APPROXIMATE DATE OF PROPOSED SALE TO THE PUBLIC:

From time to time after this Registration Statement becomes effective.

If any securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box:

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>

EXPLANATORY NOTE

This Post-Effective Amendment No. 1 amends the Registration Statement on Form S-1 (No. 333-185758) of Blue Calypso, Inc., previously filed with the Securities and Exchange Commission on December 31, 2012 and declared effective on January 7, 2013. This Post Effective Amendment No. 1 is being filed solely to update certain information in the enclosed prospectus with respect to one of the selling stockholders. The registration fee for the shares included in this Post-Effective Amendment No 1 was paid in connection with the original registration of such shares, and therefore no additional registration fee is being paid in connection herewith.

The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the registration statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED FEBRUARY 11, 2013

PRELIMINARY PROSPECTUS

Blue Calypso, Inc.

5,191,533 Shares of Common Stock

3,639,722 Shares of Common Stock Underlying 8% Convertible Note

958,935 Shares of Common Stock Underlying Warrants

This prospectus relates to the resale of: (i) up to 5,191,533 shares of our common stock to be offered by the selling stockholders, (ii) up to 3,639,722 shares of our common stock to be offered by the selling stockholders upon the conversion of an outstanding 8% convertible note, and (iii) up to 958,935 shares of our common stock to be offered by the selling stockholders upon the exercise of outstanding common stock purchase warrants.

The selling stockholders may sell shares of common stock from time to time in the principal market on which our common stock is traded at the prevailing market price or in privately negotiated transactions. See “Plan of Distribution” which begins on page 46.

We will not receive any of the proceeds from the sale of common stock by the selling stockholders. However, we will generate proceeds in the event of a cash exercise of the warrants by the selling stockholders. We intend to use those proceeds, if any, for general corporate purposes. We will pay the expenses of registering these shares.

All expenses of registration incurred in connection with this offering are being borne by us, but all selling and other expenses incurred by the selling stockholders will be borne by the selling stockholders.

Our common stock is quoted on the regulated quotation service of the OTC Bulletin Board under the symbol “BCYP.OB.” On February 5, 2013, the last reported sale price of our common stock as reported on the OTC Bulletin Board was \$0.32 per share.

Investing in our common stock is highly speculative and involves a high degree of risk. You should carefully consider the risks and uncertainties in the section entitled “Risk Factors” beginning on page 3 of this prospectus before making a decision to purchase our stock.

We may amend or supplement this prospectus from time to time by filing amendments or supplements as required. You should read the entire prospectus and any amendments or supplements carefully before you make your investment decision.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

The date of this prospectus is _____, 2013

You should rely only on the information contained in this prospectus. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not making an offer to sell these securities in any jurisdiction where offer or sale is not permitted. You should assume that the information appearing in this prospectus is accurate only as of the date on the front cover of this prospectus. Our business, financial condition, results of operations and prospects may have changed since that date.

PROSPECTUS SUMMARY

The following summary highlights information contained elsewhere in this prospectus. It may not contain all the information that may be important to you. You should read this entire prospectus carefully, including the sections entitled “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and our historical financial statements and related notes included elsewhere in this prospectus or any accompanying prospectus supplement before making an investment decision. In this prospectus, unless the context requires otherwise, all references to “we,” “our,” “us” and the “Company” for periods prior to the closing of our reverse merger on September 1, 2011 refer to Blue Calypso Holdings, Inc., a private company incorporated under the laws of the State of Texas that is now our wholly-owned subsidiary, and its subsidiary. All references to “we,” “our,” “us” and the “Company” for periods subsequent to the closing of our reverse merger transactions and prior to the closing of our reincorporation merger on October 17, 2011 refer to Blue Calypso, Inc., a publicly traded Nevada corporation, and its direct and indirect subsidiaries. All references to “we,” “our,” “us” and the “Company” for periods subsequent to the closing of our reincorporation merger refer to Blue Calypso, Inc., a publicly traded Delaware corporation, and its direct and indirect subsidiaries.

Corporate History

We were incorporated as a Nevada corporation on March 2, 2007 under the name JJ&R Ventures, Inc. for the purpose of developing and marketing an educational book series, consisting of books, presentations and flash cards focusing on healthy nutrition for children. On or about July 2011, we were presented with a business opportunity by the management of a privately held Texas company named Blue Calypso Holdings, Inc. that upon evaluation was determined to be more desirable than our previous business plan. As a result, we suspended our efforts in relation to our original business plan and entered into negotiations with Blue Calypso Holdings, Inc. to consummate a reverse merger transaction.

In contemplation of a possible transaction with Blue Calypso Holdings, Inc., we changed our name from “JJ&R Ventures, Inc.” to “Blue Calypso, Inc.” on July 21, 2011 and completed a three and four tenths (3.4) for one (1) forward stock split of our common stock.

On September 1, 2011, in order to effectuate the reverse merger transaction, Blue Calypso Acquisition Corp., a wholly-owned subsidiary of ours, merged with and into Blue Calypso Holdings, Inc., with Blue Calypso Holdings, Inc. being the surviving corporation and becoming our wholly-owned subsidiary. In connection with this merger, we discontinued all of our prior operations and assumed the business of Blue Calypso Holdings, Inc. as our sole line of business. We refer to this merger transaction as the “reverse merger.”

Immediately following the closing of the reverse merger, we transferred all of our pre-merger assets and liabilities to JJ&R Ventures Holdings, Inc., a wholly-owned subsidiary, and transferred all of the outstanding stock of JJ&R Ventures Holdings, Inc. to Deborah Flores, our then majority stockholder and our former president, secretary, treasurer and sole director, in exchange for the cancellation of 51,000,000 shares of our common stock then owned by Ms. Flores.

On October 17, 2011, we merged with and into Blue Calypso, Inc., a Delaware corporation and wholly-owned subsidiary, for the sole purpose of changing our state of incorporation from Nevada to Delaware. We refer to this merger transaction as the “reincorporation merger.”

Through our platform, participating consumers can use the mobile and social technologies they regularly use for digital communications to endorse our participating advertisers' brands, offerings or causes. These consumer "endorsers" deliver advertiser-created content to their friends and followers and are sometimes rewarded for promoting participating advertisers' brands with incentives and reward perks.

Today, large companies are becoming their own media networks, disseminating digital content to their millions of email addresses, Facebook fans, Twitter followers, etc. These social media channels and mobile delivery capabilities have created a significant opportunity for companies to leverage their marketing assets by having their "fans" tell their friends about a company or product, thus reducing their media expenses and growing their return on investment.

We help companies who market to consumers by cultivating, activating, and monetizing their social media presence. Our technology facilitates content delivery across multiple social channels and then tracks performance, monitors engagement, and uses robust analytics to help client companies improve their marketing returns.

Brand content, such as promotions and offers, are offered by client companies to their fans, employees, and customers. Should these advocates choose to, they can forward these promotions and offers through social media channels with a personal message. Our technology tracks, monitors, and performs analytics for client to help them improve their returns on marketing investments.

Our technology allows us to help clients spread their marketing message, and can help them reach new prospective customers. This can be done by encouraging customers to learn more about a new product, watch a promotional video, increase "likes" on Facebook, increase followers on Twitter, join email lists, etc. This is done by encouraging advocates of a company to interact and personalize messages to people that they think would like to hear about an offer. Advocates of a company can add comments, a photo or video, and share it with their social networks. Brand swill many times offer incentives or VIP perks to advocates who share. Many times, brands will offer incentives in a loyalty program that already exists as a "thank you" to advocates for sharing a message.

It is also clear that many companies are beginning to see their employees as a key channel to spread the message about new products and promotions. We have created a new product, EmGage, that leverages our base technology of tracking, monitoring, and performing analytics on the spread of social media, but are targeting companies with large employee bases as the key channel of message distribution. By offering employees incentives, employers can encourage their employees to let their friends know about upcoming products and promotions, which can increase sales as well as employee satisfaction, and potentially reduce turnover.

Other products that we have in development, such as PopShare, allow companies to download our app to their website, which can increase the ease of sharing content and information across multiple social channels simultaneously.

We, leveraging our proprietary technology and patents, are constantly looking for opportunities to help companies spread their message more effectively and efficiently using social media channels as a significant cost savings vs. traditional media channels such as television, radio, and newspapers. We will continue to innovate, creating new products and services to help companies leverage the significant cost reduction capabilities that our technology offers.

Our proprietary ad-rendering and delivery engine gives advertisers the ability to serve multiple creative display ads within the same campaign, targeting such specific conditions as geo-location, day-of-week, time-of-day, and even weather conditions. Our technology identifies the recipient's circumstance upon campaign view and delivers a relevant message. We believe that our ability to implement targeted advertisements, including point-of-sale, geo-location specific offers, and metered mobile coupon redemptions, extends the capability of our platform beyond current digital or mobile advertising.

As a by-product of campaign delivery and recipient interaction, we offer analytics and business intelligence capabilities, which provide advertisers the ability to see how campaigns are delivered, where they are getting the most traction, and which are seeing the most activity. The platform also allows advertisers to assess the response to their messages in real-time and adjust their campaigns based on performance. For example, advertisers can launch multiple campaigns and monitor their analytics to see which content is getting a more viral response and igniting the most conversation.

Our principal executive offices are located at 19111 North Dallas Parkway Suite 200, Dallas Texas 75287. Our telephone number is (972) 695-4776. Our website address is <http://www.bluecalypso.com>. Information on or accessed through our website is not incorporated into this prospectus and is not a part of this prospectus.

The Offering

Common stock offered by the selling stockholders:	9,790,190 shares of our common stock to be offered by the selling stockholders
Common stock outstanding prior to the offering:	138,381,367
Common stock outstanding after this offering:	142,980,024 (1)
Use of proceeds:	We will not receive any proceeds from the sale of the common stock offered by the selling stockholders. However, we will generate proceeds in the event of a cash exercise of the warrants by the selling stockholders. We intend to use those proceeds, if any, for general corporate purposes.

Offering price: All or part of the shares of common stock offered hereby may be sold from time to time in amounts and on terms to be determined by the selling stockholders at the time of sale.

OTC Bulletin Board symbol: BCYP.OB

Risk factors: You should carefully consider the information set forth in this prospectus and, in particular, the specific factors set forth in the “Risk Factors” section beginning on page 3 of this prospectus before deciding whether or not to invest in shares of our common stock.

(1) The number of shares of common stock outstanding after the offering is based upon 138,381,367 shares outstanding as of February 5, 2013 including 13,406,667 shares issued pursuant to restricted stock awards, and assumes conversion of the 8% Convertible Notes and the exercise of all warrants with respect to those shares being registered for resale pursuant to the registration statement of which this prospectus forms a part.

The number of shares of common stock outstanding after this offering excludes:

- 10,388,210 shares of common stock issuable upon the exercise of currently outstanding options;
- 30,220,008 shares of common stock available for future issuance under the Blue Calypso, Inc. 2011 Long-Term Incentive Plan;
- 25,036,819 shares of common stock issuable upon conversion of Series A Convertible Preferred Stock;
- 3,333,333 shares of common stock issuable upon conversion of outstanding 8% senior secured convertible debentures; and
- 31,536,820 shares of common stock issuable upon exercise of currently outstanding warrants.

RISK FACTORS

Investing in our common stock involves a high degree of risk. Before investing in our common stock, you should carefully consider the risks described below and the financial and other information included in this prospectus. If any of the following risks, or any other risks not described below, actually occur, it is likely that our business, financial condition, and/or operating results could be materially adversely affected. In such case, the trading price and market value of our common stock could decline and you may lose part or all of your investment in our common stock. The risks and uncertainties described below include forward-looking statements and our actual results may differ from those discussed in these forward-looking statements.

Risks Relating to our Business

We have a history of losses which may continue, which may negatively impact our ability to achieve our business objectives.

We incurred net losses of \$4,610,585 and \$6,858,173 for the nine months ended September 30, 2012 and the period from September 11, 2009 to September 30, 2012, respectively. As of September 30, 2012, we had a stockholders' deficit of \$182,361. We cannot assure you that we can achieve or sustain profitability on a quarterly or annual basis in the future. Our operations are subject to the risks and competition inherent in the establishment of a business enterprise in the relatively new and volatile market for product marketing and branding through social media communities. Revenues and profits, if any, will depend upon various factors, including whether we will be able to continue expansion of our revenue model. We may not achieve our business objectives and the failure to achieve such goals would have an adverse impact on us.

We have a limited operating history and if we are not successful in continuing to grow our business, then we may have to scale back or even cease our ongoing business operations.

We have a limited operating history. Our operations will be subject to all the risks inherent in the establishment of a developing enterprise and the uncertainties arising from the absence of a significant operating history. We have nominal revenues from operations and limited assets. We have yet to generate positive earnings and there can be no assurance that we will ever operate profitably. If our business plan is not successful, and we are not able to operate profitably, investors may lose some or all of their investment in our company.

We may need additional capital to fund our operations.

We believe that we will require additional capital to fund the anticipated expansion of our business and to pursue targeted revenue opportunities. We cannot assure you that we will be able to raise additional capital. If we are able to raise additional capital, we do not know what the terms of any such capital would be. In addition, any future sale of our equity securities would dilute the ownership and control of our current stockholders and could be at prices substantially below prices at which our shares currently trade. Our inability to raise capital could require us to significantly curtail or terminate our operations.

Our failure to manage growth effectively could impair our business.

Our business strategy envisions a period of rapid growth that may put a strain on our administrative, operational resources and funding requirements. Our ability to effectively manage growth will require us to continue to expand the capabilities of our operational and management systems and to attract, train, manage and retain qualified personnel. There can be no assurance that we will be able to do so, particularly if losses continue and we are unable to obtain sufficient financing. If we are unable to successfully manage growth, our business, prospects, financial condition, and results of operations could be adversely affected.

The markets that we are targeting for revenue opportunities may change before we can access them.

The markets for traditional Internet and mobile web products and services that we are targeting for revenue opportunities are changing rapidly and are being pursued by many other companies, and the barriers to entry are relatively low. We cannot provide assurance that we will be able to realize our targeted revenue opportunities before they change or before other companies dominate the market. With the introduction of new technologies and the influx of new entrants to the market, we expect competition to persist and intensify in the future, which could harm our ability to increase sales, limit client attrition and maintain our prices.

We operate within a highly competitive and complex market, which could have an adverse effect on our business.

Product advertising, marketing, awareness and branding through social media sites is an extremely competitive and fragmented industry. The industry can be significantly affected by many factors, including changes in local, regional, and national economic conditions, changes in consumer preferences, brand name recognition, marketing and the development of new and competing products or new social media companies. We expect that existing businesses that compete with us and have greater financial resources than us will be able to undertake more extensive marketing campaigns and more aggressive advertising strategies than us, thereby generating more attention to their companies.

These competitive pressures could have a material adverse effect on our business, prospects, financial condition, and results of operations.

Future competitive technology for advertising, branding and awareness campaigns in the mobile device market may render our technology obsolete.

Newer technology may render our technology obsolete which would have a material adverse effect on our business and results of operations. In addition, in order to adapt to new technology, we may be required to collaborate with third parties to develop and deploy our services, and we may not be able to do so on a timely and cost-effective basis, if at all.

We may not be able to adequately protect our proprietary rights, which would have an adverse effect on our ability to competitively conduct our business.

We rely on our proprietary rights to deliver our platform. To protect our proprietary rights, we rely on a combination of patent and trade secret laws, confidentiality agreements, and protective contractual provisions. Despite these efforts, our patents and intellectual property relating to our business may not provide us with adequate protection of our platform or any competitive advantages.

Our issued patent may be subject to challenge and possibly invalidated by third parties. Changes in either the patent laws or in the interpretations of patent laws in the United States or other countries may diminish the value of our intellectual property.

We own three patent applications in the United States. We cannot assure that these patent applications will be issued, in whole or in part, as patents. Patent applications in the United States are maintained in secrecy until the patents are published or issued. Since publication of discoveries in the scientific or patent literature tends to lag behind actual discoveries by several months, we cannot be certain that we are the first creator of the inventions covered by pending patent applications.

The status of patents involves complex legal and factual questions and the breadth of claims allowed is uncertain. Accordingly, we cannot be certain that the patent applications that we file will actually afford protection against competitors with similar technology. Others may independently develop similar or alternative products and technologies that may be outside the scope of our intellectual property. In addition, patents issued to us may be infringed upon or designed around by others and others may obtain blocking patents that we need to license or design around, either of which would increase costs and may adversely affect our operations.

Further, effective protection of intellectual property rights may be unavailable or limited in some foreign countries. Our inability to adequately protect our proprietary rights would have an adverse impact on our ability to competitively market our platform on a world-wide basis.

We also rely on trade secrets law to protect our technology. Trade secrets, however, are difficult to protect. While we believe that we use reasonable efforts to protect our trade secrets, our own or our strategic partners' employees, consultants, contractors or advisors may unintentionally or willfully disclose our information to competitors. We seek to protect this information, in part, through the use of non-disclosure and confidentiality agreements with employees, consultants, advisors, and others. These agreements may be breached, and we may not have adequate remedies for a breach. In addition, we cannot ensure that those agreements will provide adequate protection for our trade secrets, know-how or other proprietary information or prevent their unauthorized use or disclosure.

If our trade secrets become known to competitors with greater experience and financial resources, the competitors may copy or use our trade secrets and other proprietary information in the advancement of their products, methods or technologies. If we were to prosecute a claim that a third party had illegally obtained and was using our trade secrets, it could be expensive and time consuming and the outcome could be unpredictable. In addition, courts outside the United States are sometimes less willing to protect trade secrets than courts in the United States. Moreover, if our competitors independently develop equivalent knowledge, we would lack any contractual claim to this information, and our business could be harmed.

To the extent that consultants and key employees apply technological information independently developed by them or by others to our potential products, disputes may arise as to the proprietary rights of the information, which may not be resolved in our favor. Consultants and key employees that work with our confidential and proprietary technologies are required to assign all intellectual property rights in their discoveries to us. However, these consultants and key employees may terminate their relationship with us, and we cannot preclude them indefinitely from dealing with our competitors.

We could become involved in intellectual property disputes that create a drain on our resources and could ultimately impair our assets.

We do not knowingly infringe on patents, copyrights or other intellectual property rights owned by other parties; however, in the event of an infringement claim, we may be required to spend a significant amount of money to defend a claim, develop a non-infringing alternative or to obtain licenses. We may not be successful in developing such an alternative or obtaining licenses on reasonable terms, if at all. Any litigation, even if without merit, could result in substantial costs and diversion of our resources and could materially and adversely affect our business and operating results.

Third-party intellectual property rights in our field are complicated and continuously evolving. We have not performed searches for third-party intellectual property rights that may raise freedom-to-operate issues, and we have not obtained legal opinions regarding commercialization of our potential products. As such, there may be existing patents that may affect our ability to commercialize our potential products.

In addition, because patent applications are published up to 18 months after their filing, and because applications can take several years to issue, there may be currently pending third-party patent applications that are unknown to us, which may later result in issued patents that result in challenges to our use of intellectual property.

If a third-party claims that we infringe on its patents or other proprietary rights, we could face a number of issues that could seriously harm our competitive position, including:

- infringement claims, with or without merit, which can be costly and time consuming to litigate, delay any regulatory approval process and divert management's attention from our core business strategy;
- substantial damages for past infringement, which we may have to pay if a court determines that our products or technologies infringe upon a competitor's patent or other proprietary rights; and
- a court order prohibiting us from commercializing our potential products or technologies unless the holder licenses the patent or other proprietary rights to us, which such holder is not required to do.

Our dependence on the continued growth in the use of the web and mobile smartphone networking could adversely affect our results of operations.

Our business depends on consumers continuing to increase their use of the mobile smartphone for social networking, to obtain product content, reward type offers as well as for conducting commercial transactions. The rapid growth and use of the smartphone as an information conduit is a relatively recent phenomenon. As a result, the acceptance and use of smartphones may not continue to develop at historical rates. Mobile web usage may be inhibited for a number of reasons, such as inadequate network infrastructure, security concerns, inconsistent quality of service and availability of cost-effective, high-speed service or smart mobile devices.

If mobile web usage grows, the mobile Internet infrastructure may not be able to support the demands placed on it by this growth or its performance and reliability may decline. In addition, websites and mobile networks have experienced interruptions in their service as a result of outages and other delays occurring throughout the Internet and mobile network infrastructure. If these outages and delays occur frequently in the future, web usage, as well as usage of our website, could grow more slowly or decline, which could adversely affect our results of operations.

If we are unable to establish and maintain strategic relationships with advertisers or are unable to attract users to endorse the advertisers' products, our business could be adversely affected.

We depend on establishing and maintaining relationships with advertisers and matching users with advertisers' products for a significant portion of our traffic. Our mobile advertising platform matches advertisers with their target customers through a union of mobile devices and social media psychology. To initiate an advertising campaign on our platform, an advertiser requests to be matched with a group of our subscribers that meet their target demographic and interest criteria. Consumers' tastes may change and it may become difficult to match advertisers' products with consumer tastes. In addition, we may not be able to establish or maintain relationships with advertisers.

Currently, we have only a small number of paying advertisers. We are continuing to evaluate our pricing strategies and value proposition to both the advertiser and endorser communities. As such, we are very early in creation of brand awareness and name recognition. Due to these factors as well as current and future competition from startups as well as large existing social media, search, or other well-known brands, we cannot guarantee that we will be successful in growing our business. In addition, while we have conducted hundreds of limited launch programs to date, it is not certain that people will be willing to participate as endorsers due to their perception of our offering being spam, annoying or lacking value to themselves or their social circles for which our platform is intended.

Difficulty accommodating increases in the number of users of our services and Internet service problems outside of our control ultimately could result in the reduction of users.

Our website must accommodate a high volume of traffic and deliver frequently updated information. Our website may in the future experience slower response times or other problems for a variety of reasons. In addition, our website could experience disruptions or interruptions in service due to the failure or delay in the transmission or receipt of this information. In addition, our users depend on Internet service providers, online service providers and other website operators for access to our website. Each of them has experienced significant outages in the past, and could experience outages, delays and other difficulties due to system failures unrelated to our systems.

Given our early stage of development, we are still developing our regulatory compliance program and our failure to comply with existing and future regulatory requirements could adversely affect our business, results of operations and financial condition.

Aspects of the digital marketing and advertising industry and how our business operates are highly regulated. We are subject to a number of domestic and, to the extent our operations are conducted outside the U.S., foreign laws and regulations that affect companies conducting business on the Internet and through other electronic means, many of which are still evolving and could be interpreted in ways that could harm our business. In particular, we are subject to rules of the Federal Trade Commission (“FTC”), the Federal Communications Commission (“FCC”) and potentially other federal agencies and state laws related to our advertising content and methods, the Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003, or CAN-SPAM Act, which establishes certain requirements for commercial electronic mail messages and specifies penalties for the transmission of commercial electronic mail messages that follow a recipient’s opt-out request or are intended to deceive the recipient as to source or content, federal and state regulations covering the treatment of member data that we collect from endorsers, and federal and state rules related to our use of prepaid Visa debit cards to compensate our endorsers.

U.S. and foreign regulations and laws potentially affecting our business are evolving frequently. We are, and will continue to update and improve our regulatory compliance features and functionality, and we will need to continue to identify and determine how to effectively comply with all the regulations to which we are subject now or in the future. If we are unable to identify all regulations to which our business is subject and implement effective means of compliance, we could be subject to enforcement actions, lawsuits and penalties, including but not limited to fines and other monetary liability or injunction that could prevent us from operating our business or certain aspects of our business. In addition, compliance with the regulations to which we are subject now or in the future may require changes to our products or services, restrict or impose additional costs upon the conduct of our business or cause users to abandon material aspects of our services. Any such action could have a material adverse effect on our business, results of operations and financial condition.

Existing federal, state and foreign laws regulating email and text messaging marketing practices impose certain obligations on the senders of commercial emails and text messages, which could minimize the effectiveness of our on-demand software or increase our operating expenses to the extent financial penalties are triggered.

The Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003, or CAN-SPAM Act, establishes certain requirements for commercial email messages and specifies penalties for the transmission of commercial email messages that are intended to deceive the recipient as to source or content. The CAN-SPAM Act, among other things, obligates the sender of commercial emails, and someone who initiates commercial emails, to provide recipients with the ability to opt out of receiving future emails from the sender. In addition, some states have passed laws regulating commercial email practices that are significantly more punitive and difficult to comply with than the CAN-SPAM Act, particularly Utah and Michigan, which have enacted do-not-email registries listing minors who do not wish to receive unsolicited commercial email that markets certain covered content, such as adult content or content regarding harmful products. Some portions of these state laws may not be preempted by the CAN-SPAM Act. We, our endorsers and our advertisers may all be subject to various provisions of the CAN-SPAM Act. If we are found to be subject to the CAN-SPAM Act, we may be required to change one or more aspects of the way we operate our business, including by eliminating the option for endorsers to send emails containing our advertisers' messages or by not allowing endorsers to receive compensation directly or indirectly as a result of distributing emails containing our advertisers' messages.

If we were found to be in violation of the CAN-SPAM Act, other federal laws, applicable state laws not preempted by the CAN-SPAM Act, or foreign laws regulating the distribution of commercial email, whether as a result of violations by our endorsers or any determination that we are directly subject to and in violation of these requirements, we could be required to pay penalties, which would adversely affect our financial performance and significantly harm our reputation and our business.

Information technology, network and data security risks could harm our business.

Our business faces security risks. Our failure to adequately address these risks could have an adverse effect on our business and reputation. Computer viruses, break-ins, or other security problems could lead to misappropriation of proprietary information and interruptions, delays, or cessation in service to our customers.

We could be subject to enforcement action or civil liability under federal and state law regarding privacy and the use and sharing of personal information.

Our business model includes the collection of certain personal information from our endorsers. Federal and state privacy laws regulate the circumstances under which we may use or share this information. We take steps to ensure our compliance with these laws, and we take steps to ensure compliance by those with whom we share personal information through non-disclosure agreements and contract provisions. Nonetheless, we may be subject to federal or state governmental enforcement action or civil litigation for improper use or sharing of personal identifying information. This risk could result in substantial costs to our business and materially and adversely affect our business and operating results. Further, if any party overcomes our physical, electronic, and procedural safeguards implemented to protect personal information, we may be subject to federal or state governmental enforcement action or civil litigation for inadequately protecting personal identifying information.

Our business method relies heavily on circulating endorsements, including through social media, which if conducted improperly, could subject our business to liability under Federal Trade Commission regulations.

The Federal Trade Commission (“FTC”) adopted Guides Concerning the Use of Endorsements and Testimonials in Advertising (“Guides”) on October 5, 2009. The Guides recommend that advertisers and publishers clearly disclose in third-party endorsements made online, such as in social media, if compensation was received in exchange for said endorsements. Because our business connects endorsers and advertisers, relies on endorsers sharing their brand endorsements within their digital social circles, and both we and endorsers may earn cash and other incentives, the Guides may be relevant to our business.

We are currently taking several steps to ensure that our endorsers or other appropriate language indicate in social media posts that compensation is being provided to the endorsers. First, the media content provided to endorsers includes the phrase “paid” or “ad.” Our system generally provides for endorsers to post advertising content on social media in the exact form provided. An endorser would have to take steps to individually modify the content provided in order to delete the phrase “paid” or “ad.” Second, when registering as endorsers with us, endorsers are required to agree to abide by the terms and conditions regarding the use of our website and mobile platform. These terms and conditions specifically require compliance with the FTC Guides regarding paid endorsements, and contain

other, general prohibitions against deceptive posts. The terms and conditions also allow us to terminate an endorser's access to the system at any time for non-compliance with the terms and conditions, and it is our policy to terminate the accounts of endorsers for noncompliance with the Guides. Nonetheless, the FTC could potentially identify a violation of the Guides, which could subject us to a financial penalty or loss of endorsers or advertisers.

If we do not develop new and enhanced services and features, we may not be able to attract and retain a sufficient number of users.

We believe that our website will be more attractive to advertisers if we develop a larger audience comprised of demographically favorable subscribers. Accordingly, we intend to introduce additional or enhanced services in the future in order to retain current users and attract new users. If we introduce a service that is not favorably received, the current users may not continue using our service as frequently. New users could also choose a competitive service over ours.

We may also experience difficulties that could delay or prevent us from introducing new services. Furthermore, these services may contain errors that are discovered after the services are introduced. We may need to significantly modify the design of these services on our website to correct these errors. Our business could be adversely affected if it experiences difficulties in introducing new services or if users do not accept these new services.

The laws concerning reloadable branded Visa debit cards are evolving, which could have an adverse effect on our business.

Federal, state and foreign laws related to the issuance of reloadable branded Visa debit cards are evolving and the implementation of the Credit Card Accountability, Responsibility, and Disclosure Act (the “CARD Act”), the Bank Secrecy Act and the USA PATRIOT Act as well as increasing government focus in this area could increase our costs of compliance or subject us to government enforcement actions or lawsuits that could result in penalties, fines, damages and defense costs. Confusion exists regarding how these laws will be interpreted, applied and enforced among the various entities that assist us with providing reloadable branded Visa debit cards to endorsers. These costs and the ongoing uncertainty could cause us to change our business model for rewarding endorsers, which could have a material adverse effect on our business and results of operations.

Risks Relating to Our Common Stock

We are subject to the reporting requirements of federal securities laws, which can be expensive and may divert resources from other projects, impairing our ability to grow.

We are subject to the information and reporting requirements of the Securities Exchange Act of 1934, as amended, and other federal securities laws, including compliance with the Sarbanes-Oxley Act of 2002. The costs of preparing and filing annual and quarterly reports, proxy statements and other information with the Securities and Exchange

Commission and furnishing audited reports to stockholders will cause our expenses to be higher than they would be if we remained privately held. In addition, we will incur substantial expenses in connection with the preparation of the registration statement of which this prospectus forms a part.

It may be time consuming, difficult and costly for us to develop and implement the internal controls and reporting procedures required by the Sarbanes-Oxley Act of 2002. We will need to hire additional financial reporting, internal controls and other finance personnel in order to develop and implement appropriate internal controls and reporting procedures. If we are unable to comply with the internal controls requirements of the Sarbanes-Oxley Act of 2002, then we may not be able to obtain the independent accountant certifications required by such Act, which may preclude us from keeping our filings with the Securities and Exchange Commission current and interfere with the ability of investors to trade our securities and for our shares to continue to be quoted on the OTC Bulletin Board or to list on any national securities exchange.

If we fail to establish and maintain an effective system of internal control, we may not be able to report our financial results accurately or to prevent fraud. Any inability to report and file our financial results accurately and timely could harm our reputation and adversely impact the trading price of our common stock.

Effective internal control is necessary for us to provide reliable financial reports and prevent fraud. If we cannot provide reliable financial reports or prevent fraud, we may not be able to manage our business as effectively as we would if an effective control environment existed, and our business and reputation with investors may be harmed. As a result, our small size and any current internal control deficiencies may adversely affect our financial condition, results of operation and access to capital. We have not performed an in-depth analysis to determine if historical un-discovered failures of internal controls exist, and may in the future discover areas of our internal control that need improvement.

Public company compliance may make it more difficult to attract and retain officers and directors.

The Sarbanes-Oxley Act of 2002 and rules implemented by the Securities and Exchange Commission have required changes in corporate governance practices of public companies. As a public company, we expect these rules and regulations to increase our compliance costs in 2011 and beyond and to make certain activities more time consuming and costly. As a public company, we also expect that these rules and regulations may make it more difficult and expensive for us to obtain director and officer liability insurance and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. As a result, it may be more difficult for us to attract and retain qualified persons to serve on our board of directors or as executive officers, and to maintain insurance at reasonable rates, or at all.

Because we became public by means of a reverse merger, we may not be able to attract the attention of major brokerage firms.

There may be risks associated with us becoming public through a “reverse merger” with a shell company. Although the shell company did not have recent or past operations or assets and we performed a due diligence review of the shell company, there can be no assurance that we will not be exposed to undisclosed liabilities resulting from the prior operations of the shell company. Securities analysts of major brokerage firms and securities institutions may also not provide coverage of us because there were no broker-dealers who sold our stock in a public offering that would be incentivized to follow or recommend the purchase of our common stock. The absence of such research coverage could limit investor interest in our common stock, resulting in decreased liquidity. No assurance can be given that established brokerage firms will, in the future, want to cover our securities or conduct any secondary offerings or other financings on our behalf.

Our stock price may be volatile.

The market price of our common stock is highly volatile and subject to wide fluctuations in price in response to various factors, some of which are beyond our control. These factors include:

- changes in our industry;
- competitive pricing pressures;
- our ability to obtain working capital financing;
- quarterly variations in our results of operations;
- changes in estimates of our financial results;
- investors' general perception of us;
- disruption to our operations;
- the emergence of new sales channels in which we are unable to compete effectively;
- commencement of, or our involvement in, litigation;
- any major change in our board or management; and
- changes in governmental regulations or in the status of our regulatory approvals.

In addition, the stock market in general, and the market for technology companies in particular, have experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. These broad market and industry factors may seriously harm the market price of our common stock, regardless of our actual operating performance.

We have not paid dividends in the past and do not expect to pay dividends in the future. Any return on investment may be limited to the value of our common stock.

We have never paid cash dividends on our common stock and do not anticipate doing so in the foreseeable future. The payment of dividends on our common stock will depend on earnings, financial condition and other business and economic factors affecting us at such time as our board of directors may consider relevant. If we do not pay dividends, our common stock may be less valuable because a return on your investment will only occur if our stock price appreciates.

Our shares of common stock are very thinly traded, and the price may not reflect our value and there can be no assurance that there will be an active market for our shares of common stock either now or in the future.

Our shares of common stock are very thinly traded, only a small percentage of our common stock is available to be traded and is held by a small number of holders and the price, if traded, may not reflect our actual or perceived value. There can be no assurance that there will be an active market for our shares of common stock either now or in the future. The market liquidity will be dependent on the perception of our operating business, among other things. We intend to take certain steps, including utilizing investor awareness campaigns, press releases, road shows and conferences to increase awareness of our business and any steps that we might take to bring us to the awareness of investors may require we compensate consultants with cash and/or stock. There can be no assurance that there will be any awareness generated or the results of any efforts will result in any impact on our trading volume. Consequently, investors may not be able to liquidate their investment or liquidate it at a price that reflects the value of the business and trading may be at an inflated price relative to the performance of our company due to, among other things, availability of sellers of our shares. If a market should develop, the price may be highly volatile. Because there may be a low price for our shares of common stock, many brokerage firms or clearing firms may not be willing to effect transactions in the securities or accept our shares for deposit in an account. Even if an investor finds a broker willing to effect a transaction in the shares of our common stock, the combination of brokerage commissions, transfer fees, taxes, if any, and any other selling costs may exceed the selling price. Further, many lending institutions will not permit the use of low priced shares of common stock as collateral for any loans.

Our common stock is a “penny stock,” which makes it more difficult for our investors to sell their shares.

Our common stock is subject to the “penny stock” rules adopted under Section 15(g) of the Securities Exchange Act of 1934, as amended. The penny stock rules generally apply to companies whose common stock is not listed on The NASDAQ Stock Market or other national securities exchange and trades at less than \$5.00 per share, other than companies that have had average revenue of at least \$6,000,000 for the last three years or that have tangible net worth of at least \$5,000,000 (\$2,000,000 if the company has been operating for three or more years). These rules require, among other things, that brokers who trade penny stock to persons other than “established customers” complete certain documentation, make suitability inquiries of investors and provide investors with certain information concerning trading in the security, including a risk disclosure document and quote information under certain circumstances. Many

brokers have decided not to trade penny stocks because of the requirements of the penny stock rules and, as a result, the number of broker-dealers willing to act as market makers in such securities is limited. If we remain subject to the penny stock rules for any significant period, it could have an adverse effect on the market, if any, for our securities. If our securities are subject to the penny stock rules, investors will find it more difficult to dispose of our securities.

Offers or availability for sale of a substantial number of shares of our common stock may cause the price of our common stock to decline.

If our stockholders sell substantial amounts of our common stock in the public market, including the shares covered by this prospectus, or upon the expiration of any statutory holding period under Rule 144, it could create a circumstance commonly referred to as an “overhang,” in anticipation of which the market price of our common stock could fall. The existence of an overhang, whether or not sales have occurred or are occurring, also could make more difficult our ability to raise additional financing through the sale of equity or equity-related securities in the future at a time and price that we deem reasonable or appropriate.

Our stockholders may experience substantial dilution as a result of the conversion of outstanding convertible preferred stock, convertible debentures, convertible notes, or the exercise of options and warrants to purchase shares of our common stock.

As of February 5, 2013, we have granted options to purchase 10,388,210 shares of common stock and have reserved 30,220,008 shares of our common stock for issuance upon the exercise of options pursuant to our 2011 Long-Term Incentive Plan. We have also granted restricted stock awards totaling 13,406,667 shares of our common stock. In addition, as of February 5, 2013, we have reserved for issuance 25,036,818 shares of our common stock for issuance upon conversion or outstanding convertible preferred stock and 32,495,755 shares of our common stock for issuance upon exercise of outstanding warrants. The respective exercise prices of certain of our outstanding warrants are also subject to anti-dilution adjustments. As of February 5, 2013, we have also reserved 3,333,333 shares of our common stock for issuance upon conversion of outstanding convertible debentures and 3,639,722 shares of our common stock for issuance upon conversion of outstanding convertible notes. The conversion price of our outstanding convertible debentures are also subject to anti-dilution adjustments. On December 12, 2012, we entered into a financial advisory agreement, pursuant to which we agreed to issue 4.9% of our issued and outstanding common stock on a fully-diluted basis to such financial advisor in the event that we complete capital raising transactions that generate at least \$4 million in net proceeds and complete an uplisting of our common stock to a national securities exchange during the term of the agreement.

In connection with the issuance of the convertible debentures, we entered into a stockholder's agreement with our chief technology officer, Andrew Levi, pursuant to which Mr. Levi agreed to place 25,000,000 shares of our common stock owned by him in escrow until April 19, 2013. Pursuant to the stockholder's agreement, Mr. Levi agreed that if the Company issues shares of Common Stock in a financing transaction or in connection with the hiring or retention of senior management or directors during such period of time, the corresponding number of escrowed shares will be cancelled and returned to the Company's treasury. Any shares remaining in escrow at the end of the one-year period will be released to Mr. Levi. As of February 5, 2013, 22,954,395 shares remain in escrow.

Because our directors and executive officers are among our largest stockholders, they can exert significant control over our business and affairs and have actual or potential interests that may depart from those of our other stockholders.

Our directors and executive officers own or control a significant percentage of our common stock. Additionally, the holdings of our directors and executive officers may increase in the future upon vesting or other maturation of exercise rights under any of the options or warrants they may hold or in the future be granted or if they otherwise acquire additional shares of our common stock. As of February 5, 2013, our officers and directors beneficially own approximately 49% of the outstanding shares of our common stock. The interests of such persons may differ from the interests of our other stockholders. As a result, in addition to their board seats and offices, such persons will have significant influence over and control all corporate actions requiring stockholder approval, irrespective of how our other stockholders may vote, including the following actions:

- to elect or defeat the election of our directors;
- to amend or prevent amendment of our certificate of incorporation or bylaws;
- to effect or prevent a merger, sale of assets or other corporate transaction; and
- to control the outcome of any other matter submitted to our stockholders for vote.

In addition, such persons' stock ownership may discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us, which in turn could reduce our stock price or prevent our stockholders from realizing a premium over our stock price.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains “forward-looking statements,” which include information relating to future events, future financial performance, strategies, expectations, competitive environment and regulation. Words such as “may,” “should,” “could,” “would,” “predicts,” “potential,” “continue,” “expects,” “anticipates,” “future,” “intends,” “plans,” “believes,” “estimates,” and “will” are intended to identify forward-looking statements. Forward-looking statements should not be read as a guarantee of future performance or results and will probably not be accurate indications of when such performance or results will be achieved. Forward-looking statements are based on information we have when those statements are made or our management’s good faith belief as of that time with respect to future events, and are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in or suggested by the forward-looking statements. Important factors that could cause such differences include, but are not limited to:

- our ability to raise additional capital;
- the absence of any operating history or revenue;
- our ability to attract and retain qualified personnel;
- market acceptance of our platform;
- our limited experience in a relatively new industry;
- regulatory and competitive developments;
- intense competition with larger companies;
- general economic conditions
- failure to adequately protect our intellectual property;
- technological obsolescence of our products and services;

- technical problems with our products and services; and
- loss or retirement of key executives.

You should review carefully the section entitled “Risk Factors” beginning on page 3 of this prospectus for a discussion of these and other risks that relate to our business and investing in shares of our common stock.

USE OF PROCEEDS

All shares of our common stock offered by this prospectus are being registered for the accounts of the selling stockholders and we will not receive any proceeds from the sale of these shares.

958,935 shares of common stock offered by this prospectus are issuable upon the exercise of common stock purchase warrants. If a selling stockholder exercises all or any portion of its warrants, we will receive the aggregate exercise price paid by such selling stockholder. The maximum amount of proceeds we would receive upon the exercise of all the warrants on a cash basis would be \$314,372. We expect to use the proceeds received from the exercise of the warrants, if any, for general working capital purposes.

MARKET FOR OUR COMMON STOCK AND RELATED STOCKHOLDER MATTERS

Our common stock was originally approved for quotation on the OTC Bulletin Board on July 13, 2010 and since August 8, 2011, our common stock has been quoted under the trading symbol BCYP.OB. Prior to September 14, 2011, our common stock did not trade regularly. The following table sets forth the high and low bid prices for our common stock for the periods indicated, as reported by the OTC Bulletin Board. The quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission, and may not represent actual transactions.

	<u>High</u>	<u>Low</u>
<u>Fiscal Year 2012</u>		
First Quarter	\$ 1.05\$	1.01
Second Quarter	\$ 0.92\$	0.40
Third Quarter	\$ 0.98\$	0.65
Fourth Quarter	\$ 0.87\$	0.30
	<u>High</u>	<u>Low</u>
<u>Fiscal Year 2011</u>		
Third Quarter (commencing September 14, 2011)	\$ 3.00 \$	3.00
Fourth Quarter	\$ 1.10 \$	1.01

The last reported sales price of our common stock on the OTC Bulletin Board on February 5, 2013, was \$0.32 per share. As of February 5, 2013, there were approximately 43 holders of record of our common stock.

DIVIDEND POLICY

In the past, we have not declared or paid cash dividends on our common stock, and we do not intend to pay any cash dividends on our common stock. Rather, we intend to retain future earnings, if any, to fund the operation and expansion of our business and for general corporate purposes.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

You should read the following discussion and analysis of our financial condition and results of operations in conjunction with our consolidated financial statements and the related notes thereto that are included in this prospectus. In addition to historical information, the following discussion and analysis includes forward-looking information that involves risks, uncertainties, and assumptions. Actual results and the timing of events could differ materially from those anticipated by these forward looking statements as a result of many factors, including those discussed under "Risk Factors.." See also "Special Note Regarding Forward-Looking Statements."

Recent Events

Prior to September 1, 2011, we were a public shell company without material assets or liabilities. On September 1, 2011, Blue Calypso Holdings, Inc. completed a reverse merger with us, pursuant to which Blue Calypso Holdings, Inc. became our wholly-owned subsidiary and we succeeded to the business of Blue Calypso Holdings, Inc. as our sole line of business and the former security holders of Blue Calypso Holdings, Inc. became our controlling stockholders. For financial reporting purposes, Blue Calypso Holdings, Inc. is considered the accounting acquirer in the reverse merger and the former public shell company is considered the acquired company. Accordingly, the historical financial statements presented and the discussion of financial condition and results of operations herein are those of Blue Calypso Holdings, Inc., and do not include the historical financial results of our former business. The accumulated earnings of Blue Calypso Holdings, Inc. were also carried forward after the reverse merger for all periods presented. Operations reported for periods prior to the reverse merger are those of Blue Calypso Holdings, Inc.

Business Overview

We offer a patented social mobile advertising platform through which advertisers offer advertising content to their advocates and our subscribers, who publicly endorse the products and services of these advertisers using their mobile smartphones. Endorsers may receive rewards and incentives for each endorsement they make.

Critical Accounting Policies

Development Stage Company

We are a development stage company as defined by Accounting Standards Codification (“ASC”) 915, “Development Stage Entities” and are still devoting substantial efforts to establishing our business. Our principal operations have commenced but there has been no significant revenue thus far. All losses accumulated since inception have been considered part of our development stage activities.

Principles of Consolidation and Basis of Presentation

The consolidated financial statements are stated in U.S. dollars and include the accounts of Blue Calypso Holdings, Inc. and its subsidiary Blue Calypso LLC, which is wholly owned. All intercompany balances and transactions have been eliminated in consolidation. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Significant estimates include: the useful lives of intangible assets and the recoverability or impairment of tangible and intangible asset values; deferred revenues; legal and other contingencies that are recorded when it is probable that a loss has been incurred and the amount is reasonably estimable; and our effective income tax rate and the valuation allowance applied against deferred tax assets, which are based upon the expectations of future taxable income, allowable deductions, and projected tax credits. Actual results may differ from these estimates.

Revenue Recognition

We recognize revenue in accordance with ASC 605, “Revenue Recognition” when persuasive evidence of an arrangement exists, the fee is fixed or determinable, delivery of the product has occurred or services have been rendered and collectability is reasonably assured. Revenue includes fees received from customers for advertising and marketing services provided by us and is recognized as earned when brand loyalists personally endorse and share the

advertising campaigns with others in their digital social stream.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash held in bank demand deposits. We consider all highly liquid debt instruments with original maturities of three months or less to be cash equivalents.

Property and Equipment and Long-Lived Assets

Property and equipment consists of office equipment and is recorded at cost, less accumulated depreciation and amortization. Depreciation is computed using the straight-line method over the estimated useful lives of the related assets, which for office equipment is three to five years. Expenditures for major renewals and betterments that extend the useful lives of the property and equipment are capitalized. Expenditures for maintenance and repairs are charged to expense as incurred.

Intangible Assets

Software development costs are accounted for in accordance with ASC 350-40, “Intangibles — Goodwill and Other: Internal Use Software.” According to ASC 350-40, capitalization of costs related to a computer software project should begin when both of the following occur: (a) the preliminary project stage is complete; and (b) management, with relevant authority, implicitly or explicitly authorizes and commits to funding the project and it is probable that the project will be completed and the software will be used to perform the function intended. The costs capitalized include: fees paid to third parties for services provided to develop the software during the application development stage; payroll and payroll-related costs, such as costs of employee benefits for employees who are directly associated with and who devote time to the software project on activities that include coding and testing during the application development stage; and interest costs incurred while developing the software (in accordance with ASC 835-20). The costs are amortized using straight-line amortization over the estimated useful life of up to five years, once the software is ready for its intended use. The unamortized capitalized cost of the software is compared annually to the net realizable value. The amount by which the unamortized capitalized costs of the internal use software exceed the net realizable value of that asset is written off.

Impairment of Long-Lived Tangible Assets and Definite-Lived Intangible Assets

Long-lived tangible assets and definite lived intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets might not be recoverable. Recoverability of assets held and used is generally measured by a comparison of the carrying amount of an asset to undiscounted future net cash flows expected to be generated by that asset. If it is determined that the carrying amount of an asset may not be recoverable, an impairment loss is recognized for the amount by which the carrying amount of the asset exceeds the fair value of the asset.

Fair Value Measurements

We have adopted ASC Topic 820, “Fair Value Measurements and Disclosures,” which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. ASC 820 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the asset or liability.

Income Taxes

Income taxes are recorded in accordance with ASC 740, "Income Taxes." Deferred income taxes are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. An allowance is provided when it is more likely than not that tax benefits will not be utilized.

Stock-Based Compensation

We grant stock options and restricted stock as compensation to employees, directors and consultants. Compensation expense is measured in accordance with FASB ASC 718 (formerly Statement of Financial Accounting Standards No. 123R), "Compensation – Stock Compensation." Compensation expense is recognized over the requisite service period for awards of equity instruments based on the grant date fair value of those awards expected to ultimately vest. Forfeitures are estimated on the date of grant and revised if actual or expected forfeiture activity differs materially from original estimates.

Concentrations of Credit Risk

Significant concentrations of credit risk may arise from our cash maintained in the bank. We maintain cash in quality financial institutions; however, at times, cash balances may exceed the federal deposit insurance limits.

Advertising and Marketing

Our advertising and marketing costs, which consist primarily of marketing and trade show costs, business development and printed promotional and sales presentation materials, are charged to expense when incurred.

Results of Operations

Comparison of Three Months Ended September 30, 2012 and 2011

Net Loss. For the three months ended September 30, 2012, we had a net loss of \$568,281, as compared to a net loss of \$621,271 for the three months ended September 30, 2011. The decrease in net loss was due to two factors. The first was related to a decrease in investment in sales, marketing expenses and the second was a decrease in operations expenses.

Revenue. Revenue for the three months ended September 30, 2012 was \$9,547, as compared to \$1,665 in revenues for the same period in 2011. We are a development stage company and have had modest revenue to date.

Cost of Revenue. Cost of revenue is primarily comprised of payments to endorsers for promoting advertiser content. Our cost of revenue was \$8,717 for the three months ended September 30, 2012, as compared to \$58,958 for the same period in 2011. The decrease was related to a planned effort to reduce endorser fees in the current period.

Sales and Marketing. For the three months ended September 30, 2012, sales and marketing expenses decreased by \$32,458 to \$120,604 compared to the same period in 2011. The decrease was due primarily to decreased costs related to a reduction in marketing staff. Sales and marketing expense included the compensation and benefit expense of the four sales and marketing staff members as well as travel, entertainment and advertising expense directly attributable to the sales and marketing function.

General and Administrative. For the three months ended September 30, 2012, general and administrative expenses were \$364,217 as compared to \$357,571 for the three months ended September 30, 2011. Expenses included legal and professional expenses related to statutory filing process, patent legal and legal and accounting related to continued fund raising activities. General and administrative expenses primarily consisted of contract labor, outside services and professional fees.

Other Operating Expenses. Other operating expenses for the quarter ended September 30, 2012 were \$13,872 versus zero for the same period in 2011. The increase was due to non-cash deferred compensation expense related to stock options and restricted stock that vested in the current quarter totaling \$13,872.

Depreciation and Amortization. Depreciation and amortization expenses relate primarily to the amortization of capitalized software development. The increase from \$32,599 for the three months ended September 30, 2011 to \$57,170 for the three months ended September 30, 2012 was due to our ongoing software development initiative and implementation of improvements and new services related to our network.

Our development activities are outsourced to Aztec Systems, Inc., a company that was majority owned by Mr. Levi, our chief technology officer and a member of our board of directors prior to its sale in the second quarter of 2012. For the quarter ended September 30, 2012, we incurred \$24,175 of software development costs versus \$129,037 for the quarter ended September 30, 2011, as development activities have been curtailed in an effort to preserve cash resources.

Interest Expense. Interest expense was \$13,248 for the three months ended September 30, 2012 in comparison to \$20,745 for the three months ended September 30, 2011. The current period interest expense related to two (2) notes payable. The first to related party, Aztec Systems, Inc (see footnote #8 in financial statements above). The note has a per annum interest rate of 8%. The balance at September 30, 2012 was \$364,861. The second is for senior secured debentures to LMD Capital, LLC in the amount of \$300,000.

Comparison of Nine Months Ended September 30, 2012 and 2011

Net Loss. For the nine months ended September 30, 2012, we had a net loss of \$4,610,585 as compared to a net loss of \$1,031,468 for the nine months ended September 30, 2011. The increase in net loss was due to two factors. The first was related to an increase in general and administration in comparison to the nine months ended September 30, 2011 of \$504,205. The second was related to the recording of a deferred compensation expense of \$2,958,981 related to options vested during the nine months ended September 30, 2012.

Revenue. Revenue for the nine months ended September 30, 2012 was \$10,307, as compared to \$7,701 in revenues for the same period in 2011. We are a development stage company and have had modest revenue to date.

Cost of Revenue. Cost of revenue is primarily comprised of payments to endorsers for promoting advertiser content. Our cost of revenue was \$147,551 for the nine months ended September 30, 2012, as compared to \$71,093 for the same period in 2011. The increase was due to company-sponsored advertising activity intended to attract an endorser base.

Sales and Marketing. For the nine months ended September 30, 2012, sales and marketing expenses were \$244,942 compared to \$255,390 the same period in 2011. The decrease was due primarily to decreased costs related to reduced marketing staff. Sales and marketing expense included the compensation and benefit expense of the five sales and marketing staff members as well as travel, entertainment and advertising expense directly attributable to the sales and marketing function.

General and Administrative. For the nine months ended September 30, 2012, general and administrative expenses were \$1,072,434 as compared to \$568,229 for the nine months ended September 30, 2011. The increase was due primarily to legal and professional expenses related to statutory filing process, patent legal and legal and accounting related to the continued fund raising activities. . General and administrative expenses primarily consisted of contract labor, outside services and professional fees.

Other Operating Expenses. Other operating expenses for the nine months ended September 30, 2011 were \$2,958,981 versus \$0 for the same period in 2011. The increase was due to non-cash deferred compensation expense related to stock options and restricted stock that vested in the current nine months totaling \$2,958,981.

Depreciation and Amortization. Depreciation and amortization expenses relate primarily to the amortization of capitalized software development. The increase from \$84,319 for the nine months ended September 30, 2011 to \$168,474 for the nine months ended September 30, 2012 was due to our ongoing software development initiative and implementation of improvements and new services related to our network.

Our development activities are outsourced to Aztec Systems, Inc., a company that was majority owned by Mr. Levi, our chief technology officer and a member of our board of directors prior to its sale in the second quarter of 2012. For the nine months ended September 30, 2012, we incurred \$216,317 of software development costs versus \$253,161 for the nine months ended September 30, 2011.

Interest Expense. Interest expense was \$28,510 for the nine months ended September 30, 2012 in comparison to \$60,138 for the nine months ended September 30, 2011. The current period interest expense related to two (2) notes payable. The first to Aztec Systems, Inc., interest expense was \$19,963 and the second is for 8% senior secured debentures to LMD Capital, LLC, interest expense was \$8,547. At September 30, 2011, the Company had a total of \$1,500,000 of subordinated convertible debt outstanding.

Cash Flows

Comparison of Three Months Ended September 30, 2012 and 2011

Cash used in operating activities during the three months ended September 30, 2012 was \$363,817 as compared to \$629,704 for the three months ended September 30, 2011. The change was due to a \$53,139 decrease in net loss and an increase in accounts payable and accrued expenses of \$175,882.

Cash used in investing activities during the three months ended September 30, 2012 was \$24,175, as compared to \$133,899 for the three months ended September 30, 2011. This was attributed to reduced investment in the development of software to help retain cash reserves.

During the three months ended September 30, 2012, cash provided by financing was \$347,955, as compared to \$1,568,399 for the same period in 2011. During the current quarter, net cash of \$333,349 was provided from our private placement transaction and \$10,000 was provided from the senior secured convertible debentures from LMD Capital, LLC. This compares to the prior year when the Company secured cash from the sale of common stock associated with a private placement totaling \$1,543,399.

Comparison of Nine Months Ended September 30, 2012 and 2011

Cash used in operating activities during the nine months ended September 30, 2012 was \$1,368,170 as compared to \$1,062,995 for the nine months ended September 30, 2011. The change was due to a \$3,578,967 increase in net loss, offset by the non-cash expense for deferred stock option compensation of \$2,927,292. The other significant factor was the non-cash increase in depreciation and amortization of \$135,233.

Cash used in investing activities during the nine months ended September 30, 2012 was \$216,317, as compared to \$261,334 for the nine months ended September 30, 2011. This was attributed to increased investment in the development of software.

During the nine months ended September 30, 2012, cash provided by financing was \$1,264,883, as compared to \$2,268,436 for the same period in 2011. During the nine months ended September 30, 2012, cash of \$400,022 was provided from our private placement transaction and \$300,000 was provided from the senior secured convertible

debentures from LMD Capital, LLC; and \$357,707 was provided from a note payable to related party, Aztec. This compares to the prior year when the Company secured cash from the sales of common stock associated with a private placement totaling \$1,543,399 and \$725,000 from notes payable.

Going Concern Consideration

Our registered independent auditors have issued an opinion on our financial statements for the year ended December 31, 2011, which includes a statement describing our going concern status. This means that there is substantial doubt that we can continue as an on-going business for the next 12 months unless we obtain additional capital to pay our bills and meet our other financial obligations. Our ability to continue as a going concern is dependent upon our ability to obtain additional equity or debt financing, attain further operating efficiencies, reduce expenditures, dispose of selective assets, and ultimately, generate additional revenue. The going concern opinion may also limit our ability to access certain types of financing, prevent us from obtaining financing on acceptable terms, and limit our ability to obtain new business due to potential customers' concern about our ability to deliver products or services. We must raise capital to implement our project and stay in business.

Liquidity and Capital Resources

We are a development stage company and have incurred cumulative losses of \$6,858,173 since beginning operations on September 11, 2009. At September 30, 2012, we had a cash balance of \$51,789 and negative working capital of \$401,601.

On November 9, 2012, the Company entered into the exchange agreement with Aztec, pursuant to which the Company and Aztec agreed to exchange the Note and the Company's existing accounts payable to Aztec for an 8% Convertible Note in the original principal amount of \$545,958. The 8% Convertible Note is due on March 31, 2013. Pursuant to the exchange agreement, the Company agreed to register the shares of Common Stock issuable upon conversion of the 8% Convertible Note and an aggregate of 3,733,428 shares of Common Stock currently held by Aztec on or before December 31, 2012. The 8% Convertible Note is convertible into shares of the Company's Common Stock at a conversion price equal to the greater of: (i) \$0.15 per share or (ii) the price per share at which Common Stock is sold in a subsequent financing. Upon effectiveness of the registration statement covering the resale of such shares, the 8% Convertible Note will automatically convert into shares of the Company's Common Stock at the applicable conversion price.

On June 13, 2012, the Company commenced a private placement of up to \$10,000,000 of Units, at a purchase price of \$1.00 per Unit. Each Unit consists of: (i) two shares of Common Stock and (ii) a warrant to purchase one share of the Company's Common Stock (the "Warrant"). The Warrant is exercisable for a term of two years at an exercise price of \$0.75 per share. As of October 14, 2012, the termination date of the offering, we issued and sold an aggregate of 445,000 Units in consideration of gross proceeds of \$445,000.

On April 19, 2012 the Company entered into a securities purchase agreement with an existing stockholder pursuant to which the Company issued (i) a senior secured convertible debenture in the original aggregate principal amount of \$35,000 and (ii) a warrant to purchase 6,500,000 shares of common stock of the Company, and the buyer covenanted to purchase up to an additional \$465,000 of senior secured convertible debentures in a series of four closing at such times as may be designated by the Company in its sole discretion through October 19, 2012. The balance outstanding under this agreement was \$292,548. The convertible debentures mature on October 19, 2012 and bear an interest rate of 8%. On October 17, 2012, the Company and LMD Capital, LLC signed an agreement that extended the due date of the debentures issued to LMD Capital to November 30, 2012 (footnote # 6 in the financial statements above). On October 31, 2012, LMD loaned an additional \$65,000 to the Company bringing the outstanding principal balance of the 8% debentures to \$365,000. On November 14, 2012, LMD loaned an additional \$50,000 to the Company bringing the outstanding balance of the 8% debentures to \$415,000.

In connection with this private placement, the Company also entered into a security agreement, an intellectual property security agreement, Amendment No. 1 to the common stock purchase warrant, a stockholder's agreement and various ancillary certificates, disclosure schedules and exhibits in support thereof, each dated April 19, 2012. Pursuant to the security agreement and the intellectual property security agreement, the Company's obligations under the debentures are secured by a first priority perfected security interest in all of the assets and properties of the Company, including the stock of Blue Calypso, LLC. In addition, the subsidiary of the Company, Blue Calypso, LLC,

entered into a subsidiary guarantee in favor of the investor.

As a development stage company, we have been and continue to be dependent upon outside sources of cash to pay operating expenses. We have had only nominal revenue and we expect operating losses to continue through the foreseeable future. Until we develop a consistent source of revenue to achieve a profitable level of operations that generates sufficient cash flow, we will need additional capital resources to fund growth and operations. We are continuing our efforts to raise capital through equity and/or debt offerings. However, there can be no assurance that we will be able to raise equity or debt capital on terms we consider reasonable and prudent, or at all. The availability of capital to us may be subject to the volatility in the financial markets, our future financial condition and credit rating, and whether sufficient assets are available to be used as debt collateral in connection with any future debt financing, among other factors. Future financings through equity investments are likely to be dilutive to the existing stockholders. Also, the terms of securities we issue in future capital transactions may be more favorable for our new investors. Newly issued securities may include preferences, superior voting rights, and the issuance of warrants or other derivative securities, which may have additional dilutive effects. Further, we may incur substantial costs in pursuing future capital and/or financing, including investment banking fees, legal fees, accounting fees, securities law compliance fees, printing and distribution expenses and other costs. We may also be required to recognize non-cash expenses in connection with certain securities we may issue, such as convertible notes and warrants, which may adversely impact our financial condition.

If we are unable to raise sufficient funding in our current private placement, we will need to seek funding from alternative sources. We have no assurance that future financing will be made available to us, and if made available to us, in amounts or on terms acceptable to us. If we are unable to raise any additional funding in our current private placement or from other sources, we will either have to suspend operations until we do raise capital or cease operations entirely.

Contractual Obligations

During 2011, the Company had a significant contractual obligation consisting of convertible promissory notes payable of \$1,500,000 that would have been due on December 1, 2011. These promissory notes automatically converted into 1,500,000 shares of Series A Convertible Preferred Stock on October 17, 2011. During the three months ended March 31, 2012, an additional 200,000 shares of Series A Convertible Preferred Stock were issued that provided \$200,000 of funding in the quarter. As indicated in footnote 8 of the financial statements, Blue Calypso has engaged the services of a related party, Aztec Systems, Inc., for software development, use of network operating center, and accounting. We have warrants outstanding for a total of 31,536,818 shares at a price of \$0.10 per share. We also have warrants outstanding for a total of 106,000 shares at a price of \$0.75 per share.

Off-Balance Sheet Arrangements

We do not maintain any off-balance sheet arrangements, transactions, obligations or other relationships with unconsolidated entities that would be expected to have a material current or future effect upon our financial condition or results of operations.

BUSINESS

We were incorporated as a Nevada corporation on March 2, 2007 under the name JJ&R Ventures, Inc. for the purpose of developing and marketing an educational book series, consisting of books, presentations and flash cards focusing on healthy nutrition for children. On or about July 2011, we were presented with a business opportunity by the management of a privately held Texas company named Blue Calypso Holdings, Inc. that upon evaluation was determined to be more desirable than our previous business plan. As a result, we suspended our efforts in relation to our original business plan and entered into negotiations with Blue Calypso Holdings, Inc. to consummate a reverse merger transaction.

In contemplation of a possible transaction with Blue Calypso Holdings, Inc., we changed our name from “JJ&R Ventures, Inc.” to “Blue Calypso, Inc.” on July 21, 2011 and completed a three and four tenths (3.4) for one (1) forward stock split of our common stock.

On September 1, 2011, in order to effectuate the reverse merger transaction, Blue Calypso Acquisition Corp., a wholly-owned subsidiary of ours, merged with and into Blue Calypso Holdings, Inc., with Blue Calypso Holdings, Inc. being the surviving corporation and becoming our wholly-owned subsidiary. In connection with this merger, we discontinued all of our prior operations and assumed the business of Blue Calypso Holdings, Inc. as our sole line of business.

Immediately following the closing of the reverse merger, we transferred all of our pre-merger assets and liabilities to JJ&R Ventures Holdings, Inc., a wholly-owned subsidiary, and transferred all of the outstanding stock of JJ&R Ventures Holdings, Inc. to Deborah Flores, our then majority stockholder and our former president, secretary, treasurer and sole director, in exchange for the cancellation of 51,000,000 shares of our common stock then owned by Ms. Flores.

On October 17, 2011, we merged with and into Blue Calypso, Inc., a Delaware corporation and wholly-owned subsidiary, for the sole purpose of changing our state of incorporation from Nevada to Delaware.

Blue Calypso Holdings, Inc. was incorporated as a Texas corporation in February 2010 as a holding company to hold a 100% single member ownership interest in Blue Calypso, LLC, a Texas limited liability company, which was formed on September 11, 2009. Blue Calypso Holdings, Inc. has developed a patented social mobile endorsement and brand loyalty platform through which brand loyalists (social media “fans and followers” and existing customers) are able and incentivized to become active digital brand “evangelists,” personally endorsing and sharing messages from advertisers.

The Company

Through our platform, participating consumers can use the mobile and social technologies they regularly use for digital communications to endorse our participating advertisers’ brands, offerings or causes. These consumer “endorsers” deliver advertiser-created content to their friends and followers and are often incented or rewarded for promoting participating advertisers’ brands. The content that is delivered through our platform can be targeted to different recipients based on specific conditions, such as geo-location, day-of-week, time-of-day, and even weather conditions.

We also offer an enterprise license to brands that create a trackable promotional campaign that is white-labeled in the partner brand’s look. We seek to leverage the host brand’s community of advocates to send them promotional offers which incentivize them to communicate new offers to their friends. Our technology tracks the spread of the message across all social media channels, earning the endorser incentives and recurring revenue for us.

Over the last five years, the world has seen social media, mobile technologies and digital advertising evolve dramatically and actually converge. Through this technological evolution, a sociological shift has occurred in how influential digital media can be when promoted within one’s social circles, “friend-to-friend.” We believe that people will actively endorse products with which they have a strong emotional connection or brand loyalty. When they do, these endorsements reach groups of like-minded individuals, as people generally associate with others of like mind. Applications such as Facebook, Twitter, Google+, FourSquare, Groupon, Living Social, Yelp and various blogs incorporate and build on this common idea. Our platform goes a step further, leveraging mobile and social technologies and rewarding the endorsers for their loyalty and performance. We believe that we have created a platform that solves advertisers’ desire for targeted and personal messaging as well as mobile subscribers’ desire for content relevance in advertising.

Through mobile and social media, everyone has their own unique and significant audience. According to Facebook, the average user has 130 friends; Twitter states the average user has 300 followers; and on average an individual has 25 unique frequent contacts they communicate with weekly via text messages or mobile calls. Active participation in

LinkedIn, Google+, Tumblr and/or a personal blog can further extend one's direct social reach significantly. With our platform, advertiser content is not bound by any single app, social media community, website, carrier or device. Once the message is shared by an endorser, it can be accessed via texts, Twitter "tweets" or LinkedIn or Facebook "posts." As a result, our individual endorsers have the capability to immediately reach hundreds or even thousands of people through their direct personal and digital social relationships.

Today, large companies are becoming their own media networks, disseminating digital content to their millions of email addresses, Facebook fans, Twitter followers, etc. These social media channels and mobile delivery capabilities have created a significant opportunity for companies to leverage their marketing assets by having their "fans" tell their friends about a company or product, thus reducing their media expenses and growing their return on investment.

We help companies who market to consumers by cultivating, activating, and monetizing their social media presence. Our technology facilitates content delivery across multiple social channels and then tracks performance, monitors engagement, and uses robust analytics to help client companies improve their marketing returns.

Brand content, such as promotions and offers, are offered by client companies to their fans, employees, and customers. Should these advocates choose to, they can forward these promotions and offers through social media channels with a personal message. Our technology tracks, monitors, and performs analytics for client to help them improve their returns on marketing investments.

Our technology allows us to help clients spread their marketing message, and can help them reach new prospective customers. This can be done by encouraging customers to learn more about a new product, watch a promotional video, increase "likes" on Facebook, increase followers on Twitter, join email lists, etc. This is done by encouraging advocates of a company to interact and personalize messages to people that they think would like to hear about an offer. Advocates of a company can add comments, a photo or video, and share it with their social networks. Brand swill many times offer incentives or VIP perks to advocates who share. Many times, brands will offer incentives in a loyalty program that already exists as a "thank you" to advocates for sharing a message.

It is also clear that many companies are beginning to see their employees as a key channel to spread the message about new products and promotions. We have created a new product, EmGage, that leverages our base technology of tracking, monitoring, and performing analytics on the spread of social media, but are targeting companies with large employee bases as the key channel of message distribution. By offering employees incentives, employers can encourage their employees to let their friends know about upcoming products and promotions, which can increase sales as well as employee satisfaction, and potentially reduce turnover.

Other products that we have in development, such as PopShare, allow companies to download our app to their website, which can increase the ease of sharing content and information across multiple social channels simultaneously.

We, leveraging our proprietary technology and patents, are constantly looking for opportunities to help companies spread their message more effectively and efficiently using social media channels as a significant cost savings vs. traditional media channels such as television, radio, and newspapers. We will continue to innovate, creating new products and services to help companies leverage the significant cost reduction capabilities that our technology offers.

Our proprietary ad-rendering and delivery engine gives advertisers the ability to serve multiple creative display ads within the same campaign, targeting such specific conditions as geo-location, day-of-week, time-of-day, and even weather conditions. Our technology identifies the recipient's circumstance upon campaign view and delivers the right message. We believe that our ability to implement targeted advertisements, including point-of-sale, geo-location specific offers, and metered mobile coupon redemptions, extends the capability of our platform beyond current digital or mobile advertising.

As a by-product of campaign delivery and recipient interaction, we offer analytics and business intelligence capabilities, which provide advertisers the ability to see how campaigns are delivered, where they are getting the most traction, and which are seeing the most activity. The platform also allows advertisers to assess the response to their messages in real-time and adjust their campaigns based on performance. For example, advertisers can launch multiple campaigns and monitor their analytics to see which content is getting a more viral response and igniting the most conversation.

The Blue Calypso platform is currently comprised of two primary components. The Blue Calypso Network, or back-end, includes the data warehouse of ad and related content, the ad rendering engine, endorser portal, brand portal, agency portal, administrative portal, and web services and communications clusters responsible for receipt and transmission of data and content. The second component is the mobile platform, installed on endorser smartphone devices or accessed via an endorser web portal, www.calyp.com, and called Calyp (pronounce "klijp"). The Calyp mobile application and website are the portals for endorsers to enter the community, initiate endorsements and interact with other endorsers. Endorsers can modify their interest categories to filter advertisements and track any rewards programs and other contests. Together, the Blue Calypso Network and Calyp mobile and web portal applications form our "system" and create smooth interaction and data flow between the endorser community, brand advertisers, and us. Our system is in its second generation, and we plan to release updated versions of all components of the system in

the future as we integrate to more social media communities and add additional advertiser and endorser features.

Market Opportunity

The global wireless industry continues to experience explosive growth, with consumers embracing mobile technologies like never before as new services, capabilities and cost efficiencies drive global adoption. Infonetics Research estimates global mobile phone subscribers will grow to 6.4 billion by 2015.

According to Cellular Telecommunications Industry Association (CTIA), at December 31, 2010, there were 302 million mobile subscribers in the United States, representing 96% of the United States population. The Cellular Telecommunications Industry Association reports that as of December 2010 there were 270 million data-capable devices, including 78.2 million smart phones or wireless-enabled personal digital assistants and 13.6 million wireless-enabled laptops, notebooks, tablets or wireless broadband modems. International Data Corporation research estimates that smart phone penetration will increase from approximately 30% in 2010 to 45% in 2015, while Nielsen expects that by the end of 2011 there will be more smart phones in use in the United States market than feature phones. We believe that we are just at the beginning of a new wireless era where smart phones will become the standard device consumers use to connect to friends, the Internet and the world at large.

A recent JP Morgan report predicts 2011 mobile ad spending will increase to \$1.2 billion. This is approximately double the 2010 mobile ad spending reported in the IAB Internet Advertising Report. In a recent study conducted by ABI Research, 27 percent of mobile phone users accessing websites using mobile phones clicked on a mobile banner ad or text link. One thousand United States consumers participated in the survey.

We believe that as advertisers adapt to the changing media and content distribution landscape, they will place an increasing priority on the next frontier of mobile while leveraging social media communities and properties. We believe that historical advertising media such as print, television and radio, and even Internet banner ads, are beginning to shift to mobile platforms and generally explore alternatives to traditional advertising techniques. Mobile platforms enable advertisers to put relevant messages out to a more highly targeted buyer community, while encouraging branded and personal content syndication. In addition, mobile devices have become a ubiquitous extension of many target buyers and a critical part of the lifestyle of most generations.

We believe that one of the most attractive characteristics of mobile consumers for advertisers is the opportunity for more accurate content targeting. Typical parameters include carrier, device type and mobile channel, with the possibility to add geo-location, behavioral, demographic and interest-based information (the latter two generally require user opt in) infused with user purchase history.

We believe that peer-to-peer or “friend-to-friend” advertising (also known as word-of-mouth advertising) is the most powerful and effective form of advertising. According to eMarketer, two-thirds of all economic activity in the United States is influenced by shared opinions about a product, brand or service. GfK NOP reports that 92% of consumers cite word-of-mouth as one of the best sources for ideas about new products, up from 67% a generation ago. Additionally, Forrester Research showed that over 60% of consumers trust product recommendations found in online sources like discussion boards, and Google’s research shows that 78% of consumers trust peer recommendations versus 14% from advertisers.

According to Forrester Research interactive marketing forecasts from 2011, interactive marketing spend in the United States should reach \$41 billion in 2012, growing to over \$76 billion in 2016. The two fastest sub-segments, mobile marketing and social media, should have a compounded annual growth rate of 38% and 26%, respectively. These two segments are the primary markets that we plan on competing in. We believe that the significant spend currently, combined with the superior forecasted growth in spending by marketers, present the best opportunity to monetize our technology innovations.

Mobile marketing has the ability to connect brands with users on an intimate one-to-one basis, providing customers with relevant information that is important to them. While the sector is still in its infancy, we believe that brands, operators, advertising executives, content publishers and technology enablers have high expectations regarding the potential of the mobile advertising market. We believe that our platform offers an effective tool for advertisers seeking to enter or expand their advertising presence in the mobile market, target specific customers with selected messages, and capitalize on the power of peer recommendation. We believe that any consumer product, retail or audience-based entity, whether for-profit or non-profit, is a potential user of our platform.

Marketing

We believe that we will attract advertisers and subscribers simultaneously by engaging with advertisers who have developed social media traction or have email contacts for existing customers and encouraging those brand loyalists to become subscribers who will be encouraged to join our program and endorse a particular advertiser. We believe that as potential advertisers see their customers become endorsers, they will appreciate the power of our platform.

We seek to work with large companies that spend much of their marketing budgets attracting new customers or encouraging their current customers to purchase more often. We market our white label product to them via current relationships that our team members have, or we leverage agency relationships as conduits to be introduced to

prospective clients. Further, we go to conferences and trade shows to provide a platform for us to communicate the benefits of our technology to prospective clients.

The initiatives described above are also aimed at attracting endorser interest. In addition, we attract endorsers through invitation by advertisers, through viral techniques within social media communities (e.g., when friends see friends participating in our platform), through direct marketing efforts (e.g., emails, attendance at community events and trade shows) and through word of mouth.

Advertisers

As a development stage company, we are in the early stages of developing a customer base. We enter into written agreements with each of our customers, which typically include a three to six month commitment on the part of our customers. Customers' fees are based on the services actually provided, *i.e.*, on the level of campaign activity selected, the level of consultation provided by us with respect to such campaign or campaigns, the level of specific targeting selected (*e.g.*, geo-location, day-of-week, time of day, etc.), any analytics purchased, the number of endorsements actually given and sometimes on results actually achieved. In accordance with our customer agreements, we reserve the right to close a customer account that has been inactive for more than 12 months and to terminate a customer's status as a registered advertiser for any reason. Our written agreements also include general terms and conditions.

We also pick up advertising campaigns for various advertisers who are not customers through our participation in affiliate programs through Amazon, LinkShare and Commission Junction. We have agreements directly with these three companies, not with the advertisers they represent. These agreements provide general payment terms, which are tied to actual generation of activity or purchases for their advertisers. Neither we nor our advertisers are obligated to pick up any advertisements through these affiliate programs.

Endorsers

An important strategic element of our business model is to ensure that each endorser has a positive experience using our platform. We aim to achieve this by providing them with access to innovative, timely and relevant content in addition to exclusive offers provided by the advertiser community. The goal is to provide messages and offers that endorsers will enjoy sharing within their professional and personal circles, and that recipients will enjoy receiving. We believe that our ability to automate features that allow the endorser to shape and group what type of content is shared within sub-sets of his or her personal and professional communications circles is of utmost importance in order to avoid the potential "annoyance factor."

When they sign up with us, endorsers agree to a set of written terms and conditions. These terms and conditions cover the general terms of our rewards programs and include a code of conduct aimed at curtailing potentially offensive, deceptive or otherwise harmful communications in connection with endorsements. We have the right to terminate an endorser's account due to inappropriate content, if an account is inactive for six months, or for a violation of our terms and conditions, which closure would result in the endorser's loss of any earned but unused rewards or perks. There are

no other penalties or fees endorsers may face for discontinuing their participation with your platform. Endorsers receive rewards and other benefits only to the extent that they provide endorsements for our advertisers.

Technology to Capture Data

Our platform allows the collection of business intelligence and analytics resulting from data accumulated as content is shared and consumed. Endorsers provide demographic data such as interests, age, income bracket, geographic region, historical usage patterns and hobbies, which is available to advertisers in targeting their campaigns. We do not share data, including any personally identifying information, at an individual endorser level. Our technology then allows the advertiser to monitor the full cycle of an advertising campaign from the first subscriber to the final redemption or intent to purchase. Given this data, we show each advertiser the return on investment (ROI) of each dollar spent on an advertising campaign, which allows us to prove the effectiveness of the platform in near real time, allows advertisers to test-market different campaigns and offers based on attributes such as income level, geography, store location, age group or other compelling criteria taken in combination, and helps advertisers quickly improve their campaign effectiveness.

Intellectual Property

We believe we have advantages over competitors in the mobile advertising industry due to the intellectual property we possess and have on file with the United States Patent and Trademark Office. In February 2010, we received United States Patent number 7,664,516 and in April 2012 we received United States Patent number 8,155,679. With the payment of all maintenance fees, these patents will not expire until December 14, 2026. We believe that the patents cover the core of our business, *i.e.*, a basic method and system for peer-to-peer advertising between mobile communication devices. We also have three continuation-in-part (CIP) patent applications pending which build on the functionality of our issued patent.

We believe that all of the technology that delivers our platform to both advertisers and endorsers has been developed and is fully owned by us with the exception of several web controls that are licensed by us pursuant to a royalty-free license with unlimited distribution rights. The architecture of the platform was designed to support millions of participants through server and application clustering and load-balancing. We believe the elegance of the data flow makes for an extremely light-weight and highly scalable system that can easily be enhanced. By using a standards-based SMS protocol coupled with tight integration to social communities such as Facebook, Twitter, LinkedIn and blogs as the primary delivery mechanisms, and by serving the dynamic content via a standard mobile web browser, we are capable of supporting most any receiving mobile device with Internet access. Platform smartphone support is available for Apple iPhone and Google Android devices, with development plans to support Microsoft Windows Mobile and a “touch” mobile web application that will be capable of operating on most popular smartphones with browser capabilities.

We own six registered trademarks in the United States. We also believe that we have common law rights in these trademarks that arise from use of the marks in commerce. The trademark registrations will continue in force as long as all renewals are timely paid and use of the marks continues. Our common law trademark rights will continue as long as the marks are used in commerce.

Back Office Support

Until August 2012, Aztec Systems, Inc. provided administrative and technical support services to us, at which time we brought all services provided by Aztec Systems to us in house. Aztec Systems was owned by our Chief Technology Officer and director, Andrew Levi, until its sale on June 15, 2012. Aztec Systems owns and manages an SAS70-II certified data center that has delivered high-availability secure managed services and hosting to its customers for over ten years, which continues to service our secure data hosting needs.

Outsourced Processes

We track the accumulated rewards that the endorsers earn as they interact with the platform. We outsource the endorser reloadable Visa Debit card processing to an organization that is responsible for filing necessary tax documents, preserving personally identifying information (PII/PCI) and maintaining and issuing the cash rewards to the endorsers.

Employees

As of December 31, 2012, we had a total of 11 employees. We have no labor union contracts and believe relations with our employees are satisfactory.

Competition

We face formidable competition in every aspect of our business, particularly from other companies that seek to connect social communities via mobile technologies and provide them with relevant advertising and brand content. First and foremost, we consider ourselves a next generation brand loyalty and rewards platform, so we believe our primary competitors are companies that embrace true brand loyalty, not just providers of discounted transactions. Currently, we consider our primary competitors to be Zuberance, MyLikes, WeReward (IZEA), and BzzAgent (recently acquired by Dunhumby). Each of these companies is different in terms of size, market share and other unique attributes of their offering where all but BzzAgent are early stage and, with the exception of IZEA, are privately held so very little detailed information is available. We believe that this social mobile marketing and advertising space is quite large with no first movers or any company with a notable share of the market. We believe that our approach to the market, value proposition to both the advertiser and Endorser communities, use of cash incentives, and our strong intellectual property are clear differentiators in a nascent yet quickly evolving industry for social mobile word-of-mouth advertising and marketing.

We also face competition from other mobile and Internet advertising providers, including companies that are not yet known to us. We may compete with companies that sell products and services online, because these companies, like us, are trying to attract users to their websites to search for information about products and services. In addition to Internet companies, we face competition for advertising dollars from companies that offer traditional media advertising

We compete to attract and retain relationships with endorsers and advertisers. The bases on which we compete differ among the groups.

- *Endorsers.* We compete to attract and retain endorsers of our advertisers' products and services. We provide our endorsers with cash and other brand loyalty-based incentives but we compete with other social networking environments for the attention and mind share of the endorsers. We believe that our unique value proposition to endorsers is the opportunity to earn meaningful cash incentives and exclusive VIP perks, as well as the quality of our platform.
- *Advertisers.* We compete to attract and retain advertisers. We compete in this area principally on the basis of the return on investment realized by advertisers using our mobile advertising platform. We also compete based on the quality of customer service, features and ease of use of our platform. We believe that our unique value proposition to advertisers is the speed and method of our ad delivery system; the quality of our analytics and business intelligence available in near real-time, and the ability to target recipients and content so specifically.

We believe that we compete favorably on the factors described above. However, product advertising, marketing, awareness and branding through social media sites is an extremely competitive space. As we expand our product offering to include white label products, employee engagement products, instant access products, as well as other technology plays, we will continue to face new competitors. Further, as the technology marketplace is always expanding, new competitors continuously innovate, and can become a competitor in the future.

Government Regulation

Aspects of the digital marketing and advertising industry and how our business operates are highly regulated. We are subject to a number of domestic and, to the extent our operations are conducted outside the U.S., foreign laws and regulations that affect companies conducting business on the Internet and through other electronic means, many of which are still evolving and could be interpreted in ways that could harm our business. In particular, we are subject to rules of the Federal Trade Commission (“FTC”), the Federal Communications Commission (“FCC”) and potentially other federal agencies and state laws related to our advertising content and methods, the Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003, or CAN-SPAM Act, which establishes certain requirements for commercial electronic mail messages and specifies penalties for the transmission of commercial electronic mail messages that follow a recipient’s opt-out request or are intended to deceive the recipient as to source or content, federal and state regulations covering the treatment of member data that we collect from endorsers, and federal and state rules related to our use of prepaid Visa debit cards to compensate our endorsers.

U.S. and foreign regulations and laws potentially affecting our business are evolving frequently. We are, and will continue to update and improve our regulatory compliance features and functionality, and we will need to continue to identify and determine how to effectively comply with all the regulations to which we are subject now or in the future. If we are unable to identify all regulations to which our business is subject and implement effective means of compliance, we could be subject to enforcement actions, lawsuits and penalties, including but not limited to fines and other monetary liability or injunction that could prevent us from operating our business or certain aspects of our business. In addition, compliance with the regulations to which we are subject now or in the future may require changes to our products or services, restrict or impose additional costs upon the conduct of our business or cause users to abandon material aspects of our services. Any such action could have a material adverse effect on our business, results of operations and financial condition.

The Federal Trade Commission (“FTC”) adopted Guides Concerning the Use of Endorsements and Testimonials in Advertising (“Guides”) on October 5, 2009. The Guides recommend that advertisers and publishers clearly disclose in third-party endorsements made online, such as in social media, if compensation was received in exchange for said endorsements. Because our business connects endorsers and advertisers, relies on endorsers sharing their brand endorsements within their digital social circles, and both we and endorsers may earn cash and other incentives, any failure on our part to comply with the Guides may be damaging to our business. We are currently taking several steps to ensure that our endorsers indicate in social media posts that compensation is being provided to the endorsers, including by listing the phrase “paid” or “ad” or other appropriate language in advertisements that our endorsers circulate on social media. We also advise endorsers of the need to comply with the Guides, and we can terminate accounts with endorsers for noncompliance. Nonetheless, the FTC could potentially identify a violation of the Guides, which could subject us to a financial penalty or loss of endorsers or advertisers.

In the area of information security and data protection, many states have passed laws requiring notification to users when there is a security breach for personal data, such as the 2002 amendment to California’s Information Practices Act, or requiring the adoption of minimum information security standards that are often vaguely defined and difficult to practically implement. The costs of compliance with these laws may increase in the future as a result of changes in interpretation. Furthermore, any failure on our part to comply with these laws may subject us to significant liabilities.

We are also subject to federal, state, and foreign laws regarding privacy and protection of member data. Any failure by us to comply with these privacy-related laws and regulations could result in proceedings against us by governmental authorities or others, which could harm our business. In addition, the interpretation of data protection laws, and their application to the Internet is unclear and in a state of flux. There is a risk that these laws may be interpreted and applied in conflicting ways from state to state, country to country, or region to region, and in a manner that is not consistent with our current data protection practices. Complying with these varying international requirements could cause us to incur additional costs and change our business practices. Further, any failure by us to adequately protect our members’ privacy and data could result in a loss of member confidence in our services and ultimately in a loss of members and customers, which could adversely affect our business.

We post on our website our privacy policy and user agreement, which describe our practices concerning the use, transmission and disclosure of member data. Any failure by us to comply with our privacy policy and user agreement could result in proceedings against us by members, customers, governmental authorities or others, which could harm our business.

Many states have passed laws requiring notification to subscribers when there is a security breach of personal data. There are also a number of legislative proposals pending before the United States Congress, various state legislative bodies and foreign governments concerning data protection. In addition, data protection laws in Europe and other jurisdictions outside the United States may be more restrictive, and the interpretation and application of these laws are still uncertain and in flux. It is possible that these laws may be interpreted and applied in a manner that is inconsistent with our data practices. If so, in addition to the possibility of fines, this could result in an order requiring that we change our data practices, which could have an adverse effect on our business. Furthermore, the Digital Millennium Copyright Act has provisions that limit, but do not necessarily eliminate, our liability for linking to third-party

websites that include materials that infringe copyrights or other rights, so long as we comply with the statutory requirements of this Act. Complying with these various laws could cause us to incur substantial costs or require us to change our business practices in a manner adverse to our business.

The CARD Act, as well as the laws of most states, contains provisions governing product terms and conditions of gift cards, gift certificates, stored value or prepaid cards or coupons (“prepaid cards”). The CARD Act and its implementing regulations concerning prepaid cards located in Regulation E are administered by the Consumer Financial Protection Bureau (the “CFPB”), which was formed as a result of the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”).

The reloadable branded Visa debit cards provided to endorsers are prepaid cards that fall under the jurisdiction of the CFPB. In addition, the Company is indirectly subject to supervision by the appropriate Federal banking regulator of the bank that issues the reloadable branded Visa debit cards. In addition, certain state and foreign jurisdictions have laws that govern disclosure and certain product terms and conditions, including restrictions on expiration dates and fees that may apply to reloadable branded Visa debit cards. However, the CARD Act and its implementing regulations, as well as a number of states and certain foreign jurisdictions, also have exemptions from the operation of these provisions or otherwise modify the application of these provisions applicable to prepaid cards that are issued as part of a loyalty, award or promotional program.

We believe that the reloadable branded Visa debit cards used in this program fall within the exemption under the CARD Act for loyalty, award or promotional programs contained in Regulation E because the cards are part of a referral program that subject to certain limitations provides prepaid cards in exchange for referring other potential consumers to a merchant, the cards are redeemable at any place Visa debit cards are accepted and the cards and other materials contain required disclosures set forth in the CARD Act provisions in Regulation E. However, regardless of an exemption for the reloadable branded Visa debit cards under the CARD Act and its implementing regulations, in those states that prohibit or otherwise restrict expiration dates on prepaid cards that are defined to include our reloadable branded Visa debit cards and do not have exemptions that apply to our Visa debit cards, the reloadable branded Visa debit cards used in our program may be required to be honored for full value until redeemed.

In addition, some states and foreign jurisdictions also include prepaid cards under their unclaimed and abandoned property laws which require companies to remit to the government the value of the unredeemed balance on the prepaid cards after a specified period of time (generally between one and five years) and subject companies to certain reporting and recordkeeping obligations.

Various federal laws, such as the Bank Secrecy Act and the USA PATRIOT Act, impose certain anti-money laundering requirements on companies that are financial institutions. These laws are designed to prevent the U.S. financial system from being used to launder money generated from illegal conduct, such as illegal drug smuggling, as well as terrorist financing. For these purposes, “financial institutions” is broadly defined and includes “providers of prepaid access” and “sellers of prepaid access” such as prepaid cards like our Visa debit cards. Examples of anti-money laundering requirements imposed on financial institutions include customer identification and verification programs, record retention policies and procedures, transaction monitoring and reporting, and reporting suspicious activities to law enforcement. The Financial Crimes Enforcement Network (“FinCEN”), a division of the U.S. Treasury Department tasked with implementing the requirements of the Bank Secrecy Act and the USA PATRIOT Act, published a final rule on July 29, 2011 setting forth the scope and requirements for certain parties involved in prepaid cards, but also extended the date for compliance with most aspects of the final rule until March 31, 2012. We have commenced discussions with the entities that assist us in issuing our reloadable branded Visa debit cards to our endorser and believe we will be able to amend our agreements with these parties prior to the March 31, 2012 effective date to, among other things, establish that these third parties (rather than us) are the “providers of prepaid access” under the FinCEN final rule, which will subject them (rather than us) to the Bank Secrecy Act program compliance requirements discussed above and require them (rather than us) to register with FinCEN as a money services business. Our agreements with our vendors also include other terms that we believe protect us from being deemed a “seller of prepaid access,” for example, they are limited to \$5,000 in transactions per person and per day and the program requires that complete cardholder information be provided for each card issued at the time of issuance,

including name, address, home phone number (if available), date of birth and social security number. Accordingly, the Company is not a “provider” or “seller” of prepaid access subject to these Bank Secrecy Act and USA Patriot Act laws and regulations based on our agreement with our vendor and our role with respect to the distribution of the cards to customers.

In addition, foreign laws and regulations, such as the European Directive on the prevention of the use of the financial system for the purpose of money laundering and terrorist financing, impose certain anti-money laundering requirements on companies that are financial institutions or that provide financial products and services. Although we do not believe we are a financial institution or otherwise subject to these laws and regulations, it is possible that we could be considered a financial institution or provider of financial products.

Our endorsers communicate across email, mobile, social and/or web-based channels. These communications are governed by a variety of U.S. federal, state, and foreign laws and regulations. With respect to email campaigns, for example, in the United States, the Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003, or the CAN-SPAM Act, establishes certain requirements for the distribution of “commercial” email messages for the primary purpose of advertising or promoting a commercial product, service, or Internet website and provides for penalties for transmission of commercial email messages that are intended to deceive the recipient as to source or content or that do not give opt-out control to the recipient. The U.S. Federal Trade Commission, a federal consumer protection agency, is primarily responsible for enforcing the CAN-SPAM Act, and the U.S. Department of Justice, other federal agencies, state attorneys general, and Internet service providers also have authority to enforce certain of its provisions.

The CAN-SPAM Act’s main provisions include:

§ prohibiting false or misleading email header information;

§ prohibiting the use of deceptive subject lines;

§ ensuring that recipients may, for at least 30 days after an email is sent, opt out of receiving future commercial email messages from the sender, with the opt-out effective within 10 days of the request;

§ requiring that commercial email be identified as a solicitation or advertisement unless the recipient affirmatively assented to receiving the message; and

§ requiring that the sender include a valid postal address in the email message.

The CAN-SPAM Act preempts most state restrictions specific to email marketing. However, some states have passed laws regulating commercial email practices that are significantly more punitive and difficult to comply with than the CAN-SPAM Act, particularly Utah and Michigan, which have enacted do-not-email registries listing minors who do not wish to receive unsolicited commercial email that markets certain covered content, such as adult content or content regarding harmful products. Some portions of these state laws may not be preempted by the CAN-SPAM Act.

Violations of the CAN-SPAM Act’s provisions can result in criminal and civil penalties, including statutory penalties that can be based in part upon the number of emails sent, with enhanced penalties for commercial email senders who harvest email addresses, use dictionary attack patterns to generate email addresses, and/or relay emails through a network without permission.

With respect to text message campaigns, for example, the CAN-SPAM Act and regulations implemented by the U.S. Federal Communications Commission pursuant to the CAN-SPAM Act, and the Telephone Consumer Protection Act, also known as the Federal Do-Not-Call law, among other requirements, prohibit companies from sending specified

types of commercial text messages unless the recipient has given his or her prior express consent.

We, our endorsers and our advertisers may all be subject to various provisions of the CAN-SPAM Act. If we are found to be subject to the CAN-SPAM Act, we may be required to change one or more aspects of the way we operate our business.

If we were found to be in violation of the CAN-SPAM Act, other federal laws, applicable state laws not preempted by the CAN-SPAM Act, or foreign laws regulating the distribution of commercial email, whether as a result of violations by our endorsers or any determination that we are directly subject to and in violation of these requirements, we could be required to pay penalties, which would adversely affect our financial performance and significantly harm our reputation and our business.

In addition, because our services are accessible worldwide, certain foreign jurisdictions may claim that we are required to comply with their laws, including in jurisdictions where we have no local entity, employees, or infrastructure.

Properties

We owned no properties and had no property leases at December 31, 2012. We currently have one sub-lease for office space at our current location.

Legal Proceedings

On July 31, 2012, the Company filed a patent infringement complaint against Groupon, Inc. alleging infringement of two of its patents, 7,664,516 and 8,155,679, focused on its peer-to-peer marketing technology. The complaint was filed in the U.S. District Court in the Eastern District of Texas.

On August 24, 2012, the Company filed a patent infringement complaint against Living Social, Inc. alleging infringement of two of its patents, 7,664,516 and 8,155,679, focused on its peer-to-peer marketing technology. The complaint was filed in the U.S. District Court in the Eastern District of Texas.

On October 17, 2012, the Company filed patent infringement complaints against YELP, Inc. and IZEA, Inc. The suits allege infringement of two of its patents, 7,664,516 and 8,155,679, focused on its peer-to-peer marketing technology. The complaint was filed in the U.S. District Court in the Eastern District of Texas.

On November 6, 2012, the Company filed patent infringement complaints against MyLikes. and Foursquare. The suits allege infringement of two of its patents, 7,664,516 and 8,155,679, focused on its peer-to-peer marketing technology. The complaint was filed in the U.S. District Court in the Eastern District of Texas.

Other than as noted above, the Company is not a party to any pending legal proceeding nor is its property the subject of any pending legal proceeding that is not in the ordinary course of business or otherwise material to the financial condition of its business. Further, to the knowledge of management, no director or executive officer is party to any action in which any has an interest adverse to us.

EXECUTIVE OFFICERS AND DIRECTORS

Set forth below is certain information regarding our current executive officers and directors. Each of the directors listed below was appointed to our board of directors to serve until our next annual meeting of stockholders or until his successor is elected and qualified. All directors hold office for one-year terms until the election and qualification of their successors.

Name	Age	Position with the Company	Director/Officer Since
William Ogle	45	Chairman of the Board and Chief Executive Officer, Director	2012
Andrew Levi	46	Chief Technology Officer, Director	2011
Ian Wolfman	39	Director	2012
Charles Thomas	54	Director	2012
Andrew Malloy	55	Director	2013
David Polster	59	Chief Financial Officer	2012

Biographical Information

William Ogle, Chairman of the Board and Chief Executive Officer, Director

Mr. Ogle was appointed as our Chairman and Chief Executive Officer in June 2012. Prior to joining the Company, Mr. Ogle previously served as chief marketing officer at Motorola Mobility, an S&P 500 company that was acquired by Google in May 2012. Mr. Ogle joined Motorola Mobility in 2009. Prior to that, he served as chief marketing officer for Samsung Telecommunications America. Earlier in his career, he was chief marketing officer at Pizza Hut and held brand management positions at Proctor & Gamble and Sara Lee Corp. He received his bachelor's degree in business administration from the University of Cincinnati. Mr. Ogle serves on the board of directors of the United States Ad Council and the Arts Community Alliance Board and the board of advisors of the CMO Council. His achievements, experience and knowledge led the board to believe that he is qualified to serve on the board of directors.

Andrew Levi, Chief Executive Officer, Director.

Mr. Levi founded Blue Calypso Holdings, Inc. in September 2009. In June 2012, he was appointed as our Chief Technology officer. He previously served as our Chairman and Chief Executive Officer. From November 1991 until June 2012, Mr. Levi served as the founder, president and chief executive officer of Aztec Systems, Inc., a Dallas-based provider of mid-market ERP, managed services and related technology solutions. Mr. Levi has been named to SmartPartner Magazine's list of "50 Smartest People" in the technology industry and to D Magazine's "Top Entrepreneurs under 40." Mr. Levi has been involved in numerous business and association ventures in the technology industry such as Boardroom Software, Inc., Critical Devices, Inc., Aztec Business Solutions, L.L.P., REES Associates, the board of the International Association of Microsoft Certified Partners (IAMCP) and the Information Technology Solution Provider Alliance (ITSPA). Mr. Levi holds a Bachelor of Science degree in finance from Florida State University in addition to numerous technical certifications and seven United States patents. His achievements, experience and knowledge led the board to believe that he is qualified to serve on the board of directors.

David Polster, Chief Financial Officer.

Mr. Polster was appointed as our Chief Financial Officer in March 2012. Prior to joining the Company, Mr. Polster served as vice president and controller of ASAP Software from April 1992 until its acquisition by Dell in November 2007. Mr. Polster also previously served as the director of financial analysis of Dell's software and peripherals business. Earlier in his career, Mr. Polster held the positions of treasurer of Katalco Corporation and controller of Berlin Packaging, Inc. He received his BA from the University of Colorado and an MBA from Northwestern University's Kellogg School of Management. He is a CPA and CMA and is a member of the Beta Gamma Sigma Honorary Business Society.

Ian Wolfman, Director

Mr. Wolfman was appointed to our board in June 2012. Mr. Wolfman has served as chief marketing officer of MEplusYOU, a strategic and creative agency based in Dallas, Texas since August 1998. As chief marketing officer of MEplusYOU, he leads the marketing, public relations and business development functions. Mr. Wolfman received an MBA from the Cox School of Business at Southern Methodist University and a bachelor of Science in corporate communications from the University of Texas. His achievements, experience and knowledge led the board to believe that he is qualified to serve on the board of directors.

Charles Thomas, Director

Mr. Thomas was appointed to our board in June 2012. He is the senior vice president of sales for Centro, a media logistics company based in Chicago, Illinois. At Centro, Mr. Thomas leads the company's sales efforts and oversees the strategic direction of the sales force. Mr. Thomas was associated with Time Inc. from 1996 through 1998. Mr. Thomas became the company's first online ad sales person and was promoted to advertising sales director and VP of online sales and marketing. During his tenure at Time Inc., Charlie also contributed to the industry as a founding member of the Internet Advertising Bureau (IAB). Charlie then joined Broadcast.com as the VP of advertising sales, which was later purchased by Yahoo. Charlie remained Yahoo's central region sales VP until 2007 and was later promoted to the VP of display sales strategy. When Charlie left Yahoo, he founded Step Ahead Strategies (SAS), a sales and marketing consulting firm.

Andrew Malloy, Director

Mr. Malloy was appointed to our board in January 2013. Mr. Malloy is a Managing Director of Monument Capital Group LLC, a Washington DC based private investment firm, where he serves as the head of their Denver, Colorado office. He has 30 years of experience in alternative investments, family office and wealth management industries. Prior to joining Monument Capital Group, Mr. Malloy served as a Managing Director of Massey Quick & Co., a multi-family investment office, from March 2011 through December 2011. Prior to joining Massey Quick, he served as a Managing Principal of Shepherd Kaplan LLC, an investment advisory firm based in Boston, Massachusetts from February 2009 through July 2010. Previous to Shepherd Kaplan, Mr. Malloy was an initial investor in, and the Director of Business Strategy and Development for WisdomTree Asset Management, Inc. from June 2006 through October 2008. Mr. Malloy also previously served as a Senior Managing Director and the Chief Investment Officer of TAG Associates, Ltd., as a Senior Vice President at Oppenheimer & Co. He also served in the corporate and executive services group of Bear, Stearns & Co. Mr. Malloy is also an Associate General Partner of his family's real estate holding company. He attended Villanova University and the Harvard Business School Executive MBA program.

Independent Directors

Our board of directors has determined that each of Messrs. Ian Wolfman, Charles Thomas and Andrew Malloy is independent within the meaning of applicable listing rules of the Nasdaq Stock Market and the rules and regulations promulgated by the Securities and Exchange Commission. We anticipate that we will add additional independent directors in the future.

Committees of the Board of Directors

Audit Committee. We established an audit committee of the board of directors on October 25, 2011. The audit committee consists of Messrs. Wolfman, Thomas and Malloy and, each of whom our board has determined to be financially literate and qualify as an independent director under Section 5605(a)(2) of the rules of the Nasdaq Stock Market. In addition, Mr. Malloy qualifies as a financial expert, as defined in Item 407(d)(5)(ii) of Regulation S-K. The function of the audit committee is to oversee our accounting and financial reporting and the audits of our financial statements. The audit committee assists the board in monitoring the integrity of the financial statements, the qualifications, independence and appointment of the independent registered public accounting firm, the performance of our internal audit function and independent auditors, our systems of internal control and our compliance with legal and regulatory requirements. Copies of our audit committee charter can be obtained free of charge from our web site, www.bluecalypso.com.

Compensation Committee. We established a compensation committee of the board of directors October 25, 2011. The compensation committee consists of Messrs. Wolfman, Thomas and Malloy, each of whom our board has determined qualifies as an independent director under Section 5605(a)(2) of the rules of the Nasdaq Stock Market, as an “outside director” for purposes of Section 162(m) of the Internal Revenue Code and as a “non-employee director” for purposes of Section 16b-3 under the Exchange Act. The function of the compensation committee is to assist the board in overseeing our management compensation policies and practices, including (i) determining and approving the compensation of the our chief executive officer and other executive officers, (ii) reviewing and approving management incentive compensation policies and programs, and exercising discretion in the administration of such programs, (iii) reviewing and approving the form and amount of director compensation and (iv) reviewing and approving equity compensation programs for employees and exercising discretion in the administration of such programs. Copies of our compensation committee charter can be obtained free of charge from our web site, www.bluecalypso.com.

Code of Ethics

We have adopted a Code of Business Conduct and Ethics that applies to directors, officers and other employees of the Company and its subsidiaries, including our principal executive officer, principal financial officer and principal accounting officer. Copies of the code can be obtained free of charge from our web site, www.bluecalypso.com. We intend to post any amendments to; or waivers from, our code of ethics on our web site.

EXECUTIVE COMPENSATION

2012 and 2011 Summary Compensation Table

The following table sets forth the compensation earned by the Company's principal executive officer, and each of the Company's two most highly compensated executive officers other than the principal executive officer whose compensation exceeded \$100,000 (collectively, the "Named Executive Officers"), during the years ended December 31, 2012 and 2011.

Name and Principal Position	Year	Salary (\$)	Bonus (\$)	Stock Awards (\$)	Option Awards (\$)	Nonequity	Nonqualified	All Other Compensation (\$)	Total (\$)
						Incentive Plan Compensation (\$)	Deferred Compensation (\$)		
William Ogle	2012	241,026		5,234,337	1,719,139				7,194,502
Chairman and Chief Executive Officer (1)	2011								
David Polster									
Chief Financial Officer (2)	2012	64,625							64,625
Andrew Levi									
Chief Technology Officer,									
Former Chairman and Chief Executive Officer (2)	2012		—	—	—\$	—	—	—	—
J	2011		—	—	—\$	—\$	—\$	—\$	—
James Craig									
Former Chief Financial Officer	2012	18,974					—		18,974
Deborah Flores									
Former President, Secretary and Treasurer (3)	2011		—	—	—\$	—	—	—	—

(1) Mr. Ogle was appointed as our chairman and chief executive officer effective June 11, 2012.

(2) Mr. Levi served as our chairman and chief executive officer from September 1, 2011 through June 10, 2012. He currently serves as our chief technology officer.

(3) Ms. Flores served as our president, secretary, treasurer and as a member of our board of directors from March 2, 2007 through September 1, 2011.

During the years ended December 31, 2011 and December 31, 2010, our named executive officers did not receive a salary, and do not have any other compensation arrangements in place, except that they are eligible to receive discretionary awards under the Blue Calypso, Inc. 2011 Long-Term Incentive Plan.

On June 1, 2012, we entered into an employment letter agreement with our Chief Executive Officer, William Ogle, which was effective on June 11, 2012. The agreement does not have a specified term and Mr. Ogle's employment is on an at-will basis. The agreement provides that Mr. Ogle is entitled to an annual base salary of \$400,000. He is also entitled to annual incentive-based compensation with a target value of 100% of his base salary with an upper limit of 200%, to be determined and administered by our board of directors. Such incentive-based compensation may be paid in the form of shares of our common stock or cash. Mr. Ogle will also receive a restricted stock award equal to 7% of our total issued and outstanding shares calculated as of June 11, 2012. The restricted stock award will vest: (i) one-third on the one year anniversary of the grant date, and (ii) the remaining two-thirds will vest pro rata in eight equal quarterly installments. Mr. Ogle may also be offered additional annual equity awards of up to 200% of his base salary subject to mutually agreeable and reasonable targets beginning in 2013. In addition, on June 11, 2012, pursuant to his employment letter agreement, we also granted to Mr. Ogle options to purchase 3% of the issued and outstanding shares of common stock of the Company on a fully-diluted basis. The options will be exercisable at an exercise price equal to \$0.10 per share for a term of 10 years. Mr. Ogle will also be eligible to participate in the Company's comprehensive medical and dental program. In the event that we terminate Mr. Ogle's employment without cause or Mr. Ogle terminates his employment for good reason, we will pay him his base salary for a period of 12 months from the date of separation and he will be eligible to receive any incentive compensation subject to the applicable targets being achieved. During such severance period, we will pay the premiums for health insurance coverage substantially similar to the benefits provided to Mr. Ogle and his dependents as of the date of termination.

2011 Long-Term Incentive Plan

On August 31, 2011, the board adopted, subject to stockholder approval, the Blue Calypso, Inc. 2011 Long-Term Incentive Plan. Our stockholders approved the Blue Calypso, Inc. 2011 Long-Term Incentive Plan on September 9, 2011. The Blue Calypso, Inc. 2011 Long-Term Incentive Plan is intended to enable us to remain competitive and innovative in our ability to attract, motivate, reward and retain the services of key employees, certain key contractors, and non-employee directors. The Blue Calypso, Inc. 2011 Long-Term Incentive Plan provides for the granting of incentive stock options, nonqualified stock options, stock appreciation rights, restricted stock, restricted stock units, performance awards, dividend equivalent rights, and other awards which may be granted singly, in combination, or in tandem, and which may be paid in cash or shares of common stock. The Blue Calypso, Inc. 2011 Long-Term Incentive Plan is expected to provide flexibility to our compensation methods in order to adapt the compensation of employees, contractors, and non-employee directors to a changing business environment, after giving due consideration to competitive conditions and the impact of federal tax laws. Subject to certain adjustments, the maximum number of shares of our common stock that may be delivered pursuant to awards under the Blue Calypso, Inc. 2011 Long-Term Incentive Plan is 35,000,000 shares.

Director Compensation

Edgar Filing: BLUE CALYPSO, INC. - Form POS AM

We do not currently compensate our directors, except as described below. We expect that the future compensation arrangements may be comprised of a combination of cash and/or equity awards.

On May 31, 2012, we granted stock options under the Blue Calypso, Inc. 2011 Long-Term Incentive Plan to the directors as follows:

<u>Name</u>	<u>Shares Subject to Option</u>	<u>Exercise Price</u>	<u>Vesting Provisions</u>	<u>Expiration Date</u>
Charles Thomas (1)	375,000	\$0.454	Pro-rata vesting quarterly over two years	May 31, 2022
Ian Wolfman (1)	375,000	\$.0454	Pro-rata vesting quarterly over two years	May 31, 2022

(1) Messrs. Thomas and Wolfman were appointed to the board of directors effective May 31, 2012.

Outstanding Equity Awards at Fiscal Year End

The following table provides information about the number of outstanding equity awards held by our named executive officers as of December 31, 2012.

Name	Option Awards				Stock Awards			Equity Incentive Plan Awards: Market Payout Value of Unearned Shares, Other Rights That Have Not Vested (\$)
	Number of Securities Underlying Unexercised Options (#) Exercisable	Number of Securities Underlying Unexercised Options (#) Unexercisable	Number of Securities Underlying Unexercised Options (#) Equity Incentive Plan Awards:	Number of Option Exercise Price (\$)	Market Value of Shares or Units of Stock That Have Not Vested (\$)	Number of Shares, Other Rights That Have Not Vested (#)	Payout Value of Unearned Shares, Other Rights That Have Not Vested (\$)	

Edgar Filing: BLUE CALYPSO, INC. - Form POS AM

William Ogle	5,608,218(1)	5,608,218	0.10	6/11/2022	13,085,842(2)	6,542,921
David Polster	250,000(3)	250,000	0.50	7/18/2022		

(1) All of these options were immediately exercisable on June 11, 2012.

(2) Of these shares, 4,361,947 shares will vest on June 11, 2013, and the remaining 8,723,895 shares will vest pro-rata in eight equal installments with each installment vesting on the last day of each calendar quarter.

(3) All of these options will vest on July 18, 2013. In the event that Mr. Polster's employment is terminated by reason other than cause prior to March 18, 2013, 75% of the options will vest and become exercisable.

SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The following table sets forth the number and percentage of outstanding shares of common stock and other classes of our equity securities entitled to vote on all matters submitted to a vote by holders of common stock beneficially owned as of February 5, 2013, by (i) each of our directors and named executive officers; (ii) all persons who are known by us to be beneficial owners of 5% or more of our outstanding common stock; and (iii) all of our officers and directors as a group. The percentages of common stock beneficially owned are reported on the basis of regulations of the Securities and Exchange Commission governing the determination of beneficial ownership of securities. Under the rules of the Securities and Exchange Commission, a person is deemed to be a beneficial owner of a security if that person has or shares voting power, which includes the power to vote or to direct the voting of the security, or investment power, which includes the power to dispose of or to direct the disposition of the security. Unless otherwise noted, to our knowledge and subject to community property laws where applicable, each of the persons listed below has sole voting and investment power with respect to the shares indicated as beneficially owned by such person. Our common stock is our only class of voting securities.

Name and Address of Beneficial Owner	Amount and Nature of Beneficial Ownership(1)	Percentage of Class (1)(2)
William Ogle 19111 North Dallas Parkway, Suite 200 Dallas, TX 75287	18,956,560(3)	13.14%
Andrew Levi 19111 North Dallas Parkway, Suite 200 Dallas, TX 75287	51,473,815(4)	37.13%
David Polster 19111 North Dallas Parkway, Suite 200 Dallas, TX 75287	-	-
Ian Wolfman 19111 North Dallas Parkway, Suite 200 Dallas, TX 75287	140,625(5)	*

(1) Shares of common stock beneficially owned and the respective percentages of beneficial ownership of common stock assumes the exercise of all options, warrants and other securities convertible into common stock beneficially owned by such person or entity currently exercisable or exercisable within 60 days of the date of this prospectus, except as otherwise noted. Shares issuable pursuant to the exercise of stock options and warrants exercisable within 60 days are deemed outstanding and held by the holder of such options or warrants for computing the percentage of outstanding common stock beneficially owned by such person, but are not deemed outstanding for computing the percentage of outstanding common stock beneficially owned by any other person.

(2) These percentages have been calculated based on 138,381,367 shares of common stock outstanding as of February 5, 2013.

(3) Includes (i) 5,608,218 shares issuable upon exercise of vested stock options, (ii) 250,000 shares issuable upon conversion of 10% convertible debentures, and 13,085,842 shares issued pursuant to a restricted stock grant.

(4) Includes (i) 250,000 shares issuable upon conversion of 10% convertible debentures, and (ii) 22,954,395 shares of common stock which are being held in escrow until April 19, 2013. Pursuant to the stockholder's agreement, Mr. Levi agreed that if the Company issues shares of Common Stock in a financing transaction or in connection with the hiring or retention of senior management or directors during such period of time, the corresponding number of escrowed shares will be cancelled and returned to the Company's treasury.

(5) Includes 140,625 shares issuable upon exercise of vested stock options.

(6) Rachel Glicksman, as managing director of Esousa Holdings LLC, has voting and dispositive control over such shares.

(7) Based upon a Schedule 13G/A filed by Esousa Holdings, LLC on February 14, 2012.

(8) Steven B. Solomon, as managing director of LMD Capital, LLC, has voting and dispositive control over such shares.

(9) Based upon a Schedule 13G/A filed by LMD Capital, LLC on February 14, 2012.

SELLING STOCKHOLDERS

Up to 9,790,190 shares of our common stock are being offered by this prospectus, including (i) up to 5,191,533 shares of our common stock, (ii) up to 3,639,732 shares of our common stock issuable upon the conversion of an outstanding 8% convertible note issued on November 9, 2012, and (iii) up to 958,935 shares of our common stock issuable upon the exercise of outstanding common stock purchase warrants, all of which are being registered for sale for the accounts of the selling stockholders. Each of the transactions by which the selling stockholders acquired their securities from us was exempt under the registration provisions of the Securities Act of 1933, as amended.

The 8% convertible note is convertible into shares of common stock at a conversion price of \$0.15 per share (subject to adjustment for stock dividends, stock splits and similar transactions). Upon effectiveness of the registration statement of which this prospectus forms a part, the 8% convertible will automatically convert into shares of our common stock.

The warrants have exercise prices ranging from \$0.15 per share to \$0.50 per share (subject to adjustment for stock dividends, stock splits. Certain of the warrants also provide for anti-dilution adjustments in the event that we issue securities at a price that is less than the applicable exercise price. Certain of the warrants also contain beneficial ownership limitations which prevent us from effecting the exercise of any such warrant to the extent that as a result of such exercise the holder of the exercised warrant beneficially owns more than 4.99% in the aggregate of the issued and outstanding shares of our common stock calculated immediately after giving effect to the issuance of shares of our common stock upon the exercise of the warrant.

The shares of common stock referred to above are being registered to permit public sales of the shares, and the selling stockholders may offer the shares for resale from time to time pursuant to this prospectus. The selling stockholders may also sell, transfer or otherwise dispose of all or a portion of their shares in transactions exempt from the registration requirements of the Securities Act of 1933, as amended, or pursuant to another effective registration statement covering those shares. We may from time to time include additional selling stockholders in supplements or amendments to this prospectus.

The table below sets forth certain information regarding the selling stockholders and the shares of our common stock offered by them in this prospectus. The selling stockholders have not had a material relationship with us within the past three years other than as described in the footnotes to the table below or as a result of their acquisition of our shares or other securities. To our knowledge, subject to community property laws where applicable, each person named in the table has sole voting and investment power with respect to the shares of common stock set forth opposite such person's name.

Beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission. In computing the percentage of our common stock beneficially owned by each selling stockholder after the offering, we have assumed that all shares offered by such selling stockholder have been sold, and therefore the calculation is based on a number of shares of common stock outstanding comprised of (i) 138,381,367 shares of common stock outstanding as of February 5, 2013 plus (ii) the number of shares offered by the selling stockholder in this offering. The shares offered by one selling stockholder are not deemed outstanding for the purpose of computing the percentage ownership of any other selling stockholder.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

Aztec Systems, Inc., is a corporation that has provided us with administrative and technical support services until August 2012 and software development services until October 2012. Until the time of its sale to GLT Aztec LP on June 15, 2012, the majority owner of Aztec Systems, Inc. was Andrew Levi, our chief technology officer. From inception, September 11, 2009, through September 30, 2012, we have incurred management fees of \$90,384 and software development fees of \$1,043,334 related to Aztec Systems, Inc.

On January 16, 2012, we entered into a letter agreement with Aztec Systems, pursuant to which Aztec Systems agreed to extend credit to us in an amount requested by us up to a maximum of \$30,000 in any single month through March 31, 2012 to assist us with our ongoing software development efforts. In connection with the credit extension, we agreed to pay Aztec Systems a minimum of \$30,000 per month beginning January 2012 to be applied against any amounts currently owed by us to Aztec Systems or incurred in the future for software development or hosting services. The credit extension was terminable upon notice by Aztec Systems. On January 17, 2012, we issued a promissory note to Aztec Systems in the principal amount of \$254,992.89. The principal amount of the note reflects the balance due to Aztec Systems as of December 31, 2011 for software development and hosting services provided by Aztec Systems. The note bears interest at a rate of 8% per annum and the entire principal and interest under the note was due on September 30, 2012.

On November 9, 2012, we entered into an exchange agreement with Aztec Systems, pursuant to which we agreed to exchange the note which then had a balance of \$368,059.24 and our existing accounts payable to Aztec Systems of \$177,898.92 for an 8% convertible note in the principal amount of \$545,958.16. The 8% convertible note is due on March 31, 2013. Pursuant to the exchange agreement, we agreed to register the shares of common stock issuable upon conversion of the 8% convertible note and an aggregate of 3,733,428 shares of common stock then held by Aztec Systems on or before December 31, 2012. The 8% convertible note is convertible into shares of our common stock at a conversion price equal to the greater of: (i) \$0.15 per share or (ii) the price per share at which common stock is sold in a subsequent financing. Upon effectiveness of the registration statement covering the resale of such shares, the 8% convertible note will automatically convert into shares of our common stock.

On September 1, 2011, in connection with our reverse merger and succession to the business of business of Blue Calypso Holdings, Inc. as our sole line of business, we transferred all of our pre-reverse merger operating assets and liabilities to JJ&R Ventures Holdings, Inc., a Delaware corporation and our wholly owned subsidiary. Immediately after this transfer, we transferred all of JJ&R Ventures Holdings, Inc.'s outstanding capital stock to Deborah Flores, our then-majority stockholder and our former president, treasurer, treasurer and sole director, in exchange for the cancellation of 51,000,000 shares of our common stock held by Ms. Flores.

DESCRIPTION OF SECURITIES

We have authorized 685,000,000 shares of capital stock, par value \$0.0001 per share, of which 680,000,000 are shares of common stock and 5,000,000 are shares of “blank check” preferred stock. Of such shares of preferred stock, 1,700,000 have been designated as shares of Series A Convertible Preferred Stock. On February 5, 2013, there were 138,381,367 shares of common stock, 1,700,000 shares of Series A Convertible Preferred Stock issued and outstanding.

Common Stock

The holders of common stock are entitled to one vote per share on all matters to be voted upon by stockholders. Subject to preferences that may be applicable to any outstanding preferred stock, holders of our common stock are entitled to receive ratably dividends as may be declared by the board of directors out of funds legally available for that purpose. In the event of our liquidation, dissolution, or winding up, the holders of common stock are entitled to share ratably in all assets remaining after payment of liabilities and the liquidation preferences of any outstanding preferred stock. The common stock has no preemptive or conversion rights, other subscription rights, or redemption or sinking fund provisions.

Preferred Stock

The board of directors is authorized, subject to any limitations prescribed by law, without further vote or action by the stockholders, to issue from time to time shares of preferred stock in one or more series. Each such series of preferred stock shall have such number of shares, designations, preferences, voting powers, qualifications, and special or relative rights or privileges as shall be determined by the board of directors, which may include, among others, dividend rights, voting rights, liquidation preferences, conversion rights and preemptive rights.

The Series A Convertible Preferred Stock is convertible into shares of common stock at a conversion price of \$0.0679 per share (subject to adjustment for stock dividends, stock splits and similar transactions), except that a holder of the Series A Convertible Preferred Stock cannot convert the Series A Convertible Preferred Stock to the extent (but only to the extent) that such holder or any of its affiliates would beneficially own a number of shares of our common stock which would exceed 4.99%; provided, however, that the holder may waive the 4.99% conversion limitation upon 61 days prior written notice to increase such percentage to up to 9.99%. There are no other differences between the rights of the Series A Convertible Preferred Stock and the common stock.

Warrants

In connection with our September 2011 private placement, we issued investors five-year warrants to purchase up to an aggregate of 25,036,820 shares of common stock at an exercise price of \$0.10 per share. We are prohibited from effecting the exercise of any such warrant to the extent that as a result of such exercise the holder of the exercised warrant beneficially owns more than 4.99% in the aggregate of the issued and outstanding shares of our common stock calculated immediately after giving effect to the issuance of shares of our common stock upon the exercise of the warrant. The warrants contain provisions that protect their holders against dilution by adjustment of the purchase price in certain events such as stock dividends, stock splits, issuances of securities at a purchase price less than \$0.10 per share (subject to certain exceptions) and other similar events. In addition, if (i) the volume-weighted average price of our common stock for 30 consecutive trading days is at least 250% of the exercise price of the warrants; (ii) the 30-day average daily trading volume of our common stock has been at least 1,000,000 shares; and (iii) the holder is not in possession of any information that constitutes, or might constitute, material non-public information which was provided by us, then we may require each investor to exercise all or a portion of its warrant pursuant to the terms described above within 10 business days following the delivery of a notice of acceleration. Any warrant that is not exercised as aforesaid shall expire automatically at the end of such 10-day period. On April 19, 2012, we amended these warrants to provide for cashless exercises and to extend the period during which the anti-dilution protection applies until April 19, 2013.

In connection with our April 2012 private placement, we issued an investor a five-year warrant to purchase up to 6,500,000 shares of common stock at an exercise price of \$0.10 per share. We are prohibited from effecting the exercise of any such warrant to the extent that as a result of such exercise the holder of the exercised warrant beneficially owns more than 4.99% in the aggregate of the issued and outstanding shares of our common stock calculated immediately after giving effect to the issuance of shares of our common stock upon the exercise of the

warrant. The warrants contain provisions that protect their holders against dilution by adjustment of the purchase price in certain events such as stock dividends, stock splits, issuances of securities at a purchase price less than \$0.10 per share (subject to certain exceptions) and other similar events. In addition, if (i) the volume-weighted average price of our common stock for 30 consecutive trading days is at least 250% of the exercise price of the warrants; (ii) the 30-day average daily trading volume of our common stock has been at least 1,000,000 shares; and (iii) the holder is not in possession of any information that constitutes, or might constitute, material non-public information which was provided by us, then we may require each investor to exercise all or a portion of its warrant pursuant to the terms described above within 10 business days following the delivery of a notice of acceleration. Any warrant that is not exercised as aforesaid shall expire automatically at the end of such 10-day period. These warrants are exercisable on a cashless basis.

In connection with our June 2012 private placement, we issued investors two-year warrants to purchase up to an aggregate of 445,000 shares of common stock at an exercise price of \$0.75 per share. We are prohibited from effecting the exercise of any such warrant to the extent that as a result of such exercise the holder of the exercised warrant beneficially owns more than 4.99% in the aggregate of the issued and outstanding shares of our common stock calculated immediately after giving effect to the issuance of shares of our common stock upon the exercise of the warrant. The warrants contain provisions that protect their holders against dilution by adjustment of the purchase price in certain events such as stock dividends, stock splits, issuances of securities at a purchase price less than \$0.75 per share (subject to certain exceptions) and other similar events. In addition, if (i) the volume-weighted average price of our common stock for 30 consecutive trading days is at least 250% of the exercise price of the warrants; (ii) the 30-day average daily trading volume of our common stock has been at least 1,000,000 shares; and (iii) the holder is not in possession of any information that constitutes, or might constitute, material non-public information which was provided by us, then we may require each investor to exercise all or a portion of its warrant pursuant to the terms described above within 10 business days following the delivery of a notice of acceleration. Any warrant that is not exercised as aforesaid shall expire automatically at the end of such 10-day period.

In December 2012, in connection with the settlement of certain outstanding accounts payable, we issued two-year warrants to purchase up to an aggregate of 487,235 shares of common stock at an exercise price of \$0.50 per share. We are prohibited from effecting the exercise of any such warrant to the extent that as a result of such exercise the holder of the exercised warrant beneficially owns more than 4.99% in the aggregate of the issued and outstanding shares of our common stock calculated immediately after giving effect to the issuance of shares of our common stock upon the exercise of the warrant. The warrants contain provisions that protect their holders against dilution by adjustment of the purchase price in certain events such as stock dividends, stock splits and other similar events. In addition, if (i) the volume-weighted average price of our common stock for 30 consecutive trading days is at least 250% of the exercise price of the warrants; (ii) the 30-day average daily trading volume of our common stock has been at least 1,000,000 shares; and (iii) the holder is not in possession of any information that constitutes, or might constitute, material non-public information which was provided by us, then we may require each investor to exercise all or a portion of its warrant pursuant to the terms described above within 10 business days following the delivery of a notice of acceleration. Any warrant that is not exercised as aforesaid shall expire automatically at the end of such 10-day period.

8% Senior Secured Convertible Debentures

In connection with our April 2012 private placement, we have issued 8% senior secured convertible debentures in the aggregate principal amount of \$500,000 due October 19, 2012. The debentures are convertible at the option of the holder into shares of our common stock at a conversion price equal to the closing price of our common stock on the date of conversion. The 8% debentures contain provisions that protect their holders against dilution by adjustment of the purchase price in certain events such as stock dividends, stock splits, issuances of securities at a purchase price less than the closing price of our common stock on the date of conversion (subject to certain exceptions) and other similar events. We are prohibited from effecting the exercise of any such debenture to the extent that as a result of such exercise the holder of the exercised warrant beneficially owns more than 4.99% in the aggregate of the issued and outstanding shares of our common stock calculated immediately after giving effect to the issuance of shares of our common stock upon the conversion of such debenture, provided that this percentage may be increased to a percentage not to exceed 9.99% at the option of the holder on 61 days prior notice to us. The debentures

contain a variety of events of default that are typical for transactions of this type, as well as the following events: (i) our common stock becoming ineligible for listing or quotation on a trading market for at least five trading days, (ii) our involvement in a change of control transaction or a sale or transfer of at least 40% of our assets, or (iii) our inability to meet the current public information requirements under Rule 144. If there is an event of default, then by election of the holder, the entire principal and interest under the debentures then outstanding, will be due and payable. Such amount shall accrue interest at a rate of 16% per annum commencing on the fifth calendar date following the relevant event of default. In addition, if at any time while the debentures are outstanding, we complete a transaction resulting in gross proceeds to the Company equal to 2.5 times or greater than the outstanding amount of the debentures, the holder may require us to redeem all or a portion of the debentures. The debentures contain a variety of covenants that are typical for transactions of this type, as well as the following covenants, which may be waived upon written consent of the holder: (i) we may not incur other indebtedness except as permitted by the debentures, (ii) we may not redeem, repurchase or otherwise acquire more than a de minimis number of shares of our common stock or common stock equivalents, (iii) we may not pay dividends or distributions on any of our equity securities, or (iv) we may not enter into any transaction that is material to us with an affiliate unless such transaction is approved by a majority of our disinterested directors.

8% Convertible Note

On November 9, 2012, we entered into an exchange agreement with Aztec Systems, pursuant to which we agreed to exchange a promissory note, which then had a balance of \$368,059.24 and our existing accounts payable to Aztec Systems of \$177,898.92 for an 8% convertible note in the principal amount of \$545,958.16. The 8% convertible note is due on March 31, 2013. Pursuant to the exchange agreement, we agreed to register the shares of common stock issuable upon conversion of the 8% convertible note and an aggregate of 3,733,428 shares of common stock then held by Aztec Systems on or before December 31, 2012. The 8% convertible note is convertible into shares of our common stock at a conversion price equal to the greater of: (i) \$0.15 per share or (ii) the price per share at which common stock is sold in a subsequent financing. Upon effectiveness of the registration statement covering the resale of such shares, the 8% convertible note will automatically convert into shares of our common stock at the applicable conversion price.

Delaware Anti-Takeover Law and Provisions of our Certificate of Incorporation and Bylaws

Section 203 of the Delaware General Corporation Law (the “DGCL”), in general, prohibits a business combination between a corporation and an interested stockholder within three years of the time such stockholder became an interested stockholder, unless:

- prior to such time the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder;
- upon consummation of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced, exclusive of shares owned by directors who are also officers and by certain employee stock plans; or
- at or subsequent to such time, the business combination is approved by the board of directors and authorized by the affirmative vote at a stockholders’ meeting of at least 66 2/3% of the outstanding voting stock that is not owned by the interested stockholder.

The term “business combination” is defined to include, among other transactions between an interested stockholder and a corporation or any direct or indirect majority owned subsidiary thereof: a merger or consolidation; a sale, lease, exchange, mortgage, pledge, transfer or other disposition (including as part of a dissolution) of assets having an aggregate market value equal to 10% or more of either the aggregate market value of all assets of the corporation on a consolidated basis or the aggregate market value of all the outstanding stock of the corporation; certain transactions that would result in the issuance or transfer by the corporation of any of its stock to the interested stockholder; certain

transactions that would increase the interested stockholder's proportionate share ownership of the stock of any class or series of the corporation or such subsidiary; and any receipt by the interested stockholder of the benefit of any loans, advances, guarantees, pledges or other financial benefits provided by or through the corporation or any such subsidiary. In general, and subject to certain exceptions, an "interested stockholder" is any person who is the owner of 15% or more of the outstanding voting stock of the corporation, an affiliate or associate of the corporation who was the owner of 15% or more of the outstanding voting stock of the corporation at anytime within three years immediately prior to the relevant date or the affiliates and associates of such person. The term "owner" is broadly defined to include any person that individually or with or through such person's affiliates or associates, among other things, beneficially owns such stock, or has the right to acquire such stock (whether such right is exercisable immediately or only after the passage of time) pursuant to any agreement or understanding or upon the exercise of warrants or options or otherwise or has the right to vote such stock pursuant to any agreement or understanding, or has an agreement or understanding with the beneficial owner of such stock for the purpose of acquiring, holding, voting or disposing of such stock.

The restrictions described above do not apply to corporations that have elected, in the manner provided therein, not to be subject to Section 203 of the DGCL or, with certain exceptions, which do not have a class of voting stock that is listed on a national securities exchange or held of record by more than 2,000 stockholders. We have not opted out of Section 203, but we are not currently subject to it because we are not listed on a national securities exchange and our securities are held of record by fewer than 2,000 stockholders. However, we could become subject to it if we become so listed or so held.

If Section 203 becomes applicable to us, it could delay or prohibit mergers or other takeover or change in control attempts with respect to us and, accordingly, could discourage attempts to acquire us even though such a transaction may offer our stockholders the opportunity to sell their stock at a price above the prevailing market price.

Provisions of our certificate of incorporation and bylaws may delay or discourage transactions involving an actual or potential change in our control or change in our management, including transactions in which stockholders might otherwise receive a premium for their shares, or transactions that our stockholders might otherwise deem to be in their best interests. Therefore, these provisions could adversely affect the price of our common stock. Among other things, our certificate of incorporation and bylaws:

- permit our board of directors to issue up to 5,000,000 shares of preferred stock, without further action by the stockholders, with any rights, preferences and privileges as they may designate, including the right to approve an acquisition or other change in control;
- provide that all vacancies, including newly created directorships, may, except as otherwise required by law, be filled by the affirmative vote of a majority of directors then in office, even if less than a quorum;
- do not provide for cumulative voting rights (therefore allowing the holders of a majority of the shares of common stock entitled to vote in any election of directors to elect all of the directors standing for election, if they should so choose);
- provide that special meetings of our stockholders may be called only by our chairman, president or board of directors; and
- provide that directors may be removed from office only by the affirmative vote at a special meeting of stockholders of the holders of a majority of the voting power of our issued and outstanding capital stock entitled to vote in the election of directors, either for or without cause.

Indemnification of Directors and Officers

Pursuant to Section 145 of the DGCL, a corporation has the power to indemnify its directors and officers against expenses, judgments, fines and amounts paid in settlement actually and reasonably incurred in connection with a third-party action, other than a derivative action, and against expenses actually and reasonably incurred in the defense or settlement of a derivative action, provided that there is a determination that the individual acted in good faith and in a manner reasonably believed to be in or not opposed to the best interests of the corporation and, with respect to any criminal action or proceeding, had no reasonable cause to believe the individual's conduct was unlawful. Such determination shall be made, in the case of an individual who is a director or officer at the time of such determination:

- by a majority of the disinterested directors, even though less than a quorum;
- by a committee of such directors designated by a majority vote of such directors, even though less than a quorum;
- if there are no disinterested directors, or if such directors so direct, by independent legal counsel; or
- by a majority vote of the stockholders, at a meeting at which a quorum is present.

Without court approval, however, no indemnification may be made in respect of any derivative action in which such individual is adjudged liable to the corporation.

The DGCL requires indemnification of directors and officers for expenses relating to a successful defense on the merits or otherwise of a derivative or third-party action.

The DGCL permits a corporation to advance expenses relating to the defense of any proceeding to directors and officers contingent upon such individuals' commitment to repay any advances unless it is determined ultimately that such individuals are entitled to be indemnified.

Under the DGCL, the rights to indemnification and advancement of expenses provided in the law are non-exclusive, in that, subject to public policy issues, indemnification and advancement of expenses beyond that provided by statute may be provided by bylaw, agreement, vote of stockholders, disinterested directors or otherwise.

Our certificate of incorporation and bylaws provide that our officers, directors, employees and agents shall be indemnified to the fullest extent permitted by applicable law, and that we shall pay the expenses incurred in defending any proceeding in advance of its final disposition. Payment of expenses incurred by an officer or director in advance of the final disposition of the proceeding shall be made only upon the receipt of an undertaking by the officer or director to repay all amounts advanced if it should be ultimately determined that the director or officer is not entitled to be indemnified. Expenses incurred by other of our agents (or by the directors or officers not acting in their capacity as such, including service with respect to employee benefit plans) may be advanced upon such terms and conditions as our board deems appropriate. Any repeal or modification of these provisions approved by our stockholders will be prospective only and will not adversely affect any limitation on the liability of any of our directors or officers existing as of the time of such repeal or modification.

We are also permitted to apply for insurance on behalf of any director, officer, employee or other agent for liability arising out of his actions, whether or not the General Corporation Law of the State of Delaware would permit indemnification.

We intend to enter into indemnification agreements with certain of our directors and officers which may, in certain cases, be broader than the specific indemnification provisions contained in our certificate of incorporation and bylaws. The indemnification agreements may require us, among other things, to indemnify such officers and directors against certain liabilities that may arise by reason of their status or service as directors or officers and to advance the expenses incurred by such parties as a result of any threatened claims or proceedings brought against them as to which they could be indemnified.

Limitation of Personal Liability of Directors

The DGCL provides that a corporation's certificate of incorporation may include a provision limiting the personal liability of a director to the corporation or its stockholders for monetary damages for breach of fiduciary duty as a director. However, no such provision can eliminate or limit the liability of a director for:

- any breach of the director's duty of loyalty to the corporation or its stockholders;
- acts or omissions not in good faith or that involve intentional misconduct or a knowing violation of the law;
- violation of certain provisions of the DGCL;
- any transaction from which the director derived an improper personal benefit; or
- any act or omission prior to the adoption of such a provision in the certificate of incorporation.

Our certificate of incorporation provides that our directors shall not be personally liable to us or any of our stockholders for monetary damages for breach of fiduciary duty as a director except to the extent provided by applicable law for the actions described above.

Disclosure of Commission Position on Indemnification for Securities Act Liabilities

Insofar as indemnification for liabilities arising under the Securities Act of 1933, as amended, may be permitted to our directors, officers and persons controlling us, we have been advised that it is the Securities and Exchange Commission's opinion that such indemnification is against public policy as expressed in the Securities Act of 1933, as amended, and is, therefore, unenforceable.

PLAN OF DISTRIBUTION

Each selling stockholder of the common stock and any of their pledgees, assignees and successors-in-interest may, from time to time, sell any or all of their shares of common stock on the OTC Bulletin Board or any other stock exchange, market or trading facility on which the shares are traded or in private transactions. These sales may be at fixed or negotiated prices. A selling stockholder may use any one or more of the following methods when selling

shares:

- ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;
- block trades in which the broker-dealer will attempt to sell the shares as agent but may position and resell a portion of the block as principal to facilitate the transaction;
- purchases by a broker-dealer as principal and resale by the broker-dealer for its account;
- an exchange distribution in accordance with the rules of the applicable exchange;
- privately negotiated transactions;
- settlement of short sales entered into after the effective date of the registration statement of which this prospectus is a part;
- broker-dealers may agree with the selling stockholders to sell a specified number of such shares at a stipulated price per share;
- through the writing or settlement of options or other hedging transactions, whether through an options exchange or otherwise;
- a combination of any such methods of sale; or
- any other method permitted pursuant to applicable law.

The selling stockholders may also sell shares under Rule 144 under the Securities Act of 1933, as amended, if available, rather than under this prospectus.

Broker-dealers engaged by the selling stockholders may arrange for other brokers-dealers to participate in sales. Broker-dealers may receive commissions or discounts from the selling stockholders (or, if any broker-dealer acts as agent for the purchaser of shares, from the purchaser) in amounts to be negotiated, but, except as set forth in a supplement to this prospectus, in the case of an agency transaction not in excess of a customary brokerage commission in compliance with FINRA Rule 2440; and in the case of a principal transaction a markup or markdown in compliance with FINRA IM-2440.

In connection with the sale of the common stock or interests therein, the selling stockholders may enter into hedging transactions with broker-dealers or other financial institutions, which may in turn engage in short sales of the common stock in the course of hedging the positions they assume. The selling stockholders may also sell shares of the common stock short and deliver these securities to close out their short positions, or loan or pledge the common stock to broker-dealers that in turn may sell these securities. The selling stockholders may also enter into option or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities which require the delivery to such broker-dealer or other financial institution of shares offered by this prospectus, which shares such broker-dealer or other financial institution may resell pursuant to this prospectus (as supplemented or amended to reflect such transaction).

The selling stockholders and any broker-dealers or agents that are involved in selling the shares may be deemed to be “underwriters” within the meaning of the Securities Act of 1933, as amended, in connection with such sales. In such event, any commissions received by such broker-dealers or agents and any profit on the resale of the shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act of 1933, as amended. Each selling stockholder has informed us that it does not have any written or oral agreement or understanding, directly or indirectly, with any person to distribute the common stock. In no event shall any broker-dealer receive fees, commissions and markups which, in the aggregate, would exceed eight percent (8%).

We are required to pay certain fees and expenses incurred by us incident to the registration of the shares. We have agreed to indemnify the selling stockholders against certain losses, claims, damages and liabilities, including liabilities under the Securities Act of 1933, as amended.

Because selling stockholders may be deemed to be “underwriters” within the meaning of the Securities Act of 1933, as amended, they will be subject to the prospectus delivery requirements of the Securities Act of 1933, as amended, including Rule 172 thereunder. There is no underwriter or coordinating broker acting in connection with the proposed sale of the resale shares by the selling stockholders.

We agreed to keep this prospectus effective until the earlier of (i) the date on which the shares may be resold by the selling stockholders without registration and without the requirement to be in compliance with Rule 144(c)(1) and otherwise without restriction or limitation pursuant to Rule 144 or (ii) all of the shares have been sold pursuant to this prospectus or Rule 144 under the Securities Act of 1933, as amended, or any other rule of similar effect. The resale shares will be sold only through registered or licensed brokers or dealers if required under applicable state securities laws. In addition, in certain states, the resale shares may not be sold unless they have been registered or qualified for

sale in the applicable state or an exemption from the registration or qualification requirement is available and is complied with.

Under applicable rules and regulations under the Securities Exchange Act of 1934, as amended, any person engaged in the distribution of the resale shares may not simultaneously engage in market making activities with respect to the common stock for the applicable restricted period, as defined in Regulation M, prior to the commencement of the distribution. In addition, the selling stockholders will be subject to applicable provisions of the Securities Exchange Act of 1934, as amended, and the rules and regulations thereunder, including Regulation M, which may limit the timing of purchases and sales of shares of the common stock by the selling stockholders or any other person. We will make copies of this prospectus available to the selling stockholders and have informed them of the need to deliver a copy of this prospectus to each purchaser at or prior to the time of the sale (including by compliance with Rule 172 under the Securities Act of 1933, as amended).

LEGAL MATTERS

Fox Rothschild LLP, Lawrenceville, New Jersey, will pass upon the validity of the shares of our common stock offered by the selling stockholders under this prospectus.

EXPERTS

Our financial statements as of December 31, 2011 and 2010 and for the years ended December 31, 2011 and 2010 included in this prospectus have been audited by Montgomery Coscia Greulich LLP, Certified Public Accountants, an independent registered public accounting firm, as stated in its report appearing in the registration statement, and are included in reliance upon the report of such firm given upon its authority as experts in accounting and auditing.

WHERE YOU CAN FIND ADDITIONAL INFORMATION

We have filed with the Securities and Exchange Commission a registration statement on Form S-1, together with any amendments and related exhibits, under the Securities Act of 1933, as amended, with respect to our shares of common stock offered by this prospectus. The registration statement contains additional information about us and our shares of common stock that the selling stockholders are offering in this prospectus.

We file annual, quarterly and current reports and other information with the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended. Our Securities and Exchange Commission filings are available to the public over the Internet at the Securities and Exchange Commission's website at <http://www.sec.gov>. You may also read and copy any document we file at the Securities and Exchange Commission's public reference room located at 100 F Street, N.E., Washington, D.C. 20549. Please call the Securities and Exchange Commission at 1-800-SEC-0330 for further information on the public reference rooms and their copy charges. In addition, through our website, <http://www.bluecalypso.com>, you can access electronic copies of documents we file with the Securities and Exchange Commission, including our Quarterly Report on Form 10-Q, and Current Reports on Form 8-K and any amendments to those reports. Information on our website is not incorporated by reference in this prospectus. Access to those electronic filings is available as soon as practicable after filing with the Securities and Exchange Commission. You may also request a copy of those filings, excluding exhibits, from us at no cost. Any such request should be addressed to us at: 19111 North Dallas Parkway Suite 200, Dallas Texas 75287, Attention: William Ogle, Chief Executive Officer.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Blue Calypso, Inc., and Subsidiary

We have audited the accompanying consolidated balance sheets of Blue Calypso, Inc. and subsidiary (a development stage company, the “Company”) as of December 31, 2011 and 2010, and the related consolidated statements of operations, changes in stockholders’ equity (deficit) and cash flows for each of the years then ended and the period from September 11, 2009 (inception) to December 31, 2011. The Company’s management is responsible for these financial statements. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether these financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Blue Calypso, Inc. and subsidiary as of December 31, 2011 and 2010, and the results of its operations and its cash flows for the years then ended and for the period from September 11, 2009 (inception) to December 31, 2011 in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 9 to the consolidated financial statements, the Company has had recurring losses from operations, negative cash flows from operating activities and has an accumulated deficit. These conditions raise substantial doubt about the Company’s ability to continue as a going concern. These consolidated financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.
