

BioAmber Inc.
Form 10-Q
November 09, 2015

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 001-35905

BIOAMBER INC.

(Exact name of registrant as specified in its charter)

Delaware 98-0601045
(State or other jurisdiction of (I.R.S. Employer

incorporation or organization) Identification No.)

Jean-François Huc

President and Chief Executive Officer

BioAmber Inc.

Edgar Filing: BioAmber Inc. - Form 10-Q

1250 Rene Levesque West, Suite 4310

Montreal, Quebec, Canada H3B 4W8

Telephone: (514) 844-8000

(Address, Including Zip Code, and Telephone Number, Including Area Code, of Registrant's Principal Executive Offices)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of November 9, 2015, there were 25,857,671 shares of the registrant's Common Stock, \$0.01 par value per share, outstanding.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains or incorporates by reference statements that are not historical facts and are considered forward-looking within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. These forward-looking statements may contain projections of our future results of operations or of our financial position or state other forward-looking information. In some cases you can identify these statements by forward-looking words such as “anticipate,” “believe,” “could,” “continue,” “estimate,” “expect,” “intend,” “may,” “should,” “will,” “would,” “plan,” “projected” or the negative of such words or other similar words or phrases. We believe that it is important to communicate our future expectations to our investors. However, there may be events in the future that we are not able to accurately predict or control and that may cause our actual results to differ materially from the expectations we describe in our forward-looking statements. You are cautioned not to unduly rely on forward-looking statements because they involve risks and uncertainties, and actual results may differ materially from those discussed as a result of various factors, including, but not limited to:

- the expected funding sources of our Sarnia, Ontario plant and our other planned manufacturing facilities and the expected timing of the completion of construction and the start of commercial operations at each of these facilities;
- our joint venture with Mitsui & Co. Ltd., or Mitsui;
- our take-or-pay agreements with Vinmar International Ltd., or Vinmar, related to bio-based 1,4-butanediol(1,4 BDO or BDO), tetrahydrofuran (THF), and bio-based succinic acid, and with PTTMCC Biochem for bio-succinic acid;
- the expected market applications for our products and the sizes of these addressable markets;
- our ability to gain market acceptance for bio-succinic acid, its derivatives including 1,4 BDO and THF and other building block chemicals;
- the benefits of our transition from our E. coli bacteria to our yeast;
- our ability to commence commercial sales and execute on our commercial expansion plan, including the timing and volume of our future production and sales;
- the expected cost-competitiveness and relative performance attributes of our bio-succinic acid and the products derived from it;
- our ability to cost-effectively produce and commercialize bio-succinic acid, its derivatives and other building block chemicals;

- customer qualification, approval and acceptance of our products;
- our ability to maintain and advance strategic partnerships and collaborations and the expected benefits and accessible markets related to those partnerships and collaborations;
- the impact of our off-take agreements on our business with our customers, our distributors and our current and future equity partners;
- our ability to economically obtain feedstock and other inputs;
- the achievement of advances in our technology platform;
- our ability to obtain and maintain intellectual property protection for our products and processes and not infringe on others' rights;
- government regulatory and industry certification approvals for our facilities and products; and
- government policymaking and incentives relating to bio-chemicals;

and other risks and uncertainties referenced under "Risk Factors" in this Report and in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014. You should not place undue reliance on our forward-looking statements. These forward-looking statements speak only as of the date on which the statements were made and are not guarantees of future performance. Except as may be required by applicable law, we do not undertake or intend to update any forward-looking statements after the date of this prospectus supplement or the respective dates of documents incorporated by reference herein or therein that include forward-looking statements.

BIOAMBER INC.

Notes to Condensed Consolidated Financial Statements

for the three and nine months ended September 30, 2015 and 2014, and the year ended December 31, 2014

(Unaudited)

1. Summary of significant accounting policies

Basis of presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with Securities and Exchange (“SEC”) rules and regulations and using the same accounting policies as described in Note 2 of the audited consolidated financial statements included in BioAmber Inc. (BioAmber or the Company) Annual Report on Form 10-K for the fiscal year ended December 31, 2014. Accordingly, these unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes included in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2014.

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America (“GAAP”) requires management to make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and accompanying notes. In the opinion of the Company’s management, the condensed consolidated financial statements reflect all adjustments, which are normal and recurring in nature, necessary for fair financial statement presentation. Company’s management bases its estimates on various assumptions and historical experience, which are believed to be reasonable; however, due to the inherent nature of estimates, actual results may differ significantly due to changed conditions or assumptions. The results of operations for the three and nine months ended September 30, 2015 are not necessarily indicative of results to be expected for the fiscal year ended December 31, 2015 or any other future period.

Risk and uncertainties

BioAmber is an industrial biotechnology company producing sustainable chemicals and the Company has not yet commenced its planned, principal operations as of September 30, 2015. The Company’s principal operations will start once commercial production begins at the Sarnia, Ontario facility. The Company’s activities since inception have consisted principally of raising capital for performing research and development activities, developing market related to its bio-succinic acid product and derived products, acquiring technology patents, producing and selling bio-succinic acid from a large-scale demonstration facility in Pomacle, France, and building its Sarnia facility. The attainment of profitable operations is dependent upon future events, including future operation of the commercial-scale manufacturing facility in Sarnia, Ontario, further advancing its existing commercial arrangements with strategic partners to generate revenue from the sale of its products that will support the Company’s cost structure, gaining market acceptance for its bio-succinic acid, its derivatives and other building block chemicals, obtaining adequate financing to complete its development activities, and attracting and retaining qualified personnel.

Net loss per share

The Company computes net loss per share in accordance with FASB ASC 260, Earnings Per Share, under which basic net loss per share attributable to common shareholders is computed by dividing net loss attributable to common shareholders by the basic weighted-average number of common shares outstanding during the period. Shares issued and reacquired during the period are weighted for the portion of the period that they were outstanding. The computation of diluted earnings per share ("EPS") is similar to the computation of the basic EPS except that the denominator is increased to include the number of additional shares of common stock that would have been outstanding if all of the potentially dilutive shares of common stock had been issued. In addition, in computing the dilutive effect of convertible securities, the numerator is adjusted to add back any convertible preferred dividends and the after-tax amount of interest recognized in the period associated with any convertible debt. The numerator is also adjusted for any other changes in income or loss that would result from the assumed conversion of those potential shares of common stock such as profit-sharing expenses. Common equivalent shares are excluded from the diluted EPS calculation if their effect is anti-dilutive. Losses have been incurred in each period since inception; accordingly, diluted loss per share is not presented.

Recently adopted and recently issued accounting guidance

In May 2014, the FASB issued Accounting Standards Update (ASU) No. 2014-09, "Revenue Recognition - Revenue from Contracts with Customers," which is a comprehensive revenue recognition standard that will supersede nearly all existing revenue recognition guidance under U.S. GAAP. The standard is effective for interim and annual periods beginning after December 15, 2017, and either full retrospective adoption or modified retrospective adoption is permitted. The Company is in the process of evaluating the impact of the standard.

In April 2015, the FASB issued ASU No. 2015-03, "Simplifying the Presentation of Debt Issuance Costs," ("ASU 2015-03"). ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The standard is effective for interim and annual periods beginning after December 15, 2015, with early adoption permitted. The Company is currently assessing the impact that adopting this new accounting guidance will have on its consolidated financial statements and footnote disclosures.

In July 2015, the FASB issued ASU 2015-11, Simplifying the Measurement of Inventory ("ASU-2015-11"). ASU 2015-11 applies to inventory that is measured using first-in, first-out ("FIFO") or average cost. ASU 2015-11 requires inventory to be measured at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. The amendments in ASU 2015-11 more closely align the measurement of inventory in U.S. GAAP with the measurement of inventory in International Financial Reporting Standards ("IFRS"). ASU 2015-11 is effective for fiscal years beginning after December 31, 2016. The Company is in the process of evaluating the impact of the standard.

2. Equity and Cost Investments

Sinoven, the Company's wholly-owned subsidiary and a third-party, NatureWorks LLC, are both 50% holders of the joint venture AmberWorks. Amberworks had a net loss of \$nil and \$432, for the three months ended September 30, 2015 and 2014, respectively. Sinoven's share of the net loss amounted to \$nil and \$216 for those periods, respectively.

AmberWorks had a net loss of \$nil and \$216 for the nine months ended September 30, 2015 and 2014, respectively. Sinoven's share of the net loss amounted to \$nil and \$108 for those periods, respectively.

AmberWorks had total assets of \$70,496 and \$69,634 and total liabilities of \$nil as of September 30, 2015 and December 31, 2014, respectively. Sinoven's share of net assets amounted to \$34,817 and \$34,817 as of those periods, respectively.

On May 6, 2014, AmberWorks made a capital distribution totaling \$1,350,000, to Sinoven and a NatureWorks LLC, both 50% holders of the joint venture, in proportion of their respective investments in the joint venture. This distribution was in the form of cash and was recorded as a reduction of investment.

On February 5, 2015, the Company invested \$412,434 (CAD\$ 500,000) in a start-up private company, which represents a 6.6% ownership interest.

3. Inventories

	September 30, 2015 \$	December 31, 2014 \$
Finished goods	928,173	1,801,826
Raw material	323,206	—
Supplies and spare parts	39,185	—
Total	1,290,564	1,801,826

The Company recorded an inventory reserve of approximately \$nil and \$300,000 in the three and nine months ended September 30, 2015. The Company recorded an inventory reserve of approximately \$200,000 and \$1.8 million in the three and nine months ended September 30, 2014.

4. Property and equipment

	Estimated Useful Life (years)	September 30, 2015	December 31, 2014
		\$	\$
Land		251,378	290,349
Furniture and fixtures	5 - 8	125,620	77,448
Machinery and equipment	5 - 15	1,268,027	1,215,561
Computers, office equipment and peripherals	3 - 7	187,462	134,248
Leasehold improvement	7 - 10	341,303	12,342

Grants applied to construction in-progress		(19,437,767)	(14,362,312)
		126,031,204	89,031,987
Less: accumulated depreciation		(495,081)	(367,088)
Property and equipment, net		125,536,123	88,664,899

Depreciation expense is recorded as an operating expense in the consolidated statements of operations and amounted to \$105,411 and \$45,841 for the three months ended September 30, 2015 and 2014, respectively, and to \$238,329 and \$165,424 for the nine months ended September 30, 2015 and 2014 respectively.

5. Intangible assets

	September 30, 2015	December 31, 2014
	\$	\$
Intellectual property, patents and licenses:		
Beginning balance	4,528,739	4,528,739
Addition of license	3,106,767	—
	7,635,506	4,528,739
Less: accumulated amortization	(4,528,739)	(4,528,739)
Intellectual property, patents and licenses, net	3,106,767	—
Acquired in-process research and development	4,158,550	4,158,550
Write-off of license acquired	(1,141,000)	—
	3,017,550	—
Computer software and license	411,250	279,201
Less: accumulated depreciation	(152,844)	(104,840)
Intangible assets, net	6,382,723	4,332,911

Amortization expense is recorded as an operating expense in the consolidated statements of operations and amounted to \$18,079 and \$22,804 for the three months ended September 30, 2015 and 2014, respectively and to \$49,855 and \$22,804 for the nine months ended September 30, 2015 and 2014 respectively.

On December 11, 2014, we entered into a license agreement with Johnson Matthey Davy Technologies (Davy). We intend to use the technology licensed from Davy in our planned 100,000 ton per year capacity plant that will use bio-succinic acid as the feedstock to produce 70,000 tons of BDO and 30,000 tons of THF. We also secured the right to license the Davy technology for two additional BDO/THF plants. As of September 30, 2015, an amount of \$3,106,767 was capitalized as a license fee under the Davy license.

On April 20, 2015, the Company elected to terminate its license with DuPont for their catalysts following the decision to pursue with the BDO technology licensed from Davy for all future plants, in addition to the planned 100,000 ton per year capacity plant. As a result, the carrying value of the DuPont license of \$1,141,000 was written off during the second quarter 2015.

6. Accounts payable and accrued liabilities

Accounts payable and accrued liabilities consisted of the following:

	September 30, 2015 \$	December 31, 2014 \$
Trade accounts payable	12,640,725	13,184,825
Accrued payroll and bonus	2,176,010	2,232,590
Consulting and legal fees	1,010,403	614,993
Accrued interests	358,803	—
Other	243,035	427,510
Total	16,428,976	16,459,918

As of September 30, 2015, accrued interests are related to the Tennenbaum Capital Partners, LLC loan and the loan with Comerica Bank, Export Development Canada and Farm Credit Canada.

7. Long-term debt

Project Financing

The Company entered into the following facilities to fund the construction of the manufacturing facility in Sarnia, Ontario:

i) Sustainable Jobs and Investment Fund (“SJIF”)

On September 30, 2011, BioAmber Sarnia Inc., (“BioAmber Sarnia”), a joint venture owned by Mitsui & Co. at 30% and BioAmber at 70%, and the Minister of Economic Development and Trade of Ontario, Canada (Sustainable Jobs Innovation Fund) entered into an agreement pursuant to which a loan in the amount of CAD\$15,000,000, or \$11,194,500 when converted into U.S. dollars as of September 30, 2015, was granted to BioAmber Sarnia, according to the following principal terms:

the loan is interest free during the first five years provided BioAmber Sarnia creates or retains an average of 31 jobs per year, calculated on an annual basis;

the loan will bear interest from the fifth anniversary date of its disbursement at an annual rate of 3.98% (or 5.98% if BioAmber Sarnia does not fully achieve the cumulative job target for the first five years);

the principal will be repayable in five annual equal installments from the sixth anniversary date of the disbursement of the loan;

the loan is secured by a guarantee from BioAmber and Mitsui & Co., Ltd., the non-controlling shareholder of BioAmber Sarnia (the guarantee being limited to its percentage of ownership held in BioAmber Sarnia); and

the loan is secured by (i) a general security agreement representing a valid charge on BioAmber Sarnia’s present and future accounts receivable, inventory, equipment and other personal property and (ii) a valid charge against the leasehold interest on the portion of the real property located in Sarnia Ontario, Canada and leased to BioAmber Sarnia.

As of September 30, 2015, all disbursements were received for a total of CAD\$15,000,000, or \$11,194,500 when converted into U.S. dollars as of September 30, 2015. The fair value of the loan was calculated using the method of the discounted future cash payments of principal and interest over the term of the loan. The discount rate used was between 12% and 15%, being the interest rates a loan with similar terms and conditions would carry.

The difference between the face value of the loan and the discounted amount of the loan was recorded as a short-term deferred grant and subsequently reclassified to reduce the cost of construction in-progress.

The discounted loan is being accreted to its face value through a charge in the consolidated statement of operations using the effective interest method over the term of the loan.

ii) Sustainable Chemistry Alliance (“SCA”)

In November 2011, BioAmber Sarnia entered into a loan agreement with SCA in the amount of CAD\$500,000, or \$373,150 when converted into U.S. dollars as of September 30, 2015. The loan was interest free until November 30, 2013, and the unpaid balance of the loan subsequently bears interest at the rate of 5% per annum compounded monthly. The principal repayment will be effected by way of 20 consecutive quarterly installments of CAD\$25,000 from November 2015 to November 2020. The loan agreement contains various legal and financial covenants including i) third party credit facilities which cannot exceed CAD\$45 million in the aggregate as long as any principal of the loan remains outstanding, ii) the funds are to be used for research and development expenses only and iii) dividends may not be declared or paid without the consent of the lender. In July 2014, the loan

agreement was amended to increase the third party credit facilities from CAD\$45 million in the aggregate as described above, to CAD\$60 million in the aggregate. These covenants were met as of September 30, 2015.

The loan was originally recorded at \$193,573 when converted into U.S. dollars as of September 30, 2015, being the discounted amount of the future cash payments of principal and interest over the term of the loan. The discount rate used was 15%, being the interest rate a loan with similar terms and conditions would carry.

The difference between the face value of the loan and the discounted amount of the loan of \$179,577 was recorded as a deferred grant (see Note 8).

The discounted loan is being accreted to its face value through a charge in the consolidated statement of operations using the effective interest method over the term of the loan.

iii) Federal Economic Development Agency (“FEDDEV”)

On September 30, 2011, BioAmber Sarnia and FEDDEV entered into a contribution agreement pursuant to which a loan of up to a maximum amount of CAD\$12,000,000 or \$8,955,600 when converted into U.S. dollars as of September 30, 2015, was granted to BioAmber Sarnia. The loan is non-interest bearing with original repayment of principal from October 2013 to October 2018 in 60 monthly installments. The repayment terms were later modified as described below.

The loan agreement contains various legal and financial covenants ordinarily found in such government agency loan agreements. In addition the following specific covenants also apply:

- (a) the Company will carry appropriate amounts of liability and casualty insurance during the duration of the loan agreement;
- (b) the Company will file for and obtain all necessary permits and licenses from all required jurisdictional authorities in order to build the facility;
- (c) the Company will not alter the project nor project management without prior written consent of the Minister;
- (d) the Company will complete the project to the Minister’s satisfaction by the completion date; and
- (e) the Company will not allow change of control without prior written consent of the Minister.

These covenants were met as of September 30, 2015.

On March 20, 2013, BioAmber Sarnia agreed with FEDDEV to amend the repayment of principal from the period October 2013 to October 2018, to the period October 2014 to October 2019. The Company recorded the impact of the amendment in accordance with FASB ASC 470-50, Debt Modifications and Extinguishments. Accordingly, the amendment was recorded as a debt extinguishment and the issuance of new debt, with new terms. As a result, the Company recognized a gain on debt extinguishment of \$314,305.

During May 2014, BioAmber Sarnia agreed with FEDDEV to amend the repayment of principal from the period October 2014 to October 2019, to the period from October 2015 to October 2020. The Company recorded the impact of the amendment in accordance with FASB ASC 470-50, Debt Modifications and Extinguishments. Accordingly, the amendment was recorded as a debt extinguishment and the issuance of new debt, with new terms. As a result, the Company recognized a gain on debt extinguishment of \$451,450.

As of September 30, 2015, all disbursements were received for a total of CAD \$12,000,000, or \$8,955,600 when converted into U.S. dollars as of September 30, 2015. The fair value of the loan was calculated using the method of the discounted future cash payments of principal and interest over the term of the loan. The discount rate used was between 12% and 15%, being the interest rates a loan with similar terms and conditions would carry.

iv) Hercules Technology Growth Capital, Inc. (“HTGC”)

On June 27, 2013, the Company entered into a Loan and Security Agreement (the “HTGC Loan Agreement”) with HTGC. Pursuant to the HTGC Loan Agreement, HTGC agreed to make a senior secured term loan of \$25 million, which was funded on June 27, 2013, net of a 2.5% loan fee. The term loan is repayable over 36 months after closing, at a floating interest rate per annum based on the greater of (a) 10% and (b) the prime rate (as reported in the Wall Street Journal) plus 6.75% and is subject to an end of term charge of 11.5% based on the \$25 million loaned amount (\$2,875,000). There was an initial interest-only period until January 1, 2014, to be extended until July 1, 2014 in the event that the Company received an additional equity contribution by its joint venture partner of at least \$1.5 million relating to its Sarnia facility by December 31, 2013, which was subsequently extended to January 31, 2014 pursuant to an amendment dated December 20, 2013. On January 24, 2014, the Company received the additional equity contribution from Mitsui of CAD \$9 million, and fulfilled the condition to extend the initial interest-only period until July 1, 2014.

At its option, the Company may prepay some or all of the loan balance, subject to a prepayment fee equal to 2% of the amount prepaid during the first 12 months after closing, 1% after 12 months but prior to 24 months after closing, and without prepayment fee thereafter. In addition, the Company is obligated to pay an end of term charge (as referenced above) in the amount of \$2,875,000 on the date on which the term loan is paid or becomes due and payable in full, which is being accreted over the expected term of the loan.

On December 17, 2014, the Company voluntarily paid off the outstanding balance and terminated the HTGC Loan Agreement. The payoff amount of \$22.4 million included the outstanding principal amount of \$19.2 million, an end of term charge of \$2.9 million, a prepayment fee of \$192,000, accrued interest of \$123,000, and other legal fees. In connection with such repayment, Hercules terminated its security interest in the assets of the Company which were subject to the HTGC Loan Agreement.

The Company used the proceeds received from Tennenbaum Capital Partners LLC loan (refer to Note 7 vii)) to repay the existing debt with HTGC. The Company recorded the impact of the loan termination in accordance with FASB ASC 470-50, Debt Modifications and Extinguishments. Accordingly, the difference between the net carrying amount of the extinguished debt and the reacquisition price of the new debt was recorded as a debt extinguishment. As a result, the Company recognized a loss on debt extinguishment of \$622,179 for the year ended December 31, 2014.

v)Minister of Agriculture and Agri-Food of Canada (“AAFC”)

On March 10, 2014, BioAmber Sarnia entered into a repayable contribution agreement in the form of a non-interest bearing loan with the Minister of Agriculture and Agri-Food of Canada in the amount of CAD\$10 million, or \$7,463,000 when converted into U.S. dollars as of September 30, 2015, for the AgriInnovation Program. This loan provides for progressive disbursements as eligible costs are incurred for building construction, installation of equipment and start-up and commissioning of the Sarnia facility. The loan is repayable in equal, monthly installments beginning March 31, 2016 through March 31, 2025 and it contains various legal and financial covenants ordinarily found in such government agency loan agreements. These covenants were met as of September 30, 2015.

During the three months ended March 31, 2015, BioAmber Sarnia received the third and last disbursement for CAD\$2,745,000 or, 2,048,355 when converted in U.S. dollars as of September 30, 2015. The loan was originally recorded at \$1,103,948 when converted into U.S. dollars as of September 30, 2015, being the discounted amount of the future cash payments of principal and interest over the term of the loan. The discount rate used was 12%, being the interest rate a loan with similar terms and conditions would carry. The difference between the face value of the loan and the discounted amount of the loan of \$944,387 when converted into U.S. dollars as of September 30, 2015 was recorded as a grant applied as reduction of such cost of construction in-progress.

vi)Comerica Bank, Export Development Canada and Farm Credit Canada (“EDC”)

On June 20, 2014, BioAmber Sarnia signed a loan agreement with a financial consortium, comprised of Comerica Bank, Export Development Canada and Farm Credit Canada for a senior secured loan in the principal amount of CAD\$20.0 million. The loan bears interest at a floating interest rate per annum based on the greater of (i) the Canadian prime rate and (ii) the Canadian dealer offered rate plus 1%, in either case plus an interest spread of 5%, subject to a reduction to 4% under certain circumstances. There will be an initial interest-only period from draw down of the term loan until the first payment of principal. The loan's principal will be repaid in 26 equal, quarterly installments beginning on September 30, 2015. The disbursement of the loan, net of the 2.5% upfront fee of CAD\$500,000, or \$373,150 when converted into U.S. dollars as of September 30, 2015, was recorded as deferred financing costs and will be amortized over the estimated term of the loan using the effective interest method. BioAmber Sarnia paid a 1.0% per annum commitment fee on the undrawn amount, until the drawdown on May 12, 2015. The loan was originally recorded at \$14,351,923 when converted into U.S. dollars as of September 30, 2015, being the discounted amount of the future cash payments of principal and interest over the term of the loan. The discount rate used was 12%, being the interest rate a loan with similar terms and conditions would carry. The difference between the face value of the loan and the discounted amount of the loan of \$1,751,448 when converted into U.S. dollars as of September 30, 2015, was recorded as a grant applied as reduction of the cost of construction in-progress in the amount of \$731,335 during the three months ended June 30, 2015 and an amount of \$1,020,113 was deferred and recorded as a reduction of the cost of construction in-progress during the three months ended September 30, 2015.

BioAmber Sarnia may prepay all or a portion of the loan outstanding from and after the date of the first principal repayment, without penalty.

BioAmber Sarnia's obligations under the loan are secured by (i) a security interest on all of BioAmber Sarnia's assets and (ii) a pledge of all the shares of BioAmber Sarnia. In addition, the Company will provide the lenders with a guarantee representing 70% of the secured obligations under the loan, and Mitsui & Co., Ltd. will provide a guarantee representing 30% of the secured obligations under the loan that is capped at CAD\$6.0 million plus all accrued interest on the secured obligations and fees and expenses. The proceeds of the loan were used by BioAmber Sarnia to complete the ongoing construction of the Sarnia Plant and fund its startup and commissioning.

The loan agreement contains certain representations and warranties, affirmative covenants, negative covenants and conditions that are customarily required for similar financings, including in connection with the disbursement of the loan. The financial covenants require BioAmber Sarnia to maintain a minimum debt service ratio of 1.75 on a historical basis, at the end of any and each quarter during the term of the loan following the commercial operation date of Sarnia facility. The agreement also contains customary events of default (subject, in certain instances, to specified grace periods) including, but not limited to, the failure to make payments of interest or premium, if any, on, or principal under the loan, the failure to comply with certain covenants and agreements specified in the agreement, the occurrence of a material adverse effect, defaults in respect of certain other indebtedness and agreements, and certain events of insolvency. If an event of default occurs, the principal, premium, if any, interest and any other monetary obligations on all the then outstanding amounts under the loan may become due and payable immediately.

As of September 30, 2015, the balance of deferred financing cost associated with this transaction was \$1,065.861 and is being amortized over the estimated term of the loan.

vii) Tennenbaum Capital Partners, LLC ("TCP")

On December 17, 2014, the Company entered into a Loan and Security Agreement (the "TCP Agreement") with funds managed by TCP. The proceeds received were used to repay in full, the HTGC Loan Agreement that was entered into on June 27, 2013, and for general corporate purposes.

Pursuant to the TCP Agreement, TCP agreed to make a senior secured term loan of \$25 million (the "Facility"), which was funded on December 18, 2014, net of a 2.0% commitment fee. The term loan is repayable over 36 months after closing at a floating interest rate per annum that is the greater of 9.50% or the 3 month LIBOR rate plus 9.27%, and is subject to an end of term charge of 8.25% based on the \$25 million loaned (the "End of Term Charge") payable on the date on which the term loan is paid or becomes due and payable in full. There will be an initial interest-only period until September 30, 2015, which may be extended for a first additional period of three months and a second additional period of six months, subject to certain conditions. At its option, the Company may prepay some or all of the loan balance, subject to a prepayment fee equal to 3% of the amount prepaid during the term of the TCP Agreement (and a pro rata portion of the End of Term Charge if the prepayment is less than the full amount of the Facility).

The loan obligations are secured by a security interest on substantially all of the Company's assets (subject to certain exceptions), including its intellectual property, but excluding certain identified licenses from third parties and its equity interest in its subsidiary, BioAmber Sarnia, subject to the conditions specified in the On February 15, 2012, BioAmber Inc., Sinoven and NatureWorks LLC ("NW") formed AmberWorks LLC, TCP Agreement. The security

interest does not apply to any assets owned by BioAmber Sarnia, the entity that will own the Company's Sarnia facility.

The TCP Agreement contains certain representations and warranties, affirmative covenants, negative covenants and conditions that are customarily required for similar financings. The TCP Agreement also contains customary events of default (subject, in certain instances, to specified grace periods) including, but not limited to, the failure to make payments of interest or premium, if any, on, or principal under the Facility, the failure to comply with certain covenants and agreements specified in the Agreement, the occurrence of a material adverse change, defaults in respect of certain other indebtedness, and certain events of insolvency. In addition, the expiration, termination or unavailability of the Company's license agreements with Cargill, Inc. are deemed to be a default under the TCP Agreement. The Company is required to maintain at least \$12.5 million in unrestricted cash through the period ending March 31, 2016. After that period, (i) the Company must maintain the lesser of \$12.5 million and the amount of the outstanding principal on the loan or (ii) BioAmber Sarnia's trailing 6 month free cash flow shall be at least 85% of certain projections agreed to with the Lender. The Company will require its subsidiary BioAmber Sarnia to make certain cash distributions to its shareholders on a quarterly basis beginning January 1, 2016, within the terms of the BioAmber Sarnia Joint Venture Agreement unless prohibited by applicable law or the BioAmber Sarnia financing agreements, such that amounts of cash will not accumulate in BioAmber Sarnia. If any event of default occurs, the principal, premium, if any, interest and any other monetary obligations on all the then outstanding amounts under the Facility may become due and payable immediately. These covenants were met as of September 30, 2015.

Edgar Filing: BioAmber Inc. - Form 10-Q

On July 29, 2015, the Company signed an amendment to the TCP loan agreement (the “TCP Amendment”) to increase the permitted investment in BioAmber Sarnia from \$10 million to \$25 million after July 29, 2015. In exchange, the restricted cash balance requirement increased from \$12.5 million to \$15 million from July 29, 2015 to December 31, 2015. There is the possibility for the restricted cash balance to decrease to \$12.5 million prior to December 31, 2015, if the Company’s revenues exceeds a minimum threshold or if certain conditions are met. A fee of \$0.5 million is payable under the “TCP Amendment”, from which \$250,000 was paid during the three months ended September 30, 2015. The remaining \$250,000 is due at the earliest of (i) on March 31, 2016 or (ii) completion of certain capital raising activities.

As of September 30, 2015, the balance of deferred financing cost associated with this transaction was \$364,009 and is being amortized over the estimated term of the loan.

The balance of the outstanding long-term debt is as follows:

8. Deferred Grants

As of September 30, 2015, the Company has the following deferred grants:

a) Sustainable Development Technology Canada (“SDTC”)

Grant from Sustainable Development Technology Canada to BioAmber Sarnia in the amount of CAD\$14,500,000, or \$10,821,500 when converted into U.S. dollars as of September 30, 2015, with progressive disbursements according to the terms of the agreement and milestones as follows:

I. Detailed Engineering Package, Construction and Procurement. The Company fulfilled this Milestone in October 2012.

II a) Re-engineering of the Production Process and Plant Design. The Company fulfilled this Milestone in 2014.

II b). Engineering Site Preparation and General Contractor Selection. The Company fulfilled this Milestone in 2014.

III. Engineering, Procurement of Equipment and Construction of the Plan. The Company fulfilled this Milestone in June 30, 2015

IV. Commissioning, Start-up and Optimization of the manufacturing facility, expected to be prior to 2016.

The grant is non-reimbursable by BioAmber Sarnia except upon the occurrence of certain events of default defined in the agreement.

An advance on Milestone I of CAD\$1,982,726, or \$1,479,708 when converted into U.S. dollars as of September 30, 2015, was received in December 2011 and was originally recorded as deferred grant. During October 2012, Milestone I was fulfilled and as a result BioAmber Sarnia received an additional amount of CAD\$3,015,000, or \$2,250,256 when converted into U.S. dollars as of September 30, 2015, as an advance on Milestone II a). Accordingly, the advance on Milestone I was reclassified from deferred grants reducing the cost of construction in-progress whereas the advance in Milestone II a) was originally recorded as a deferred grant. During December 2014, following the amendment of the milestones as described above, BioAmber Sarnia received an amount of CAD\$896,300, or \$668,909, when converted into U.S. dollars as of September 30, 2015 for Milestone II b) and advance on Milestone III of CAD\$2,398,359, or \$1,790,142 when converted into U.S. dollars as of September 30, 2015. The advance on Milestone II a) was reclassified from deferred grants reducing the cost of construction in-progress, and the amount on Milestone II b) was directly applied against construction in-progress. On May 26, 2015, BioAmber Sarnia completed the milestone III and received the advance on Milestone IV of CAD\$ 4,769,354, or \$3,559,368 when converted into U.S. dollars as of September 30, 2015. The Milestone III was reclassified from deferred grants reducing the cost of construction in-progress and the advance on Milestone IV was recorded as a deferred grant as of September 30, 2015. The amounts received above are net of a holdback of CAD\$1,437,715 or \$1,072,967 when converted into U.S. dollars as of September 30, 2015. The holdback is expected to be received at the completion of the Milestone IV.

b) SCA

The loan received from SCA is to be used primarily for maintenance and operation of the Company's facility, staff salaries and commercialization costs. As the loan bears a below market interest rate, it has been recorded at a discount and a portion of the proceeds has been recorded as a deferred grant. The expenditures for which the loan was received have not yet been incurred as of September 30, 2015, but are expected to be incurred during the next year. Accordingly, the grant portion of the loan in the amount of

Edgar Filing: BioAmber Inc. - Form 10-Q

\$179,577 when converted into U.S. dollars as of September 30, 2015, has been deferred and will be reclassified as a reduction of such expenditures as they are incurred in the future.

The balance of the outstanding current liability deferred grant is as follows:

	September 30, 2015 \$	December 31, 2014 \$
SDTC	3,559,368	2,067,385
SCA	179,577	207,417
Total	3,738,945	2,274,802

9. Financial charges (income), net

10. Commitments and contingencies

Leases

The Company leases its premises and other assets under various operating leases. Future lease payments aggregated \$1,655,050 as of December 31, 2014 and include the following future amounts payable on a twelve month basis:

	December 31, 2014 \$
2015	383,246
2016	220,906

2017	173,468
2018	177,436
2019	200,834
Thereafter	499,160

Royalties

The Company has entered into exclusive license agreements that provide for the payment of royalties in the form of up-front payments, minimum annual royalties, and milestone payments. The Company has the right to convert such exclusive agreements into non-exclusive agreements without the right to sublicense and without the obligation to pay minimum royalties. As of December 31, 2014, the Company has commitments related to royalty payments as follows:

	December 31, 2014
	\$
2015	562,667
2016	523,500
2017	652,667
2018	736,000
2019	736,000
Thereafter	6,407,167

The Company has such contractual agreements with the following partners: Cargill Inc., Celexion LLC, University of Guelph, the University of North Dakota and the National Research Council of Canada in partnership with the INRS-IAF University.

The royalties which the Company owes are in return for the use or development of proprietary tools, patents and know-how and the actual expenses incurred amounted to a total of \$25,001 and \$ 144,032 for the three months ended September 30, 2015 and 2014, respectively, and \$206,433 and \$461,339 for the nine months ended September 30, 2015 and 2014, and are included in research and development expenses in the consolidated statements of operations.

Purchase Obligations

BioAmber Sarnia has entered into a steam supply agreement with LANXESS Inc., under which, BioAmber Sarnia has agreed to pay a Monthly Take or Pay fee during the term of the contract, which will vary upon the natural gas price index. An amount of CAD\$750,000 or \$559,725 when converted into U.S. dollars as of September 30, 2015 is held in an escrow account as a guarantee for the supply agreement. BioAmber Sarnia has also entered into a service agreement with LANXESS Inc. under which minimum yearly payments are required.

As of December 31, 2014, BioAmber Sarnia has commitments related to purchase obligations and service payments as follows:

	December 31, 2014
	\$
2015	1,276,214
2016	2,323,733
2017	2,541,857
2018	2,541,857
2019	2,541,857
Thereafter	8,682,382

Litigation

As of September 30, 2015 there were no outstanding claims or litigation.

11. Redeemable non-controlling interest

On January 24, 2014, the Company signed an amended and restated joint venture agreement (the “Amended JV Agreement”) with Mitsui & Co. Ltd. related to the Sarnia joint venture. Under the Amended JV Agreement, Mitsui invested an additional \$8.1 million (CAD\$9 million) on January 29, 2014 in BioAmber Sarnia to maintain its 30% ownership. The Amended JV Agreement also revised each party’s rights and obligations under the buy/sell provisions of the Agreement, including a put option exercisable at Mitsui’s sole discretion that requires the Company to purchase Mitsui’s equity for a purchase price of 50% of Mitsui’s equity in the joint venture. This option remains in effect until December 31, 2018. As a result of the Amended JV Agreement, the Company’s previously recorded non-controlling interest in BioAmber Sarnia joint venture of \$2.1 million as at December 31, 2014 in shareholders’ equity on the consolidated balance sheet, was re-classified to redeemable non-controlling interest in temporary equity on the Company’s consolidated balance sheets, at the greater of the carrying value or the redemption value, in accordance with FASB ASC 480-10-S99.

On August 15, 2014, Mitsui invested \$16.5 million (CAD\$18 million) of equity in BioAmber Sarnia maintaining its 30% ownership. On February 6, 2015, Mitsui invested an additional \$2.0 million (CAD\$2.6 million) of equity in BioAmber Sarnia. Mitsui invested additional amounts of \$1.1 million (CAD \$1.3 million) on April 30, 2015 and May 14, 2015. During the three months ended September 30, 2015, Mitsui invested an additional \$4.6 million (CAD\$ 6.0 million). As of September 30, 2015, the estimated redemption value of the redeemable non-controlling interest was

\$18.2 million.

The following table reflects the activity of the redeemable non-controlling interest:

Balance, January 1, 2014	\$-
Reclassification of non-controlling interest to redeemable non-controlling interest	2,125,925
Mitsui's additional capital contribution	24,608,700
Net loss attributable to non-controlling interest (NCI)	(874,890)
Accumulated other comprehensive loss attributable to NCI	(1,669,323)
Balance, December 31, 2014	24,190,412
Mitsui's additional capital contribution	8,896,696
Net loss attributable to NCI	(2,890,905)
Accumulated other comprehensive loss attributable to NCI	(3,713,485)
Balance at September 30, 2015	26,482,718

19

12. Share capital

Secondary Public Offering

On May 6, 2015, the Company completed a public offering and issued 3,900,000 shares of common stock, at an offering price of \$9.00 per share. The total net proceeds from the public offering, after deducting underwriting discounts and offering expenses was approximately \$32.8 million.

Warrants financial liability

June 2009 & April 2011 Warrants

On June 22, 2009, the Company issued 208,950 warrants at an exercise price of \$5.74 per share in connection with a financing transaction, with an estimated fair value of \$1,045,307. On April 11, 2011, the Company issued 94,745 warrants at an exercise price of \$10.55 per share with a fair value of \$810,448 in connection with a second financing transaction. Those warrants contain anti-dilution protection in the event securities are sold at a lower price than the warrant's original exercise price. The anti-dilution protection contains a price adjustment and an adjustment to the number of warrants. The fair value of the warrants are classified as a financial liability as a result of their characteristics, in accordance with FASB ASC 815. Refer to Note 18 for the non-cash reclassification impact from equity to liability during the third quarter 2015. As of September 30, 2015, the fair value of those warrants was determined to be \$2.52 and \$2.56 per warrant, for the June 2009 Warrants and the April 2011 Warrants, respectively, using the Monte Carlo method.

2013 Warrants

The warrants issued upon the completion of the IPO, are exercisable during the period beginning on August 8, 2013 and ending on May 9, 2017. The warrants contain full ratchet, anti-dilution protection upon the issuance of any common stock, securities convertible into common stock, or certain other issuances at a price below the then-existing exercise price of the warrant, with certain exceptions. The exercise price of \$11.00 per whole share of common stock is subject to appropriate adjustment in the event of certain stock dividends and distributions, stock splits, stock issuances or other similar events affecting the company's common stock. At issuance, the fair value of the warrants was classified as a financial liability as a result of their characteristics, in accordance with FASB ASC 815. Following the May 2015 public offering, the exercise price per share of those warrants were adjusted to \$9.00 pursuant the terms of such warrants.

The fair value of the warrants was determined to be \$2.02 per warrant using the Black-Scholes option pricing model using the following assumptions:

Risk free interest rate 0.54 %

Edgar Filing: BioAmber Inc. - Form 10-Q

Expected life	4 years
Volatility	56.06 %
Expected dividend yield	0 %
Forfeiture rate	0 %

Accordingly, a liability of \$16.1 million was recorded at the unit issuance date. On September 30, 2015, the closing value of the warrant on the New York Stock Exchange, a level 1 fair value measure, was \$1.78 per warrant, as compared to \$1.63 per warrant on December 31, 2014. As a result, the liability was revalued at the balance sheet date resulting in a financial (income) charge of \$(1,536,000) and \$1,200,000 for the three and nine months ended September 30, 2015, respectively.

Following the May 2015 public offering, the exercise price per share of April 2011 warrants expiring on April 2021 were adjusted to an exercise price of \$10.11 per share and an additional 4,124 warrants were issued.

As of September 30, 2015, the total fair value of those warrants were \$920,079, and was classified as warrants financial liability. The change in fair value from the liability reevaluation resulted in a non-cash financial income of \$851,060 and \$479,324, for the three and nine months ended September 30, 2015, respectively.

Stock option plan

Stock-based compensation expense was allocated as follows:

	Three Months ended		Nine Months ended	
	September 30,		September 30,	
	2015	2014	2015	2014
	\$	\$	\$	\$
General and administrative	316,141	572,110	2,000,036	2,032,347

Options outstanding, end of period	5,004,366	7.65	4,118,234	7.14	5,004,366	7.65	4,118,234	7.14	
Options exercisable, end of period	2,855,442	6.99	1,663,826	6.54	2,855,442	6.99	1,663,826	6.54	
Per share weighted average grant-date fair value of options granted		\$ 5.23		\$ 6.17		6.30		\$ 6.07	

As of September 30, 2015, the weighted-average remaining contractual life of options outstanding and options exercisable were 7.35 years and 6.38 years, respectively.

The fair value of options granted during the three and nine months ended September 30, 2015 and 2014, respectively, was determined using the Black-Scholes option pricing model and the following weighted-average assumptions:

	Three Months ended September 30, 2015		September 30, 2014		Nine Months ended September 30, 2015		September 30, 2014	
Risk-free interest rate	1.78 %	1.97 %	1.78 %	1.93 %	1.78 %	1.93 %	1.78 %	1.93 %
Expected life	6.25 years	6.25 years	6.25 years	6.25 years	6.25 years	6.25 years	6.25 years	6.25 years
Volatility	84.31 %	57.01 %	84.41 %	57.85 %	84.41 %	57.85 %	84.41 %	57.85 %
Expected dividend yield	0 %	0 %	0 %	0 %	0 %	0 %	0 %	0 %

Warrants

During the nine months ended September 30, 2015, 2,625 warrants were exercised at an exercise price of \$1.07 per share, and 105,000 warrants were exercised at an exercise price of \$1.43. During the nine months ended September 30, 2014, 3,500 warrants were exercised at an exercise price of \$1.07 per share and an additional 3,430 warrants were exercised at an exercise price of \$1.43 per share.

As at September 30, 2015, the Company had the following warrants and warrants financial liability outstanding to acquire common shares:

Number	Exercise price	Expiration date
331,846	\$ 1.07	July 2016 - April 2019
505,890	\$ 1.43	February 2019
208,950	\$ 5.74	June 2019
98,869	\$ 10.11	April 2021
4,000,000	\$ 9.00	May 2017
5,145,555		

13. Income taxes

Deferred income tax assets and liabilities are recognized for the future tax consequences attributable to differences between financial reporting and tax bases of assets and liabilities and available net operating loss carry forwards. A valuation allowance is established to reduce tax assets if it is more likely than not that all or some portions of such tax assets will not be realized.

The Company's valuation allowance was recorded on the deferred tax assets to provide for a reasonable provision, which in the Company's estimation is more likely than not that all or some portions of such tax assets will not be realized. In determining the adequacy of the valuation allowance, the Company applied the authoritative guidance and considered such factors as (i) which subsidiaries were producing income and which subsidiaries were producing losses and (ii) temporary differences occurring from depreciation and amortization which the Company expects to increase the taxable income over future periods.

The Company follows the guidance concerning accounting for uncertainty in income taxes, which clarifies the accounting and disclosure for uncertainty in tax positions. The guidance requires that the Company determine whether it is more likely than not that a tax position will not be sustained upon examination by the appropriate taxing authority. If a tax position does not meet the more likely than not recognition criterion, the guidance requires that the tax position be measured at the largest amount of benefit greater than 50 percent not likely of being sustained upon ultimate settlement.

Based on the Company's evaluation at September 30, 2015, management has concluded that there has been a change to the recorded uncertain tax positions requiring adjustments to deferred tax assets and related valuation allowance, but did not require any recognition in the condensed consolidated financial statements. Open tax years include the tax years December 31, 2010 through December 31, 2014.

The Company from time to time has been assessed interest or penalties by major tax jurisdictions; however such assessments historically have been minimal and immaterial to our financial results. If the Company receives an

assessment for interest and/or penalties, it would be classified in the condensed consolidated financial statements as an income tax expense.

For the three month periods ended September 30, 2015 and September 30, 2014, the Company's effective income tax rates was (0.34)% and (0.28)% respectively, compared to an applicable U.S. combined federal and state income tax rate of 40.54%. The difference between the effective tax rate and U.S. statutory tax rate as of September 30, 2015 is primarily due the existence of valuation allowances for deferred tax assets including net operating losses and stock options. For the three months ended September 30, 2015, the Company recorded valuation allowances on deferred tax assets relating to current year losses and temporary differences.

The Company accounts for interest and penalties related to uncertain tax positions, if any, as part of tax expense unless it is associated with intercompany profits. The Company recognizes interest and penalties related to uncertain tax positions associated with intercompany profits as prepaid tax expense. The asset is amortized over the life of the assets involved in the intercompany sale. For each of the periods presented herein, there were no material changes to the amounts accrued or charged to expense for tax-related interest and penalties.

The Company is subject to possible income tax examinations for its U.S. federal and state income tax returns filed for the tax years 2010 to present. International tax statutes may vary widely regarding the tax years subject to examination, but generally range from 2010 to the present.

14. Financial instruments

Currency risk

The Company is exposed to foreign currency risk as result of foreign-denominated transactions and balances. Primarily this is the Euro, the Pound Sterling and the Canadian Dollar. The Company does not hold any financial instruments that mitigate this risk.

Credit risk

The Company's exposure to credit risk as of September 30, 2015, is equal to the carrying amount of its financial assets.

Interest Rate Risk

We had cash balances totaling \$34.2 million at September 30, 2015. These amounts were deposited in current and interest-bearing accounts and were held for working capital purposes. Our primary objective is to preserve our capital for the purpose of funding our operations. We do not enter into investments for trading or speculative purposes. Our three-year term loan with TCP bears interest at 9.50% or the 3 month LIBOR rate plus 9.27%. If the LIBOR rate were to increase, the interest rate for the remaining term of the loan would increase.

15. Fair value of financial assets and liabilities

For cash, accounts receivable and accounts payable and accrued liabilities, the carrying amount approximates fair value because of the short-term maturity of those instruments.

The carrying amount of long-term debt approximates fair value as at September 30, 2015 and December 31, 2014. The fair value of long-term debt received from government organizations was determined using Level 3 information as the Company produces an estimate of fair value based on internally developed valuation techniques which are based on a discounted cash flow methodology and incorporates all relevant observable market inputs. The interest free loans were discounted using an interest rate between 12% and 15%, a level 3 fair value measurement, representing the interest rate a loan with similar terms and conditions would carry.

The fair value of the warrants which were issued upon the completion of the IPO on May 10, 2013 was calculated using the Black-Scholes option pricing model using various assumptions described in Note 13, which was a level 3 fair value measurement. As these warrants starting trading freely on the New York Stock Exchange on June 10, 2013, the closing value of these warrants, which is a level 1 measurement was used to calculate the fair value from June 10, 2013 onwards.

The fair value of the warrants issued in connection with the June 2009 and April 2011 financing transaction was calculated using the Monte Carlo model, which is a level 3 measurement.

16. Related party transactions

Transactions with related parties not disclosed elsewhere were as follows:

	Three Months ended September 30, 2014	Nine Months ended September 30, 2015	2014
	\$	\$	\$
Product sales to a shareholder	—	26,825	90,511

The related party transactions noted above were undertaken in the normal course of operations and were measured at the exchange amount, which is the amount of consideration established and agreed to by the parties.

17. Business segments

The Company allocates, for the purpose of geographic segment reporting, its revenue based on the location of the seller. For the purpose of geographic segment reporting, the non-current assets of the Company are allocated as follows:

	Europe		North America		Consolidated	
	September 30, 2015	December 31, 2014	September 30, 2015	December 31, 2014	September 30, 2015	December 31, 2014

Goodwill	625,364	625,364	—	—	625,364	625,364

18. Correction of an error

On June 22, 2009, the Company issued warrants to purchase 208,950 shares of common stock, par value \$ 0.01 per share, of the Company (“Common Stock”) at an exercise price of \$5.74 per share in connection with a financing transaction (“June 2009 Warrants”), with an estimated fair value of \$1,045,307. On April 11, 2011, the Company issued warrants to purchase 94,745 shares of Common Stock at an exercise price of \$10.55 per share in connection with a second financing transaction (“April 2011 Warrants”). On the date of issuance, the April 2011 Warrants had a fair value of \$810,448. The fair value of the June 2009 and April 2011 Warrants were determined using the Monte Carlo model and were recorded and classified as shareholders’ equity at the time of issuance. Those warrants contain anti-dilution protection in the event securities are sold at a lower price than the warrant’s original exercise price. The anti-dilution protection contains a price adjustment and an adjustment to the number of shares issuable upon exercise of the warrant. The adjustments are not based on inputs to models used to value instruments for a fixed amount of shares with a fixed strike price, and therefore those warrants don’t qualify as being indexed to the entity’s own stock. Accordingly, it was determined that the June 2009 and April 2011 Warrants should have been recorded in accordance with FASB ASC 815, as derivative instruments and their respective liabilities at fair value and valued at each subsequent balance sheet date. As a result, in the third quarter 2015, those warrants were reclassified from shareholders’ equity to liability, with changes in fair value recorded as non-cash financial charges (income) in the Consolidated Statements of Operations and the impact from previous years recorded retrospectively to retained earnings. The values of these warrants at each period were calculated using the Monte Carlo model. This reclassification was to correct the misapplication of an accounting principle from previous periods.

The following reflects the reclassification on selected quarterly financial information and prior periods presented:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information included in this management's discussion and analysis of financial condition and results of operations should be read in conjunction with our condensed consolidated financial statements and the notes included in this Quarterly Report on Form 10-Q.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements reflect the views of our management regarding current expectations and projections about future events and are based on currently available information. Actual results could differ materially from those contained in these forward-looking statements for a variety of reasons, including, but not limited to, those listed in the section entitled "Risk Factors" in this report and in our Annual Report Form 10-K for the fiscal year ended December 31, 2014 as well as those discussed elsewhere in this report. Other unknown or unpredictable factors also could have a material adverse effect on our business, financial condition and results of operations. Accordingly, readers should not place undue reliance on these forward-looking statements. The use of words such as "anticipates," "estimates," "expects," "intends," "plans" and "believes," among others, generally identify forward-looking statements; however, these words are not the exclusive means of identifying such statements. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances are forward-looking statements. These forward-looking statements are inherently subject to uncertainties, risks and changes in circumstances that are difficult to predict. We are not under any obligation to, and do not intend to, publicly update or review any of these forward-looking statements, whether as a result of new information, future events or otherwise, even if experience or future events make it clear that any expected results expressed or implied by those forward-looking statements will not be realized. Please carefully review and consider the various disclosures made in this report and in our other reports filed with the Securities and Exchange Commission that attempt to advise interested parties of the risks and factors that may affect our business, prospects and results of operations.

Overview

We are an industrial biotechnology company producing sustainable chemicals. Our proprietary technology platform combines industrial biotechnology and chemical catalysis to convert renewable feedstocks into sustainable chemicals that are cost-competitive replacements for petroleum-derived chemicals, which are used in a wide variety of everyday products including plastics, resins, food additives and personal care products. We currently sell our first product, bio-succinic acid, to customers in a variety of chemical markets. We intend to produce bio-succinic acid that is cost-competitive with succinic acid produced from petroleum at our facility in Sarnia, Ontario, pursuant to a joint venture agreement with Mitsui and Co. Ltd., or Mitsui.

We believe we can produce bio-succinic acid that is cost-competitive with succinic acid produced from oil priced as low as \$30 per barrel, based on management's estimates of production costs at our facility in Sarnia, Ontario and an assumed corn price of \$4.00 per bushel. While we can provide no assurance that we will be able to secure corn at \$4.00 per bushel given the fluctuations in corn prices, we believe this assumption is reasonable given the historic price of corn and management's expectations as to their ability to manage the cost of corn and other inputs for our facility in Sarnia, Ontario. Over the past five years, the price of corn ranged from a low of \$2.82 per bushel to a high of \$8.44 per bushel. As of September 30, 2015, the spot price was \$3.68 per bushel and the six-month forward price was \$3.99 per bushel. We estimate that a \$1.00 increase or decrease in the per bushel price of corn would result in just a \$0.024 per pound change in the variable cost of our bio-succinic acid. We expect the productivity of our yeast and on-going process improvements to further reduce our production costs. Our ability to compete on cost is not dependent on

government subsidies or tariffs. We began commissioning and start-up in March 2015, achieved mechanical completion in June 2015 and started commercial scale production in October 2015. We also intend to build and operate additional facilities over the next three to five years.

We manufactured our bio-succinic acid at a large-scale demonstration facility in Pomacle, France for five years. We shipped commercial quantities to customers, such as shipments of one ton super sacks and container loads. We and our customers used the products produced at the facility as part of our efforts to validate and optimize our process and to continue to refine and improve our bio-succinic acid to meet our customers' specifications. As we scale-up our manufacturing capacity and prepare to manufacture and commercialize, we expect the majority of our revenue will initially come from sales of bio-succinic acid. We also intend to leverage our proprietary technology platform and expertise in the production of bio-succinic acid to target additional high value-added products, such as bio-based 1,4-butanediol (BDO), tetrahydrofuran (THF), bioplastics, de-icing solutions and plasticizers. In addition, we are also working to expand our product portfolio to additional building block chemicals, including adipic acid and caprolactam.

On May 9, 2013, we raised net proceeds of \$71.7 million from the initial public offering of our equity securities. In addition, on June 27, 2013, we received net proceeds of \$24.2 million from a three-year term loan with Hercules Technology Growth Capital,

or HTGC. On July 21, 2014, we completed the initial closing of a secondary public offering and issued 2,800,000 shares of common stock, at a public offering price of \$12.00 per share, with an option to the underwriters to purchase an additional 420,000 shares of common stock at the public offering price, less underwriting discounts and commissions. This option to purchase additional shares was subsequently fully exercised, and on July 24, 2014, we completed the sale of these additional shares, bringing the gross aggregate proceeds from the secondary public offering to approximately \$38.6 million. We received approximately \$36.0 million in net proceeds from the secondary public offering, after deducting underwriting discounts and commissions and expenses payable by us.

On May 6, 2015, we completed the closing of a secondary public offering and issued 3,900,000 shares of common stock, at an offering price to the public of \$9.00 per share. The gross aggregate proceeds from this secondary public offering was approximately \$35.1 million, with net proceeds of approximately \$32.8 million, after deducting underwriting discounts and commissions and expenses payable by us. The completion of this public offering at a public offering price of \$9.00 per share triggered an adjustment to the exercise price of the outstanding warrants to purchase common stock issued upon the completion of the IPO. The exercise price of such warrants was reduced from \$11.00 per whole share of common stock to \$9.00 per whole share of common stock, pursuant to the terms of such warrants. The exercise price of the April 2011 Warrants were also reduced following the completion of this public offering, from \$10.35 per share to \$10.11 per share, and an additional 4,124 warrants at an exercise price of \$10.11 per share were issued.

As of September 30, 2015, we had raised an aggregate of \$263.2 million from public offerings of our equity securities, private placements of our equity securities, and the sale of shares issued by a subsidiary and convertible notes.

Manufacturing Expansion Plan

In order to support our growth strategy, we expanded our manufacturing capacity. We entered into a joint venture with Mitsui to finance, build and operate a manufacturing facility in Sarnia, Ontario through our BioAmber Sarnia subsidiary in which we own a 70% equity interest and Mitsui owns the remaining 30%. The joint venture agreement, which was entered into on November 2, 2011 and subsequently amended on January 24, 2014, also establishes our non-binding intent to build and operate a BDO and/or an additional succinic acid production facility with Mitsui, which we expect to occur in 2018. As part of the amendment, Mitsui increased its maximum capital commitment to the project from \$23.7 million to \$45.6 million in order to maintain a 30% equity stake in the joint venture. In exchange, Mitsui obtained the right to sell us back its shares in the Sarnia joint venture under certain specific circumstances: (i) Mitsui has the right to sell its shares and we have the obligation to purchase those shares at 100% of the investment value if the cost of the Sarnia facility is greater than \$140 million and we do not provide the additional funds to complete the facility, with a corresponding increase in our pro rata share of the joint venture; (ii) in the event of an occurrence of a dissolution event of the joint venture until December 31, 2020, Mitsui has the right to sell its shares and we have the obligation to purchase those shares at 100% of the investment value, with the dissolution event consisting of the Sarnia plant not being operational by January 31, 2016, cumulative losses accrued from 2016 through 2020 exceeding 75% of paid-in capital, no after-tax profit earned in any three consecutive years from 2016 onwards, and any act of insolvency, bankruptcy, or similar event, and (iii) until December 31, 2018, Mitsui in its sole discretion may sell its shares and we must purchase those shares at a 50% discount to their investment value.

For future facilities, we currently expect to fund the construction of these facilities using internal cash flows, minority interest partners, debt financing and we may also require fundraising through the capital markets.

We also expect to grow our revenue base by developing new value-added applications and derivative products. In January 2014, we entered into a take-or-pay supply contract with Vinmar, to supply BDO and THF from a planned facility with an annual capacity of 100,000 metric tons, or MT. Under the terms of the 15-year master off-take agreement, Vinmar has committed to purchase 100% of the BDO and THF produced in a 100,000 MT per year capacity plant that we plan to build in North America and commission in 2018. In addition to a guarantee of the purchase of the off-take from the planned facility, Vinmar plans to take an equity stake of at least 10% in the facility

and assist in seeking other financing for the planned facility. BDO and THF are building block chemicals used in a wide range of products, including engineering plastics for the automotive industry, polyurethanes, biodegradable plastics, and spandex. While this agreement is binding, our inability to finance and construct the plant would relieve Vinmar of its obligation to purchase BDO and THF under the terms of the take-or-pay agreement. We believe the current size of the global BDO and THF market is approximately \$6.5 billion. We believe our bio-based BDO is cost competitive with petroleum-derived BDO. To date, we have validated the high quality of our BDO with over 20 purchasers of petroleum-derived BDO.

We signed a second take-or-pay agreement in July 2014 with Vinmar to supply 10,000 MT of bio-succinic acid per year for 15 years from the Sarnia plant. The take-or-pay agreement also includes an expansion to the BDO facility previously announced of an additional 70,000 MT per year of bio-succinic acid, with Vinmar off-taking 67% of the bio-succinic acid produced for 15 years. Vinmar also commits to off-take 75% of the production from a new, third bio-succinic acid plant with 200,000 MT capacity that BioAmber plans to commission in 2020.

Sarnia Facility

Our first facility in partnership with Mitsui is located in a bio-industrial park in Sarnia, Ontario. We began commissioning and start-up in March 2015, achieved mechanical completion in June 2015 and started commercial scale production in October 2015. The facility has an expected capacity of 30,000 MT of bio-succinic acid and could subsequently be expanded to produce another 20,000 MT of bio-succinic acid. The total completion cost of this initial phase of our facility in Sarnia was revised to approximately \$141.5 million, slightly above the initial estimated cost of \$125.0 million +/- 10%. The facility was funded through capital contributions from us and from Mitsui, and from CAD\$72.0 million (\$53.7 million) in interest free and low-interest loans and governmental grants. As of September 30, 2015, we have received loans and grants proceeds from Canadian government agencies of CAD\$70.6 million.

Additional Facilities

Our agreement with Mitsui contemplates the potential construction and operation of an additional manufacturing facility. We have entered into a take-or-pay contract with Vinmar to purchase 100% of a planned 100,000 MT per year BDO/THF facility in North America, to be expanded by an additional 70,000 MT per year of succinic acid, with Vinmar off-taking 67% of the bio-succinic acid produced for 15 years. In addition, Vinmar plans to invest at least 10% in the equity of the facility and will help us to secure other funding to construct the planned facility. We anticipate that Vinmar and other potential parties will be equity partners in this facility, but we may also seek low interest loans and government grants to fund the facility, which would substantially reduce our equity funding requirement. Based on current estimates and assumptions, we expect our second manufacturing facility to have a projected initial BDO/THF capacity of 100,000 MT and bio-succinic acid capacity of 70,000 MT with construction costs of approximately \$500.0 million. This facility is expected to be commissioned and beginning production in 2018.

Our second take-or-pay contract with Vinmar also commits to off-take 75% of the production from a third bio-succinic acid plant with 200,000 MT per year capacity that we plan to commission in 2020. As part of the BDO take-or-pay agreement, Vinmar has an option to secure 100% of the output from a fourth manufacturing facility that would produce 100,000 metric tons of BDO per year and would be commissioned in 2022 or 2023.

Our business strategy is to leverage the value of our technology by building and operating production facilities around the world. However, depending on our access to capital and third-party demand for our technology, we may also enter into technology licenses on an opportunistic basis.

Performance Drivers

We expect that the fundamental drivers of our results of operations going forward will be the following:

Commercialization of our products. We commenced recognizing revenue from sales of our existing bio-succinic acid product in 2011. Our ability to grow revenue from this product will be dependent on expanding the addressable market for succinic acid using our low-cost, bio-based alternative. We also expect to grow our revenue base by developing new value-added applications and derivative products. The supply agreement we signed with PTTMCC Biochem Company Limited, or PTTMCC Biochem, on April 18, 2014 is an example of market development in new applications (biodegradable plastics), and we have signed additional supply agreements in other new applications such as synthetic leather and other polyurethane applications, including coatings (polyurethane dispersions) made from bio-based succinic acid and recycled PET. We also plan to develop and commercialize derivatives of succinic acid, such as BDO, and to target large and established chemical markets such as adipic acid, where succinic acid can partially substitute the incumbent chemical.

In April 2014, we entered into a three year supply agreement with PTT MCC Biochem, a joint venture between PTT Public Company Limited and Mitsubishi Chemical Corporation that was established to produce and sell polybutylene

succinate, or PBS, a biodegradable plastic made from succinic acid and BDO. PTTMCC has constructed a PBS plant in Thailand that is being commissioning and is expected to be operational in 2015 and consume approximately 14,000 tons of succinic acid per year at full capacity. This supply agreement provides that we will exclusively supply a minimum of 80% of PTTMCC's total bio-succinic needs until the end of 2017, with approximately 50% of the total purchases under take-or-pay terms. We also entered into a second take-or-pay agreement with Vinmar in July 2014, for 10,000 tons per year for 15 years from the Sarnia plant. These are two of many potential customers and applications that we are targeting for the bio-succinic acid produced at our Sarnia facility. These supply agreements reflect our ongoing efforts to expand the succinic acid addressable market into new applications such as PBS.

We have also entered into several agreements and memorandum of understanding, or MOUs, that contemplate, but do not obligate, us to supply approximately 47,000 metric tons of bio-succinic acid until the end of 2017, and, as we continue operation of our facility in Sarnia, Ontario, we are actively seeking to enter into definitive supply agreements and form new relationships with potential customers

Our revenue for future periods will be impacted by our ability to develop new applications and the speed with which we are able to bring our succinic acid derivatives to market. To accelerate this process, we are developing our sales and marketing capability

and entering into distribution and joint development agreements with strategic partners. In January 2014, we entered a take-or-pay supply contract with Vinmar to supply BDO and THF from a planned 100,000 MT facility. Under the terms of the 15-year master off-take agreement, Vinmar has committed to purchase 100% of the BDO and THF produced in a 100,000 MT per year capacity plant that we plan to build in North America and commission in 2018. We entered into a second take-or-pay agreement with Vinmar in July 2014 for an additional 70,000 MT per year of bio-succinic acid, with Vinmar off-taking 67% of the bio-succinic acid produced for 15 years. Our second take-or-pay contract with Vinmar also commits them to off-take 75% of the production from a third bio-succinic acid plant with 200,000 MT per year capacity that we plan to commission in 2020.

We are also engaging in a collaborative process with our customers to test and optimize new applications and derivative products such as BDO in order to ensure that they meet specifications in each of their potential applications. We are continuing to seek to establish supply agreements and distribution agreements with strategic customers as we expand our markets and product offerings. For example, in October 2014, we entered into a five year exclusive supply agreement with Xuchuan Chemicals, a global leader in polyester polyols, to supply bio-based succinic acid from our Sarnia facility to be used in manufacturing cast polyurethane elastomers. Xuchuan is initially launching polyurethane (PU) systems for cast polyurethane elastomers (CPU) made with bio-succinic acid. CPU is used in applications including automotive instruments, caster wheels, industrial and mining equipment, power tools, industrial tires, coating rolls, drive belts, mold makers and hoses. By replacing adipic acid with succinic acid, Xuchuan has produced CPUs that offer better properties: they are more abrasion/scratch resistant and more resistant to solvents. Other applications for our bio-based succinic acid include polyurethane elastomers and dispersions for shoe soles and synthetic leather.

Production capacity. Our ability to further lower our production costs and drive customer adoption of our product is dependent on our manufacturing expansion strategy. In particular, in our facility in Sarnia, Ontario, we expect to benefit from significantly lower operating expenses than those in the large-scale demonstration facility in Pomacle, France due to lower expected raw material, utility and other costs. We also project direct labor costs, electricity costs and other raw material costs in Sarnia, Ontario, to be lower than in Pomacle, France. If we were to adjust the cost of goods sold realized in the large scale demonstration facility we previously operated in Pomacle, France for the lower expected raw material and utility costs, the economies of scale and the engineering design improvements we have incorporated into our facility in Sarnia, Ontario, our gross profit from products sold would increase significantly. As a result, we expect to produce bio-succinic acid that is cost-competitive with succinic acid produced from oil priced as low as \$30 per barrel. We expect to further reduce costs by the transition from our E. coli-based technology used in the Pomacle facility to our yeast-based technology to be used in our Sarnia facility and by implementing on-going process improvements. We intend to capitalize on our first-to-market advantage by rapidly expanding our production capacity and building additional facilities. Our results will be impacted by the speed with which we execute on this strategy and the capital costs and operating expenses of each of these facilities.

Feedstock and other manufacturing input prices. We use sugars that can be derived from wheat, corn and other feedstocks. We intend to locate our facilities near readily available sources of sugars and other inputs, such as steam, electricity and hydrogen, in order to ensure reliable supply of cost-competitive feedstocks and utilities. While our process requires less sugar than most other renewable products and is therefore less vulnerable to sugar price increases relative to other bio-based processes, our margins will be affected by significant fluctuations in these required inputs.

Petroleum prices. We expect sales of our bio-based products to be impacted by the price of petroleum. In the event that petroleum prices increase, we may see increased demand for our products as chemical manufacturers seek lower-cost alternatives to petroleum-derived chemicals. Conversely, a long-term reduction in petroleum prices below \$30 per barrel may result in our products being less competitive with petroleum-derived alternatives. In addition, oil prices may also impact the cost of certain feedstocks we use in our process, which may affect our operating profits.

Recent Developments

Davy license and engineering agreement

On December 11, 2014, we entered into a license agreement with Johnson Matthey Davy Technologies, or Davy. We intend to use the technology licensed from Davy in our planned 100,000 ton per year capacity plant that uses bio-succinic acid as the feedstock to produce 70,000 tons of BDO and 30,000 tons of THF. We also secured the right to license the Davy technology for two additional BDO/THF plants. We also entered into an engineering agreement with Davy in relation with the license agreement, under which, Davy provides a complete basic engineering package for converting bio-succinic acid to bio-BDO and bio-THF, along with certain pieces of equipment and the catalysts needed to operate the plant. Davy will also provide on-site construction and commissioning support, and performance guarantees for the subsequent operation of the plant. As of September 30, 2015, we incurred an amount of \$3.1 million as license fees and an amount of \$3.2 million as engineering fees, recorded under intangible assets and property and equipment respectively, in the consolidated balance sheets.

Termination notice of DuPont license agreement

On April 20, 2015, we elected to terminate our license with DuPont for their BDO catalysts as a result of the decision to pursue the BDO technology licensed from Davy. As a result, the carrying value of the DuPont license of \$1.1 million was written-off.

Public Offering of Common Stock

On May 6, 2015, we completed the closing of a follow-on public offering and issued 3,900,000 shares of common stock, at an offering price to the public of \$9.00 per share. The gross aggregate proceeds from this secondary public offering were approximately \$35.1 million, with net proceeds of approximately \$32.8 million, after deducting underwriting discounts and commissions and expenses payable by us.

The completion of this public offering at a public offering price of \$9.00 per share triggered an adjustment to the exercise price of the outstanding warrants to purchase common stock issued upon the completion of the IPO. The exercise price of such warrants was reduced from \$11.00 per whole share of common stock to \$9.00 per whole share of common stock, pursuant to the terms of such warrants. The exercise price of the April 2011 Warrants were also reduced following the completion of this public offering, from \$10.35 per share to \$10.11 per share, and an additional 4,124 warrants at an exercise price of \$10.11 per share were issued.

Financial Operations Overview

Revenue

Revenue comprises the fair value of the consideration received or receivable for the sale of products and services in the ordinary course of our activities and is presented net of discounts.

We expect revenue to grow as our sales and marketing efforts continue and our facility in Sarnia, Ontario increases its volumes of commercial production. We currently sell products manufactured in Pomacle, France and have started to sell our first product from our Sarnia facility.

Cost of Goods Sold

Cost of goods sold consists of the cost to produce finished goods at the large-scale demonstration facility in Pomacle, France under a tolling arrangement that ended on December 31, 2014. The costs to produce product in this facility was higher than we expect to incur in the future at Sarnia due to the higher raw material costs such as sugar and utilities, the amount of fixed costs relative to the total production capacity available to us, and the inefficiencies created by the need to stop production from time to time to allocate the capacity to other parties. Going forward, from the succinic acid produced in Sarnia, we expect our cost of goods sold as a percent of revenues to decrease as we will transition from a demo plant production to a full scale commercial production and will benefit from efficiencies in utilizing our yeast in the fermentation process at the Sarnia facility.

Operating Expenses

Operating expenses consist of general and administrative expenses, research and development expenses, net, sales and marketing expenses, depreciation of property and equipment, amortization of intangible assets, write-offs of intangible assets and foreign exchange gains and losses.

General and Administrative Expenses

General and administrative expenses consist of personnel costs (salaries, and other personnel-related expenses, including stock-based compensation), recruitment and relocation expenses, accounting and legal fees, business travel expenses, rent and utilities for the administrative offices, web site design, press releases, membership fees, office supplies, corporate insurance programs, administration expenses related to our Sarnia facility, and other miscellaneous expenses.

We expect these expenses to increase in the future as we hire additional management, operational employees and finance and administration staff to respond to a growing revenue base and add infrastructure to support it.

Research and Development Expenses

Research and development expenses consist primarily of fees paid for contract research and internal research costs in connection with the development, expansion and enhancement of our proprietary technology platform. These costs also include personnel costs (salaries and other personnel-related expenses, including stock-based compensation), expenses incurred in our facility located in Plymouth, Minnesota, laboratory supplies, research consultant costs, patent and trademark maintenance costs, royalties, professional

and consulting fees and business travel expenses. It also includes development costs for bringing our Sarnia facility in line for production.

We expect research and development expenses, including our patent maintenance expenses, to increase as we continue to invest in the deployment and implementation of our bio-succinic acid and derivative technologies in a commercial scale manufacturing facility. We expect to continue conducting our research and development in-house by utilizing our 27,000 square foot facility in Plymouth, Minnesota. Certain research and development activities that can be performed more effectively by outside consultants will be performed with their respective expertise as required.

Sales and Marketing Expenses

Sales and marketing expenses consist primarily of personnel costs (salaries, and other personnel-related expenses, including stock-based compensation), marketing services, product development costs, advertising, selling and distributor costs and feasibility study fees.

We expect to increase our sales and marketing efforts as we look to establish additional strategic alliances, grow our commercial customer base and expand our product offerings. We expect to significantly increase our sales and marketing personnel and programs to support the expected expansion of our business from our transition to our commercial operations in our facility in Sarnia, Ontario. This may include increasing the use of distributors and other commercial partners where deemed appropriate.

Depreciation of Property and Equipment and Amortization of Intangible Assets

Depreciation of property and equipment consists primarily of the depreciation of our office furniture, research and development equipment and computer equipment, which is depreciated using the straight-line method over their estimated useful lives. Amortization of intangible assets consists primarily of the amortization of computer software and licenses, which are amortized using the straight-line method over their estimated useful lives. We expect depreciation of property and equipment to increase significantly as our manufacturing facilities are put in to use. As of September 30, 2015, \$19.9 million of grants were applied as a reduction of construction in-progress. This will result in reduced depreciation expense over the useful life of the asset.

Foreign Exchange Loss

We expect to conduct operations throughout the world. Our financial position and results of operations will be affected by economic conditions in countries where we plan to operate and by the changing foreign currency exchange rates. We are exposed to changes in exchange rates in Europe and Canada. The Euro and the Canadian Dollar are our most significant foreign currency exchange risks. A strengthening of the Euro and the Canadian Dollar against the U.S. Dollar may increase our revenues and expenses since they are expressed in U.S. Dollars. As we increase our production from our manufacturing facility in Sarnia, Ontario, we expect our foreign currency risk to continue as a significant portion of our uses of cash will be denominated in Canadian Dollars while our sources of cash will be primarily in U.S. Dollars and in Euros. We will monitor foreign currency exposures and will look to mitigate exposures through normal business operations such as manufacturing and selling in the same currencies where practical or buying required currencies at spot where advantageous. We may use forward contracts or currency swaps to mitigate any remaining exposures.

Amortization of Deferred Financing Costs and Debt Discounts

Amortization of deferred financing costs and debt discounts consists primarily of costs from past financings that are recognized over the life of the funding instrument and will continue to increase in line with the expenses incurred to

obtain future financing. Those costs are deferred and amortized on a straight-line basis, which is approximately the effective interest method, over the term of the related debt. Amortization of deferred financing costs and debt discounts also includes the accretion of the debt discount on the interest free or low-interest loans received from the government agencies if the expenditures for which the loans were received have not yet been incurred.

Financial Charges (Income), Net

Financial charges (income), net, include interest on long-term debt, end of term accretion charge from the TCP loan and the recognition of gains or losses resulting from the mark-to-market adjustment required at the balance sheet date on the warrants issued in connection with our initial public offering, or IPO completed on May 9, 2013.

Following the reclassification of the June 2009 and April 2011 Warrants from equity to derivative liabilities (refer to the Note 18 of the condensed consolidated financial statements of Item 1, for details) in the third quarter of 2015, financial charges (income),

net, also includes the gains or losses resulting from the mark-to-market adjustment from those warrants. Those mark-to-market adjustments are non-cash financial charges (income).

We account for common stock warrants in accordance with applicable accounting guidance provided in ASC 815, Derivatives and Hedging—Contracts in Entity’s Own Equity, as either derivative liabilities or as equity instruments depending on the specific terms of the warrant agreement. Derivative warrant liabilities were valued using the Black-Scholes pricing model at the date of initial issuance and using the closing value as quoted on the New York Stock Exchange at each subsequent balance sheet date. The June 2009 and April 2011 Warrants are valued using the Monte Carlo method.

Income Taxes

We are subject to income taxes in Luxembourg, the United States and Canada. We have incurred significant losses and have not generated taxable income in these jurisdictions, with the exception of Canada. In the future, we expect to become subject to taxation based on the statutory rates in effect in the countries in which we operate and our effective tax rate could fluctuate accordingly. We have incurred net losses since our inception and have not recorded any federal, state or foreign current income tax provisions, with the exception of (i) recognition of unrecognized tax benefits since inception, (ii) a recovery of income taxes in the 258 day period ended September 30, 2009, and (iii) recognition of current income taxes in Canada. We have a full valuation allowance against our net deferred tax assets. Additionally, under the U.S. Internal Revenue Code, our net operating loss carryforwards and tax credits may be limited if a cumulative change in ownership of more than 50% is deemed to have occurred within a three year period. We have not performed a detailed analysis to determine whether an ownership change under Section 382 of the Internal Revenue Code has occurred after each of our previous issuances of shares of common stock and warrants.

Equity Participation in Losses of Equity Method Investments

Equity participation in losses of equity method investments consist primarily of our share of losses incurred by AmberWorks LLC. We recognize our 50% share of losses incurred by AmberWorks LLC, a joint venture formed on February 15, 2012.

Edgar Filing: BioAmber Inc. - Form 10-Q

Comparison of Three months ended September 30, 2015 and Three Months Ended September 30, 2014

The following table shows the amounts of the listed items from our consolidated statements of operations for the periods presented, showing period-over-period changes:

	Three months ended September 30, 2015 (in thousands)	Three months ended September 30, 2014	\$ Increase (decrease)
Revenues			
Revenues	\$352	\$ 469	\$ (117)
Total revenues	352	469	(117)
Cost of goods sold	367	1,448	(1,081)
Gross loss	(15)	(979)	964
Operating expenses			
General and administrative	2,220	2,420	(200)
Research and development, net	5,999	3,578	2,421
Sales and marketing	921	954	(33)
Depreciation of property and equipment and amortization of intangible assets	124	69	55
Foreign exchange loss	610	287	323
Operating expenses	9,874	7,308	2,566
Operating loss	9,889	8,287	1,602
Amortization of deferred financing costs and debt discounts	123	73	50
Financial charges (income), net	(1,552)	507	(2,059)
Gain on debt extinguishment	—	(451)	451
Other expense (income), net	(1)	—	(1)
Loss before income taxes	8,459	8,416	43
Income taxes	(28)	18	(46)
Net loss	8,431	8,434	(3)
Net loss attributable to:			
BioAmber Inc. shareholders	7,051	8,129	(1,078)
Non-controlling interest	1,380	305	1,075
	8,431	8,434	(3)

Product sales

Product sales decreased from \$469,000 for the three months ended September 30, 2014 to \$352,000 for the three months ended September 30, 2015 due to a decrease in the volume sold and a decrease in average selling price. The decrease in average selling price was partially due to the decrease in the Euros exchange rate versus the U.S. dollar.

Cost of goods sold

Cost of goods sold decreased from \$1.5 million for the three months ended September 30, 2014 to \$367,000 for the three months ended September 30, 2015. This decrease was driven primarily by the under-absorption of fixed costs realized during the third quarter 2014 at the Pomacle facility and a decrease in the average cost per unit sold due to the previous inventory reserve taken since the same period in 2014.

General and administrative expenses

General and administrative expenses decreased from \$2.4 million for the three months ended September 30, 2014 to \$2.2 million for the three months ended September 30, 2015. This was primarily due to the Canadian Dollar depreciation against the U.S. Dollar from 2014 to 2015, partially offset by an increase in insurance and legal fees related to Sarnia start-up operations.

Research and development expenses

Research and development expenses increased by \$2.4 million to \$6.0 million for the three months ended September 30, 2015, as compared to \$3.6 million for the three months ended September 30, 2014. This was driven primarily by an increase in expenses

related to the commissioning and start-up of the Sarnia plant, partially offset by the decrease in royalty expense due to the termination of the DuPont and E. coli technology licenses.

Sales and marketing expenses

Sales and marketing expenses remained stable from the three months ended September 30, 2015, compared to the three months ended September 30, 2014.

Foreign exchange loss

The foreign exchange loss increased by \$323,000 from a loss of \$287,000 for the three months ended September 30, 2014 compared to a loss of \$610,000 for the three months ended September 30, 2015. This increase was driven by the strengthening of the U.S. Dollar versus the Canadian Dollar during the three months ended September 30, 2015, which impacted the Canadian Dollar cash balances being carried on our books to meet vendor obligations for the Sarnia Project.

Financial charges (income), net

Financial charges (income), net decreased from an income of \$1.6 million for the three months ended September 30, 2015 as compared to a charge of \$507,000 for the three months ended September 30, 2014. The increase is mainly due to the non-cash mark-to-market adjustment change of \$2.0 million on the warrants that were part of the units issued in our IPO, as well as on the June 2009 Warrants and the April 2011 Warrants. This was partially off-set by the interest charges on our long-term debts.

Comparison of Nine Months Ended September 30, 2015 and Nine Months Ended September 30, 2014

The following table shows the amounts of the listed items from our consolidated statements of operations for the periods presented, showing period-over-period changes:

	Nine months ended September 30, 2015 (in thousands)	Nine months ended September 30, 2014	\$ Increase (decrease)
Revenues	\$1,061	\$ 1,235	\$(174)
Cost of goods sold	1,429	3,979	(2,550)
Gross loss	(368)	(2,744)	2,376
Operating expenses			
General and administrative	7,812	8,205	(393)
Research and development, net	15,568	11,151	4,417
Sales and marketing	3,198	3,803	(605)
Depreciation of property and equipment and amortization of intangible assets	288	188	100

Edgar Filing: BioAmber Inc. - Form 10-Q

Write-off of intangible assets	1,141	—	1,141
Foreign exchange loss	868	76	792
Operating expenses	28,875	23,423	5,452
Operating loss	29,243	26,167	3,076
Amortization of deferred financing costs and debt discounts	281	218	63
Financial charges (income), net	2,801	17,218	(14,417)
Other expense (income), net	(21)	(185)	164
Loss before income taxes	32,304	42,967	(10,663)
Income taxes	15	52	(37)
Net loss	32,319	43,019	(10,700)
Net loss attributable to:			
BioAmber Inc. shareholders	29,428	42,521	(13,093)
Non-controlling interest	2,891	498	2,393
	32,319	43,019	(10,700)

Product sales

Product sales decreased from \$1.2 million for the nine months ended September 30, 2014 to \$1.1 million for the nine months ended September 30, 2015 due to a decrease in the average selling price, partially offset by an increase in volume sold. The decrease in average selling price was partially driven by the depreciation of the Euro against the U.S. Dollar.

Cost of goods sold

Cost of goods sold decreased from \$4.0 million for the nine months ended September 30, 2014 to \$1.4 million for the nine months ended September 30, 2015. The decrease is primarily due to a non-cash charge from an inventory reserve of \$2.4 million recorded during 2014, as compared to an inventory reserve of \$300,000 in the same period this year, and the realization of under-absorption of fixed costs during the third quarter 2014 at the Pomacle facility.

General and administrative expenses

General and administrative expenses decreased by \$393,000 to \$7.8 million for the nine months ended September 30, 2015, as compared to \$8.2 million for the nine months ended September 30, 2014 due to the Canadian Dollar depreciation against the U.S. Dollar from 2014 to 2015, partially offset by an increase in insurance and legal fees related to Sarnia start-up operations.

Research and development expenses

Research and development expenses increased by \$4.4 million, to \$15.6 million for the nine months ended September 30, 2015, as compared to \$11.2 million for the nine months ended September 30, 2014. This was driven primarily by an increase in expenses related to the commissioning and start-up of the Sarnia plant, partially offset by a decrease in BDO related expenses that are now performed mainly by Davy under the license agreement, which is being capitalized, and a decrease in stock-option compensation expenses related to the stock option cancellations in the second quarter of 2014, which did not occur in 2015.

Sales and marketing expenses

Sales and marketing expenses decreased by \$605,000 to \$3.2 million for the nine months ended September 30, 2015, as compared to \$3.8 million the nine months ended September 30, 2014. The decrease is primarily due to a decrease in stock-based compensation expense due the stock option cancellations in the second quarter of 2014, which did not occur in 2015.

Foreign exchange loss

The foreign exchange loss increased by \$792,000 to \$868,000 for the nine months ended September 30, 2015 as compared to a loss \$76,000 for the nine months ended September 30, 2014. The foreign exchange loss was driven by a strengthening of the U.S. Dollar versus the Canadian Dollar during the nine months ended September 30, 2015, which impacted the Canadian Dollar cash balances being carried on our books to meet vendor obligations for the Sarnia Project.

Financial charges (income), net

Financial charges (income), net comprised of a charge of \$2.8 million for the nine months ended September 30, 2015 as compared to \$17.2 million for the nine months ended September 30, 2014. The decrease was mainly due to the non-cash mark-to-market adjustment change of \$14.3 million on the warrants that were part of the units issued in our IPO as well as on the June 2009 Warrants and the April 2011 Warrants.

Liquidity and Capital Resources

From inception through September 30, 2015, we have funded our operations primarily from an aggregate of \$263.2 million raised from public offerings of our equity securities, private placements of our equity securities, and the sale of shares issued by a subsidiary and convertible notes, including net proceeds of \$32.8 million from our May 2015 public offering of our common stock. We also received CAD\$70.6 million from loan and grants proceeds from various Canadian government agencies and net proceeds of \$24.5 million from a three year term loan with TCP

The total expected cash needs for the construction of our manufacturing facility in Sarnia, Ontario was revised to approximately \$141.5 million, slightly above the estimated initial cost of \$125.0 million +/- 10%, of which the remaining costs are expected to be funded by us through available cash, governmental grants, and Mitsui's capital contribution. We began commissioning and start-up of

this facility in March 2015, achieved mechanical completion in June 2015 and started commercial scale production in October 2015. In addition to the remaining capital expenditures payable, we will require funds to ramp up production levels at our Sarnia operations, and build inventory levels, for our research and development programs and for general corporate purposes. We expect to fund these needs by increasing our cash balance with one or more of the following:

- Increase revenues from succinic acid produced in Sarnia, Ontario
- Refinance existing debt obligations
- Raise additional equity capital and or debt financing
- Reduce or delay operating expenses as deemed appropriate in order to conserve cash

If we are unsuccessful in implementing any of the initiatives listed above, it could have a material adverse effect on our ability to continue with our business plan.

There are certain covenants in our debt and grant agreements, which are discussed in the notes to our condensed consolidated financial statements. We are in compliance with all of the covenants provided in each of these agreements. We expect to continue to be in compliance with these covenants in the future.

The following table sets forth the major sources and uses of cash for each of the periods set forth below:

	Nine Months Ended September 30, 2015 2014 (in thousands)	
Net cash used in operating activities	(22,491)	(10,203)
Net cash used in investing activities	(62,878)	(59,478)
Net cash provided by financing activities	70,457	66,825

Operating activities

The cash from operating activities is primarily used for general and administrative expenses and research and development activities. These include expenses on research and development projects, expenses related to the commissioning and start-up of the Sarnia facility, consultancy and advisory fees from third parties, licensing and royalty expenses, payroll expenses, legal and accounting expenses and office rent and utilities.

Cash used in operating activities during the nine months ended September 30, 2015 of \$22.5 million reflected our net loss of \$32.3 million, which was adjusted for non-cash charges of \$6.6 million and a positive change in operating assets and liabilities of \$3.2 million. Non-cash expense adjustments included stock-based compensation of \$3.9 million, \$1.1 million of intangible assets write-off and financial charges of \$1.0 million including the mark-to-market accounting for warrants that were part of the units issued in our IPO and the June 2009 and April 2011 Warrants, and the end of term charge on long-term debt. The amount of operating assets and liabilities is a net inflow of \$3.2 million due to an increase in current liabilities and a decrease in current assets.

Cash used in operating activities during the nine months ended September 30, 2014 of \$10.2 million reflected our net loss of \$43.0 million, which was adjusted for non-cash charges of \$21.1 million and a positive change in operating assets and liabilities of \$11.7 million. Non-cash expense adjustments included stock-based compensation of \$5.6

million and financial charges of \$15.6 million for the mark-to-market accounting for warrants that were part of the units issued in our IPO and the June 2009 and April 2011 Warrants, and the end of term charge on long-term debt. The amount of operating assets and liabilities is a net inflow of \$11.7 million due to an increase in current liabilities and a decrease in current assets.

Investing activities

Cash used in investing activities during the nine months ended September 30, 2015 of \$62.9 million included property and equipment purchases mostly related to the building of our facility in Sarnia, Ontario of \$62.5 million.

Cash used in investing activities during the nine months ended September 30, 2014 of \$59.5 million included property and equipment purchases mostly related to the building of our facility in Sarnia, Ontario of \$59.5 million and an increase in restricted cash of \$678,000, offset by a capital distribution from our equity investment in AmberWorks LLC of \$675,000.

Financing activities

Cash provided by financing activities during the nine months ended September 30, 2015 of \$70.5 million included the proceeds from issuance of shares including the May 2015 public offering, for a total of \$33.1 million, an additional disbursement of \$30.0 million from the government under the actual loans and grants agreements, including the loan proceeds of the CAD\$20.0 million commercial loan from a financial consortium including Export Canada Development (EDC), Comerica, and Farm Credit Canada, capital contributions by Mitsui to our BioAmber Sarnia joint venture of \$9.0 million, and reimbursement of our EDC loan for \$0.6 million.

Cash provided by financing activities during the nine months ended September 30, 2014 of \$66.8 million represents net proceeds from our public offering of \$36.0 million a capital contribution by Mitsui maintaining its 30% equity in our BioAmber Sarnia joint venture of \$24.6 million, the loan and grant proceeds from FEDDEV, SJIF and AAFC of \$9.3 million, offset by the repayment of Hercules long-term debt of \$2.8 million and the deferred financing costs of \$0.5 million related to the CAD\$20.0 million commercial loan from Export Canada Development, Farm Credit Canada, and Comerica.

Off-balance Sheet Arrangements

During the periods presented, we did not have, and we do not currently have, any relationships with unconsolidated entities, such as entities often referred to as structured finance or special purpose entities, established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Critical Accounting Policies and Estimates

We prepare our condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. As such, management is required to make certain estimates, judgments and assumptions that it believes are reasonable based on the information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses for the periods presented. The significant accounting policies which management believes are the most critical to aid in fully understanding and evaluating our reported financial results include fair value determination of assets, liabilities, fair value of intangible assets and goodwill, useful lives of intangible assets, income taxes, stock-based compensation and value of certain equity and debt instruments. These critical accounting policies are the same as those detailed in the notes to our audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2014.

Recent accounting pronouncements

For information on recent accounting pronouncements, see "Recently adopted and recently issued accounting guidance" in the notes to the consolidated financial statements appearing in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk Interest Rate Risk

We had cash totaling \$34.2 million at September 30, 2015. These amounts were deposited in current and interest-bearing accounts and were held for working capital purposes. Our primary objective is to preserve our capital for the purpose of payments related to the construction of our facility in Sarnia, Ontario, Canada and funding our operations. We do not enter into investments for trading or speculative purposes. Our three-year term loan with TCP

bears interest at 9.50% or the 3 month LIBOR rate plus 9.27%. If the LIBOR rate were to increase, the interest rate for the remaining term of the loan would increase.

Commodity Price Risk

We use glucose in our processes, which can be derived from corn, wheat and other feedstocks. Thus, our raw material is sensitive to price fluctuations in feedstock commodities. Prices of corn, wheat and other feedstocks are subject to fluctuations due to unpredictable factors such as weather, quantities planted and harvested, changes in national and global supply and demand, and government programs and policies.

Foreign Currency Risk

We currently conduct our operations in U.S. Dollars, Canadian Dollars, Euros and British pounds, which exposes us to fluctuations in foreign currency exchange rates.

As we increase our production our production from our facility in Sarnia, Ontario, we expect our foreign currency risk to increase as our sources of cash will be primarily in U.S. dollars, while our uses of cash will be primarily in Canadian Dollars. We will monitor foreign currency exposures and will look to mitigate exposures through normal business operations such as manufacturing and selling in the same currencies where practical. We may use forward contracts or currency swaps to mitigate any remaining exposure.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of September 30, 2015, our management, with the participation of our President and Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rules 13a-15(b) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended, or the Exchange Act. Based upon that evaluation, our President and Chief Executive Officer and our Chief Financial Officer concluded that, as of September 30, 2015, our disclosure controls and procedures were ineffective at a reasonable assurance level in ensuring that material information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules, regulations and forms of the Securities and Exchange Commission, including ensuring that such material information is accumulated and communicated to our management, including our President and Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

In connection with the preparation of our quarter ended September 30, 2015 condensed consolidated financial statements, we identified a material weakness in internal control over financial reporting, that if not corrected, could result in a material misstatements in our financial statements. The material weakness was in an inappropriate review process of non-routine complex financial instruments that may have embedded derivatives or other provisions that may have complex accounting impacts, and resulted in an error in the accounting treatment of warrants issued in 2009 and in 2011 (“Legacy Warrants”). This error resulted in the reclassification of the Legacy Warrants from equity to a non-cash liability and in the correction of our comparative condensed consolidated financial statements as presented in our Note 18 of the condensed consolidated financial statements. The accounting treatment of previous warrants issued was reviewed during the quarter ended September 30, 2015 and confirmed that the error was limited to these Legacy warrants. Our review process for non-routine complex financial instruments allowed this error to go undetected, and management has assessed the potential magnitude and concluded that this represents a material weakness in our internal control over financial reporting, but did not result in a material misstatement in our audited consolidated financial statements for the years ended June 30, 2009 to December 31, 2014 or any interim condensed consolidated financial statements for the quarters included therein. A material weakness is a control deficiency, or combination of control deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company’s annual or interim financial statements will not be prevented or detected on a timely basis.

Despite the existence of this material weakness, the Company believes the financial information presented herein is materially correct and in accordance with generally accepted accounting principles in the United States of America,

and do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made. The condensed consolidated financial statements together with the other financial information included in the consolidated filings fairly present, in all material respects, the financial condition, financial performance and cash flows of the Company for the quarter ended September 30, 2015.

During the fourth quarter of 2015, specific actions are being implemented to address the above identified material weakness including: improving processes and implementing additional controls around review of new complex financial instruments to identify appropriate accounting treatment and monitoring implication thereafter, and strengthening management's review controls.

Changes in Internal Control over Financial Reporting

There were no changes to our internal control over financial reporting that occurred during the quarter ended September 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations of Internal Controls

Our management does not expect that our disclosure controls and procedures or our internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the

objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings

We may be, from time to time, involved in the normal course of business in various legal proceedings. Rules of the Securities and Exchange Commission require the description of material pending legal proceedings, other than ordinary, routine litigation incident to our business, and advise that proceedings ordinarily need not be described if they primarily involve damages claims for amounts (exclusive of interest and costs) not individually exceeding 10% of the current assets of the registrant and its subsidiaries on a consolidated basis. We are not presently a party to any legal proceedings that, if determined adversely to us, would individually or taken together have a material adverse effect on our business, operating results, financial condition or cash flows. There may be claims or actions pending or threatened against us of which we are currently not aware and the ultimate disposition of which would have a material adverse effect on us.

Item 1A. Risk Factors

Part I, Item 1A, “Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2014 filed with the Securities and Exchange Commission on March 16, 2015, sets forth information relating to important risks and uncertainties that could materially adversely affect our business, financial condition and operating results. Except to the extent that information disclosed elsewhere in this Quarterly Report on Form 10-Q relates to such risk factors (including, without limitation, the matters described in Part I, Item 2, “Management’s Discussion and Analysis of Financial Condition and Results of Operations”), there have been no material changes to our risk factors disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014 filed on March 16, 2015. However, those risk factors continue to be relevant to an understanding of our business, financial condition and operating results and, accordingly, you should review and consider such risk factors in making any investment decision with respect to our securities.

We began operations at our facility in Sarnia, Ontario in October 2015 and we may encounter substantial difficulties in ramping up commercial operations and meeting the expectations of our customers. Because we produce all of our products at our single facility any disruption or delays may have a material adverse effect on our business finance conditions and results of operations.

We began commissioning and start-up of our Sarnia facility in March 2015, and started operations in October 2015. Because our facility is the first of its kind, none of our employees have any prior experience in its operation. As a result, at the beginning of our facility's operation, we may experience unforeseen challenges and difficulties, and until the operations stabilize and we get more experience operating a commercial scale facility, the Sarnia facility may be more susceptible to start-ups, shutdowns, quality issues, or other delays or disruptions. We cannot know with certainty when or if we will achieve optimized operations. The skills and knowledge gained in operating our large-scale demonstration facility in Pomacle, France may prove insufficient for successful operation of a larger-scale commercial facility, and we may be required to expend significant time and resources to develop our capabilities in commercial facility operations. We may also need to hire new employees or contract with third parties to help manage our operations, and our performance will suffer if we are unable to hire qualified parties or if they perform poorly.

Our operations at our Sarnia, Ontario facility may be adversely affected by changes and events, including the following:

- loss of key talent, including technical and administrative personnel, in operating the facility;
- failure to maintain or timely renew regulatory approvals, including environmental ;
- issues with the quality of our products produced at the facility;
- shortages or changes in the price of equipment, materials or labor and related budget overruns;
- adverse changes in the political and/or regulatory environment;
- adverse weather conditions or natural disasters, accidents or other unforeseen events;
- insufficient capital to continue operations at the facility and the inability to obtain additional financing on satisfactory terms or at all;

- workplace health and safety issues at the facility;
- costs associated with the external processing of our co-products;
- issues associated with our environmental emissions, effluents, air and noise; and
- failure during commissioning and start-up of a key piece of equipment, particularly one with long lead time delivery.

Currently, our only production site is our Sarnia facility. As a result, significant and prolonged disruptions at the facility would have a material adverse effect on our business, financial condition and results of operations. Our operations also may be disrupted by external events such as natural disasters, severe weather conditions, workplace or environmental accidents, mechanical failure, fires, explosions, interruptions of supply, work stoppage, losses of permits or authorizations or acts of terrorism. Some of these events can cause personal injury and loss of life, severe damage to or destruction of property and equipment and environmental damage, and may result in suspension or cessation of operations and the imposition of civil or criminal penalties. Our facilities and the manufacturing equipment we use would be very costly to replace and could require substantial lead time to repair or replace. In addition, telecommunications failures or other systems interruptions, such as computer viruses or other cyber-attacks, at any of the locations in which we do business could significantly disrupt our operations, laboratory processes and delay shipments to our customers. We can provide no assurance that we will not incur losses related to these or other events beyond the limits or outside the coverage of our insurance policies. Further, disruptions to our operations could have a material adverse effect on our business and results of operations during the period of time that the facility is not operating.

In addition, we may also experience difficulties in producing sufficient quantities or quality of products or in achieving sufficient quality and manufacturing yield levels. Our Sarnia facility is also subject to risks associated with having single suppliers for certain key inputs, such as sugar, power and steam, so the failure of any of these suppliers to perform as expected, would also have a material adverse effect on our performance and results of operations. If we are unable to successfully operate and manage our manufacturing operations at our new facility or otherwise fail to meet our manufacturing needs, we may not be able to provide our customers with the quality or quantity of products they require, and thus could lose customers and suffer reduced revenues and may have a material adverse effect on our results of operations.

We identified a material weakness in our internal control over financial reporting as of September 30, 2015 and we may identify additional material weaknesses in the future that may cause us to fail to meet our reporting obligations or result in material misstatements of our financial statements. If we fail to remediate any material weaknesses or if we otherwise fail to establish and maintain effective control over financial reporting, our ability to accurately and timely report our financial results could be adversely affected.

In connection with the preparation of our condensed consolidated financial statements for the quarter ended September 30, 2015, we identified a material weakness in internal control over financial reporting that, if not corrected, could result in a material misstatement in our financial statements. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of our financial statements will not be prevented or detected on a timely basis.

The material weakness identified in our internal control over financial reporting was in the inappropriate review process of non-routine complex financial instruments in an inappropriate review process of non-routine complex financial instruments that may have embedded derivatives or other provisions that may have complex accounting impacts, and resulted in an error in the accounting treatment of warrants issued 2009 and 2011, or the Legacy Warrants. This error resulted in the reclassification of the Legacy Warrants from equity to a non-cash liability and in the correction of our comparative condensed consolidated financial statements as presented in the Note 18 of Item 1. The accounting treatment of warrants previously issued was reviewed during the quarter ended September 30, 2015, and we determined that the error was limited to these Legacy Warrants. Our review process for non-routine complex financial instruments allowed this error to go undetected, and management has assessed the potential

magnitude and concluded that this represents a material weakness in our internal control over financial reporting, but did not result in a material misstatement in our audited consolidated financial statements for the years ended June 30, 2009 to December 31, 2014 or any interim condensed consolidated financial statements for the quarters included therein. We have taken certain actions to remediate this material weakness, including, improving processes and implementing additional controls around review of new complex financial instruments to identify appropriate accounting treatment and monitoring implication thereafter, and strengthening management's review controls. However, we cannot assure our shareholders that these measures will be sufficient to remediate the material weakness that has been identified or prevent future material weaknesses or significant deficiencies from occurring. We also cannot assure our shareholders that we have identified all of our existing material weaknesses. Our independent registered public accounting firm has not performed an evaluation of our internal control over financial reporting during any period in accordance with the provisions of Sarbanes Oxley. In light of the control deficiencies and the resulting material weakness that were previously identified as a result of the limited procedures performed, we believe that it is possible that, had our independent registered public accounting firm performed an evaluation of our internal control over financial reporting in accordance with the provisions of the Sarbanes Oxley, additional material weaknesses and significant control deficiencies may have been identified.

If we identify future material weaknesses in our internal controls over financial reporting or fail to meet the demands that will be placed upon us as a public company, including the requirements of the Sarbanes Oxley, we may be unable to accurately report our financial results, or report them within the timeframes required by law or stock exchange regulations. Under Section 404, we are required to evaluate and determine the effectiveness of our internal control over financial reporting and, beginning with the annual report for the year ended December 31, 2018, provide a management report as internal control over financial reporting. Failure to comply with Section 404 could also potentially subject us to sanctions or investigations by the SEC or other regulatory authorities. We cannot assure that our existing material weakness will be remediated or that additional material weaknesses will not exist or otherwise be discovered, any of which could adversely affect our reputation, financial condition and results of operations.

Item 2. Unregistered Sale of Equity Securities and Use of Proceeds
Use of Proceeds

None

Item 5. Other Information

The Securities and Exchange Commission recently provided guidance to issuers such as BioAmber regarding the use of social media to disclose material non-public information. In this regard, investors and others should note that we announce material financial information using our company website (www.bio-amber.com), our investor relations website (investor.bio-amber.com), SEC filings, press releases, public conference calls and webcasts. Information about BioAmber, its business, and its results of operations may also be announced by posts on the following social media channels:

BioAmber's Twitter feed (<https://twitter.com/bioamber>)

BioAmber's Facebook feed (<https://www.facebook.com/bioamber>)

BioAmber's LinkedIn feed (<https://goo.gl/YhtwRZ>)

BioAmber's Google+ feed (<https://plus.google.com/+BioamberInc/posts>)

BioAmber's youtube feed (www.youtube.com/user/BioAmber)

The information that we post on these social media channels could be deemed to be material information. As a result, we encourage investors, the media, and others interested in BioAmber to review the information that we post on these social media channels. These channels may be updated from time to time on BioAmber's investor relations website.

Item 6. Exhibits

The exhibits listed below are filed as part of this Quarterly Report on Form 10-Q.

Exhibit No.	Exhibit Description	Filed or Furnished Herewith	Incorporated by Reference			Filing Date
			Form	SEC File No.	Exhibit	
3.1	Amended and Restated Certificate of Incorporation		S-1	333-177917	3.1	4/11/13
3.2	Amended and Restated By-laws		S-1	333-177917	3.2	4/11/13
4.1	Specimen Common Stock Certificate		S-1	333-177917	4.1	4/11/13
4.2	Form of Common Stock Purchase Warrant		S-1	333-177917	4.6	5/9/13
10.1	Second Amendment to Loan and Security Agreement, dated as of July 29, 2015, between the Registrant and the other parties thereto		8-K	001-35905	10.1	8/4/15
