The new ALTANA starts with good First Quarter 2007

Sales: +7 percent

Earnings (EBITDA): +23 percent

Optimistic outlook for 2007

Bad Homburg / Wesel, April 26, 2007. ALTANA AG (NYSE: AAA, FSE: ALT), which is operating as a pure specialty chemicals company since January 1, 2007, achieved consolidated sales of 349 million in the first quarter of 2007, an increase of 7%. Adjusted for minor acquisition and exchange rate effects (-3%), operating growth was 10%. Business in Asia and Europe developed especially positively, with a sales growth of 9% respectively. Earnings before interest, taxes, depreciation and amortization (EBITDA) rose by 23% to 62 million. The significant increase is mainly due to double-digit increases in earnings in all divisions. The EBITDA margin was 17.7%, reflecting as expected the temporarily increased costs related to the dual group structure with two headquarters in Bad Homburg and Wesel. This structure is to be maintained until the middle of 2007. Income before taxes (EBT) amounted to 78 million in the first quarter of 2007, corresponding to an increase of 49 million on the prior-year's figure. EBT are very positively influenced by the interest yield from the investment of the purchase price for ALTANA Pharma.

Positive sales and earnings development in all divisions

All four divisions of ALTANA contributed to the good business performance in the first quarter. Sales in the largest division, Additives & Instruments, climbed by 9%, from 103 million to 113 million. At 35 million (prior year: 31 million), EBITDA rose by 15%.

In the first quarter of 2007, Effect Pigments achieved sales of 89 million, translating into an increase of 7 million or 9% on the prior-year's figure. EBITDA amounted to 21 million, and was therefore up by 5 million or 30% compared to the first quarter of 2006.

At 90 million, sales in the Electrical Insulation division were up by 6 million or 7% on the prior year. EBITDA climbed by 23% to 14 million (prior year: 12 million).

The Coatings & Sealants division reported a sales increase of 2% in the first quarter of 2007, from 55 million to 57 million. EBITDA improved by 13 % to 6 million.

page 2

The development of the first quarter 2007 proves that ALTANA has equally strong growth and earnings momentum, stated Dr. Matthias L. Wolfgruber, President and CEO of ALTANA Chemie and designated CEO of ALTANA AG.

The company is robustly positioned to also achieve in the future its ambitious growth and earnings goals as a worldwide successful specialty chemicals group.

Delisting in the U.S.

On April 24, 2007, ALTANA's Management Board decided to delist from the New York Stock Exchange (NYSE) and to file a deregistration application with the Securities and Exchange Commission (SEC). After successful deregistration, ALTANA will no longer be subject to the regulations of the U.S. securities laws including the reporting obligations and regulations of the Sarbanes-Oxley Act resulting from a registration with the SEC. With this step ALTANA will take the new Group structure into consideration: In 2002, it was mainly on account of ALTANA Pharma's activities in the U.S. that ALTANA opted for a U.S. listing. ALTANA has not arranged for the listing of its ADSs or ordinary shares on another national securities exchange or for the quotation of its common stock in a quotation medium in the United States.

Positive outlook for the business year 2007 For the current business year, ALTANA expects an ongoing positive business environment and further increase in demand for specialty chemicals products. Raw material prices should stabilize at a high level. Our presumed exchange rate is U.S. Dollar 1.32 per Euro on an annual average. On this basis, we still expect a mid-range single-digit growth in sales to a level of 1.34 to 1.39 billion and a strong double-digit growth in EBITDA to a level between 210 and 240 million in 2007. Income before taxes (EBT) will be positively influenced by the extraordinary interest yield of about 50 to 60 million from the investment of the purchase price for ALTANA Pharma.

A conference call for analysts will take place today, **April 26, 2007, at 2:00 p.m. (local time, CEST)**. More information on the relevant audio webcast, this press release and the report on Q1 is available at www.altana.com.

This press release contains forward-looking statements, i.e. current estimates or expectations of future events or future results. The forward-looking statements appearing in this press release include revenue and earnings projections for the ALTANA Group. These statements are based on beliefs of ALTANA's management as well as assumptions made by and information currently available to ALTANA. Many factors that ALTANA is unable to predict with accuracy could cause ALTANA's actual results, including asset and financial position, sales, and earnings, to be materially different from those that may be expressed or implied by such forward-looking statements. These factors include ALTANA's ability to develop new and innovative chemical products, the company's ability to maintain close ties with its customers, the business cycles experienced by its customers, and the prices for raw materials in ALTANA's business.

Forward-looking statements speak only as of the date they are made. ALTANA does not intend, and does not assume any obligation, to update forward-looking statements to reflect facts, circumstances or events that have occurred or changed after such statements have been made.

Interim Financial Report 3

Interim Management Report

Until the end of the business year 2006, the ALTANA Group was composed of the two divisions ALTANA Chemie and ALTANA Pharma as well as the holding company ALTANA AG. The Pharmaceuticals division, ALTANA Pharma, was divested effective as of December 31, 2006. All figures on the financial year 2006 in this interim management report relate to the continuing operations of the ALTANA Group, i.e. to ALTANA Chemie and the holding company ALTANA AG.

Business Performance and Earnings Situation

EAT margin (%)	14.2%	5.7%	

Sales Development:

Dynamic start into the new year

With sales growing by 7% to 349 million, ALTANA started dynamically into its first year as a pure specialty chemicals company. The demand for our products grew on a broad basis, so that all divisions and regions were able to report sales increases. With high single-digit growth rates, the Additives & Instruments and Effect Pigments divisions contributed most to the growth of the ALTANA Group. Sales in the Electrical Insulation and Coatings & Sealants divisions also grew in comparison to the prior year. Exchange rate effects (- 3%) had a negative impact on the sales development, with the weakening U.S. Dollar having a particular negative effect. Adjusted for exchange rate as well as minor acquisition effects, operating growth in the first quarter was 10%.

ALTANA's divisions contributed to the good business performance as follows:

Sales by Division

	Q1 / 2007	Q1 / 2006	D%
in million			
Additives & Instruments	113	103	9
Effect Pigments	89	82	9
Electrical Insulation	90	84	7
Coatings & Sealants	57	55	2
Total	349	324	7

Interim Financial Report 4

Sales increases were achieved in all regions. In our European markets, which account for almost half of the sales, the increase was 9% to 174 million (operating growth: + 10%). Sales in the home market Germany climbed by 7%. The Asian region again contributed disproportionately to the positive business development with a growth in sales of 9% (operating growth: + 14%). In the American markets a growth of 3% to 86 million was achieved, despite the negative development of the U.S. Dollar. Operating growth in these markets was 6%. The operating sales growth in the U.S. markets (+10%) was set against negative exchange rate effects leading to a nominal growth of 2%.

Sales by Region

	Q1 / 2007	Q1 / 2006	D%
in million			
Europe	174	159	9
thereof Germany	60	56	7
Americas	86	84	3
thereof U.S.	63	61	2
Asia	79	72	9
thereof China	35	32	9
Other regions	10	9	10
Total	349	324	7

Earnings Development:

Growth in earnings in all divisions

The strong growth in earnings is primarily due to the dynamic development in all divisions. All earnings figures which are directly influenced by the operating business show a significant increase compared to the prior year. In addition, ALTANA's earnings are influenced by two special items: temporarily increased costs related to the dual holding structure, which will be maintained until the middle of the year, as well as the interest yield on the liquid funds, intended for distribution, from the sale of ALTANA Pharma.

At 62 million, earnings before interest, taxes, depreciation and amortization (EBITDA) were up by 23% on the prior-year figure. All divisions reported double-digit growth on the EBITDA level. Adjusted for exchange rate as well as acquisition and divestment effects, an operating EBITDA growth of 24% was achieved. Measured in terms of sales, the EBITDA margin climbed to 17.7%, slightly below the target corridor of 18 to 20%, which should be reached again by 2008, after having reduced the holding costs to a sustainable level.

Depreciation and amortization on intangible assets and property, plant and equipment are approximately on prior-year's level. Operating income (EBIT) consequently was increased by 40% to 43 million. Due to the acquisition activities the depreciation and amortization level is relatively high in the Effect Pigments, Electrical Insulation as well as Coatings & Sealants divisions.

The interest income related to the investment of the proceeds from the sale of the Pharmaceuticals division is reflected in the financial result. Consequently, financial income rose to 47 million (prior year: 3 million). Financial expenses in the first quarter comprise an impairment of the investment in Nanophase Technologies Corporation of 3 million.

Income before taxes (EBT) amounted to 78 million, compared to 29 million in the prior year. Influenced by the mentioned special items, return on sales was 22.5% (prior year: 8.9%).

In the first quarter, the effective tax rate was 36.8% (prior year: 36.7%). Net income (EAT) for the reporting period amounted to 50 million (prior year: 19 million).

Interim Financial Report 5

Segment Reporting:**Positive business development in all divisions****Additives & Instruments**

	Q1 / 2007	Q1 / 2006	D%
in million			
Sales	113	103	9
EBITDA	35	31	15
EBIT	31	26	16

Sales in the Additives & Instruments division rose by 9% to 113 million in the first quarter. Adjusted for negative exchange rate effects (- 3%), operating growth was 12%. Substantial sales increases were achieved in all regions. The important European market in particular developed very dynamically with a growth of 12%. With 10%, the Asian market also achieved a double-digit growth. Due to the good sales and comparatively favorable cost development, EBITDA improved disproportionately by 15% to 35 million. Consequently, the EBITDA margin improved to 31.4% (prior year: 29.8%). With depreciation and amortization at prior-year's level (5 million in both years), this led to an increase in operating income (EBIT) by 16% to 31 million.

Effect Pigments

	Q1 / 2007	Q1 / 2006	D%
in million			
Sales	89	82	9
EBITDA	21	16	30
EBIT	13	8	60

The Effect Pigments division achieved sales of 89 million (prior year: 82 million). This corresponds to an increase of 9%. Adjusted for exchange rate effects, operating growth was 13%. The strongest sales increases were achieved in the Asian and European markets (+ 13% and + 11%, respectively). The dynamic sales development, a favorable product mix in the period under review as well as price adjustments as a result of increased raw material prices combined with a comparatively favorable cost development led to an EBITDA of 21 million. This corresponds to an increase of 30% on the prior year. At 23.6%, the EBITDA margin was disproportionately high in the first quarter (prior year: 20.0%). The division's operating income (EBIT), which was influenced by high acquisition-related depreciation and amortization, was up 5 million (+ 60%) on the prior year, amounting to 13 million in the first quarter of 2007.

Electrical Insulation

	Q1 / 2007	Q1 / 2006	D%
in million			
Sales	90	84	7
EBITDA	14	12	23
EBIT	11	7	53

Sales in the Electrical Insulation division grew by 7% to 90 million; adjusted for exchange rate effects (- 4%) and the acquisition of ALTANA Isolantes Eléctricos do Brasil (+ 3%), operating growth was 8%. The strongest nominal growth was reported in Europe, where sales increased by 10% to 37 million. The business development in Asia was especially dynamic, resulting in an operating growth of 11% (nominal growth: 5%) to 28 million. EBITDA amounted to 14 million (prior year: 12 million). In addition to the positive business development, the increase in earnings is also due to the effect of the reorganization of production structures in the previous year which had led to the closure of three production sites. The division's EBITDA margin was 16.0 % (prior year: 14.0%). The closures also led to impairments on certain assets. As a result, operating income (EBIT) rose disproportionately to 11 million, up 53% on the prior year.

Interim Financial Report 6

Coatings & Sealants

	Q1 / 2007	Q1 / 2006	D%
in million			
Sales	57	55	2
EBITDA	6	6	13
EBIT	4	3	22

The Coatings & Sealants division was able to increase sales by 2%, adjusted for currency effects of -2%, operating growth was 4%. The strongest nominal growth with 8% was achieved in the American markets (operating growth: +10%). In Asia sales were up by 6%. At 6 million, earnings before interest, taxes, depreciation and amortization (EBITDA) were up 13% on the prior-year's figure. Consequently, the division's EBITDA margin was increased to 11.1% (prior year: 10.1%). With 2 million, depreciation and amortization remained at prior-year's level; operating income (EBIT) was 4 million (prior year: 3 million).

Overview of Segment Reporting

The following table reconciles the divisions' key figures to the respective figures of the ALTANA Group.

Intra-division transactions are consolidated within the respective division.

The Holding and reconciliation column primarily comprises the costs of the present dual holding structure with ALTANA AG in Bad Homburg and ALTANA Chemie AG, headquartered in Wesel. The headquarters in Bad Homburg will be closed down by mid-year 2007. In the first quarter of 2007, expenses of the holding amounted to 16 million on EBIT basis, with an amount of 9 million attributable to the administration in Bad Homburg and 7 million to Wesel.

	Additives & Instruments	Effect Pigments	Electrical Insulation	Coatings & Sealants	Holding and reconciliation	ALTANA Group

¹ Net financial assets comprise cash and cash equivalents, marketable securities, debt and employee benefit obligations

Assets, Liabilities and Shareholders' Equity:**Balance sheet dominated by proceeds from the sale of ALTANA Pharma**

In terms of its structure, ALTANA's balance sheet remained largely unchanged as compared to the end of 2006. It is dominated by the proceeds from the sale of ALTANA Pharma which were invested in money market funds and time deposits.

Capital expenditure and depreciation relating to property, plant and equipment almost balanced each other. The acquisition-related high amortization on intangible assets led to a regular reduction of this position. Within current assets, trade accounts receivable rose mainly due to business expansion and seasonal reasons; this development was also supported by the disproportionately positive business performance in Asia, where long payment times are common. The remaining purchase price receivable due from the acquirer of ALTANA Pharma (€ 50 million), shown under other current assets as of December 31, 2006, was paid. As a result of the investment activities with regard to the proceeds, securities were switched into cash and cash equivalents in the first quarter.

The equity ratio was 91% as of March 31, 2007. The extraordinary high shareholders' equity is due to the sale of ALTANA Pharma and the corresponding capital gain. On approval of the dividend proposal by the Annual General Meeting on May 3, 2007, there will be a dividend distribution of about € 4.7 billion. This will lead to a significant balance sheet contraction, a considerable reduction of the equity ratio to about 60%, and a net debt position of about 200 million.

Liquidity and Cash Flow:**Cash flow influenced by the realignment of the Group**

As of March 31, 2007, ALTANA's cash and cash equivalents amount to € 2,961 million. Cash flows were significantly influenced by the sale of ALTANA Pharma and the changes in the Group structure. At € 25 million, cash flow from operating activities was slightly below the prior-year's figure of € 27 million, comprising a business-related growth in working capital, the interest yield from the investment of the proceeds, and final payments for the termination of employee incentive programs.

Cash flow from investing activities amounted to 432 million (prior year: - 22 million). In addition to investments in intangible assets as well as property, plant and equipment, this item comprises the shift of securities into cash and cash equivalents (+ 410 million) as well as the final settlement of the sales price for ALTANA Pharma (+ 50 million), which is shown net of the payment of transaction costs (- 15 million) in the first quarter.

With regard to cash flow from financing activities, an outflow of 32 million is reported in the period under review. In the first quarter of 2007, the Herbert Quandt Foundation's endowment funds (35 million) so far deposited with ALTANA AG were paid back to the foundation.

Interim Financial Report 8

Capital Expenditure:**Investment volume on expected level****Capital Expenditure by Division**

	Q1 / 2007	Q1 / 2006	D%
Additives & Instruments	5	4	48
Effect Pigments	3	8	- 68
Electrical Insulation	4	3	49
Coatings & Sealants	2	0	> 100
Holding	0	0	
Total	13	14	-9

In the first quarter, ALTANA invested 13 million (prior year: 14 million) in intangible assets and property, plant and equipment; about 60% (8 million) were invested in German sites, primarily in the largest production sites in Wesel and Günterstal. In the first quarter 2007, the majority of the investments was carried out in the Additives & Instruments division (5 million); the largest investment project is the new finished goods warehouse of BYK-Chemie, Wesel. Due to the project development, investments in the Effect Pigments division were, as planned, below prior year's level. 1 million of the investments in the first quarter 2007 related to intangible assets, 12 million to property, plant and equipment.

Employees

ALTANA employed 4,532 people around the world as of March 31, 2007. Compared to December 31, 2006, the number of employees worldwide has risen by 48 people, or 1%. At the end of March 2007, 2,633 people were employed by ALTANA's German companies and 1,899 by companies abroad. The Additives & Instruments division employed 1,069 people; Effect Pigments 1,822; Electrical Insulation 900; and Coatings & Sealants 652. 89 people were employed at the holding level (Bad Homburg and Wesel).

Opportunities and Risks

In the period under review, there were no significant changes in ALTANA's opportunities and risks compared to what was reported in the 2006 Annual Report.

Outlook

For the current business year 2007, ALTANA expects an ongoing positive business environment and further increase in demand for specialty chemicals products. Raw material prices should stabilize at a high level. The presumed exchange rate is U.S. Dollar 1.32 per Euro on an annual average.

On this basis, we still expect a mid single-digit growth in sales to a level of 1.34 to 1.39 billion and a strong double-digit growth in EBITDA to a level between 210 and 240 million in 2007. Income before taxes (EBT) will be positively influenced by the extraordinary interest yield of about 50 to 60 million from the investment of the purchase price for ALTANA Pharma.

On approval of the dividend proposal by the Annual General Meeting on May 3, 2007, there will be a dividend distribution of 4.7 billion. This will lead to a significant balance sheet contraction, a considerable reduction of the equity ratio to about 60%, and a net debt position of about 200 million.

Interim Financial Report 12

Notes

Accounting Principles

This report for the first three months of 2007 complies with the International Accounting Standard 34. The same accounting policies and valuation principles have been applied as for the preparation of the 2006 consolidated annual financial statements.

Consolidated Entities

In the period under review, there were no material changes in the scope of consolidated entities due to acquisitions or divestments, changes in shareholdings or similar transactions under company law.

Significant Transactions with Related Parties

In the period under review, transactions with related parties were conducted to the same extent and of the same kind as recorded in ALTANA AG's Annual Report 2006 as far as they relate to the continuing operations.

Treasury Shares

In the period from January 1 to March 31, 2007, 2,971 ALTANA shares were purchased within the framework of the authorization by the 2006 Annual General Meeting. These shares were transferred to the members of the Supervisory Board as part of their compensation for the business year 2006 in accordance with the Articles of Association. Consequently, the number of treasury shares on March 31, 2007, remained the same as it was on December 31, 2006, namely 4,413,208.

Further Information

In the first quarter of 2007, ALTANA recorded an impairment of 3 million relating to the investment in the Nanophase Technologies Corporation.

Commitments to intangible assets and property, plant and equipment amounted to 22 million on March 31, 2007. Of this amount, 11 million are attributable to the finished goods warehouse construction of BYK-Chemie, Wesel.

In its meeting on March 13, 2007, the Supervisory Board appointed Dr. Matthias L. Wolfgruber (53) new Chairman of the Management Board (CEO) of ALTANA AG and Martin Babilas (35) member of the Management Board (CFO) of ALTANA AG, each effective as of the end of the Annual General Meeting on May 3, 2007. ALTANA's present CEO, Prof. Nikolaus Schweickart (63) and the present CFO Dr. Hermann Küllmer (63) will then resign from the Management Board and go into retirement. Prof. Schweickart will have been a member of the Management Board for 20 years, 17 thereof as CEO; Dr. Küllmer will have been a Management Board member for 17 years.

The election of four new Supervisory Board members have been proposed to the Annual General Meeting on May 3, 2007. Namely, Dr. Fritz Fröhlich, CFO of Akzo Nobel N.V. until 2004; Dr. Helmut Eschwey, Chairman of the Management Board of Heraeus Holding GmbH; Werner Spinner, member of the Management Board of Bayer AG until 2003; and Dr. Carl Voigt, Division Head of Degussa AG until 2006. It is planned to propose Dr. Fröhlich as candidate for the election of the Chairman of the Board in case of his election by the Annual General Meeting. Justus Mische, ALTANA's present Chairman of the Supervisory Board, as well as Dr. Ernst-Uwe Buße, Prof. Wolfgang A. Herrmann and Prof. Heinz Riesenhuber will resign from their mandates in the Supervisory Board as of the end of the Annual General Meeting on May 3, 2007.

In its meeting on April 24, 2007, ALTANA's Management Board decided to delist from the New York Stock Exchange (NYSE) and to file a deregistration application with the American Securities and Exchange Commission (SEC). After successful deregistration, ALTANA will no longer be subject to the regulations of the U.S. securities laws, including the reporting obligations and regulations of the Sarbanes-Oxley Act, arising from the SEC registration.

Interim Financial Report 13

Legal Disclaimer

This interim report contains forward-looking statements, i.e. current estimates or expectations of future events or future results. The forward-looking statements appearing in this interim report include sales and earnings projections for the ALTANA Group and its divisions Additives & Instruments, Effect Pigments, Electrical Insulation and Coatings & Sealants. These statements are based on beliefs of ALTANA's Management as well as assumptions made by and information currently available to ALTANA. Many factors that ALTANA is unable to predict with accuracy could cause ALTANA's actual results, including the financial position, sales and earnings of ALTANA to be materially different from those that may be expressed or implied by such forward-looking statements. These factors include ALTANA's ability to develop new and innovative chemical products, the company's ability to maintain close ties with its customers, the business cycles experienced by its customers and the prices for raw materials in ALTANA's business.

Forward-looking statements speak only as of the date they are made. ALTANA does not intend, and does not assume any obligation to update forward-looking statements to reflect facts, circumstances or events that have occurred or changed after such statements have been made.
