NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE FIRST QUARTER ENDED ON MARCH 31, 2012

(The Individual and Consolidated Interim Financial Information as of March 31, 2012 were reviewed by Independent Auditors on the extent described on the Report on Review of Interim Financial Information dated on May 03, 2012)

(In Thousands of Reais – R\$, except when indicated otherwise)

São Paulo, May 3, 2012 – GOL Linhas Aéreas Inteligentes S.A., “GLAI”, (BM&FBovespa: GOLL4 and NYSE: GOL), (S&P: B+; Fitch: B+, Moody`s: B3), the largest low-cost and low-fare airline in Latin America, announces today its results for the first quarter of 2012 (1Q12). All the information herein is presented in accordance with International Financial Reporting Standards (IFRS) and in Brazilian Reais (R\$), and all comparisons are with the first quarter of 2011 (1Q11). All information related to the 1Q11 considers the financial statements filed on March 27, 2012, as Notice to the Market announced on the same date. The quarter's results are consolidated and incorporate 100% of Webjet's results.

Message from Management

Confidence and determination are the Company's watchwords at the moment – confidence that GOL is on the right path and determination to do whatever it takes to recover positive margins.

GOL is announcing its results for the first quarter of 2012, with the adoption of measures to bring its capacity and cost structure in line with the new Brazil and global macroeconomic situation.

At the beginning of March, GOL and Webjet announced a reduction of around 100 flights in order to keep domestic supply in 2012 flat in relation to the previous year, compatible with the new domestic demand scenario. Today, however, GOL announced that its new target for 2012 is to reduce domestic supply by up to 2% over 2011. The Company is determined to do everything possible to help discipline and rationalize a market that has been growing in an unsustainable manner, a situation that could well jeopardize the health of the industry in the midterm.

First-quarter CASK ex-fuel of 8.63 cents (R\$) reflects the Company's efforts to reduce operating costs in 2011 and at the beginning of 2012. Low costs have always constituted GOL's main competitive advantage. The first figures of the year show that the measures has produced results. Additional cost optimization projects are being implemented and the Company is confident in the success of its strategy.

GOL and Webjet's results, despite all the cost pressure from current oil prices and the unfavorable Real/Dollar exchange rate, underlines Company's confidence in the low-cost model and opens new opportunities for synergies and improved practices in both airlines.

GOL closed 1Q12 with a cash position of R\$2.2 billion and no refinancing pressure for the next three years, factors have contributed to the implementation of the Company's strategy in an adverse economic scenario. GOL will continue to focus on maintaining high liquidity and an appropriate debt profile in the coming quarters..

GOL is constantly evaluating opportunities for augmenting its platform and increasing passenger services. This quarter, GOL NO AR (GOL ON AIR), the free on-board entertainment service was available on 40% of GOL' unit flights, representing around 350 departures per day. The on-board sales service also continued to expand and is already available on around 250 daily flights.

In line with its pursuit of additional revenue sources, the Company received authorization from Anac (Brazil's Civil Aviation Authority) to undertake conventional and electrostatic painting, weighing and recalculation services for other aircraft models belonging to other airlines in its Maintenance Center at Confins Airport in Belo Horizonte.

NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE FIRST QUARTER ENDED ON MARCH 31, 2012

(The Individual and Consolidated Interim Financial Information as of March 31, 2012 were reviewed by Independent Auditors on the extent described on the Report on Review of Interim Financial Information dated on May 03, 2012)

GOL's strategy remains the same – prioritizing simplicity above everything else. Once again GOL's team has demonstrated confidence, determination and commitment, always aligned with its values: safety, focus on the client, sustainability, innovation and profitability.

These are the attitudes that are making GOL increasingly the best company to fly with, work for and invest in.

AVIATION MARKET – INDUSTRY

Domestic aviation industry supply and demand increased by 11.3% and 7.1%, respectively, over 1Q11, with an average load factor of 69.4%, versus 72.1% in 1Q11. The fact that supply growth lagged demand growth in a quarter with the highest passenger traffic volume of the year, confirms the change in the industry's behavior, especially that of its leading players as they pursued route profitability in a scenario characterized by substantial pressure on operating costs.

Data from the Brazilian Civil Aviation Agency (Anac). The 1Q11 operating figures were recalculated in accordance with the current DCA Manual.

SUPPLY (ASK)

GOL's domestic route network recorded a 3.6% upturn in supply over 1Q11, chiefly due to the increase in the number of aircraft (120 aircraft in 1Q12, versus 115 in 1Q11). Supply was also partially impacted by the 3.6% reduction in productivity from 13.3 block hours/day in 1Q11 to 12.9 block hours/day in 1Q12, and the 4.4% reduction in the average stage length from 930 km to 889 km in the same period. In March 2012, the Company announced an initial cutback of around 70 flights on both GOL's and Webjet's routes. However, this figure is now close to 100 flights. The discontinuation criteria were: (i) flights with low profitability; (ii) flights with longer stretches and; (iii) night flights (early hours of the morning). **The Company's target is to cut domestic supply by 2% in 2012.**

In the same period, **international supply fell by 24.4%** due to: (i) the discontinuation of international charter flights due to the return of three B767 aircraft; and (ii) the discontinuation of flights to Bogotá, in Colombia.

DEMAND (RPK) and LOAD FACTOR

GOL's domestic demand fell by 4.7% over 1Q11, chiefly due to the slowing of Brazil's economy, together with the 2.5% upturn in consolidated yields. **Demand on GOL's international route network declined by 16.7% year-on-year**, primarily due to the discontinuation of flights to Bogotá, Colombia, and the winding up of international charter flights with the B767 aircraft.

As a result of the above, GOL's load factor averaged 66.6% in 1Q12, 4.4 p.p. down on the 71.0% reported in 1Q11.

GOL AND WEBJET'S FLEET

The Company closed the first quarter with a total fleet of 124 B737-700 and 800 NG aircraft with an average age of 7.0 years, plus 24 B737-300s, with an average age of 19.0 years. In 1Q12, the Company took delivery of one aircraft under an operational leasing contract. No aircraft were returned in the period.

The Company leases its fleet through a combination of financial and operational leases. Out of the total of 151 aircraft, 100 were under operational leases, 45 were under financial leases, and six are owned by the Company. GOL has purchase options on 39 of the 45 aircraft when their leasing contracts terminate. **In 2012, the increase in the two companies' combined seat supply will not exceed 2.0%, the target being a 2% reduction.**

The GOL unit closed the quarter with 120 operational aircraft (excluding the three Boeing 767-300s), 115 of which were actively flying in the period (versus an average of 111 in 1Q11). The Webjet unit ended the period with 28 operational aircraft, 23 of which actively flying, as shown in the table on page 5.

The Company's quarterly earnings results reflect significant and variable seasonality, which limits the comparison with projections released regarding the entire fiscal year. The Company compares the forecasts with actual results after publishing the financial statements for each full fiscal year. The annual results of such comparisons can be found in the Company's Reference Form, Section 11.

1. General Information

Gol Linhas Aéreas Inteligentes S.A. ("Company" or "GLAI") is a publicly-listed company incorporated in accordance with Brazilian Corporate Laws, organized on March 12, 2004. The Company is engaged in, exercising shareholding control of its wholly-owned subsidiary VRG Linhas Aéreas S.A. ("VRG"), and through its subsidiaries or affiliates,

essentially exploring: (i) regular and non-regular air transportation services of passengers, cargo and mailbags, domestically or internationally, according to the concessions granted by the competent authorities; (ii) additional passenger air chartering services.

Additionally, GLAI is the direct parent company of the subsidiaries GAC Inc ("GAC"), Gol Finance ("Finance"), and indirect parent company of subsidiary SKY Finance II ("SKY II") and Webjet Linhas Aéreas S.A. ("Webjet").

GAC was established on March 23, 2006, according to the laws of the Cayman Islands, and its activities are related to the aircraft acquisition for its single shareholder GLAI, which provides financial support for its operating activities and settlement of obligations. GAC is the parent company of SKY II, established on November 30, 2009, respectively, both located in the Cayman Islands, whose activities are related to obtaining funds to finance aircraft acquisition.

Finance was established on March 16, 2006, according to the laws the Cayman Islands, and it is engaged in raising funds for aircraft acquisition.

On April 9, 2007, the Company acquired VRG, a low-cost and low-fare airline company, which operates domestic and international flights using GOL and VARIG brands, and provides regular and non-regular air transportation services from/to the main destinations in Brazil, South America and the Caribbean.

On February 28, 2011, the subsidiary VRG constituted a Participation Account company engaged in developing and operating on-board sales of food and beverages in domestic flights. VRG controls 50% of this company, which started to operate in September, 2011.

On October 3, 2011, VRG subsidiary acquired the entire share capital of Webjet Linhas Aéreas SA ("Webjet"), a low-cost and low-fare airline headquartered in the city of Rio de Janeiro, which provides scheduled passenger air chartering services in Brazil.

On October 27, 2011, CADE, VRG and Webjet entered into a Transaction Reversibility Preservation Agreement ("APRO"), concerning the acquisition of 100% (one hundred percent) of the capital of Webjet, whereby the reversibility of the transaction and preservation of assets is assured until a final decision is handed down by the governmental agency. The agreement ensures the independence in the management of both companies, including with respect to the Company's frequent flyer program ("Smiles"). Without reducing Webjet's capacity, the agreement provides for the sharing of flights between the companies with the aim of optimizing the route network and offer more options to flyers.

The Company's shares are traded on the New York Stock Exchange (NYSE) and on the São Paulo Stock Exchange (BOVESPA). The Company has entered into an Agreement for Adoption of Level 2 Differentiated Corporate Governance Practices with BOVESPA, and is included in the Special Corporate Governance Stock Index (IGC) and the Special Tag Along Stock Index (ITAG), which were created to identify companies committed to adopt differentiated corporate governance practices.

2. Approval and summary of significant accounting policies applied in preparing the financial statements

This financial statements were authorized for issuance at the Board of Directors' meeting held on May 03, 2012. The Company's registered office is at Rua Tamoios, 246, Jd. Aeroporto, São Paulo, Brazil.

2.1 Basis of preparation

The consolidated interim financial information were prepared for the period ended on March 31, 2012 in accordance with International Accounting Standards (IAS) no. 34, related to consolidated interim financial statements, as issued by the International Accounting Standards Board (IASB) and technical pronouncement CPC 21 – *Demonstração Intermediária* (Interim Financial Reporting).

IAS 34 requires the use of certain accounting estimates by the Company Management. The consolidated interim financial information were prepared based on historical cost, except for certain financial assets and liabilities, which are measured at fair value.

The interim financial information of the parent company prepared in accordance with technical pronouncement CPC 21 – *Demonstração Intermediária* (Interim Financial Reporting).

The individual interim financial information prepared for statutory purposes, have the valuation of investments in subsidiaries by the equity method, according to Brazilian legislation. Thus, the consolidated interim financial information are not in accordance with IFRSs, which require the evaluation of investments in separate financial

statements of the parent at fair value or cost.

These do not include all the information and disclosure items required in the consolidated annual financial statements therefore, they must be read together with the consolidated financial statements referring the year ended December 31, 2011, and filed on March 26, 2012, which were prepared according to accounting policies, as described above. There was no changes in accounting policies adopted on December 31,2011 to March 31,2012.

The Company has chosen to present these individual and consolidated interim financial information in one single set, side by side, because there is no difference between the individual and consolidated shareholders' equity and net income (loss).

NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE FIRST QUARTER ENDED ON MARCH 31, 2012

(The Individual and Consolidated Interim Financial Information as of March 31, 2012 were reviewed by Independent Auditors on the extent described on the Report on Review of Interim Financial Information dated on May 03, 2012)

(In Thousands of Reais – R\$, except when indicated otherwise)

The Company and its subsidiary VRG have tax losses and negative basis of social contribution on calculation of taxable income, to be offset against 30% of annual taxable income, which can be carried forward indefinitely, in the following amounts:

| | Individual (GLAI) | | Direct (VRG) and indirect subsidiary (Webjet) | |
|---------------------------------------|--------------------------|-----------------|--|-----------------|
| | 03/31/12 | 12/31/11 | 03/31/12 | 12/31/11 |
| Tax losses | 256,913 | 258,268 | 1,887,267 | 1,887,267 |
| Negative basis of social contribution | 256,913 | 258,268 | 1,887,267 | 1,887,267 |

Tax credits arising from tax loss carryforwards and negative basis of social contribution were recorded based on the expected generation of future taxable income of the Company and its subsidiaries, as prescribed by tax laws.

Projected future taxable income for the utilization of tax loss carryforwards and negative basis of social contribution, technically prepared and supported based on business plans and approved by the Board of

Directors, indicates the existence of sufficient taxable income for the realization of the recognized deferred tax assets.

The Company has a total tax credits amount of R\$761,288, wicH R\$87,350 are from the GLAI and R\$673,938 are from its subsidiaries VRG and Webjet, and recognized an allowance for loss of R\$180,341 (R\$42,306 from the GLAI and R\$138,035 from its subsidiaries VRG and Webjet, for credits that have no perspective of realization in an immediate future.

Management considers that the deferred tax assets arising from temporary differences will be realized proportionally to the realization of provisions and final outcome of future events.

13. Investments

Due to the changes in Law 6404/76 introduced by Law 11,638/07, investments in foreign subsidiaries, GAC and Finance were considered as an extension of the controller GLAI and consolidated on a line by line basis, only subsidiary VRG was considered as an investment.

Changes in investments in March 31, 2012 are as follows:

| | |
|---|------------------|
| Balances as of December 31, 2010 | 2,713,261 |
| Equity in subsidiaries | (518,274) |
| Unrealized hedge losses (VRG) | (89,853) |
| Amortization losses, net of sale-leaseback (a) | (1,809) |
| Balances as of December 31, 2011 | 2,103,325 |
| Equity in subsidiaries | (49,979) |
| Unrealized hedge gains (VRG) | 58,686 |
| Deferred gains, net of sale leaseback transaction with (a) | (452) |
| Balances as of March 31, 2012 | 2,111,580 |

(a) The subsidiary GAC has net balance of deferred losses and gains on sale leaseback, whose deferral is subject to the payment of contractual installments made by its subsidiary VRG. Accordingly, as of March 31, 2012, the net balance to be deferred of R\$30,233 (R\$30,685 for the year ended December 31, 2011) is basically a part of the parent's net investment in the VRG. See explanatory note N°. 27 b.

The subsidiary VRG's shares are not traded on stock exchanges. The relevant information on VRG is summarized below:

(a) The difference between the balance of investment and equity participation in the VRG corresponds to the net effect of R\$30,233 from sale leaseback, mentioned above under (a)

14. Earnings or Loss per Share

Although there are differences between common and preferred shares in terms of voting rights and priority in case of liquidation, the Company's preferred shares are not entitled to receive any fixed dividends. Rather, preferred shareholders are entitled to receive dividends per share in the same amount of the dividends per share paid to common shareholders. Therefore, the Company understands that, substantially, there is no difference between preferred shares and common shares, and, accordingly, basic and diluted earnings or loss per share are calculated equally for both shares.

Consequently, basic earnings or loss per share are computed by dividing income or losses by the weighted average number of all classes of shares outstanding during the period. Diluted earnings or loss per share are computed including stock options granted to key management and employees using the treasury stock method when the effect is dilutive. The antidilutive effect of all potential shares is disregarded in calculating diluted earnings or loss per share.

Diluted earnings or loss per share are calculated by considering the instruments that may have a potential dilutive effect in the future. As of March 31, 2012, the strike price of vested stock options under the 2009 plans is lower than the average market quotation for the period (in-the-money), even when the vesting stock options expenses are included in the strike price of the expenses that will be incurred, of the “vesting” option. However, due to the loss reported for period ended on March 31, 2012, these shares have anti-dilutive effect and, therefore, are not considered in the total number of outstanding shares.

(In Thousands of Reais – R\$, except when indicated otherwise)

The discount rate used to calculate the present value of the minimum leasing payments is 6.10% as of March 31, 2012 (6.10% as of December 31, 2011). There are no significant differences between the present value of minimum leasing payments and the fair value of these financial liabilities.

The Company extended the maturity date of financing for some of its aircraft leased for 15 years using the SOAR framework (mechanism for extending financing amortization and repayment), which enables performing calculated withdrawals to be made for a bullet payment settlement at the end of the lease agreement. As of March 31, 2012, the withdrawals made for the repayment at maturity date of the lease agreement amount to R\$61,768 (R\$59,552 as of December 31, 2011), are recorded in long-term debt.

Covenants

VRG has restrictive covenants ("covenants") in its financing agreements with the following financial institutions: IFC, BNDES, *Bradesco* (Debenture V) and *Banco do Brasil* (Debentures IV e V).

The restrictive covenants measures for these loans are: (i) net debt / EBITDAR, (ii) Current Assets / Current Liabilities, (iii) EBITDA / Debt Service, (iv) Short-term Debt / EBITDA, (v) Net debt/ EBITDA and (vi) Debt Coverage Ratio (ICD).

On March 31, 2012, the Company and its subsidiaries did not reach the minimum standards established for the financing from the IFC, BNDES and the Debentures IV and V, bond to EBITDA and EBITDAR due to accumulated losses in the year ended March 31, 2012.

VRG issued to BNDES a letter of guarantee of R\$14.5 million, whose amount exceeds the current debt, and is not therefore subject to liquidity problems in case it is required to settle such debts.

On March 15, 2012, the Company obtained authorization to non-declaration of acceleration and / or application of any penalty on breach of its restrictive contractual clauses. This was deliberate release of the Company in General Meeting of Debenture Holders of the fourth and fifth issues of debentures for the calculation periods ended March 31, 2012 and June 30, 2012. As a result of this authorization, the company is defaulting in its obligations agreed upon in writing of the debentures, thus no need to reschedule its debt in the short term on March 31, 2012, in order to meet the Brazilian and international accounts standards.

Provision for anticipated return of Webjet's aircraft

In 2011, according to the strategic planning of Webjet, provision was made for anticipated return of aircraft. This provision was calculated based on the return flow of 14 aircraft Boeing 737-300 with operating leases contracts, as part of the Company's fleet renewal. The anticipated returns from aircraft are scheduled to occur between 2012 and 2013 and the original maturities of leases are in between 2012 to 2014.

Return of aircraft and engines

The provision for return considers the costs that meet the contractual conditions for the return of engines maintained under operating leases, as well as the costs to reconfigure the aircraft without purchase option, as described in return conditions of lease contracts, which the counterpart is capitalized in the fixed assets (aircraft reconfigurations/overhauling), note 15.

Lawsuits

As of March 31, 2012, the Company and its subsidiaries are parties to 23,843 lawsuits and administrative proceedings. The lawsuits and administrative proceedings are classified into Operation (those arising from the Company's normal

course of operations), and Succession (those arising from the succession of former Varig S.A. obligations). Under this classification, the number of proceedings is as follows:

Page 47 of 70

| | Operation | Succession | Total |
|---------------------|------------------|-------------------|---------------|
| Civil lawsuits | 13,336 | 643 | 13,979 |

| Labor proceedings | 80 | 2 | 82 |
| Total | 19,564 | 4,279 | 23,843 |

The civil lawsuits are primarily related to compensation claims generally related to flight delays, flight cancellations, baggage loss, and damages. The labor claims primarily consist of discussions related to overtime, hazard pay, and pay differences.

The provisions related to civil and labor suits, whose likelihood of loss is assessed as probable are as follows:

| | 03/31/12 | 12/31/11 |
|-------|-----------------|-----------------|
| Civil | 35,637 | 34,101 |
| Labor | 44,070 | 41,843 |
| | 79,707 | 75,944 |

Provisions are reviewed based on the progress of the proceedings and history of losses based on the best current estimate for labor and civil lawsuits.

There are other lawsuits assessed by management and its legal counsel as possible risks, in the estimated amount as of March 31, 2012 of R\$29,888 for civil claims and R\$18,085 for labor claims (R\$33,221 and R\$16,019 as of December 31, 2011 respectively), for which no provisions are recognized.

On March 31, 2012 the Company was party to three (03) labor lawsuits in France due to debts of the former Varig S.A. The amount involved in the discussions, not provisioned, is approximately R\$5,103 (corresponding to € 2.1 million).

The Company and its subsidiaries are challenging in court the ICMS levied on aircraft and engines imported under aircraft lease transactions without purchase options in transactions carried out with lessors headquartered in foreign countries. The Company's and its subsidiaries' management understands that these transactions represent simple leases in view of the contractual obligation to return the assets that are the subject matter of the contract. Management believes there are no the evidence of goods circulation and so, there are no legal events to generate ICMS taxation. Based on the legal counsel opinion and supported by similar lawsuits with favorable decisions to taxpayers by the Superior Court of Justice (STJ) and Supreme Federal Court (STF) in the second quarter of 2007, the Company understands that the likelihood of loss is remote, and thus did not recognize provisions for these amounts. The estimated aggregated amount of the ongoing lawsuits related to the non-levy of ICMS tax on said imports is R\$208,006 as of March 31, 2012 (R\$205,102 as of December 31, 2011) adjusted for inflation, not including later payment charges.

27. Commitments

As of March 31, 2012 the Company had with Boeing 90 firm orders, 10 purchase rights and 40 purchase options granted on non-onerous basis, for aircraft acquisition. The commitments to purchase aircraft include estimates for contractual price increases during the construction phase. The approximate amount of firm orders, not including contractual discount is R\$15,187,954 corresponding to US\$8,335,412 (R\$15,780,007 on December 31, 2011, corresponding to US\$8,412,414) and are segregated according to the following periods:

| | 03/31/2012 | 12/31/2011 |

(In Thousands of Reais – R\$, except when indicated otherwise)

As of March 31, 2012, in addition to the commitments mentioned above, the Company has the amount of R\$1,838,589 (R\$1,991,402 on December 31, 2011), as advances for aircraft acquisition, as follows:

| | 03/12/2012 | 12/31/2011 |
|------------|-------------------|-------------------|
| 2012 | 335.397 | 443.909 |
| 2013 | 521.760 | 537.137 |
| 2014 | 487.605 | 501.975 |

| After 2016 | 6.442 | 6.632 |
| | 1.838.589 | 1.991.402 |

The installment financed by Long-term debt, collateralized by the aircraft by the U.S. Ex-Im Bank (“Exim”) corresponds approximately to 85% of total cost of the aircraft. Other agents finance the acquisitions with percentages equal or above this percentage, reaching up to the limit of 100%.

The Company is making payments related to the acquisition of aircraft using its own funds, short and long term debt, cash provided by operating activities, short- and medium-term credit facilities, and supplier financing.

The Company leases its entire aircraft fleet using a combination of finance and operating leases, except for 6 aircrafts owned by its indirect subsidiary Webjet. As of March 31, 2012, the total leased fleet was comprised of 145 aircraft (123 from VRG and 22 from Webjet), which 100 were operating leases and 45 were recorded as finance leases. The Company has 39 financial aircraft with purchase option. During the period ended March 31, 2012, the Company received one aircraft based on lease contracts. There were no returns of aircraft during the period.

a) Operating leases

Future payments of non-cancelable operating leases are denominated in U.S. dollars, and are as follows:

| 03/31/2012 | 12/31/2011 |
|-------------------|-------------------|
|-------------------|-------------------|

| | | |
|--------------------------------|------------------|-----------|

b) Sale-leaseback transactions

As of March 31, 2012, the Company recognized R\$7,564 and R\$14,040, respectively, as ‘Other payables’ in current and non-current liabilities, respectively (R\$7,564 and R\$15,931 as of December 31, 2011), related to gains on sale-leaseback transactions performed by its subsidiary GAC Inc. in 2006, related to eight 737-800 Next Generation aircraft. This gain is being deferred proportionally to the monthly payments of the related lease agreements over the contractual term of 124 months.

On the same date, the Company recorded R\$9,373 and R\$42,485, in ‘Prepaid expenses’, in current and non-current assets, respectively (R\$9,373 and R\$44,828 as of December 31, 2011), related to losses on sale-leaseback transactions performed by its subsidiary GAC Inc. during the years of 2007, 2008 and 2009, related to nine aircraft. These losses are being deferred and amortized proportionally to the monthly payments of the operational lease agreements over the contractual term of 120 months.

Additionally, in the period ended March 31, 2012, the Company recorded a gain of R\$6,743, recognized directly in profit or loss, since gains and losses on sale-leaseback transactions were not offset over lease terms.

28. Financial instruments

The Company and its subsidiaries have financial asset and financial liability transactions, which consist partially of derivative financial instruments.

The financial derivative instruments are used to hedge against the inherent risks relating to the operation. The Company and its subsidiaries consider as most relevant risks: fuel price, exchange rate and interest rate. These risks are mitigated by using exchange swap derivatives, U.S. dollar futures and options contracts in the oil market, U.S. dollar and interest.

Management follows a documented guideline when managing its financial instruments, set out in its Risk Management Policy, which is periodically revised by the Financial Policy and Risk Committee, after approved by the Board of Directors. The Committee sets the guidelines and limits, monitors controls, including the mathematical models adopted for a continuous monitoring of exposures and possible financial effects and also prevents the execution of speculative financial instruments transactions.

The gains on these transactions and the application of risk management controls are part of the Committee's monitoring and are satisfactory to the objectives proposed.

The fair values of financial assets and liabilities of the Company and its subsidiaries are established through information available on the market and according to valuation methodologies.

Most of the derivative financial instruments hired with the purpose of hedging against fuel and exchange rates risks provide scenarios with low probability of occurrence, and thus have lower costs compared to other instruments with higher probability of occurrence. Consequently, despite the high correlation between the hedged item and the derivative financial instruments hired, a significant portion of the transactions presents ineffective results upon settlement, which are presented in the tables below.

(b) The Company records as of March 31, 2012 the amount of R\$20,582 in shareholders' equity as valuation adjustment to equity as a balancing item of this assets and liability.

(c) The Company manages its investment as a part of its cash to supply its operational expenses.

On March 31, 2012 and December 31,2011 the Company had no assets available for sale (Measured at fair value but not through profit and loss).

Risks

The operating activities subject the Company and its subsidiaries to the following financial risks: market (especially currency risk, interest rate risk, and fuel price risk), credit and liquidity risks.

The Company's risk management policy aims at mitigating potential adverse effects from transactions that could affect its financial performance.

The Company's and its subsidiaries' decisions on the exposure portion to be hedged against financial risk, both for fuel consumption and currency and interest rate exposures, consider the risks and hedge costs.

The Company and its subsidiaries do not usually contract hedging instruments for its total exposure, and thus they are subject to the portion of risks resulting from market fluctuations. The portion of exposure to be hedged is determined and reviewed at least quarterly in compliance with the strategies determined in the Risk Policies Committees.

The relevant information on the main risks affecting the Company's and its subsidiaries' operations is as follows:

a) Fuel price risk

As of March 31, 2012, fuel expenses accounted for 44% of the costs and operating expenses of the Company and its subsidiaries. The aircraft fuel price fluctuates both in the short and in the long terms, in line with crude oil and oil byproduct price fluctuations.

In order to mitigate the fuel price risk, the Company and its subsidiaries contract derivatives linked mainly to crude oil and possibly its byproducts. As of March 31, 2012, the Company used options, collar and swap agreements.

Fuel hedge transactions, classified as cash flow hedges are contracted by the counterparties rated as investment grade, or are performed on the NYMEX.

b) Exchange rate risk

The exchange rate risk derives from the possibility of unfavorable fluctuation of foreign currencies to which the Company's liabilities or cash flows are exposed. The exposure of the Company's and its subsidiaries' assets and liabilities to the foreign currency risk mainly derives from foreign currency-denominated leases and financing.

The Company's and its subsidiaries' revenues are mainly denominated in *Reais*, except for a small portion in U.S. dollars, Argentinean pesos, Bolivian bolivianos, Chilean peso, Colombian peso, Paraguay guarani, Uruguayan peso, Venezuela bolivar, etc.

In order to mitigate the currency risk, the Company contracts the following currency derivatives: U.S. dollar futures and options settled on the BM&F-BOVESPA. These transactions may be performed using exclusive investment funds, as described in the Company's Risk Management Policy.

The Company's foreign exchange exposure as of March 31, 2012 and December 31, 2011 is as follows:

c) Interest rate risk

The Company and its subsidiaries are exposed to fluctuations in domestic and foreign interest rates, substantially the CDI and Libor, respectively. The highest exposure is in lease transactions, indexed to the Libor, and local debt.

In the period ended March 31, 2012, for interest rate hedges, the Company and its subsidiaries held swap transactions with counterparties rated as investment grade.

d) Credit risk

The credit risk is inherent in the Company's and its subsidiaries' operating and financing activities, mainly represented by trade receivables, cash and cash equivalents, including bank deposits.

The trade receivable credit risk consists of amounts falling due of the largest credit card companies, with credit risk better than or equal to those of the Company and its subsidiaries, and receivables from travel agencies, installment sales, and government sales, with a small portion exposed to risks from individuals or other entities.

NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE FIRST QUARTER ENDED ON MARCH 31, 2012

(The Individual and Consolidated Interim Financial Information as of March 31, 2012 were reviewed by Independent Auditors on the extent described on the Report on Review of Interim Financial Information dated on May 03, 2012)

(In Thousands of Reais – R\$, except when indicated otherwise)

As defined in the Risk Management Policy, the Company and its subsidiaries are required to evaluate the counterparty risks in financial instruments and diversify the exposure. Financial instruments are performed with counterparties rated at least as investment grade by S&P and Moody's, or they are mostly contracted on commodities and futures exchanges (BM&FBOVESPA and NYMEX), which substantially mitigates the credit risk. The Company's and its subsidiaries' Risk Management Policy establishes a maximum limit of 20% per counterparty for short-term investments.

e) Liquidity risk

Liquidity risk takes on two distinct forms: market liquidity risk and cash flow liquidity risk. The first is related to current market prices and varies in accordance with the types of assets and the markets where they are traded. Cash flow liquidity risk, however, is related to difficulties in meeting the contracted operating obligations at the agreed dates.

As a way of managing the liquidity risk, the Company and its subsidiaries invest its funds in liquid assets (governmental bonds, CDBs, and investment funds with daily liquidity), and the Cash Management Policy establishes that the Company's and its subsidiaries' weighted average debt maturity should be higher than the weighted average maturity of the investment portfolio. As of March 31, 2012, the weighted average maturity of the Company's and its subsidiaries' financial assets was 6 days and of their financial liabilities was 5 years.

f) Capital management

The table below shows the financial leverage rate as of March 31, 2012 and December 31, 2011:

| | Consolidated | |
|---------------------------------|--------------------------|-----------------|
| | (IFRS and BRGAAP) | |

The Company and its subsidiaries remain committed to maintaining high liquidity and an amortization profile without pressure in the short-term refinancing.

Derivative financial instruments

The derivative financial instruments were recognized in the following balance sheet line items:

| Description | Balance sheet account | 03/31/12 | 12/31/11 |
|---|--|-----------------|-----------------|
| Rights from derivatives operation (assets) | Rights of derivative transactions | 43,272 | 4,213 |
| Obligation from derivatives operation (liabilities) | Liabilities from derivative transactions | 76,877 | 115,432 |
| Prepayment of hedge premium | Prepaid expenses | 6,828 | 11,572 |

The Company and its subsidiaries adopt hedge accounting and in March 31, 2012, the derivative contracted to hedge currency risks, interest rate risk and fuel price risk as "cash flow hedge", according to the parameters described in the Brazilian accounting standard CPC 38, and 40, technical guidance OCPC03 and International Accounting Standard IAS 39.

Classification of derivatives financial instruments

i) Cash flow hedges

The Company and its subsidiaries use cash flow hedges to hedge against future revenue or expense fluctuations resulting from changes in the exchange rates, interest rates or fuel price, and accounts for actual fluctuations of the fair value of derivative financial instruments in shareholders' equity until the hedged revenue or expense is recognized.

The Company and its subsidiaries estimates the effectiveness based on statistical correlation methods and the ratio between gains and losses on the financial instruments used as hedge, and the cost and expense fluctuation of the hedged items.

The instruments are considered as effective when the fluctuation in the value of derivatives offsets between 80 % to 125% the impact of the price fluctuation on the cost or expense of the hedged item.

The balance of the actual fluctuations in the fair values of the derivatives designated as cash flow hedges is transferred from shareholders' equity to profit or loss for the period in which the hedged costs or expenses impacts profit or loss. Gains or losses on effective cash flow hedges are recorded in balancing accounts of the hedged expenses, by reducing or increasing the operating cost, and the ineffective gains or losses are recognized as financial income or financial expenses for the period.

ii) Derivative financial instruments not designated as hedges

The Company and its subsidiaries contracts derivative financial instruments that are not formally designated for hedge accounting. This occurs when transactions are in the short term and the control and disclosure complexity make them unfeasible, or when the change in a derivative's fair value must be recognized in profit or loss for the same period of the effects of the hedged risk.

Designation of hedged item

a) *Fuel hedge*

Due to the low liquidity of jet fuel derivatives traded in commodities exchanges, the Company and its subsidiaries contracts crude oil derivatives and its byproducts—West Texas Intermediate (WTI), Brent and Heating Oil—to hedge against fluctuations in jet fuel prices. Historically, oil prices are highly correlated with jet fuel prices.

As of March 31, 2012, the Company and its subsidiaries have derivative contracts designated as cash flow hedge fuel, traded in Nymex and OTC markets.

Oil derivative contracts, designated as fuel hedges of the Company and its subsidiaries, are summarized below:

| Closing balance at: | 03/31/12 | 12/31/11 |
|--|-----------------|-----------------|
| Fair value at end of the period (R\$) | 50,754 | (9,217) |
| Volume hedged for future periods (thousand barrels) | 2,303 | 3,631 |
| Gains (losses) with hedge effectiveness recognized in shareholders' equity, net of taxes (R\$) | 30,157 | (20,898) |

| Period ended: | 03/31/12 | 12/31/11 |
|--|-----------------|-----------------|
| Loss on hedge effectiveness recognized in operating costs (R\$) | (1,585) | - |
| Gains (losses) on hedge ineffectiveness recognized in financial income (expenses) | (11,944) | 802 |
| Gains (losses) on hedge ineffectiveness recognized in financial income (expenses) for future periods (R\$) | 6,032 | (5,181) |
| Total losses on hedge ineffectiveness recognized in financial income (expenses) (R\$) | (5,912) | (4,379) |
| Exposure percentage hedged during the period | 47% | 42% |

The table below shows the notional amount of derivatives designated as hedges contracted by the Company and its subsidiaries to hedge future fuel expenses, the average rate contracted for the derivatives, and the percentage of fuel exposure hedged by reporting period as of March 31, 2012:

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Board of Directors and Shareholders of

Gol Linhas Aéreas Inteligentes S.A.

São Paulo - SP

Introduction

We have reviewed the accompanying individual and consolidated interim financial information of Gol Linhas Aéreas Inteligentes S.A. and its subsidiaries, included in the Interim Financial Information Form (ITR), for the quarter ended March 31, 2012, which comprises the balance sheet as of March 31, 2012 and the related income statement, statement of comprehensive income, statement of changes in equity and statement of cash flows for the three-month period then ended, including the explanatory notes.

Management is responsible for the preparation of the individual interim financial information in accordance with technical pronouncement CPC 21 - Interim Financial Reporting and the consolidated interim financial information in accordance with technical pronouncement CPC 21 and IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the standards on auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Page 69 of 70

Conclusion on the individual interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual interim financial information included in the ITR referred to above is not prepared, in all material respects, in accordance with technical pronouncement CPC 21, applicable to the preparation of Interim Financial Information (ITR), and presented in accordance with the standards issued by the Brazilian Securities Commission (CVM).

Conclusion on the consolidated interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial information included in the ITR referred to above is not prepared, in all material respects, in accordance with technical pronouncement CPC 21 and IAS 34, applicable to the preparation of Interim Financial Information (ITR), and presented in accordance with the standards issued by the Brazilian Securities Commission (CVM).

Other matters

Interim statements of value added

We also have reviewed the individual and consolidated interim statements of value added (“DVA”), for the three-month period ended March 31, 2012, prepared under the responsibility of Management, the presentation of which is required by the standards issued by Brazilian Securities Commission (CVM), applicable to the preparation of Interim Financial Information (ITR), and is considered as supplemental information for International Financial Reporting Standards - IFRS that do not require the presentation of DVA. These statements were subject to the same review procedures described above and, based on our review, nothing has come to our attention that causes us to believe that they are not prepared, in all material respects, in relation to the individual and consolidated interim financial information taken as a whole.

Convenience translation

The accompanying interim individual and consolidated financial information has been translated into English for the convenience of readers outside Brazil.
