Comments from the Chief Executive Officer

Jaime Rivera, Chief Executive Officer of Bladex stated, The fourth quarter proved a fitting end to a solid year. In January 2004, we established four main objectives for the year. First, the execution of our commercial strategy, focused around re-leveraging the balance sheet and developing new sources of fee income. Second, the management of our portfolio in Argentina, an effort geared around completing pending restructurings and maximizing collections. Third, taking capital management action in view of the Bank's medium-term needs, and fourth, expanding our shareholder base to increase the liquidity of our common stock.

In our view, the quantitative and qualitative results for the year are evidence of significant progress in respect of all four objectives.

Regarding our commercial strategy, the critical job of re-leveraging the balance sheet is well underway. During the fourth quarter, and in spite of significant reductions in non-trade credits in Argentina, the amount of our total assets reached its highest level since the first quarter of 2003. In addition, the US\$1.6 billion in disbursements in the fourth quarter represented an increase of 52% over the activity during the previous quarter.

The figures reflecting the management of our Argentine portfolio speak for themselves. Our success along this front exceeded our expectations.

Regarding capital management, we achieved our objective of maintaining a solid capitalization while providing significant cash flow to our shareholders. Since January 1, 2004, and including the recently announced US\$2.00 per share special dividend, we have returned a total of US\$144.0 million in equity capital to our shareholders, and still have a balance of US\$42.5 million with which to purchase shares in the open market under our US\$50.0 million share repurchase program.

We were also glad to see our investor relations efforts pay off handsomely. Average daily trading volumes for the year increased by 42% (152,949 in 2004 vs. 107,535 in 2003). In addition, we had the honor of welcoming a number of prestigious new institutions as shareholders of the Bank.

Beyond these four objectives, Bladex made important headway in a number of different areas. The launching of our new corporate identity, for instance, has resonated well in the market, making a significant contribution to our commercial efforts.

Despite our progress in 2004, we are well aware that we still have work to do, particularly in one important area: the generation of additional fee income. We are focusing our efforts in 2005 accordingly.

The principles behind our work in 2005 remain unchanged: to continue making progress towards our vision of becoming the leading trade finance house in the Latin American and Caribbean region (the Region), while creating significant added value for our shareholders, and improving opportunities for people in the Region.

To this end, our priorities for 2005 remain unchanged: executing our commercial strategy, making continued progress with respect to our Argentine portfolio, paying special attention to capital management, and increasing the liquidity of our common stock. We believe Bladex has the skills, clients, contacts, and financial resources to execute accordingly.

BUSINESS OVERVIEW

The following tables set forth information regarding the Bank's outstanding credit portfolio and credit portfolio disbursements for the dates and periods indicated.

At December 31, 2004, the Bank's credit portfolio totaled US\$2.9 billion, compared to US\$2.7 billion at September 30, 2004, and US\$2.8 billion at December 31, 2003. The US\$286 million increase in the credit portfolio in the fourth quarter of 2004 was primarily the result of a US\$279 million, or 15%, increase in the Bank's trade portfolio. The distribution of the Bank's credit portfolio is shown on Exhibit VIII.

Credit disbursements during the fourth quarter of 2004 increased by 52% over the third quarter of 2004, to a total of US\$1.6 billion. During 2004, credit disbursements amounted to US\$4.6 billion, a 14% increase over 2003.

NET INTEREST INCOME AND MARGINS

The table below shows the Bank's net interest income, net interest margin (net interest income divided by the average balance of interest-earning assets) and the net interest spread (average yield earned on interest-earning assets, less the average rate paid on interest-bearing liabilities) for the periods indicated:

(In US\$ million)

	2003	2004	4Q03	3Q04	4Q04	4Q04A ⁽¹⁾
Net Interest Income	\$ 54.0	\$ 42.0	\$ 13.3	\$ 10.6	\$ 9.1	\$ 10.0
Net Interest Margin	1.87%	1.65%	2.07%	1.74%	1.46%	1.61%
Net Interest Spread	1.23%	0.98%	1.41%	1.02%	0.57%	0.79%

⁽¹⁾ Fourth quarter ratios adjusted exclude the impact of a US\$0.9 million one-time payment to preferred shareholders.

4Q04 vs. 3Q04

The decline in net interest income, net interest margin and net interest spread was mainly due to:

- (i) A one-time payment of US\$0.9 million to preferred shareholders, which is accounted for as an interest expense under U.S. GAAP. This payment relates to the US\$1.00 per share special dividend paid to common shareholders on October 7, 2004. Pursuant to the terms of the 1986 preferred stock issue, the dividend yield was adjusted to a level equivalent to that of the common shares (the calculation excludes the impact of stock dividends). Preferred shares with a par value of US\$6,092,790 remain outstanding, of which 50% will be redeemed on May 15, 2005, and the balance a year later.
- (ii) A US\$1.1 million decrease in interest collections on the impaired Argentine portfolio, resulting from decreasing principal balances.

Partially offsetting these factors in the net interest margin was the effect of higher interest rates on the Bank's available capital. The net interest margin, excluding the effect of the one-time additional preferred dividend, was 1.61%. During January 2005, the Bank's net interest margin was 1.90%, 44 basis points increase over the net interest margin during the fourth quarter of 2004.

2004 vs. 2003

The decline in net interest income, net interest margin and net interest spread was mainly due to:

- (i) Lower spreads over LIBOR on the Bank's accruing loan portfolio, resulting from a generally improved risk perception in the Bank's markets and buoyant U.S. dollar liquidity;
 - (ii) The collection of higher-margin non-trade loans; and
 - (iii) Decreased interest collections on the impaired Argentine portfolio, resulting from the US\$195 million principal reduction in this portfolio.

COMMISSION INCOME

The following table shows the components of commission income for the periods indicated:

(In US\$thousands)	2003	2004	4Q03	3Q04	4Q04
Letters of credit	\$ 4,242	\$ 3,894	\$ 794	\$ 1,116	\$ 747
Guarantees:					
Country risk coverage business	1,251	1,078	309	285	186
Other guarantees	936	462	145	103	109
Loans and other	1,460	603	347	81	177
Total Commission Income	\$ 7,889	\$ 6,037	\$ 1,595	\$ 1,584	\$ 1,219
Commission Expenses	(443)	(109)	(195)	(15)	(18)
Commission Income, net	\$ 7,446	\$ 5,928	\$ 1,400	\$ 1,569	\$ 1,201

Net commission income for the fourth quarter of 2004 decreased US\$368 thousand, or 23%, compared to the third quarter of 2004, mostly due to lower pricing in a highly competitive letter of credit business.

The 20% decline in net commission income during 2004, compared to 2003, was mainly due to: i) a 59% decline in loans and other commission income related to the Bank's decision to reduce non-trade loan commitments, and to a one-time loan commitment fee of US\$344 thousand that was recognized during the first quarter of 2003, and ii) a 17% average volume decrease in letters of credit and guarantees, reflecting risk-based decisions by the Bank, as well as competitive pressure.

PROVISIONS FOR CREDIT LOSSES

During the fourth quarter of 2004, the Bank reversed US\$49.7 million in provisions for credit losses, compared to US\$23.7 million in the third quarter of 2004. The US\$49.7 million total is reflected in the Bank's income statement as a US\$45.0 million in loan loss provision reversal, and a US\$4.7 million provision reversal related to off-balance sheet credit risk.

The US\$49.7 million in provision reversals during the fourth quarter of 2004 were mainly the net result of:

- (i) US\$53.7 million provision reversals resulting from:
 - a. Principal payments and prepayments on Argentine restructured loans (US\$48.2 million),
 - b. The sale of Argentine loans that had not been restructured (US\$5.0 million), and
 - c. Recoveries on previously charged-off Argentine loans (US\$0.5 million).
- (ii) An increase in specific reserves of US\$4.3 million assigned to a Brazilian loan classified as non-accruing during the fourth quarter of 2004.
- (iii) A US\$0.2 million net decrease in generic country reserves due to improved country risk.

Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

For the year 2004, provision reversals amounted to US\$112.3 million, compared to US\$58.9 million in 2003. The US\$112.3 million total is reflected in the Bank's income statement as a US\$111.4 million in loan loss provision reversal, and US\$0.9 million in provision reversal related to off-balance sheet credit risk. During 2004, provision reversals related to Argentina, (included in the US\$112.3 million total), amounted to US\$104.9 million, and were due to:

- (i) US\$92.2 million in payments and prepayments on restructured loans,
- (ii) US\$6.4 million in loan recoveries, and
- (iii) US\$6.3 million in sales of loans.

In addition, during the year, the Bank decreased US\$9.5 million in generic reserves assigned to certain countries mainly due to improved risk levels, and reversed US\$2.1 million in specific reserves related to a non-accruing loan in Brazil due to payments received. These reversals were partially offset by a US\$4.3 million increase in specific reserves assigned to a loan in Brazil placed on non-accrual status during the fourth quarter of 2004.

Provision reversals in 2003 amounted to US\$58.9 million, and were mainly due to gains on the sale of US\$214.5 million (nominal value) of Argentine loans.

OPERATING EXPENSES

The following table shows a breakdown of the components of operating expenses for the periods indicated:

(In US\$ thousands)	2003	2004	4Q03	3Q04	4Q04
Salaries and other employee expenses	\$ 11,390	\$ 10,335	\$ 4,298	\$ 2,382	\$ 3,083

Total Operating Expenses	\$ 22,561	\$ 21,352	\$ 7,812	\$ 4,792	\$ 6,145

4Q04 vs. 3Q04

Salaries and other employee expenses for the fourth quarter of 2004 and the third quarter of 2004 include variable compensation and special severance provisions of US\$0.9 million and US\$0.3 million, respectively. Excluding the impact of these provisions, salaries and other employee expenses increased by US\$122 thousand, or 6%. Professional services increased by US\$362 thousand, primarily due to legal fees relating to regulatory reporting, rating agencies fees, and project expenses in the area of Human Resources. Other operating expenses increased by US\$345 thousand, reflecting increased marketing activity.

2004 vs. 2003

For the year, operating expenses declined by US\$1.2 million, or 5%, mostly due to lower salaries and other employee expenses, depreciation, and professional services. The 11% increase in other operating expenses was mainly due to higher insurance premiums, and outlays related to new product development, branding, and marketing.

Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

At December 31, 2004, the Bank's US\$156 million exposure in Argentina, net of the allowance for credit losses, represented 24% of its total stockholders' equity, compared to 29% at September 30, 2004, and 41% at December 31, 2003.

The Bank's credit portfolio in the country is denominated in U.S. dollars (89%) and Euros (11%).

The US\$86.5 million reduction in the Argentine credit portfolio during the fourth quarter of 2004 was mainly due to:

- (i) Scheduled repayments of restructured loans of US\$12.6 million;
- (ii) Principal loan prepayments in the amount of US\$56.1 million;
- (iii) The sale of US\$18.8 million (face value) of loans that had not been restructured and were not paying interest; and
- (iv) Changes in value caused by changing foreign currency (Euro) exchange rates (-US\$0.9 million).

During 2004, the Bank's Argentine credit portfolio declined by US\$195.1 million, or 45%. This reduction was mainly due to:

- (i) The sale of loans and investment securities totaling US\$27.6 million;

SAFE HARBOR STATEMENT

This press release contains forward-looking statements of expected future developments. The Bank wishes to ensure that such statements are accompanied by meaningful cautionary statements pursuant to the safe harbor established by the Private Securities Litigation Reform Act of 1995. The forward-looking statements in this press release refer to executing the Bank's commercial strategy, progress with respect to the Bank's Argentine portfolio, capital management actions, increasing the liquidity of the Bank's common stock and the ability of the Bank to make progress in these areas. These forward-looking statements reflect the expectations of the Bank's management and are based on currently available data; however, actual experience with respect to these factors is subject to future events and uncertainties, which could materially impact the Bank's expectations. Among the factors that can cause actual performance and results to differ materially are as follows: a decline in the willingness of international lenders and depositors to provide funding to the Bank, causing a contraction of the Bank's credit portfolio, adverse economic or political developments in the Region, particularly in Brazil or Argentina, which could increase the level of impaired loans in the Bank's loan portfolio and, if sufficiently severe, result in the Bank's allowance for credit losses being insufficient to cover losses in the portfolio, unanticipated developments with respect to international banking transactions (including, among other things, interest rate spreads and competitive conditions), a change in the Bank's credit ratings, events in Brazil or Argentina or other countries in the Region unfolding in a manner that is detrimental to the Bank, or which might result in adequate liquidity being unavailable to the Bank, the Bank's operations being less profitable than anticipated, or higher than anticipated equity capital requirements.
