**Concerned Stockholders of Surge Components Issues Letter to Fellow Stockholders**

*Shocked and Outraged at Management's Adoption of Poison Pill with Extremely Restrictive Triggering Threshold*

*Appalled that Management Would Restrict How Much Stock Shareholders May Purchase*

DEER PARK, New York, October 10, 2016 – (Business Wire) – Concerned Stockholders of Surge Components, Inc.” (“CSSC” or “we”), a group of long-term investors in Surge Components, Inc. (OTCPK: SPRS) (“Surge” or the “Company”) today issued the following letter to fellow shareholders:

October 10, 2016

Dear Fellow Stockholder,

We were shocked and outraged to see the announcement on October 7, 2016, that Surge Components, Inc. (the “Company”) adopted a poison pill ***without stockholder approval***. Even worse, this poison pill includes an incredibly restrictive triggering threshold of just 4.99%. In other words, the Board of Directors—who is supposed to be working for you—has ***put a limit on how much stock you are allowed to buy***.

Why did the Board do this? They will claim it is to protect the Company’s net operating losses. But the real reason is that the Board wants to limit your ability to buy stock in advance of the record date for this year’s annual meeting where we will be giving stockholders the opportunity to elect ***two highly qualified, independent directors***.

And yet, adopting the poison pill was not enough for the Board. They waited just long enough before adopting the poison pill for Steve Lubman—one of the directors standing for election this year—to complete five open market purchases totaling 38,140 shares. ***We believe that these are the first open market purchases of the Company’s stock that Mr. Lubman has ever made, and they were completed three days before the poison pill was adopted!*** These purchases would not have been permitted had the poison pill been in place.

The adoption and timing of the poison pill are further examples of the Board's utter disregard for stockholders. They are using the poison pill—cloaked under the veil of preserving stockholder value—to entrench themselves in office. Why is the Board panicking at the prospect of having two new knowledgeable and independent directors join the Board? Why are they wasting stockholders' money on legal fees for entrenchment devices instead of improving the Company?

Let us remind you that over the past five years preceding August 26, 2016 (when we first went public with our concerns), the Company's stock price *declined* by 17% while the S&P 500 and Russell 2000 indices have produced returns of 105% and 92%, respectively. Additionally, over the preceding 20 years the Company's stock price *dropped* by 85% while the S&P 500 returned 375% and the Russell 2000 returned 387%. Current management has been in place during that entire 20-year span.

We continue to believe that the Company should be sold, preferably to a strategic buyer.
