UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from            to

Commission file number 001-12669

SOUTH STATE CORPORATION

(Exact name of registrant as specified in its charter)

South Carolina 57-0799315  
(State or other jurisdiction of incorporation) (IRS Employer Identification No.)

520 Gervais Street  
Columbia, South Carolina 29201  
(Address of principal executive offices) (Zip Code)

(800) 277-2175

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

|                         |                           |
|-------------------------|---------------------------|
| Large Accelerated Filer | Accelerated Filer         |
| Non-Accelerated Filer   | Smaller Reporting Company |
|                         | Emerging Growth Company   |

Edgar Filing: SOUTH STATE Corp - Form 10-Q

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of issuer's classes of common stock, as of the latest practicable date:

| Class                          | Outstanding as of April 30, 2018 |
|--------------------------------|----------------------------------|
| Common Stock, \$2.50 par value | 36,787,776                       |

Notes to Condensed Consolidated Financial Statements (unaudited)

Note 1 — Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and disclosures required by accounting principles generally accepted in the United States (“GAAP”) for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Certain prior period information has been reclassified to conform to the current period presentation, and these reclassifications had no impact on net income or equity as previously reported. Operating results for the three months ended March 31, 2018 are not necessarily indicative of the results that may be expected for the year ending December 31, 2018.

The condensed consolidated balance sheet at December 31, 2017 has been derived from the audited financial statements at that date but does not include all of the information and disclosures required by GAAP for complete financial statements.

Note 2 — Summary of Significant Accounting Policies

The information contained in the consolidated financial statements and accompanying notes included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017, as filed with the Securities and Exchange Commission (the “SEC”) on February 23, 2018, should be referenced when reading these unaudited condensed consolidated financial statements. Unless otherwise mentioned or unless the context requires otherwise, references herein to "South State," the "Company" "we," "us," "our" or similar references mean South State Corporation and its consolidated subsidiaries. References to the “Bank” means South State Corporation’s wholly owned subsidiary, South State Bank, a South Carolina banking corporation.

Revenue from Contracts with Customers (Topic 606) and Method of Adoption

On January 1, 2018, we adopted the requirements of Accounting Standards Update (“ASU”) 2014-09, Revenue from Contracts with Customers (“ASU Topic 606”). The majority of our revenue is derived primarily from interest income from receivables (loans) and securities. Other revenues are derived from fees received in connection with deposit accounts, mortgage banking activities including gains from the sale of loans and loan origination fees, and trust and investment advisory services. The core principle of the new standard is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

The Company adopted ASU Topic 606 using the modified retrospective transition approach which does not require restatement of prior periods. The method was selected as there were no material changes in the timing of revenue recognition resulting in no comparability issues with prior periods. This adoption method is considered a change in accounting principle requiring additional disclosure of the nature of and reason for the change, which is solely a result of the adoption of the required standard. When applying the modified retrospective approach under ASU Topic 606, the Company has elected, as a practical expedient, to apply the revenue standard only to contracts that are not completed as of January 1, 2018. A completed contract is considered to be a contract for which all (or substantially all) of the revenue was recognized in accordance with revenue guidance that was in effect before January 1, 2018. There were no uncompleted contracts as of January 1, 2018 for which application of the new standard required an adjustment to retained earnings.

The following disclosures related to ASU Topic 606 involve income derived from contracts with customers. Within the scope of ASU Topic 606, we maintain contracts to provide services, primarily for investment advisory and/or custody of assets. Through our wholly-owned subsidiaries, the Bank, South State Advisory and Minis, Inc., we contract with our customers to perform IRA, Trust, and/or Custody and Agency advisory services. Total revenue recognized from these contracts with customers was \$7.5 million for the three months ended March 31, 2018. The Bank contracts with our customers to perform deposit account services. Total revenue recognized from these contracts with customers is

Table of Contents

\$25.8 million for the three months ended March 31, 2018. Due to the nature of our relationship with the customers that we provide services, we do not incur costs to obtain contracts and there are no material incremental costs to fulfill these contracts that should be capitalized.

**Disaggregation of Revenue** - Our portfolio of services provided to our customers consists of over 791,000 active contracts. We have disaggregated revenue according to timing of the transfer of service. Total revenue derived from contracts in which services are transferred at a point in time is \$33.8 million for the three months ended March 31, 2018. Total revenue derived from contracts in which services are transferred over time is \$4.8 million for the three months ended March 31, 2018. Revenue is recognized as the services are provided to the customers. Economic factors impacting the customers could affect the nature, amount, and timing of these cash flows, as unfavorable economic conditions could impair the customers' ability to provide payment for services. This risk is mitigated as we generally deduct payments from customers' accounts as services are rendered.

**Contract Balances** - The timing of revenue recognition, billings, and cash collections results in billed accounts receivable on the balance sheet. Most contracts call for payment by a charge or deduction to the respective customer account but there are some that require a receipt of payment from the customer. For fee per transaction contracts, the customers are billed as the transactions are processed. For hourly rate and monthly service contracts related to trust and some investment revenues, the customers are billed monthly (generally as a percentage basis point of the market value of the investment account). In some cases, specific to Minis, Inc. and South State Advisory customers are billed in advance for quarterly services to be performed based on the past quarters average account balance. These do create contract liabilities or deferred revenue, as the customers pay in advance for service. Neither the contract liabilities nor the accounts receivables balances are material to the Company's balance sheet.

**Performance Obligations** - A performance obligation is a promise in a contract to transfer a distinct good or service to the customer, and is the unit of account in ASU Topic 606. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied. The performance obligations for these contracts are satisfied as the service is provided to the customer (either over time or at a point in time). The payment terms of the contracts are typically based on a basis point percentage of the investment account market value, fee per hour of service, or fee for service incurred. There are no significant financing components in the contracts. Excluding deposit services revenues which are mostly billed at a point in time as a fee for services incurred, all other contracts within the scope of ASU Topic 606 contain variable consideration in that fees earned are derived from market values of accounts or from hours worked for services performed which determines the amount of consideration to which we are entitled. The variability is resolved when the hours are incurred or services are provided. The contracts do not include obligations for returns, refunds, or warranties. The contracts are specific to the amounts owed to the Company for services performed during a period should the contracts be terminated.

**Significant Judgements** - All of the contracts create performance obligations that are satisfied at a point in time excluding the contracts billed in advance through Minis and South State Advisory and some immaterial deposit revenues. Revenue is recognized as services are billed to the customers. Variable consideration does exist for contracts related to our trust and investment services as revenues are based on market values and services performed.

We have adopted the right-to-invoice practical expedient for trust management contracts through South State Bank which we contract with our customers to perform IRA, Trust, and/or Custody services.

Note 3 — Recent Accounting and Regulatory Pronouncements

In February 2018, the Financial Accounting Standards Board (“FASB”) issued (“ASU”) No. 2018-03, Technical Corrections and Improvements to Financial Instruments-Overall (Subtopic 825-10) (“ASU 2018-03”). ASU 2018-03 updates the new financial instruments standard by clarifying issues that arisen from ASU 2016-01, but does not change the core principle of the new standard. The issues addressed in this ASU include: (1) Equity securities without a readily determinable fair value-discontinuation, (2) Equity securities without a readily determinable fair value-adjustments, (3) Forward contracts and purchased options, (4) Presentation requirements for certain fair value option liabilities, (5) Fair value option liabilities denominated in a foreign currency, (6) Transition guidance for equity securities without a readily determinable fair value, and (7) Transition and open effective date information. For public business entities, the amendments in ASU 2018-03 and ASU 2016-01 are effective for interim and annual periods beginning after December 15, 2017. An entity should apply the amendments by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. The amendments related to equity

Table of Contents

securities without readily determinable fair values (including disclosure requirements) should be applied prospectively to equity investments that exist as of the date of adoption of ASU 2018-03 and ASU 2016-01. This guidance became effective on January 1, 2018 and the Company has determined that the implementation of this standard did not have a material impact to the Company's consolidated financial statements.

In February 2018, the FASB issued ASU No. 2018-02, Income Statement-Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income; ("ASU 2018-02"). ASU 2018-02 amends ASC Topic 220 and allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act ("Tax Reform Act"). Consequently, this amendment eliminates the stranded tax effects resulting from the Tax Reform Act and will improve the usefulness of information reported to financial statement users. However, because the amendments only related to the reclassification of the income tax effects of the Tax Reform Act, the underlying guidance that requires that the effects of the change in tax laws or rates be included in income from continuing operations is not affected. The guidance is effective for public companies for annual periods beginning on or after December 15, 2018 and interim periods within those fiscal years. Early adoption is permitted, including adoption in any interim period, (1) for public business entities for reporting periods for which financial statements have not yet been issued and (2) for all other entities for reporting periods for which financial statements have not yet been made available for issuance. This amendment should be applied either in the period of adoption or retrospectively to each period (or periods) in which the effect of the change in U.S. federal corporate income tax rate in the Tax Reform Act is recognized. The Company early adopted this amendment in the first quarter of 2018 and reclassified \$2.9 million from accumulated other comprehensive income to retained earnings for the stranded tax effects resulting from the Tax Reform Act.

In August 2017, the FASB issued ASU No. 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities; ("ASU 2017-12"). ASU 2017-12 amends Accounting Standards Codification ("ASC") Topic 815 to better align an entity's risk management activities and financial reporting for hedging relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. These amendments will improve the transparency of information about an entity's risk management activities and simplify the application of hedge accounting. The guidance is effective for public companies for annual periods beginning on or after December 15, 2018 and interim periods within those fiscal years. Early adoption is permitted. All transition requirements and elections should be applied to hedging relationships existing on the date of adoption. The Company is still assessing the impact of this new guidance, but does not believe it will have a material impact on the Company's consolidated financial statements.

In May 2017, the FASB issued ASU No. 2017-09, Compensation-Stock Compensation (Topic 718): Scope of Modification Accounting; ("ASU 2017-09"). ASU 2017-09 provides clarity by offering guidance on the scope of modification accounting for share-based payment awards and gives direction on which changes to the terms or conditions of these awards require an entity to apply modification accounting. Under the new guidance, modification accounting is required only if the fair value, the vesting conditions, or the classification of the award (as equity or liability) changes as a result of the change in terms or conditions. The guidance is effective prospectively for all companies for annual periods beginning on or after December 15, 2017. Early adoption is permitted. The Company adopted this standard in the first quarter of 2018 and determined that this guidance did not have a material impact on the Company's consolidated financial statements.

In March 2017, the FASB issued ASU No. 2017-08, Receivables-Nonrefundable Fees and Other Cost (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities; ("ASU 2017-08"). ASU 2017-08 shortens the amortization period of the premium for certain callable debt securities, from the contractual maturity date to the earliest call date. The amendments do not require an accounting change for securities held at a discount; an entity will continue to amortize to the contractual maturity date the discount related to callable debt securities. The amendments apply to the amortization of premiums on callable debt securities with explicit, noncontingent call features that are

callable at fixed prices on preset dates. For public business entities, ASU 2017-08 is effective in fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. For entities other than public business entities, the amendments are effective in fiscal years beginning after December 15, 2019 and in interim periods in fiscal years beginning after December 15, 2020. Early adoption is permitted for all entities, including in an interim period. The amendments should be applied on a modified retrospective basis, with a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the amendments are adopted. The Company has determined that this guidance will not have a material impact on the Company's consolidated financial statements.

Table of Contents

In March 2017, the FASB issued ASU No. 2017-07, Compensation-Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost; (“ASU 2017-07”). ASU 2017-07 applies to any employer that sponsors a defined benefit pension plan, other postretirement benefit plan, or other types of benefits accounted for under Topic 715. The amendments require that an employer disaggregate the service cost component from the other components of net benefit cost, as follows (1) service cost must be presented in the same line item(s) as other employee compensation costs. These costs are generally included within income from continuing operations, but in some cases may be eligible for capitalization, (2) all other components of net benefit cost must be presented in the income statement separately from the service cost component and outside a subtotal of income from operations, if one is presented, (3) the amendments permit capitalizing only the service cost component of net benefit cost, assuming such costs meet the criteria required for capitalization by other GAAP, rather than total net benefit cost which has been permitted under prior GAAP. The guidance is effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those years. The amendments should be adopted prospectively and allows a practical expedient that permits an employer to use the amounts disclosed in its pension and other postretirement benefit plan note for the prior periods to apply the retrospective presentation requirements. The Company adopted this standard in the first quarter of 2018 and determined that this guidance did not have a material impact on the Company’s consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-04, Intangible-Goodwill and other (Topic 350): Simplifying the Test for Goodwill Impairment; (“ASU 2017-04”). ASU 2017-04 simplifies the accounting for goodwill impairment for all entities by requiring impairment charges to be based on the first step in today’s two-step impairment test under ASC Topic 350 and eliminating Step 2 from the goodwill impairment test. As amended, the goodwill impairment test will consist of one step comparing the fair value of a reporting unit with its carrying amount. An entity should recognize a goodwill impairment charge for the amount by which the carrying amount exceeds the reporting unit’s fair value. The guidance is effective for public business entities for fiscal years beginning after December 15, 2019, and interim periods within those years. The amendments should be adopted prospectively and early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. At this point in time, the Company does not expect that this guidance will have a material impact on the Company’s consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-01, Business Combinations (Topic 805): Clarifying the Definition of a Business; (“ASU 2017-01”). ASU 2017-01 requires an entity to evaluate if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or a group of similar identifiable assets; if so, the set of transferred assets and activities is not a business. The guidance also requires a business to include at least one substantive process and narrows the definition of outputs by more closely aligning it with how outputs are described in ASC Topic 606. The guidance is effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those years. Early adoption is permitted. The Company has determined that this guidance did not have a material impact on the Company’s consolidated financial statements.

In December 2016, the FASB issued ASU No. 2016-20, Technical Corrections and Improvements to Topic 606, Revenue from Contracts with Customers; (“ASU 2016-20”). ASU 2016-20 updates the new revenue standard by clarifying issues that arisen from ASU 2014-09, but does not change the core principle of the new standard. The issues addressed in this ASU include: 1) Loan guarantee fees, 2) Impairment testing of contract costs, 3) Interaction of impairment testing with guidance in other topics, 4) Provisions for losses on construction-type and production-type contracts, 5) Scope of topic 606, 6) Disclosure of remaining performance obligations, 7) Disclosure of prior-period performance obligations, 8) Contract modifications, 9) Contract asset vs. receivable, 10) Refund liability, 11) Advertising costs, 12) Fixed-odds wagering contracts in the casino industry, 13) Cost capitalization for advisors to private funds and public funds. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017. The amendments can be applied retrospectively to each prior reporting period or retrospectively with the cumulative effect of initially applying this new guidance recognized at the date of initial

application. The Company's revenue includes net interest income on financial assets and financial liabilities, which is explicitly excluded from the scope of ASU 2014-09, and non-interest income. ASU 2016-20, ASU 2016-08 and ASU 2014-09 became effective on January 1, 2018 and the Company refined its disclosures around the standard in the first quarter of 2018. The Company has determined that there is no material change on how the Company recognizes its revenue streams and the adoption of these standards did not have a material impact on the Company's consolidated financial statements.

Table of Contents

In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments: (“ASU 2016-15”). ASU 2016-15 addresses eight classification issues related to the statement of cash flows: Debt prepayment or debt extinguishment costs; Settlement of zero-coupon bonds; Contingent consideration payments made after a business combination; Proceeds from the settlement of insurance claims; Proceeds from the settlement of corporate-owned life insurance policies, including bank-owned life insurance policies; Distributions received from equity method investees; Beneficial interests in securitization transactions; and Separately identifiable cash flows and application of the predominance principle. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted. Entities will apply the standard's provisions using a retrospective transition method to each period presented. The Company adopted this standard in the first quarter of 2018 and determined that this guidance did not have a material impact on the Company’s consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments: (“ASU 2016-13”). ASU 2016-13 requires an entity to utilize a new impairment model known as the current expected credit loss ("CECL") model to estimate its lifetime "expected credit loss" and record an allowance that, when deducted from the amortized cost basis of the financial asset, presents the net amount expected to be collected on the financial asset. The CECL model is expected to result in earlier recognition of credit losses. ASU 2016-13 also requires new disclosures for financial assets measured at amortized cost, loans and available-for-sale debt securities. The updated guidance is effective for interim and annual reporting periods beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted. Entities will apply the standard's provisions as a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is adopted. The Company has dedicated staff and resources in place evaluating the Company’s options including evaluating the appropriate model options and collecting and reviewing loan data for use in these models. The Company is currently still assessing the impact that this new guidance will have on its consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent considerations (Reporting Revenue Gross versus Net); (“ASU 2016-08”). ASU 2016-08 updates the new revenue standard by clarifying the principal versus agent implementation guidance, but does not change the core principle of the new standard. The updates to the principal versus agent guidance: (i) require an entity to determine whether it is a principal or an agent for each distinct good or service (or a distinct bundle of goods or services) to be provided to the customer; (ii) illustrate how an entity that is a principal might apply the control principle to goods, services, or rights to services, when another party is involved in providing goods or services to a customer and (iii) Clarify that the purpose of certain specific control indicators is to support or assist in the assessment of whether an entity controls a good or service before it is transferred to the customer, provide more specific guidance on how the indicators should be considered, and clarify that their relevance will vary depending on the facts and circumstances. For public business entities, the effective date and transition requirements for these amendments are the same as the effective date and transition requirements of ASU 2014-09 which is effective for interim and annual periods beginning after December 15, 2017. The amendments can be applied retrospectively to each prior reporting period or retrospectively with the cumulative effect of initially applying this new guidance recognized at the date of initial application. The Company’s revenue includes net interest income on financial assets and financial liabilities, which is explicitly excluded from the scope of ASU 2014-09, and non-interest income. ASU 2016-20, ASU 2016-08 and ASU 2014-09 became effective on January 1, 2018 and the Company refined its disclosures around the standard in the first quarter of 2018. The Company has determined that there is no material change on how the Company recognizes its revenue streams and the adoption of these standards did not have a material impact on the Company’s consolidated financial statements, other than the required disclosures.

## Table of Contents

In March 2016, the FASB issued ASU No. 2016-05, Derivatives and Hedging (Topic 815): Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships (“ASU 2016-05”). ASU 2016-05 requires an entity to discontinue a designated hedging relationship in certain circumstances, including termination of the derivative hedging instrument or if the entity wishes to change any of the critical terms of the hedging relationship. ASU 2016-05 amends Topic 815 to clarify that novation of a derivative (replacing one of the parties to a derivative instrument with a new party) designated as the hedging instrument would not, in and of itself, be considered a termination of the derivative instrument or a change in critical terms requiring discontinuation of the designated hedging relationship. For public business entities, the amendments in ASU 2016-05 are effective for interim and annual periods beginning after December 15, 2016. An entity has an option to apply the amendments in ASU 2016-05 on either a prospective basis or a modified retrospective basis. ASU 2016-05 became effective for the Company on January 1, 2017 and did not have a significant impact on the Company’s consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) (“ASU 2016-02”). ASU 2016-02 applies a right-of-use (ROU) model that requires a lessee to record, for all leases with a lease term of more than 12 months, an asset representing its right to use the underlying asset and a liability to make lease payments. For leases with a term of 12 months or less, a practical expedient is available whereby a lessee may elect, by class of underlying asset, not to recognize an ROU asset or lease liability. At inception, lessees must classify all leases as either finance or operating based on five criteria. Balance sheet recognition of finance and operating leases is similar, but the pattern of expense recognition in the income statement, as well as the effect on the statement of cash flows, differs depending on the lease classification. For public business entities, the amendments in ASU 2016-02 are effective for interim and annual periods beginning after December 15, 2018. In transition, lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach which includes a number of optional practical expedients that entities may elect to apply. The Company has reviewed its outstanding lease agreements and has centrally documented the terms of its leases. The Company is still currently evaluating the provisions of ASU 2016-02 in relation to its outstanding leases to determine the potential impact the new standard will have to the Company’s consolidated financial statements. Based on the Company’s current evaluation, the Company estimates that it would have recorded a right to use asset and a lease liability of approximately \$83 million if the standard was effective at March 31, 2018.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments – Overall (Subtopic 825-10); Recognition and Measurement of Financial Assets and Financial Liabilities (“ASU 2016-01”). This update is intended to improve the recognition and measurement of financial instruments and it requires an entity to: (i) measure equity investments at fair value through net income, with certain exceptions; (ii) present in OCI the changes in instrument-specific credit risk for financial liabilities measured using the fair value option; (iii) present financial assets and financial liabilities by measurement category and form of financial asset; (iv) calculate the fair value of financial instruments for disclosure purposes based on an exit price and; (v) assess a valuation allowance on deferred tax assets related to unrealized losses of AFS debt securities in combination with other deferred tax assets. ASU 2016-01 also provides an election to subsequently measure certain nonmarketable equity investments at cost less any impairment and adjusted for certain observable price changes and requires a qualitative impairment assessment of such equity investments and amends certain fair value disclosure requirements. For public business entities, the amendments in ASU 2016-01 are effective for interim and annual periods beginning after December 15, 2017. An entity should apply the amendments by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. The amendments related to equity securities without readily determinable fair values (including disclosure requirements) should be applied prospectively to equity investments that exist as of the date of adoption of the ASU 2016-01. This guidance became effective on January 1, 2018 and the Company has determined that the implementation of this standard did not have a material impact to the Company’s consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, Topic 606 (“ASU 2014-09”). The new standard’s core principle is that a company will recognize revenue when it transfers promised goods or

services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under existing guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. In August of 2015, the FASB issued ASU 2015-14, Revenue from Contracts with Customers, Topic 606: Deferral of the Effective Date, deferring the effective date of ASU 2014-09 until annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. The amendments can be applied retrospectively to each prior reporting period or retrospectively with the cumulative effect of initially applying

Table of Contents

this new guidance recognized at the date of initial application. The Company's revenue includes net interest income on financial assets and financial liabilities, which is explicitly excluded from the scope of ASU 2014-09, and non-interest income. ASU 2016-20, ASU 2016-08 and ASU 2014-09 became effective on January 1, 2018 and the Company refined its disclosures around the standard in the first quarter of 2018. The Company has determined that there is no material change on how the Company recognizes its revenue streams and the adoption of these standards did not have a material impact on the Company's consolidated financial statements.

Note 4 — Mergers and Acquisitions

The following business combinations have occurred over the past two years:

- Park Sterling Corporation ("PSC" or "Park") – November 30, 2017 – Whole bank acquisition
- Southeastern Bank Financial Corporation ("SBFC" or "Southeastern") – January 3, 2017 – Whole bank acquisition

Park Sterling Corporation Acquisition

On November 30, 2017, SSB acquired all of the outstanding common stock of PSC of Charlotte, North Carolina, the bank holding company for Park Sterling Bank ("PSB"), in a stock transaction. PSC common shareholders received 0.14 shares of the Company's common stock in exchange for each share of PSC stock resulting in the Company issuing 7,480,343 shares of its common stock. In total, the purchase price for PSC was \$693.0 million including the value of "in the money" outstanding stock options totaling \$4.3 million.

The PSC transaction was accounted for using the acquisition method of accounting and, accordingly, assets acquired, liabilities assumed and consideration exchanged were recorded at estimated fair value on the acquisition date. The following table presents the assets acquired and liabilities assumed as of November 30, 2017 and their initial and subsequent fair value estimates, as recorded by the Company. Fair values are preliminary and subject to refinement for up to a year after the closing date of the acquisition.

Table of Contents

| (Dollars in thousands)   | As Recorded<br>by Park | Initial<br>Fair Value<br>Adjustments |     | Subsequent<br>Fair Value<br>Adjustments | As Recorded by<br>the Company |

## Explanation of fair value adjustments

(a)—Adjustment reflects marking the securities portfolio to fair value as of the acquisition date.

Edgar Filing: SOUTH STATE Corp - Form 10-Q

(b)—Adjustment reflects a reclass of \$68.7 million by SSB of Shared National Credits (loans) from loans held for investment to loans held for sale.

(c)—Adjustment reflects the fair value adjustments (discount) of \$60.9 million based on the Company's evaluation of the acquired loan portfolio. This amount excludes the allowance for loan losses ("ALLL") and fair value adjustment (discount) of \$12.5 million and \$21.3 million, respectively, recorded by PSC and is net of the \$68.7 million reclass related to the Shared National Credits noted in (b).

(d)—Adjustment reflects the fair value adjustments based on the Company's evaluation of the acquired premises and equipment.

(e)—Adjustment reflects the recording of a 1.66% Core Deposit Intangible ("CDI") on the acquired deposit accounts that totaled \$26.2 million offset by a write-off of \$73.1 million of existing goodwill and CDI acquired from PSC.

(f)—Adjustment reflects the fair value adjustments to other real estate owned ("OREO") based on the Company's evaluation of the acquired OREO portfolio.

Table of Contents

(g)—Adjustment to record deferred tax asset related to the fair value adjustments and an adjustment from the PSC tax rate to the SSB tax rate.

(h)—Adjustment reflects the write-off of accrued interest receivable and along with certain prepaid expenses.

(i)—Adjustment reflects the premium for fixed maturity time deposits of \$2.95 million offset by the write-off of existing fair value marks of \$253,000 acquired from PSC.

(j)—Adjustment reflects the fair value adjustment (discount) of \$2.4 million on PSC’s Trust Preferred Securities offset by the write-off of the existing PSC discount on its senior debt and TRUPs of \$14.0 million.

(k)—Adjustment reflects the fair value adjustments to employee benefit plans of \$1.5 million along with other adjustments of miscellaneous liabilities.

Comparative and Pro Forma Financial Information for the PSC Acquisition

The adjusted results of the Company for the period ended March 31, 2018, include the adjusted results of the acquired assets and assumed liabilities since the acquisition date of November 30, 2017 related to the PSC acquisition. Merger-related charges of \$11.3 million are recorded in the consolidated statement of income for the three month ended March 31, 2018; and include incremental costs related to closing of the acquisition, including legal, accounting and auditing, investment banker cost, termination of certain employment related contracts, travel costs, printing, supplies and other costs.

The following table discloses the impact of the merger (excluding the impact of merger-related expenses) with PSC for three month ended March 31, 2018. The table also presents certain pro forma information as if PSC had been acquired on January 1, 2017. These results combine the historical results of PSC in the Company’s consolidated statement of income and, while certain adjustments were made for the estimated impact of certain fair value adjustments and other acquisition-related activity, they are not indicative of what would have occurred had the acquisition taken place on January 1, 2017.

Merger-related costs of \$21.0 million from the SBFC acquisition were incurred during the first quarter of 2017 and were excluded from pro forma information below. In addition, no adjustments have been made to the pro formas to eliminate the provision for loan losses for the three months ended March 31, 2017 of PSC in the amount of \$678,000. No adjustments have been made to reduce the impact of any OREO write downs, investment securities sold or repayment of borrowings recognized by PSC in the three months ended March 31, 2017. Expenses related to systems conversions and other costs of integration are expected to be recorded in the second and third quarters of 2018 for the PSC merger. The Company expects to achieve further operating cost savings and other business synergies as a result of the acquisitions which are not reflected in the pro forma amounts below:

|                  |           |
|------------------|-----------|
| Estimated/Actual |           |
| For PSC          | Pro Forma |
| For the Three    | Three     |
| Months           | Months    |

Southeastern Bank Financial Corporation Acquisition

On January 3, 2017, SSB acquired all of the outstanding common stock of SBFC of Augusta, Georgia, the bank holding company for Georgia Bank & Trust Company of Augusta (“GB&T”), in a stock transaction. SBFC common shareholders received 0.7307 shares of the Company’s common stock in exchange for each share of SBFC stock resulting in the Company issuing 4,978,338 shares of its common stock. In total, the purchase price for SBFC was \$435.1 million including the value of “in the money” outstanding stock options totaling \$490,000.

The SBFC transaction was accounted for using the acquisition method of accounting and, accordingly, assets acquired, liabilities assumed and consideration exchanged were recorded at estimated fair value on the acquisition date.

Table of Contents

The following table presents the assets acquired and liabilities assumed as of January 3, 2017 and their initial and subsequent fair value estimates, as recorded by the Company. The Company has up to one year after the acquisition date to make subsequent fair value adjustments.

| (Dollars in thousands)  | As Recorded<br>by SBFC | Initial<br>Fair Value<br>Adjustments |     | Subsequent<br>Fair Value<br>Adjustments | As Recorded by<br>the Company |

Explanation of fair value adjustments

- (a)—Adjustment reflects marking the securities portfolio to fair value as of the acquisition date.
- (b)—Adjustment reflects the fair value adjustments of \$30.7 million based on the Company’s evaluation of the acquired loan portfolio and excludes the allowance for loan losses (“ALLL”) of \$20.1 million recorded by SBFC.
- (c)—Adjustment reflects the fair value adjustments based on the Company’s evaluation of the acquired premises and equipment.
- (d)—Adjustment reflects the recording of the core deposit intangible on the acquired deposit accounts that totaled \$18.1 million.
- (e)—Adjustment reflects the fair value adjustments to other real estate owned (“OREO”) and repossessed assets based on the Company’s evaluation of the acquired OREO and repossessed assets portfolio.
- (f)—Adjustment to record deferred tax asset related to the fair value adjustments.

Table of Contents

(g)—Adjustment reflects uncollectible portion of accrued interest receivable and loan fees receivable along with the write-off of certain prepaid expenses.

(h)—Adjustment reflects the fair value adjustments based on the Company’s evaluation of other borrowings of Trust Preferred Securities with a discount of \$2.1 million, netted with premium on certain Federal Home Loan Bank (“FHLB”) advances of \$1.0 million.

(i)—Adjustment reflects the fair value adjustments to employee benefit plans of \$8.3 million netted against an adjustment of other miscellaneous liabilities of \$496,000.

Management evaluates securities for other-than-temporary impairment (“OTTI”) on at least a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the financial condition and near-term prospects of the issuer, (2) the outlook for receiving the contractual cash flows of the investments, (3) the length of time and the extent to which the fair value has been less than cost, (4) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value or for a debt security whether it is more-likely-than-not that the Company will be required to sell the debt security prior to recovering its fair value, and (5) the anticipated outlook for changes in the general level of interest rates. All debt securities available for sale in an unrealized loss position as of March 31, 2018 continue to perform as scheduled. As part of the Company's evaluation of its intent and ability to hold investments for a period of time sufficient to allow for any anticipated recovery in the market, the Company considers its investment strategy, cash flow needs, liquidity position, capital adequacy and interest rate risk position. The Company does not currently intend to sell the securities within the portfolio and it is not more-likely-than-not that the Company will be required to sell the debt securities; therefore, management does not consider these investments to be other-than-temporarily impaired at March 31, 2018.

Management continues to monitor all of the Company's securities with a high degree of scrutiny. There can be no assurance that the Company will not conclude in future periods that conditions existing at that time indicate some or all of its securities may be sold or are other than temporarily impaired, which would require a charge to earnings in such periods.

The unamortized discount related to the acquired non-credit impaired loans totaled \$55.3 million, \$65.2 million, and \$26.3 million at March 31, 2018, December 31, 2017, and March 31, 2017, respectively.

Table of Contents

In accordance with FASB ASC Topic 310-30, the Company aggregated acquired loans that have common risk characteristics into pools of loan categories as described in the table below. The following is a summary of acquired credit impaired loans accounted for under FASB ASC Topic 310-30 (identified as credit impaired at the time of acquisition), net of related discount:

| (Dollars in thousands)                              | March 31,<br>2018 | December 31,<br>2017 | March 31,<br>2017 |
|---|-------------------|----------------------|-------------------|
| FASB ASC Topic 310-30 acquired loans:               |                   |                      |                   |
| Commercial real estate                              | 233,277           | 234,595              | 223,156           |
| Commercial real estate—construction and development | 46,219            | 49,649               | 57,343            |
| Residential real estate                             | 248,766           | 260,787              | 266,484           |
| Consumer  | 48,801            | 51,453               | 58,688            |
| Commercial and industrial                           | 24,295            | 26,946               | 26,225            |
| Total FASB ASC Topic 310-30 acquired loans          | 601,358           | 623,430              | 631,896           |
| Less allowance for loan losses                      | (4,084)           | (4,627)              | (4,556)           |
| FASB ASC Topic 310-30 acquired loans, net           | \$ 597,274        | \$ 618,803           | \$ 627,340        |

Contractual loan payments receivable, estimates of amounts not expected to be collected, other fair value adjustments and the resulting fair values of FASB ASC Topic 310-30 acquired loans impaired and non-impaired at the acquisition date for PSC (November 30, 2017) are as follows:

| (Dollars in thousands)              | November 30, 2017<br>Loans Impaired<br>at Acquisition |
|-------------------------------------|---|
| Contractual principal and interest  | \$ 92,600   |
| Non-accretable difference           | (12,840)  |
| Cash flows expected to be collected | 79,760  |
| Accretable difference               | (8,829)   |
| Carrying value                      | \$ 70,931   |

The table above excludes \$2.2 billion (\$2.3 billion in contractual principal less a \$50.1 million fair value adjustment) in acquired loans at fair value that were identified as either performing with no discount related to the credit or as revolving lines of credit (commercial or consumer) as of the acquisition date and will be accounted for under FASB ASC Topic 310-20.

Contractual loan payments receivable, estimates of amounts not expected to be collected, other fair value adjustments and the resulting fair values of FASB ASC Topic 310-30 acquired loans impaired and non-impaired at the acquisition date for SBFC (January 3, 2017) are as follows:

|                                     | January 3, 2017<br>Loans Impaired<br>at Acquisition |
|-------------------------------------|---|
| (Dollars in thousands)              |   |
| Contractual principal and interest  | \$ 73,365   |
| Non-accretable difference           | (12,912)  |
| Cash flows expected to be collected | 60,453  |
| Accretable difference               | (4,603)   |
| Carrying value                      | \$ 55,850   |

The table above excludes \$991.5 million (\$1.01 billion in contractual principal less a \$18.8 million fair value adjustment) in acquired loans at fair value that were identified as either performing with no discount related to the credit or as revolving lines of credit (commercial or consumer) as of the acquisition date and will be accounted for under FASB ASC Topic 310-20.

Table of Contents

Contractual loan payments receivable, estimates of amounts not expected to be collected, other fair value adjustments and the resulting carrying values of acquired credit impaired loans as of March 31, 2018, December 31, 2017 and March 31, 2017 are as follows:

| (Dollars in thousands)              | March 31,<br>2018 | December 31,<br>2017 | March 31,<br>2017 |
|-------------------------------------|-------------------|----------------------|-------------------|
| Contractual principal and interest  | \$ 765,057        | \$ 795,850           | \$ 812,892        |
| Non-accretable difference           | (33,841)          | (39,324)             | (31,273)          |
| Cash flows expected to be collected | 731,216           | 756,526              | 781,619           |
| Accretable yield                    | (129,858)         | (133,096)            | (149,723)         |
| Carrying value                      | \$ 601,358        | \$ 623,430           | \$ 631,896        |
| Allowance for acquired loan losses  | \$ (4,084)        | \$ (4,627)           | \$ (4,556)        |

Income on acquired credit impaired loans that are not impaired at the acquisition date is recognized in the same manner as loans impaired at the acquisition date. A portion of the fair value discount on acquired non-impaired loans has been ascribed as an accretable difference that is accreted into interest income over the estimated remaining life of the loans. The remaining nonaccretable difference represents cash flows not expected to be collected.

The following are changes in the carrying value of acquired credit impaired loans:

| (Dollars in thousands)   | Three Months Ended March<br>31, |            |
|--|---------------------------------|------------|
|  | 2018                            | 2017       |

Edgar Filing: SOUTH STATE Corp - Form 10-Q

|   |            |            |
|---|------------|------------|
| Accretion   | (12,366)   | (15,214)   |
| Reclass of nonaccretable difference due to improvement in expected cash flows | 9,204      | 5,062      |
| Other changes, net  | (76)       | (107)      |
| Balance at end of period  | \$ 129,858 | \$ 149,723 |

In the first quarter of 2018, the accretable yield balance declined by \$3.2 million as loan accretion (income) of \$12.4 million was recognized. This was partially offset by improved expected cash flows of \$9.2 million during the first quarter of 2018.

Our loan loss policy adheres to GAAP as well as interagency guidance. The ALLL is based upon estimates made by management. We maintain an ALLL at a level that we believe is appropriate to cover estimated credit losses on individually evaluated loans that are determined to be impaired as well as estimated credit losses inherent in the remainder of our loan portfolio. Arriving at the allowance involves a high degree of management judgment and results in a range of estimated losses. We regularly evaluate the adequacy of the allowance through our internal risk rating system, outside credit review, and regulatory agency examinations to assess the quality of the loan portfolio and identify problem loans. The evaluation process also includes our analysis of current economic conditions, composition of the loan portfolio, past due and nonaccrual loans, concentrations of credit, lending policies and procedures, and historical loan loss experience. While management uses available information to recognize losses on loans, future additions to the allowance may be necessary based on, among other factors, changes in economic conditions in our markets. In addition, as noted above, regulatory agencies, as an integral part of their examination process, periodically review our allowances for losses on loans. These agencies may require management to recognize additions to the allowances based on their judgments about information available to them at the time of their examination. Because of these and other factors, it is

Table of Contents

possible that the allowances for losses on loans may change. The provision for loan losses is charged to expense in an amount necessary to maintain the allowance at an appropriate level.

The ALLL on non-acquired loans consists of general and specific reserves. The general reserves are determined by applying loss percentages to the portfolio that are based on historical loss experience for each class of loans and management's evaluation and "risk grading" of the loan portfolio. Additionally, the general economic and business conditions affecting key lending areas, credit quality trends, collateral values, loan volumes and concentrations, seasoning of the loan portfolio, the findings of internal and external credit reviews and results from external bank regulatory examinations are included in this evaluation. Currently, these adjustments are applied to the non-acquired loan portfolio when estimating the level of reserve required. The specific reserves are determined on a loan-by-loan basis based on management's evaluation of our exposure for each credit, given the current payment status of the loan and the value of any underlying collateral. These are loans classified by management as doubtful or substandard. For such loans that are also classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. Generally, the need for specific reserve is evaluated on impaired loans, and once a specific reserve is established for a loan, a charge-off of that amount occurs in the quarter subsequent to the establishment of the specific reserve. Loans that are determined to be impaired are provided a specific reserve, if necessary, and are excluded from the calculation of the general reserves.

Beginning with the First Financial Holdings, Inc. acquisition in 2013, the Company segregates the acquired loan portfolio into performing loans ("non-credit impaired) and purchased credit impaired loans. The performing loans and revolving type loans are accounted for under FASB ASC 310-20, with each loan being accounted for individually. The ALLL on these loans will be measured and recorded consistent with non-acquired loans. The acquired credit impaired loans will follow the description in the next paragraph.

In determining the acquisition date fair value of purchased loans, and in subsequent accounting, the Company generally aggregates purchased loans into pools of loans with common risk characteristics. Expected cash flows at the acquisition date in excess of the fair value of loans are recorded as interest income over the life of the loans using a level yield method if the timing and amount of the future cash flows of the pool is reasonably estimable. Subsequent to the acquisition date, increases in cash flows over those expected at the acquisition date are reclassified from the non-accretable difference to accretable yield and recognized as interest income prospectively. Decreases in expected cash flows after the acquisition date are recognized by recording an ALLL. Management analyzes the acquired loan pools using various assessments of risk to determine an expected loss. The expected loss is derived based upon a loss given default based upon the collateral type and/or detailed review by loan officers and the probability of default that is determined based upon historical data at the loan level. All acquired loans managed by Special Asset Management are reviewed quarterly and assigned a loss given default. Acquired loans not managed by Special Asset Management are reviewed twice a year in a similar method to the Company's originated portfolio of loans which follow review thresholds based on risk rating categories. In the fourth quarter of 2015, the Company modified its methodology to a more granular approach in determining loss given default on substandard loans with a net book balance between \$100,000 and \$500,000 by adjusting the loss given default to 90% of the most current collateral valuation based on appraised value. Substandard loans greater than \$500,000 were individually assigned loss given defaults each quarter. Trends are reviewed in terms of accrual status, past due status, and weighted average grade of the loans within each of the accounting pools. In addition, the relationship between the change in the unpaid principal balance and change in the mark is assessed to correlate the directional consistency of the expected loss for each pool.

Table of Contents

An aggregated analysis of the changes in allowance for loan losses is as follows:

\*— The carrying value of acquired credit impaired loans includes a non accretable difference which is primarily associated with the assessment of credit quality of acquired loans.

As part of the ongoing monitoring of the credit quality of the Company's loan portfolio, management tracks certain credit quality indicators, including trends related to (i) the level of classified loans, (ii) net charge-offs, (iii) non-performing loans (see details below), and (iv) the general economic conditions of the markets that we serve.

Table of Contents

The Company utilizes a risk grading matrix to assign a risk grade to each of its loans. A description of the general characteristics of the risk grades is as follows:

- Pass—These loans range from minimal credit risk to average, however, still acceptable credit risk.
- Special mention—A special mention loan has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or the institution's credit position at some future date.
- Substandard—A substandard loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified must have a well-defined weakness, or weaknesses, that may jeopardize the liquidation of the debt. A substandard loan is characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.
- Doubtful—A doubtful loan has all of the weaknesses inherent in one classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of the currently existing facts, conditions and values, highly questionable and improbable.

The following table presents the credit risk profile by risk grade of commercial loans for non-acquired loans:

|                        | Construction & Development |                   |                | Commercial Non-owner Occupied |                   |                | Commercial Owner Occupied |                   |

| Total loans on nonaccrual status                | \$ 8,076             | \$ 9,397             | \$ 4,915             |

Table of Contents

In the course of resolving delinquent loans, the Bank may choose to restructure the contractual terms of certain loans. Any loans that are modified are reviewed by the Bank to determine if a troubled debt restructuring (“TDR” or “restructured loan”) has occurred. The Bank designates loan modifications as TDRs when it grants a concession to a borrower that it would not otherwise consider due to the borrower experiencing financial difficulty (FASB ASC Topic 310-40). The concessions granted on TDRs generally include terms to reduce the interest rate, extend the term of the debt obligation, or modify the payment structure on the debt obligation.

Loans on nonaccrual status at the date of modification are initially classified as nonaccrual TDRs. Loans on accruing status at the date of concession are initially classified as accruing TDRs if the note is reasonably assured of repayment and performance is expected in accordance with its modified terms. Such loans may be designated as nonaccrual loans subsequent to the concession date if reasonable doubt exists as to the collection of interest or principal under the restructuring agreement. Nonaccrual TDRs are returned to accruing status when there is economic substance to the restructuring, there is documented credit evaluation of the borrower’s financial condition, the remaining balance is reasonably assured of repayment in accordance with its modified terms, and the borrower has demonstrated sustained repayment performance in accordance with the modified terms for a reasonable period of time (generally a minimum of six months). For the three months ended March 31, 2018 and 2017, the Company’s TDRs were not material.

## Note 7—Other Real Estate Owned

The following is a summary of information pertaining to OREO:

| (Dollars in thousands)                      | Three Months Ended |           |
|---|--------------------|-----------|
|   | March 31,          |           |
|   | 2018               | 2017      |
| Beginning balance                           | \$ 11,203          | \$ 18,316 |
| Acquired in Southeastern Bank acquisition   | —                  | 550       |
| Acquired in Park Sterling Corp. acquisition | 210                | —         |
| Additions                                   | 2,895              | 4,284     |
| Writedowns                                  | (777)              | (936)     |
| Sold  | (2,458)            | (2,207)   |
| Ending Balance                              | \$ 11,073          | \$ 20,007 |

At March 31, 2018, there were a total of 77 properties included in OREO compared to 101 properties at March 31, 2017. At March 31, 2018, the Company had \$2.7 million in residential real estate included in OREO and \$6.2 million in residential real estate consumer mortgage loans in the process of foreclosure.

## Note 8 — Deposits

The Company's total deposits are comprised of the following:

| (Dollars in thousands)               | March 31,<br>2018 | December 31,<br>2017 | March 31,<br>2017 |
|--------------------------------------|-------------------|----------------------|-------------------|
| Certificates of deposit              | \$ 1,765,576      | \$ 1,738,384         | \$ 1,060,048      |
| Interest-bearing demand deposits     | 5,308,154         | 5,300,108            | 3,981,920         |
| Non-interest bearing demand deposits | 3,120,818         | 3,047,432            | 2,599,111         |
| Savings deposits                     | 1,464,074         | 1,443,918            | 1,388,388         |
| Other time deposits                  | 4,476             | 2,924                | 3,971             |
| Total deposits                       | \$ 11,663,098     | \$ 11,532,766        | \$ 9,033,438      |

At March 31, 2018, December 31, 2017, and March 31, 2017, the Company had \$340.9 million, \$325.3 million, and \$196.9 million in certificates of deposits of \$250,000 and greater, respectively. At March 31, 2018, December 31, 2017, and March 31, 2017, the Company had \$35.0 million, \$43.6 million and \$55.2 million, in traditional, out-of-market brokered deposits, respectively. The increase in certificates of deposits of \$250,000 and greater from March 31, 2107 was primarily the result of deposits acquired through the merger with PSC.

Table of Contents

## Note 9 — Retirement Plans

The Company and the Bank provide certain retirement benefits to their employees in the form of a non-contributory defined benefit pension plan and an employees' savings plan. The non-contributory defined benefit pension plan covers all employees hired on or before December 31, 2005, who have attained age 21, and who have completed a year of eligible service. Employees hired on or after January 1, 2006 are not eligible to participate in the non-contributory defined benefit pension plan, but are eligible to participate in the employees' savings plan. On this date, a new benefit formula applies only to participants who have not attained age 45 or who do not have five years of service.

Effective July 1, 2009, the Company suspended the accrual of benefits for pension plan participants under the non-contributory defined benefit plan. The pension plan remained suspended as of March 31, 2018.

The components of net periodic pension expense (benefit) recognized are as follows:

| (Dollars in thousands)         | Three Months<br>Ended |         |
|--------------------------------|-----------------------|---------|
|                                | 2018                  | 2017    |
| Interest cost                  | \$ 270                | \$ 281  |
| Service cost                   | 19                    | 31      |
| Expected return on plan assets | (582)                 | (553)   |
| Recognized net actuarial loss  | 194                   | 188     |
| Net periodic pension benefit   | \$ (99)               | \$ (53) |

Based on the immaterial nature of the components of the net periodic pension expense (benefit), the Company has recorded the entire amount in the line item salaries and employee benefits on the statement of income.

The Company did not contribute to the pension plan for the three months ended March 31, 2018, and does not expect to make any additional contributions during the remainder of 2018. The Company reserves the right to contribute between the minimum required and maximum deductible amounts as determined under applicable federal laws.

Under the provisions of Internal Revenue Code Section 401(k), electing employees are eligible to participate in the employees' savings plan after attaining age 21. Plan participants elect to contribute portions of their annual base compensation as a before tax contribution. Employer contributions may be made from current or accumulated net profits. Participants may elect to contribute 1% to 50% of annual base compensation as a before tax contribution. In

2017, employees participating in the plan received a 100% matching of their 401(k) plan contribution, up to 5% of their salary. The employees were also eligible for an additional 1% discretionary matching contribution contingent upon achievement of the Company's annual financial goals which would be paid in the first quarter of the following year. The Company met its financials goals in 2017 and paid the 1% discretionary matching contribution in the first quarter of 2018. Also in 2018, the Company changed the 100% matching of their 401(k) plan contribution to, up to 4% of the participant's salary and raised the discretionary matching contribution to 2% upon achievement of the Company's 2018 financial goals. The Company expensed \$2.4 million and \$1.6 million for the 401(k) plan during the three months ended March 31, 2018 and 2017, respectively.

Employees can enter the savings plan on or after the first day of each month. The employee may enter into a salary deferral agreement at any time to select an alternative deferral amount or to elect not to defer in the plan. If the employee does not elect an investment allocation, the plan administrator will select a retirement-based portfolio according to the employee's number of years until normal retirement age. The plan's investment valuations are generally provided on a daily basis.

#### Note 10 — Earnings Per Share

Basic earnings per share are calculated by dividing net income by the weighted-average shares of common stock outstanding during each period, excluding non-vested shares. The Company's diluted earnings per share are based on the weighted-average shares of common stock outstanding during each period plus the maximum dilutive effect of common stock issuable upon exercise of stock options or vesting of restricted shares. The weighted-average number of shares and equivalents are determined after giving retroactive effect to stock dividends and stock splits.

Table of Contents

The following table sets forth the computation of basic and diluted earnings per share:

| (Dollars and shares in thousands, except for per share amounts) | Three Months Ended |           |
|---|--------------------|-----------|
|   | 2018               | 2017      |
| Basic earnings per common share:                                |                    |           |
| Net income  | \$ 42,326          | \$ 18,264 |
| Weighted-average basic common shares                            | 36,646             | 28,892    |
| Basic earnings per common share                                 | \$ 1.15            | \$ 0.63   |
| Diluted earnings per share:                                     |                    |           |
| Net income  | \$ 42,326          | \$ 18,264 |
| Weighted-average basic common shares                            | 36,646             | 28,892    |
| Effect of dilutive securities                                   | 253                | 267       |
| Weighted-average dilutive shares                                | 36,899             | 29,159    |
| Diluted earnings per common share                               | \$ 1.15            | \$ 0.63   |

The calculation of diluted earnings per common share excludes outstanding stock options for which the results would have been anti-dilutive under the treasury stock method as follows:

| (Dollars in thousands)   | Three Months Ended March 31, |                      |
|--------------------------|------------------------------|----------------------|
|                          | 2018                         | 2017                 |
| Number of shares         | 61,272                       | 34,712               |
| Range of exercise prices | \$ 91.05 to \$ 91.35         | \$ 69.48 to \$ 91.35 |

#### Note 11 — Share-Based Compensation

The Company's 2004 and 2012 share-based compensation plans are long-term retention plans intended to attract, retain, and provide incentives for key employees and non-employee directors in the form of incentive and non-qualified stock options, restricted stock, and restricted stock units ("RSUs").

#### Stock Options

With the exception of non-qualified stock options granted to directors under the 2004 and 2012 plans, which in some cases may be exercised at any time prior to expiration and in some other cases may be exercised at intervals less than a

year following the grant date, incentive stock options granted under the plans may not be exercised in whole or in part within a year following the date of the grant, as these incentive stock options become exercisable in 25% increments pro rata over the four-year period following the grant date. The options are granted at an exercise price at least equal to the fair value of the common stock at the date of grant and expire ten years from the date of grant. No options were granted under the 2004 plan after January 26, 2012, and the 2004 plan is closed other than for any options still unexercised and outstanding. The 2012 plan is the only plan from which new share-based compensation grants may be issued. It is the Company's policy to grant options out of the 1,684,000 shares registered under the 2012 plan, of which no more than 817,476 shares can be granted as restricted stock or RSUs.

Activity in the Company's stock option plans is summarized in the following table. All information has been retroactively adjusted for stock dividends and stock splits.

|  | Shares   | Weighted<br>Average<br>Price | Weighted<br>Average<br>Remaining<br>(Yrs.) | Aggregate<br>Intrinsic<br>(000's) |
|--|----------|------------------------------|--|-----------------------------------|
| Outstanding at January 1, 2018                                 | 218,689  | \$ 52.75                     |  |                                   |
| Granted  | 34,407   | 91.05                        |  |                                   |
| Exercised  | (2,240)  | 29.95                        |  |                                   |
| Forfeited  | (5,806)  | 91.35                        |  |                                   |
| Outstanding at March 31, 2018                                  | 245,050  | 57.42                        | 5.78                                       | \$ 7,194                          |
| Exercisable at March 31, 2018                                  | 171,299  | 46.05                        | 4.42                                       | \$ 6,767                          |
| Weighted-average fair value of options granted during the year | \$ 28.01 |                              |  |                                   |

Table of Contents

The fair value of options is estimated at the date of grant using the Black-Scholes option pricing model and expensed over the options' vesting periods. The following weighted-average assumptions were used in valuing options issued:

|                         | Three months ended March<br>31, |           |
|-------------------------|---------------------------------|-----------|
|                         | 2018                            | 2017      |
| Dividend yield          | 1.46 %                          | 1.40 %    |
| Expected life           | 8.5 years                       | 8.5 years |
| Expected volatility     | 28.0 %                          | 37.2 %    |
| Risk-free interest rate | 2.54 %                          | 2.43 %    |

As of March 31, 2018, there was \$2.0 million of total unrecognized compensation cost related to nonvested stock option grants under the plans. The cost is expected to be recognized over a weighted-average period of 1.87 years as of March 31, 2018. The total fair value of shares vested during the three months ended March 31, 2018 was \$700,000.

### Restricted Stock

The Company from time-to-time also grants shares of restricted stock to key employees and non-employee directors. These awards help align the interests of these employees and directors with the interests of the shareholders of the Company by providing economic value directly related to increases in the value of the Company's stock. The value of the stock awarded is established as the fair market value of the stock at the time of the grant. The Company recognizes expenses, equal to the total value of such awards, ratably over the vesting period of the stock grants. Restricted stock grants to employees typically "cliff vest" after four years. Grants to non-employee directors typically vest within a 12-month period.

All restricted stock agreements are conditioned upon continued employment. Termination of employment prior to a vesting date, as described below, would terminate any interest in non-vested shares. Prior to vesting of the shares, as long as employed by the Company, the key employees and non-employee directors will have the right to vote such shares and to receive dividends paid with respect to such shares. All restricted shares will fully vest in the event of change in control of the Company or upon the death of the recipient.

Nonvested restricted stock for the three months ended March 31, 2018 is summarized in the following table. All information has been retroactively adjusted for stock dividends and stock splits.

| Restricted Stock             | Shares   | Weighted-Average Grant-Date Fair Value |
|------------------------------|----------|--|
| Nonvested at January 1, 2018 | 142,692  | \$ 59.66                               |
| Granted                      | 1,169    | 88.04                                  |
| Vested                       | (16,442) | 63.90                                  |
| Nonvested at March 31, 2018  | 127,419  | 59.37                                  |

As of March 31, 2018, there was \$3.9 million of total unrecognized compensation cost related to nonvested restricted stock granted under the plans. This cost is expected to be recognized over a weighted-average period of 2.09 years as of March 31, 2018. The total fair value of shares vested during the three months ended March 31, 2018 was \$1.2 million.

#### Restricted Stock Units

The Company from time-to-time also grants performance and discretionary RSUs to key employees. These awards help align the interests of these employees with the interests of the shareholders of the Company by providing economic value directly related to the performance of the Company. Some performance RSU grants contain a three-year performance period while others contain a one-year performance period and a time vested requirement (generally four years from grant date). The Company communicates threshold, target, and maximum performance RSU awards and performance targets to the applicable key employees at the beginning of a performance period. Discretionary RSUs are based upon prior performance and typically cliff-vest over four years from the grant date. Dividends are not paid in respect to the awards during the performance or the vesting period. The value of the RSUs awarded is established as the

Table of Contents

fair market value of the stock at the time of the grant. The Company recognizes expenses on a straight-line basis typically over the performance and vesting periods based upon the probable performance target that will be met. For the three months ended March 31, 2018, the Company accrued for 86% of the RSUs granted, based on Management's expectations of performance.

Nonvested RSUs for the three months ended March 31, 2018 is summarized in the following table.

| Restricted Stock Units       | Shares  | Weighted-Average Grant-Date Fair Value |
|------------------------------|---------|--|
| Nonvested at January 1, 2018 | 140,036 | \$ 78.49                               |
| Granted                      | 96,363  | 86.26                                  |
| LTIP Adjustment              | (3,213) | 89.40                                  |
| Nonvested at March 31, 2018  | 233,186 | 81.55                                  |

As of March 31, 2018, there was \$11.7 million of total unrecognized compensation cost related to nonvested RSUs granted under the plan. This cost is expected to be recognized over a weighted-average period of 2.29 years as of March 31, 2018. The total fair value of RSUs vested during the three months ended March 31, 2018 was \$2.6 million. During the three months ended March 31, 2018, 38,365 vested restricted stock units were issued to the participants in the 2015 Long-Term Incentive Plan and 15,836 nonvested restricted stock units were issued to participants in the 2017 Management Incentive Plan.

#### Note 12 — Commitments and Contingent Liabilities

In the normal course of business, the Company makes various commitments and incurs certain contingent liabilities, which are not reflected in the accompanying financial statements. The commitments and contingent liabilities include guarantees, commitments to extend credit, and standby letters of credit. At March 31, 2018, commitments to extend credit and standby letters of credit totaled \$3.0 billion. The Company does not anticipate any material losses as a result of these transactions.

The Company has been named as defendant in various legal actions, arising from its normal business activities, in which damages in various amounts are claimed. The Company is also exposed to litigation risk related to the prior business activities of banks acquired through whole bank acquisitions as well as banks from which assets were acquired and liabilities assumed in FDIC-assisted transactions. Although the amount of any ultimate liability with respect to such matters cannot be determined, in the opinion of management, any such liability is not expected to have a material effect on the Company's consolidated financial statements.

Note 13 — Fair Value

FASB ASC Topic 820, Fair Value Measurements and Disclosures, defines fair value, establishes a framework for measuring fair value under accounting principles generally accepted in the United States, and enhances disclosures about fair value measurements. FASB ASC Topic 820 clarifies that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions.

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Available for sale securities, derivative contracts, and mortgage servicing rights (“MSRs”) are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets on a nonrecurring basis, such as impaired loans, OREO, and certain other assets. These nonrecurring fair value adjustments typically involve application of lower of cost or market accounting or write-downs of individual assets.

FASB ASC Topic 820 establishes a three-tier fair value hierarchy which prioritizes the inputs used in measuring fair value as follows:

Level 1 Observable inputs such as quoted prices in active markets;

## Table of Contents

Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and  
Level 2  
Level 3 Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The following is a description of valuation methodologies used for assets recorded at fair value.

### Investment Securities

Securities available for sale are valued on a recurring basis at quoted market prices where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable securities. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange and The NASDAQ Stock Market, or U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities and debentures issued by government sponsored entities, municipal bonds and corporate debt securities. Securities held to maturity are valued at quoted market prices or dealer quotes similar to securities available for sale. The carrying value of FHLB stock approximates fair value based on the redemption provisions.

### Mortgage Loans Held for Sale

Mortgage loans held for sale are carried at fair value. The fair values of mortgage loans held for sale are based on commitments on hand from investors within the secondary market for loans with similar characteristics. As such, the fair value adjustments for mortgage loans held for sale are recurring Level 2.

### Loans

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan may be considered impaired and an ALLL may be established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment using estimated fair value methodologies. The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At March 31, 2018, substantially all of the impaired loans were evaluated based on the fair value of the collateral because such loans were considered collateral dependent. Impaired loans, where an allowance is established based on the fair value of collateral; require classification in the fair value hierarchy. When

the fair value of the collateral is based on an observable market price or a current appraised value, the Company considers the impaired loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company considers the impaired loan as nonrecurring Level 3.

#### Other Real Estate Owned

Typically OREO, consisting of properties obtained through foreclosure or in satisfaction of loans, is reported at fair value, determined on the basis of current appraisals, comparable sales, and other estimates of value obtained principally from independent sources, adjusted for estimated selling costs (Level 2). However, OREO is considered Level 3 in the fair value hierarchy because management has qualitatively applied a discount due to the size, supply of inventory, and the incremental discounts applied to the appraisals. Management also considers other factors, including changes in absorption rates, length of time the property has been on the market and anticipated sales values, which have resulted in adjustments to the collateral value estimates indicated in certain appraisals. At the time of foreclosure, any excess of the loan balance over the fair value of the real estate held as collateral is treated as a charge against the ALLL. Gains or losses on sale and generally any subsequent adjustments to the value are recorded as a component of OREO expense.

Table of Contents

Derivative Financial Instruments

Fair value is estimated using pricing models of derivatives with similar characteristics; accordingly, the derivatives are classified within Level 2 of the fair value hierarchy (see Note 15—Derivative Financial Instruments for additional information).

Mortgage servicing rights

The estimated fair value of MSR is obtained through an independent derivatives dealer analysis of future cash flows. The evaluation utilizes assumptions market participants would use in determining fair value including market discount rates, prepayment speeds, servicing income, servicing costs, default rates and other market driven data, as well as the market's perception of future interest rate movements. MSR is classified as Level 3.

Table of Contents

## Changes in Level 1, 2 and 3 Fair Value Measurements

When a determination is made to classify a financial instrument within Level 3 of the valuation hierarchy, the determination is based upon the significance of the unobservable factors to the overall fair value measurement. However, since Level 3 financial instruments typically include, in addition to the unobservable or Level 3 components, observable components (that is, components that are actively quoted and can be validated to external sources), the gains and losses below include changes in fair value due in part to observable factors that are part of the valuation methodology.

There were no changes in hierarchy classifications of Level 3 assets or liabilities for the three months ended March 31, 2018. A reconciliation of the beginning and ending balances of Level 3 assets and liabilities recorded at fair value on a recurring basis for the three months ended March 31, 2018 and 2017 is as follows:

| (Dollars in thousands)  | Assets    | Liabilities |
|---|-----------|-------------|
| Fair value, January 1, 2018                                       | \$ 31,119 | \$ —        |
| Servicing assets that resulted from transfers of financial assets | 1,490     | —           |
| Changes in fair value due to valuation inputs or assumptions      | 2,516     | —           |
| Changes in fair value due to decay                                | (929)     | —           |
| Fair value, March 31, 2018  | \$ 34,196 | \$ —        |
| Fair value, January 1, 2017                                       | \$ 29,037 | \$ —        |
| Servicing assets that resulted from transfers of financial assets | 1,385     | —           |
| Changes in fair value due to valuation inputs or assumptions      | 444       | —           |
| Changes in fair value due to decay                                | (803)     | —           |
| Fair value, March 31, 2017  | \$ 30,063 | \$ —        |

There were no unrealized losses included in accumulated other comprehensive income related to Level 3 financial assets and liabilities at March 31, 2018 or 2017.

## Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

The tables below present the recorded amount of assets and liabilities measured at fair value on a nonrecurring basis:

| Quoted Prices<br>In Active<br>Markets | Significant<br>Other | Significant |
|---------------------------------------|----------------------|-------------|
|---------------------------------------|----------------------|-------------|

Edgar Filing: SOUTH STATE Corp - Form 10-Q

| (Dollars in thousands)      | Fair Value | for Identical<br>Assets<br>(Level 1) | Observable<br>Inputs<br>(Level 2) | Unobservable<br>Inputs<br>(Level 3) |

## Fair Value of Financial Instruments

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those models are significantly affected by the assumptions used, including the discount rates and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instrument. The use of different methodologies may have a material effect on the estimated fair value amounts. The fair value estimates presented herein are based on pertinent information available to management as of March 31, 2018, December 31, 2017 and March 31, 2017. Such amounts have not been revalued for purposes of these consolidated financial statements since those dates and, therefore, current estimates of fair value may differ significantly from the amounts presented herein.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Cash and Cash Equivalents — The carrying amount is a reasonable estimate of fair value.

Investment Securities — Securities held to maturity are valued at quoted market prices or dealer quotes. The carrying value of FHLB stock approximates fair value based on the redemption provisions. The carrying value of the Company's investment in unconsolidated subsidiaries approximates fair value. See Note 5—Investment Securities for additional information, as well as page 40 regarding fair value.

Loans held for sale — The fair values disclosed for loans held for sale are based on commitments from investors for loans with similar characteristics.

Loans — ASU 2016-01 - Financial Instruments – Overall – Recognition and Measurement of Financial Assets and Financial Liabilities became effective for the Company on January 1, 2018. This accounting standard requires the company to calculate the fair value of our loans for disclosure purposes based on an estimated exit price. In previous periods we have valued using only discounted cash flows on fixed rate loans. Therefore, the fair value for loans for March 31, 2018 will be calculated using a different method than that used at December 31, 2017 and March 31, 2017.

With ASU 2016-01, to estimate an exit price, all loans (fixed and variable) are being valued with a discounted cash flow analyses for loans that includes the Company's estimate of future credit losses expected to be incurred over the life of the loans. Fair values for certain mortgage loans (e.g., one-to-four family residential) and other consumer loans are estimated using discounted cash flow analyses based on the Company's current rates offered for new loans of the same type, structure and credit quality. Fair values for other loans (e.g., commercial real estate and investment property mortgage loans, commercial and industrial loans) are estimated using discounted cash flow analyses, using interest rates currently being offered by the Company for loans with similar terms to borrowers of similar credit quality. Fair values for non-performing loans are estimated using a discounted cash flow analyses.

For previous periods, variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. Also, for all other loans where a discounted cash flow analyses was used, there was no estimate of future credit losses expected to be incurred over the life of the loans included in the valuation.

Table of Contents

Deposit Liabilities — The fair values disclosed for demand deposits (e.g., interest and non-interest bearing checking, passbook savings, and certain types of money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The carrying amounts of variable-rate, fixed-term money market accounts, and certificates of deposit approximate their fair values at the reporting date. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Federal Funds Purchased and Securities Sold Under Agreements to Repurchase — The carrying amount of federal funds purchased, borrowings under repurchase agreements, and other short-term borrowings maturing within ninety days approximate their fair values.

Other Borrowings — The fair value of other borrowings is estimated using discounted cash flow analysis on the Company's current incremental borrowing rates for similar types of instruments.

Accrued Interest — The carrying amounts of accrued interest approximate fair value.

Derivative Financial Instruments — The fair value of derivative financial instruments (including interest rate swaps) is estimated using pricing models of derivatives with similar characteristics.

Commitments to Extend Credit, Standby Letters of Credit and Financial Guarantees — The fair values of commitments to extend credit are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair values of guarantees and letters of credit are based on fees currently charged for similar agreements or on the estimated costs to terminate them or otherwise settle the obligations with the counterparties at the reporting date.

Table of Contents

The estimated fair value, and related carrying amount, of the Company's financial instruments are as follows:

| (Dollars in thousands)   | Carrying<br>Amount | Fair<br>Value | Level 1    | Level 2    | Level 3    |
|--|--------------------|---------------|------------|------------|------------|
| March 31, 2018   |                    |               |            |            |            |
| Financial assets:  |                    |               |            |            |            |

## Cash Flow Hedge of Interest Rate Risk

The Company is exposed to interest rate risk in the course of its business operations and manages a portion of this risk through the use of derivative financial instruments, in the form of interest rate swaps. The Company accounts for its interest rate swap that is classified as a cash flow hedge in accordance with FASB ASC 815, Derivatives and Hedging, which requires that all derivatives be recognized as assets or liabilities on the balance sheet at fair value. For more information regarding the fair value of the Company's derivative financial instruments, see Note 13 to these financial statements.

The Company utilizes an interest rate swap agreement to essentially convert a portion of its variable-rate debt to a fixed rate (cash flow hedge). For derivatives designated as hedging exposure to variable cash flows of a forecasted transaction (cash flow hedge), the effective portion of the derivative's gain or loss is initially reported as a component of other comprehensive income and subsequently reclassified into earnings when the forecasted transaction affects earnings or when the hedge is terminated. The ineffective portion of the gain or loss is reported in earnings immediately. For derivatives that are not designated as hedging instruments, changes in the fair value of the derivatives are recognized in earnings immediately.

When applying hedge accounting for derivatives, the Company establishes a method for assessing the effectiveness of the hedging derivative and a measurement approach for determining the ineffective aspect of the hedge upon the inception of the hedge.

During 2009, the Company entered into a forward starting interest rate swap agreement with a notional amount of \$8.0 million to manage interest rate risk due to periodic rate resets on its junior subordinated debt issued by SCBT Capital Trust II, an unconsolidated subsidiary of the Company established for the purpose of issuing trust preferred securities. The Company hedges the variable rate cash flows of subordinated debt against future interest rate increases by using an interest rate swap that effectively fixed the rate on the debt beginning on June 15, 2010, at which time the debt contractually converted from a fixed interest rate to a variable interest rate. This hedge expires on June 15, 2019. The notional amount on which the interest payments are based will not be exchanged. This derivatives contract calls for the Company to pay a fixed rate of 4.06% on \$8.0 million notional amount and receive a variable rate of three-month LIBOR on the \$8.0 million notional amount.

The Company recognized an after-tax unrealized gain on its cash flow hedge in other comprehensive income of \$65,000 and \$44,000 for the three months ended March 31, 2018 and 2017, respectively. The Company recognized a \$162,000 cash flow hedge liability in other liabilities on the balance sheet at March 31, 2018, compared to a \$426,000

## Table of Contents

liability at March 31, 2017. There was no ineffectiveness in the cash flow hedge during the three months ended March 31, 2018 and 2017.

Credit risk related to the derivative arises when amounts receivable from the counterparty (derivatives dealer) exceed those payable. The Company controls the risk of loss by only transacting with derivatives dealers that are national market makers whose credit ratings are strong. Each party to the interest rate swap is required to provide collateral in the form of cash or securities to the counterparty when the counterparty's exposure to a mark-to-market replacement value exceeds certain negotiated limits. These limits are typically based on current credit ratings and vary with ratings changes. As of March 31, 2018 and 2017, the Company provided \$300,000 and \$550,000 of collateral, respectively, which is included in cash and cash equivalents on the balance sheet as interest-bearing deposits with banks. Also, the Company has a netting agreement with the counterparty.

## Balance Sheet Fair Value Hedge

The Company maintains one loan swap, with an aggregate notional amount of \$2.8 million at March 31, 2018, accounted for as fair value hedges in accordance with ASC 815, Derivatives and Hedging. This derivative protects the company from interest rate risk caused by changes in the LIBOR curve in relation to a certain designated fixed rate loan. The derivative converts the fixed rate loan to a floating rate. Settlement occurs in any given period where there is a difference in the stated fixed rate and variable rate. The fair value of this hedge is recorded in other assets and in other liabilities. All changes in fair value are recorded through earnings as noninterest income. There was no gain or loss recorded on this derivative for the three months ended March 31, 2018 or 2017.

## Non-designated Hedges of Interest Rate Risk

### Customer Swap

The Company maintains interest rate swap contracts with customers that are classified as non-designated hedges and are not speculative in nature. These agreements are designed to convert customer's variable rate loans with the Company to fixed rate. These interest rate swaps are executed with loan customers to facilitate a respective risk management strategy and allow the customer to pay a fixed rate of interest to the Company. These interest rate swaps are simultaneously hedged by executing offsetting interest rate swaps with unrelated market counterparties to minimize the net risk exposure to the Company resulting from the transactions and allow the Company to receive a variable rate of interest. The interest rate swaps pay and receive interest based on a floating rate based on one month LIBOR plus credit spread, with payments being calculated on the notional amount. The interest rate swaps are settled monthly with varying maturities.

As the interest rate swaps associated with this program do not meet the strict hedge accounting requirements, changes in the fair value of both the customer swaps and the offsetting swaps are recognized directly in earnings. As of March 31, 2018, the interest rate swaps had an aggregate notional amount of approximately \$564.1 million and the fair value of the interest rate swap derivatives are recorded in other assets at \$5.7 million and in other liabilities at \$5.9 million for a net liability position of \$156,000, which was recorded through earnings. The fair value of the interest rate swap derivative with the derivatives dealer was in a net asset position of \$12,000 at March 31, 2017.

#### Mortgage Banking

The Company also has derivatives contracts that are classified as non-designated hedges. These derivatives contracts are a part of the Company's risk management strategy for its mortgage banking activities. These instruments may include financial forwards, futures contracts, and options written and purchased, which are used to hedge MSR's; while forward sales commitments are typically used to hedge the mortgage pipeline. Such instruments derive their cash flows, and therefore their values, by reference to an underlying instrument, index or referenced interest rate. The Company does not elect hedge accounting treatment for any of these derivative instruments and as a result, changes in fair value of the instruments (both gains and losses) are recorded in the Company's consolidated statements of income in mortgage banking income.

Table of Contents

## Mortgage Servicing Rights

Derivatives contracts related to MSRs are used to help offset changes in fair value and are written in amounts referred to as notional amounts. Notional amounts provide a basis for calculating payments between counterparties but do not represent amounts to be exchanged between the parties, and are not a measure of financial risk. On March 31, 2018, the Company had derivative financial instruments outstanding with notional amounts totaling \$69.0 million related to MSRs, compared to \$98.0 million on March 31, 2017. The estimated net fair value of the open contracts related to the MSRs was recorded as a gain of \$390,000 at March 31, 2018, compared to a gain of \$214,000 at March 31, 2017.

## Mortgage Pipeline

The following table presents the Company's notional value of forward sale commitments and the fair value of those obligations along with the fair value of the mortgage pipeline.

| (Dollars in thousands)                           | March<br>31, 2018 | December 31,<br>2017 | March 31,<br>2017 |
|--|-------------------|----------------------|-------------------|
| Mortgage loan pipeline                           | \$ 92,647         | \$ 71,477            | \$ 117,666        |
| Expected closures                                | 69,485            | 53,608               | 88,250            |
| Fair value of mortgage loan pipeline commitments | 1,190             | 920                  | 2,066             |

## Note 16 — Capital Ratios

The Company is subject to regulations with respect to certain risk-based capital ratios. These risk-based capital ratios measure the relationship of capital to a combination of balance sheet and off-balance sheet risks. The values of both balance sheet and off-balance sheet items are adjusted based on the rules to reflect categorical credit risk. In addition to the risk-based capital ratios, the regulatory agencies have also established a leverage ratio for assessing capital adequacy. The leverage ratio is equal to Tier 1 capital divided by total consolidated on-balance sheet assets (minus amounts deducted from Tier 1 capital). The leverage ratio does not involve assigning risk weights to assets.

In July 2013, the Federal Reserve announced its approval of a final rule to implement the regulatory capital reforms developed by the Basel Committee on Banking Supervision ("Basel III"), among other changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act. The new rules became effective January 1, 2015, subject to a phase-in period for certain aspects of the new rules.

As applied to the Company and the Bank, the new rules include a new minimum ratio of common equity Tier 1 capital ("CET1") to risk-weighted assets of 4.5%. The new rules also raised the minimum required ratio of Tier 1 capital to risk-weighted assets from 4% to 6%. The minimum required leverage ratio under the new rules is 4%. The minimum required total capital to risk-weighted assets ratio remains at 8% under the new rules.

In order to avoid restrictions on capital distributions and discretionary bonus payments to executives, under the new rules a covered banking organization is also required to maintain a "capital conservation buffer" in addition to its minimum risk-based capital requirements. This buffer is required to consist solely of common equity Tier 1, and the buffer applies to all three risk-based measurements (CET1, Tier 1 capital and total capital). The capital conservation buffer will be phased in incrementally over time, beginning January 1, 2016 and becoming fully effective on January 1, 2019, and will ultimately consist of an additional amount of Tier 1 common equity equal to 2.5% of risk-weighted assets.

The Bank is also subject to the regulatory framework for prompt corrective action, which identifies five capital categories for insured depository institutions (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized) and is based on specified thresholds for each of the three risk-based regulatory capital ratios (CET1, Tier 1 capital and total capital) and for the leverage ratio.

Table of Contents

The following table presents actual and required capital ratios as of March 31, 2018, December 31, 2017 and March 31, 2017 for the Company and the Bank under the Basel III capital rules. The minimum required capital amounts presented include the minimum required capital levels as of March 31, 2018 based on the phase-in provisions of the Basel III Capital Rules and the minimum required capital levels as of January 1, 2019 when the Basel III Capital Rules have been fully phased-in. Capital levels required to be considered well capitalized are based upon prompt corrective action regulations, as amended to reflect the changes under the Basel III Capital Rules.

|  | Actual       |         | Minimum Capital Required - Basel III Phase-In Schedule Capital |        | Minimum Capital Required - Basel III Fully Phased In Capital |        | Required to be Considered Well Capitalized Capital |        |

Table of Contents

\$18.1 million and \$26.2 million in core deposit intangibles related to the SBFC and PSC mergers, respectively. The following is a summary of gross carrying amounts and accumulated amortization of other intangible assets:

| (Dollars in thousands)   | March 31,<br>2018 | December 31,<br>2017 | March 31,<br>2017 |
|--------------------------|-------------------|----------------------|-------------------|
| Gross carrying amount    | \$ 126,449        | \$ 126,449           | \$ 100,274        |
| Accumulated amortization | (56,073)          | (52,660)             | (44,813)          |
|                          | \$ 70,376         | \$ 73,789            | \$ 55,461         |

Amortization expense totaled \$3.4 million and \$2.5 million for the three months ended March 31, 2018 and 2017, respectively. Other intangibles are amortized using either the straight-line method or an accelerated basis over their estimated useful lives, with lives generally between two and 15 years. Estimated amortization expense for other intangibles for each of the next five quarters is as follows:

(Dollars in thousands)
