**ENTERPRISE FINANCIAL REPORTS 53% INCREASE IN EARNINGS PER SHARE FOR
THE FIRST QUARTER OF 2005
Loans Growing At Annualized Rate of 33%
Wealth Management Income Increases 43%**

St. Louis, April 18, 2005 Enterprise Financial Services Corp (NASDAQ: EFSC), the parent company of Enterprise Bank & Trust, reported net income of \$2.4 million or \$0.23 per fully diluted share for the first quarter of 2005 versus \$1.5 million or \$0.15 per share in the same quarter of 2004 a 53% increase.

This was an excellent first quarter reflecting continued growth momentum in our banking and wealth management businesses, said Kevin Eichner, president and CEO of Enterprise Financial. Our people are clearly impacting the marketplace very positively.

Net interest income increased \$1.9 million or 25% in the first quarter of 2005 versus 2004. Portfolio loans grew by \$74 million since December 31, 2004 and ended the quarter at \$973 million. The loan growth in the quarter was funded by \$29 million of maturities in the investment portfolio that were not replaced, and short term FHLB advances. While Enterprise deposits have historically declined in the first quarter, balances at March 31, 2005 of \$937 million were essentially flat with 2004 year-end balances. Included in deposits were \$74 million of brokered certificates of deposit, a net increase of \$10 million from year-end, but still only 8% of total deposits. The ratio of non-interest bearing deposits to total deposits remains strong at 20% - a high number in relation to most peers.

The company's net interest rate margin improved from 3.88% in the first quarter of 2004 to 4.18% in the same quarter of 2005. Driving this improvement was a 79 basis point increase in the yield on the loan portfolio, and an increasing benefit of non-interest bearing deposits and equity, partially offset by a 58 basis point increase in the cost of interest-bearing liabilities. Approximately 64% of the loan portfolio (including interest rate swap impacts) floats with the prime rate, which has increased 175 basis points since first quarter of 2004. Price competition for new loans also continues to be a factor in overall loan yields.

Overall asset quality remains favorable for EFSC. The company had net loan recoveries of \$188,000 during the first quarter of 2005 versus net loan charge-offs of \$501,000 for the same period last year. The provision for loan losses was \$786,000 in the first quarter of 2005, versus \$597,000 in the same quarter last year due to slightly higher nonperforming loan levels and the afore-mentioned loan growth. Nonperforming loans were \$3.1 million or 32 basis points of total loans at March 31, 2005 versus 18 basis points and 20 basis points at March 31, 2004 and December 31, 2004, respectively. The increase in nonperforming loans was primarily due to a \$1.1 million credit that is secured by a first mortgage on a residential property. The allowance for loan losses represented 1.30%, 1.30% and 1.29% of loans at March 31, 2005, December 31 2004 and March 31, 2004, respectively.

Edgar Filing: ENTERPRISE FINANCIAL SERVICES CORP - Form 8-K

Wealth Management income continued to grow rapidly, up 43% from \$856,000 in the first quarter of 2004 to \$1.2 million in first quarter of 2005. Approximately \$150,000 of additional revenue came from the addition of the company's Wealth Products Group in March, 2004, while the Fiduciary and Advisory units increased their revenues approximately 22% over first quarter of 2004. Assets under administration were \$1.4 billion at March 31, 2005, a 5% increase over December 31, 2004.

Though hampered by a rising earnings credit rate on commercial analysis accounts, deposit service charges grew about 6% in the first quarter of 2005 to \$483,000 versus \$457,000 in the same quarter last year. A higher interest rate environment and the resulting lower refinancing opportunities led to a decline in mortgage gains from \$68,000 in first quarter 2004 to \$22,000 in first quarter 2005.

The company's drive to increase its operating leverage on its expense base continued to pay significant dividends through the combination of exceptional growth in revenue and expense controls, said Eichner.

The company's efficiency ratio improved from 69.61% in the first quarter of 2004 to 62.44% in the first quarter of 2005. While noninterest expense increased \$847,000 or about 12% in the first quarter of 2005 versus the prior year, the level of noninterest expense to average assets declined from 3.00% to 2.91% respectively. The increase in expense during the first quarter of 2005 was due primarily to the company's new long term incentive plan and related expensing of Restricted Stock Units, more competitive director compensation levels, expenses associated with nonperforming loans, higher commission expenses due to related revenues in Wealth Management, and higher professional fees associated with Sarbanes Oxley Section 404 compliance.

We are fortunate to be able to digest these new expense levels through our growth, since some are the result of uncontrollable external and regulatory factors in the industry, commented Eichner.

Enterprise announced a national listing of its stock on February 8, 2005 and has seen its trading volumes increase significantly. EFSC (the company's trading symbol on the NASDAQ) stock value increased 32% in 2004 and has more than doubled since July of 2002.

Enterprise Financial operates commercial banking and wealth management businesses in metropolitan St. Louis and Kansas City, with a primary focus on serving the needs of privately held businesses, their owners and other success-minded individuals.

Please refer to the Consolidated Financial Summary attached for more details.
