors of the Bank and Mr. Umesh Chandra Sarangi and Mr. Malay Patel were appointed as members of the Committee. The power to approve share transfers and dematerialization requests has been delegated to executives of the Bank to avoid delays that may arise due to the non-availability of the members of the Committee. During fiscal 2018 Mr. Sanjay Dongre, Executive Vice President (Legal) and Company Secretary of the Bank, was the Compliance Officer responsible for expediting the share transfer formalities. The Stakeholders Relationship Committee met four times during fiscal 2018.

As of March 31, 2018, five instruments of transfer for 1535 equity shares were pending for transfer, which has since been processed. The details of the transfers are reported to the Board from time to time. During the year ended March 31, 2018, 2620 complaints were received from the shareholders. The Bank had attended to all the complaints but 12 complaints remained pending and 2 complaints have not been resolved to the satisfaction of the shareholders as of March 31, 2018. Besides, 7082 letters were received from the shareholders relating to change of address, nomination requests, email id and contact details updation, updates to Indian Financial System Code and Magnetic Ink Character Recognition code, National Automated Clearing House (NACH) Mandates, claim of shares from Unclaimed Suspense account, queries relating to the annual reports, sub-division of shares of face value of Rs 10/- each to Rs 2/- each, amalgamation, request for revalidation of dividend warrants and other investor related matters. As of March 31, 2018, we have responded to all letters received.

---

**Table of Contents*****Risk Policy and Monitoring Committee***

The Risk Policy and Monitoring Committee has been formed as per the guidelines of RBI on asset liability management / risk management systems. The Committee develops Bank's credit and market risk policies and procedures, verifies adherence to various risk parameters and prudential limits for treasury operations and reviews its risk monitoring system. The Committee also ensures that the Bank's credit exposure to any one group or industry does not exceed the internally set limits and that the risk is prudentially diversified.

As of March 31, 2018, the Risk Policy and Monitoring Committee consisted of, Mr. Srikanth Nadhamuni, Mrs. Shyamala Gopinath, Mr. Partho Datta, Mr. Aditya Puri and Mr. Paresh Sukthankar. During the year, Mrs. Renu Karnad ceased to be a member of the Committee pursuant to her resignation from the Bank. The Committee is chaired by Mr. Srikanth Nadhamuni. The Committee met five times during fiscal 2018.

***Credit Approval Committee***

The Credit Approval Committee approves those credit exposures that are beyond the approval powers delegated to executives of the Bank to facilitate the prompt disbursement of loans. As of March 31, 2018, the Credit Approval Committee consisted of Mr. Bobby Parikh, Mr. Keki Mistry, Mr. Aditya Puri and Mr. Kaizad Bharucha. The Credit Approval Committee met nine times during fiscal 2018.

***Premises Committee***

The Premises Committee approves the purchase and leasing of premises for the use of Bank's branches, back offices, ATMs and executive residences in accordance with the guidelines laid down by the Board. During the year, Mrs. Renu Karnad ceased to be a member of the Committee pursuant to her resignation from the Bank and Mr. Keki Mistry was appointed as a member of the Committee. As of March 31, 2018, Mr. Keki Mistry, Mr. Aditya Puri and Mr. Malay Patel were the members of the Premises Committee. The Premises Committee met five times during fiscal 2018.

***Fraud Monitoring Committee***

Pursuant to the directions of the RBI, the Bank has constituted a Fraud Monitoring Committee, exclusively dedicated to the monitoring and following up of cases of fraud involving amounts of Rs. 10 million and above. The objectives of the Fraud Monitoring Committee are the effective detection and immediate reporting of fraud, including any actions taken against the perpetrators of such fraud, to the concerned regulatory and enforcement agencies. The terms of reference of the Fraud Monitoring Committee include:

- a. identify the systemic lacunae, if any, that facilitated perpetration of the fraud and put in place measures to plug the same;
- b. identify the reasons for delay in detection, if any, and report to the top management of the Bank and the RBI;
- c. monitor the progress of the investigation by the Central Bureau of Investigation and police authorities and the recovery position;

- d. ensure that staff accountability is examined at all levels in all cases of fraud and that staff side action, if required, is completed quickly without loss of time;
- e. review the efficacy of the remedial action taken to prevent any recurrence of fraud, such as the strengthening of internal controls; and
- f. put in place other measures as may be considered relevant to strengthen preventive measures to protect against future instances of fraud.

As of March 31, 2018, the members of the Fraud Monitoring Committee were Mrs. Shyamala Gopinath, Mr. Partho Datta, Mr. Umesh Chandra Sarangi, Mr. Keki Mistry, Mr. Malay Patel and Mr. Aditya Puri. During the year, Mr. A. N. Roy ceased to be a member of the Committee pursuant to his resignation from the Bank and Mr. Umesh Chandra Sarangi was appointed as a member of the Committee. The Fraud Monitoring Committee met four times during fiscal 2018.

## **Table of Contents**

### ***Customer Service Committee***

The Customer Service Committee monitors the quality of services rendered to the Bank's customers and also ensures the implementation of directives received from the RBI in this regard. The terms of reference of the Customer Service Committee are to formulate a comprehensive deposit policy incorporating the issues arising from the death of a depositor in relation to the operation of the deceased's account, the product approval process, the annual survey of depositor satisfaction and the triennial audit of such services.

As of March 31, 2018, the members of the Customer Service Committee were Mrs. Shyamala Gopinath, Mr. Keki Mistry, Mr. Malay Patel, Mr. Srikanth Nadhamuni and Mr. Aditya Puri. During the year, Mr. A. N. Roy ceased to be a member of the Committee pursuant to his resignation from the Bank. The Customer Service Committee met five times during fiscal 2018.

### ***Corporate Social Responsibility ( CSR ) Committee***

The Board has constituted a CSR Committee with the following terms of reference:

- a. to formulate the Bank's CSR strategy, policy and goals;
- b. to monitor the Bank's CSR policy and performance;
- c. to review the CSR projects and initiatives from time to time;
- d. to ensure legal and regulatory compliance with respect to CSR; and
- e. to ensure reporting and communication to stakeholders on the Bank's CSR.

As of March 31, 2018, the members of CSR Committee were Mr. Malay Patel, Mr. Partho Datta, Mr. Bobby Parikh, Mr. Aditya Puri, Umesh Chandra Sarangi and Mr. Paresh Sukthankar. During the year, Mrs. Renu Karnad ceased to be a member of the Committee pursuant to her resignation from the Bank and Mr. Malay Patel was appointed as a member of the Committee. The Committee met four times during fiscal 2018.

### ***Digital Transaction Monitoring Committee***

In order to promote digital transactions of the Bank and to provide directions in terms of strategy and action plans including monitoring the progress of achievement in the digital transactions space, the Bank has constituted the Digital Transaction Monitoring Committee during fiscal 2018. The terms of reference of the Digital Transaction Monitoring Committee include:

- a. Framing of the Bank-level strategy and action plans for achieving the target of digital transactions in an organized manner, as may be set by the Government, regulatory authorities, IBA, etc. from time to time;

- b. Monitoring the progress of achievement in digital transactions in line with the Bank's strategy and action plans;
- c. Reviewing and exploring new opportunities for increasing the digital transactions of the Bank from time to time and giving the necessary directions in implementing and improving high level of digitalization in Bank; and
- d. Any other terms of reference as may be specified by the Government, regulatory authorities, IBA, etc. from time to time.

As of March 31, 2018, the members of Digital Transaction Monitoring Committee were Mr. Srikanth Nadhamuni, Mr. Malay Patel, Mr. Aditya Puri, and Mr. Paresh Sukthankar. The Committee met two times during fiscal 2018.

***Review Committee for Willful Defaulters Identification***

The Board has constituted a Review Committee for Willful Defaulters Identification to review the orders passed by the Committee of Executives for Identification of Willful Defaulters and provide the final decision with regard to identified willful defaulters. As of March 31, 2018, Mrs. Shyamala Gopinath, Mr. Aditya Puri, Mr. Bobby Parikh, Mr. Partho Datta were the members of the Review Committee for Willful Defaulters Identification. During the year, Mr. A. N. Roy ceased to be a member of the Committee pursuant to his resignation from the Bank. The Review Committee for Willful Defaulters Identification is chaired by Mrs. Shyamala Gopinath or Mr. Aditya Puri in her absence. No meetings of the Committee were held during fiscal 2018.

## **Table of Contents**

### ***Review Committee for Non-Cooperative Borrowers***

The Board has constituted a Review Committee to review matters related to non-cooperative borrowers, which are handled by the internal committee of executives appointed for this purpose. As of March 31, 2018, Mrs. Shyamala Gopinath, Mr. Aditya Puri, Mr. Bobby Parikh, and Mr. Partho Datta were the members of the Review Committee for Non-Cooperative Borrowers. During the year, Mr. A. N. Roy ceased to be a member of the Committee pursuant to his resignation from the Bank. The Review Committee for Non-Cooperative Borrowers is chaired by Mrs. Shyamala Gopinath or Mr. Aditya Puri in her absence. No meetings of the Review Committee for Non-Cooperative Borrowers were held during fiscal 2018.

### ***Meeting of the Independent Directors***

The Independent Directors of the Bank held a meeting on March 6, 2018 without the presence of the Non-Independent Directors and senior management team of the Bank. All of the Independent Directors attended the meeting. The Independent Directors discussed matters as required under the relevant provisions of the Companies Act, 2013 and the SEBI Listing Regulations, 2015.

### ***Committees of Executives***

We have also established committees of executives that meet frequently to discuss and determine the management of assets and liabilities and other operations and personnel issues.

### ***Borrowing Powers of Directors***

At the annual general meeting held on July 21, 2015, our shareholders passed a special resolution, pursuant to Section 180 (1)(c) of the Companies Act, authorizing the Board of Directors to borrow, for business purposes of the Bank, such sum or sums of money as they may deem necessary, notwithstanding the fact that the money borrowed or to be borrowed from time to time (with the exception of (i) the acceptance of deposits of money from the public which are repayable on demand and can be withdrawn by check, draft, order or otherwise, and (ii) temporary loans obtained in the ordinary course of business from banks, whether in India or overseas) will exceed our aggregate paid-up capital and free reserves, subject to the condition that the total outstanding amount of such borrowings shall not exceed Rs. 500 billion over and above our aggregate paid-up capital and free reserves at any time.

The terms on which the Board of Directors may borrow funds may include the lender's right to appoint directors, the allotment of shares to certain public financial institutions and, with prior shareholder and regulatory approval, the allotment of shares to other entities.

### **Compensation of Directors and Members of Our Senior Management**

The compensation arrangements for our Chairperson, Managing Director and Executive Directors are approved by the shareholders and the RBI on the recommendation of our Board of Directors.

At the 23rd Annual General Meeting, held on July 24, 2017, the shareholders of the Bank approved the revised term of appointment of Mr. Paresh Sukthankar as Deputy Managing Director of the Bank for a period of three years from June 13, 2017 till June 12 2020, in line with the RBI approval letter dated May 31, 2017.

At the 23rd Annual General Meeting, held on July 24, 2017, the shareholders of the Bank approved the revised term of appointment of Mr. Kaizad Bharucha as Executive Director of the Bank for a period of three years from June 13,

2017 till June 12, 2020 in line with the RBI approval letter dated May 31, 2017.

During fiscal 2018, the aggregate amount of compensation paid to our Managing Director, Deputy Managing Director, Executive Director and members of our senior management as on March 31, 2018 was approximately Rs. 556.2 million. This remuneration includes basic salary, allowances, performance bonus, and cash allowances in lieu of perquisites or the taxable value of perquisites (if availed) as computed under the income tax rules, but excludes gratuities, provident fund settlements, superannuation settlements and perquisites upon the exercise of stock options.

Under our organizational documents, each director, except the Managing Director, Deputy Managing Director and Executive Directors, is entitled to sitting fees for attending each meeting of the Board of Directors or of a Board committee. The amount of sitting fees is decided by the Board from time to time in accordance with applicable regulations prescribed by the Companies Act or the Government of India. Directors are paid sitting fees at the rate of Rs. 50,000 for attending committee meetings and Rs. 100,000 for attending Board meetings, respectively.

**Table of Contents**

We reimburse directors for travel and related expenses in connection with Board and committee meetings and related matters. Stock options have not been granted to Non-Executive Directors.

Mrs. Shyamala Gopinath, Chairperson, was paid remuneration of Rs. 3.1 million during fiscal 2018. Mrs. Shyamala Gopinath is also paid sitting fees for attending Board and Committee meetings.

The details of the remuneration paid during fiscal 2018 to Mr. Aditya Puri, Managing Director, Mr. Paresh Sukthankar, Deputy Managing Director and Mr. Kaizad Bharucha, Executive Director are as follows:

<b>Particulars</b>	<b>Aditya Puri</b>	<b>Paresh Sukthankar</b>	<b>Kaizad Bharucha</b>
	<b>(Rs. in million, except stock options)</b>		
Basic	45.3	24.6	16.5
Allowances and perquisites	29.7	16.3	18.9
Provident fund	5.4	2.9	2.0
Superannuation	6.8	3.7	2.5
Performance bonus*	9.2	5.5	3.5
Number of stock options granted during the year	701,600	319,000	232,000

\* Refers to deferred bonus tranches for earlier years. Bonus pertaining to fiscal 2017 is pending RBI approval as at March 31, 2018 and on RBI approval, the approved amounts will be paid and disclosed in the above table for the next fiscal year.

The Bank provides a gratuity scheme for the benefit of all employees who have completed a minimum of five years of continuous service, including our Managing Director, Deputy Managing Director, Executive Director and officers. This scheme provides for the payment of a gratuity in the form of a lump-sum payment upon the retirement, termination or resignation of employment or death while in employment of its employees in an amount equal to 15 days basic salary, payable for each completed year of service. The Bank makes annual contributions to a gratuity fund administered by trustees and managed by insurance companies. The Bank accounts for the liability of future gratuity benefits based on an independent external actuarial valuation, which is carried out annually. Perquisites, which are evaluated as per the income tax rules, where applicable, or, alternatively, at the actual cost to the Bank, are also provided to directors. Available perquisites include furnished accommodation, including gas, electricity, water, telephone, furnishings and the use of a vehicle, club fees, personal accident insurance, reimbursement for medical expenses, leave and leave travel concessions and retirement benefits, such as provident funds, superannuation and gratuity.

The details of sitting fees paid to Non-Executive Directors during fiscal 2018 are as follows:

<b>Name of the Director</b>	<b>Sitting Fees (Rs.)</b>	<b>Commission# (Rs.)</b>
Mrs. Shyamala Gopinath	2,350,000	
Mr. Partho Datta	1,950,000	1,000,000
Mr. Bobby Parikh	2,250,000	1,000,000
Mr. A. N. Roy*	1,950,000	1,000,000
Mr. Malay Patel	1,650,000	1,000,000

Edgar Filing: HDFC BANK LTD - Form 20-F

Mr. Keki Mistry	1,450,000	1,000,000
Mrs. Renu Karnad*	1,400,000	1,000,000
Mr. Umesh Chandra Sarangi	1,450,000	1,000,000

Mr. Sashidhar Jagdishan	5.84	5.72	9.10	Housing Loan

**Table of Contents****Employees Stock Options**

Our shareholders approved plan A in January 2000, plan B in June 2003, plan C in June 2005, plan D in June 2007, plan E in June 2010, plan F in June 2013 and Plan G in July 2016 for the issuance of stock options to employees and directors of the Bank under the ESOSs, namely ESOS-001 to ESOS-026. Under plan A, the option price is set as the average of the daily closing prices on the BSE during the 60 days preceding the grant date. Under plan B, the option price is set as the closing price on the business day preceding the grant date on whichever stock exchange in India has the highest trading volume for our shares during the two weeks preceding the date of grant. Under plans C, D, E, F and G, the option price is set as the closing price on the business day preceding the grant date on the stock exchange which has the highest trading volume. Our Nomination and Remuneration Committee (formerly, the Compensation Committee) has issued options under these plans several times since January 2000. Stock options granted under ESOS-001 to ESOS-009 vest at the rate of 30.0%, 30.0% and 40.0% on each of the three successive anniversaries following the date of grant, stock options granted under ESOS-010 to ESOS-013 vest at the rate of 50.0% on each of the two successive anniversaries following the date of grant, those granted under ESOS-014 and ESOS-015 vest completely on the first anniversary of the date of the grant, stock options granted under ESOS-016 to ESOS-018 vest at the rate of 75.0% and 25.0% on each of the two successive anniversaries following the date of grant and stock options granted under ESOS-019 to ESOS-028 vest at the rate of 40.0%, 30.0% and 30.0% on each of the three successive anniversaries. All of the above are subject to standard vesting conditions. In fiscal 2018, 32.5 million equity shares having a face value of Rs. 2.0 each were allotted as a result of the exercise of stock options by the employees of the Bank. This resulted in our paid-up capital increasing by Rs. 65.1 million and the share premium by Rs. 27,194.0 million. As of March 31, 2018, 75,443,800 options convertible to equity shares of Rs. 2.0 each were outstanding.

**Other Compensation**

All employees, including our Managing Director, Deputy Managing Director, Executive Director and officers, receive the benefit of our gratuity and provident fund retirement schemes. Our superannuation fund covers all employees at a senior manager level or above, including our Managing Director. Our gratuity fund, required under Indian law to be paid to an employee following the completion of a minimum of five years of continuous service, is a defined benefit plan which, upon the retirement, termination of employment or death while in employment of such employee, pays a lump sum equal to 15 days basic salary for each completed year of service. The superannuation fund is a retirement plan under which we contribute annually 13.0% (15.0% for the Managing Director, Deputy Managing Director and an Executive Director) of the eligible employee's annual salary to the administrator of the fund. In the case of the provident fund, as required by Indian law, each of the employer and the employee contribute monthly at a determined rate of 12.0% of the employee's basic salary. Of this 12.0%, the Bank contributes a specified amount (8.33% of the lower of Rs. 15,000 or the employee's basic salary) to the pension scheme administered by the Regional Provident Fund Commissioner, and the balance is contributed to a fund set up by the Bank and administered by a board of trustees.

**Controls and Procedures*****Disclosure Controls and Procedures***

The Bank performed an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures as of March 31, 2018. Based on this evaluation, our Principal Executive Officer, Mr. Aditya Puri, and our Principal Financial Officer, Mr. Sashidhar Jagdishan, have concluded that our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the Exchange Act), are effective to provide reasonable assurance that the information required to be disclosed in filings and submissions under the

Exchange Act is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Principal Executive Officer and Principal Financial Officer, as appropriate, to allow timely decisions about required disclosure.

There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

### **Management's Annual Report on Internal Control Over Financial Reporting**

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. Our internal control over financial reporting is a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of our assets;

provide reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and

provide reasonable assurance regarding the prevention or timely detection of unauthorized acquisitions, use or dispositions of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness for future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of our internal control over financial reporting as of March 31, 2018. In conducting its assessment, management based its evaluation on the framework contained in the Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013). Based on its assessment, management has concluded that our internal control over financial reporting was effective as of March 31, 2018. Our independent registered public accounting firm, KPMG, has performed an integrated audit and has issued their report, included herein, on (1) our consolidated financial statements, and (2) the effectiveness of our internal controls over financial reporting as of March 31, 2018.

### **Changes in Internal Controls**

There were no changes in our internal controls or in other factors that could, or are reasonably likely to, materially affect these controls during the period covered by this report.

### **Audit Committee Financial Expert**

Mr. Partho Datta and Mr. Bobby Parikh are the Audit Committee financial experts, as defined in Item 401(h) of Regulation S-K, and are independent pursuant to the applicable SEC rules.

### **Code of Ethics**

We have a written Code of Ethics, which is applicable to the Board Members and officials of the Bank one level below the Board. We believe the code constitutes a code of ethics, as defined in Item 16B of Form 20-F. We will

provide a copy of such Code of Ethics to any person without charge upon request. Requests may be made by writing to [shareholder.grievances@hdfcbank.com](mailto:shareholder.grievances@hdfcbank.com).

We also have a whistleblower policy that contains procedures for receiving, retaining and treating complaints received, and procedures for the confidential and anonymous submission by employees of complaints, regarding questionable accounting or auditing matters or conduct which results in a violation of law by the Bank or in a substantial mismanagement of the Bank's resources. Under this whistleblower policy, our employees are encouraged to report questionable accounting matters or any fraudulent financial information provided to our shareholders, the government or the financial markets, or any conduct that results in a violation of law by the Bank, to our management (on an anonymous basis, if employees so desire). Under this policy we have also prohibited discrimination, retaliation or harassment of any kind against any employee who, based on the employee's reasonable belief that such conduct or practices have occurred or are occurring, reports such information or participates in an investigation.

**Table of Contents****Principal Accountant Fees and Services**

The following table sets forth for the fiscal years indicates the fees pertaining to our principal accountant and its associated entities for various services provided during these periods:

Type of Services	Fiscal Year Ended		Description of Services
	March 31, 2017	March 31, 2018	
	(in millions)		
Audit services	Rs. 41.9	Rs. 44.4	Audit of financial statements
Audit-related services	0.6	2.4	Limited review
Tax services		1.5	Tax services
Other services	6.9	1.8	Certification/other services
Total	Rs. 49.4	Rs. 50.1	

Our Audit Committee charter requires us to receive the approval of our Audit Committee on every occasion on which we engage our principal accountants or their associated entities to provide any non-audit services to us. All of the non-audit services provided to us by our principal accountants or their associated entities in the previous two fiscal years have been pre-approved by our Audit Committee.

**Compliance with NYSE Listing Standards on Corporate Governance**

We are incorporated under the Companies Act and our equity shares are listed on the BSE Limited (formerly known as Bombay Stock Exchange Limited) and the National Stock Exchange of India Limited, which are the major stock exchanges in India. Our corporate governance framework is in compliance with the Companies Act, the regulations and guidelines of the Securities and Exchange Board of India ( SEBI ) and the requirements of the listing agreements entered into with the Indian stock exchanges ( Listing Agreement ). We also have American Depositary Shares ( ADSs ) listed on the New York Stock Exchange (the NYSE ).

Companies listed on the NYSE must comply with certain standards of corporate governance set forth in Section 303A of the NYSE s Listed Company Manual. Listed companies that are foreign private issuers, as the term is defined in Rule 3b-4 of the Exchange Act, are permitted to follow home country practices in lieu of the provisions of this Section 303A, except that foreign private issuers are required to comply with the requirements of Sections 303A.06, 303A.11 and 303A.12(b) and (c) of the NYSE s Listed Company Manual. As per these requirements, a foreign private issuer must:

1. Establish an independent audit committee that has specified responsibilities and authority. *[NYSE Listed Company Manual Section 303A.06];*
2. Provide prompt written notice by its chief executive officer if any executive officer becomes aware of any non-compliance with any applicable corporate governance rules. *[NYSE Listed Company Manual Section 303A.12(b)];*
- 3.

Provide to the NYSE annual written affirmations with respect to its corporate governance practices, and interim written affirmations in the event of a change to the board or a board committee. *[NYSE Listed Company Manual Section 303A.12(c)]*; and

4. Include a statement of significant differences between its corporate governance practices and those followed by U.S. companies in the annual report of the foreign private issuer. *[NYSE Listed Company Manual Section 303A.11]*

**Table of Contents**

In a few cases, the Indian corporate governance rules under SEBI Listing Regulations differ from those in the NYSE's Listed Company Manual as summarized below:

**NYSE Corporate Governance Standards applicable to NYSE Listed Companies**

An NYSE listed company needs to have a majority of independent directors. [ *NYSE Listed Company Manual Section 303A.01* ]

A director must meet certain criteria in order to qualify as independent . An NYSE listed company must disclose the identity of its independent directors and the basis upon which it is determined that they are independent. [ *NYSE Listed Company Manual Section 303A.02* ]

***Executive Sessions***

Non-management directors need to meet at regularly scheduled executive sessions without management. [ *NYSE Listed Company Manual Section 303A.03* ]

**Corporate Governance Rules as per SEBI Listing Regulations**

The board of a listed company must have a combination of executive and non-executive directors, including at least one female independent director, and not less than 50% of the directors may be non-executive directors. If: (i) the chairperson of the board of directors is a non-executive director, at least one-third of the board of directors must comprise of independent directors; (ii) the company does not have a regular non-executive chairperson, at least half of the board of directors must comprise of independent directors; and (iii) the regular non-executive chairperson is a promoter of the listed company or is related to any promoter or person occupying management positions at the level of board of director or at one level below the board of directors, at least half of the board of directors of the listed company must consist of independent directors.

A director must meet certain criteria in order to qualify as independent .

The board of directors of a listed company must meet at least four times a year, with a maximum time gap of 120 days between any two meetings. The independent directors of the listed company must hold at least one meeting each year without the presence of the non-independent directors and the members of management, and all the independent directors have to endeavor to

be present at such meeting.

***Nominating/Corporate Governance Committee***

An NYSE listed company needs to have a nominating/corporate governance committee composed entirely of independent directors. [ *NYSE Listed Company Manual Section 303A.04* ]

A listed company needs to have a nomination and remuneration committee. All members of the nomination and remuneration committee must be non-executive directors and at least 50% must be independent directors.

Listed companies in India are not required to constitute a separate corporate governance committee. The Companies Act, 2013 and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (the SEBI Listing Regulations ) prescribe the corporate governance requirements which include, *inter alia* , obligations regarding the appointment of internal auditors, the constitution of the board of directors as per the prescribed composition and the constitution of audit committee and nomination and remuneration committee.

**Table of Contents**

The nominating/corporate governance committee needs to have a written charter that addresses certain specific committee purposes and responsibilities and provides for an annual performance evaluation of the committee. [ *NYSE Listed Company Manual Section 303A.04* ]

***Compensation Committee***

An NYSE listed company needs to have a compensation committee composed entirely of independent directors. Compensation committee members must satisfy certain additional independence requirements set forth in Section 303A.02 of the NYSE Listed Company Manual by the deadline specified therein. [ *NYSE Listed Company Manual Section 303A.05* ]

The compensation committee needs to have a written charter that addresses certain specific purposes and responsibilities of the committee and provides for an annual performance evaluation of the committee. [ *NYSE Listed Company Manual Section 303A.05* ]

***Audit Committee***

An NYSE listed company needs to have an audit committee with at least three members. All the members of the audit committee must satisfy the independence requirements of Rule 10A-3 under the Exchange Act and the requirements of NYSE Corporate Governance Standard 303A.02. [ *NYSE Listed Company Manual Sections 303A.06 and 303A.07* ]

The audit committee needs to have a written charter that addresses certain specific purposes of the committee, provides for an annual performance evaluation of the committee and sets forth certain specific minimum duties and responsibilities. [ *NYSE Listed Company Manual Section 303A.07* ]

The nomination and remuneration committee must have the terms of reference specified in the SEBI Listing Regulations and the Companies Act, 2013 such as formulating criteria to determine the qualifications, positive attributes and independence of directors, formulating criteria evaluate the performance of directors, recommending remuneration policy for directors and devising a board diversity policy.

A listed company is permitted to have a combined nomination and remuneration committee. All members of the nomination and remuneration committee must be non-executive directors and at least 50% must be independent directors. The chairperson of the nomination and remuneration committee must be an independent director.

The terms of reference and the role of the nomination and remuneration committee have been specified under the Companies Act, 2013 and SEBI Listing Regulations and must include, *inter alia* , formulating the policy relating to the remuneration of directors, key managerial personnel and other employees, formulating criteria to determine the qualifications, positive attributes and independence of directors and formulating criteria to evaluate the performance of directors.

A listed company must have a qualified and independent audit committee. The audit committee should have minimum of three directors as members and two-thirds of such members should be independent directors. All members of the audit committee should be financially literate and at least one member must have accounting or related financial management expertise.

The terms of reference and the role of the audit committee of a listed company have been specified in the SEBI Listing Regulations and the Companies Act, 2013 and include, *inter alia*, oversight of the listed company's financial reporting process and disclosure of its financial information to ensure that such information is correct, sufficient and credible, the

recommendation for appointment and remuneration of the auditors of the listed company, and the review of the auditor's independence and performance.

**Table of Contents**

***Internal Audit Function***

An NYSE listed company needs to have an internal audit function to provide management and the audit committee with ongoing assessments of the company's risk management processes and system of internal control. A company may choose to outsource this function to a third party service provider other than its independent auditor. [ *NYSE Listed Company Manual Section 303A.07* ]

A listed company must appoint an internal auditor to conduct an internal audit. The auditor must review the accounts of the company and submit a report along with financial statements of the company placed before the company in a general meeting. It is the role of the audit committee to review the adequacy of the company's internal audit function and all internal audit reports relating to internal control weaknesses of the company. The audit committee should also evaluate the internal financial controls and risk management systems of the company.

In addition, a listed company must put in place procedures to inform board members about risk assessment and minimization procedures. The board of directors is responsible for framing, implementing and monitoring the company's risk assessment and minimization plan. Further, the top 100 listed companies (determined on the basis of market capitalization as at the end of the immediately previous financial year) must establish a risk management committee, consisting of a majority of board members, and define the roles and responsibilities of the risk management committee. The board may delegate the monitoring and review of the risk management plan to the risk management committee.

***Shareholder Approval of Equity Compensation Plans***

Shareholders must be given the opportunity to vote on all equity-compensation plans and material revisions thereto, with limited exemptions. [ *NYSE Listed Company Manual Section 303A.08* ]

Under the SEBI (Share Based Employee Benefits) Regulations, 2014, shareholders' approval is required for all equity compensation plans and material revisions thereto.

***Corporate Governance Guidelines/Code of Ethics***

An NYSE listed company needs to adopt and disclose corporate governance guidelines. [ *NYSE Listed Company Manual Section 303A.09* ]

A listed company is required to comply with all mandatory corporate governance requirements as prescribed under the Companies Act, 2013 and the SEBI Listing Regulations, and disclose such compliance to stock exchanges in the corporate governance report contained in the listed company's annual report. The listed company should also state in its annual report the extent to which it has complied with the non-mandatory corporate governance requirements.

An NYSE listed company needs to adopt and disclose a code of business conduct and ethics for directors, officers and employees, and promptly disclose any waivers of the code for directors or executive officers. *[NYSE Listed Company Manual Section 303A.10]*

A listed company needs to adopt a code of conduct (or code of ethics), which is applicable to all members of the board of directors and senior management. The company's annual report must contain a declaration signed by the CEO stating that all board members and senior management personnel have complied with the code of conduct. The company's annual report and the yearly compliance report on corporate governance must also disclose any non-compliance with the code by the board members and senior management.

**Table of Contents*****Certifications as to Compliance***

The CEO of each NYSE listed company has to certify on an annual basis that he or she is not aware of any violation by the company of the NYSE corporate governance listing standards. This certification, as well as the CEO/CFO certification required under Section 302 of the Sarbanes-Oxley Act of 2002, must be disclosed in the company's annual report to shareholders. *[NYSE Listed Company Manual Section 303A.12]*

The CEO and the CFO are required to provide an annual certification on the true and fair view of the company's financial statements and compliance with existing accounting standards, applicable laws and regulations. In addition, a listed company is required to submit a quarterly compliance report, and an annual corporate governance report to stock exchanges which must include a certificate from either the auditors or the practicing company secretary regarding the company's compliance with the conditions of corporate governance.

***Posting of Charters, Guidelines, etc. on Website***

An NYSE listed company is required to post the charters of its audit, compensation, and nominating/corporate governance committees, its corporate governance guidelines, and its code of business conduct and ethics on the company's website, and to state in its proxy statement or annual report that these documents are so posted. The listed company's website address must be included in such postings. *[NYSE Listed Company Manual Sections 303A.04, 303A.05, 303A.07, 303A.09 and 303A.10]*

A listed company must maintain a functional website containing information about the company including, inter alia, information regarding the composition of various board committees, the company's code of conduct, details of certain of its policies, a copy of the annual report and contact information.

**Memorandum and Articles of Association**

Our main objective is to carry on banking and related activities. Our objective and purpose can be found in clauses A and B of our Articles.

Under the Articles, a director may not vote, participate in discussions or be counted for the purpose of a quorum with respect to any decision relating to whether we will enter into any contract or arrangement if the director is directly or indirectly interested in such contract or arrangement. The Board of Directors may not hold meetings in the absence of a quorum. Under the Companies Act, the quorum for meetings of the Board is one-third of the total number of directors (any fraction contained in that one-third being rounded off as one) or two directors, whichever is higher. However, where the number of interested directors is equal to or exceeds two-thirds of the total number of directors present, the remaining number of directors (i.e. directors who are not interested) present at the meeting, being not less than two will constitute the quorum during such time. Pursuant to the Companies Act, our directors have the power to borrow money for business purposes only with the consent of the shareholders (with certain limited exceptions) through a special resolution (with three-fourths majority).

Sections 172 to 187 of the Articles set forth certain rights and restrictions relating to dividend distributions. One of these restrictions is that dividends may be approved only at a general meeting of shareholders, but in no event in an amount greater than the amount recommended by the Board of Directors.

Subject to the Companies Act, the profits of a company are divisible among shareholders in proportion to the amount of capital paid up on the shares held by those shareholders. In the event of liquidation, any surplus will be distributed in proportion to the capital paid up or which ought to have been paid up on the shares held by the shareholders at the

time of commencement of the winding up. The Board of Directors may make calls on shareholders in respect of all money unpaid on the shares held by them and not by the conditions of allotment thereof.

The rights and privileges of any class of shareholders may not be modified without the approval of three-fourths of the issued shares of that class or the sanction of a special resolution passed at a separate meeting of the holders of the issued shares of that class.

The annual general meeting shall be called for at a time during business hours at our registered office or at some other place within Mumbai as the Board of Directors may determine. The notice of the meeting shall specify it as the annual general meeting . Any general meeting of the shareholders of the Bank other than its annual general meeting is called an extraordinary general meeting . The Board of Directors is required to call an extraordinary general meeting upon the request of a set number of shareholders, as set forth in the Companies Act.

**Table of Contents****PRINCIPAL SHAREHOLDERS**

The following table contains information relating to the beneficial ownership of our equity shares as of March 31, 2018 by:

each person or group of affiliated persons known by us to beneficially own 5.0% or more of our equity shares; and

our individual directors and their relatives as a group.

Beneficial ownership is determined in accordance with the rules of the SEC and includes voting and investment power with respect to equity shares. Unless otherwise indicated, the persons listed in the table have sole voting and sole investment control with respect to all equity shares beneficially owned. All shares issued in India have the same voting rights. We have not issued different classes of securities.

We were founded by our promoter HDFC Limited, a housing finance company in India. As of March 31, 2018, HDFC Limited, together with its subsidiaries ( HDFC Group ), held an aggregate of 20.93% of our equity shares.

	<b>Number of Shares</b>	<b>Percentage of Total Equity Shares Outstanding</b>
HDFC Group	543,216,100	20.93%
Directors and relatives	5,653,067	0.22%

The ADSs are represented by underlying equity shares. As on March 31, 2018, Indian equity shares totaling 461,557,764 were held in the form of ADSs and constituted 17.79% of the Bank's capital. In our records, the depository, JPMorgan Chase Bank, N.A., was the only shareholder with respect to equity shares underlying ADSs. We are unable to estimate the number of record holders of ADSs in the United States.

**Table of Contents****RELATED PARTY TRANSACTIONS**

The following is a summary of transactions we have engaged in with our promoter and principal shareholder, HDFC Limited, and its subsidiaries and other related parties, including those in which we or our management have a significant equity interest. Figures herein reflecting our equity interests exclude shares held by our employees welfare trust, established for the benefit of our employees.

All transactions with HDFC Group companies and the other related parties listed below are on terms that we believe are as favorable to us as those that could be obtained from a non-affiliated third party in an arm's-length transaction. In addition, our banking license from the RBI stipulates that we can only transact business with HDFC Limited and its affiliates on an arm's-length basis.

**Housing Development Finance Corporation Limited ( HDFC Limited )*****Home Loans***

We participate in the home loan business by selling loans provided by HDFC Limited. Under this arrangement, HDFC Limited approves and disburses the loans, which are kept on the books of HDFC Limited, and we are paid a sourcing fee. We also have an option but not an obligation to purchase up to 70% of the fully disbursed home loans sourced under this arrangement. During fiscal 2018, we purchased home loans aggregating Rs. 56,239.4 million from HDFC Limited under the above arrangement, some of which qualified as priority sector advances. We earned Rs. 2,613.7 million from HDFC Limited in fiscal 2018 as fees for selling these loans. We paid Rs.4,031.9 million to HDFC Limited towards administration and servicing of these loans. An amount of Rs.281.2 million was receivable from HDFC Limited as of March 31, 2018. An amount of Rs. 327.8 million was payable to HDFC Limited as of March 31, 2018.

***Property***

We have facilities located on properties owned or leased by HDFC Limited. In fiscal 2018, we paid an aggregate of Rs. 19.8 million as rental fees, maintenance and service charges to HDFC Limited for use of these properties. We believe that we pay market rates for these properties. As of March 31, 2018, HDFC Limited held a deposit of Rs. 4.7 million that we have paid to secure these leased properties.

***Other Transactions***

We also enter into foreign exchange and derivative transactions with HDFC Limited. The notional principal amount and the mark to market gains in respect of foreign exchange and derivative contracts outstanding as of March 31, 2018 were Rs. 59,721.4 million and Rs. 87.7 million, respectively. We have issued guarantee of Rs.2.5 million on behalf of HDFC Limited. During fiscal 2018, we subscribed to debt securities of Rs. 21,050.0 million issued by HDFC Limited. As of March 31, 2018, our investments in debt securities of HDFC Limited amounted to Rs. 16,038.8 million. We earned Rs. 29.0 million by rendering various services to HDFC Limited in fiscal 2018. As of March 31, 2018, an amount of Rs. 2.2 million was receivable from HDFC Limited towards these services.

As proposed in the previous fiscal year, we paid a dividend of Rs. 4,325.3 million to HDFC Limited during fiscal 2018.

**HDFC Standard Life Insurance Company Limited ( HDFC Standard Life )**

In fiscal 2018, we paid HDFC Standard Life Rs. 1,392.3 million as our contribution towards superannuation, gratuity and term insurance. In the same period, we received fees and commissions from HDFC Standard Life aggregating Rs. 11,760.5 million for the sale of insurance policies and other services. As of March 31, 2018, Rs. 1,999.2 million was receivable from HDFC Standard Life. During fiscal 2018, we sold debt securities of Rs. 4,400.0 million to, and purchased debt securities of Rs. 2,565.9 million from, HDFC Standard Life. We have issued a guarantee of Rs. 839.5 million on behalf of HDFC Standard Life.

As proposed in the previous fiscal year, we paid a dividend of Rs. 199.3 million to HDFC Standard Life during fiscal 2018.

**Table of Contents****HDFC Asset Management Company Limited ( HDFC AMC )**

During fiscal 2018, we earned Rs. 887.1 million fees from HDFC AMC for the distribution of units of mutual funds and other services rendered. As of March 31, 2018, fees of Rs. 162.1 million were receivable from HDFC AMC.

**HDFC Ergo General Insurance Company Limited ( HDFC Ergo )**

We paid Rs. 874.3 million to HDFC Ergo towards insurance premiums in fiscal 2018. During fiscal 2018, we received Rs. 2,214.5 million for the sale of insurance policies and other services rendered. As of March 31, 2018, an amount of Rs. 230.1 million was receivable from HDFC Ergo. As of March 31, 2018, HDFC Ergo had invested Rs. 250.0 million in the Bank's Tier II bonds. We have given a guarantee of Rs. 14.9 million on behalf of HDFC Ergo. During fiscal 2018, we sold debt securities of Rs. 699.3 million to HDFC Ergo.

**GRUH Finance Limited ( GRUH Finance )**

During fiscal 2018, we earned Rs. 8.9 million fees from GRUH Finance for rendering cash management and other services. As of March 31, 2018, our investments in debt securities of GRUH Finance amounted to Rs. 13,150.0 million.

**Credila Financial Services Private Limited ( Credila )**

During fiscal 2018, we earned Rs. 37.5 million fees from Credila for sourcing education loans. During fiscal 2018, we subscribed to debt securities of Rs. 2,000.0 million issued by Credila. As of March 31, 2018, our investments in debt securities of Credila amounted to Rs. 6,000.0 million. As of March 31, 2018, Rs. 12.6 million was receivable from Credila.

**Salisbury Investments Private Limited ( Salisbury Investments )**

We have paid a security deposit of Rs. 35.0 million to Salisbury Investments and, in fiscal 2018, we paid rent of Rs. 6.6 million for the residential accommodation of our managing director to Salisbury Investments in which the relatives of the Managing Director hold a stake.

**International Asset Reconstruction Company Limited ( IARCL )**

During fiscal 2018, the Bank's stake in IARCL reduced from 29.4% to 19.2% with effect from March 9, 2018 due to an issue of additional equity shares by IARCL in which the Bank did not participate.

IARCL was an associate of CBoP due to CBoP's investment in IARCL, which we took over upon acquiring CBoP in 2008. As of March 31, 2018, the book value of our investment in the equity of IARCL was Rs. 311.7 million.

**HDFC Realty Limited ( HDFC Realty )**

HDFC Realty was a related party of the Bank by virtue of being subsidiary of HDFC Limited, promoter of the bank. On January 24, 2018, HDFC Limited sold its entire stake in HDFC Realty and it ceased to be a related party of the Bank.

During the period April 2017 to January 2018, we earned Rs. 4.9 million as fees from HDFC Realty for referring our clients seeking advisory services relating to real estate.

**Table of Contents****Key Management Personnel**

In fiscal 2018, we paid a total remuneration of Rs. 192.9 million to Mr. Aditya Puri, our Managing Director, Mr. Paresh Sukthankar, our Deputy Managing Director and Mr. Kaizad Bharucha, our Executive Director. In the same fiscal year, we paid Rs. 3.9 million and Rs. 3.7 million to Mr. Paresh Sukthankar and Mr. Kaizad Bharucha, respectively, as rent for their residential accommodation. As of March 31, 2018, the outstanding balances of the security deposits we had given to Mr. Paresh Sukthankar and Mr. Kaizad Bharucha were Rs. 17.5 million and Rs. 7.6 million, respectively. As of March 31, 2018, the outstanding balances of the housing loans given to Mr. Aditya Puri and Mr. Kaizad Bharucha were Rs. 27.3 million and Rs. 4.1 million, respectively. As proposed in the previous fiscal year, during fiscal 2018, we paid dividends aggregating to Rs. 56.7 million to Mr. Aditya Puri, Mr. Paresh Sukthankar and Mr. Kaizad Bharucha.

**HDFC Pension Management Company Limited ( HDFC PMC )**

We have given a guarantee of Rs. 3.0 million on behalf of HDFC PMC.

**HDFC Investments Limited ( HDFC Investments )**

As proposed in the previous fiscal year, we paid a dividend of Rs. 1,650.0 million to HDFC Investments during fiscal 2018.

**Other Strategic Investments**

We frequently partner with other HDFC Group companies when making strategic investments. We currently have two strategic investments in which HDFC Group companies are co-investors. We are required to comply with the RBI regulations on holding an equity stake in another company. The following is a list of strategic investments made by us and the HDFC Group companies:

Company	Type of Business	HDFC Bank Investment (in millions)	HDFC Bank Ownership	Total HDFC Group Ownership
Computer Age Management Services Private Limited ( CAMS )	Unit capital accounting and transfer agency services	Rs. 2.0	6.2%	23.2%
Softcell Technologies Limited ( Softcell )	Business-to-business software services	Rs. 26.0	12.0%	26.0%

We routinely conduct business with some of the companies in which we have made strategic investments.

We have entered into normal banking transactions with some of the above parties and we believe all such transactions to be at arm's length.

**Table of Contents****TAXATION****Indian Taxation**

*The following is a summary of the principal Indian tax consequences for non-resident investors of the ADSs and the equity shares issuable on surrender of ADSs for equity shares (conversion). The summary is based on the provisions of Section 115AC and other applicable provisions of the Income Tax Act, 1961 (43 of 1961) (the Indian Income Tax Act ) and the Depository Receipt Scheme, 2014 promulgated by the Government of India (the Depository Receipt Scheme ) (together the Section 115AC Regime ). Further, it only addresses the tax consequences for persons who are non-residents, as defined in the Indian Income Tax Act, who acquire ADSs or equity shares (upon conversion) and who hold such ADSs or equity shares (upon conversion) as a capital asset as per Indian Income Tax Act, and does not address the tax consequences which may be relevant to other classes of non-resident investors, including dealers. The summary assumes that the person continues to be a non-resident when income by way of dividends and capital gains is earned.*

**EACH INVESTOR IS ADVISED TO CONSULT HIS/HER TAX ADVISOR ABOUT THE PARTICULAR TAX CONSEQUENCES APPLICABLE TO HIS/HER INVESTMENT IN THE ADSs.**

The following discussion describes the material Indian income tax and stamp duty consequences of the purchase, ownership and disposal of the ADSs.

This summary is not intended to constitute a complete analysis of the tax consequences under Indian law of the acquisition, ownership and sale of the ADSs (or equity shares upon conversion) by non-resident investors. Investors should therefore consult their tax advisors about the tax consequences of such acquisition, ownership and sale including, specifically, tax consequences under Indian law, the laws of the jurisdiction of their residence, any tax treaty between India and their country of residence or the United States, the country of residence of the overseas depository bank (the Depository ), as applicable and, in particular, the Section 115AC regime. The Indian Income Tax Act is amended every year by the Finance Act of the relevant year. Some or all of the tax consequences of the Section 115AC regime may be modified or amended by future amendments to the Indian Income Tax Act.

***Taxation of Distributions***

Indian companies distributing dividends are subject to a dividend distribution tax. We are required to pay a dividend distribution tax currently at the rate of 20.56% (including applicable surcharge and education cess) on the total amount distributed or declared or paid as a dividend. Under Section 10(34) of the Indian Income Tax Act, income by way of dividends referred to in Section 115-O received on our shares are exempt from income tax in the hands of shareholders. Accordingly, dividends distributed to the Depository in respect of the equity shares underlying the ADSs and to ADS holders in respect of the ADSs and dividends distributed to the holders of the equity shares following conversion of the ADSs will not be taxable in India in the hands of holders.

This exemption on taxation of dividends under Section 10(34) is now subject to provisions of Section 115BBDA. Section 115BBDA applies to specified assessee resident in India, i.e., persons other than domestic companies, funds, universities, trusts, institutions, other entities referred to in clauses (iv), (v), (vi) and (via) of Section 10(23C) or a trust or institution registered under Section 12A or Section 12AA. Section 115BBDA provides that where income of such assessee resident in India includes any income in aggregate exceeding Rupees ten lakhs, income tax shall be payable on such dividend which is in excess of Rupees ten lakhs.

Distribution to non-residents of bonus ADSs or bonus shares or rights to subscribe for equity shares (for the purposes of this section, Rights) made with respect to ADSs or equity shares should not be subject to Indian tax provided that there is no disproportionate or non-uniform allotment.

***Taxation of Capital Gains in Relation to ADSs***

The taxation of capital gains resulting from a sale or other disposition of ADSs or equity shares is set forth below.

***Transfer of ADSs between non-residents***

The transfer of ADSs by a non-resident to another non-resident outside India is covered under Section 115AC of the Indian Income Tax Act. However, pursuant to a specific exemption under Section 47(viia) of the Indian Income Tax Act, this is not considered a transfer and therefore is not liable to capital gains tax in India.

**Table of Contents***Conversion of ADSs into Equity Shares*

The receipt of equity shares by a non-resident upon conversion of ADSs should not constitute a taxable event for Indian income tax purposes as per the provisions of Section 47(xa) of the Indian Income Tax Act.

*Sale of Equity Shares Received Upon Conversion of ADSs*

The Finance Act has withdrawn the exemption previously granted to gains arising from transfers of long-term capital assets that are equity shares listed on a recognized stock exchange. To tax such gains, a new Section 112A has been inserted under the Finance Act. The period of holding of such equity share received in exchange for ADS, shall be computed from the date of application for redemption. Thus, if the period of holding of a non-resident holder exceeds 12 months, then capital gains derived from the sale of such share shall be regarded as a long term capital gains. If equity shares are received upon conversion of ADSs and the total period of holding is shorter than 12 months from the date of conversion, then the gains realized are considered short-term capital gains. If the sale is through a recognized stock exchange and securities transaction tax ( STT ) is paid in respect of such sale, such short term gains are taxable at the rate of 15%, plus the applicable surcharge and education cess, under Section 111A(1)(b)(i) of the Indian Income Tax Act. In the event that no STT is paid because the sale is not through a recognized stock exchange, the short-term capital gain is subject to tax at variable rates with a maximum rate of 40% plus applicable surcharge and education cess.

Gains arising on account of transfer of a long-term capital asset that is an equity share listed on a recognized stock exchange are taxed at the rate of 10% plus applicable surcharge and education cess of such gains exceeding Rs.0.1 million. However, indexation and foreign exchange fluctuation benefits would not be available in such a case. Further, any long-term capital gain realized on the sale of equity shares other than on a stock exchange, will be subject to capital gains tax if any, at the rate of 10% plus applicable surcharge and education cess.

In respect of a sale and purchase of equity shares entered into on a recognized stock exchange, both the buyer and the seller are required to pay STT at the rate of 0.1% of the transaction value of the securities, if the transaction is a delivery based transaction, which means that the transaction involves actual delivery or transfer of shares. The seller of the shares is required to pay STT at the rate of 0.025% of the transaction value of the securities if the transaction is a non-delivery based transaction, which means that the transaction is settled without taking actual delivery or transfer of the shares, as would be the case with our equity shares.

For the purpose of computing capital gains tax on the sale of the equity shares, the cost of acquisition of equity shares received in exchange for ADSs will be determined on the basis of the prevailing price of the equity shares on the BSE or the NSE as of the date on which the depository gives notice to its custodian for the delivery of such equity shares upon redemption of the ADSs.

The provisions of the Double Taxation Avoidance Agreement ( DTAA ) entered into by the Government of India with the country of residence of the non-resident investor may be applicable to the extent they are more beneficial to the non-resident investor (Section 90(2)). The India-U.S. income tax treaty does not limit India's ability to tax capital gains. However, the beneficial provision under Section 90(2) is subject to the provisions of GAAR under Chapter X-A.

*Tax Deduction at Source for Non-Residents*

Tax on long-term and short-term capital gains, if payable, as discussed above, upon a sale of equity shares, is to be deducted at source by the person responsible for paying the non-resident, in accordance with the relevant provisions of

the Indian Income Tax Act, and the non-resident will be entitled to a certificate evidencing such tax deduction in accordance with the provisions of Section 203 of the Indian Income Tax Act. However, as per the provisions of Section 195 of the Indian Income Tax Act, any income, other than income from salaries or income under Sections 194LB, 194LC or 194LD, may be subject to withholding tax at the rate provided for under Indian Income Tax Act or under the provisions of the applicable DTAA (subject to Chapter X-A of the Act), whichever is more beneficial to the assessee, unless a lower withholding tax certificate is obtained from the tax authorities. Further, the non-resident investor must furnish a certificate of his or her residence in a country outside India as per Section 90(4) of the Indian Income Tax Act, and such other documents as may be prescribed as per the provision of Section 90(5) of the Indian Income Tax Act, to get the benefit of the applicable DTAA. The withholding tax rates are subject to the recipients of income furnishing details, as may be prescribed, to the payer. Failure to provide such details will result in the applicable withholding tax rate being the higher of the rates in force or 20%, in accordance with Section 206AA of the Indian Income Tax Act.

### ***Capital Losses***

Losses arising from a transfer of a capital asset in India can generally only be set off against capital gains on transfer of another capital asset. Furthermore, a long-term capital loss can be set off only against a long-term capital gain. To the extent that losses are not absorbed in the year of transfer, they may be carried forward for a period of eight assessment years immediately succeeding the assessment year for which the loss was first determined by the assessing authority and may be set off against the capital gains assessable for such subsequent assessment years. In order to set off capital losses as above, the non-resident investor would be required to file appropriate and timely tax returns in India and undergo the customary assessment procedures.

---

**Table of Contents**

***Stamp Duty***

There is no stamp duty on the sale or transfer of ADSs outside India.

Generally, the transfer of ordinary shares in physical form is subject to Indian stamp duty at the rate of 0.25% of the market value of the ordinary shares on the trade date, and such stamp duty generally is borne by the transferee, i.e., the purchaser. In order to register a transfer of equity shares in physical form, it is necessary to present a stamped deed of transfer. An acquisition of shares in physical form from the depository in exchange for ADSs representing such equity shares will not subject an investor to Indian stamp duty. We will be required to pay stamp duty at the applicable rate on the share certificate. However, since our equity shares are compulsorily deliverable in dematerialized form (except for trades of up to 500 equity shares, which may be delivered in physical form) there would be no stamp duty payable in India on transfer.

***Other Taxes***

At present, there is no wealth tax, gift tax or inheritance tax which may apply to the ADSs or the underlying shares.

**Material United States Federal Income Tax Consequences**

The following summary describes the material U.S. federal income tax consequences relating to an investment in our ADSs or equity shares as of the date hereof. This summary is based on the Internal Revenue Code, its legislative history, existing final, temporary and proposed Treasury Regulations, rulings and judicial decisions, all as of the date hereof and all of which are subject to prospective and retroactive rulings and changes.

This summary does not purport to address all U.S. federal income tax consequences that may be relevant to a particular investor and you are urged to consult your own tax advisor regarding your specific tax situation. The summary applies only to investors who purchase ADSs or equity shares in this Offering and hold such ADSs or equity shares as capital assets (generally, property held for investment) under the Internal Revenue Code, and does not address the tax consequences that may be relevant to investors in special tax situations, including for example:

insurance companies;

regulated investment companies and real estate investment trusts;

tax-exempt organizations;

broker-dealers;

traders in securities that elect to mark-to-market;

banks or certain other financial institutions;

U.S. investors whose functional currency is not the U.S. dollar;

certain former citizens or residents of the United States;

investors that hold our ADSs or equity shares as part of a hedge, straddle or conversion transaction; or

holders that own, directly, indirectly or constructively 10.0% or more of our total combined stock by vote or value.

Further, this summary does not address the alternative minimum tax consequences of an investment in our ADSs or equity shares, or the indirect consequences to owners of equity or partnership interests in entities that own our ADSs or equity shares. In addition, this summary does not address the U.S. estate, gift, state and local and non-U.S. tax consequences of an investment in our ADSs or equity shares.

You should consult your own tax advisor regarding the U.S. federal, state, local, non-U.S. and other tax consequences of purchasing, owning and disposing of our ADSs or equity shares in your particular circumstances.

---

**Table of Contents**

***Taxation of U.S. Holders***

You are a U.S. Holder if you are, for U.S. federal income tax purposes, a beneficial owner of ADSs or equity shares and you are:

an individual who is a citizen or resident of the United States;

a corporation (or other entity taxable as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;

an estate, the income of which is subject to U.S. federal income tax regardless of its source; or

a trust, if a court within the United States is able to exercise primary supervision over its administration and one or more United States persons have the authority to control all substantial decisions of the trust, or if the trust has made a valid election to be treated as a United States person.

A Non-U.S. Holder is a beneficial owner of our ADSs or equity shares that is neither a U.S. Holder nor a partnership or other entity or arrangement treated as a partnership for U.S. federal income tax purposes. If a partnership holds ADSs or equity shares, the tax treatment of a partner will generally depend upon the status of the partner and upon the activities of the partnership. Partners of partnerships holding our ADSs or equity shares should consult their own tax advisors.

For U.S. federal income tax purposes, a U.S. Holder of an ADS will generally be treated as the owner of the equity shares represented by the ADS. Accordingly, no gain or loss will be recognized upon the exchange of an ADS for equity shares. A U.S. Holder's tax basis in the equity shares will be the same as the tax basis in the ADS surrendered therefore, and the holding period in the equity shares will include the period during which the holder held the surrendered ADS.

The U.S. government has expressed concerns that parties to whom ADSs are released before the underlying shares are delivered to the depositary ( pre-release ), or intermediaries in the chain of ownership between holders of ADSs and the issuer of the security underlying the ADSs, may be taking actions that are inconsistent with the claiming of foreign tax credits by holders of ADSs. These actions would also be inconsistent with the claiming of the reduced rate of tax, described below, applicable to dividends that constitute qualified dividend income received by certain non-corporate holders. Accordingly, the availability of the reduced tax rate for qualified dividend income received by certain non-corporate U.S. Holders, each described below, could be affected by actions taken by such parties or intermediaries.

This discussion assumes that we are not, and will not become, a passive foreign investment company ( PFIC ) for U.S. federal income tax purposes, as described below.

***Distributions on ADSs or Equity Shares***

The gross amount of cash distributions made by us to a U.S. Holder with respect to ADSs or equity shares generally will be taxable to such U.S. Holder as ordinary dividend income when such U.S. Holder (or in the case of ADSs, the

depository) receives the distribution, actually or constructively, to the extent paid out of our current or accumulated earnings and profits (as determined for U.S. federal income tax purposes). We currently do not, and we do not intend to, calculate our earnings and profits under U.S. federal income tax principles. Therefore, a U.S. Holder should expect that a distribution generally will be reported as dividend income.

Indian companies distributing dividends are subject to a dividend distribution tax and such dividend distributions are not taxable in the hands of the recipient. See *Indian Taxation of the ADSs Taxation of Distributions*. Indian dividend distribution tax, therefore, should not be treated as part of the gross amount of the dividend received by the U.S. Holder and should not be eligible for a credit or deduction against a U.S. Holder's U.S. federal income taxes, as the dividend distribution tax is imposed on the company making the distribution and not on the U.S. Holder. Dividends paid on the ADSs or equity shares will generally be treated as passive category foreign-source income, which may be relevant to certain U.S. Holders in computing their foreign tax credit limitations.

If dividends constitute qualified dividend income ( QDI ), individual U.S. Holders of our ADSs or equity shares will generally pay tax on such dividends at a reduced rate, provided certain holding period requirements and other conditions are satisfied. Dividends paid by us will be QDI if we are a qualified foreign corporation ( QFC ) at the time the dividends are paid. We believe that we are currently, and will continue to be, a QFC so we expect all dividends paid by us to be QDI for U.S. federal income tax purposes. Dividends paid by us generally will not be eligible for the dividends-received deduction available to certain U.S. corporate shareholders.

The amount of any cash distribution paid in Indian rupees will equal the U.S. dollar value of the distribution, calculated by reference to the exchange rate in effect at the time the distribution is received by the depository, in the case of ADSs, or by the U.S. Holder, in the case of equity shares, regardless of whether the payment is in fact converted to U.S. dollars at that time. Generally, a U.S. Holder should not recognize any foreign currency gain or loss if such Indian rupees are converted into U.S. dollars on the date received and it is expected that the depository will in the ordinary course convert foreign currency received by it as distributions into U.S. dollars on the date of receipt. If the Indian rupees are not converted into U.S. dollars on the date of receipt, however, gain or loss may be recognized upon a subsequent sale or other disposition of the Indian rupees. Such foreign currency gain or loss, if any, will be U.S. source ordinary income or loss.

---

**Table of Contents**
*Sale or Exchange of ADSs or Equity Shares*

A U.S. Holder will generally recognize capital gain or loss upon the sale, exchange or other disposition of ADSs or equity shares measured by the difference between the U.S. dollar value of the amount received and the U.S. Holder's tax basis (determined in U.S. dollars) in the ADSs or equity shares. Any gain or loss will be long-term capital gain or loss if the ADSs or equity shares in the sale, exchange or other taxable disposition have been held for more than one year and will generally be U.S. source gain or loss. The holding period for equity shares withdrawn from the depositary facility will include the holding period of the ADSs exchanged therefor. Your ability to deduct capital losses is subject to limitations. Under certain circumstances described under *Indian Taxation Sale of Equity Shares Received Upon Conversion of ADSs*, you may be subject to Indian tax upon the disposition of equity shares. In such circumstances and subject to applicable limitations a U.S. Holder entitled to the benefits of the India-U.S. income tax treaty may be able to credit the Indian tax against the U.S. Holder's U.S. federal income tax liability. You should consult your tax advisor regarding the availability of the foreign tax credit under your particular circumstances.

For cash-basis U.S. Holders who receive foreign currency in connection with a sale or other taxable disposition of equity shares, the amount realized will be based upon the U.S. dollar value of the foreign currency received with respect to such equity shares as determined on the settlement date of such sale, exchange or other taxable disposition.

Accrual-basis U.S. Holders may elect the same treatment required of cash-basis taxpayers with respect to a sale, exchange or other taxable disposition of ADSs or equity shares, provided that the election is applied consistently from year to year. Such election cannot be changed without the consent of the Internal Revenue Service (the IRS). Accrual-basis U.S. Holders that do not elect to be treated as cash-basis taxpayers for this purpose may have foreign currency gain or loss for U.S. federal income tax purposes because of differences between the U.S. dollar value of the foreign currency received prevailing on the date of such sale, exchange or other taxable disposition and the value prevailing on the date of payment. Any such foreign currency gain or loss will generally be treated as U.S. source ordinary income or loss, in addition to the gain or loss, if any, recognized on the sale, exchange or other taxable disposition of ADSs or equity shares.

*Medicare Tax*

Certain U.S. Holders who are individuals, estates, or trusts are required to pay a 3.8% Medicare surtax on all or part of such holder's net investment income, which includes, among other items, dividends on, and capital gains from the sale or other taxable disposition of, the ADSs or equity shares, subject to certain limitations and exceptions. Prospective investors should consult their own tax advisors regarding the effect, if any, of this surtax on their ownership and disposition of the ADSs or equity shares.

*Passive Foreign Investment Company Rules*

U.S. Holders generally will be subject to a special, adverse tax regime that would differ in certain respects from the tax treatment described above if we are, or were to become, a PFIC for U.S. federal income tax purposes. Although the determination of whether a corporation is a PFIC is made annually and thus may be subject to change, based on an active banking exception, we do not believe that we are, nor do we expect to become, a PFIC. However, the matter is not free from doubt. We urge you to consult your own tax advisor regarding the potential application of the PFIC rules.

*Information with Respect to Foreign Financial Assets*

Individuals and certain entities who are U.S. Holders that own specified foreign financial assets, including stock of a non-U.S. corporation not held through a financial institution, with an aggregate value in excess of certain dollar thresholds may be required to file an information report with respect to such assets on IRS Form 8938 with their U.S. federal income tax returns. Penalties apply for failure to properly complete and file IRS Form 8938. U.S. Holders are encouraged to consult their tax advisors regarding the application of this reporting requirement to their ownership of our ADSs or equity shares.

***Taxation of Non-U.S. Holders***

*Distributions on ADSs or Equity Shares*

Non-U.S. Holders generally will not be subject to U.S. federal income or withholding tax on dividends received from us with respect to our ADSs or equity shares, unless such income is considered effectively connected with the Non-U.S. Holder's conduct of a U.S. trade or business for U.S. federal income tax purposes (and, if required by an applicable income tax treaty, the income is attributable to a permanent establishment or fixed base maintained in the United States).

**Table of Contents**

*Sale or Exchange of ADSs or Equity Shares*

Non-U.S. Holders generally will not be subject to U.S. federal income tax on any gain realized upon the sale, exchange or other taxable disposition of ADSs or equity shares unless:

such gain is considered effectively connected with the Non-U.S. Holder's conduct of a U.S. trade or business (and, if required by an applicable income tax treaty, the income is attributable to a permanent establishment or fixed base maintained in the United States); or

such Non-U.S. Holder is an individual that is present in the United States for 183 days or more during the taxable year of the disposition and certain other conditions are met.

In addition, if you are a corporate Non-U.S. Holder, any effectively connected dividend income or gain (subject to certain adjustments) may be subject to an additional branch profits tax at a rate of 30.0% (or such lower rate as may be specified by an applicable income tax treaty).

***Backup Withholding and Information Reporting***

In general, dividends on ADSs or equity shares, and payments of the proceeds of a sale, exchange or other taxable disposition of ADSs or equity shares, paid to a U.S. Holder within the United States or through certain U.S.-related financial intermediaries are subject to information reporting and may be subject to backup withholding at a rate currently equal to 24.0% unless the U.S. Holder:

is a corporation or other exempt recipient; or

provides an accurate taxpayer identification number and certifies that no loss of exemption from backup withholding applies to such U.S. Holder.

Non-U.S. Holders generally are not subject to information reporting or backup withholding. However, such Non-U.S. Holders may be required to provide a certification to establish their non-U.S. status in connection with payments received within the United States or through certain U.S.-related financial intermediaries.

Backup withholding is not an additional tax. Holders generally will be allowed a credit of the amount of any backup withholding against their U.S. federal income tax liability or may obtain a refund of any amounts withheld under the backup withholding rules that exceed such income tax liability by timely filing a refund claim with the IRS.

***Foreign Account Tax Compliance Act***

Sections 1471 through 1474 of the Internal Revenue Code (provisions commonly known as "FATCA" or the Foreign Account Tax Compliance Act) impose (a) certain reporting and due diligence requirements on FFIs and (b) potentially require such FFIs to deduct a 30.0% withholding tax from (i) certain payments from sources within the United States and (ii) foreign passthru payments (which is not yet defined in current guidance) made to certain FFIs that do not comply with such reporting and due diligence requirements or certain other payees that do not provide required information. We (as well as relevant intermediaries such as custodians and depository participants) are classified as

FFIs for these purposes. The United States has entered into a number of IGAs with other jurisdictions with respect to FATCA which may modify the operation of this withholding. India has entered into a Model 1 IGA with the United States for giving effect to FATCA, and Indian financial institutions such as us are generally required to comply with FATCA, based on the terms of the IGA and relevant rules made pursuant thereto.

Under current guidance it is not clear whether or to what extent payments on ADSs or equity shares will be considered foreign passthru payments subject to FATCA withholding or the extent to which withholding on foreign passthru payments will be required under the applicable IGA. Investors should consult their own tax advisers on how the FATCA rules may apply to payments they receive in respect of the ADSs or equity shares.

Should any withholding tax in respect of FATCA be deducted or withheld from any payments arising to any investor, neither we nor any other person will pay additional amounts as a result of the deduction or withholding.

**Table of Contents****SUPERVISION AND REGULATION**

The main legislation governing commercial banks in India is the Banking Regulation Act, 1949 (the Banking Regulation Act). The provisions of the Banking Regulation Act are in addition to and not, save as expressly provided in the Banking Regulation Act, in derogation of the Companies Act, 2013, Companies Act, 1956 and any other law currently in force. Other important laws include the Reserve Bank of India Act, 1934, the Negotiable Instruments Act, 1881, the Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 (the SARFAESI Act) and the Bankers Books Evidence Act, 1891. Additionally, the RBI, from time to time, issues guidelines to be followed by banks. Compliance with all regulatory requirements is evaluated with respect to our financial statements under Indian GAAP.

**RBI Regulations**

Commercial banks in India are required under the Banking Regulation Act to obtain a license from the RBI to carry on banking business in India. Before granting the license, the RBI must be satisfied that certain conditions are complied with, including (i) that the bank is or will be in a position to pay its present and future depositors in full as their claims accrue; (ii) that the affairs of the bank will not be or are not likely to be conducted in a manner detrimental to the interests of present or future depositors; (iii) that the general character of the proposed management of the bank will not be prejudicial to the public interest or the interest of its depositors; (iv) that the bank has adequate capital and earnings prospects; (v) that public interest will be served if a license is granted to the bank; (vi) that having regard to the banking facilities available in the proposed principal area of operations of the bank, the potential scope for expansion of banks already in existence in the area and other relevant factors the grant of the license would not be prejudicial to the operation and consolidation of the banking system consistent with monetary stability and economic growth; and (vii) any other condition, the fulfillment of which would, in the opinion of the RBI, be necessary to ensure that the carrying on of banking business in India by the bank will not be prejudicial to the public interest or the interests of the depositors. The RBI can cancel the license if the bank fails to meet the above conditions or if the bank ceases to carry on banking operations in India.

Being licensed by the RBI, we are regulated and supervised by the RBI. It requires us to furnish statements, information and certain details relating to our business. The RBI has issued guidelines for commercial banks on recognition of income, classification of assets, valuation of investments, maintenance of capital adequacy and provisioning for non-performing and restructured assets among others. The RBI has set up a Board for Financial Supervision, under the chairmanship of its Governor, with the primary objective of undertaking consolidated supervision of the financial sector comprised of commercial banks, financial institutions and non-banking finance companies (NBFCs). This Board oversees the functioning of the Department of Banking Supervision, Department of Non-Banking Supervision and Financial Institutions Division of the RBI and gives directions relating to regulatory and supervisory issues. The appointment of the auditors of banks is subject to the approval of the RBI. The RBI can direct a special audit in the interest of the depositors or in the public interest.

**Entry of new banks in the private sector**

In February 2013, the RBI released guidelines for licensing of new banks in the private sector. The key items covered under these guidelines are as follows: (i) promoters eligible to apply for banking licenses; (ii) corporate structure; (iii) minimum voting equity capital requirements for new banks; (iv) regulatory framework; (v) foreign shareholding cap; (vi) corporate governance; (vii) prudential norms; (viii) exposure norms; and (ix) business plan. The RBI has permitted private sector entities owned and controlled by Indian residents and entities in the public sector in India to apply to the RBI for a license to operate a bank through a wholly-owned non-operative financial holding company (NOFHC), subject to compliance with certain specified criteria. Such a NOFHC is permitted to be the holding

company of the bank as well as any other financial services entity, with the objective that the holding company ring-fences the regulated financial services entities in the group, including the bank, from other activities of the group. Pursuant to these guidelines, two banks, namely IDFC Bank and Bandhan Bank, commenced banking operations in fiscal 2016.

In November 2014, RBI released guidelines on licensing of payments banks and small finance banks in the private sector. The objective of setting up of payments banks is to further financial inclusion by providing (i) small savings accounts and (ii) payments/remittance services to migrant labour workforce, low income households, small businesses, other unorganised sector entities and other users. Payments banks are allowed to accept deposits of up to Rs. 100,000. However, they are not allowed to undertake lending activities or issue credit cards. The foreign shareholding in payments banks would be as per the Foreign Direct Investment ( FDI ) policy for private sector banks, as amended from time to time. In August 2015, the RBI gave in-principle approvals to 11 applicants to set up payments banks. In September 2015, the RBI also granted in-principle approval to ten applicants to setup small finance banks. All ten applicants have received their final license. Many of these small finance banks have commenced their operations as of March 31, 2018.

**Table of Contents**

In August 2016, the RBI released the guidelines for on-tap Licensing of Universal Banks in the Private Sector. The guidelines aim at moving from the current stop and go licensing approach (wherein the RBI notifies the licensing window during which a private entity may apply for a banking licence) to a continuous or on-tap licensing regime. Among other things, the new guidelines specify conditions for the eligibility of promoters, corporate structure and foreign shareholdings. One of the key features of the new guidelines is that, unlike the February 2013 guidelines (mentioned above), the new guidelines make the NOFHC structure non-mandatory in the case of promoters being individuals or standalone promoting/converting entities which do not have other group entities.

In May 2016, the RBI also issued the Reserve Bank of India (Ownership in Private Sector Banks) Directions, 2016. These guidelines prescribe requirements regarding shareholding and voting rights in relation to all private sector banks licensed by the RBI to operate in India. The guidelines specify the following ownership limits for shareholders based on their categorization:

- (i) In the case of individuals and non-financial entities (other than promoters / promoter group), 10% of the paid up capital. However, in the case of promoters being individuals and non-financial entities in existing banks, the permitted promoter / promoter group shareholding shall be as prescribed under the February 2013 guidelines i.e. 15%.
- (ii) In the case of entities from the financial sector, other than regulated or diversified or listed, 15% of the paid-up capital.
- (iii) In the case of regulated, well diversified, listed entities from the financial sector shareholding by supranational institutions, public sector undertaking or government, up to 40% of the paid-up capital is permitted for both promoters / promoter group and non-promoters.

**Financial Holding Company Structure in India**

The RBI constituted a Working Group in June 2010 to examine the feasibility of introducing a Financial Holding Company ( FHC ) Structure in India under the chairpersonship of the Deputy Governor. In May 2011, the Working Group submitted its report to recommend a roadmap for the introduction of a holding company structure in the Indian financial sector together with the required regulatory, supervisory and legislative framework. The report served as a guiding document for the introduction of an alternate organizational structure for banks and financial conglomerates in India. Key recommendations of the Working Group were as follows: (i) FHC structure; (ii) regulatory framework; (iii) statutory and taxation related changes; (iv) caps on expansion in non-banking business; (v) capital raising; and (vi) transitioning to the FHC structure.

In August 2013, the RBI issued a discussion paper titled Banking Structure in India The Way Forward . The key recommendations in the paper relate to: (i) adoption of the FHC structure; (ii) differential licensing (allowing banks to be licensed to provide only specified services); (iii) consolidation of large-sized Indian banks; (iv) requiring large foreign banks to operate through subsidiaries in India and the reduction of the Government s ownership of state-owned banks to ease the burden on the state where these banks will have to be capitalized to comply with Basel III requirements.

On April 7, 2014, the RBI introduced a new category of NBFCs called NOFHCs and, accordingly, amended the Non-Banking Financial (Non-Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank)

Directions, 2007. The RBI directions define a NOFHC as a non-deposit taking NBFC which holds the shares of a banking company and the shares of all other financial services companies in its group, whether regulated by RBI or by any other financial regulator, to the extent permissible under the applicable regulatory prescriptions.

Under the Guidelines for on-tap Licensing of Universal Banks in the Private Sector, the RBI has made the NOFHC structure non-mandatory in the case of promoters being individuals or standalone promoting/converting entities which do not have other group entities.

**Regulations Relating to the Opening of Branches**

Section 23 of the Banking Regulation Act provides that banks must obtain the prior permission of the RBI to open new branches. The RBI may cancel a license for violations of the conditions under which it was granted.

The RBI issues instructions and guidelines to banks on branch authorization from time to time. Centers are categorized as Tier 1 to Tier 6 based on population (as per the 2011 census) and classified in the following manner:

Tier 1 100,000 and above;

Tier 2 50,000 to 99,999;

Tier 3 20,000 to 49,999;

Tier 4 10,000 to 19,999;

Tier 5 5,000 to 9,999; and

Tier 6 Less than 5,000.

The RBI, with effect from September 19, 2013, granted general permission to domestic scheduled commercial banks like us to open branches in Tier 1 to Tier 6 centers, subject to reporting to the RBI and prescribed conditions such as (i) at least 25% of the total number of branches opened during the fiscal year must be opened in unbanked rural (Tier 5 and Tier 6) centers, which are defined as centers that do not have a brick and mortar structure of any scheduled commercial bank for customer-based banking transactions; and (ii) the total number of branches opened in Tier 1 centers during a fiscal cannot exceed the total number of branches opened in Tier 2 to Tier 6 centers and all centers in the north eastern states of India and the state of Sikkim. The RBI also permitted banks to open branches in Tier 1 centers over and above the number permitted in accordance with the paragraph above, as an incentive for opening more branches in underbanked districts of underbanked States, subject to specified conditions.

The RBI also permitted scheduled commercial banks to install off-site/mobile ATMs at centers/places identified by them, without the need to get permission from the RBI in each case. This, however, is subject to certain conditions, including for closure/shifting of any such off-site/mobile ATMs, wherever the RBI considers it necessary. Banks need to report full details of the off-site ATMs installed by them in terms of the above general permission as a part of the periodic reports submitted to the RBI.

In May 2017, the RBI has further liberalized the branch authorization policy. Some of the key changes made pursuant to the revised guidelines are as follows:

The concept of branch has been replaced by banking outlets. A banking outlet for a domestic scheduled commercial bank has been defined as a fixed point service delivery unit, manned by either bank's staff or its business correspondent where services of acceptance of deposits, encashment of cheques/ cash withdrawal or lending of money are provided for a minimum of four hours per day for at least five days a week.

At least 25% of the total number of Banking Outlets opened during a financial year must be opened in unbanked rural centers (Tier 5 and Tier 6). The definition of unbanked rural centers has been modified to mean a rural (Tier 5 and 6) center that does not have a CBS enabled banking outlet of a scheduled commercial bank.

The restriction on the number of branches that may be opened in Tier 1 centers has been removed.

### **Capital Adequacy Requirements**

The RBI issued guidelines for the implementation of the New Capital Adequacy Framework (Basel II). In order to maintain consistency and harmony with international standards, foreign banks in India and Indian banks having operational presence outside India were advised to adopt the Standardized Approach for Credit Risk and Basic Indicator Approach for Operational Risk with effect from March 31, 2008, while other commercial banks were advised to adopt these approaches with effect from March 31, 2009.

Under these guidelines, we were required to maintain a minimum ratio of capital to risk-adjusted assets and off-balance sheet items of 9%, at least 6% of which must be Tier I capital. Until March 31, 2013, we were also required to ensure that our Basel II minimum capital requirement continued to be higher than the prudential floor of 80% of the minimum capital requirement computed as per the Basel I framework for credit and market risks. In May 2013, the RBI withdrew the requirement of parallel run and prudential floor for implementation of Basel II vis-à-vis Basel I.

---

**Table of Contents**

In May 2012, the RBI released guidelines on implementation of Basel III capital regulations in India with effect from April 1, 2013. The RBI has also issued master circular on Basel III Capital Regulations consolidating all relevant guidelines on Basel III. The key items covered under these guidelines include: (i) improving the quality, consistency and transparency of the capital base; (ii) enhancing risk coverage; (iii) graded enhancement of the total capital requirement; (iv) introduction of capital conservation buffer and countercyclical buffer; and (v) supplementing the risk-based capital requirement with a leverage ratio. One of the major changes in the Basel III capital regulations is that the Tier I capital will predominantly consist of common equity of the banks which includes common shares, reserves and stock surplus. Innovative instruments and perpetual non-cumulative preference share will not be considered a part of CET-I capital. Basel III also defines criteria for instruments to be included in Tier II capital to improve their loss absorbency. The guidelines also set out criteria for loss absorption through conversion/write-off of all non-common equity regulatory capital instruments at the point of non-viability. The point of non-viability is defined as a trigger event upon the occurrence of which non-CET-I and Tier II instruments issued by banks in India may be required to be, at the option of the RBI, written off or converted into common equity.

Under the Basel III capital regulations, the capital funds of a bank are classified into CET-I, Additional Tier I ( AT-I ) and Tier II capital. Tier I capital, comprised of, among others, CET-I and AT-I, provides the most permanent and readily available support against unexpected losses. CET-I capital is comprised of paid-up equity capital and reserves consisting of any statutory reserves, free reserves and capital reserves. By its circular dated March 2016, the RBI has allowed banks, at their discretion, to include foreign currency translation reserves arising due to the translation of financial statements of their foreign operations in terms of Accounting Standard ( AS ) 11 as CET-I capital at a discount of 25%, subject to certain conditions. Further, the RBI has permitted deferred tax assets which relate to timing differences (other than those related to accumulated losses) to be recognized in the CET-I capital up to 10% of a bank s CET-I capital, at the discretion of banks (instead of full deduction from CET-I capital), subject to certain terms and conditions.

AT-I capital is comprised of, among others, perpetual non-cumulative preference shares and debt capital instruments eligible for inclusion as AT-I capital. Regulatory adjustments/deductions such as equity investments in financial subsidiaries (in accordance with the directions of the RBI), intangible assets, deferred tax assets (in the manner and to the extent, specified by the RBI), gaps in provisioning and losses in the current period and those brought forward from the previous period are required to be deducted from CET-I capital in a phased manner and fully deducted therefrom by March 31, 2017.

Tier II capital consists of revaluation reserves at a discount of 55.0%, general provisions and loss reserves (allowed up to a maximum of 1.25% of the total credit risk weighted assets), hybrid debt capital instruments (which combine features of both equity and debt securities) such as perpetual cumulative preference shares, redeemable non-cumulative preference shares / redeemable cumulative preference shares and debt capital instruments (which should be fully paid up, with a fixed maturity of minimum 5 years and should not contain clauses that permit step-ups or other incentives to redeem). In its circular dated March 1, 2016, the RBI has stated that revaluation reserves arising out of a change in the carrying amount of a bank s property consequent to its revaluation may, at the discretion of the bank, be considered as CET-I capital. As of January 1, 2013, capital instruments which are not Basel III compliant (such as capital debt instruments with step-ups) are being phased-out in a gradual manner (at a rate of 10% per year).

Risk adjusted assets considered for determining the capital adequacy ratios are the aggregation of risk weighted assets of credit risk, market risk and operational risk.

In respect of credit risk, the risk adjusted assets and off-balance sheet items considered for determining the capital adequacy ratio are the risk weighted total of certain funded and non-funded exposures. Degrees of credit risk expressed as percentage weighting have been assigned to various balance sheet asset items and conversion factors to

off-balance sheet items. The value of each item is multiplied by the relevant weight and/or conversion factor to arrive at risk-adjusted values of assets and off-balance sheet items. Standby letters of credit and general guarantees are treated similar to funded exposures and are subject to a 100.0% credit conversion factor. The credit conversion factor for certain off-balance sheet items such as performance bonds, bid bonds and standby letters of credit related to particular transactions is 50.0% while that for short-term self-liquidating trade-related contingencies such as documentary credits collateralized by the underlying shipments is 20.0%. The credit conversion factor for other commitments like formal standby facilities and credit lines is either 20.0% or 50.0%, based on the original maturity of the facility. Differential risk weights for credit exposures linked to their external credit rating or asset class have been prescribed.

## **Table of Contents**

The RBI has prescribed a matrix of risk weights varying from 35% to 75% (since revised to a maximum of 50% for loans sanctioned on or after June 7, 2017) for individual housing loans based on the size of the loan and the loan-to-value ratios. Consumer credit and advances that are included in our capital market exposure carry a risk weight of 125.0% or higher corresponding to the rating of the exposure. Exposure to venture capital funds are risk weighted at 150.0%. Other loans/credit exposures are risk weighted based on their ratings or turnover. The RBI has also prescribed detailed guidelines for the capital treatment of securitization exposures.

The RBI requires banks in India to compute the capital requirements for operational risk under the Basic Indicator Approach. Under this approach, banks must hold capital for operational risk equal to the average over the previous three years of a fixed percentage of positive annual gross income. The BCBS has set this percentage at 15% which has been followed by the RBI.

Banks are required to maintain a capital charge for market risks on their trading books in respect of securities included under the held-for-trading and available-for-sale categories, open gold position, open foreign exchange position limits, trading positions in derivatives and derivatives entered into for hedging trading book exposures. With effect from fiscal 2015, banks are also required to quantify incurred credit valuation adjustment losses and standard credit valuation adjustment capital charge on their derivatives portfolio.

The Basel III capital regulations require a bank to maintain a minimum CET-I capital ratio of 5.5%, a minimum Tier I capital ratio of 7.0% and a capital conservation buffer of 2.5% of its risk weighted assets with the minimum overall capital adequacy ratio of 9.0% of its risk weighted assets. The transitional arrangements for the implementation of Basel III capital regulations in India began from April 1, 2013 and the guidelines will be fully phased-in and implemented as of March 31, 2019. In September 2014, the RBI reviewed its guidelines on Basel III capital regulations with a view to facilitate issuance of non-equity regulatory capital instruments by banks under Basel III framework. Accordingly, certain specific eligibility criteria of such instruments were amended. These amendments were also intended to incentivize investors and to increase the investor base.

### **Domestic Systemically Important Banks**

In July 2014, the RBI released a framework for dealing with domestic systemically important banks ( D-SIBs ). The D-SIB framework requires that the RBI disclose the names of banks designated as D-SIBs every year in August. Banks identified as systemically important based on their size, inter-connectedness in the financial system, complexity and lack of readily available substitutes or financial infrastructure would be required to maintain additional CET-I capital ranging from 0.2% to 0.8% of risk-weighted assets ( RWAs ). D-SIBs may implement the increased capital requirement in a phased manner from April 2016 to April 2019. Our Bank has been classified as a domestic systemically important bank by RBI during fiscal 2018. The higher capital requirements under the bucketing structure, as provided in the D-SIB Framework, in the form of additional CET-I, shall be phased-in from April 1, 2018 and will become fully effective from April 1, 2019.

### **Countercyclical Capital Buffer**

In February 2015, the RBI released guidelines for implementation of Countercyclical Capital Buffer ( CCCB ). The CCCB regime requires banks to build up a buffer of capital in good times which may be used to maintain flow of credit to the real sector in difficult times. It also achieves the broader macro-prudential goal of restricting the banking sector from indiscriminate lending in the periods of excess credit growth that have often been associated with the building up of system-wide risk. While the framework for CCCB has taken effect, the activation of CCCB will take place when notified by the RBI. Some of the key points mentioned in the guidelines are as follows: (i) CCCB may be maintained in the form of CET I capital or other fully loss absorbing capital only, and the amount of the CCCB may

vary from 0 to 2.5% of total risk weighted assets of the banks, (ii) the CCCB decision would normally be pre-announced with a lead time of four quarters; however, depending on the CCCB indicators, the banks may be advised to build up the requisite buffer in a shorter time period, and (iii) banks will be subject to restrictions on discretionary distributions (including dividend payments, share buybacks and staff bonus payments) if they do not meet the requirement on CCCB. In its first bi-monthly monetary policy statement for fiscal 2017, the RBI stated that, following the review and empirical testing of CCCB indicators, it was not necessary to activate the CCCB regime at that point in time. There has been no additional guidance as to when the RBI expects to announce the implementation of the CCCB regime.

**Table of Contents****Loan Loss Provisions and Non-Performing Assets**

The RBI has issued guidelines on income recognition, asset classification, provisioning standards and the valuation of investments applicable to banks, which are revised from time to time. These guidelines are applied for the calculation of impaired assets under Indian GAAP. For our consolidated financial statements prepared in accordance with U.S. GAAP, loan loss provision is made in accordance with ASC 310 and ASC 450 and as described under Management's Discussion and Analysis of Financial Condition and Results of Operations and under note 2i, Allowance for credit losses, to our consolidated financial statements. The principal features of the RBI guidelines are set forth below.

***Non-Performing Assets***

An asset, including a leased asset, becomes non-performing when it ceases to generate income for the bank.

The RBI guidelines stipulate the criteria for determining and classifying a non-performing asset ( NPA ). A NPA is a loan or an advance where;

interest and/or an installment of principal remain overdue (as defined below) for a period of more than 90 days in respect of a term loan;

the account remains out-of-order (as defined below) in respect of an overdraft or cash credit for more than 90 days;

the bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted;

the installment of principal or interest thereon remains overdue for two crop seasons for short duration crops;

the installment of principal or interest thereon remains overdue for one crop season for long duration crops;

the amount of a liquidity facility remains outstanding for more than 90 days, in respect of securitization transactions undertaken in accordance with the RBI guidelines on securitization dated February 1, 2006; or

in respect of derivative transactions, the overdue receivables representing the positive mark-to-market value of a derivative contract, remain unpaid for a period of 90 days from the specified due date for payment.

Banks should classify an account as a NPA only if the interest imposed during any quarter is not fully repaid within ninety days from the end of the relevant quarter.

***Overdue***

Any amount due to the bank under any credit facility is overdue if it is not paid on the due date fixed by the bank.

***Out-of-Order Status***

An account should be treated as out-of-order if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power for 90 days. In circumstances where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but (i) there are no credits continuously for a period of 90 days as of the date of the balance sheet of the bank or (ii) the credits are not sufficient to cover the interest debited during the same period, these accounts should be treated as out-of-order .

***Asset Classification***

Banks are required to classify NPAs into the following three categories based on the period for which the asset has remained non-performing and the realizability of the dues:

*Sub-standard Assets:* Assets that are non-performing for a period less than or equal to 12 months. Such an asset has well defined credit weaknesses that jeopardize the liquidation of the debt and is characterized by the distinct possibility that the bank will sustain some loss if deficiencies are not corrected.

---

**Table of Contents**

*Doubtful Assets:* An asset will be classified as doubtful if it remains in the substandard category for a period of 12 months. A loan classified as doubtful has all the weaknesses inherent in assets that are classified as sub-standard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions and values, highly questionable and improbable.

*Loss Assets:* Assets on which losses have been identified by the bank or internal or external auditors or on inspection by the RBI, but the amount has not been written off fully. Such an asset is considered uncollectable and of such little value that its continuance as a bankable asset is not warranted, although there may be some salvage or recovery value.

There are separate asset classification guidelines which will apply to projects under implementation before the commencement of their commercial operation.

***Restructured Assets***

The RBI has issued prudential guidelines on the restructuring of advances by banks. The guidelines essentially deal with the norms/conditions, the fulfillment of which is required to maintain the category of the restructured account as a standard asset. A standard asset can be restructured by rescheduling principal repayments and/or the interest element, subject to compliance with certain conditions, but must be separately disclosed as a restructured asset.

The following categories of advances are not eligible for being classified as a standard asset upon restructuring: a) consumer and personal advances; b) advances classified as capital market exposures; and c) advances classified as commercial real estate exposures.

The criteria to be fulfilled for the restructured advance to be treated as a standard asset includes the viability of the business, infusion of promoters' contribution, full security coverage and cap on maximum tenor of repayment. The economic loss, if any, arising as a result of a restructuring needs to be provided for in the books of the bank. The provision is computed as the difference between the fair value of the account before and after restructuring.

Similar guidelines apply to sub-standard assets. Sub-standard accounts which have been subjected to restructuring, whether in respect of a principal installment or interest amount, are eligible to be upgraded to the standard category only after the specified period, i.e. a period of one year after the date when the first payment of interest or of principal, whichever is earlier, falls due, subject to satisfactory performance during the period.

In May 2013, the RBI issued additional guidelines in relation to restructured assets wherein such regulatory forbearance regarding asset classification on restructured accounts will be withdrawn for all restructurings with effect from April 1, 2015, with the exception of provisions related to changes in Date of Commencement of Commercial Operations (DCCO) in respect of infrastructure as well as non-infrastructure project loans. This implies that a standard account would immediately be classified as a sub-standard account upon restructuring. These guidelines are also applicable to non-performing assets, which upon restructuring would continue to have the same asset classification as prior to the restructuring and may be classified into lower categories in accordance with applicable asset classification norms based on the pre-restructuring repayment schedule. However, the standard asset classification may be retained, subject to specified conditions, in respect of certain loans granted for infrastructure projects given the importance of the infrastructure sector in national growth and development and the uncertainty involved in obtaining approvals from various authorities.

***Resolution of Stressed Assets***

In February 2018, the RBI issued a circular titled "Resolution of Stressed Assets - Revised Framework". This replaced the erstwhile framework for revitalizing stressed assets (including the joint lenders forum mechanism), the scheme of sustainable structuring of stressed assets, the corporate debt restructuring mechanism, and the strategic debt restructuring mechanism. Per the circular, lenders must initiate steps to cure a default in the form of a resolution plan as soon as there is a default on any account. For large accounts (defined as accounts with the aggregate exposure of the lenders being Rs. 20 billion or more), the RBI has specified that the resolution plan must be implemented by the later of 6 months from the date of default and September 30, 2018, failing which the lenders must refer the borrower for insolvency resolution under the Insolvency and Bankruptcy Code within 15 days. For smaller accounts, the RBI signaled it would announce the timeframe for implementation of resolution plans or a reference under the Insolvency and Bankruptcy Code within the next two years.

---

**Table of Contents*****Act Relating to Recovery of NPAs***

As a part of the financial sector reforms, the Government introduced the SARFAESI Act. The SARFAESI Act provides banks and other lenders increased powers in the recovery of the collateral underlying NPAs.

***Provisioning and Write-Offs***

Provisions are based on guidelines specific to the classification of assets. The following guidelines apply to various asset classifications:

***Standard Assets***

Banks are required to make general provisions for standard assets for the funded outstanding on a global portfolio basis. The provisioning requirement for housing loans at teaser rates is 2.00% and will reduce to 0.40% after one year from the date on which the teaser rates are reset at higher rates if the accounts remain standard. In November 2012, the RBI increased the provisioning requirement for restructured standard assets from 2.00% to 2.75%. In May 2013, the RBI increased the provisioning requirement for all types of accounts restructured to 5.00% with effect from June 1, 2013. For the stock of restructured standard accounts as of May 31, 2013, this increase was required to be implemented in a phased manner by March 31, 2016. The provisioning requirements for other loans range from 0.25% to 1.00% on the outstanding loans based on the type of exposure. Derivative exposures, such as credit exposures computed as per the current marked to market value of the contract arising on account of the interest rate and foreign exchange derivative transactions and gold are subject to the same provisioning requirement applicable to the loan assets in the standard category of the concerned counterparties. All conditions applicable for the treatment of the provisions for standard assets would also apply to the aforesaid provisions for derivatives and gold exposures.

In February 2014, the RBI directed banks to form a JLF if the aggregate exposure of both fund-based and non-fund based facilities taken together of lenders in an account is Rs. 1,000 million and above and the account is reported by any of the lenders to CRILC as special mention account-2 ( SMA-2 ). If the lenders fail to convene the JLF or fail to agree upon a common CAP within the stipulated time frame, the account will be subjected to accelerated provisioning of 5% if the account is classified as a standard asset in the accounts of the lenders. In October 2014, the RBI decided that accelerated provisioning will be applicable only to the lead bank having responsibility to convene the JLF and not to all the lenders in the consortium or multiple banking arrangements. In case the lead bank fails to convene the JLF, the bank with the second largest aggregate exposure shall convene the JLF.

The RBI has also introduced incremental provisioning requirements with effect from April 1, 2014 for banks exposures to entities with unhedged foreign currency exposure. Banks are required to collect specific information from its customers and assess the extent to which a customer is exposed to unhedged foreign currency on account of volatility in the exchange rate of the rupee vis-à-vis foreign currencies and calculate the incremental provisions based on the methodology prescribed by the RBI.

By its circular dated April 18, 2017, the RBI has advised banks to make provisions at higher rates in respect of standard advances to stressed sectors of the economy, and requires bank to (i) put in place a Board-approved policy for making provisions for standard assets at rates higher than the regulatory minimum based on evaluation of risk and stress in various sectors; (ii) review the policy on a quarterly basis; and (iii) review the telecom sector by June 30, 2017, and consider making provisions for standard assets in this sector at higher rates.

***Sub-Standard Assets***

A general provision of 15.0% on total outstanding loans is required without making any allowance for the Export Credit Guarantee Corporation of India guarantee cover and securities available. The unsecured exposures which are identified as sub-standard are subject to an additional provision of 10.0%, i.e. a total of 25.0% on the outstanding balance. However, unsecured loans classified as sub-standard in relation to infrastructure lending, where certain safeguards such as escrow accounts are available, are subject to an additional provision of only 5.0% (i.e. a total of 20.0% on the outstanding balance).

Unsecured exposure is defined as an exposure where the realizable value of security, as assessed by the bank, approved valuers or the RBI's inspecting officers, is not more than 10.0%, *ab initio*, of the outstanding exposure. Exposure includes all funded and non-funded exposures (including underwriting and similar commitments). Security means tangible security properly discharged to the bank and will not include intangible securities such as guarantees and comfort letters.

---

**Table of Contents***Doubtful Assets*

A 100.0% provision is made against the unsecured portion of the doubtful asset. In cases where there is a secured portion of the asset, depending upon the period for which the asset remains doubtful, a 25.0% to 100.0% provision is required to be made against the secured asset as follows:

Up to one year: 25.0% provision.

One to three years: 40.0% provision.

More than three years: 100.0% provision.

*Loss Assets*

The entire asset is required to be written off or 100.0% of the outstanding amount is required to be provided for.

*Floating Provisions*

In June 2006, the RBI issued prudential standards on the creation and utilization of floating provisions (provisions which are not made in respect of specific non-performing assets or are made in excess of regulatory requirements for provisions for standard assets). Floating provisions must be held separately and cannot be reversed by credit to the profit and loss account. The RBI has permitted banks to utilize a prescribed percentage of the floating provisions held by them for making specific loan loss allowances for impaired accounts under extraordinary circumstances. Until the utilization of such provisions, they can be netted off from gross non-performing assets to arrive at disclosure of net non-performing assets, or alternatively, can be treated as part of Tier II capital within the overall ceiling of 1.25% of credit RWAs.

*Provisioning Coverage Ratio*

With a view to ensuring counter-cyclical provisioning in the banking system, the RBI mandated that banks should augment their provisioning cushions consisting of specific provisions against NPAs as well as floating provisions (to the extent not used at Tier II capital), and ensure that their total Provisioning Coverage Ratio ( PCR ), including the above floating provisions, is not less than 70.0% as of September 30, 2010. Under the current regime (i) the PCR of 70.0% may be computed with reference to the gross NPA position in the relevant banks as of September 30, 2010; (ii) the surplus of the provision under PCR over the amount required by the guidelines, would be treated as countercyclical provisioning buffer ; and (iii) banks may utilize up to a prescribed percentage of the countercyclical provisioning buffer/ floating provisions held by them for making specific provisions for NPAs during periods of system wide downturn, as per the policy approved by the bank s board of directors. The RBI released a discussion paper on dynamic loan loss provisioning framework in March 30, 2012. The framework proposes to replace the existing standards of general provisioning and recommends that banks make provisions on their loan book based on historical loss experience for different asset classes. Banks can draw down from dynamic provisions during periods of downturn. The RBI has advised that the dynamic provision framework is expected to be in place with improvement in the system.

*Regulations Relating to Sale of Assets to Asset Reconstruction Companies*

The SARFAESI Act provides for the sale of financial assets by banks and financial institutions to asset reconstruction companies. The RBI has also issued guidelines to banks on the process to be followed for the sale of financial assets to asset reconstruction companies. These guidelines provide that a bank may sell financial assets to an asset reconstruction company provided the asset is a NPA. A bank could also sell a standard asset only if (i) the asset is under consortium or multiple banking arrangement; (ii) at least 75.0% by value of the of the asset is classified as non-performing in the books of other banks and financial institutions; and (iii) at least 75.0% by value of the banks and financial institutions in the consortium or multiple banking arrangements agree to the sale of the asset to a securitization company or a reconstruction company. The banks selling financial assets must ensure that there is no known liability being transferred to them and that they do not assume any operational, legal or any other type of risks relating to the financial assets sold. Further, banks cannot sell financial assets at a contingent price with an agreement to bear a part of the shortfall on ultimate realization. However, banks may sell specific financial assets with an agreement to share any surplus realized by the asset reconstruction company in the future. While each bank is required to make its own assessment of the value offered in the sale before accepting or rejecting an offer for purchase of financial assets by an asset reconstruction company, in consortium or multiple banking arrangements where more than 75.0%, by value of the banks or financial institutions, accept the offer, the remaining banks or financial institutions are obliged to accept the offer. Consideration for the sale may be in the form of cash or bonds/debentures issued by the asset reconstruction company or trusts set up by it to acquire financial assets. Banks can also invest in security receipts or pass-through certificates issued by the asset reconstruction company or trusts set up by it to acquire the financial assets.

**Table of Contents*****Guidelines on Sale and Purchase of Non-Performing Assets ( NPAs ) among Banks, Financial Institutions and Non-banking Financial Institutions***

In order to increase the options available to banks for resolving their NPAs and to develop a healthy secondary market for NPAs, in July 2005, the RBI issued guidelines for the purchase and sale of NPAs among banks, financial institutions and NBFCs. In terms of these guidelines, banks' boards are required to establish policies covering, among others, a valuation procedure to be followed to ensure that the economic value of financial assets is reasonably estimated based on the assessed cash flows arising out of repayment and recovery prospects. Purchases and sales of NPAs must be without recourse to the seller, on a cash basis, with the entire consideration being paid up-front, and after the sale there should not be any known liability devolving on the seller. Previously, an asset needed to be classified by the seller as non-performing for at least two years to be eligible for sale and the purchasing bank needed to have held the NPA in its books for at least 15 months before it could sell the asset to another bank.

In February 2014, the RBI issued guidelines wherein the requirement of a minimum holding period of two years by the seller in relation to sale transactions with other banks, financial institutions and NBFCs, was removed. These guidelines reduce the purchasing bank's holding period requirement to 12 months before it can sell the asset to another bank, financial institution or NBFC. In accordance with these RBI guidelines, the asset cannot be sold back to the original seller.

Further, to incentivize the early sale of NPAs to securitization companies and/or reconstruction companies, banks are allowed to spread over any shortfall, if the sale value is lower than the net book value, over a period of two years for NPAs sold up to March 31, 2016. In its circular of June 2016, the RBI has further extended the dispensation of amortizing the shortfall on the sale of NPAs to securitization companies and reconstruction companies to March 31, 2017. However, in respect of NPAs sold during the period from April 1, 2016 to March 31, 2017, banks may amortize the shortfall over a period of only four quarters from the quarter in which the sale took place.

**Guidelines on Sale of Standard Assets**

The RBI first issued guidelines for the securitization of standard assets in February 2006. The guidelines provide that for a transaction to be treated as a securitization, a two-stage process must be followed. In the first stage there must be a sale of a single asset or pooling and transferring of assets to a bankruptcy remote special purpose vehicle ( SPV ) in return for immediate cash payment and in the second stage repackaging and selling the security interests representing claims on incoming cash flows from the asset or pool of assets to third party investors should be effected. Further, for enabling the transferred assets to be removed from the balance sheet of the seller in a securitization structure, the isolation of assets or true sale from the seller or originator to the SPV is an essential prerequisite. Also, an arms-length relationship must be maintained between the originator, the seller and the SPV.

Certain regulatory standards for capital adequacy, valuation, profit and loss on sale of assets, income recognition and provisioning, accounting treatment for securitization transactions and disclosure standards have been prescribed. The guidelines are applicable for originators and have prescribed provisions for service providers like: credit enhancers, liquidity support providers and underwriters and investors. Quarterly reporting to the audit sub-committee of the board of directors by originating banks of the securitization transactions has also been prescribed. Apart from banks, these guidelines are also applicable to financial institutions and NBFCs.

In May 2012, the RBI revised the guidelines on transfer of assets through securitization and direct assignment of cash flows. These guidelines govern the securitization of debt obligations of a homogenous pool of obligors as well as the direct sale or transfer of a single standard asset. The roles of both the selling and purchasing banks have been defined more clearly. All on-balance sheet standard assets except those expressly disallowed in the guidelines are eligible for

securitization subject to being held by the originating bank for a minimum holding period. The guidelines also prescribe a minimum retention requirement, i.e. the minimum part of the securitized debts that the originator is required to retain during the term of securitization. Overseas branches of Indian banks cannot undertake securitization in other jurisdictions unless there is a minimum retention requirement in that jurisdiction. These requirements have been established to ensure that the originator exercises due diligence with regard to the securitized assets. The guidelines also establish the upper limit on the total retained exposure of the originator, the disclosures to be made by the originators, applicability of capital adequacy and asset classification and provisioning norms to these transactions. The norms also stipulate stress testing and extensive monitoring requirements on the purchased portfolios. Transactions which do not meet the requirements established by the guidelines will be assigned very high risk weights under capital adequacy norms. The guidelines on transfer of assets through securitization and direct assignment of cash flows do not apply to:

transfer of loan accounts of borrowers by a bank to other bank/financial institutions/NBFCs and vice versa, at the request/instance of borrower;

**Table of Contents**

inter-bank participations;

trading in bonds;

sale of entire portfolio of assets consequent upon a decision to exit the line of business completely (which should have the approval of the board of directors of the bank);

consortium and syndication arrangements and arrangement under corporate debt restructuring mechanism; and

any other arrangement/transactions, specifically exempted by the RBI.

**Regulations Relating to Making Loans**

The provisions of the Banking Regulation Act govern loans made by banks in India. The RBI issues directions covering the loan activities of banks. Major guidelines include norms for bank lending to priority sectors, non-bank financial companies, guidelines on banks benchmark lending rates, base rates and norms for loans against shares.

In terms of Section 20(1) of the Banking Regulation Act, a bank cannot grant any loans and advances against the security of its own shares. A banking company is prohibited from entering into any commitment for granting any loans or advances to or on behalf of any of its directors, or any firm in which any of its directors has an interest as a partner, manager, employee or guarantor or any other company (not being a subsidiary of the banking company or a company registered under section 8 of the Companies Act, 2013 or a Government company), or the subsidiary or the holding company of such a company of which any of the directors of the bank is a director, managing agent, manager, employee or guarantor or in which he holds substantial interest, or any individual in respect of whom any of its directors is a partner or guarantor. There are certain exceptions in this regard which exclude any transaction which the RBI may specify by general or special order as not being a loan or advance for the purpose of such section. The Government may, on the recommendation of the RBI and subject to conditions as it may deem fit to impose, exempt any banking company from the restriction on lending to the subsidiary, holding company or any other company in which any of the directors of the banking company is a director, managing agent, manager, employee, guarantor or in which such person holds substantial interest.

In the context of granting greater functional autonomy to banks, effective October 18, 1994, the RBI decided to remove restrictions on the lending rates of scheduled commercial banks for credit limits of over Rs. 0.2 million. Banks were given the freedom to fix the lending rates for such credit limits subject to the Benchmark Prime Lending Rate ( BPLR ) and spread guidelines. The BPLR system, however, fell short of its original objective of bringing transparency to lending rates. This was mainly because under the BPLR system, banks could lend below BPLR. Banks consequently were advised by the RBI to switch over to the system of Base Rate with effect from July 1, 2010. The base rate system was aimed at enhancing transparency in lending rates of banks and enabling better assessment of transmission of the monetary policy. The Base Rate included all elements of the lending rates that were common across all categories of borrowers. Banks were allowed to choose any benchmark to arrive at their Base Rate for a specific tenor that could be disclosed. For loans sanctioned up to June 30, 2010, the BPLR was applicable. However, for loans sanctioned up to June 30, 2010 but renewed from July 1, 2010, the Base Rate was applicable.

In December 2015, the RBI issued revised guidelines on computing interest rates on advances based on the marginal cost of funds. The revised guidelines were issued with a view to improving the transmission of policy rates into bank lending rates, improving transparency in the methodology followed by banks for determining interest rates on advances, and ensuring the availability of bank credit at interest rates which are fair to the borrowers as well as the banks. The guidelines came into effect from April 1, 2016. Pursuant to the revised guidelines, all rupee loans sanctioned and credit limits renewed with effect from April 1, 2016 will be priced with reference to the MCLR. Actual lending rates will be determined by adding the components of spread to the MCLR. Banks will review and publish their MCLR of different maturities every month on a pre-announced date. The guidelines provide that existing loans and credit limits linked to the Base Rate may continue until repayment or renewal. Certain types of loans, including fixed rate loans with tenor over 3 years and loans linked to a market determined external benchmark, are exempt from provisions of MCLR. The existing borrowers will have the option to move to MCLR-linked loan at mutually acceptable terms.

**Table of Contents****Directed Lending*****Priority Sector Lending***

The guidelines on lending to the priority sector are set forth in the RBI Master Directions on Priority Sector Lending Targets and Classification as updated from time to time. The priority sector is broadly comprised of agriculture, micro, small and medium enterprises ( MSMEs ), education, housing, export credit, social infrastructure, renewable energy, and others subject to certain limits. The guidelines take into account the revised definition of MSMEs as per the Micro, Small and Medium Enterprises Development Act, 2006.

The priority sector lending targets are linked to the adjusted net bank credit ( ANBC ) or the credit equivalent amount of off-balance sheet exposures ( CEOBE ), whichever is higher, as on the corresponding date of the previous year. Domestic banks are required to achieve total priority sector lending equivalent to 40.0% of their ANBC or CEOBE. Of the total priority sector advances, agricultural advances are required to be 18.0% of ANBC or CEOBE, whichever is higher. Advances to weaker sections are required to be 10.0% of ANBC or CEOBE, whichever is higher. Within the 18.0% target for agriculture, a target of 8.0% of ANBC or CEOBE, whichever is higher, is prescribed for small and marginal farmers. Banks have also been directed to ensure that their overall direct lending to non-corporate farmers does not fall below the system-wide average of the achievements over the last three years (which will be notified by the RBI at the beginning of each year, the current percentage being 11.70%). The RBI further reiterated that the banks should continue to undertake all efforts to reach the level of 13.5% of direct lending to the beneficiaries who earlier constituted the direct agriculture sector. The target for micro enterprises is set at 7.5%.

Loans to individuals up to Rs. 3.5 million in metropolitan centres (with population of 1 million and above) and loans up to Rs. 2.5 million in other centers for the purchase or construction of a dwelling unit per family (provided the overall cost of the dwelling unit in the metropolitan center and at other centers does not exceed Rs. 4.5 million and Rs. 3.0 million, respectively), excluding loans granted by banks to their own employees, are to be treated as part of priority sector lending. Loans to individual borrowers for educational purposes, including vocational courses up to Rs. 1.0 million, are also to be treated as part of priority sector lending. Investments by banks in securitized assets and outright purchases of loans representing loans to various categories of priority sector are eligible for classification under the priority sector only if certain criteria are fulfilled.

Bank loans up to a limit of Rs. 50 million per borrower for building social infrastructure for activities namely schools, health care facilities, drinking water facilities and sanitation facilities in certain eligible centres as prescribed by the RBI are treated as priority sector lending. Further, bank loans up to a limit of Rs. 150 million to borrowers for purposes like solar based power generators, biomass based power generators, wind mills, micro-hydel plants and for non-conventional energy based public utilities like street lighting systems, and remote village electrification are also treated as priority sector lending. Additionally, in March 2018, the RBI removed the loan limits applicable to MSMEs for classification under the priority sector.

Banks are required to ensure compliance with priority sector lending targets on a quarterly basis. Domestic scheduled commercial banks having a shortfall in lending to priority sector targets are allocated amounts for contribution to the Rural Infrastructure Development Fund established with the National Bank for Agriculture and Rural Development or funds with other financial institutions, as may be decided by the RBI, as and when funds are required by them. The interest rates on banks' contributions to these schemes and periods of deposits, among other things, are fixed by the RBI from time to time. Additionally, as per RBI guidelines, non-achievement of priority sector targets and sub-targets is taken into account by the RBI when granting regulatory clearances and approvals for various purposes. While computing priority sector achievement, a simple average of all quarters will be arrived at and considered for computation of overall shortfall/ excess at the end of the year.

Foreign banks having 20 or more branches in India were brought on par with domestic banks for priority sector targets in a phased manner over a maximum period of five years commencing on April 1, 2013 and since have a priority sector lending target of 40.0% of ANBC. In March 2018, the RBI directed such banks to achieve a sub-target of 8 percent of ANBC or CEOBE, whichever is higher, for banks lending to small and marginal farmers. Further, a sub-target of 7.50 percent of ANBC or CEOBE, whichever is higher, for banks lending to microenterprises has also become applicable for foreign banks with 20 branches or more from March 31, 2018.

Further, foreign banks with less than 20 branches are directed to achieve a total priority sector lending target of 40.0% of ANBC or CEOBE, whichever is higher, on par with other banks by fiscal 2020.

**Table of Contents**

In order to enable banks to achieve the priority sector lending target and sub-targets, the RBI, in its circular dated April 7, 2016, has introduced the Priority Sector Lending Certificates ( PSLC ) Scheme. The scheme permits banks to purchase PSLCs in the event of a shortfall from those banks that have achieved a surplus in their priority sector lending targets. There are four kinds of PSLCs:

- i) PSLC Agriculture: counting for achievement towards the total agriculture lending target;
- ii) PSLC SF/MF: counting for achievement towards the sub-target for lending to small and marginal farmers;
- iii) PSLC Micro Enterprises: counting for achievement towards the sub target for lending to micro enterprises; and
- iv) PSLC General: counting for achievement towards the overall priority sector target.

***Export Credit***

The RBI also requires banks to make loans to exporters. We provide export credit for pre-shipment and post-shipment requirements of exporters in rupees as well as foreign currencies. With effect from April 1, 2015 incremental export credit extended by domestic banks over the corresponding date of the preceding year, up to 2% of ANBC or CEOBE, whichever is higher, subject to a limit of Rs. 25 crore per borrower, to units having turnover of up to Rs.100 crore, shall be classified as priority sector lending. A similar limit is applicable to foreign banks with 20 or more branches in India with effect from April 1, 2017. Until March 31, 2017, foreign banks with 20 or more branches are allowed to count a certain percentage of their export credit limit as priority sector lending. Foreign banks with less than 20 branches are allowed to classify up to 32% of ANBC or CEOBE, whichever is higher, as priority sector lending. The interest rates applicable for all tenors of rupee-denominated export credit advances are required to be at or above Base Rate. As per RBI directions, the Base Rate system has been replaced by the MCLR and all rupee loans and credit limits sanctioned or renewed with effect from April 1, 2016 are required to be priced with reference to the MCLR. Existing loans and credit limits may remain linked to the Base Rate until repayment or renewal. With effect from May 5, 2012, the RBI has deregulated the interest rates on export credit in foreign currencies and has permitted banks to determine their own interest rates in respect thereof.

***Lending to Infrastructure Sector and Affordable Housing Sector***

In order to allow banks to provide long-term funds for project loans to the infrastructure sector and the affordable housing sector, the RBI, in July 2014, issued guidelines for the issuance of long-term bonds by banks for financing infrastructure sector loans and lending to the affordable housing sector. Under these guidelines, banks are permitted to issue long-term fully-paid, redeemable and unsecured bonds with a minimum maturity of seven years to enable lending to long-term projects in certain specified infrastructure sub-sectors and the affordable housing sector as prescribed in the guidelines. To encourage lending to these sectors, these long-term bonds are not subject to cash reserve ratio ( CRR ) or statutory liquidity ratio ( SLR ) requirements. These bonds are also not included in the computation of ANBC for the purposes of priority sector lending targets subject to the guidelines. However, any infrastructure or affordable housing loans acquired from other banks and financial institutions (such as those that could be involved in a business combination with the Bank) will require the prior approval of the RBI to avail these regulatory incentives.

In July 2014, the RBI also issued clarifications and guidelines to provide for flexible structuring and refinancing of long-term project loans to infrastructure and core industries sectors.

In November 2016, the RBI permitted banks to apply flexible structuring to new project loans in all sectors and existing loans in which aggregate exposure of all institutional lenders exceeds Rs. 250 cr, in all sectors, subject to certain terms and conditions.

***Credit Exposure Limits***

As a prudential measure aimed at better risk management and avoiding the concentration of credit risks, the RBI has advised banks to fix limits on their exposure to specific industries and sectors and has prescribed regulatory limits on banks' exposures to individual borrowers and borrower groups. In addition, banks are also required to observe certain statutory and regulatory exposure limits in respect of advances against or investments in shares, convertible debentures or bonds, units of equity-oriented mutual funds and all exposures to venture capital funds (VCFs).

**Table of Contents**

The RBI limits exposure to individual borrowers to not more than 15.0% of the capital funds of a bank and limits exposure to a borrower group to not more than 40.0% of the capital funds of a bank. The capital funds for this purpose are comprised of Tier I and Tier II capital, as defined under the capital adequacy standards and as per the published accounts as of March 31 of the previous year. The infusion of Tier I or Tier II capital, either through domestic or overseas issuances, after the published balance sheet date is also eligible for inclusion in the capital funds for determining the exposure ceiling. In the case of infrastructure projects, such as power, telecommunications, road and port projects, an additional exposure of up to 5.0% of capital funds is allowed in respect of individual borrowers and up to 10.0% in respect of group borrowers. Banks may, in exceptional circumstances and with the approval of their boards, consider increasing their exposure to an individual borrower or a borrower group by a further 5.0% of capital funds. With effect from May 2008, the RBI revised the prudential limit to 25.0% of capital funds in respect of a bank exposure to oil companies to which specified oil bonds have been issued by the Government of India. Banks need to make appropriate disclosures in their annual financial statements in respect of exposures where they have exceeded the prudential exposure limits during the year.

Exposures (both lending and investment, including off balance sheet exposures) of a bank to a single NBFC, NBFC-Asset Financing Company (AFC), or NBFC-Infrastructure Finance Company (IFC) should not exceed 10%, 15% and 15%, respectively, of a bank's capital funds. A bank may, however, assume exposures on a single NBFC, NBFC-AFC, or NBFC-IFC up to 15%, 20% and 20%, respectively, of its capital funds, provided the exposure in excess of 10%, 15% and 15% (referred to above) is on account of funds that the NBFC, NBFC-AFC, or NBFC-IFC has lent out to the infrastructure sector. Further, all banks may consider fixing internal limits for their aggregate exposure to all NBFCs combined.

Exposure includes credit exposure (funded and non-funded credit limits) and investment exposure (including underwriting and similar commitments). The sanctioned limits or outstandings, whichever is higher, would be included when arriving at the exposure limit. However, in the case of fully-drawn term loans, where there is no scope for re-drawing of any portion of the sanctioned limit, banks may consider the outstanding as the exposure. For the purpose of exposure norms, banks shall compute their credit exposures, arising on account of the interest rate and foreign exchange derivative transactions and gold, using the Current Exposure Method. While computing credit exposures, banks may exclude sold options, provided that the entire premium or fee or any other form of income is received or realized.

Credit exposure comprises the following elements:

all types of funded and non-funded credit limits; and

facilities extended by way of equipment leasing, hire purchase finance and factoring services.

Apart from limiting exposures to an individual or a group of borrowers, as indicated above, the RBI guidelines also require banks to consider fixing internal limits for aggregate commitments to specific sectors, so that their exposures are evenly spread across various sectors. These limits are subject to a periodic review by banks.

In August 2016, the RBI has issued a circular imposing certain restrictions on lending by banks to large borrowers. The circular aims to mitigate the risk posed to the banking system by large loans to single corporate borrowers, and also encourage large corporates with borrowings from the banking system above a cut-off level to tap the market for their working capital and term loan needs. As per the circular, which is effective April 1, 2017 banks are required to keep exposures to specified borrowers within a normally permitted lending limit ( NPLL ) specified in the circular from

the fiscal succeeding that in which the borrower is identified as a specified borrower. For incremental exposures in excess of the NPLL, banks are required to maintain an additional provision of 3% on such excess. Additional risk weight of 75 percent over and above the applicable risk weight for the exposure to the specified borrower is also required to be maintained by the bank in case of any incremental exposure. The guidelines define specified borrowers as having an aggregate fund based credit limit (as described in the circular) of over Rs. 250 billion at any time during fiscal 2018; Rs. 150 billion at any time during fiscal 2019 and Rs. 100 billion at any time from April 1, 2019 onwards.

---

**Table of Contents**
**Large Exposures Framework**

In December 2016, the RBI issued the Large Exposures Framework, which aims to align the exposure norms for Indian Banks with BCBS standards. The guidelines are required to be fully implemented by March 31, 2019. The framework defines large exposures and governs banks' exposures to counterparties. The framework prescribes that the sum of all exposure values of a bank to a single counterparty must not be higher than 20% of the bank's available eligible capital base at all times, and that to a group of connected counterparties must not be higher than 25% of the bank's available eligible capital base. Tier I capital fulfilling the criteria mentioned in the Basel III guidelines issued by RBI is required to be considered as eligible capital base for this purpose.

**Regulations Relating to Capital Market Exposure Limits**

The RBI has issued guidelines on financing to participants in the capital markets. These guidelines place a ceiling on the overall exposure of a bank to the capital markets.

The aggregate exposure that a bank has to the capital markets in all forms (both fund and non-fund based) must not exceed 40.0% of its net worth (both for the stand-alone and the consolidated bank) as of March 31 of the previous year. Within this overall ceiling, the bank's direct investment in shares, convertible bonds/debentures, units of equity-oriented mutual funds and exposure to VCFs must not exceed 20.0% of its net worth (both for the stand-alone and the consolidated bank). Net worth is comprised of the aggregate of paid-up capital, free reserves (including share premium but excluding revaluation reserves), investment fluctuation reserve and credit balance in the profit and loss account, less the debit balance in the profit and loss account, accumulated losses and intangible assets. There are guidelines on loans against equity shares in respect of amount, margin requirement and purpose.

The following exposures are subject to the ceiling:

direct investment in equity shares, convertible bonds, convertible debentures and units of equity-oriented mutual funds, the fund assets of which are not exclusively invested in corporate debt;

advances against shares/bonds/debentures or other securities or advances without security to individuals for investment in shares (including in primary offerings and employee stock option plans), convertible bonds, convertible debentures and units of equity-oriented mutual funds;

advances for any other purposes where shares or convertible bonds or convertible debentures or units of equity oriented mutual funds are taken as primary security;

advances for any other purposes to the extent secured by collateral of shares, convertible bonds, convertible debentures or units of equity oriented mutual funds, i.e., where the primary security other than shares or convertible bonds or convertible debentures or units of equity oriented mutual funds does not fully secure the advances;

secured and unsecured advances to stockbrokers and guarantees issued on behalf of stockbrokers and market makers;

loans sanctioned to companies against the security of shares/bonds/debentures or other securities or on a clean basis for meeting a promoter's contribution to the equity of new companies;

bridge loans to companies against expected equity flows/issues;

underwriting commitments taken up by banks in respect of primary issues of shares or convertible bonds or convertible debentures or units of equity-oriented mutual funds;

financing to stockbrokers for margin trading;

all exposure to venture capital funds (both registered and unregistered); and

irrevocable payment commitments issued by custodian banks in favour of stock exchanges.

---

**Table of Contents****Regulations Relating to Other Loan Exposures**

The RBI requires banks to have put in place a policy for exposure to real estate with the approval of their boards. The policy is required to include exposure limits, collateral to be considered, collateral cover and margins and credit authorization. The RBI has also permitted banks to extend financial assistance to Indian companies for the acquisition of equity in overseas joint ventures or wholly owned subsidiaries or in other overseas companies, new or existing, as strategic investments. Banks are not however permitted to provide companies' acquisition finance to acquire companies in India.

**Limits on intra group transactions and exposures**

In February 2014, the RBI issued guidelines on the management of intra-group transactions and exposures which have been in effect since October 1, 2014. These guidelines contain both quantitative limits for the financial intra-group transactions and exposures (ITEs) and prudential measures for the non-financial ITEs to ensure that the banks engage in ITEs in a prudent manner in order to contain the concentration and contagion risk arising out of ITEs. These measures are aimed at ensuring an arm's length relationship in dealings with group entities and prescribe minimum requirements with respect to group risk management and group-wide oversight and prudential limits on intra-group exposures. Effective October 2014, a bank's exposure to a non-financial or unregulated financial services entity in its group will be capped at 5% of its paid-in capital and reserves and its exposure to a regulated financial services company in its group will be capped at 10% of its paid-in capital and reserves. In the event a bank's current intra-group exposure is more than the limits stipulated in the guidelines, that bank was required to bring the exposure within the limits by no later than March 31, 2016. Any exposure beyond the permissible limits subsequent to March 31, 2016 is deducted from CET-I capital of the bank.

**Regulation Relating to Country Risk Management**

The RBI has issued detailed guidelines on country risk management that cover banks' exposure to those countries to which they have a net funded exposure of 1 per cent. or more of their total assets and no provision is maintained on such country exposure. The countries are categorized into seven risk categories; namely, insignificant, low, moderate, high, very high, restricted and off-credit. Required provisioning is based on exposures exceeding 180 days on a graded scale ranging from 0.25 per cent. to 100 per cent. Banks may maintain a lower level of provisioning of 25 per cent of the requirement in respect of exposures with a contractual maturity of less than 180 days.

**Regulations Relating to Investments*****Exposure Limits***

Credit exposure limits specified by the RBI in respect of a bank's lending to individual borrowers and borrower groups apply in respect of non-convertible debt instruments. Within the overall capital market exposure ceiling, a bank's direct investments in equity securities, convertible bonds and debentures and units of equity-oriented mutual funds should not exceed 20.0% of its net worth as of March 31 of the previous year. A bank's aggregate investment in subordinated bonds eligible for Tier II capital status issued by other banks or financial institutions is restricted to up to 10.0% of the investing bank's capital funds (Tier I plus Tier II capital). Investments in the instruments issued by banks or financial institutions that are eligible for capital status are either risk weighted or deducted from the investee bank's capital, for capital adequacy purposes, depending upon the extent of investment as prescribed by the RBI under the Basel III capital regulations.

In order to contain the risks arising out of investment by banks in non-statutory liquidity ratio ( non-SLR ) securities, and in particular the risks arising out of investment in bonds through private placement, the RBI has issued detailed guidelines on investment by banks in non-SLR securities. Banks have been advised to restrict their new investments in unlisted securities to 10.0% of their total non-SLR investments as of March 31 of the previous year. Banks are permitted to invest in unlisted non-SLR securities within this limit, provided that such securities comply with disclosure requirements for listed companies as prescribed by the SEBI. Banks' investments in unlisted non-SLR securities may exceed the limit of 10.0% by an additional 10.0%, provided the investment is on account of investments in securitization papers issued for infrastructure projects and bonds/debentures issued by securitization companies or reconstruction companies set up under the SARFAESI Act and registered with the RBI. Investments in security receipts issued by securitization companies or reconstruction companies registered with the RBI, investments in asset-backed securities and mortgage-backed securities, which are rated at or above the minimum investment grade and investments in unlisted convertible debentures will not be treated as unlisted non-SLR securities for computing compliance with the prudential limits. The guidelines relating to listing and rating requirements of non-SLR securities do not apply to investments in VCFs, commercial paper, certificates of deposit and mutual fund schemes where any part of the corpus can be invested in equity. Banks are not permitted to invest in unrated non-SLR securities except in the case of unrated bonds of companies engaged in infrastructure activities, within the overall ceiling of 10% for unlisted non-SLR securities.

The total investment by banks in liquid/short-term debt schemes (by whatever name called) of mutual funds with a weighted average maturity of the portfolio of not more than one year, will be subject to a prudential cap of 10% of their net worth as on March 31 of the previous year. The weighted average maturity would be calculated as average of the remaining period of maturity of securities weighted by the sums invested.

**Table of Contents*****Non-Performing Investments***

The RBI has defined non-performing investments as those where principal or interest is unpaid for more than 90 days including preference shares where a fixed dividend is not paid or declared. The non-availability of the latest balance sheet of a company in whose equity securities a bank has invested will also render those equity shares non-performing investments. If any credit facility availed of by the issuer is a NPA in the books of the bank, investment in any of the securities issued by the same issuer would also be treated as a Non-Performing Investment ( NPI ) and vice versa. However, if only preference shares have been classified as a NPI, the investment in any of the other performing securities issued by the same issuer may not be classified as a NPI and any performing credit given to that borrower need not be treated as a NPA.

***Restrictions on Investments in a Single Company***

In terms of Section 19(2) of the Banking Regulation Act, no banking company may hold shares in any company except as provided in sub-section (1) of that Act, whether as pledgee, mortgagee or absolute owner of an amount exceeding 30.0% of the paid-up share capital of that company or 30.0% of its own paid-up share capital and reserves, whichever is lower. Further, in terms of Section 19(3) of the Banking Regulation Act, banks must not hold shares, whether as pledgee, mortgagee or absolute owner, in any company in the management of which the managing director, any other director or manager of the bank is in any manner concerned or interested.

***Limit on Transactions through Individual Brokers***

Guidelines issued by the RBI require banks to empanel brokers for transactions in securities. These guidelines also require that a disproportionate part of the bank's business should not be transacted only through one broker or a few brokers. The RBI specifies that not more than 5.0% of the total transactions through empanelled brokers can be transacted through one broker during a year. If for any reason this limit is breached, the RBI has stipulated that the board of directors of the bank concerned should be informed on a half-yearly basis of such occurrences. These guidelines are not applicable to banks' dealings through Primary Dealers.

***Tri-Party Repo Directions***

On August 10, 2017, the RBI issued the Tri-Party Repo (Reserve Bank) Directions, 2017 ( TriParty Repo Directions ). These Tri-Party Repo Directions pertain to guidelines on eligibility, trading, documenting/reporting and settling of repo and reverse repo contracts where a third party (a Tri-Party Agent ) acts as an intermediary between the borrower and the lender to the repo/reverse repo, to facilitate services like collateral selection, payment and settlement, custody and management during the life of the transaction. On August 2, 2017, the RBI reduced the repo rates under the Liquidity Adjustment Facility ( LAF ) by 25 basis points from 6.25 per cent to 6.0 per cent, and the reverse repo rate to 5.75 per cent with immediate effect. However, on June 6, 2018, the RBI increased the repo rates under the LAF by 25 basis points back to 6.25 per cent, and the reverse repo rate to 6.0 per cent.

***Valuation of Investments***

The RBI has issued guidelines for the categorization and valuation of banks' investments. The salient features of the guidelines are given below.

Banks are required to classify their entire portfolio of approved securities under three categories: held for trading, available for sale and held to maturity. Banks must decide the category of investment at the time of acquisition.

Held to maturity ( HTM ) investments compulsorily include (i) recapitalization bonds received from the Government, (ii) investments in subsidiaries and joint ventures, and (iii) investment in the long-term bonds (with a minimum residual maturity of seven years) issued by companies engaged in infrastructure activities. The minimum residual maturity of these bonds must be of seven years at the time of investment in these bonds. Once invested, banks may continue to classify these investments under the HTM category even if the residual maturity falls below seven years subsequently. Held to maturity investments also include any other investments identified for inclusion in this category subject to the condition that such investments cannot exceed 25.0% of total investments. Banks are permitted to exceed the limit of 25.0% of investments for the held to maturity category provided the excess is comprised only of investments eligible for statutory liquidity ratio and the aggregate of such investments in the held to maturity category does not exceed a specified percentage of the prescribed demand and time liabilities.

Profit on the sale of investments in the HTM category is appropriated to the capital reserve account after being recognized in the profit and loss account. Loss on any sale is recognized in the profit and loss account.

Investments under the held for trading category must be sold within 90 days.

Available for sale and held for trading securities are required to be valued at market or fair value at prescribed intervals. The market price of the security available from the stock exchange, the price of securities in subsidiary general ledger transactions, the RBI price list or prices declared by the Primary Dealers Association of India jointly with the Fixed Income Money Market and Derivatives Association of India serves as the market value for investments in available for sale and held for trading securities.

---

**Table of Contents**

Profit or loss on the sale of investments in both the held for trading and available for sale categories is recorded in the income statement.

Shifting of investments from or to HTM is generally not allowed. However, it is permitted only under exceptional circumstances with the approval of the board of directors once a year, normally at the beginning of the accounting year; shifting of investments from available for sale to held for trading may be done, subject to depreciation, if any, applicable on the date of transfer, with the approval of the board of directors, the asset liability management committee or the investment committee; shifting from held for trading to available for sale is generally not permitted, save for under exceptional circumstances where banks are not able to sell the security within 90 days due to tight liquidity conditions, or extreme volatility, or the market becoming unidirectional, in which case transfer is permitted only with the approval of the board of directors, the asset liability management committee or the investment committee.

The one-time transfer of securities to/from HTM category with the approval of board of directors is permitted to be undertaken by banks at the beginning of the accounting year. Additionally, in order to enable banks to shift their excess SLR securities and direct sale from the HTM category to AFS/HFT for the purposes of complying with the existing SLR requirements, the RBI by way of a circular dated October 4, 2017, permitted such shifting as per specified timelines in addition to the shifting permitted at the beginning of the accounting year. Furthermore, such additional shifting of securities explicitly permitted by the RBI from time to time, direct sales from HTM for bringing down SLR holdings in HTM category, sales to the RBI under pre-announced OMO auctions and repurchase of Government securities by the Government of India from banks will be excluded from the 5 per cent. cap prescribed for value of sales and transfers of securities to/from HTM category under para 2.3(ii) of the master circular on Prudential Norms for Classification, Valuation and Operation of Investment Portfolio by Banks .

HTM securities are not marked to market and are carried at acquisition cost. Any premium on acquisition of held to maturity securities is amortized.

Depreciation or appreciation for each basket within the available for sale categories is aggregated. While net depreciation is provided for, net appreciation in each basket, if any, is not recognized except to the extent of depreciation already provided.

Investments in security receipts or pass through certificates issued by asset reconstruction companies or trusts set up by asset reconstruction companies are valued at the lower of redemption value of the security receipts or the net book value of the underlying financial asset.

***Prohibition on Short Selling***

The RBI does not permit short selling of securities by banks, except short selling of central government securities subject to stipulated conditions. The RBI has permitted scheduled commercial banks to undertake short sales of central government securities, subject to the short position being covered within a maximum period of three months, including the day of trade. The short positions must be covered only by an outright purchase of an equivalent amount of the same security or through a long position in the when issued market or allotment in primary auction.

In February 2015, the RBI permitted re-repo of government securities, including state development loans and treasury bills, acquired under reverse repo subject to conditions prescribed by the RBI.

In September 2014, scheduled commercial banks and primary dealers or bond houses were permitted to execute the sale leg of short sale transactions in relation to government securities in the over the counter market. In its circular

dated October 29, 2015, the RBI has allowed custodians and banks to short-sell in the government bond market with primary members or individual bank customers, who invest through lenders.

### **Regulations Relating to Deposits**

The RBI has permitted banks to independently determine rates of interest offered on fixed deposits. However, banks are not permitted to pay interest on current account deposits. From April 1, 2010, payment of interest on a savings account deposit is calculated on a daily product basis against the previous practice of interest being payable on the minimum balance held in the account during the period from the tenth day to the last calendar day of the month. With effect from October 25, 2011, the RBI permitted banks to offer varying rates of interest on savings deposits of resident Indians subject to the following conditions:

each bank will have to offer a uniform interest rate on savings bank deposits up to Rs. 0.1 million, irrespective of the amount in the account within this limit. While calculating interest on such deposits, banks are required to apply the uniform rate set by them on end-of-day balance up to Rs. 0.1 million; and

for any end-of-day savings bank deposits over Rs. 0.1 million a bank may provide differential rates of interest, if it so chooses, by ensuring that it does not discriminate in interest paid on such deposits, between one deposit and another of similar amount, accepted on the same date, at any of its offices.

**Table of Contents**

With effect from December 16, 2011, the RBI also permitted banks the flexibility to offer varying rates of interest on Non-Resident (External) ( NRE ) and Non-Resident (Ordinary) ( NRO ) deposit accounts. However, banks are not permitted to offer rates of interest on NRE or NRO deposit accounts that are higher than those offered on domestic rupee deposit accounts of the same tenor and maturity.

Previously, banks were required to pay interest of 4.0% per annum on domestic savings deposits, rupee-denominated NRE Accounts Scheme and NRO Scheme savings deposits. In respect of savings and time deposits accepted from employees, banks are permitted to pay an additional interest of 1.0% over the interest payable on deposits from the public.

The RBI has prescribed minimum and maximum maturity thresholds for certain types of deposits.

The RBI has permitted banks the flexibility to offer varying rates of interest on domestic term deposits of the same maturity based on the size of these deposits, subject to the following conditions:

a single term deposit is of Rs. 10.0 million (increased from Rs. 1.5 million with effect from April 1, 2013) and above; and

interest on deposits is paid in accordance with the schedule of interest rates disclosed in advance by the bank and not pursuant to negotiation between the depositor and the bank.

In April 2015, the RBI has permitted banks to offer differential interest rates based on whether the term deposits are with or without-premature-withdrawal-facility, subject to the following guidelines:

All term deposits of individuals (held singly or jointly) of Rs. 1.5 million and below should, necessarily, have premature withdrawal facility.

For all term deposits other than mentioned above, banks can offer deposits without the option of premature withdrawal as well. However, banks that offer such term deposits should ensure that the customers are given the option to choose between term deposits either with or without premature withdrawal facility.

Banks should disclose in advance the schedule of interest rates payable on deposits i.e. all deposits mobilized by banks should be strictly in conformity with the published schedule.

The banks should have a board approved policy with regard to interest rates on deposits including deposits with differential rates of interest and ensure that the interest rates offered are reasonable, consistent, transparent and available for supervisory review/scrutiny as and when required.

To achieve greater financial inclusion, banks have been advised by the RBI to offer a basic savings bank deposit account without any requirement of minimum balance and without carrying a charge for the stipulated basic minimum services that would make such accounts available as a normal banking service to all.

On March 3, 2016, the RBI issued the Master Direction on Interest Rates on Deposits. The master direction is applicable to all Scheduled Commercial Banks accepting deposits in rupee and foreign currency. This master direction consolidates instructions on rules and regulations framed by the RBI under various acts including banking issues and foreign exchange transactions.

On July 6, 2017, the RBI released guidelines titled *Customer Protection – Limiting Liability of Customers in Unauthorised Electronic Banking Transactions*, for customer protection by limiting the liability of customers in unauthorized electronic banking transactions. Under these guidelines, banks have been directed to (i) put in place appropriate internal control systems and procedures to ensure safety and security of electronic banking transactions carried out by customers; and (ii) facilitate ease of reporting and monitoring of unauthorized transactions by customers to banks. Further, indicators have been identified by the RBI to banks on situations where liability may or may not be accorded to the customers in case of unauthorized transactions, and the limits on and timelines for such liability of customers for third party breaches.

### ***FCNR (B) Deposits***

The RBI has granted general permission to non-resident Indians and Persons of Indian Origin ( *PIOs* ) to open Foreign Currency Non-resident (Bank) ( *FCNR(B)* ) accounts with authorized Indian banks. These *FCNR(B)* accounts can be funded by (i) interest accruing on the account (ii) interest on investment, (iii) maturity proceeds if such investments were made from the relevant *FCNR(B)* account, (iv) transferring funds from other *NRE/FCNR(B)* accounts, or (v) any other funds which are repatriable under the prevailing RBI regulations. The RBI permits *FCNR(B)* deposit holders to avail credit facilities (both offshore and onshore) and offer their *FCNR(B)* deposits as collateral for such facilities, subject to certain terms and conditions.

As an accelerated measure to increase foreign currency flows into the country, the RBI had, in September 2013, introduced a U.S. dollar-rupee swap window for fresh *FCNR(B)* dollar funds, mobilized for a minimum tenor of three years and over. Under the swap arrangement, a bank could sell U.S. dollars in multiples of US\$ 1 million to RBI and simultaneously agree to buy the same amount of U.S. dollars at the end of the swap period. The swap was undertaken at a fixed rate of 3.5% per annum. The swap window was open till November 30, 2013.

---

**Table of Contents**

In August 2013, the RBI exempted the FCNR(B)/NRE deposits raised by banks during a specified period having maturity of three years and above from maintenance of CRR and SLR. The RBI also permitted exclusion of loans made in India against these FCNR(B)/NRE deposits from the ANBC computation for priority sector lending targets. The exemption granted on incremental FCNR(B)/NRE deposits from maintenance of CRR/SLR was withdrawn with effect from fortnight beginning March 8, 2014.

***Deposit Insurance***

Demand and time deposits of up to Rs. 100,000 accepted by scheduled commercial banks in India have to be mandatorily insured with the Deposit Insurance and Credit Guarantee Corporation, a wholly-owned subsidiary of the RBI. Banks are required to pay the insurance premium to the Deposit Insurance and Credit Guarantee Corporation on a semi-annual basis. The cost of the insurance premium cannot be passed on to the customer.

***Demonetization measures***

On November 8, 2016, the Government of India announced its decision for existing bank notes of Rs. 500 and Rs. 1000 denominations of the then existing series issued by the RBI to no longer be valid. Citizens were to return all such bank notes to banks as they could no longer be used for transactions or exchange purposes with effect from November 9, 2016. New bank notes of denominations of Rs. 500 and Rs. 2000 were introduced to replace the old notes. Limits for the exchange of demonetized notes and withdrawal of new notes were specified which were subsequently lifted.

**Regulations Relating to Knowing the Customer and Anti-Money Laundering**

The RBI has issued several guidelines on customer identification and monitoring of transactions. Banks have been advised to put in place systems and procedures to control financial frauds, identify money laundering and suspicious activities, and monitor high value cash transactions. The RBI has also issued guidelines from time to time advising banks to be vigilant while opening accounts for new customers to prevent misuse of the banking system for perpetration of frauds.

Banks have been advised to ensure that a proper policy framework on KYC and AML measures duly approved by the board of directors or regulated entities (as specified in the guidelines) or any committee of the board of directors, is formulated and implemented. This framework is required to, *inter alia*, include procedures/process in relation to (a) customer acceptance policy; (b) customer identification procedures; (c) monitoring of transactions; and (d) risk management.

RBI guidelines require that a profile of the customers should be prepared based on risk categorization. Banks have been advised to apply enhanced due diligence for high-risk customers. The guidelines provide that banks should undertake customer identification procedures while establishing a banking relationship or carrying out a financial transaction or when the bank has a doubt about the authenticity or the adequacy of the previously obtained customer identification data. Banks must obtain sufficient information necessary to establish the identity of each new customer and the purpose of the intended banking relationship. The guidelines also provide that banks should monitor transactions depending on the account's risk sensitivity. Prevention of Money Laundering Rules, 2005 require every banking company, and financial institution, as the case may be, to identify the beneficial owner and take all reasonable steps to verify his identity. The term 'beneficial owner' has been defined as the natural person who ultimately owns or controls a client and/or the person on whose behalf the transaction is being conducted, including a person who exercises ultimate effective control over a judicial person. The procedure for identification of the beneficial owner has been specified by the Government of India in the Prevention of Money Laundering Rules, 2005 and the regulations

prescribed by the RBI from time to time.

The KYC procedures for opening accounts have been simplified for small accounts in order to ensure that the implementation of the KYC guidelines do not result in the denial of the banking services to those who are financially or socially disadvantaged. A small account is defined as a savings account in a banking company where (i) the aggregate of all credits in a financial year does not exceed Rs. 0.1 million; (ii) the aggregate of all withdrawals and transfers in a month does not exceed Rs. 0.01 million; and (iii) the balance at any point of time does not exceed Rs. 0.05 million.

In addition to keeping customer information confidential, banks must ensure that only information relevant to the perceived risk is collected and that the same is not intrusive in nature. Apart from addressing this concern the guidelines set out in detail the framework to be adopted by banks as regards their customer dealings and are directed towards prevention of financial frauds and money laundering transactions.

In a bid to prevent money laundering activities, the Government enacted the Prevention of Money Laundering Act, 2002 (the PML Act ) which came into effect from July 1, 2005. The PML Act seeks to prevent money laundering and to provide for confiscation of property derived from, or involved in, money laundering and for incidental matters or matters connected therewith.

All the instructions/guidelines issued to banks on KYC norms, AML standards and obligations of the banks under the PML Act have been consolidated in the Know Your Customer Directions, 2016, issued by the RBI, as updated on April 20, 2018. Separate guidelines were also issued by the RBI on July 20, 2017 on detection, reporting, monitoring and impounding of counterfeit notes by banks in India.

**Table of Contents**

The PML Act and the rules relating thereto require that banking companies, financial institutions and intermediaries (together, Institutions) to maintain a comprehensive record of all their transactions, including the nature and value of each transaction. Further, it mandates verification of the identity of all their clients and also requires the Institutions to maintain records of their respective clients. These details are to be provided to the authority established by the PML Act, who is empowered to order confiscation of property where the authority is of the opinion that a crime as recognized under the PML Act has been committed. In addition, the applicable exchange control regulations prescribe reporting mechanisms for transactions in foreign exchange and require authorized dealers to report identified suspicious transactions to the RBI.

Banks are advised to develop suitable mechanisms through an appropriate policy framework for enhanced monitoring of accounts suspected of having terrorist links, identification of the transactions carried out in these accounts and suitable reporting to the Director, Financial Intelligence Unit (India) (the FIU ). Banks are required to report to the FIU:

- (a) all cash transactions with a value of more than Rs. 1 million or an equivalent in foreign currency;
- (b) all series of cash transactions integrally connected to each other which have been valued below Rs. 1 million or an equivalent in foreign currency where such series of transactions have taken place within a month and the aggregate value of such transactions exceeds Rs. 1 million;
- (c) all transactions involving receipts by non-profit organizations with a value of more than Rs. 1 million or an equivalent in foreign currency;
- (d) all cash transactions in which forged or counterfeit currency notes or bank notes have been used and where any forgery of a valuable security or a document has taken place facilitating the transaction; and
- (e) all other suspicious transactions whether or not made in cash and by such other ways as mentioned in the Rules.

**Legal Reserve Requirements*****Cash Reserve Ratio***

Each bank is required to maintain a specific percentage of its net demand and time liabilities by way of a balance in a current account with the RBI. This is to maintain the solvency of the banking system. The amendments made to the Reserve Bank of India Act, 1934 and the Banking Regulation Act during fiscal 2007 enhanced the operational flexibility in monetary management of the RBI. The RBI (Amendment) Act, 2006 came into force on April 1, 2007. Section 3 of this Act removed the floor and the ceiling rates on CRR and no interest was payable on the CRR balances of banks with effect from March 31, 2007. Scheduled commercial banks are exempted from maintaining CRR on the following liabilities:

(a) liabilities to the banking system in India as computed under clause (d) of the explanation to section 42(1) of the Reserve Bank of India Act, 1934;

(b) credit balances in Asian Clearing Union (US\$) Accounts; and

(c) demand and time liabilities in respect of the banks Offshore Banking Units.

The CRR requirement as of March 31, 2018 was 4.0% of the prescribed net demand and time liabilities of the bank. In order to address the volatility in rupee exchange rates in early 2013, the RBI in July 2013 increased the requirement of minimum daily CRR balance maintenance to 99.0% of the requirement with effect from the first day of the fortnight beginning July 27, 2013. In September 2013, the RBI reduced the minimum daily maintenance of the CRR from 99.0% of the requirement to 95.0%. In April 2016, the RBI further reduced this requirement to 90%, with effect from the fortnight beginning April 16, 2016.

In November 2016, the government of India undertook demonetization of high denomination notes of Rs. 500 and Rs. 1000. On November 26, 2016 on a review of the liquidity conditions after the withdrawal of legal tender status of Rs. 500 and Rs.1000 denominations of bank notes, the RBI directed all scheduled commercial banks to maintain an incremental cash reserve ratio (CRR) of 100% on the increase in their net demand and time liabilities (NDTL) between September 16, 2016 and November 11, 2016. This requirement was withdrawn by the RBI effective from fortnight beginning December 10, 2016.

#### ***Statutory Liquidity Ratio***

In order to maintain liquidity in the banking system, in addition to the CRR, each bank is required to maintain a specified percentage of its net demand and time liabilities by way of liquid assets such as cash, gold or approved securities, such as Government of India and State Government Securities. The percentage of this ratio is fixed by the RBI from time to time and is currently 19.50%. The RBI master circular on the Statutory Liquidity Ratio specifies certain liabilities which will not be included in the calculation of the Statutory Liquidity Ratio.

---

**Table of Contents**

***Revisions in Constitution of Bank Assets***

The capital regulations with respect to Liquidity Standards under the Basel III framework (LCR, Liquidity Risk Monitoring Tools and LCR Disclosure Standards) were revised by the RBI by way of a circular dated August 2, 2017 to re-define the Level 1 of bank assets as comprising of the following:

i. Cash including cash reserves in excess of required CRR.

ii. For banks incorporated in India,

Reserves held with foreign Central Banks in excess of the reserve requirement, where a foreign sovereign has been assigned a 0 per cent. risk weight as per rating by an international rating agency.

Reserves held with foreign Central Banks in excess of the reserve requirement, to the extent these balances cover the bank's stressed net cash outflows in that specific currency, in cases where a foreign sovereign has been assigned a non-0 per cent. risk weight as per rating by an international rating agency, but a 0 per cent. risk weight has been assigned at national discretion under Basel II Framework.

iii. Government securities in excess of the minimum SLR requirement.

iv. Within the mandatory SLR requirement, Government securities to the extent allowed by the RBI, under Marginal Standing Facility (MSF).

v. Marketable securities issued or guaranteed by foreign sovereigns satisfying all the following conditions:

(a) assigned a 0 per cent. risk weight under the Basel II standardized approach for credit risk;

(b) traded in large, deep and active repo or cash markets characterized by a low level of concentration; and proven record as a reliable source of liquidity in the markets (repo or sale) even during stressed market conditions; and

(c) not issued by a bank/financial institution/NBFC or any of its affiliated entities.

The LCR requirement has been binding on all banks since 1 January 2015. The current prescribed LCR level since January 1, 2018 is 90% and will be at the prescribed level of 100% by January 1, 2019.

**Net stable funding ratio**

Net stable funding ratio ( NSFR ) is a global regulatory standard under the Basel III framework. The draft guidelines on NSFR were issued by the RBI by its circular dated May 28, 2015. The RBI has published final guidelines on NSFR on

May 17, 2018, to be implemented from a date to be communicated in due course, from which date they will be binding on banks. Until then, banks will have to comply with Basel III on a best efforts basis.

### **Regulations on Asset Liability Management**

Since 1999, the RBI has issued several guidelines relating to asset-liability management ( ALM ) in banks in India. The RBI guidelines cover, *inter alia*, the interest rate risk and liquidity risk measurement and reporting framework, including establishing prudential limits. The guidelines require that gap statements for liquidity and interest rate risk are prepared by scheduling all assets and liabilities according to the stated and anticipated re-pricing date or maturity date. The RBI has advised banks to actively monitor the difference in the amount of assets and liabilities maturing or being re-priced in a particular period and place internal prudential limits on the gaps in each time period, as a risk control mechanism. Additionally, the RBI has advised banks to manage their asset-liability liquidity structure within negative gap limits for 1 day, 2-7 days, 8-14 days and 15-28 days set at 5.0%, 10.0%, 15.0% and 20.0% of the cumulative cash outflows in the respective time buckets in order to recognize the cumulative impact on liquidity. In respect of other time periods, the RBI has directed banks to lay down internal standards in respect of liquidity gaps. In order to recognize the cumulative impact on liquidity, banks are also advised to prepare the statement of structural liquidity on a daily basis and also undertake dynamic liquidity management. Banks are required to submit the liquidity statements periodically to RBI, as specified in these guidelines.

The RBI s Guidelines on Banks Asset Liability Management Framework Interest Rate Risk issued in November 2010 mandate banks in India to evaluate interest rate risk using both methods, i.e. TGA and Duration Gap Analysis ( DGA ). Banks are required to submit the TGA and DGA results from time to time to the RBI as mentioned in the guidelines.

Further, RBI guidelines on stress testing issued in 2007 has reinforced stress testing as an integral part of a bank s risk management process, the results of which are used to evaluate the potential vulnerability to some unlikely but plausible events or movements in financial variables that affect both interest rate risk and liquidity risk in the bank. In December 2013, the RBI specified the minimum level of stress testing to be carried out by all banks.

**Table of Contents**

In November 2012, the RBI issued enhanced guidelines on liquidity risk management by banks. These guidelines consolidate various instructions on liquidity risk management that the RBI had issued from time to time, and where appropriate, harmonize and enhance these instructions in line with the principles for sound liquidity risk management and supervision issued by the BCBS. The RBI's guidelines require banks to establish a sound process for identifying, measuring, monitoring and controlling liquidity risk, including a robust framework for comprehensively projecting cash flows arising from assets, liabilities and off-balance sheet items over an appropriate time horizon. The key items covered under these guidelines include: (i) governance of liquidity risk management including liquidity risk management policy, strategies and practices and liquidity risk tolerance; (ii) management of liquidity risk, including identification, measurement and monitoring of liquidity risk; (iii) collateral position management; (iv) intra-day liquidity position management; and (v) stress testing.

In June 2014, the RBI issued guidelines in relation to liquidity coverage ratio ( LCR ), liquidity risk monitoring tools and LCR disclosure standards pursuant to the publication of the Basel III: The Liquidity Coverage Ratio and liquidity risk monitoring tools in January 2013 and the Liquidity Coverage Ratio Disclosure Standards in January 2014 by the BCBS. The objective of the LCR standard is to ensure that a bank maintains an adequate level of unencumbered high quality liquid assets which could be converted into cash to meet its liquidity needs for a 30 calendar day time horizon under a significantly severe liquidity stress scenario. The LCR requirement of 100% is being implemented in a phased manner over a period of four years, with a minimum requirement of 60% effective January 1, 2015.

**Foreign Currency Dealership**

The RBI has granted us a full-fledged Authorized Dealers License to deal in foreign exchange through our designated branches. Under this license, we have been granted permission to: engage in foreign exchange transactions in all currencies; open and maintain foreign currency accounts abroad; raise foreign currency and rupee-denominated deposits from non-resident Indians; grant foreign currency loans to on-shore and off-shore corporations; open documentary credits; grant import and export loans; handle collection of bills and funds transfer services; issue foreign currency guarantees; and enter into derivative transactions and risk management activities that are incidental to our normal functions authorized under our organizational documents and as permitted under the provisions of the Banking Regulation Act.

Our foreign exchange operations are subject to the guidelines contained in the Foreign Exchange Management Act, 1999 (Foreign Exchange Management Act). As an authorized dealer, we are, as required, enrolled as a member of the Foreign Exchange Dealers Association of India, which prescribes the rules relating to the foreign exchange business in India.

The RBI from time to time has simplified the reporting requirements for holdings of and dealings in all foreign currencies by authorized dealers like the Bank; the last such rationalization was made by the RBI by way of a circular dated August 10, 2017.

Simplified hedging facility guidelines were issued by the RBI by way of a circular dated November 9, 2017, to simplify the process for hedging exchange rate risk by reducing documentation requirements, avoiding prescriptive stipulations regarding products, purpose and hedging flexibility, and to encourage a more dynamic and efficient hedging culture. These guidelines stipulate operational mechanism and guidelines for resident and non-resident entities, other than individuals, for hedging exchange rate risk on transactions, contracted or anticipated, with respect to any Over the Counter ( OTC ) derivative or Exchange Traded Currency Derivative (ETCD) permitted under the Foreign Exchange Management Act, 1999 ( FEMA ). Additionally, different facilities have been provided for hedging trade exposures (i.e. currency risks arising out of genuine trade transactions involving exports from and imports to India), invoiced in Indian Rupees in India, by way of the RBI Circular dated October 12, 2017.

We are required to determine our limits on open positions and maturity gaps in accordance with RBI guidelines and within limits approved by the RBI. Further, we are permitted to hedge foreign currency loan exposures of Indian corporations in the form of interest rate swaps, currency swaps and forward rate agreements, subject to certain conditions.

### **Setting Up Wholly Owned Subsidiaries by Foreign Banks**

In November 2013, the RBI released its framework for establishing wholly owned subsidiaries of foreign banks in India, which aims to tighten regulatory control and encourage foreign banks to convert their existing branches into wholly owned subsidiaries.

Key features of the framework include:

requiring certain foreign banks, including banks with complex structures and banks belonging to jurisdictions which: (i) do not have adequate disclosure requirements; or (ii) have legislation which give preferential treatment to deposits of the home country in a winding up proceeding, to set up a wholly owned subsidiary in order to enter the Indian market;

permitting foreign banks which do not fall under the above categories to either set up a branch office or a wholly owned subsidiary;

offering near national treatment to wholly owned subsidiaries of foreign banks, subject to certain conditions;

requiring newly incorporated wholly owned subsidiaries to have an initial minimum paid-up voting equity capital of 5 billion rupees. In the case of existing branches of foreign banks which wish to convert into a wholly owned subsidiary, it must have a minimum net worth of 5 billion rupees;

**Table of Contents**

requiring at least 50% of the board of directors of wholly owned subsidiaries to be Indian nationals, non-resident Indians or persons of Indian origin; and

mandating that wholly owned subsidiaries comply with the priority sector lending requirements applicable to domestic commercial banks.

## **Table of Contents**

### **Statutes Governing Foreign Exchange and Cross-Border Business Transactions**

Foreign exchange and cross border transactions undertaken by banks are subject to the provisions of the Foreign Exchange Management Act. All banks are required to monitor the transactions in all non-resident accounts to prevent money laundering. These transactions are governed by the provisions of the Foreign Exchange Management Act, and the PML Act.

In terms of the guidelines prescribed by the RBI (last updated on November 9, 2017) (the Inter-Bank Dealings Guidelines ), overseas foreign currency borrowings by a bank in India (including overdraft balances in nostro accounts not adjusted within five days) should not exceed 100.0% of its unimpaired Tier I capital or US\$ 10 million (or its equivalent), whichever is higher. The aforesaid limit applies to the aggregate amount availed of by all the offices and branches in India from all their branches and correspondents abroad and includes overseas borrowings in gold for funding domestic gold loans.

The following borrowings would continue to be outside the above limit:

1. overseas borrowing by banks for the purpose of financing export credit subject to certain conditions prescribed by the RBI;
2. capital funds raised or augmented by the issue of Innovative Perpetual Debt Instruments and Debt Capital Instruments in foreign currency;
3. subordinated debt placed by head offices of foreign banks with their branches in India as Tier II capital; and
4. any other overseas borrowing with the specific approval of the RBI.

Under the Inter-Bank Dealings Guidelines, AD category I banks are permitted to borrow from international/multilateral FIs without approaching the RBI on a case-by-case approval. Such FIs shall include: (i) international/multilateral FIs of which the Government is a shareholding member; (ii) FIs which have been established by more than one government; or (iii) FIs which have shareholding by more than one government and other international organizations. However, all such borrowings should be for the purpose of general banking business and not for capital augmentation.

### **Cyber Security Frameworks in Banks**

In its circular dated June 2, 2016, the RBI directed banks to formulate a cyber security policy duly approved by their board of directors by September 30, 2016, to combat cyber threats. This policy is required to be distinct from banks broader information technology/information security policy.

### **Special Provisions of the Banking Regulation Act**

#### ***Prohibited Business***

Section 6 of the Banking Regulation Act specifies the business activities in which a bank may engage. Banks are prohibited from engaging in business activities other than the specified activities.

***Reserve Fund***

Any bank incorporated in India is required to create a reserve fund to which it must transfer not less than 25.0% of the profits of each year before any dividend is declared. Banks are required to take prior approval from the RBI before appropriating any amount from the reserve fund or any other free reserves. The Government may, on the recommendation of the RBI, exempt a bank from requirements relating to its reserve fund.

***Restrictions on Payment of Dividends***

The Banking Regulation Act requires that a bank pay dividends on its shares only after all of its capital expenses (including preliminary expenses, organization expenses, share selling commissions, brokerage on public offerings, amounts of losses and any other items of expenditure not represented by tangible assets) have been completely written off. The Government may exempt banks from this provision by issuing a notification on the recommendation of the RBI.

**Table of Contents**

Banks that comply with the following prudential requirements are eligible to declare dividends:

capital adequacy ratio must be at least 9.0% for the preceding two completed years and the accounting year for which the bank proposes to declare a dividend;

net non-performing assets must be less than 7.0% of advances. In the event a bank does not meet the above capital adequacy norm, but has capital adequacy of at least 9.0% for the fiscal year for which it proposes to declare a dividend it would be eligible to declare a dividend if its net non-performing asset ratio is less than 5%;

the bank has complied with the provisions of Sections 15 and 17 of the Banking Regulation Act;

the bank has complied with the prevailing regulations/guidelines issued by the RBI, including creating adequate provisions for the impairment of assets and staff retirement benefits and the transfer of profits to statutory reserves;

dividends should be payable out of the current year's profits; and

the RBI has not placed any explicit restrictions on the bank for declarations of dividends.

Banks which comply with the above prudential requirements can pay dividends subject to compliance with the following conditions:

the dividend payout ratio (calculated as a percentage of dividends payable in a year (excluding dividend tax) to net profit during the year) should not exceed 40.0%. The RBI has prescribed a matrix of criteria linked to the capital adequacy ratio and the net non-performing assets ratio in order to ascertain the maximum permissible range of the dividend payout ratio; and

if the financial statements for which the dividend is declared have any audit qualifications which have an adverse bearing on the profits, the same should be adjusted while calculating the dividend payout ratio.

In case the profit for the relevant periods includes any extra-ordinary profits/income, the payout ratio shall be computed after excluding such extra-ordinary items for compliance with the prudential payout ratio.

In addition to the above, the master circular on Basel III Capital Regulations as amended and updated from time to time, also regulates the distribution of dividends by banks. The circular provides that the dividend distribution can be made by a bank only through the current year's profit. It also requires the banks to maintain a capital conservation buffer outside the period of stress which can be drawn down if losses are incurred during a stressed period. One of the ways in which the banks can build the capital conservation buffer is by reducing the dividend payments. In case of shortfall in the prescribed capital conservation buffer, dividend payment restrictions would be imposed on the banks

as per the conditions of the Basel III regulations. The circular further provides that perpetual non-cumulative preference shares and perpetual debt instruments issued by a bank for inclusion in the additional Tier I capital of the bank, may have a dividend stopper arrangement to stop dividend payments on common shares in the event the holders of additional Tier I instruments are not paid dividend or coupon.

***Restriction on Share Capital and Voting Rights***

Banks were earlier permitted to issue only ordinary shares. In January 2013, the Banking Regulation Act was amended to, *inter alia*, permit banks to also issue preference shares. However, guidelines governing the issuance of preference shares are yet to be issued. The amended Banking Regulation Act also permits the RBI to increase the cap on the voting rights of a single shareholder of a private bank from the existing cap of 10.0% to 26.0% in a phased manner. The RBI has issued the Ownership in Private Sector Banks, Directions, 2016, which state that the voting rights in private sector banks shall be limited to the level notified by the RBI from time to time and that the current ceiling on voting rights is 15%.

***Restriction on Transfer of Shares***

RBI approval is required before a bank can register the transfer of shares to an individual or group which acquires 5.0% or more of its total paid-up capital.

**Table of Contents**

***Regulatory Reporting and Examination Procedures***

The RBI is empowered under the Banking Regulation Act to inspect the books of accounts and the other operations of a bank. The RBI monitors prudential parameters at regular intervals. The findings of these inspections are provided to banks, which are required to comply with the actions recommended in order to correct any discrepancies in their operations as contained in the inspection findings within a stipulated time frame. Further, banks are required to keep the inspection report confidential as per the instructions issued by the RBI. To this end and to enable off-site monitoring and surveillance by the RBI, banks are required to report to the RBI on financial and operating measures such as:

assets, liabilities and off-balance sheet exposures;

the risk weighting of these exposures, the capital base and the capital adequacy ratio;

asset quality;

concentration of exposures;

connected and related lending and the profile of ownership, control and management; and

other prudential parameters.

The RBI also conducts periodic on-site inspections of matters relating to the bank's capital, asset quality, management, earnings, liquidity and systems and controls on an annual basis. We have been subjected to on-site inspection by the RBI at yearly intervals. The inspection report, along with the report on actions taken by us, has to be placed before our Board of Directors. On approval by our Board, we are required to submit the report on actions taken by us to the RBI. The RBI also discusses the findings of the inspection with our management team along with members of the Audit Committee of our Board.

The RBI also conducts on-site supervision of selected branches of banks with respect to their general operations and foreign exchange related transactions.

The existing supervisory framework has been modified towards establishing a risk based supervision framework which envisages continuous monitoring of banks through robust offsite reports to the RBI coupled with need-based on-site inspection. We have been subject to supervision under this framework with effect from fiscal 2014.

***Penalties***

The RBI is empowered under the Banking Regulation Act, to impose penalties on banks and their employees in case of infringement of any provision of the Act. The penalty may be a fixed amount or may be related to the amount involved in any contravention of the regulations. The penalty may also include imprisonment.

In March 2013, there were certain allegations published in the media against us and other banks in the private sector. We investigated, as a matter of priority, if any breach of the KYC and AML guidelines specified by the RBI had occurred. The RBI also conducted a scrutiny of our books of accounts, internal control, compliance systems and processes during March and April 2013. The scrutiny did not reveal any incident of money laundering. However, the RBI discovered certain irregularities and violations, namely, non-observance of certain safeguards in respect of arrangement of at par payment of checks drawn by cooperative banks, exceptions in periodic review of risk profiling of account holders, non-adherence to KYC rules for walk-in customers (non-customers) including for sale of third party products, sale of gold coins for cash in excess of Rs. 50,000 and non-submission of proper information required by the RBI. Based on its assessment, the RBI imposed on us a monetary penalty of Rs. 45 million in June 2013, which we paid. A press release dated July 15, 2013 issued by the RBI states that a similar scrutiny was also conducted at the offices of 29 other banks during April 2013. The RBI levied a penalty of Rs. 495.1 million on 22 of these banks and issued cautionary letters to seven banks.

**Table of Contents**

Further, in this regard, the FIU, in January 2015, levied a fine on us of Rs. 2.6 million relating to our failure to detect and report attempted suspicious transactions. We filed an appeal against the order before the appellate tribunal stating that there were only roving enquiries made by the reporters of the media and there were no instances of any attempted suspicious transactions. Pursuant to the directions of the appellate tribunal, the Bank created a fixed deposit of Rs. 2.6 million in favor of FIU. In June 2017, the appellate tribunal, dismissed the penalty levied by the FIU and observed that in accordance with the provisions of the section 13(2)(a) of the PMLA, 2002 a warning was required to be given to the Bank, and that the prescribed matter did not fall within section 13(2)(d) of the PMLA, 2002 (pursuant to which a monetary penalty can be imposed on failure to comply with certain obligations under the PMLA, 2002) as mentioned by the FIU. The appellate tribunal further ordered that the fixed deposit created by the Bank as per the interim order of the appellate tribunal be released forthwith.

During fiscal 2014, the RBI carried out a scrutiny of a corporate borrower's loan and current accounts maintained with 12 Indian banks, including us. The RBI issued show cause notices to these banks in March 2014. Based on its assessment, the RBI, in its press release dated July 25, 2014, levied penalties totaling Rs. 15 million on the 12 Indian banks. The penalty levied on us, which has been paid, was Rs. 0.5 million on the grounds that we failed to exchange information about the conduct of the corporate borrower's account with other banks at intervals as prescribed in the RBI guidelines on Lending under Consortium Arrangement/Multiple Banking Arrangements.

In October 2015, there were media reports about irregularities in advance import remittances in various banks, further to which the RBI had conducted a scrutiny of the transactions carried out by us. In April 2016, the RBI issued a show cause notice to us to which we submitted our detailed response. After considering our submissions, the RBI has imposed a penalty of Rs. 20 million on us notified to us through its letter dated July 19, 2016, which we paid, on account of pendency in receipt of bills of entry relating to advance import remittances made and lapses in adhering to KYC/AML guidelines in this respect. We have implemented a comprehensive corrective action plan, to strengthen our internal control mechanisms so as to ensure that such incidents do not recur. See *Risk Factors We have previously been subject to penalties imposed by the RBI. Any regulatory investigations, fines, sanctions, and requirements relating to conduct of business and financial crime could negatively affect our business and financial results, or cause serious reputational harm.*

By way of a circular dated October 12, 2017, the RBI specifically levied penal interest for delayed reporting/ wrong reporting/non-reporting of currency chest transactions and inclusion of ineligible amounts in currency chest balances. The intention behind the levy of penal interest is to inculcate discipline among banks so as to ensure prompt/correct reporting, and so that pleas by banks for waiver of penal interest on grounds that delayed/wrong/non-reporting does not result in utilization of RBI's funds or shortfall in the maintenance of CRR or SLR. On similar lines, by way of an additional circular dated October 12, 2017, the RBI revised the scheme of penalties for bank branches based on performance in rendering customer service to the members of public, to ensure that all bank branches provide better customer service to members of public with regard to exchange of notes and coins.

***Assets to be maintained in India***

Every bank is required to ensure that its assets in India (including import-export bills drawn on/in India and the RBI approved securities, even if the bills and the securities are held outside India) are not less than 75% of its demand and time liabilities in India.

***Secrecy Obligations***

Banks' obligations relating to maintaining secrecy arise out of regulatory prescription and also common law principles governing the relationship between them and their customers. Banks cannot disclose any information to third parties

except under certain limited and clearly defined circumstances as detailed in the guidelines issued by the RBI.

***Subsidiaries and Other Investments***

Banks require the prior permission of the RBI to incorporate a subsidiary. Banks are required to maintain an arms-length relationship in respect of their subsidiaries and are prohibited from taking actions such as taking undue advantage in borrowing or lending funds, transferring or selling or buying securities at rates other than market rates, giving special consideration for securities transactions, overindulgence in supporting or financing subsidiaries and financing its clients through them when it itself is not able or not permitted to do so. Banks and their subsidiaries have to observe the prudential standards stipulated by the RBI, from time to time, in respect of their underwriting commitments.

**Table of Contents**

Banks also require the prior specific approval of the RBI to participate in the equity of financial services ventures including stock exchanges and depositories, notwithstanding the fact that such investments may be within the ceiling prescribed under Section 19(2) of the Banking Regulation Act. Further, investment by a bank in its subsidiaries, financial services companies or financial institutions should not exceed 10.0% of its paid-up capital and reserves. Investments by banks in companies which are not its subsidiaries and are not financial services companies would be subject to a limit of 10% of the investee company's paid up share capital or 10% of the bank's paid up share capital and reserves, whichever is less. Any investment above this limit will be subject to the RBI approval except as provided otherwise. Equity investments in any non-financial services company held by (a) a bank; (b) bank's subsidiaries, associates or joint ventures or entities directly or indirectly controlled by the bank; and (c) mutual funds managed by Asset Management Companies controlled by the bank should in the aggregate not exceed 20% of the investee company's paid-up share capital. Further, a bank's equity investments in subsidiaries and other entities that are engaged in financial services activities together with equity investments in entities engaged in non-financial services activities should not exceed 20% of the bank's paid-up share capital and reserves.

***Introduction of Legal Entity Identifier for Large Corporate Borrowers***

Pursuant to the Statement on Developmental and Regulatory Policies dated November 2, 2017, the RBI decided to introduce the Legal Entity Identifier (LEI) system for all borrowers of banks having total fund based and non-fund based exposure of Rs. 5 crore and above in a phased manner (and for their parent entity, as well as all subsidiaries and associates). The LEI is a 20-digit unique code to identify parties to financial transactions worldwide. Borrowers who do not obtain LEI as per the schedule are not to be granted renewal/enhancement of credit facilities. A separate roadmap for borrowers having exposure between Rs. 5 crore and up to Rs. 50 crore has also been announced to be issued by RBI.

**Guidelines for Merger/Amalgamation of Private Sector Banks**

The RBI issued detailed guidelines in May 2005 on the merger or amalgamation of private sector banks and for the amalgamation of a NBFC with a banking company. The guidelines lay down the process for a merger proposal, the determination of swap ratios, disclosures, the stages at which the board of directors will get involved in the merger process and norms of buying and selling of shares by the promoters before and during the merger process.

In April 2016, the RBI issued the Reserve Bank of India (Amalgamation of Private Sector Banks) Directions, 2016. The new directions are substantially the same as the 2005 guidelines mentioned above.

**Appointment and Remuneration of the Chairman, the Managing Director and Other Directors**

Banks require the prior approval of the RBI to appoint their Chairman and Managing Director and any other directors and to fix their remuneration. The RBI is empowered to remove the appointee on the grounds of public interest or the interest of depositors or to ensure the proper management of the bank. Further, the RBI may order meetings of the board of directors of banks to discuss any matter in relation to the bank, appoint observers to these meetings and in general may make changes to the management as it may deem necessary and can also order the convening of a general meeting of the company to elect new directors.

In January 2012, the RBI issued revised guidelines relating to salary and other remuneration payable to whole time directors, chief executive officers and other risk takers of new private sector banks. With these guidelines, the RBI aims to achieve effective governance of compensation, alignment of compensation with prudent risk-taking and require banks to make appropriate disclosures in their financial statements. Banks are required to formulate and adopt a comprehensive compensation policy in line with the guidelines covering all their employees and conduct annual

review thereof. The policy should cover all aspects of the compensation structure such as fixed pay, perquisites, bonus, variable pay deferrals, guaranteed pay, severance package, stock, pension plan and gratuity. These guidelines became effective from the fiscal year 2012-2013. The guidelines also state that private sector banks would be required to obtain regulatory approval for grant of remuneration to whole time directors/chief executive officers in terms of Section 35B of the Banking Regulation Act, on a case-to-case basis. In June 2015, the RBI issued guidelines for compensation of non-executive directors of private sector banks. The guidelines required the banks to formulate and adopt a comprehensive compensation policy for the non-executive directors (other than the part-time non-executive Chairman) in accordance with the Companies Act, 2013. The policy may provide for payment of compensation in the form of profit related commissions (not exceeding Rs. 1.0 million per annum for each director), sitting fees and reimbursement of expenses for participation in the Board and other meetings.

### **Regulations and Guidelines of the SEBI**

SEBI was established in 1992 in accordance with the provisions of the Securities and Exchange Board of India Act, 1992 to protect the interests of public investors in securities and to promote the development of, and to regulate, the Indian securities market including all related matters. We are subject to SEBI regulations in respect of capital issuances as well as some of our activities, including acting as agent for collecting subscriptions to public offerings of securities made by other Indian companies, underwriting, custodial, depository participant, and investment banking and because our equity shares are listed on Indian stock exchanges. These regulations provide for registering with SEBI and the functions, responsibilities and the code of conduct applicable for each of these activities.

---

## **Table of Contents**

In June 2017, SEBI constituted a committee under the chairmanship of Mr. Uday Kotak (the Kotak Committee), to consult on corporate governance. The Kotak Committee recommended amendments to regulations in order to better align Indian corporate governance norms with global best practices. SEBI in its board meeting on March 28, 2018 accepted most of these recommendations.

### **Foreign Ownership Restriction**

Aggregate foreign investment from all sources, in a private sector bank is permitted up to 49% of the paid up capital under the automatic route. This limit can be increased up to 74% of the paid up capital with prior approval from the FIPB. Pursuant to a letter dated February 4, 2015, FIPB has approved foreign investment in the Bank up to 74% of its paid up capital. The approval is subject to examination by the RBI for compounding on the change of foreign shareholding since April 2010. *See Risk Factors Foreign investment in our shares may be restricted due to regulations governing aggregate foreign investment in the Bank's paid-up equity share capital.* On February 16, 2017, the RBI lifted the restriction on the purchase of the equity shares of the Bank by foreign investors, since the foreign shareholding in the Bank was below the maximum prescribed percentage of 74%. The RBI notified by press release on February 17, 2017 and by separate letter to us dated February 28, 2017 that the foreign shareholding in all forms in the Bank crossed the said limit of 74%. This was due to secondary market purchases of the Bank's equity shares during this period. Consequently, the RBI re-imposed the restrictions on the purchase of the Bank's equity shares by foreign investors. Further, SEBI has also enquired regarding the measures that the Bank has taken and will take in respect of breaches of the maximum prescribed percentage of foreign shareholding in the Bank, by its letter dated March 9, 2018. As of March 31, 2018, foreign investment in the Bank, including the shareholdings of HDFC Limited and its subsidiaries, constituted 72.62% of the paid-up capital of the Bank

On May 24, 2017, the Government announced its approval to phase out of the FIPB. It is proposed that administrative ministries or departments be allowed to process applications for FDI requiring government approval in consultation with the Department of Industrial Policy and Promotion (DIPP), which will also issue the Standard Operating Procedure (SOP) for processing of applications and the decision of the Government under the extant FDI policy.

The aggregate shareholding by foreign private investors/foreign institutional investors under portfolio investment schemes through stock exchanges may not exceed 49.0% of our paid-up equity share capital and individual shareholding of an FPI/FII must be below 10% of our paid-up equity share capital. Further, as per the existing policy of the RBI, any allotment or transfer of shares which will take the aggregate shareholding of an individual or a group to an equivalent of 5.0% or more of our paid-up capital would require the prior acknowledgement of the RBI before we can affect the allotment or transfer of shares. Foreign banks are permitted to have presence in India either by opening branches or through wholly owned subsidiaries but not both.

### **Moratorium, Reconstruction and Amalgamation of Banks**

A bank can apply to the high court for the suspension of its business. The high court, after considering the application of the bank, may order a moratorium staying commencement of an action or proceedings against the relevant banking company for a maximum period of six months. During such period of moratorium, if the RBI is satisfied that it is: (a) in the public interest; or (b) in the interest of the depositors; or (c) in order to secure the proper management of the bank; or (d) in the interests of the banking system of the country as a whole, it may prepare a scheme for the reconstruction of the bank or amalgamation of the bank with any other bank. In circumstances entailing reconstruction of the bank or amalgamation of the bank with another bank, the RBI would invite suggestions and objections on the draft scheme prior to placing the scheme before the Government for its sanction. The Government may sanction the scheme with or without modifications. The law does not require consent of the shareholders or creditors of such banks.

## Special Status of Banks in India

The special status of banks is recognized under various statutes including the Sick Industrial Companies (Special Provisions) Act, 1985 (the SICA ), Recovery of Debts Due to Banks and Financial Institutions Act, 1993 (the DRT Act ) and the SARFAESI Act. As a bank, we are entitled to certain benefits under the DRT Act which provide for the establishment of Debt Recovery Tribunals for expeditious adjudication and recovery of debts due to any bank or Public Financial Institution or to a consortium of banks and Public Financial Institutions. Under the DRT Act, the procedures for recovery of debt have been simplified and indicative time frames have been fixed for speedy disposal of cases and no court or other authority can exercise jurisdiction in relation to matters covered by this Act, except the higher courts in India in certain circumstances. The SICA provides for reference of sick industrial companies to the Board for Industrial and Financial Reconstruction (the BIFR ). Under the SICA, other than the board of directors of a company, a scheduled bank (where it has an interest in the sick industrial company by any financial assistance or obligation, rendered by it or undertaken by it) may refer the company to the BIFR. The SICA has been repealed by the Sick Industrial Companies (Special Provisions) Repeal Act, 2003 (the SICA Repeal Act ). The Ministry of Finance has notified the SICA Repeal Act, and section 4(b) of the SICA Repeal Act came into force on December 1, 2016. Consequently, the SICA stands repealed and the BIFR and Appellate Authority for Industrial and Financial Reconstruction ( AAIFR ) have been dissolved.

The SARFAESI Act focuses on improving the rights and simplifying the procedures for enforcement of security interest of banks and financial institutions and other specified secured creditors as well as asset reconstruction companies by providing that such secured creditors can take over management control of a borrower company upon default and/or sell assets without the intervention of courts, in accordance with the provisions of the SARFAESI Act. It also provides the legal framework for the securitization and reconstruction of financial assets.

**Table of Contents****The Insolvency and Bankruptcy Code, 2016**

Banks, as creditors, will benefit from the Insolvency and Bankruptcy Code, 2016 (the Insolvency and Bankruptcy Code), which came into effect on December 1, 2016. The Insolvency and Bankruptcy Code is a comprehensive piece of legislation that provides for the efficient and timely resolution of insolvency. It amends 11 laws, including the Companies Act, 2013, the SARFAESI Act and the Recovery of Debts Due to Banks and Financial Institutions Act, 1993. It provides for insolvency resolution processes for companies and individuals, and requires that such processes be completed within 180 days. As per the Insolvency and Bankruptcy Code, the insolvency process can end under either of two circumstances: (i) when the creditors decide to evolve a resolution plan or sell the assets of the debtor, or (ii) when the 180-day time period for negotiations has come to an end. In case a plan cannot be negotiated during the time limit, the assets of the debtor will be sold to repay the debtor's outstanding dues. The proceeds from the sale of assets will be distributed based on an order of priority specified under the Insolvency and Bankruptcy Code.

On June 13, 2017, the RBI announced the constitution of an Internal Advisory Committee (the IAC) to focus on large stressed accounts. The IAC recommended 12 accounts totaling to approximately 25% of the current gross NPAs of the banking system for immediate reference under the Insolvency and Bankruptcy Code.

**The Banking Regulation (Amendment) Act 2017**

The Government of India has recently promulgated the Banking Regulation (Amendment) Act, 2017, which is deemed to have come into force on May 5, 2017. This amendment inserts two new sections in the Banking Regulation Act, 1949. The sections enable the Government to authorize the RBI to direct banking companies to resolve specific stressed assets by initiating an insolvency resolution process, where required. The RBI has also been empowered to issue other directions for resolution, and appoint or approve for appointment, authorities or committees to advise banking companies for stressed asset resolution.

**Credit Information Bureau**

The Parliament of India has enacted the Credit Information Companies (Regulation) Act, 2005, pursuant to which every credit institution, including a bank, has to become a member of a credit information bureau and furnish to it such credit information as may be required of the credit institution by the credit information bureau about persons who enjoy a credit relationship with it. Other credit institutions, credit information bureaus and such other persons as the RBI specifies may access such disclosed credit information.

**Regulations governing international branches and representative offices**

We have overseas banking branches in Bahrain, Hong Kong and the Dubai International Financial Centre (DIFC). We have one representative office each in Dubai-UAE, Abu Dhabi-UAE and Nairobi-Kenya. Our branch in Bahrain is regulated by the Central Bank of Bahrain, and has been granted a license designating it as a wholesale bank branch. The activities that can be carried out from the Bahrain branch are deposit taking, providing credit, dealing in financial instruments as principal, dealing in financial instruments as agent, managing financial instruments, operating a collective investment undertaking, arranging deals in financial instruments, advising on financial instruments and issuing / administering means of payment. Our branch in Hong Kong is a full service branch and is regulated by the Hong Kong Monetary Authority. The branch is permitted to undertake banking business in that jurisdiction with certain restrictions. In August 2014, we opened a branch in the DIFC to provide financial services covering arrangement of credit or deals in investments, advising on financial products or credit and arranging custodian services. The activities cater to the requirements of non-resident Indians and Indian corporates overseas. The branch is regulated by the Dubai Financial Services Authority.

Our representative offices in Dubai and Abu Dhabi, UAE are regulated by the Central Bank of UAE and our representative office in Nairobi, Kenya is regulated by the Central Bank of Kenya.

In June 2017, we opened a branch at the International Financial Service Centre at GIFT City in Gandhinagar, Gujarat, India. This branch is considered a foreign branch by RBI, and offers products such as trade credits, foreign currency term loans (including external commercial borrowings) and derivatives to hedge loans.

---

**Table of Contents****EXCHANGE CONTROLS****Restrictions on Conversion of Rupees**

There are restrictions on the conversion of rupees into dollars. Before February 29, 1992, the RBI determined the official value of the rupee in relation to a weighted basket of currencies of India's major trading partners. In the February 1992 budget, a new dual exchange rate mechanism was introduced by allowing conversion of 60.0% of the foreign exchange received on trade or by current account at a market-determined rate and the remaining 40.0% at the official rate. All importers were, however, required to buy foreign exchange at the market rate, except for certain priority imports. In March 1993, the exchange rate was unified and allowed to float. In February 1994 and again in August 1994, the RBI announced relaxations in payment restrictions in the case of a number of transactions. Since August 1994, the Government of India has substantially complied with its obligations owed to the International Monetary Fund, under which India is committed to refrain from using exchange restrictions on current international transactions as an instrument in managing the balance of payments. Effective July 1995, the process of current account convertibility was advanced by relaxing restrictions on foreign exchange for various purposes, such as foreign travel and medical treatment. The Government has also, since 1999, relaxed restrictions on capital account transactions by resident Indians. For example, the RBI permits persons resident in India to remit monies outside India for any permissible current or capital account transaction or a combination of both. The limit for such remittances varies: it has been increasing from 2000 and was US\$ 200,000 per financial year, but was reduced to US\$ 75,000 in September 2013 for exchange control purposes. As a result of stability in the foreign exchange market, this limit was enhanced to US\$125,000 in June 2014 and, as of June 2015, has been further increased to US\$250,000 per person per year.

**Restrictions on Sales of the Equity Shares Underlying the ADSs and Repatriation of Sale Proceeds**

Under the laws of India, ADSs issued by Indian companies to non-residents are freely transferable outside of India. Similarly, RBI approval is not required for the sale of equity shares underlying ADSs by a non-resident of India to a person resident in India, subject to reporting requirements and the applicable pricing norms if the shares are not sold on a recognized Indian exchange. However, RBI guidelines relating to the acquisition by purchase or otherwise of the shares of a private bank will apply to both resident and non-resident investors where such acquisition results in any person owning or controlling 5.0% or more of the paid up capital of the private bank.

The Ministry of Finance, Government of India, has granted general permission for the transfer of ADRs outside India and also permitted non-resident holders of ADRs to surrender ADRs in exchange for the underlying shares of the Indian issuer company. Pursuant to the terms of the deposit agreement, an investor who surrenders ADRs and withdraws shares is permitted to redeposit such shares subject to the total issued ADRs and obtain ADRs at a later time, subject to compliance with applicable regulations.

Unlisted companies (private or public) who were previously prohibited from issuing ADSs on non-Indian stock exchanges if they were not already listed on a stock exchange in India were in October 2013 granted a general permission to list on non-Indian stock exchanges without having to be listed in India, subject to certain conditions.

In April 2014, the provisions of the Companies Act, 2013 regulating the issuance of ADSs by Indian companies came into force. In May 2014, the Government of India accepted the recommendations of the M. S. Sahoo Committee, which had drafted a new scheme to regulate ADRs. On October 21, 2014, the Government notified the Depository Receipts Scheme 2014 ( DR Scheme ), which came into force on December 15, 2014. The relevant provisions of the Companies Act, 2013 and the DR Scheme will only apply to depository receipts (including ADSs) issued after April 1, 2014 and the date of the notification of the DR Scheme, respectively.

## **Two-Way Fungibility of ADSs**

The RBI permits the re-conversion of shares of Indian companies into ADSs, subject to the following conditions:

the Indian company has issued ADSs;

the shares of the Indian company are purchased by a registered stockbroker in India in the name of the depository, on behalf of the non-resident investor who wishes to convert such shares into ADSs;

shares are purchased on a recognized stock exchange;

the shares are purchased with the permission of the custodian of the ADSs of the Indian company and are deposited with the custodian;

the number of shares so purchased does not exceed the ADSs converted into underlying shares, and are in compliance with the sectoral caps applicable under the Foreign Direct Investment regime; and

**Table of Contents**

the non-resident investor, broker, custodian and the overseas depository comply with the provisions of the Depository Receipt Mechanism and the guidelines issued in relation thereto from time to time.

The RBI requires the domestic custodian to ensure compliance with RBI guidelines and to file reports with the RBI from time to time. The domestic custodian is also required to perform, inter alia, the following functions in the context of the two-way fungibility of ADSs as per Indian laws:

provide a certificate to the RBI and the SEBI stating that the sectoral caps for foreign investment in the relevant company have not been breached;

monitor the total number of ADSs that have been converted into underlying shares by non-resident investors;

liaise with the issuer company to verify that the sectoral caps for foreign direct investment, if any, are not being breached; and

file a monthly report about the ADS transactions under the two-way fungibility arrangement with the RBI and the SEBI.

An investor who surrenders an ADS and withdraws equity shares may be entitled to redeposit those equity shares in the depository facility in exchange for ADSs and the depository may accept deposits of outstanding equity shares purchased by a non-resident on the local stock exchange and issue ADSs representing those equity shares. However, in each case, the aggregate number of equity shares re-deposited or deposited by such persons cannot exceed the number of shares represented by ADSs as have been previously cancelled and not already replaced by further newly issued ADSs. The RBI has issued a notification, inter alia, permitting Indian companies to sponsor ADS issues against shares held by their shareholders at a price to be determined by the lead manager. Investors who seek to sell any equity shares in India withdrawn from the depository facility and to convert the rupee proceeds from the sale into foreign currency and repatriate the foreign currency from India will, subject to the foregoing, not have to obtain RBI approval for each transaction.

**Table of Contents****RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES**

The Government of India regulates ownership of Indian companies by non-residents. Foreign investment in Indian securities is generally regulated by the Consolidated Policy on Foreign Direct Investment (the Consolidated FDI Policy ) issued by the Government of India and the Foreign Exchange Management Act, 1999 (the Foreign Exchange Management Act ). The Foreign Exchange Management Act, when read together with the regulations issued in relation thereto by the RBI, permits transactions involving the inflow or outflow of foreign exchange and empowers the RBI to prohibit or regulate such transactions.

The Foreign Exchange Management Act has eased restrictions on current account transactions by non-residents. However, the RBI continues to exercise control over capital account transactions (i.e. those that alter the assets or liabilities, including contingent liabilities, of persons). The RBI has issued regulations under the Foreign Exchange Management Act to regulate the various kinds of capital account transactions, including certain aspects of the purchase and issuance of shares of Indian companies. Amendments to the Foreign Exchange Management Act have been issued (the FEMA Amendments ) as a part of the Finance Act, 2015, which restrict the role of the RBI to regulating capital account transactions relating to debt only. As a result of the amendments, the purchase and issuance of shares of Indian companies will be regulated by the Government of India. The effective date of the FEMA Amendments has not yet been notified. As a result, the Government of India will also have to issue appropriate rules and regulations that will replace the regulations issued by the RBI in relation to the type of capital account transactions that the Government of India will now regulate in accordance with the FEMA Amendments.

Further, on November 7, 2017, the RBI notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2017 (the FEMA Transfer or Issue of Security Regulations 2017 ) to regulate the transfer by, or issue of securities to, persons resident outside India. The FEMA Transfer or Issue of Security Regulations 2017 prescribe that no prior consent and approval is required from the RBI for foreign direct investment ( FDI ) under an automatic route for certain industries within specified sectoral caps. In respect of all industries that do not fall under the automatic route, and in respect of investments under the automatic route, but in excess of the specified sectoral limits, approval may be required from the relevant ministry/ministries of the Government and/or the RBI.

Under the current foreign investment rules, the following restrictions are applicable to non-resident ownership:

**Foreign Direct Investment**

The Government of India has put in place a policy framework on FDI that is embodied in the circular on Consolidated FDI Policy, which is generally updated every year to include the regulatory changes effected in the interim. The Department of Industrial Policy and Promotion ( DIPP ), Ministry of Commerce & Industry, Government of India makes policy pronouncements on FDI through press notes/press releases which are notified by the RBI as amendments to the FEMA Transfer or Issue of Security Regulations 2017. These notifications take effect from the date of issue of the press notes/press releases, unless specified otherwise therein. The procedural instructions are issued by the RBI vide A.P. (DIR Series) Circulars. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases and clarifications that are consolidated in the circular on Consolidated FDI Policy from time to time.

The present Consolidated FDI Policy subsumes and supersedes all press notes, press releases, clarifications and circulars issued by the DIPP that were in force as of August 27, 2017, and reflects the FDI policy as of August 28, 2017. Certain actions such as those listed below require government approval in consultation with the DIPP by way of prior approval from the administrative ministries or departments:

foreign investments, including a transfer of shares, in excess of specified sectoral caps;

transfer of control and/or ownership (as a result of a share transfer and/or new share issuance) pursuant to an amalgamation, merger, or acquisition of an Indian company engaged in an activity having limitations on foreign ownership, currently owned or controlled by resident Indian citizens and Indian companies, which are owned or controlled by resident Indian citizens to a non-resident entity;

foreign investments in a non-operating company which does not have any downstream investments for undertaking activities which are under Government route. Further, as and when such a company commences business or makes downstream investment, it will have to comply with the relevant sectoral conditions on entry route, conditionalities and caps;

foreign investments by an unincorporated entity in certain cases; and

foreign investment by swap of shares for sectors under the Government approval route.

---

**Table of Contents**

On May 24, 2017, the Government announced its approval to phase out the Foreign Investment Promotion Board ( FIPB ), which had been set up to regulate all foreign direct investment into India and whose approval was required for foreign investment in certain sectors, including defense and public sector banks. The DIPP has also issued the Standard Operating Procedure ( SOP ) for processing of applications and the decision of the Government under the existing FDI Policy. The SOP provides a list of administrative ministries and departments competent to grant approval (the Competent Authorities ) in relation to the corresponding sector and the procedure for obtaining such approval. The abolition of the FIPB and the SOP are both set out in the Consolidated FDI Policy dated August 28, 2017.

A person residing outside India or any entity incorporated outside India has general permission to purchase shares, convertible debentures or preference shares of an Indian company subject to certain terms and conditions. Further, a citizen of Bangladesh or Pakistan or any entity incorporated in Bangladesh or Pakistan may, with the prior approval of the Government, purchase shares, convertible debentures or preference shares of an Indian company subject to certain prescribed terms and conditions.

Subject to certain exceptions, FDI and investment by non-resident Indians in Indian companies do not require the prior approval of the Government of India (acting through the concerned ministries or departments, in consultation with the DIPP and the Ministry of Commerce and Industry) or the RBI. The Government of India has indicated that in all cases where FDI is allowed under the automatic route pursuant to the Consolidated FDI Policy, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. For cases that do require an FDI approval, including cases approved by the Government in the past, the monitoring and compliance of conditions shall be done by the concerned administrative ministries and departments. Further, in cases where the approval of the Government of India is obtained, no approval of the RBI is required. In both cases, the prescribed applicable norms with respect to determining the price at which the shares may be issued by the Indian company to the non-resident investor would need to be complied with and a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The foregoing description applies only to an issuance of shares by, and not to a transfer of shares of, Indian companies.

The Government has set up the Foreign Investment Implementation Authority (the FIIA ), in the Ministry of Commerce and Industry. The FIIA has been mandated to (i) translate FDI approvals into implementation, (ii) provide a proactive one-stop after-care service to foreign investors by helping them obtain necessary approvals, (iii) sort out operational problems and (iv) meet with various government agencies to find solutions to foreign investment problems and maximize opportunities through a cooperative approach.

In May 2016, the RBI issued the Reserve Bank of India (Ownership in Private Sector Banks) Directions, 2016. These guidelines prescribe requirements regarding shareholding and voting rights in relation to all private sector banks licensed by the RBI to operate in India. In relation to foreign investment in private sector banks in India, the guidelines state that the foreign investment limits and sub-limits and also computation of foreign investment in private sector banks shall be as specified in the Consolidated FDI Policy and the Foreign Exchange Management Act, and regulations made in relation thereto, as amended from time to time. As per the Consolidated FDI Policy dated August 28, 2017 issued by the Government of India, the following restrictions are applicable to foreign ownership in the Bank:

Foreign investors may own up to 74.0% of the equity shares of a private sector Indian banking company subject to compliance with guidelines issued by the RBI from time to time. FDI up to 49.0% is permitted under the automatic route and FDI above 49.0% and up to 74.0% requires prior approval of the Competent Authorities. It includes FDI, ADSs, Global Depositary Receipts and investments by foreign portfolio

investors ( FPIs ) under the foreign portfolio investment scheme and also by non-resident Indians. In addition, it encompasses shares acquired by subscription in private placements and public offerings and acquisitions of shares from existing shareholders. Aggregate foreign investment in the Bank from all sources is allowed up to a maximum of 74.0% of the paid-up capital of the Bank. At least 26.0% of the paid-up capital would have to be held by Indian residents, except in the case of a wholly-owned subsidiary of a foreign bank.

**Table of Contents**

An FII/FPI may invest in the capital of an Indian banking company in the private sector under the portfolio investment scheme which limits the individual holding of an FII/FPI below 10.0% of the capital of the Indian banking company. The aggregate limit for FII/FPI investment is limited to 24.0% of the capital of the Indian banking company. Subject to a resolution of the board of directors, a special resolution of the shareholders and prior notification to the RBI, this limit may be raised to 74.0% of the total paid-up capital of a private sector banking company. No single non-resident Indian may own more than 5.0% of the total paid-up capital of a private sector banking company and the aggregate limit cannot exceed 10.0% of the total paid-up capital. However, non-resident Indians holdings can be allowed up to 24.0% of the total paid-up capital provided the banking company passes a special resolution of the shareholders to that effect and gives prior notification to the RBI. In addition, overseas corporate bodies (i.e. entities in which non-resident Indians hold at least 60%) are not permitted to invest under the portfolio investment scheme though they may continue to hold investments that have already been made under the portfolio investment scheme until such time as these investments are sold on the stock exchange. The existing individual and aggregate investment limits for an FII or sub-account (being deemed FPIs) in the Bank is 10.0% and 74.0% of the total paid-up equity share capital of the Bank, respectively.

**FPI Regulations**

The Securities and Exchange Board of India (Foreign Portfolio Investors) Regulations, 2014 (the FPI Regulations ) have replaced the Securities and Exchange Board of India (Foreign Institutional Investors) Regulations, 1995 (the FII Regulations ) and the regime for investments by qualified foreign investors ( QFIs ). The FPI Regulations were notified on January 7, 2014 and came into effect on June 1, 2014. In terms of the FPI Regulations, an FII who holds a valid certificate of registration from the SEBI shall be deemed to be a registered FPI until the expiry of the block of three years for which fees have been paid as per the FII Regulations. An FII shall not be eligible to invest as an FII after registering as an FPI under the FPI Regulations.

Further, a QFI could continue to buy, sell or otherwise deal in securities until May 31, 2015 or until the QFI obtained a certificate of registration as FPI, whichever occurred earlier.

The FPI Regulations specify that the shares purchased by a single FPI or an investor group (which means the same set of ultimate beneficial person(s) investing through multiple entities) must be below 10.0% of the issued capital of a company. All existing investments by FIIs/QFIs/sub-accounts are grandfathered, i.e. if an FPI already holds 10.0% of the issued capital of a company, it is not required to divest its existing holdings to comply with the stipulation to hold below 10.0% .

Under the FPI Regulations, an FPI may issue, subscribe to or otherwise deal in offshore derivative instruments ( ODIs ) only if such ODIs are issued (i) to persons that are regulated by an appropriate foreign regulatory authority; and (ii) after compliance with applicable know your client norms. However, unregulated broad based funds, which are classified as Category II FPIs by virtue of their investment manager being appropriately regulated cannot issue, subscribe to or otherwise deal in ODIs, directly or indirectly. Further, no Category III FPI can issue, subscribe to or otherwise deal in ODIs, directly or indirectly. Any ODI issued under the FII Regulations before commencement of the FPI Regulations is deemed to have been issued under the FPI Regulations. On November 24, 2014, the SEBI issued a circular aligning the applicable eligibility and investment norms between the FPI regime and subscription through the ODI route. It has been clarified that an FPI can issue ODIs only to those subscribers who: (i) meet the eligibility criteria that are applicable to Category I FPI and Category II FPI under the FPI Regulations; and (ii) do not have opaque structures , as defined under the FPI Regulations. It has also been clarified that the investment restrictions applicable to FPIs under the FPI Regulations will apply to subscribers of ODIs as well. Existing ODI positions which are not in accordance with the SEBI circular dated November 24, 2014 may continue until the ODI contract expires.

---

**Table of Contents**

In June 2016, the SEBI directed all the issuers of ODIs to identify and verify the beneficial owners in the subscriber entities who hold in excess of 25%, in the case of a company, and 15%, in the case of partnership firms, trusts and unincorporated bodies. ODI issuers are also required to identify and verify the person(s) who control the operations when no beneficial owner is identified based on the materiality threshold. Prescribed documents for verification of the ODI subscribers and the beneficial owners are required to be submitted by the ODI issuers, and the ODI issuers are also required to file suspicious transaction reports in relation to the ODIs issued by it, if any, with the Indian Financial Intelligence Unit. The new guidelines came into effect on July 1, 2016.

Investors in ADSs do not need to seek the specific approval from the Government of India to purchase, hold or dispose of their ADSs. Notwithstanding the foregoing, if a FII, a FPI, non-resident Indian or overseas corporate body were to withdraw its equity shares from the ADS program, its investment in the equity shares would be subject to the general restrictions on foreign ownership.

***Issue of securities through the depository receipt mechanism***

Issue of securities through the depository receipt mechanism by Indian companies is governed by the Companies Act, the Companies (Issue of Global Depository Receipts) Rules, 2014 (the Depository Receipts Rules ) and the Depository Receipts Scheme, 2014 (the DR Scheme ).

The Government of India notified the DR Scheme on October 21, 2014, which came into force on December 15, 2014. Consequently, the Issue of Foreign Currency Convertible Bonds and Ordinary Shares (Through Depository Receipt Mechanism) Scheme, 1993 has been repealed except to the extent relating to foreign currency convertible bonds.

Under the DR Scheme, an Indian company, listed or unlisted, private or public, is permitted to issue securities, including equity shares, through the depository receipt mechanism if such company has not been specifically prohibited from accessing capital markets or dealing in securities. Permissible securities that can be issued by an Indian company through the depository receipt mechanism are securities as defined under the Securities Contracts (Regulation) Act, 1956, which includes, *inter alia*, shares, bonds, derivatives and units of mutual funds, and similar instruments issued by private companies, provided that such securities are in dematerialized form.

An Indian company can issue securities to a foreign depository for the purpose of issuing depository receipts through any mode permissible for the issue of such securities to other investors. The foreign depository can issue depository receipts by way of a public offering or private placement or in any other manner prevalent in the permissible jurisdiction. A permissible jurisdiction is defined as a foreign jurisdiction which is a member of the Financial Action Task Force on Money Laundering and whose securities market regulator is a member of the International Organization of Securities Commissions.

In terms of the DR Scheme, securities can be issued through the depository receipt mechanism up to such a limit that the aggregate underlying securities issued to foreign depositories for issuance of depository receipts along with securities already held by persons resident outside India does not exceed the applicable foreign investment limits prescribed by regulations framed under the Foreign Exchange Management Act. The depository receipts and the underlying securities may be converted into each other subject to the applicable foreign investment limit. It should be noted that the RBI guidelines relating to the acquisition by purchase or otherwise of shares of a private bank will apply to both resident and non-resident investors where such acquisition results in any person owning or controlling 5.0% or more of the paid-up capital of the private bank.

The DR Scheme provides that underlying securities shall not be issued to a foreign depository for issuance of depository receipts at a price which is less than the price applicable to a corresponding mode of issuance to domestic investors.

In terms of the DR Scheme, the foreign depository is entitled to exercise voting rights, if any, associated with the underlying securities whether pursuant to voting instructions from the holder of depository receipts or otherwise. Further, a holder of depository receipts issued against underlying equity shares shall have the same obligations as if it is the holder of the equity shares if it has the right to issue voting instruction.

**MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

The management of **HDFC Bank Limited**, (the Bank) is responsible for establishing and maintaining adequate internal control over financial reporting. The Bank's internal control system was designed to provide reasonable assurance to the Bank's management, its Audit Committee and Board of Directors regarding the preparation and fair presentation of published financial statements.

There are inherent limitations to the effectiveness of any internal control or system of control, however well designed, including the possibility of human error and the possible circumvention or overriding of such controls or systems. Moreover, because of changing conditions, the reliability of internal controls may vary over time. As a result, even effective internal controls can provide no more than reasonable assurance with respect to the accuracy and completeness of financial statements and their process of preparation.

The Bank management assessed the effectiveness of the Bank's internal control over financial reporting as of March 31, 2018. In making this assessment, it has used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control - Integrated Framework (2013). Based on those criteria and our assessment we believe that, as of March 31, 2018, the Bank's internal control over financial reporting was effective.

The Bank's independent public accountant, KPMG, has issued an audit report on the Bank's internal control over financial reporting.

**Report of Independent Registered Public Accounting Firm Internal Control over Financial Reporting**

To the Shareholders and Board of Directors

HDFC Bank Limited

*Opinion on Internal Control Over Financial Reporting*

We have audited HDFC Bank Limited and subsidiaries (the Company) internal control over financial reporting as of March 31, 2018, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2018, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of March 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended March 31, 2018, and the related notes and financial statement schedules 1 to 33 (collectively, the consolidated financial statements), and our report dated July 25, 2018, expressed an unqualified opinion on those consolidated financial statements.

*Basis for Opinion*

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Form 20-F for the year ended March 31, 2018. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

*Definition and Limitations of Internal Control Over Financial Reporting*

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance

with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Shareholders and Board of Directors

HDFC Bank Limited

*Opinion on the Consolidated Financial Statements*

We have audited the accompanying consolidated balance sheets of HDFC Bank Limited and subsidiaries (the Company ) as of March 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended March 31, 2018, and the related notes and financial statement schedules 1 to 33 (collectively, the consolidated financial statements ). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of March 31, 2018 and 2017, and the results of its operations and its cash flows for each of the years in the three-year period ended March 31, 2018, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ( PCAOB ), the Company's internal control over financial reporting as of March 31, 2018, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ( COSO ), and our report dated July 25, 2018 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

*Basis for Opinion*

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

The accompanying consolidated financial statements as of and for the year ended March 31, 2018 have been translated into United States dollars solely for the convenience of the reader. We have audited the translation and, in our opinion, such financial statements expressed in Indian rupee have been translated into United States dollars on the basis set forth in Note 2(y) to the consolidated financial statements.

/s/ KPMG

We have served as the Company's auditor since 2015.

\*Under local regulations, the Bank is required to transfer 25% of its profit after tax (per Indian GAAP) to a non-distributable statutory reserve and to meet certain other conditions in order to pay dividends without prior RBI approval.

See accompanying notes to consolidated financial statements

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****1. Bank overview**

HDFC Bank Limited (the Bank) was incorporated in August 1994 with its registered office in Mumbai, India. The Bank is a banking company governed by India's Banking Regulation Act, 1949. The Bank's shares are listed on the BSE Limited (formerly known as Bombay Stock Exchange Limited) and The National Stock Exchange of India Ltd. Its American Depositary Shares (ADS) are listed on the New York Stock Exchange and its Global Depositary Receipts (GDR) are listed on the Luxembourg Stock Exchange.

The Bank's largest shareholder is Housing Development Finance Corporation Limited (HDFC Limited), which, along with its subsidiaries, owns 20.9% of the Bank's equity as of March 31, 2018. The remainder of the Bank's equity is widely held by the public and by foreign and Indian institutional investors.

The Bank's principal business activities are retail banking, wholesale banking and treasury services. The Bank's retail banking division provides a variety of deposit products as well as loans, credit cards, debit cards, third-party mutual funds and insurance, investment advisory services, depositary services, trade finance, foreign exchange and derivative services and sale of gold bars. Through its wholesale banking operations, the Bank provides loans, deposit products, documentary credits, guarantees, bullion trading, foreign exchange, and derivative products. It also provides cash management services, clearing and settlement services for stock exchanges, tax and other collections for the government, custody services for mutual funds and correspondent banking services. The Bank's treasury group manages its debt securities and money market operations and its foreign exchange and derivative products.

**2. Summary of significant accounting policies***a. Principles of consolidation*

The consolidated financial statements include the accounts of HDFC Bank Limited and its subsidiaries. The Bank consolidates subsidiaries in which, directly or indirectly, it holds more than 50% of the voting rights and/or has control. Entities where the Bank holds 20% to 50% of the voting rights and/or has the ability to exercise significant influence are accounted for under the equity method. These investments are included in other assets and the Bank's proportionate share of income or loss is included in Non-interest revenue, other. The Bank consolidates Variable Interest Entities (VIEs) where the Bank is determined to be the primary beneficiary (see note 2j). All significant inter-company balances and transactions are eliminated on consolidation.

*b. Basis of presentation*

These financial statements have been prepared in accordance with the accounting principles generally accepted in the United States of America (US GAAP). US GAAP differs in certain material respects from accounting principles generally accepted in India, the requirements of India's Banking Regulation Act 1949 and related regulations issued by the Reserve Bank of India (RBI) (collectively Indian GAAP), which form the basis of the statutory general purpose financial statements of the Bank in India. Principal differences, insofar as they relate to the Bank, include: determination of the allowance for credit losses, classification and valuation of investments, accounting for deferred taxes, stock-based compensation, employee benefits, loan origination fees, derivative financial instruments, business combination and the presentation format and disclosures of the financial statements and related notes.

*c. Use of estimates*

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results could differ from these estimates. Material estimates included in these financial statements that are susceptible to change include the allowance for credit losses, the valuation of unquoted investments, other than temporary impairment, valuation of derivatives, stock-based compensation, unrecognized tax benefits and impairment assessment of goodwill.

---

**Table of Contents**

**HDFC BANK LIMITED AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

*d. Cash and cash equivalents*

Cash and cash equivalents comprise of cash, balances due from banks and deposits that have original maturities of 90 days or less.

*e. Customer acquisition costs*

Customer acquisition costs principally consist of commissions paid to third party referral agents who source retail loans and such costs are deferred and amortized as a yield adjustment over the life of the loans. Advertising and marketing expenses incurred to solicit new business are expensed as incurred.

*f. Investments in securities*

Investments consist of securities purchased as part of the Bank's treasury operations, such as government securities and other debt and equity securities, and investments purchased as part of the Bank's wholesale banking operations, such as credit substitute securities issued by the Bank's wholesale banking customers.

Credit substitute securities typically consist of commercial paper and short-term debentures issued by the same customers with whom the Bank has a lending relationship in its wholesale banking business. Investment decisions for credit substitute securities are subject to the same credit approval processes as for loans, and the Bank bears the same customer credit risk as it does for loans extended to those customers. Additionally, the yield and maturity terms are generally directly negotiated by the Bank with the issuer. As the Bank's exposures to such securities are similar to its exposures on its loan portfolio, additional disclosures have been provided on impairment status in note 8 and on concentrations of credit risk in note 12.

All other securities including mortgage and asset-backed securities are actively managed as part of the Bank's treasury operations. The issuers of such securities are either government, public financial institutions or private issuers. These investments are typically purchased from the market, and debt securities are generally publicly rated.

Securities that are held principally for resale in the near term are classified as held for trading (HFT) and are carried at fair value, with changes in fair value recorded in net income.

Debt securities that management has the positive intent and ability to hold to maturity are classified as held to maturity (HTM) and are carried at amortized cost.

Equity securities with readily determinable fair values and all debt securities that are not classified as HTM or HFT are classified as available for sale (AFS) and are carried at fair value. Unrealized gains and losses on such securities, net of applicable taxes, are reported in accumulated other comprehensive income (loss), a separate component of shareholders' equity.

Fair values are based on market quotations where a market quotation is available or otherwise based on present values at current interest rates for such investments.

Transfers between categories are recorded at fair value on the date of the transfer.

*g. Impairment of securities*

Declines in the fair values of held to maturity and available for sale securities below their carrying value that are other than temporary are reflected in net income as realized losses, based on management's best estimate of the fair value of the investment. The Bank conducts a review each year to identify other than temporary declines based on an evaluation of all significant factors. The Bank's review of impairment generally entails identification and evaluation of investments that have indications of possible impairment, analysis of individual investments that have fair values of less than 95% of amortized cost, including consideration of the length of time the investment has been in an unrealized loss position, analysis of evidential matter, including an evaluation of factors or triggers that would or could cause individual investments to have other than temporary impairment and documentation of the results of these analysis, as required under business policies. Estimates of any declines in the fair values of credit substitute securities that are other than temporary are measured on a case-by-case basis together with loans to those customers. The Bank does not recognize an impairment for debt securities if the cause of the decline is related solely to interest rate increase and the Bank does not intend to sell the security and it is not more likely than not that the Bank will be required to sell the security before recovery of its amortized cost basis.

---

**HDFC BANK LIMITED AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

*h. Loans*

The Bank grants retail and wholesale loans to customers.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at their outstanding unpaid principal balances adjusted for an allowance for credit losses.

Interest is accrued on the unpaid principal balance and is included in interest income. Loans are generally placed on non-accrual status when interest or principal payments are past due for a specified period, at which time no further interest is accrued and overdue interest is written off against interest income. Interest income on loans placed on non-accrual status is recognized when received. Loans are returned to accrual status when all principal and interest amounts contractually due are brought current and future payments are reasonably assured. Loans are generally placed on non-accrual status when interest or principal payments are three months past due or if they are considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect scheduled payments of principal or interest when due according to the contractual terms of the loan agreement.

*i. Allowance for credit losses*

The Bank provides an allowance for credit losses based on management's best estimate of losses inherent in the loan portfolio which includes troubled debt restructuring. The allowance for credit losses consists of allowances for retail loans and wholesale loans.

*Retail*

The Bank's retail loan loss allowance consists of specific and unallocated allowances.

The Bank establishes a specific allowance on the retail loan portfolio based on factors such as the nature of the product, delinquency levels or the number of days the loan is past due and the nature of the security available. Additionally the Bank monitors loan to value ratios for loan against securities. The loans are charged off against allowances typically when the account becomes 180 to 1,083 days past due depending on the type of loan. The defined delinquency levels at which major loan types are charged off are 180 days past due for personal loans, credit card receivables, auto loans, commercial vehicle and construction equipment finance, 720 days past due for housing loans and on a customer by customer basis in respect of retail business banking when management believes that any future cash flows from these loans are remote including realization of collateral, if applicable, and where any restructuring or any other settlement arrangements are not feasible.

The Bank also records unallocated allowances for its retail loans by product type. The Bank's retail loan portfolio is comprised of groups of large numbers of small value homogeneous loans. The Bank establishes an unallocated allowance for loans in each product group based on its estimate of the overall portfolio quality, asset growth, economic conditions and other risk factors. The Bank estimates its unallocated allowance for retail loans based on an internal credit slippage matrix, which measures the Bank's historic losses for its standard loan portfolio. Subsequent recoveries, if any, against write-off cases, are adjusted to provision for credit losses in the consolidated statement of

income.

*Wholesale*

The allowance for wholesale loans consists of specific and unallocated components. The allowance for such credit losses is evaluated on a regular basis by management and is based upon management's view of the probability of recovery of loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, factors affecting the industry which the loan exposure relates to and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. Loans are charged off against the allowance when management believes that the loan balance may not be recovered. Subsequent recoveries, if any, against write-off cases, are adjusted to provision for credit losses in the consolidated statement of income.

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Bank grades its wholesale loan accounts considering both qualitative and quantitative criteria. Wholesale loans are considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, the financial condition of the borrower, the value of collateral held, and the probability of collecting scheduled principal and interest payments when due.

The Bank establishes specific allowances for each impaired wholesale loan customer in the aggregate for all facilities, including term loans, cash credits, bills discounted and lease finance, based on either the present value of expected future cash flows discounted at the loan's effective interest rate or the net realizable value of the collateral if the loan is collateral dependent.

Wholesale loans that experience insignificant payment delays and payment shortfalls are generally not classified as impaired but are placed on a surveillance watch list and closely monitored for deterioration. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, market information, and the amount of the shortfall in relation to the principal and interest owed.

The Bank has also established an unallocated allowance for wholesale standard loans based on the overall portfolio quality, asset growth, economic conditions and other risk factors. The Bank estimates its wholesale unallocated allowance based on an internal credit slippage matrix, which measures the Bank's historic losses for its standard loan portfolio.

*j. Sales/transfer of receivables*

The Bank enters into assignment transactions, which are similar to asset-backed securitization transactions through the special purpose entities (SPEs) route, except that such portfolios of receivables are assigned directly to the purchaser and are not represented by pass-through certificates. The Bank also sells finance receivables to SPEs, formerly qualifying special purpose entities (QSPEs) in securitization transactions. Recourse is in the form of the Bank's investment in subordinated securities issued by these SPEs, cash collateral and other credit and liquidity enhancements. The receivables are derecognized in the balance sheet when they are sold and consideration has been received by the Bank. Sales and transfers that do not meet the criteria for surrender of control are accounted for as secured borrowings.

Effective April 1, 2010, upon adoption of ASU 2009-16, the Bank first makes a determination as to whether the securitization entity would be consolidated. Second, it determines whether the transfer of financial assets is considered a sale. Furthermore, former qualifying special purpose entities (QSPEs) are now considered VIEs and are no longer exempt from consolidation. The Bank consolidates VIEs when it has both: (1) power to direct activities of the VIE that most significantly impact the entity's economic performance and (2) an obligation to absorb losses or right to receive benefits from the entity that could potentially be significant to the VIE. The scope conditions examined include whether the entities' equity investment at risk is insufficient to finance the activities without subordinated

financial support and whether the holders of equity lack the characteristics of a financial interest. A controlling financial interest includes characteristics such as ability to make decisions through voting or similar rights, unlimited obligation to absorb the entities expected losses, and unlimited rights to receive the entities expected residual returns.

Gains or losses from the sale of receivables are recognized in the income statement in the period the sale occurs based on the relative fair value of the portion sold and the portion allocated to retained interests, and are reported net of the estimated cost of servicing by the Bank.

Fair values are determined based on the present value of expected future cash flows, using best estimates for key assumptions, such as prepayment and discount rates, commensurate with the risk involved.

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)***k. Property and equipment*

Property and equipment are stated at cost, less accumulated depreciation. Depreciation is provided over the estimated useful lives of fixed assets on a straight-line basis at the following rates:

<b>Type of Asset</b>	<b>Rate of depreciation</b>
Premises	1.63%
Software and systems	20.00%
Equipment and furniture	10.00%-33.33%

For assets purchased and sold during the year, depreciation is provided on a pro rata basis by the Bank and capital advances are included in other assets.

*l. Impairment or disposal of tangible long-lived assets*

Whenever events or circumstances indicate that the carrying amount of tangible long lived assets may not be recoverable, the Bank subjects such long lived assets to a test of recoverability based on the undiscounted cash flows from use or disposition of the asset. Such events or circumstances would include changes in the market, technology obsolescence, adverse changes in profitability or regulation. If the asset is impaired, the Bank recognizes an impairment loss estimated as the difference between the carrying value and the net realizable value.

*m. Income tax*

Income tax expense/benefit consists of the current tax expense and the net change in deferred tax assets or liabilities during the year.

Deferred tax assets and liabilities are recognized for the future tax consequences of differences between the carrying values of assets and liabilities for financial reporting purposes and their respective tax bases, and operating loss and tax credit carryforwards. Deferred tax assets are reduced by a valuation allowance to the amount that is more likely than not to be realized based on management's judgment. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which the deferred tax assets or liabilities are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the income statement in the period of enactment of the change.

Income tax benefits are recognized and measured based upon a two-step model: 1) a tax position must be more-likely-than-not to be sustained based on its technical merits in order to be recognized, and 2) the benefit is measured as the largest amount of that position that is greater than 50 percent likely of being realized upon settlement. The difference between the benefit recognized for a position in accordance with this model and the tax benefit claimed on a tax return is referred to as an unrecognized tax benefit. The Bank's policy is to include interest income, interest expense and penalties on overpayments and underpayment of income taxes within income tax expense in the consolidated statement of income. Interest income on overpayments of income taxes is recognized when the related

matter is resolved.

The Bank accounts for dividend distribution tax in equity in the year in which a dividend is declared.

*n. Revenue recognition*

Interest income from loans and from investments is recognized on an accrual basis using effective interest method when earned except in respect of loans or investments placed on non-accrual status, where it is recognized when received.

Nominal loan application fees are charged which offset the related costs incurred.

Fees and commissions from guarantees issued are amortized over the contractual period of the commitment, provided the amounts are collectible.

---

**Table of Contents**

**HDFC BANK LIMITED AND ITS SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Dividends from investments are recognized when declared.

Realized gains and losses on sale of securities are recorded on the trade date and are determined using the weighted average cost method.

Other fees and income are recognized when earned, which is when the service that results in the income has been provided. The Bank amortizes annual fees on credit cards over the contractual period of the fees.

*o. Foreign currency transactions*

The Bank's functional currency is the Indian Rupee, except for the Bank's foreign branches. Foreign currency transactions are recorded at the exchange rate prevailing on the date of the transaction. Foreign currency denominated monetary assets and liabilities are converted into respective functional currency using exchange rates prevailing on the balance sheet dates. Gains and losses arising on conversion of foreign currency denominated monetary assets and liabilities and on foreign currency transactions are included in the determination of net income under foreign exchange transactions.

For the foreign branches, the assets, liabilities and operations are translated, for consolidation purposes, from functional currency of the foreign branch to the Indian Rupee reporting currency at period-end rates for assets and liabilities and at average rates for operations. The resulting unrealized gains or losses are reported as a component of accumulated other comprehensive income (OCI).

*p. Stock-based compensation*

The fair value of stock-based compensation is estimated on the date of each grant based on a pricing model. For further information, see note 22.

*q. Debt issuance costs*

Issuance costs of long-term debt are amortized over the tenure of the debt.

*r. Earnings per share*

Basic earnings per equity share have been computed by dividing net income by the weighted average number of equity shares outstanding for the period. Diluted earnings per equity share has been computed using the weighted average number of equity shares and dilutive potential equity shares outstanding during the period, using the treasury stock method, except where the result would be anti-dilutive. The Bank also reports basic and diluted earnings per ADS, where each ADS represents three equity shares. Earnings per ADS have been computed as earnings per equity share multiplied by the number of equity shares per ADS. A reconciliation of the number of shares used in computing earnings per share has been provided in note 29.

*s. Segment information*

The Bank operates in three reportable segments, namely retail banking, wholesale banking and treasury services. Segment-wise information has been provided in note 26.

*t. Derivative financial instruments*

The Bank recognizes all derivative instruments, including certain derivative instruments embedded in other contracts, as assets or liabilities in the balance sheet and measures them at fair value. The Bank has not designated any derivatives as hedges. As such, all changes in fair value of derivative instruments are recognized in net income under derivative gain/(loss) in the period of change.

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Bank enters into forward exchange contracts, currency swaps and currency options with its customers and typically transfers such customer exposures in the inter-bank foreign exchange markets. The Bank also enters into such instruments to cover its own foreign exchange exposures. All such instruments are carried at fair value, determined based on market quotations or market-based inputs.

The Bank enters into interest rate swaps for its own account. The Bank also enters into interest rate currency swaps and cross currency interest rate swaps with its customers and typically offsets these risks in the inter-bank market. Such contracts are carried on the balance sheet at fair value, or priced using market determined yield curves.

*u. Business combination*

The Bank accounts for acquired businesses using the purchase method of accounting which requires that the assets acquired and liabilities assumed be recorded at the date of acquisition at their respective fair values. The application of the purchase method requires certain estimates and assumptions, especially concerning the determination of the fair values of the acquired intangible and tangible assets, as well as the liabilities assumed at the date of the acquisition. The judgments made in the context of the purchase price allocation can materially impact the Bank's future results of operations. The valuations are based on information available at the acquisition date. Purchase consideration in excess of bank's interest and the acquiree's net fair value of identifiable assets and liabilities is recognized as goodwill.

*v. Goodwill and other intangibles*

Under applicable accounting guidance, goodwill is reviewed at the reporting unit level for potential impairment at least on an annual basis at the end of the reporting period, or more frequently if events or circumstances indicate a potential impairment. This analysis is a two-step process. The first step of the goodwill impairment test compares the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, then the goodwill of the reporting unit is considered not impaired; however, if the carrying amount of the reporting unit exceeds its fair value, the second step is to be performed. The second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated possible impairment. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination, which is the excess of the fair value of the reporting unit, as determined in the first step, over the aggregate fair values of the individual assets, liabilities and identifiable intangibles as if the reporting unit was being acquired in a business combination. The adjustments to measure the assets, liabilities and intangibles at fair value are for the purpose of measuring the implied fair value of goodwill and such adjustments are not reflected in the consolidated balance sheet. If the implied fair value of goodwill exceeds the goodwill assigned to the reporting unit, there is no impairment. If the goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded for the excess. An impairment loss recognized cannot exceed the amount of goodwill assigned to a reporting unit, and the loss establishes a new basis in the goodwill. Subsequent reversal of goodwill impairment losses is not permitted.

Intangible assets consist of branch network representing contractual and non-contractual customer relationships, customer list, core deposit intangible and favorable leases. These are amortized over their estimated useful lives. Amortization of intangible assets is computed in a manner that best reflects the economic benefits of the intangible

assets as follows:

	<b>Useful lives</b>	<b>Amortization</b>
	<b>(years)</b>	<b>method</b>
Branch network	6	Straight-line
Customer lists	2	Straight-line
Core deposit	5	Straight-line
Favorable leases	1 to 15	Straight-line

F-16

---

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)***w. Recently adopted accounting standards*

In March 2016, the FASB issued ASU 2016-05 *Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships*. The update clarifies the hedge accounting impact when there is a change in one of the counterparties to the derivative contract (i.e., a novation). It clarifies that a change in the counterparty to a derivative contract, in and of itself, does not require the dedesignation of a hedging relationship. An entity will, however, still need to evaluate whether it is probable that the counterparty will perform under the contract as part of its ongoing effectiveness assessment for hedge accounting. Entities have the option to adopt the update on a prospective basis to new derivative contract novations or on a modified retrospective basis. The Bank adopted the provisions of ASU 2016-05 effective April 1, 2017. The adoption of this guidance did not have a material impact on the Bank's consolidated financial position or results of operations or disclosures.

In March 2016, the FASB issued ASU 2016-06 *Derivatives and Hedging (Topic 815): Contingent Put and Call Options in Debt Instruments*. The update clarifies the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. The guidance clarifies the steps required when assessing whether the economic characteristics and risks of call (put) options are clearly and closely related to the economic characteristics and risks of their debt hosts, which is one of the criteria for bifurcating an embedded derivative. Consequently, when a call (put) option is contingently exercisable, an entity does not have to assess whether the event that triggers the ability to exercise a call (put) option is related to interest rates or credit risks. The Bank adopted the provisions of ASU 2016-06 effective April 1, 2017. The adoption of this guidance did not have a material impact on the Bank's consolidated financial position or results of operations or disclosures.

In March 2016, the FASB issued ASU 2016-07 *Investments - Equity Method and Joint Ventures (Topic 323)*. The update eliminates the requirement in Topic 323 that an entity retroactively adopt the equity method of accounting if an investment qualifies for use of the equity method as a result of an increase in the level of ownership or degree of influence. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. The Bank adopted the provisions of ASU 2016-07 effective April 1, 2017. The adoption of this guidance did not have a material impact on the Bank's consolidated financial position or results of operations or disclosures.

In March 2016, the FASB issued ASU 2016-09 *Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*. The update simplifies certain aspects of the accounting for share-based payment award transactions pertaining to accounting for income tax consequences, forfeitures and classification of excess tax benefit on the statement of cash flows. The Bank adopted the provisions of ASU 2016-09 effective April 1, 2017. The adoption of this guidance did not have a material impact on the Bank's consolidated financial position or results of operations or disclosures.

*x. Recently issued accounting pronouncements not yet effective*

In May 2014, the FASB issued ASU No. 2014-09 Revenue from Contracts with Customers (Topic 606) . This update modifies the principles for revenue recognition in transactions involving contracts with customers. On March 17, 2016, the FASB issued Accounting Standards Update No. 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net) , that clarifies how to apply revenue recognition guidance related to whether an entity is a principal or an agent. In April 2016, the FASB issued ASU 2016-10, Revenue from Contracts with Customers (Topic 606) . This update clarifies in regard to identifying performance obligations and licensing. In May 2016, the FASB issued ASU 2016-12, Revenue from Contracts with Customers (Topic 606) . The above referred guidance will be effective for the interim and annual reporting periods beginning after December 15, 2017. The Bank expects to adopt the guidance in fiscal 2019. The ASU requires that revenue from contracts with customers is to be recognized upon transfer of goods and services in the amount of consideration expected to be recognized and transfer of nonfinancial assets, unless those contracts are within the scope of other guidance. The ASU also clarifies the guidance related to reporting revenue as a principal versus net as an agent. The ASU also requires new qualitative and quantitative disclosures, including disaggregation of revenues and descriptions of performance obligations. On adoption we will describe our key sources of revenue that are within the scope of the new guidance, and include qualitative disclosures to describe how revenue is recognized for the types of services performed. We do not expect our accounting policies to change materially since the principals of revenue recognition are essentially consistent with our present guidance and practices. The Bank has examined the effect that the guidance will likely have on other revenue streams as well as changes in disclosures required by the new guidance is not expected to be material on the Bank's financial condition or results of operations.

---

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In January 2016, the FASB issued ASU 2016-01 Financial Instruments Overall (Subtopic 825-10) . The update requires all equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under the equity method of accounting or those that result in consolidation of the investee). However, an entity may choose to measure equity investments that do not have readily determinable fair values at cost minus impairment, if any. The amendments also require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. The amendments also require separate presentation of financial assets and financial liabilities by measurement category and form of financial asset. This guidance is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Bank expects to adopt the guidance in fiscal 2019. The preliminary examination carried out by the Bank indicates that the adoption of this guidance is not expected to have a material impact on the Bank's financial condition, results of operations, or disclosures.

In February 2016, the FASB issued ASU 2016-02 Leases (Topic 842) . The update generally requires recognition of lease assets and lease liabilities on the balance sheet and disclosure of key information about leasing arrangements. In particular, the guidance requires a lessee, of operating or finance leases, to recognize on the balance sheet a liability to make lease payments and a right-of-use asset representing its right to use the underlying asset for the lease term. However, for leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election not to recognize lease assets and lease liabilities. Under previous GAAP, a lessee was not required to recognize lease assets and lease liabilities arising from operating leases. The guidance will be effective for the interim and annual reporting periods beginning after December 15, 2018 and early adoption is permitted. The Bank does not plan to early adopt the ASU. The Bank expects to adopt the guidance in fiscal 2020. In January 2018, the FASB released an exposure draft wherein an amendment is proposed, if accepted, would allow the option to apply provisions of the ASU prospectively as of the effective date, without adjusting comparative periods presented. The Bank expects to recognize lease liabilities and corresponding assets at their present value predominantly related to all of the Rs. 79.3 billion of future minimum lease payments required under operating leases as disclosed in Note 27. However, these Leases which will be subject to consolidated balance sheet recognition and their initial measurement is under our evaluation. The effect of the adoption will depend on the lease portfolio at the time of transition.

In March 2016, the FASB issued ASU 2016-04 Liabilities Extinguishments of Liabilities (Subtopic 405-20): Recognition of Breakage for Certain Prepaid Stored-Value Products . The update addresses the current and potential future diversity in practice related to de-recognition of a prepaid stored-value product liability that may be unused wholly or partially for an indefinite time period. The current amendments specify how prepaid stored-value product liabilities within the update's scope should be derecognized, thereby eliminating the current and potential future diversity in practice. The amendments in this update are to be applied either using a modified retrospective transition method by means of a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year in which the guidance is effective or retrospectively to each period presented. The guidance will be effective for the interim and annual reporting periods beginning after December 15, 2017. The Bank expects to adopt the guidance in fiscal 2019. This guidance will not impact the Bank's financial condition, results of operations, or disclosures.

In June 2016, the FASB issued ASU 2016-13 Financial Instruments Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments . The ASU introduces a new accounting model, the Current Expected Credit Losses

model (CECL), which requires earlier recognition of credit losses, while also providing transparency about credit risk. The CECL model utilizes a lifetime expected credit loss measurement objective for the recognition of credit losses for loans, held to maturity securities and other receivables at the time the financial asset is originated or acquired. The expected credit losses is required to be adjusted each period for changes in expected lifetime credit losses. The update requires use of judgment in determining the relevant information and estimation methods that are appropriate for measurement of expected credit losses which is to be based on relevant information about past events, historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. In regard to Available-for-Sale Debt Securities, the credit losses is required to be recorded through an allowance and the ASU limits the amount of the allowance for credit losses to the amount by which fair value is below amortized cost. The amendments in the ASU are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. While early adoption is permitted beginning fiscal 2020, we do not expect to elect that option. The Bank expects to adopt the guidance in fiscal 2021. The amendments represent a significant departure from the existing GAAP. The Bank expects the update will result in an increase in the allowance for credit losses given the change to estimated losses over the contractual life adjusted for expected prepayments with an anticipated material impact from longer duration portfolios, as well as the addition of an allowance for debt securities. The Bank is evaluating the effect the ASU 2016-13 will have on its Consolidated Financial Statements and related disclosures which will also depend on the nature of the Bank's portfolio's at the date of adoption.

---

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In August 2016, the FASB issued ASU 2016-15 Statement of Cash Flows (Topic 230) . This is intended to reduce the diversity in practice around how certain transactions are classified within the statement of cash flows. The amendments in the ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Bank expects to adopt the guidance in fiscal 2019. The preliminary evaluation carried out by the Bank indicate that the guidance will not have a material impact on the presentation and classification in the consolidated statement of cash flows. The adoption of this guidance is not expected to have any impact on the Bank's financial condition, results of operations, except for presentation classification in the Consolidated Statement of Cash Flows.

In October 2016, the FASB issued ASU 2016-16 Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory . In accordance with this guidance, an entity should recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. The amendments in the ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted. The Bank expects to adopt the guidance in fiscal 2019. This guidance is not expected to impact the Bank's financial condition, results of operations, or disclosures.

In November 2016, the FASB issued ASU 2016-18 Statement of Cash Flows (Topic 230) Restricted Cash . The amendments in this update require that a statement of cash flows explain the change during the period in the total of cash, cash equivalents and amounts generally described as restricted cash or restricted cash equivalents. Amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The amendments in the ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted. The Bank expects to adopt the guidance in fiscal 2019. The update is to be applied using a retrospective transition method for each period presented. The update will not affect the Bank's financial condition or results of operations except the disclosures pertaining to restricted cash and restricted cash equivalents which is to be included with cash and cash equivalents while reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows.

In January 2017, the FASB issued ASU No. 2017-01 Business Combinations (Topic 805) Clarifying the Definition of a Business . The amendment in this update narrows the definition of a business by introducing a quantitative screen as the first step, such that if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or a group of similar identifiable assets, the set of transferred assets and activities is not a business. If the first step is not met, then an entity needs to evaluate whether the set meets the requirement that a business include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs. The amendments in the ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The amendment in this update will be applied prospectively, with early adoption permitted. The bank expects to adopt the guidance in fiscal 2019. The impact of this update will depend upon the acquisition and disposal activities of the Bank, if any.

In January 2017, the FASB issued ASU No. 2017-04 Intangibles-Goodwill and Other (Topic 350) Simplifying the Test for Goodwill Impairment . The amendment in this update simplifies the subsequent measurement of goodwill impairment by eliminating the requirement to calculate the implied fair value of goodwill (i.e., the current Step 2 of

the goodwill impairment test) to measure a goodwill impairment charge. The impairment test is simply the comparison of the fair value of a reporting unit with its carrying amount (the current Step 1), with the impairment charge being the deficit in fair value but not exceeding the total amount of goodwill allocated to that reporting unit. The simplified one-step impairment test applies to all reporting units (including those with zero or negative carrying amounts). The amendments in the ASU are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. The bank expects to adopt the guidance in fiscal 2021. Early adoption is permitted for interim and annual goodwill impairment testing dates after January 1, 2017. The impact of the amendments in this update will depend upon the performance of the reporting units and the market conditions impacting the fair value of each reporting unit going forward.

---

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In March 2017, the FASB issued ASU 2017-07 Compensation Retirement Benefits (Topic 715) Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost . The amendment in this update changes the income statement presentation of net benefit expense and requires restating the Company's financial statements for each of the earlier periods presented in annual and interim financial statements. The amendment requires that only the service cost component of net benefit expense be included in the Compensation and benefits line on the income statement. The other components of net benefit expense will be required to be presented outside of the Compensation and benefits line and will be presented in other operating expense. The total Operating expenses will not change. The new standard also changes the components of net benefit expense that are eligible for capitalization when employee costs are capitalized in connection with various activities, such as internally developed software, construction-in-progress, and loan origination costs. The amendments in this update are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The amendments in this update is to be applied retrospectively for the presentation of the service cost component and the other components of net periodic pension cost and net periodic postretirement benefit cost in the income statement and prospectively, on and after the effective date, for the capitalization of the service cost component of net periodic pension cost and net periodic postretirement benefit in assets. The bank expects to adopt the guidance in fiscal 2019. This guidance is not expected to impact the Bank's financial condition and results of operations.

In March 2017, the FASB issued ASU 2017-08 Receivables Nonrefundable Fees and Other Costs (Subtopic 310-20) Premium Amortization on Purchased Callable Debt Securities . This update amends the amortization period for certain purchased callable debt securities held at a premium. The update requires entities to amortize premiums on debt securities by the first call date when the securities have fixed and determinable call dates and prices. ASU 2017-08 does not change the accounting for discounts, which continue to be recognized over the contractual life of a security. The amendments in the ASU are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period but such adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. Adoption of the ASU is on a modified retrospective basis through a cumulative effect adjustment to retained earnings as of the beginning of the year of adoption. The bank expects to adopt the guidance in fiscal 2020. The impact of this ASU will depend upon the position of purchased callable debt securities held at a premium on date of adoption.

In May 2017, the FASB issued ASU 2017-09 Compensation Stock Compensation (Topic 718) Scope of Modification Accounting. The amendment in this update clarifies when changes to the terms or conditions of a share-based payment award must be accounted for as modifications. Under ASU 2017-09, an entity will not apply modification accounting to a share-based payment award if all of the following are the same immediately before and after the change: (i) the award's fair value, (ii) the award's vesting conditions and (iii) the award's classification as an equity or liability instrument. The amendments in the ASU are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted. The Bank expects to adopt the guidance in fiscal 2019. The impact of this update will depend upon the modification, if any, to the terms or conditions of a share-based payment award on or after adoption of the guidance in fiscal 2019.

In August 2017, the FASB issued ASU No. 2017-12 Derivatives and Hedging (Topic 815) Targeted Improvements to Accounting for Hedging Activities . The amendment in the update better aligns the accounting and reporting of hedging relationships with the economics of risk management activities. ASU 2017-12 provides administrative reliefs

to simplify the application of hedge accounting. The amendments in the ASU are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. The transition requirements and elections in this update is to be applied to hedging relationships existing on the date of adoption. The amendment in the update requires the effect of adoption to be reflected as of the beginning of the fiscal year of adoption. The Bank expects to adopt the guidance in fiscal 2019. This guidance is not expected to impact the Bank's financial condition and results of operations.

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)***y. Convenience translation*

The accompanying financial statements have been expressed in Indian Rupees ( Rs. ), the Bank's functional currency. For the convenience of the reader, the financial statements as of and for the year ended March 31, 2018 have been translated into U.S. dollars at U.S.\$1.00 = Rs. 65.11 as published by the Federal Reserve Board of New York on March 30, 2018. Such translation should not be construed as a representation that the rupee amounts have been or could be converted into United States dollars at that or any other rate, or at all.

**3. Cash and cash equivalents**

Cash and cash equivalents as of March 31, 2017 and March 31, 2018 include balances of Rs. 336,332.8 million and Rs. 971,381.4 million (US\$ 14,919.1 million), respectively, maintained with the RBI to meet the Bank's cash reserve ratio requirement. The Bank is required to maintain a specific percentage of its demand and time liabilities by way of a balance in a current account with the RBI. This is to maintain the solvency of the banking system. The cash reserve ratio has to be maintained on an average basis for a two-week period and should not fall below 95% of the required cash reserve ratio on any particular day.

**4. Term placements**

Term placements consist of placements with banks and financial institutions in the ordinary course of business. These placements have original maturities for periods between 3 months and 15 years. This includes restricted term placements of Rs. 652.4 million and Rs. 331.2 million (US\$ 5.1 million) at March 31, 2017 and at March 31, 2018, respectively.

**5. Investments, held for trading**

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

AFS investments of Rs. 1,657,059.6 million and Rs. 1,866,134.2 million (US\$ 28,661.3 million) as of March 31, 2017 and March 31, 2018, respectively, are eligible towards the Bank's statutory liquidity reserve requirements. These balances are subject to withdrawal and usage restrictions towards the reserve requirements, but may be freely traded by the Bank. Of these investments, Rs. 1,200,857.2 million as of March 31, 2017 and Rs. 1,354,027.6 million (US\$ 20,796.0 million) as of March 31, 2018, were kept as margins for clearing, collateral borrowing and lending obligation (CBLO), real time gross settlement (RTGS), with the Reserve Bank of India and other financial institutions.

The Bank evaluated the impaired investments and has fully recognized an expense of Rs. 54.9 million, Rs. 13.4 million and Rs. 149.1 million (USD 2.3 million) as other than temporary impairment in fiscal year 2016, 2017 and 2018, respectively, because the Bank intends to sell the securities before recovery of their amortized cost. The Bank is of the opinion that the other unrealized losses on its investments in equity and debt securities as of March 31, 2018 are temporary in nature. As of March 31, 2017 and March 31, 2018, the Bank did not hold any debt securities with credit losses for which a portion of other-than-temporary impairment was recognized in other comprehensive income.

The gross unrealized losses and fair value of available for sale securities at March 31, 2017 was as follows:

	As of March 31, 2017				Total	
	Less Than 12 Months Fair Value	Unrealized Losses	12 Months or Greater Fair Value	Unrealized Losses	Fair Value	Unrealized Losses

**7. Investments, held to maturity**

There were no HTM securities as of March 31, 2017 and March 31, 2018.

**8. Credit substitutes**

Credit substitutes consist of securities that the Bank invests in as part of an overall extension of credit to certain customers. Such securities share many of the risk and reward characteristics of loans and are managed by the Bank together with other credit facilities extended to the same customers. The fair values of credit substitutes by type of instrument as of March 31, 2017 and March 31, 2018 were as follows:

	As of March 31,			
	2017		2018	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value

Gross impaired credit substitutes	Rs.	Rs.	US\$
Gross impaired credit substitutes by industry	Rs.	Rs.	US\$
Average impaired credit substitutes	Rs.	Rs.	US\$
Interest income recognized on impaired credit substitutes	Rs.	Rs.	US\$

As of March 31, 2018, the Bank has no additional funds committed to borrowers whose credit substitutes were impaired.

**9. Repurchase and resell agreements**

Securities sold under agreements to repurchase (repos) and securities purchased under agreements to resell (reverse repos) generally do not constitute a sale for accounting purposes of the underlying securities, and so are treated as collateralized transactions. There were no such transactions accounted for as sales during the years ended March 31, 2016, March 31, 2017 and March 31, 2018. Interest paid or received on all repo and reverse repo transactions is recorded in Interest expense or Interest revenue at the contractually specified rate.

***a. Securities purchased under agreements to resell***

Securities purchased under agreements to resell are classified separately from investments and generally mature within 14 days of the transaction date. Such resell transactions are recorded at the amount of cash advanced on the transaction. Resell transactions outstanding as of March 31, 2017 and March 31, 2018 were Rs. 50,000.0 million and Rs. 650,018.6 million (US\$ 9,983.4 million), respectively.

***b. Securities sold under repurchase agreements***

Securities sold under agreements to repurchase are classified separately under liabilities and generally mature within 14 days of the transaction date. Such repurchase transactions are recorded at the amount of cash received on the transaction. Repurchase transactions outstanding as of March 31, 2017 and March 31, 2018 were nil and Rs. 138,000.0 million (US\$ 2,119.5 million), respectively.

- 1) Loans up to 30 days past due are considered current
- 2) Includes crop related agricultural loans with days past due less than 366 as they are not considered as impaired Rs. 31.5 billion.

The Bank has a credit risk mitigating/monitoring mechanism which is comprised of target market definitions, credit approval process, post-disbursement monitoring and remedial management procedures.

For wholesale credit risk in addition to the credit approval process the Bank has an approved framework for the review and approval of credit ratings. Credit Policies and Procedures articulate credit risk strategy and thereby the approach for credit origination, approval and maintenance. The Credit Policies generally address such areas as target markets, portfolio mix, prudential exposure ceilings, concentration limits, price and non-price terms, structure of limits, approval authorities, exception reporting system, prudential accounting and provisioning norms. These are reviewed in detail at annual or more frequent intervals. To ensure adequate diversification of risk, concentration limits have been set up in terms of borrower/business group, industry and risk grading.

For retail credit the policy and approval processes are designed for the fact that the Bank has high volumes of relatively homogeneous, small value transactions in retail loans. There are product programs for each of these products, which define the target markets, credit philosophy and process, detailed underwriting criteria for evaluating individual credits, exception reporting systems and individual loan exposure caps. The quantitative parameters considered include income, residence stability, the nature of the employment/business, while the qualitative parameters include accessibility, contractibility and profile. The credit policies/product programs are based on a statistical analysis of the Bank's experience and industry data, in combination with the judgment of the Bank's senior officers. The Bank mines data on its borrower account behavior as well as static data regularly to monitor the portfolio performance of each product segment and use these as inputs in revising the Bank's product programs, target market definitions and credit assessment criteria to meet the Bank's twin objectives of combining volume growth and maintenance of asset quality.

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As an integral part of the credit process, the Bank has a credit rating model appropriate to its wholesale and retail credit segments (see note 2 i). The Bank monitors credit quality within its segments based on primary credit quality indicators. This internal grading is updated at least annually.

**Retail Loans**

**Wholesale Loans**

The Bank has in place a process of grading each borrower according to its financial health and the performance of its business and each borrower is graded as pass/labeled/impaired. Wholesale loans that are not impaired are disclosed as pass or labeled and considered to be performing. Labeled loans are those with evidence of weakness where such

exposures indicate deteriorating trends which if not corrected could adversely impact repayment of the obligations. The Bank's model assesses the overall risk over four major categories – industry risk, business risk, management risk and financial risk. The inputs in each of the categories are combined to provide an aggregate numerical rating, which is a function of the aggregate weighted scores based on the assessment under each of these four risk categories.

	2017	As of March 31, 2018 (In millions)	2018
Credit quality indicators-Internally assigned grade and payment activity			
Pass	Rs. 1,893,736.5	Rs. 2,116,499.3	US\$ 32,506.5

**Table of Contents****HDFC BANK LIMITED AND ITS SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The unallocated allowance is assessed at each period end and the increase/(decrease) as the case may be is recorded in the income statement under allowances for credit losses. There is no transfer of amounts to or from the unallocated category to the specific category.

**Troubled debt restructuring (TDR)**

When the Bank grants concession, for economic or legal reasons related to a borrower's financial difficulties, for other than an insignificant period of time, the related loan is classified as a TDR. Concessions could include a reduction in the interest rate below current market rates, payment extensions, forgiveness of principal, forbearance or other actions intended to maximize collection. Loans, for which the terms have been modified, and for which the borrower is experiencing financial difficulties, are considered TDRs. On restructuring, the loans are re-measured to reflect the impact, if any, on projected cash flows resulting from the modified terms. Modification may have little or no impact on the allowance established for the loan if there was no forgiveness of the principal and the interest was not decreased. A charge off may be recorded at the time of restructuring if a portion of the loan is deemed to be uncollectible.

The following table summarizes the Bank's TDR modifications during the year ended March 31, 2017 and March 31, 2018 presented by primary modification type and includes the financial effects of these modifications.

<b>Fiscal year ended March 31, 2017</b>							
	<b>Carrying value</b>	<b>TDRs involving changes in the amount of principal payments (1)</b>			<b>TDRs involving changes in the amount of both principal and interest payments (2)</b>		<b>Balance of principal forgiven Net P&amp;L impact (3)</b>
		<b>Rs.</b>	<b>Rs.</b>	<b>Rs.</b>	<b>Rs.</b>	<b>Rs.</b>
