ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

Forward-Looking Statements

Historical results and trends should not be taken as indicative of future operations. Management's statements contained in this report that are not historical facts are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities and Exchange Act of 1934 (the "Exchange Act"), as amended. Actual results may differ materially from those included in the forward-looking statements. The Company intends such forward-looking statements to be covered by the safe-harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and is including this statement for purposes of complying with those safe-harbor provisions. Forward-looking statements, which are based on certain assumptions and describe future plans, strategies and expectations of the Company, are generally identifiable by use of the words "believe," "expect," "intend," "anticipate," "estimate," "project," "prospects," or similar expressions. The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse affect on the operations and future prospects of the Company on a consolidated basis include, but are not limited to: unanticipated problems relating to exploration, hazards such as pollution, or other hazards which cannot be insured against or predicted, changes in economic conditions, availability of capital, competition, and generally accepted accounting principles. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Further information concerning the Company and its business, including additional factors that could materially affect the Company's financial results, is included herein and in the Company's other filings with the SEC.

Management's Discussion and Analysis

We are an exploration company focused on developing North American mineral properties. Our current focus is on the exploration of our land portfolio comprised of an option to acquire a 60% interests in mineral lease claims, containing the mineral claims Coal #1 to Coal #64 (BLM-NMC number 847957 to 848020) located in the Coal Canyon, Cortez Area, Eureka County, Nevada United States of America in Nevada.

The following disclosure relates to each property that we have an interest in:

Coal Canyon, Cortez Area, Eureka County, Nevada

On April 6, 2005, we acquired an option to earn a 60% interest in mineral claims in Eureka County, Nevada, containing the mineral claims Coal #1 to Coal #64 (BLM-NMC number 847957 to 848020) located in the Coal Canyon, Cortez Area, Eureka County, Nevada, United States of America. Our interest option was acquired by us for costs as set out in note 4 of the unaudited interim financial statements. The mineral lease claims are owned by Miranda U.S.A. Inc. pursuant to a 20-year mineral lease dated May 27, 2004. At the present time there are no proven reserves.

On March 23, 2007, the Company terminated the above noted Option Agreement with Miranda U.S.A. Inc.

Results of Operations for the quarter ended February 28, 2007

For the quarter ended February 28, 2007, there were no revenues and there were no revenues for the same three-month period in the prior year.

For the quarter ended February 28, 2007 we incurred costs and expenses in the amount of \$151,975, compared to costs and expenses of \$22,919 for the corresponding period in the prior year.

This increase in costs and expenses is attributable to exploration and administrative expenses we incurred in connection with the following:

-

Exploration costs for the quarter ended February 28, 2007 amounted to \$121,943 when compared to \$0 for the same period in the prior year. The increase in costs was associated with final drilling costs of the Company's exploration property. The Company has concluded after this exploration phase to abandon the property and terminate its relationship with the Operator.

-

Rent payment in connection with the acquisition of office space. During the quarter ended February 28, 2007, the Company incurred \$5,629 (February 28, 2006: \$1,605); the increase was caused by the allocation of costs paid for accounting services and the use of premises used by the President of the Company.

-

The fees paid to for audit and accounting for the quarter ended February 28, 2007 were \$10,218 (February 28, 2006: \$4,148); the increase was caused by payments made for accounting services.

Liquidity and Capital Resources

As of February 28, 2007, we had total current assets of \$28,917 (August 31, 2006: \$165,918) while our total current liabilities as of February 28, 2007 were \$80,573 (August 31, 2006: \$53,093). As a result, on February 28, 2007 we had a working capital deficit of \$51,656 (August 31, 2006: a working capital of \$112,825). The decrease in working capital was caused by the Company's expenditure on exploration and administration costs.

The Company relied on cash on hand previously raised through the issue of equity capital to fund our operations during the quarter ended February 28, 2007.

The company generates no revenue. We still anticipate the need to raise significant capital through the sale of equity securities on a private or public basis in order to sustain operations. It is uncertain whether we will be able to obtain the necessary capital.

We intend to fund operations and commitments over the next twelve months from our cash on hand, including our capital expenditures, working capital or other cash requirements. We believe cash from operating activities, and our existing cash resources may not be sufficient to meet our working capital requirements for the next 12 months. We will likely require additional funds to support the Company's business plan. Management intends to raise additional working capital through debt and equity financing. There can be no assurance that additional financing will be available on acceptable terms, if at all. If adequate funds are not available, we may be unable to take advantage of future opportunities, respond to competitive pressures, and may have to curtail operations.

Explanation of Responses:

Revenue Recognition

The company has no revenue.

Item 3. Controls and Procedures

We carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of February 28, 2007. This evaluation was carried out under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, Mr. Chris Bunka. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of February 28, 2007, our disclosure controls and procedures are effective. There have been no significant changes in our internal controls over financial reporting during the quarter ended February 28, 2007 that have materially affected or are reasonably likely to materially affect such controls.

Disclosure controls and procedures are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act are recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Limitations on the Effectiveness of Internal Controls

Our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will necessarily prevent all fraud and material error. An internal control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the internal control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate.
