Item 2.02 Results of Operations and Financial Condition.

The preliminary estimated unaudited financial results for Boise Cascade Company ("Boise Cascade" or "us" or "we") as of and for the three months ended June 30, 2013 are set forth below. We expect to report improvements in total sales and EBITDA but a decrease in net income for the three months ended June 30, 2013 as compared to the comparable prior period.

For the three months ended June 30, 2013, we expect to report total sales in the range of \$840.0 million to \$860.0 million as compared to \$732.9 million for the three months ended June 30, 2012. The increase in total sales was due primarily to increases in sales prices and volumes in our Building Materials Distribution segment. Housing starts, which are a primary driver of our sales, increased for the three months ended June 30, 2013 compared to the same period in 2012.

We expect to report net income in the range of \$9.2 million to \$11.7 million for the three months ended June 30, 2013 as compared to net income of \$15.0 million for the three months ended June 30, 2012. The decrease in net income was driven by the recording of entity-level federal and state income taxes upon our conversion from a limited liability company to a corporation in 2013.

We expect to report total company EBITDA in the range of \$28.6 million to \$32.6 million for the three months ended June 30, 2013 as compared to \$28.2 million for the three months ended June 30, 2012.

- In our Wood Products segment, we expect to report EBITDA between \$28.5 million and \$30.5 million for the three months ended June 30, 2013 as compared to \$21.7 million for the three months ended June 30, 2012. The EBITDA improvement was driven primarily by higher plywood, EWP and lumber prices offset partially by higher wood fiber costs.

- In our Building Materials Distribution segment, we expect to report EBITDA between \$4.5 million and \$6.5 million for the three months ended June 30, 2013 as compared to \$10.9 million for the three months ended June 30, 2012. The decline in EBITDA was driven primarily by lower gross margins. While year-over-year average commodity prices were higher and drove higher sales, a steady downward trajectory in commodity prices during the three months ended June 30, 2013 negatively impacted gross margins, which include lower of cost or market inventory write-downs.

At June 30, 2013, we had no borrowings outstanding on our \$300.0 million revolving credit facility and our unused borrowing capacity on the facility, net of approximately \$9.0 million of letters of credit, was approximately \$291.0 million.

As compared to the preliminary results of operations for the three months ended June 30, 2013, as set forth in our Current Report on Form 8-K dated June 25, 2013, we have narrowed the range of estimated results for the three months ended June 30, 2013 as the company's fiscal quarter has ended and we have completed our initial financial closing and consolidation activities. In addition, our financial results are expected to modestly exceed the ranges provided in our previous 8-K principally because of higher than anticipated commodity pricing, favorable claims experience on our self-insured employee medical plans, and other normal recurring quarterly closing estimates that were favorable to our previous expectations.

Estimates of results are inherently uncertain and subject to change, and we undertake no obligation to update this information. Our estimates set forth above may differ from actual results. Actual results remain subject to the completion of management's and our Audit Committee's final review. During the course of the preparation of the financial statements and related notes, additional items that would require material adjustments to the preliminary financial information presented below may be identified. The estimates set forth below were prepared by our management and are based upon a number of assumptions.

These estimates should not be viewed as a substitute for full financial statements prepared in accordance with generally accepted accounting principles ("GAAP"). In addition, these preliminary estimates as of and for the three months ended June 30, 2013 are not necessarily indicative of the results to be achieved in any future period.
