UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended October 30, 2016
or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____
Commission File Number 1-6395

SEMTECH CORPORATION
(Exact name of registrant as specified in its charter)

Delaware 95-2119684
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

200 Flynn Road, Camarillo, California, 93012-8790
(Address of principal executive offices, Zip Code)

Registrant's telephone number, including area code: (805) 498-2111

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act): Yes No

Unless the context otherwise requires, the use of the terms “Semtech,” “the Company,” “we,” “us” and “our” in this Quarterly Report on Form 10-Q refers to Semtech Corporation and its consolidated subsidiaries.

Special Note Regarding Forward-Looking and Cautionary Statements

This Quarterly Report on Form 10-Q contains “forward-looking statements” within the meaning of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, as amended, based on our current expectations, estimates and projections about our operations, industry, financial condition, performance, results of operations, and liquidity. Forward-looking statements are statements other than historical information or statements of current condition and relate to matters such as future financial performance, future operational performance, the anticipated impact of specific items on future earnings, and our plans, objectives and expectations. Statements containing words such as “may,” “believe,” “anticipate,” “expect,” “intend,” “plan,” “project,” “estimate,” “should,” “will,” “designed to,” “project,” “business outlook,” or other similar expressions constitute forward-looking statements. Forward-looking statements involve known and unknown risks and uncertainties that could cause actual results and events to differ materially from those projected.

Potential factors that could cause actual results to differ materially from those in the forward-looking statements include, but are not limited to:

- fluctuation in the Company’s future results;
- downturns in the business cycle;
- reduced demand for the Company’s products, including due to global economic conditions;
- business interruptions;
- the Company’s reliance on a limited number of suppliers and subcontractors for components and materials;
- potentially insufficient liability insurance if the Company’s products are found to be defective;
- obsolete inventories as a result of changes in demand and change in life cycles for the Company’s products;
- the Company’s inability to successfully develop and sell new products;
- lengthy and expensive product qualification processes without any assurance of product sales;
- the Company’s products failing to meet industry standards;
- the Company’s inability to protect intellectual property rights;
- the Company suffering losses if its products infringe the intellectual property rights of others;
- the Company’s need to commit resources to product production prior to receipt of purchase commitments;
- increased business risk from foreign customers;
- the Company’s foreign currency exposures;
- potential increased tax liabilities and effective tax rate if the Company needs to repatriate funds held by foreign subsidiaries;
- export restrictions and laws affecting the Company’s trade and investments;
- competition against larger, more established entities;
- increased competition due to industry consolidation;
- the loss of any one of the Company’s significant customers;
- volatility of customer demand;
- termination of a contract by a distributor;
- government regulations and other standards, including those that impose operational and reporting requirements;
- the Company’s failure to comply with applicable environmental regulations;
- compliance with conflict minerals regulations;
- increase in the Company’s cost of doing business as a result of having to comply with the codes of conduct of certain of the Company’s customers and suppliers;

- changes in tax laws and review by taxing authorities;
- taxation of the Company in other jurisdictions;
- the Company's failure to maintain effective internal control over financial reporting and disclosure controls and procedures;
- the Company's limited experience with government contracting;
- potential government investigations and inquiries;
- loss of the Company's key personnel;
- risks associated with companies the Company has acquired in the past and may acquire in the future and the Company's ability to successfully integrate acquired businesses and benefit from expected synergies;
- the Company may be required to recognize additional impairment charges;
- the Company may be adversely affected by new accounting pronouncements;
- the Company's ability to generate cash to service its debt obligations;
- restrictive covenants in the Company's credit agreement which may restrict its ability to pursue its business strategies;
 - the Company's reliance on certain critical information systems for the operation of its business;
- costs associated with the Company's indemnification of certain customers, distributors and other parties;
- the Company's share price could be subject to extreme price fluctuations;
- the impact on the Company's common stock price if securities or industry analysts do not publish reports about the Company's business or adversely change their recommendations regarding the Company's common stock;
- anti-takeover provisions in the Company's organizational documents could make an acquisition of the Company more difficult;
- the Company is subject to litigation risks which may be costly to defend;
- the Company's ability to realize expected benefits from the implementation of a new enterprise resource planning ("ERP") system, and disruption of the Company's operations caused by the adjustment to the new ERP system and the transition from the Company's legacy systems and databases.

Additionally, forward-looking statements should be considered in conjunction with the cautionary statements contained in this Quarterly Report on Form 10-Q, including, without limitation, information under the captions "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Risk Factors" and additional factors that accompany the related forward-looking statements in this Quarterly Report on Form 10-Q, in our Annual Report on Form 10-K for the fiscal year ended January 31, 2016 including, without limitation information under the caption "Risk Factors", in other filings with the Securities and Exchange Commission ("SEC"), and in material incorporated herein and therein by reference. In light of the significant risks and uncertainties inherent in the forward-looking information included herein that may cause actual performance and results to differ materially from those predicted, any such forward-looking information should not be regarded as representations or guarantees by the Company of future performance or results, or that its objectives or plans will be achieved, or that any of its operating expectations or financial forecasts will be realized. Reported results should not be considered an indication of future performance. Investors are cautioned not to place undue reliance on any forward-looking information contained herein, which reflect management's analysis only as of the date hereof. Except as required by law, the Company assumes no obligation to publicly release the results of any update or revision to any forward-looking statement that may be made to reflect new information, events or circumstances after the date hereof or to reflect the occurrence of unanticipated or future events, or otherwise.

In addition to regarding forward-looking statements with caution, you should consider that the preparation of the consolidated financial statements requires us to draw conclusions and make interpretations, judgments, assumptions and estimates with respect to certain factual, legal, and accounting matters. Our financial statements might have been materially impacted if we had reached different conclusions or made different interpretations, judgments, assumptions or estimates.

SEMTECH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1: Organization and Basis of Presentation

Nature of Business

Semtech Corporation (together with its subsidiaries, the “Company” or “Semtech”) is a global supplier of analog and mixed-signal semiconductor products. The end-customers for the Company’s products are primarily original equipment manufacturers (“OEM’s”) that produce and sell electronics.

The Company designs, develops and markets a wide range of products for commercial applications, the majority of which are sold into the enterprise computing, communications, high-end consumer and industrial end-markets.

Enterprise Computing: datacenters, passive optical networks, desktops, notebooks, servers, graphic boards, monitors, printers and other computer peripherals.

Communications: base stations, optical networks, carrier networks, switches and routers, cable modems, wireless LAN and other communication infrastructure equipment.

High-End Consumer: handheld products, smartphones, wireless charging, set-top boxes, digital televisions, tablets, digital video recorders and other consumer equipment.

Industrial: video broadcast equipment, automated meter reading, Internet of Things (“IoT”), smart grid, wireless charging, military and aerospace, medical, security systems, automotive, industrial and home automation, video security and surveillance and other industrial equipment.

Fiscal Year

The Company reports results on the basis of 52 and 53 week periods and ends its fiscal year on the last Sunday in January. The other quarters generally end on the last Sunday of April, July and October. All quarters consist of 13 weeks except for one 14-week period in the fourth quarter of 53-week years. The third quarter of fiscal years 2017 and 2016 each consisted of 13 weeks.

Principles of Consolidation

The accompanying interim unaudited condensed consolidated financial statements have been prepared by the Company, in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and the instructions to quarterly report on Form 10-Q under the Securities Exchange Act of 1934, as amended, and Article 10 of Regulation S-X. In the opinion of the Company, these unaudited statements contain all adjustments (consisting of normal recurring adjustments) necessary to present fairly, in all material respects, the financial position of the Company for the interim periods presented. All significant intercompany balances have been eliminated. Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations, and the Company believes that the included disclosures are adequate to make the information presented not misleading. The Company evaluated all subsequent events through the date these interim unaudited condensed consolidated financial statements were issued.

On March 4, 2015, the Company completed the acquisition of Triune Systems, L.L.C. (“Triune”). On January 13, 2015, the Company completed the acquisition of selected assets from EnVerv, Inc. (“EnVerv”). The interim unaudited condensed consolidated financial statements include the results of income of Triune and EnVerv commencing as of the acquisition dates.

These interim unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the notes thereto included in the Company’s Annual Report on Form 10-K for the year ended January 31, 2016. The results reported in these interim unaudited condensed consolidated financial statements should not be regarded as indicative of results that may be expected for any subsequent period or for the entire year.

Segment Information

The Company’s Chief Executive Officer (“CEO”) has been identified as the Chief Operating Decision Maker (“CODM”) as defined by guidance regarding segment disclosures (see Note 14 for further discussion). In fiscal year 2016, the Company updated its assessment of its operations in light of its restructuring efforts (see Note 17 for further

discussion) and strategic business decisions. Based on this assessment, at that time the Company had identified five operating segments in total. Four of the operating segments aggregated into one reportable segment, the Semiconductor Products Group. The remaining operating segment, the Systems Innovation Group (shown as “All others”), could not be aggregated with the other operating segments and did not meet the criteria for a separate reportable segment as defined by the guidance regarding segment disclosure. As a result, the financial activity associated with the Systems Innovation Group was reported separately from the Company’s Semiconductor Products Group. This separate reporting was included in the “All others” category. On August 5, 2016, the Company completed its divestiture of its Snowbush Intellectual Property (“Snowbush IP”) business (previously part of the Company’s Systems Innovation Group) to Rambus Inc. (“Rambus”) for a purchase price of \$32.0 million in cash along with the opportunity to receive additional payments from Rambus through 2022 based upon a percentage of sales by Rambus of new products expected to be developed by Rambus from the disposed assets. Beginning in the third quarter of fiscal year 2017, the Company no longer has a Systems Innovation Group or an “All others” category, and therefore has only four operating segments that aggregate into one reportable segment, the Semiconductor Products Group.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Derivatives and Hedging Activities

Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 815, Derivatives and Hedging, provides the disclosure requirements for derivatives and hedging activities with the intent to provide users of financial statements with an enhanced understanding of: (a) how and why an entity uses derivative instruments, (b) how the entity accounts for derivative instruments and related hedged items, and (c) how derivative instruments and related hedged items affect an entity’s financial position, financial performance, and cash flows. Further, qualitative disclosures are required that explain the Company’s objectives and strategies for using derivatives, as well as quantitative disclosures about the fair value of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative instruments.

As required by ASC 815, the Company records all derivatives on the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. Derivatives designated and qualifying as a hedge of the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. Hedge accounting generally provides for the matching of the timing of gain or loss recognition on the hedging instrument with the recognition of the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk in a fair value hedge or the earnings effect of the hedged forecasted transactions in a cash flow hedge. The Company may enter into derivative contracts that are intended to economically hedge certain of its risk, even though hedge accounting does not apply or the Company elects not to apply hedge accounting.

In accordance with the FASB’s fair value measurement guidance, the Company made an accounting policy election to measure the credit risk of its derivative financial instruments that are subject to master netting agreements on a net basis by counterparty portfolio.

Recent Accounting Pronouncements

On August 26, 2016, the FASB issued Accounting Standards Update (“ASU”) 2016-15, “Statement of Cash Flows: Classification of Certain Cash Receipts and Cash Payments.” The primary purpose of this ASU is to reduce the diversity in practice that has resulted from the lack of consistent principles on this topic. This ASU is effective for fiscal years beginning after December 15, 2017. This ASU will be effective for the Company as of the beginning of Fiscal 2019. Early adoption is permitted in any interim or annual period. The Company is in the process of determining the impact of the adoption of this guidance on its consolidated financial statements or notes thereto; however, it does not anticipate that the new guidance will have a significant impact on its consolidated financial statements.

In February 2016, FASB issued ASU No. 2016-02, Leases (Topic 842), which will require that substantially all leases be recognized by lessees on their balance sheet as a right-of-use asset and corresponding lease liability, including leases currently accounted for as operating leases. The new standard also will result in enhanced quantitative and qualitative disclosures, including significant judgments made by management, to provide greater insight into the extent of revenue and expense recognized and expected to be recognized from existing leases. The standard requires modified retrospective adoption and will be effective December 15, 2018, with early adoption permitted. The Company does not expect the adoption of this update to have a material impact on its consolidated financial statements.

In July 2015, the FASB issued ASU 2015-11, Inventory (Topic 330) Related to Simplifying the Measurement of Inventory which will apply to all inventory except inventory that is measured using last-in, first-out (“LIFO”) or the retail inventory method. Inventory measured using first-in, first-out or average cost is covered by the new amendments. Inventory within the scope of the new guidance should be measured at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. Subsequent measurement is unchanged for inventory measured using LIFO or the retail inventory method. The amendments will take effect for public business entities for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The new guidance should be applied prospectively, and earlier application is permitted as of the beginning of an interim or annual reporting period. The Company is currently assessing the impact this update will have on its consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which will require an entity to recognize revenue from the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance addresses, in particular, contracts with more than one performance obligation, as well as the accounting for some costs to obtain or fulfill a contract with a customer, and provides for additional disclosures with respect to revenues and cash flows arising from contracts with customers. Public entities are required to apply the amendments on either a full- or modified-retrospective basis for annual periods beginning after December 15, 2017 and for interim periods within those annual periods. This update will be effective for the Company beginning in the first quarter of fiscal year 2019. Early adoption is not permitted. The Company is currently assessing the basis of adoption and evaluating the impact of the adoption of the update on its consolidated financial statements.

Note 2: Acquisitions

Triune Systems, L.L.C

On March 4, 2015, the Company acquired Triune Systems, L.L.C., a privately-held supplier of isolated switching, wireless charging and power management platforms targeted at, among other things, high and low power, high efficiency applications. Under the terms of the purchase agreement, the Company acquired all of the outstanding equity interest in Triune for a guaranteed minimum purchase price of \$45.0 million consisting of \$35.0 million in cash paid at closing, with an additional cash consideration of \$10.0 million of which \$9.5 million was paid in September 2015 and \$0.5 million was paid in the second quarter of fiscal year 2017. In March 2015, the Company borrowed \$35.0 million under its prior revolving line of credit in connection with this acquisition (see Note 10 for discussion regarding Credit Facilities).

Subject to achieving certain future financial goals (“Triune Earn-out”), up to \$70.0 million of contingent consideration will be paid over the next two years if certain net revenue targets are achieved in each of fiscal years 2017 and 2018. An additional payment of up to \$16.0 million will be paid after fiscal year 2018 if certain cumulative net revenue and contribution margin targets are achieved.

The Triune Earn-out targets for fiscal year 2016 were not met and the Company does not expect the fiscal year 2017 or 2018 targets to be achieved. The fair value of the Triune Earn-out liability was zero as of October 30, 2016. See Notes 7 and 12.

The Triune business meets the definition of a business and is accounted for under the acquisition method of accounting in accordance with the FASB’s ASC Topic 805, Business Combinations. The purchase price allocation for the Triune acquisition was finalized in the second quarter of fiscal year 2016. Total acquisition consideration has been allocated to the acquired tangible and intangible assets and assumed liabilities of Triune based on their respective estimated fair values as of the acquisition date. Acquisition-related transaction costs are not included as a component of consideration transferred, but are accounted for as an expense in the period in which the costs are incurred. Any excess of the acquisition consideration over the fair value of the assets acquired and liabilities assumed has been allocated to goodwill. The goodwill resulted from expected synergies from the transaction, including complementary products that will enhance the Company’s overall product portfolio, and opportunities within new markets. The Company expects that all such goodwill will be deductible for tax purposes.

The Company’s allocation of the total purchase price for Triune is summarized below:

	At
(in thousands)	March 4,
	2015
Current assets	\$877
Property, plant, and equipment, net	226
Core technologies	10,000
Customer relationships	2,000
Goodwill	49,384
Current liabilities	(1,287)
Earn-out liability	(16,200)
Total acquisition consideration	\$45,000

Triune’s technology complemented the portfolio of products offered in the Company’s legacy Power and High-Reliability reporting unit. The Company concluded that the Triune and legacy Power and High-Reliability components should be aggregated and deemed a single reporting unit after considering similarities among different economic characteristics such as concentration of key customers, unit selling price decreases, increased competitors due to market expansion and chain of command of the newly acquired business.

Net revenues and earnings attributable to Triune since the acquisition date have not been material. Pro forma results of operations have not been presented as Triune's annual operating results are not material to the Company's unaudited condensed consolidated financial statements.

EnVerv, Inc.

On January 13, 2015, the Company paid \$4.9 million to acquire selected assets from EnVerv, Inc., a privately-held supplier of power line communications and Smart Grid solutions targeted at advanced metering infrastructure, home energy management systems and IoT applications. The Company has concluded that the acquired assets constituted a business and accordingly accounted for this transaction as a business combination.

10

The purchase price allocation for the EnVerv acquisition was finalized in the first quarter of fiscal year 2016. Total acquisition consideration has been allocated to the acquired tangible and intangible assets and assumed liabilities based on their respective estimated fair values as of the acquisition date. The excess of the acquisition consideration over the fair value of assets acquired and liabilities assumed has been allocated to goodwill. As of January 25, 2015, \$1.4 million of the total acquisition consideration has been allocated to core technologies and \$3.4 million has been allocated to goodwill. The remaining balance has been allocated to acquired tangible assets and assumed liabilities. The Company expects that all such goodwill will be deductible for tax purposes. Net revenues and earnings attributable to EnVerv since the acquisition date have not been material. Pro forma results of operations have not been presented as EnVerv's annual operating results are not material to the Company's unaudited condensed consolidated financial statements.

Note 3: Earnings per Share

The computation of basic and diluted earnings per common share is as follows:

(in thousands, except per share amounts)	Three Months Ended		Nine Months Ended	
	October 30, 2016	October 25, 2015	October 30, 2016	October 25, 2015
Net income	\$30,776	\$ 10,704	\$46,642	\$ 10,250
Weighted average common shares outstanding - basic	65,549	65,117	65,331	65,920
Dilutive effect of options and restricted stock units	657	100	568	331
Weighted average common shares outstanding - diluted	66,206	65,217	65,899	66,251
Basic earnings per common share	\$0.47	\$ 0.16	\$0.71	\$ 0.16
Diluted earnings per common share	\$0.46	\$ 0.16	\$0.71	\$ 0.15

Anti-dilutive shares not included in the above calculations 989 3,728 1,498 2,392

Basic earnings per common share is computed by dividing net income available to common stockholders by the weighted-average number of shares of common stock outstanding during the reporting period. Diluted earnings per common share incorporate the incremental shares issuable, calculated using the treasury stock method, upon the assumed exercise of stock options and the vesting of restricted stock.

Note 4: Revenue Recognition

The Company recognizes product revenue when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable and collectability is probable. Recovery of costs associated with product design and engineering services are recognized during the period in which services are performed. The product design and engineering recovery, when recognized, will be reported as a reduction to product development and engineering expense. Historically, these recoveries have not exceeded the cost of the related development efforts.

The Company includes revenue related to technology licenses as part of "Net sales." Historically, revenue from these arrangements has not been significant though it is part of the Company's recurring ordinary business.

The Company defers revenue recognition on shipment of products to certain customers, principally distributors, under agreements which provide for limited pricing credits or return privileges, until these products are sold through to end users or the return privileges lapse. For sales subject to certain pricing credits or return privileges, the amount of future pricing credits or inventory returns cannot be reasonably estimated given the relatively long period in which a particular product may be held by the customer. Therefore, the Company has concluded that sales to customers under these agreements are not fixed and determinable at the date of the sale and revenue recognition has been deferred. The Company estimates the deferred gross margin on these sales by applying an average gross profit margin to the actual gross sales. The average gross profit margin is calculated for each category of material using standard costs which is expected to approximate actual costs at the date of sale. The estimated deferred gross margins on these sales, where there are no outstanding receivables, are recorded on the condensed consolidated balance sheets under the heading of "Deferred revenue."

The Company records a provision for estimated sales returns in the same period as the related revenues are recorded. The Company bases these estimates on historical sales returns and other known factors. Actual returns could be different from Company estimates and current provisions for sales returns and allowances, resulting in future charges to earnings. There were no significant impairments of deferred cost of sales in the third quarters of fiscal years 2017 or 2016.

The Company records a provision for sales rebates in the same period as the related revenues are recorded. These estimates are based on sales activity during the period. Actual rebates given could be different from our estimates and current provisions for sales rebates, resulting in future charges to earnings. The estimated sales rebates for sales activity during the period where there are no outstanding receivables are recorded on the condensed consolidated balance sheets under the heading of "Accrued liabilities." The portion of the estimated sales rebate where there are outstanding receivables is recorded on the balance sheet as a reduction to accounts receivable.

Note 5: Share-Based Compensation

Financial Statement Effects and Presentation. The following table summarizes pre-tax, share-based compensation included in the unaudited condensed consolidated statements of income for the three and nine months ended October 30, 2016 and October 25, 2015.

(in thousands)	Three Months Ended		Nine Months Ended	
	October 30, 2016	October 25, 2015	October 30, 2016	October 25, 2015
Revenue offset	\$3,669	\$ —	\$3,669	\$ —
Cost of sales	360	197	1,108	1,071
Selling, general and administrative	3,965	2,933	12,001	6,006
Product development and engineering	1,401	1,987	4,420	6,320
Share-based compensation	\$9,395	\$ 5,117	\$21,198	\$ 13,397
Net change in share-based compensation capitalized into inventory	\$124	\$ (233)	\$106	\$ 45

Grant Date Fair Values and Underlying Assumptions: Contractual Terms

The Company uses the Black-Scholes pricing model to value stock options. The estimated fair value of restricted stock units, for which vesting is not linked to a market condition, is calculated based on the market price of the Company's common stock on the date of grant. For restricted stock units that vest according to a market condition, the Company uses a Monte Carlo simulation model to value the award.

Some of the restricted stock units granted in the first nine months of fiscal year 2017 and prior years are classified as liabilities rather than equity. For grants classified as equity, share-based compensation is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the grantee's requisite service period. For grants classified as liabilities, share-based compensation is measured at fair value at the end of each reporting period until the date of settlement, and is recognized as an expense over the grantee's requisite service period. Expected volatilities are based on historical volatility using daily and monthly stock price observations.

The following table summarizes the assumptions used in the Black-Scholes model to determine the fair value of stock options granted in the three and nine months ended October 30, 2016 and October 25, 2015, respectively:

	Three Months Ended		Nine Months Ended	
	October 30, 2016	October 25, 2015	October 30, 2016	October 25, 2015
Expected lives, in years	4.2	4.2	4.1 - 4.5	4.2 - 4.3
Estimated volatility	32%	32%	32%	29% - 32%
Dividend yield	—	—	—	—
Risk-free interest rate	1.0%	1.3%	1.1% - 1.3%	1.24% - 1.29%
Weighted average fair value on grant date	\$7.10	\$4.80	\$5.67	\$6.09

Stock Options. The Company has historically granted stock options to both employees and non-employee directors. The fair values of these grants were measured on the grant date. The grant dates for these awards are equal to the measurement date. These awards are valued as of the measurement date and recognized as an expense over the requisite vesting period (typically 3-4 years).

The following table summarizes the activity for stock options for the nine months ended October 30, 2016:

(in thousands, except for per share amounts)	Number of Shares	Weighted Average Exercise Price (per share)	Aggregate Intrinsic Value	Aggregate Unrecognized Compensation	Number of Shares Exercisable	Weighted Average Contractual Term (in years)
Balance at January 31, 2016	1,507	\$ 25.18	\$ 962	\$ 3,748	775	
Options granted	356	20.58				
Options exercised	(86)	19.17	482			
Options cancelled/forfeited	(95)	22.10				
Balance at October 30, 2016	1,682	\$ 24.69	\$ 3,419	\$ 3,796	902	
Exercisable at October 30, 2016	902	\$ 26.30	\$ 873			2.3

Performance-Based Restricted Stock Units. The Company grants performance-based restricted stock units to select employees. These awards have a performance condition in addition to a service condition. The performance metrics are determined based on a pre-defined cumulative three-year performance of the Company's net revenue and non-GAAP operating income measured against internal goals. The performance award which is granted in any fiscal year will be tied to the Company's performance of that fiscal year and the succeeding two fiscal years. The performance award recipients must be employed for the entire three-year period, which is the explicit service and requisite service period, and be an active employee at the time of vesting of the awards (cliff vesting at the end of the third year). Under the terms of these awards, assuming the highest performance level of 200% with no cancellations due to forfeitures, the maximum number of shares that can be earned would be 582,032 shares and an additional 582,032 shares would be settled in cash. The Company would have a liability accrued under "Other liabilities" within the condensed consolidated balance sheets equal to the value of 582,032 shares on the settlement date, which would be settled in cash. Only cash performance-based restricted stock unit awards are classified as liabilities and the value of these awards is re-measured at each reporting date. At October 30, 2016, the performance metrics associated with the outstanding awards issued in fiscal years 2017 and 2016 are expected to be met at a level which would result in a grant at 190% and 0% of target, respectively.

In the first quarter of fiscal year 2016, the Company granted performance-based vesting restricted stock units to select employees as part of the EnVerv acquisition. These awards have a performance condition in addition to a service condition. The performance metrics are determined based on a pre-defined net revenue target. In addition to the performance vesting condition, these awards have a requisite four year vesting term (which is also the requisite vesting period) whereby 25% will vest, subject to attainment of the performance condition, on each anniversary of the grant date. Under the terms of these awards, assuming the highest performance level of 100% with no cancellations due to forfeitures, the maximum number of shares that can be earned would be 24,000. At October 30, 2016, the performance metrics associated with the outstanding awards issued in fiscal year 2016 are not expected to be met which would result in none of the shares being issued.

The performance-based restricted stock units are valued as of the measurement date and expense is recognized on a straight line basis for the awards expected to vest based on the probability of attainment of the performance condition for each separately vesting portion of the award.

The following table summarizes the activity for performance-based restricted stock units for the nine months ended October 30, 2016:

(in thousands, except for per unit amounts)	Total Units	Subject to Share Settlement Units	Subject to Cash Settlement Units	Recorded Liability	Weighted Average Grant Date Fair Value (per unit)	Aggregate Unrecognized Compensation	Weighted Average Period Over Which Expected to be Recognized (in years)
Balance at January 31, 2016	384	203	181	\$ 237	\$ 26.57	\$ 1,925	1.5
Performance-based units granted	231	116	115		17.51		
Performance-based units vested	—	—	—		—		
Performance-based units cancelled/forfeited	(12)	(6)	(6)		17.51		
Change in liability				621			
Balance at October 30, 2016	603	313	290	\$ 858	\$ 23.29	\$ 7,989	1.3

Changes in the liability associated with performance-based restricted stock units, which is recorded in “Other long-term liabilities” within the condensed consolidated balance sheets, is due to changes in proportionate vesting and estimated forfeitures, re-measurement adjustments related to changes in market value and changes in the expected performance results.

Market Performance Restricted Stock Units. On February 26, 2014, the Company granted its CEO restricted stock units with a market performance condition. The award is eligible to vest during the period commencing February 26, 2014 and ending February 26, 2019 (the “Performance Period”) as follows: 30% of the restricted stock units covered by the award will vest if, during any consecutive 120 calendar day period that commences and ends during the Performance Period, the average per-share closing price of the Company’s common stock equals or exceeds \$35.00 (“Tranche 1”) and the award will vest in full if, during any consecutive 120 calendar day period that commences and ends during the Performance Period, the average per-share closing price of the Company’s common stock equals or exceeds \$40.00 (“Tranche 2”). The award will also vest if a majority change in control of the Company occurs during the Performance Period and, in connection with such event, the Company’s stockholders become entitled to receive per-share consideration having a value equal to or greater than \$40.00. The fair value of the awards was determined to be \$17.26 and \$14.88 for Tranche 1 and Tranche 2, respectively, on the grant date by application of the Monte Carlo simulation model.

The following table summarizes the activity for market performance restricted stock units for the nine months ended October 30, 2016:

(in thousands, except for per unit amounts)	Total Units	Weighted Average Grant Date Fair Value (per unit)	Aggregate Unrecognized Compensation	Period Over Which Expected to be Recognized (in years)
Balance at January 31, 2016	220	\$ 15.59	\$ 143	0.1
Market performance units granted	—	—		
Market performance units vested	—	—		
Market performance units cancelled/forfeited	—	—		
Balance at October 30, 2016	220	\$ 15.59	\$ —	0.0

Restricted Stock Units, Employees. The Company grants restricted stock units to employees which are expected to be settled with stock. The grant date for these awards is equal to the measurement date. These awards are valued as of the measurement date and recognized as an expense over the requisite vesting period (typically 4 years).

The following table summarizes the employees' restricted stock unit activity for the nine months ended October 30, 2016:

(in thousands, except for per unit amounts)	Number of Units	Weighted Average Grant Date Fair Value (per unit)	Aggregate Intrinsic Value (1)	Aggregate Unrecognized Compensation	Weighted Average Period Over Which Expected to be Recognized (in years)
Balance at January 31, 2016	2,032	\$ 23.70		\$ 35,692	2.4
Restricted stock units granted	1,147	21.76			
Restricted stock units vested	(714)	25.28	\$ 16,134		
Restricted stock units forfeited	(270)	20.77			
Balance at October 30, 2016	2,195	\$ 22.53		\$ 41,348	2.6

(1) Reflects the value of Semtech Corporation stock on the date that the restricted stock unit vested.

Restricted Stock Units, Cash Settled, Non-Employee Directors. The Company maintains a compensation program pursuant to which restricted stock units are granted to the Company's directors that are not employed by the Company or any of its subsidiaries. In June 2015, the Company changed its director compensation program so that a portion of the restricted stock units granted under the program would be settled in cash and a portion would be settled in stock. Restricted stock units awarded under the program are scheduled to vest on the earlier of (i) one year after the grant date or (ii) the day immediately preceding the annual meeting of shareholders in the year following the grant. The portion of a restricted stock unit award under the program that is to be settled in cash will, subject to vesting, be settled when the director who received the award separates from the board of directors. The portion of a restricted stock unit award under the program that is to be settled in stock will, subject to vesting, be settled promptly following vesting. There were no changes to the terms and conditions of the existing awards.

The restricted stock units that are to be settled in cash are accounted for as liabilities. Because these awards are not typically settled until a non-employee director's separation from service, the value of these awards is re-measured at the end of each reporting period until settlement. The following table summarizes the non-employee directors' activity for restricted stock units settled in cash for the nine months ended October 30, 2016:

(in thousands, except for per unit amounts)	Number of Units	Recorded Liability	Weighted Average Grant Date Fair Value (per unit)	Aggregate Unrecognized Compensation	Period Over Which Expected to be Recognized (in years)
Balance at January 31, 2016	28	\$ 3,870	\$ 19.70	\$ 221	0.4
Restricted stock units granted	25		23.40		
Restricted stock units vested	(30)		19.65		
Restricted stock units forfeited	—		—		
Change in liability		502			
Balance at October 30, 2016	23	\$ 4,372	\$ 23.67	\$ 403	0.6

As of October 30, 2016, the total number of vested but unsettled restricted stock units for non-employee directors is 173,657 units. As of October 30, 2016, \$4.4 million of the liability associated with these awards is included in "Other long-term liabilities" within the condensed consolidated balance sheets.

Restricted Stock Units, Stock Settled, Non-Employee Directors. As a result of the June 2015 changes to the Company's director compensation program, beginning in July 2015, the Company began granting new restricted stock units to non-employee directors which are expected to be settled with stock at the time of vesting. The grant date for these awards is equal to the measurement date. These awards are valued as of the measurement date and recognized as an expense over the requisite vesting period (typically one year).

The following table summarizes the non-employee directors' activity for restricted stock units settled with stock for the nine months ended October 30, 2016:

(in thousands, except for per unit amounts)	Number of Units	Weighted Average Grant Date Fair Value (per unit)	Aggregate Intrinsic Value (1)	Aggregate Unrecognized Compensation	Period Over Which Expected to be Recognized (in years)
Balance at January 31, 2016	24	\$ 19.70		\$ 186	0.4
Restricted stock units granted	21	23.40			
Restricted stock units vested	(25)	24.16	\$ 616		
Restricted stock units forfeited	—	—			
Balance at October 30, 2016	20	\$ 23.67		\$ 312	0.6

(1) Reflects the value of Semtech Corporation stock on the date that the restricted stock unit vested.

Modification of Awards

On December 19, 2014 and August 17, 2015, the Company modified the equity awards of certain executive officers by providing for the acceleration of vesting upon termination of their employment in certain circumstances in connection with a change in control of the Company. These modifications impacted the stock awards of 12 executive employees and resulted in no incremental compensation cost for the fiscal year ended January 31, 2016 or the three or nine month periods ended October 30, 2016 and October 25, 2015.

Warrant. On October 5, 2016 the Company issued a warrant (the "Warrant") to Comcast Cable Communications Management LLC ("Comcast") to purchase up to 1,086,957 shares (the "Warrant Shares") of the Company's common stock, par value \$0.01 per share, representing a total of \$30.0 million worth of common stock based on the average closing price over the 10-trading day period ending October 4, 2016, at an exercise price of \$0.01 per Warrant Share. The Warrant provides for net share settlement that, if elected by Comcast, will reduce the number of Warrant Shares issued upon exercise to reflect net settlement of the exercise price. Comcast may also request cash settlement of the Warrant upon exercise in lieu of the issuance of Warrant Shares; however, such cash settlement is at the sole and absolute discretion of the Company. The Warrant vested 10% on its issuance, and the remainder vests based on the achievement during the subsequent 30-month period ("Milestone Period") by Comcast (or its designee) of certain milestones related to the deployment of a LoRaWAN™-based network in cities around the country. The number of Warrant Shares are subject to customary adjustment provisions for stock split, reclassification, reorganization, consolidation, merger, and similar transactions. The Warrant has a term of seven years from October 5, 2016.

The Warrant was issued by the Company to Comcast in connection with an agreement between the parties regarding the intended trial deployment by Comcast of a low-power wide-area Network (LPWAN) in the United States, based on the Company's LoRa® Wireless Radio Frequency Technology.

The Warrant is accounted for as equity. The cost of the Warrant is recognized as an offset to net sales over the respective performance period. The Warrant consists of five performance tranches. The cost associated with each tranche is recognized based on the fair value at each reporting date until vesting which is the measurement date.

The following table summarizes the underlying Warrant Shares issued to Comcast for the nine months ended October 30, 2016:

(in thousands, except for per Warrant Share amounts)	Number of Warrant Shares	Weighted Average Grant Date Fair Value (per Warrant Share)	Aggregate Intrinsic Value (1)	Aggregate Unrecognized Expense
Balance at January 31, 2016	—	\$ —	—	\$ —
Warrant shares granted	1,087	27.74		
Warrant shares vested	(109)	27.74	\$ 3,015	
Change in value	—	—		23,674
Balance at October 30, 2016	978	\$ 27.74		\$ 23,674

(1) Reflects the value of Semtech Corporation Warrant Shares on the date the Warrant Shares vested.

Given the nominal exercise price of the Warrant Shares, the Company valued the awards using the closing price of the Company's stock on the measurement date for shares that have vested and the fair value on the condensed consolidated balance sheets date for the other shares. As of October 30, 2016, no part of the Warrant has been exercised, and the Warrant has an estimated life of seven years.

Note 6: Investments

Investments that have original maturities of three months or less are accounted for as cash equivalents. This includes money market funds, time deposits and United States (“U.S.”) government obligations. Temporary and long-term investments consist of government, bank and corporate obligations, with original maturity dates in excess of three months. Temporary investments have original maturities in excess of three months, but mature within twelve months of the balance sheet date. Long-term investments have original maturities in excess of twelve months. The Company determines the cost of securities sold based on the specific identification method. Realized gains or losses are reported in “Non-operating expense, net” within the unaudited condensed consolidated statements of income.

The Company classifies its investments as “available-for-sale” because it may sell some securities prior to maturity. The Company’s investments are subject to market risk, primarily interest rate and credit risks. The Company’s investments are managed by a limited number of outside professional managers that operate within investment guidelines set by the Company. These guidelines include specified permissible investments, minimum credit quality ratings and maximum average duration restrictions and are intended to limit market risk by restricting the Company’s investments to high quality debt instruments with relatively short-term maturities.

As of October 30, 2016, the Company did not have any long-term investments.

The following table summarizes the Company’s available-for-sale investments:

	October 30, 2016		January 31, 2016			
(in thousands)	Market Value	Adjusted Value Cost	Gross Unrealized Gain	Market Value	Adjusted Value Cost	Gross Unrealized Gain
Cash equivalents	\$ 16,908	\$ 16,908	\$ —	—\$ 16,866	\$ 16,866	\$ —
Total investments	\$ 16,908	\$ 16,908	\$ —	—\$ 16,866	\$ 16,866	\$ —

The following table summarizes the maturities of the Company’s available-for-sale investments:

	October 30, 2016		January 31, 2016	
(in thousands)	Market Value	Adjusted Cost	Market Value	Adjusted Cost
Within 1 year	\$ 16,908	\$ 16,908	\$ 16,866	\$ 16,866
After 1 year through 5 years	—	—	—	—
Total investments	\$ 16,908	\$ 16,908	\$ 16,866	\$ 16,866

Unrealized gains and losses are the result of fluctuations in the market value of the Company’s available-for-sale investments and are included in “Accumulated other comprehensive income” within the condensed consolidated balance sheets. The following table summarizes net unrealized losses arising in the periods presented in addition to the tax associated with these comprehensive income items:

	Three Months Ended October 30, 2016		Nine Months Ended October 25, 2015	
(in thousands)	October 30, 2016	October 25, 2015	October 30, 2016	October 25, 2015
Unrealized gain (loss), net of tax	\$ —	\$ 129	\$(85)	\$ 266
Increase to deferred tax liability	—	74	—	172

The Company did not generate any significant interest income in the three or nine month periods ended October 30, 2016 and October 25, 2015.

Equity and Cost Method Investments

The Company accounts for its equity investments under the cost method of accounting when it does not have the ability to exercise significant influence over the investees. For investments where the Company has the ability to exercise significant influence, it uses the equity method of accounting. The Company’s total equity and cost method investments were \$22.2 million and \$20.2 million as of October 30, 2016 and January 31, 2016. All of these investments are in private companies and are included in “Other assets” within the condensed consolidated balance sheets.

The Company has the following investments which are accounted for as cost method investments:

Entity Name	Investment Value
-------------	------------------

(in thousands)	October 30, 2016	January 31, 2016
MultiPhy Ltd.	\$14,000	\$ 12,000
Skorpios Technologies Inc.	3,000	3,000
Guangdong Dapu Telecom Technology Co., Ltd.	3,300	3,300
Senet, Inc.	1,900	1,900
Jariet Technologies Inc.	—	—
Total	\$22,200	\$ 20,200

The Company evaluated its cost method investments for indicators of impairment at October 30, 2016. The Company did not identify any events or changes in circumstances that may have a significant adverse effect on the fair value of the investments and as a result did not estimate the fair value of its investments.

On January 11, 2016, the Company announced that it had entered into a strategic agreement to accelerate the introduction of a 100Gbps single wavelength optical module solution. As part of this agreement, the Company made an investment under which the Company acquired preferred stock and a call option that is exercisable through June 30, 2018, that would allow the Company to purchase all of the outstanding equity of MultiPhy Ltd. (“MultiPhy”) at a fixed price. The Company does not expect to exercise this option within the next twelve months.

Note 7: Fair Value Measurements

Instruments Measured at Fair Value on a Recurring Basis

Financial assets and liabilities measured and recorded at fair value on a recurring basis were presented within the Company's condensed consolidated balance sheets as follows:

(in thousands)	Fair Value as of October 30, 2016				Fair Value as of January 31, 2016			
	Total	(Level 1)	(Level 2)	(Level 3)	Total	(Level 1)	(Level 2)	(Level 3)
Financial assets:								
Cash equivalents	\$16,908	\$16,908	\$—	\$—	\$16,866	\$16,866	\$—	\$—
Derivative financial instruments	215	—	215	—	—	—	—	—
Total financial assets	\$17,123	\$16,908	\$215	\$—	\$16,866	\$16,866	\$—	\$—
Financial liabilities:								
Triune Earn-out	\$—	\$—	\$—	\$—	\$—	\$—	\$—	\$—
Cycleo Earn-out	1,295	—	—	1,295	1,457	—	—	1,457
Derivative financial instruments	445	—	445	—	—	—	—	—
Total financial liabilities	\$1,740	\$—	\$445	\$1,295	\$1,457	\$—	\$—	\$1,457

During the nine months ended October 30, 2016, the Company had no transfers of financial assets or liabilities between Level 1, Level 2 or Level 3. As of October 30, 2016 and January 31, 2016, the Company had not elected the fair value option for any financial assets and liabilities for which such an election would have been permitted.

The Company's available-for-sale securities consist primarily of money market accounts that do not have a stated maturity date.

The fair values of the foreign exchange forward contracts are valued using Level 2 inputs. Foreign currency forward contracts are valued using readily available foreign currency forward and interest rate curves. The fair value of each contract is determined by comparing the contract rate to the forward rate and discounting to the present value. Contracts in a gain position are recorded in the condensed consolidated balance sheets under the caption "Other current assets" and the value of contracts in a loss position are recorded under the caption "Accrued liabilities" within the condensed consolidated balance sheets. Please see Note 19 for further discussion of the Company's derivative instruments.

The Triune Earn-out liability is valued utilizing estimates of annual revenue and operating income (Level 3 inputs) during a period of approximately two-years ending January 2018. These estimates represent inputs for which market data are not available and are developed using the best information available about the assumptions that market participants would use when pricing the liability.

The Cycleo Earn-out liability (see "Earn-out Liability" in Note 12) is valued utilizing estimates of annual revenue and operating income (Level 3 inputs) during a four-year period ending April 2020. These estimates represent inputs for which market data are not available and are developed using the best information available about the assumptions that market participants would use when pricing the liability.

The Company measures contingent earn-out liabilities at fair value on a recurring basis using significant unobservable inputs classified within Level 3 of the fair value hierarchy. The Company uses a Monte Carlo valuation method as a valuation technique to determine the value of the earn-out liability. The significant unobservable inputs used in the fair value measurements are revenue projections over the earn-out period, and the probability outcome percentages assigned to each scenario. Significant increases or decreases to either of these inputs in isolation would result in a significantly higher or lower liability, with a higher liability capped by the contractual maximum of the contingent earn-out obligation. Ultimately, the liability will be equivalent to the amount paid, and the difference between the fair value estimate and amount paid will be recorded in earnings. For both the Triune Earn-out and Cycleo Earn-out, these companies have business profiles comparable to a start-up company. Accordingly, their respective revenue projections are subject to significant revisions. This characteristic has resulted in volatile changes to the measurement of fair value of the Triune Earn-out since the time of the Triune acquisition.

The Company reviews and re-assesses the estimated fair value of contingent consideration on a quarterly basis, and the updated fair value could differ materially from the previous estimates. Changes in the estimated fair value of the Company's contingent earn-out liabilities related to the time component of the present value calculation are reported in "Interest expense" within the unaudited condensed consolidated statements of income. Adjustments to the estimated fair value related to changes in all other unobservable inputs are reported in operating income.

21

A reconciliation of the change in the earn-out liability during the nine months ended October 30, 2016 is as follows:

(in thousands)	Cycleo	Triune	Total
Balance at January 31, 2016	\$1,457	\$ —	—\$1,457
Changes in the fair value of contingent earn-out obligations	(162)	—	(162)
Balance as of October 30, 2016	\$1,295	\$ —	—\$1,295

Instruments Not Recorded at Fair Value on a Recurring Basis

Some of the Company's financial instruments are not measured at fair value on a recurring basis but are recorded at amounts that approximate fair value due to their liquid or short-term nature. Such financial assets and financial liabilities include: cash and cash equivalents, net receivables, certain other assets, accounts payable, accrued expenses, accrued personnel costs, and other current liabilities.

The Company's long-term debt is not recorded at fair value on a recurring basis, but is measured at fair value for disclosure purposes. The fair value of the Company's Term Loans (as defined in Note 10) is \$67.8 million and \$77.1 million and Revolving Commitments (as defined in Note 10) is \$181.0 million as of both October 30, 2016 and January 31, 2016, respectively. These are based on Level 2 inputs which are derived from transactions with similar amounts, maturities, credit ratings and payment terms.

Assets and Liabilities Recorded at Fair Value on a Non-Recurring Basis

The Company reduces the carrying amounts of its goodwill, intangible assets, long-lived assets and non-marketable equity securities to fair value when held for sale or determined to be impaired.

For its investment in equity interests, the Company has not identified events or changes in circumstances that may have a significant adverse effect on the fair value of its equity investments during the first nine months of fiscal year 2017.

Note 8: Inventories

Inventories, consisting of material, material overhead, labor, and manufacturing overhead, are stated at the lower of cost (first-in, first-out) or market and consist of the following:

(in thousands)	October 30, 2016	January 31, 2016
Raw materials	\$ 3,342	\$ 2,094
Work in progress	40,731	40,940
Finished goods	18,606	20,841
Inventories	\$ 62,679	\$ 63,875

Note 9: Goodwill and Intangible Assets

Goodwill – Changes in the carrying amount of goodwill were as follows:

(in thousands)	Signal Integrity	Power and High Reliability	Wireless and Sensing	Total
Balance at January 31, 2016	\$261,891	\$49,384	\$18,428	\$329,703
Additions	—	—	—	—
Balance at October 30, 2016	\$261,891	\$49,384	\$18,428	\$329,703

Goodwill is not amortized, but is tested for impairment using a two-step method on an annual basis and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The recoverability of goodwill is measured at the reporting unit level by comparing the reporting unit's carrying amount, including goodwill, to the fair market value of the reporting unit.

Goodwill is allocated to three reporting units (Signal Integrity, Power and High Reliability and Wireless and Sensing) (see Note 14). The difference between the fair value and the carrying amount of these reporting units is one of several factors the Company will consider before reaching its conclusion about whether to perform the first step of the goodwill impairment test.

Goodwill was tested for impairment as of November 30, 2015, the date of the Company's annual impairment review, at the reporting unit level for Signal Integrity, Power and High Reliability and Wireless and Sensing. The Company estimated the fair values using an income approach, as well as other generally accepted valuation methodologies. The cash flows for each reporting unit were based on discrete financial forecasts developed by management for planning purposes. Cash flows beyond the discrete forecasts were estimated using a terminal value calculation, which incorporated historical and forecasted financial trends for each identified reporting unit and considered perpetual earnings growth rates for publicly traded peer companies.

Goodwill is measured at fair value on a non-recurring basis. That is, goodwill is not measured at fair value on an ongoing basis, but is subject to fair value adjustments using Level 3 inputs in certain circumstances (e.g., when there is evidence of impairment). At October 30, 2016, the Company concluded that there were no indicators of such impairment.

Purchased Intangibles – The following table sets forth the Company's finite-lived intangible assets resulting from business acquisitions and technology licenses purchased, which continue to be amortized:

(in thousands)	Estimated Useful Life	October 30, 2016			January 31, 2016		
		Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Core technologies	5-8 years	\$144,930	\$(87,753)	\$57,177	\$148,210	\$(74,006)	\$74,204
Customer relationships	5-10 years	30,030	(19,147)	10,883	30,030	(15,847)	14,183
Technology licenses (1)	2 years	100	(96)	4	100	(57)	43
Other intangibles assets	1-5 years	6,600	(6,600)	—	6,600	(6,600)	—
Total finite-lived intangible assets		\$181,660	\$(113,596)	\$68,064	\$184,940	\$(96,510)	\$88,430

Technology licenses relate to end-license agreements for intellectual property that is used by the Company in research and development activities and also has alternative future uses. Amortization expense related to technology licenses is reported as "Product development and engineering" within the unaudited condensed consolidated statements of income.

For the three months ended October 30, 2016 and October 25, 2015, amortization expense related to acquired finite-lived intangible assets was \$6.3 million and \$6.3 million, respectively. For the nine months ended October 30, 2016 and October 25, 2015, amortization expense related to acquired finite-lived intangible assets was \$19.0 million and \$18.6 million, respectively. Amortization expense related to acquired finite-lived intangible assets is reported as "Intangible amortization" within the unaudited condensed consolidated statements of income.

The estimated annual amount of future amortization expense for all finite-lived intangible assets will be as follows:
(in thousands)

To be recognized in:	Core Technologies	Customer Relationships	Technology Licenses	Total
Remaining three months of fiscal year 2017	\$ 5,188	\$ 1,100	\$ 4	\$6,292
Fiscal year 2018	20,744	4,400	—	25,144
Fiscal year 2019	17,332	4,400	—	21,732
Fiscal year 2020	9,905	950	—	10,855
Fiscal year 2021	3,056	33	—	3,089
Thereafter	952	—	—	952
Total expected amortization expense	\$ 57,177	\$ 10,883	\$ 4	\$68,064

As of October 30, 2016, the Company had no intangible assets classified as having an indefinite life.

Note 10: Credit Facilities

On May 2, 2013, Semtech Corporation, with each of its domestic subsidiaries as guarantors (the “Prior Guarantors”), entered into a credit agreement (the “Prior Credit Agreement”) with the lenders referred to therein (the “Prior Lenders”) and HSBC Bank USA, National Association, as administrative agent and as swing line lender and letter of credit issuer. In accordance with the Prior Credit Agreement, the Prior Lenders provided Semtech Corporation with senior secured first lien credit facilities in an aggregate principal amount of \$400.0 million for a five year term, consisting of term loans in an aggregate initial principal amount of \$150.0 million (the “Prior Term Loans”) and revolving credit commitments in an aggregate principal amount of \$250.0 million (the “Prior Revolving Commitments”). The Prior Revolving Commitments contained sub-facilities that could be used as follows: up to \$40.0 million for letters of credit, up to \$25.0 million for Swing Line Loans (as defined below), and up to \$40.0 million for revolving loans and letters of credit in certain currencies other than U.S. Dollars (“Alternative Currencies”). “Swing Line Loans” refer to Base Rate (as defined below) loans made in immediately available funds denominated in dollars by the swing line lender in its sole and absolute discretion. As of October 30, 2016, there were no amounts outstanding under the letters of credit, Swing Line Loans, and Alternative Currencies.

Interest on loans made under the Prior Credit Agreement in U.S. Dollars accrued, at Semtech’s option, at a rate per annum equal to (1) the Base Rate plus a margin ranging from 0.25% to 1.25% depending upon Semtech’s consolidated leverage ratio or (2) London Interbank Offered Rate (“LIBOR”) (determined with respect to deposits in U.S. Dollars) for an interest period to be selected by Semtech plus a margin ranging from 1.25% to 2.25% depending upon Semtech’s consolidated leverage ratio. The “Base Rate” is equal to a fluctuating rate equal to the highest of (a) the prime rate (as published by The Wall Street Journal), (b) ½ of 1% above the federal funds effective rate or (c) one-month LIBOR (determined with respect to deposits in U.S. Dollars) plus 1%. Interest on loans in Alternative Currencies, other than Canadian Dollars, accrued at a rate per annum equal to LIBOR (determined with respect to deposits in the applicable Alternative Currency) for an interest period to be selected by Semtech plus a margin ranging from 1.25% to 2.25% depending upon Semtech’s consolidated leverage ratio. Interest on loans in Canadian Dollars accrued at a rate per annum equal to the CDOR Rate (as defined below) for an interest period to be selected by Semtech plus a margin ranging from 1.25% to 2.25% depending upon Semtech’s consolidated leverage ratio. The “CDOR Rate” for any interest period is the rate equal to the sum of: (a) the rate determined by the administrative agent with reference to the arithmetic average of the discount rate quotations of all institutions listed for CAD Dollar-denominated bankers’ acceptances displayed and identified on the “Reuters Screen CDOR Page” and (b) 0.10% per annum. CDOR Commitment fees on the unused portion of the Prior Revolving Commitments accrued at a rate per annum ranging from 0.20% to 0.45% depending upon Semtech’s consolidated leverage ratio. Interest was payable monthly for a Base Rate loan and swing line loan and quarterly for a Euro dollar rate loan. As of October 30, 2016, the interest rates payable on both the Prior Term Loans and the Prior Revolving Commitments was 2.28%.

As of October 30, 2016, there was \$67.8 million outstanding under the Prior Term Loans and \$181.0 million in revolving loans outstanding pursuant to the Prior Revolving Commitments. The Prior Term Loans and the Prior Revolving Commitments (and related revolving loans) were scheduled to mature on May 1, 2018.

All obligations of Semtech Corporation under the Prior Credit Agreement were unconditionally guaranteed by each of the Prior Guarantors and were secured by a first priority security interest in substantially all of the assets of Semtech Corporation and the Prior Guarantors, subject to certain customary exceptions.

Semtech Corporation and the Prior Guarantors were subject to customary covenants under the Prior Credit Agreement, including the maintenance of a minimum interest ratio of 3.50 to 1.00 and a maximum total consolidated leverage ratio of 3.00 to 1.00. Semtech Corporation and the Prior Guarantors were in compliance with such financial covenants as of October 30, 2016.

The Prior Credit Agreement also contained customary provisions pertaining to events of default. If any event of default had occurred, the principal, interest, and any other monetary obligations on all the then outstanding amounts could have become due and payable immediately.

On November 15, 2016, the Company, with each of its domestic subsidiaries as guarantors, entered into an amended and restated credit agreement (the “Amended and Restated Credit Agreement”) with the lenders referred to therein (the “Lenders”) and HSBC Bank USA, National Association, as administrative agent and as swing line lender and letter of credit issuer. The Amended and Restated Credit Agreement consists of a senior secured term A loan facility in the principal amount of \$150.0 million and a senior secured revolving credit facility in the principal amount of \$250.0 million, each of which is scheduled to mature in November 2021. The Amended and Restated Credit Agreement amended and restated the Prior Credit Agreement that was scheduled to mature in May of 2018 (see Note 20 for discussion regarding Subsequent Events).

Note 11: Income Taxes

The Company's effective tax rate differs from the statutory federal income tax rate of 35% due primarily to regional mix of income, valuation allowances in the U.S., and certain undistributed foreign earnings for which no U.S. taxes are provided because such earnings are intended to be indefinitely reinvested outside of the U.S.

The Company uses a two-step approach to recognize and measure uncertain tax positions ("UTP"). The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon ultimate settlement.

A reconciliation of the beginning and ending amount of net unrecognized tax benefits is as follows:

(in thousands)

Balance at January 31, 2016	\$8,432
Additions based on tax positions related to the current year	80
Reductions for tax positions of prior years, net	(121)
Reductions for settlements with tax authorities	—
Balance as of October 30, 2016	\$8,391

The gross unrecognized tax benefit (before federal impact of state items) was \$10.6 million at both October 30, 2016 and January 31, 2016. Included in the balance of unrecognized tax benefits at October 30, 2016 and January 31, 2016, is \$8.4 million and \$8.4 million of net tax benefit (after federal impact of state items), respectively, that, if recognized, would impact the effective tax rate, subject to the valuation allowance.

The liability for UTP is reflected within the condensed consolidated balance sheets as follows:

(in thousands)	October 30, January 31,	
	2016	2016
Deferred tax assets - non-current	\$ 7,121	\$ 7,162
Other long-term liabilities	1,270	1,270
Total accrued taxes	\$ 8,391	\$ 8,432

The Company's policy is to include net interest and penalties related to unrecognized tax benefits within the provision for taxes within the unaudited condensed consolidated statements of income. The Company had approximately \$293,000 of net interest and penalties accrued at October 30, 2016 and January 31, 2016.

Tax years prior to 2012 (the Company's fiscal year 2013) are generally not subject to examination by the U.S. Internal Revenue Service ("IRS") except for items involving tax attributes that have been carried forward to tax years whose statute of limitations remains open. The Company is currently under IRS audit for fiscal years 2012 and 2013 and expects to close those audits within the next twelve months. The Company's reserves for UTP's are expected to be sufficient to address matters that may arise under examination. For state returns, the Company is generally not subject to income tax examinations for years prior to 2011 (the Company's fiscal year 2012). The Company has a significant tax presence in Switzerland for which Swiss tax filings have been examined through fiscal year 2015. The Company is also subject to routine examinations by various foreign tax jurisdictions in which it operates.

Note 12: Commitments and Contingencies

In accordance with accounting standards regarding loss contingencies, the Company accrues an undiscounted liability for those contingencies where the incurrence of a loss is probable and the amount can be reasonably estimated. The Company also discloses the amount accrued and the amount of a reasonably possible loss in excess of the amount accrued, if such disclosure is necessary for its financial statements not to be misleading. The Company does not record liabilities when the likelihood that the liability has been incurred is probable but the amount cannot be reasonably estimated, or when the liability is believed to be only reasonably possible or remote. The Company evaluates at least quarterly, developments in its legal matters that could affect the amount of liability that has been previously accrued, and makes adjustments as appropriate. Significant judgment is required to determine both probability and the estimated amount. The Company may be unable to estimate a possible loss or range of possible loss due to various reasons, including, among others: (i) if the damages sought are indeterminate; (ii) if the proceedings are in early stages, (iii) if there is uncertainty as to the outcome of pending appeals, motions or settlements, (iv) if there are significant factual issues to be determined or resolved, and (v) if there are novel or unsettled legal theories presented. In such instances, there is considerable uncertainty regarding the ultimate resolution of such matters, including a possible eventual loss, if any.

From time to time, the Company is involved in various claims, litigation, and other legal actions that are normal to the nature of its business, including with respect to intellectual property, contract, product liability, employment, and environmental matters. The Company's evaluation of legal matters and proceedings often involves a series of complex assessments by management about future events and can rely heavily on estimates and assumptions. While the consequences of certain unresolved matters and proceedings are not presently determinable, and an estimate of the probable and reasonably possible loss or range of loss in excess of amounts accrued for such proceedings cannot be reasonably made, an adverse outcome from such proceedings could have a material adverse effect on the Company's earnings in any given reporting period. However, in the opinion of management, after consulting with legal counsel, and taking into account insurance coverage, any ultimate liability related to current outstanding claims and lawsuits, individually or in the aggregate, is not expected to have a material adverse effect on the Company's financial statements, as a whole. However, legal matters are inherently unpredictable and subject to significant uncertainties, some of which are beyond the Company's control. As such, even though the Company intends to vigorously defend itself with respect to its legal matters, there can be no assurance that the final outcome of these matters will not materially and adversely affect the Company's business, financial condition, results of operations, or cash flows.

The Company's currently pending legal matters of note are discussed below:

Environmental Matters

In 2001, the Company was notified by the California Department of Toxic Substances Control ("State") that it may have liability associated with the clean-up of the one-third acre Davis Chemical Company site in Los Angeles, California. The Company has been included in the clean-up program because it was one of the companies that used the Davis Chemical Company site for waste recycling and/or disposal between 1949 and 1990. The Company joined with other potentially responsible parties that sent acetone to the site and entered into a Consent Order with the State that required the group to perform a soils investigation at the site and submit a remediation plan. The State has approved the remediation plan, which addressed the group's initial obligations under the Consent Order. The Consent Order does not require the group to remediate the site and the State has indicated it intends to look to other parties for remediation. To date, the Company's share of the group's expenses has not been material and has been expensed as incurred. There is a pending settlement offer that would potentially resolve most, if not all, of the acetone group's potential liability. More recently, the State has indicated that it will pursue a smaller group of parties for additional remediation and/or costs, in particular parties the State alleges provided chlorinated solvents for recycling, including the Company. Due to the fact that there are fewer parties that are alleged to have provided chlorinated solvent wastes, the potential share of this alleged liability is much larger than the Company's share of acetone group potential liability. Settlement discussions regarding the potential liability for chlorinated solvents at the site have recently been initiated,

but it is too soon to tell if those discussions will lead to a negotiated resolution of the issues.

The Company has used an environmental firm, specializing in hydrogeology, to perform monitoring of the groundwater at the Company's former facility in Newbury Park, California that was leased for approximately 40 years. The Company vacated the building in May 2002. Certain contaminants have been found in the local groundwater and site soils. The location of key soil contamination (and some related site groundwater impact associated with the soil contamination) is concentrated in and found to emanate from an area of an underground storage tank that the Company believes to have been installed and primarily used in the early 1960s by a former tenant at the site who preceded the Company's tenancy. There are no litigation claims pending with respect to environmental matters at the Newbury Park site.

The Los Angeles Regional Water Quality Control Board ("RWQCB") having authority over the site issued joint instructions in November 2008, ordering the Company and the current owner of the site to perform additional assessments and surveys, and to create ongoing groundwater monitoring plans before any final regulatory action for "no further action" may be approved. In September 2009, the regulatory agency issued supplemental instructions to the Company and the current site owner regarding previously ordered site assessments, surveys and groundwater monitoring. In October 2013, an order was issued including a scope of proposed additional site work, monitoring, and proposed remediation activities. The Company filed appeals of the October 2013 order seeking reconsideration by the RWQCB and review by the State Water Resources Control Board ("SWRCB") of the removal of two other potentially responsible parties, and seeking clarification of certain other factual findings. In April 2015, the RWQCB denied the Company's request to name the two other potentially responsible parties to the order, but did correct certain findings of fact identified by the Company in its petition for reconsideration. The SWRCB has not yet ruled on the Company's petition for review of the RWQCB's action as the petition was filed with a request it be held in abeyance.

The Company has been engaged with the regulatory agency, including technical discussion between the Company's environmental firm and RWQCB staff, and has initiated the technical efforts to comply with the order. The Company submitted technical reports prepared by the environmental firm to the RWQCB and has received confirmation regarding the satisfaction of portions of the order. The Company also submitted a remedial action plan prepared by the environmental firm outlining the cleanup of soil, groundwater, and soil vapor at the site. The Company's contractors have installed new monitoring wells and have submitted plans and applications in order to initiate pilot testing of a soil vapor extraction system. The parties are continuing to work toward compliance with the October 2013 order and anticipate working cooperatively on any ultimate proposed cleanup and abatement work.

The Company has accrued liabilities where it is probable that a loss will be incurred and the cost or amount of loss can be reasonably estimated. Based on the latest determinations by the RWQCB and the draft remedial action plan, the Company determined a revised range of probable loss between \$5.2 million and \$7.5 million. Given the uncertainties associated with environmental assessment and the remediation activities, the Company is unable to determine a best estimate within the range of loss. Therefore, the Company has recorded the minimum amount of probable loss as follows within the Company's condensed consolidated balance sheets.

(in thousands)	Accrued Liability	Other-Long Term Liability	Total
Balance at January 31, 2016	\$ 1,150	\$ 4,180	\$5,330
Change in estimate	(499)	499	—
Utilization	(116)	—	(116)
Balance at October 30, 2016	\$ 535	\$ 4,679	\$5,214

These estimates could change as a result of changes in planned remedial actions, further actions from the regulatory agency, remediation technology, and other factors.

Indemnification

The Company has entered into agreements with its current and former executives and directors indemnifying them against certain liabilities incurred in connection with the performance of their duties. The Company's Certificate of Incorporation and Bylaws contain comparable indemnification obligations with respect to the Company's current directors and employees.

Product Warranties

The Company's general warranty policy provides for repair or replacement of defective parts. In some cases, a refund of the purchase price is offered. In certain instances the Company has agreed to other or additional warranty terms, including indemnification provisions.

The product warranty accrual reflects the Company's best estimate of probable liability under its product warranties. The Company accrues for known warranty issues if a loss is probable and can be reasonably estimated, and accrues for estimated incurred but unidentified issues based on historical experience. Historically, warranty expense has been immaterial to the Company's consolidated financial statements.

Earn-out Liability

Pursuant to the terms of the amended earn-out arrangement ("Cycleo Amended Earn-out") with the former stockholders of Cycleo SAS ("Cycleo Earn-out Beneficiaries"), which the Company acquired on March 7, 2012, the Company potentially may make payments totaling up to approximately \$16.0 million based on the achievement of a combination of certain revenue and operating income milestones over a defined period ("Cycleo Defined Earn-out Period"). The Cycleo Defined Earn-out Period covers the period April 27, 2015 to April 26, 2020. For certain of the Cycleo Earn-out Beneficiaries, payment of the earn-out liability is contingent upon continued employment and is accounted for as post-acquisition compensation expense over the service period. The portion of the earn-out liability that is not dependent on continued employment is not considered as compensation expense. The Company recorded a liability for the Cycleo Amended Earn-out of \$8.3 million and \$6.3 million as of October 30, 2016 and January 31, 2016, respectively, of which \$1.8 million is expected to be paid within twelve months.

Pursuant to the terms of the Triune Earn-out with the former members of Triune ("Triune Earn-out Beneficiaries"), which the Company acquired on March 4, 2015, the Company potentially may make payments totaling up to approximately \$70.0 million based on achievement of certain net revenue targets measured at each fiscal year end, starting with fiscal year 2016 and ending in fiscal year 2018. An additional payment of up to \$16.0 million may be made based upon a combination of cumulative revenue and contribution margin targets measured from the acquisition date through the end of the Company's fiscal year 2018. For certain of the Triune Earn-out Beneficiaries, payment of the earn-out liability is contingent upon continued employment and is accounted for as post-acquisition compensation expense over the service period. The portion of the earn-out liability that is not dependent on continued employment is not considered as compensation expense. The Triune Earn-out targets for fiscal year 2016 were not met and the Company does not expect the fiscal year 2017 or 2018 targets to be achieved. Refer to Note 7 for additional discussion regarding fair value measurements.

A summary of earn-out liabilities by classification follows:

(in thousands)	Balance at October 30, 2016			Balance at January 31, 2016		
	Cycleo	Triune	Total	Cycleo	Triune	Total
Compensation expense	\$6,379	\$ —	\$6,379	\$4,397	\$ —	\$4,397
Not conditional upon continued employment	1,295	—	1,295	1,457	—	1,457
Interest expense	590	—	590	405	—	405
Total liability	\$8,264	\$ —	\$8,264	\$6,259	\$ —	\$6,259
Amount expected to be settled within twelve months	\$1,829	\$ —	\$1,829	\$2,155	\$ —	\$2,155

Note 13: Concentration of Risk

The following significant customers accounted for at least 10% of net sales in one or more of the periods indicated:

(percentage of net sales)	Three Months Ended		Nine Months Ended	
	October 30, 2016	October 25, 2015	October 30, 2016	October 25, 2015
Arrow (and affiliates)	11 %	10 %	9 %	9 %

The Company did not have any customer that accounted for at least 10% of total net receivables as of October 30, 2016 or January 31, 2016.

Outside Subcontractors and Suppliers

The Company relies on a limited number of outside subcontractors and suppliers for the production of silicon wafers, packaging and certain other tasks. Disruption or termination of supply sources or subcontractors, including due to natural disasters such as an earthquake or other causes, could delay shipments and could have a material adverse effect on the Company. Although there are generally alternate sources for these materials and services, qualification of the alternate sources could cause delays sufficient to have a material adverse effect on the Company. Several of the Company's outside subcontractors and suppliers, including third-party foundries that supply silicon wafers, are located in foreign countries, including China, Taiwan, Europe and Israel. The Company's largest source of silicon wafers is an outside foundry located in China and a significant amount of the Company's assembly and test operations are conducted by third-party contractors in China, Malaysia, Taiwan, Thailand, Korea and the Philippines. For the third quarter of fiscal years 2017 and 2016, respectively, approximately 24% and 29%, respectively, of the Company's silicon in terms of cost of wafers was supplied by a third-party foundry in China, and these percentages could be higher in future periods.

In the third quarter of fiscal year 2017, authorized distributors accounted for approximately 64% of the Company's net sales compared to approximately 56% in the third quarter of fiscal year 2016. Generally, the Company does not have long-term contracts with its distributors and most can terminate their agreement with little or no notice. For the third quarter of fiscal year 2017, our two largest distributors were based in Asia.

Note 14: Segment information

Segment Information

The Company had five operating segments that existed prior to the third quarter of fiscal year 2017 and currently has four. The Company's CEO functions as the CODM. The Company's CODM makes operating decisions and assesses performance based on these operating segments. The four operating segments: Protection Products Group, Power and High Reliability Products Group, Signal Integrity Products Group, and Wireless and Sensing Products Group, all have similar economic characteristics and have been aggregated into one reportable segment identified in the table below as the "Semiconductor Products Group".

On August 5, 2016, the Company completed its divestiture of its Snowbush IP business. Beginning in the third quarter of fiscal year 2017, the Company no longer has a Systems Innovation Group or an "All others" category, which used to be a separate operating segment.

The Company's assets are commingled among the various reporting units and the CODM does not use that information in making operating decisions or assessing performance. Therefore, the Company has not included asset information by segment below.

Net sales by segment are as follows:

(in thousands)	Three Months Ended		Nine Months Ended	
	October 30, 2016	October 25, 2015	October 30, 2016	October 25, 2015
Semiconductor Products Group	\$ 137,185	\$ 115,795	\$ 404,036	\$ 369,690
All others	—	15	205	1,920
Total	\$ 137,185	\$ 115,810	\$ 404,241	\$ 371,610

Income by segment and reconciliation to consolidated operating income:

(in thousands)	Three Months Ended		Nine Months Ended	
	October 30, 2016	October 25, 2015	October 30, 2016	October 25, 2015
Semiconductor Products Group	\$ 33,013	\$ 22,019	\$ 92,973	\$ 70,054
All others	25,214	(1,818)	22,738	(6,375)

Changes in the fair value of contingent earn-out obligations	—	(14,186)	(162)	(13,618)
Restructuring charges	—	962	—	4,526
Environmental reserve	—	—	—	2,855
Other non-segment related (income) expenses	3,139	2,792	5,938	10,073
Amortization of fair value adjustments related to acquired PP&E	308	310	925	948
Interest expense, net	1,890	1,964	5,857	5,698
Non-operating expense, net	690	777	871	1,152
Income before taxes	\$ 36,519	\$ 16,157	\$ 62,066	\$ 20,000

Information by Product Line

The Company operates exclusively in the semiconductor industry and primarily within the analog and mixed-signal sector.

The table below provides net sales activity by product line on a comparative basis for all periods.

(in thousands, except percentages)	Three Months Ended				Nine Months Ended			
	October 30, 2016		October 25, 2015		October 30, 2016		October 25, 2015	
Signal Integrity	\$60,550	44 %	\$52,449	45 %	\$193,745	48 %	\$165,780	44 %
Protection	40,250	29 %	33,225	29 %	108,296	27 %	105,339	28 %
Wireless and Sensing	24,070	18 %	16,567	14 %	60,514	15 %	54,898	15 %
Power and High-Reliability	15,984	12 %	13,554	12 %	45,150	11 %	43,673	12 %
Systems Innovation	—	— %	15	— %	205	— %	1,920	1 %
Other: Warrant Shares	(3,669)	(3)%	—	— %	(3,669)	(1)%	—	— %
Total net sales	\$137,185	100 %	\$115,810	100 %	\$404,241	100 %	\$371,610	100 %

The cost of the Warrant granted is recognized as an offset to net sales over the respective performance period (see Note 5 for discussion regarding Share-Based Compensation).

Geographic Information

The Company generates virtually all of its sales from its Semiconductor Products Group through sales of analog and mixed-signal devices.

Net sales activity by geographic region is as follows:

	Three Months Ended				Nine Months Ended			
	October 30, 2016		October 25, 2015		October 30, 2016		October 25, 2015	
Asia-Pacific	80 %	70 %	79 %	72 %				
North America	16 %	20 %	16 %	18 %				
Europe	7 %	10 %	8 %	10 %				
Other: Warrant Shares	(3)%	— %	(3)%	— %				
	100 %	100 %	100 %	100 %				

The Company attributes sales to a country based on the ship-to address. The table below summarizes sales activity to countries that represented greater than 10% of total net sales for one or more of the periods presented:

(percentage of total sales)	Three Months Ended				Nine Months Ended			
	October 30, 2016		October 25, 2015		October 30, 2016		October 25, 2015	
China (including Hong Kong)	46 %	45 %	45 %	44 %				
United States	11 %	14 %	11 %	12 %				
Other: Warrant Shares	(3)%	— %	(3)%	— %				

The Company's regional income (loss) from continuing operations before income taxes is as follows:

(in thousands)	Three Months Ended		Nine Months Ended	
	October 30, 2016	October 25, 2015	October 30, 2016	October 25, 2015
Domestic	\$937	\$ 21,146	\$(13,048)	\$ 3,785
Canada	31,385	2,440	49,302	16,494
United Kingdom	3,568	4,984	14,150	17,328
Switzerland	764	(13,411)	7,791	(5,063)
Japan	344	1,424	2,470	2,486
Other Foreign	(479)	(426)	1,401	(15,030)
Total	\$36,519	\$ 16,157	\$62,066	\$ 20,000

Additionally, the impact of the Warrant is included in the domestic performance above.

Note 15: Stock Repurchase Program

Stock Repurchase Program

The Company maintains a stock repurchase program that was initially approved by its Board of Directors in March 2008. The stock repurchase program does not have an expiration date and the Company's Board of Directors has authorized expansion of the program over the years. The following table summarizes activity under the repurchase program for the three and nine month periods listed below:

	Three Months Ended		Nine Months Ended			
	October 30, 2016	October 25, 2015	October 30, 2016	Value	October 25, 2015	Value
(in thousands, except number of shares)	Shares	Shares	Shares	Value	Shares	Value
Repurchase Program expenditures	-\$	-491,316	\$7,464	23,968	\$ 538	2,681,476
						\$57,311

As of October 30, 2016, the Company had repurchased \$136.2 million in shares of its common stock under the program since inception and the current remaining authorization under the program is \$62.2 million. Under the program, the Company may repurchase its common stock at any time or from time to time, without prior notice, subject to market conditions and other considerations. The Company's repurchases may be made through Rule 10b5-1 or other trading plans, open market purchases, privately negotiated transactions, block purchases or other transactions. The Company intends to fund repurchases under the program from cash on hand. The Company has no obligation to repurchase any shares under the program and may suspend or discontinue it at any time.

Note 16: Divestitures

In the first quarter of fiscal year 2016, the Company completed its divestiture of its defense and microwave communications infrastructure business to Jarjet Technologies, Inc. (“Jarjet”) in exchange for an equity interest in that company. For the three months ended October 25, 2015, the defense and microwave communications infrastructure business accounted for \$0.2 million in net revenue and non-recurring engineering (“NRE”) reimbursements. For the nine months ended October 25, 2015, the defense and microwave communications infrastructure business accounted for \$4.3 million in net revenue and NRE reimbursements. This business was part of the Sierra Monolithics, Inc. acquisition completed by the Company in December 2009.

Under the terms of the transaction with Jarjet, the Company contributed assets, including inventory and equipment with a net book value of \$0.6 million in exchange for an equity interest in the form of preferred stock, representing an approximately 21% voting interest in Jarjet. Due to the anticipated continuing cash flows from its investment in Jarjet, the Company did not account for the divestiture as a discontinued operation. In addition to the contribution of assets, certain contracts were novated with future performance responsibilities being transferred to Jarjet. The investment in Jarjet was written off in the third quarter of fiscal year 2016.

On August 5, 2016, the Company completed its divestiture of its Snowbush IP business (previously part of the Company’s Systems Innovation Group) to Rambus for a purchase price of \$32.0 million in cash along with the opportunity to receive additional payments from Rambus through 2022 based upon a percentage of sales by Rambus of new products expected to be developed by Rambus from the disposed assets. The Company recognized a gain of \$25.0 million on the disposition of this business in the third quarter of fiscal year 2017, which is recorded in “Gain on disposition of business operations” within the condensed consolidated statements of income. The Company is accounting for any potential receipt of proceeds a gain contingency; therefore, any additional payments will be recognized as they are received. The cash proceeds from the disposition of this business are included in “Proceeds from disposition of business operations” within the cash flows from investing activities section of the unaudited condensed consolidated statements of cash flows.

Note 17: Restructuring

During fiscal year 2016, Semtech Corporation announced a worldwide reduction in force as part of an overall plan to align operating expenses with business conditions and to leverage recent infrastructure investments.

Restructuring related liabilities are included within “Accrued liabilities” within the condensed consolidated balance sheets as of October 30, 2016 and January 31, 2016, respectively. Restructuring charges, if any, are presented within “Restructuring charge” within the unaudited condensed consolidated statements of income.

The following table summarizes the restructuring activity for the nine months ended October 30, 2016:

(in thousands)	One-time employee termination benefits
Balance at January 31, 2016	\$ 342
Adjustments	—
Cash payments	(336)
Balance at October 30, 2016	\$ 6

Note 18: Variable Interest Entities

The Company analyzes its investments or other interests to determine whether it represents a variable interest in a variable interest entity (“VIE”). If so, the Company evaluates the facts to determine whether it is the primary beneficiary. The Company considers itself to be the primary beneficiary when it has both the power to direct activities of the VIE that most significantly impact the VIEs economic performance and the obligation to absorb losses from or the right to receive benefits of the VIE that could potentially be significant to the VIE. With regards to its investment in MultiPhy, the Company concluded that its equity interest represents a variable interest, but it is not the primary beneficiary as prescribed in ASC 810. Specifically, in reaching this conclusion, the Company considered the activities

that most significantly drive profitability for MultiPhy and determined that the activity that most significantly drove profitability was related to the technology and related product road maps. The Company has a board observer role and thus concluded that it was not in a position of decision-making or other authority to influence MultiPhy's activities that could be considered significant with respect to its operations, including research and development plans and changes to the product road map.

34

As of October 30, 2016, the Company's maximum exposure to loss as a result of its investment in MultiPhy is limited to the \$14.0 million investment as described further in Note 6. As part of its investment in MultiPhy, the Company received a call option that would allow the Company to purchase all of the outstanding equity interests of MultiPhy. The call option, which is currently out of the money, is exercisable through June 30, 2018.

35

Note 19: Derivatives and Hedging Activities

The Company is exposed to certain risk arising from both its business operations and economic conditions and principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company, on a routine basis and in the normal course of business, experiences expenses denominated in Swiss Franc (“CHF”), Canadian Dollar (“CAD”) and Great British Pound (“GBP”). Such expenses expose the Company to exchange rate fluctuations between these foreign currencies and the U.S. Dollar (“USD”). The Company uses derivative financial instruments in the form of forward contracts, to mitigate risk associated with adverse movements in these foreign currency exchange rates on a portion of foreign denominated expenses expected to be realized during the current and following fiscal year. Currency forward contracts involve fixing the exchange rate for delivery of a specified amount of foreign currency on a specified date.

The Company records all derivatives within the condensed consolidated balance sheets at fair value, with assets included in “Other current assets” and liabilities included in “Accrued liabilities”. The Company’s accounting treatment for these instruments is based on whether or not the instruments are designated as a hedging instrument. The Company is currently applying hedge accounting to all foreign currency derivatives and has designated these hedges as cash flow hedges.

At October 30, 2016, the Company had the following outstanding foreign exchange contracts:
(in thousands)

Foreign Exchange Contracts	Number of Instruments	Buy	Sell
		Notional Value	Notional Value
Sell USD/Buy CHF Forward Contract	3	Fr. 2,672	\$ 2,732
Sell USD/Buy CAD Forward Contract	3	C\$6,337	\$ 4,532
Sell USD/Buy GBP Forward Contract	15	£ 10,744	\$ 13,568
Total	21		

These contracts, with maturities extending into the subsequent fiscal year, met the criteria for cash flow hedges and the unrealized gains or losses, after tax, are recorded as a component of accumulated other comprehensive gain in shareholders’ equity. The effective portions of cash flow hedges are recorded in accumulated other comprehensive income (“AOCI”) until the hedged item is recognized in selling, general and administrative (“SG&A”) expense within the unaudited condensed consolidated statements of income when the underlying hedged expense is recognized. Any ineffective portions of cash flow hedges are recorded in “Non-operating (expense) income, net” within the Company’s unaudited condensed consolidated statements of income. The Company presents its derivative assets and liabilities at their gross fair values on the condensed consolidated balance sheets.

The table below summarizes the carrying values of derivative instruments as of October 30, 2016 and January 31, 2016:

(in thousands)	Carrying Values of Derivative Instruments as of October 30, 2016		Derivative Net Carrying Value
	Fair Value Assets(2)	Fair Value - (Liabilities)	
Derivatives designated as hedging instruments			
Foreign exchange contracts (1)	\$215	\$ (445)	\$ (230)
Total derivatives	\$215	\$ (445)	\$ (230)

Carrying Values of Derivative
 Instruments as of January 31, 2016
 Fair

GBP Forward (843)	—	SG&A	435	—	SG&A	(3)	—
Contract							
	\$ 321	\$ —	\$ (546)	\$ —		\$ 2	\$ —

The amount of losses, net of tax, related to the effective portion of derivative instruments designated as cash flow hedges included in “Accumulated other comprehensive income” within the condensed consolidated balance sheets as of October 30, 2016 and October 25, 2015 was \$0.2 million and \$0.0 million. Any gains or losses under these contracts are expected to be realized and reclassified to selling, general and administrative within the next fifteen months.

Note 20: Subsequent Events

On November 15, 2016 (the “Closing Date”), the Company, with certain of its domestic subsidiaries as guarantors (the “Guarantors”), entered into the Amended and Restated Credit Agreement with the Lenders, and HSBC Bank USA, National Association, as administrative agent and as swing line lender and letter of credit issuer. The Amended and Restated Credit Agreement amended and restated the Prior Credit Agreement. Pursuant to the Amended and Restated Credit Agreement, the Lenders provided the Company with senior secured first lien credit facilities in an aggregate principal amount of \$400.0 million, consisting of term loans in an aggregate initial principal amount of \$150.0 million and revolving commitments in an aggregate principal amount of \$250.0 million. Up to \$40.0 million of the revolving commitments may be used to obtain letters of credit, up to \$25.0 million of the revolving commitments may be used to obtain swing line loans, and up to \$40.0 million of the revolving commitments may be used to obtain revolving loans and letters of credit in certain currencies other than U.S. Dollars. Each of the term loans and the revolving commitments is scheduled to mature on November 12, 2021. As of November 15, 2016, there were no amounts outstanding under the letters of credit, swing line loans and alternative currency sub-facilities.

As of November 15, 2016, \$247.0 million of borrowings were outstanding under the Amended and Restated Credit Agreement, consisting of \$150.0 million in term loans and \$97.0 million in revolving loans, and there was \$153.0 million of undrawn revolving commitments. The proceeds of the revolving credit facility may be used by the Company for capital expenditures, permitted acquisitions, permitted dividends, working capital and general corporate purposes.

The Amended and Restated Credit Agreement provides that, subject to certain conditions, the Company may request the establishment of one or more additional term loan facilities and/or increases to the revolving commitments in an aggregate principal amount not to exceed the sum of (a) \$150.0 million and (b) the aggregate principal amount of all voluntary prepayments of term loans made prior to the date of incurrence of such additional term loan facilities and/or increases to the revolving commitments. The Lenders will have an opportunity to, but are not required to participate in the additional term loan facilities and/or revolving commitment increases. If the Lenders do not agree to provide such incremental facilities, the Company may request such additional and/or increased facilities from additional lenders.

Interest on loans made under the Amended and Restated Credit Agreement in U.S. Dollars accrues, at Semtech’s option, at a rate per annum equal to (1) the New Base Rate (as defined below) plus a margin ranging from 0.25% to 1.25% depending upon Semtech’s consolidated leverage ratio or (2) LIBOR (determined with respect to deposits in U.S. Dollars) for an interest period to be selected by Semtech plus a margin ranging from 1.25% to 2.25% depending upon Semtech’s consolidated leverage ratio (such margin, the “New Applicable Margin”). The initial interest margin will be 2.00% for Base Rate loans and 1.00% for LIBOR rate loans, applicable until 2 business days following delivery of a compliance certificate by Semtech to the administrative agent with respect to the first fiscal period ending after the Closing Date. The “New Base Rate” is equal to a fluctuating rate equal to the highest of (a) the prime rate of the administrative agent, (b) ½ of 1% above the federal funds effective rate published by the Federal Reserve Bank of New York and (c) one-month LIBOR (determined with respect to deposits in U.S. Dollars) plus 1.00%. Interest on loans made under the Amended and Restated Credit Agreement in alternative currencies accrues at a rate per annum equal to LIBOR (determined with respect to deposits in the applicable alternative currency) (other than loans made in Canadian Dollars, for which a special reference rate for Canadian Dollars applies) for an interest period to be selected by Semtech plus the New Applicable Margin.

Commitment fees on the unused portion of the revolving commitments accrue at a rate per annum ranging from 0.20% to 0.45% depending upon Semtech’s consolidated leverage ratio, provided the initial commitment fee shall be 0.40% per annum, applicable until 2 business days following delivery of a compliance certificate by Semtech to the administrative agent with respect to the first fiscal period ending after the Closing Date. With respect to letters of credit, Semtech will pay the administrative agent, for the account of the lenders under the revolving credit facility,

letter of credit participation fees at a rate per annum equal to the applicable margin then in effect with respect to LIBOR-based loans under the revolving commitments on the face amount of all outstanding letters of credit. Semtech will also pay HSBC Bank USA, N.A., as the issuing bank, a fronting fee for each letter of credit issued under the Amended and Restated Credit Agreement at a rate equal to 0.125% per annum based on the maximum amount available to be drawn under each such letter of credit, as well as its customary documentation fees.

All obligations of Semtech under the Amended and Restated Credit Agreement are unconditionally guaranteed by each of the Guarantors, which currently consist of all of the direct and indirect domestic subsidiaries of Semtech. Semtech and the Guarantors have also pledged substantially all of their assets to secure their obligations under the Amended and Restated Credit Agreement, including Semtech's owned real property located in Camarillo, California.

The outstanding principal balance of the term loans will be subject to repayment in quarterly installments beginning on the last day of Semtech's fiscal quarter ending closest to January 31, 2017 in an amount equal to \$3,750,000 per quarter for the first

two years after the Closing Date, \$4,697,500 per quarter in the third and fourth years following the Closing Date, and \$5,625,000 per quarter in the fifth year following the Closing Date, with the balance being due at maturity on November 12, 2021. No amortization is required with respect to the revolving credit facility. Semtech may voluntarily prepay borrowings under the Amended and Restated Credit Agreement at any time and from time to time, without premium or penalty, other than customary “breakage costs” and fees for LIBOR-based loans.

The term loans must be mandatorily prepaid using the proceeds of certain dispositions of assets and receipt of insurance proceeds, subject to agreed-upon thresholds and exceptions and customary reinvestment rights.

The Amended and Restated Credit Agreement contains customary covenants, including limitations on Company’s ability to, among other things, incur indebtedness, create liens on assets, engage in certain fundamental corporate changes, make investments, sell or otherwise dispose of assets, repurchase stock, pay dividends or make similar distributions, engage in certain transactions with affiliates and make capital expenditures. In addition, the Company must comply with the following financial covenants, tested at the end of each fiscal quarter on a trailing four-quarter basis: (i) a minimum consolidated interest coverage ratio of 3.00 to 1.00 and (ii) a maximum consolidated leverage ratio of 3.00 to 1.00 provided that, such maximum consolidated leverage ratio may be increased to 3.25 to 1.00 or 3.50 to 1.00, as applicable, for the four consecutive fiscal quarters ending on or after the date of consummation of a permitted acquisition which constitutes a “Material Acquisition” under the Amended and Restated Credit Agreement, subject to the satisfaction of certain conditions.

The Amended and Restated Credit Agreement also contains customary provisions pertaining to events of default. If any event of default occurs, the principal, interest, and any other monetary obligations on all the then outstanding amounts can become due and payable immediately by action of the administrative agent acting upon the instructions of or with the consent of the Lenders representing more than 50% of the revolving commitments and outstanding term loans or automatically upon the occurrence of certain bankruptcy events related to the Company.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following "Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with our unaudited condensed consolidated financial statements and the accompanying notes included in Part I, Item 1 of this Quarterly Report on Form 10-Q (this "Quarterly Report") and the "Special Note Regarding Forward-Looking and Cautionary Statements" in this Quarterly Report.

Overview

Semtech Corporation (together with its consolidated subsidiaries, the "Company", "we", "our", or "us") designs, develops, manufactures and markets high-performance analog and mixed signal semiconductor products. Beginning with the third quarter of fiscal 2017, we operate and account for results in one reportable segment. Prior to the third quarter of fiscal year 2017, we also had one non-reportable segment. See Note 14 to our unaudited condensed consolidated financial statements.

Our current product lines include:

Signal Integrity Products. We design, develop and market a portfolio of optical communications, broadcast video, surveillance video, active cable transceiver and backplane products used in a wide variety of enterprise computing, industrial, communications and high-end consumer applications. Our comprehensive portfolio of integrated circuits ("ICs") for optical transceivers, backplane applications and high-speed interfaces ranges from 100Mbps to 100Gbps and supports key industry standards such as Fibre Channel, Infiniband, Ethernet, passive optical networks ("PON") and SONET. Our broadcast video products offer advanced solutions for next generation video formats, ever increasing data rates and evolving I/O and distance requirements. Our security and surveillance products for high-definition closed circuit television ("HDcctv") enable upgrade of analog closed circuit television installations to full digital HD, leveraging the installed base of COAX cabling, and our fully integrated transmit and receive products enable the highest performance, longest reach HDcctv standards-compliant designs.

We also sell proprietary advanced wired communication, ultra-high speed Serializer/Deserializer ("SerDes") products for long-haul optical transport communication. These ICs perform transmission functions used in high-speed networks at 40Gbps and 100Gbps. We have ceased development of new products for this market due to our strategic decision in the fourth quarter of fiscal year 2014 to reduce investment in the long-haul optical market, but we continue to service our existing customer base.

Protection Products. We design, develop and market high performance protection devices, which are often referred to as transient voltage suppressors ("TVS"). TVS devices provide protection for electronic systems where voltage spikes (called transients), such as electrostatic discharge or secondary lightning surge energy, can permanently damage sensitive complementary metal-oxide-semiconductor ("CMOS") ICs. Our portfolio of protection solutions include filter and termination devices that are integrated with the TVS device. Our products provide robust protection while preserving signal integrity in high-speed communications, networking and video interfaces. These products also operate at very low voltage. Our protection products can be found in a broad range of applications including smart phones, LCD TVs, set-top boxes, tablets, computers, notebooks, base stations, routers, automobile, and industrial instruments.

Wireless and Sensing Products. We design, develop and market a portfolio of specialized radio frequency products used in a wide variety of industrial, medical and communications applications, and specialized sensing products used in industrial and consumer applications. Our wireless products feature industry leading and longest range industrial, scientific and medical radio, enabling a lower total cost of ownership and increased reliability in all environments. This makes these products particularly suitable for machine to machine ("M2M") and Internet of Things ("IoT") applications. Our unique sensing interface platforms can interface to any sensor and output digital data in any form. Specifically, the proximity sensing capability of our devices enable advanced user interface solutions for mobile and consumer products. Our wireless and sensing products can be found in a broad range of applications in the industrial, medical and consumer markets.

Power and High-Reliability Products. We design, develop and market power product devices that control, alter, regulate and condition the power within electronic systems. The highest volume product types within the power product line are switching voltage regulators, combination switching and linear regulators, smart regulators, charge

pumps and wireless charging. Our Power products feature highly integrated functionality for the communications, industrial and computing markets and low-power, small form factor and high-efficiency products for smart phones and other mobile devices, notebook computers, computer peripherals and other consumer devices. The primary application for these products is power regulation for enterprise computing, communications, high-end consumer and industrial systems. Our high-reliability discrete semiconductor products are comprised of rectifiers, assemblies (packaged discrete rectifiers) and other products that are typically used to convert alternating currents into direct currents and to protect circuits against very high voltage spikes or high current surges.

Our high-reliability products can be found in a broad range of applications including industrial, military, medical, automotive, aerospace and defense systems, including satellite communications.

40

Prior to the third quarter of fiscal 2017, our Systems Innovation Group combined the analog/mixed signal design competencies from our previous Sierra Monolithics, Inc. and Gennum Corporation acquisitions and was chartered with developing innovative analog/mixed signal intellectual property (“IP”) for emerging systems. These IP cores were targeted at the datacenter, cloud computing and storage networking markets and complement our rapidly growing library of analog/mixed signal IP Cores that have been developed over several years by our former Snowbush IP team based in Canada. We also have developed advanced products in Data Converter IP at the latest, cutting edge CMOS process nodes that are targeted at high performance communications systems. On August 5, 2016, we completed the divestiture of our Snowbush IP business to Rambus Inc. (“Rambus”) for \$32.0 million in cash along with the opportunity to receive additional payments from Rambus through 2022 based upon a percentage of sales by Rambus of new products expected to be developed by Rambus from the disposed assets. In the third quarter of fiscal year 2017, we recorded a gain of \$25.0 million on the disposition of this business. Other than this gain, the divestiture did not and is not expected to have a material impact on our unaudited condensed consolidated financial statements. Our net sales by product line are as follows:

(in thousands)	Three Months Ended		Nine Months Ended	
	October 30, 2016	October 25, 2015	October 30, 2016	October 25, 2015
Signal Integrity	\$60,550	\$ 52,449	\$193,745	\$ 165,780
Protection	40,250	33,225	108,296	105,339
Wireless and Sensing	24,070	16,567	60,514	54,898
Power and High-Reliability	15,984	13,554	45,150	43,673
Systems Innovation	—	15	205	1,920
Other: Warrant Shares	(3,669)	—	(3,669)	—
Total	\$137,185	\$ 115,810	\$404,241	\$ 371,610

Most of our sales to customers are made on the basis of individual customer purchase orders. Many customers include cancellation provisions in their purchase orders. Trends within the industry toward shorter lead-times and “just-in-time” deliveries have resulted in our reduced ability to predict future shipments. As a result, we rely on orders received and shipped within the same quarter for a significant portion of our sales. Orders received and shipped in the third quarters of fiscal years 2017 and 2016 represented 64% and 56% of net sales, respectively. Sales made directly to customers during the third quarters of fiscal years 2017 and 2016 were 36% and 44% of net sales, respectively. The remaining sales were made through independent distributors. Our business relies on foreign-based entities. Most of our outside subcontractors and suppliers, including third-party foundries that supply silicon wafers, are located in foreign countries, including China, Taiwan, Europe and Israel. For the third quarter of fiscal years 2017 and 2016, respectively, approximately 24% and 29%, respectively, of the Company’s silicon in terms of cost of wafers was supplied by a third-party foundry in China, and these percentages could be higher in future periods. Foreign sales during the third quarter of fiscal years 2017 and 2016 constituted approximately 89% and 86%, respectively, of our net sales. Approximately 87% and 82% of foreign sales during the third quarters of fiscal years 2017 and 2016, respectively, were to customers located in the Asia-Pacific region. The remaining foreign sales were primarily to customers in Europe, Canada, and Mexico.

We use several metrics as indicators of future potential growth. The indicators that we believe best correlate to potential future revenue growth are design wins and new product releases. There are many factors that may cause a design win or new product release not to result in sales, including a customer decision not to go to system production, a change in a customer’s perspective regarding a product’s value or a customer’s product failing in the end-market. As a result, although a design win or new product introduction is an important step towards generating future revenue, it does not inevitably result in us being awarded business or receiving a purchase commitment.

Historically, our results have reflected some seasonality, with demand levels generally lower in the computer and high-end consumer product lines during the first and fourth quarters of our fiscal year in comparison to the second and third quarters.

Critical Accounting Policies and Estimates

In addition to the discussion below, please refer to the disclosures regarding our critical accounting policies in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included in Item 7 of our Annual Report on Form 10-K for the fiscal year ended January 31, 2016 filed with the Securities and Exchange Commission (“SEC”) on March 31, 2016.

41

Fiscal Periods

We report results on the basis of 52 and 53 week periods and end our fiscal year on the last Sunday in January. The other quarters generally end on the last Sunday of April, July and October. All quarters consist of 13 weeks except for one 14-week period in the fourth quarter of 53-week years. The third quarter of fiscal years 2017 and 2016 each consisted of 13 weeks.

Revenue and Cost of Sales

We recognize product revenue when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable and collectability is probable. Product design and engineering recoveries are recognized during the period in which services are performed and are recorded as an offset to the related expenses. Historically, these recoveries have not exceeded the cost of the related development efforts. We include revenue related to technology licenses as part of "Net sales." Historically, revenue from these arrangements has not been significant though it is part of our recurring ordinary business.

On October 5, 2016, we issued a warrant (the "Warrant") to Comcast Cable Communications Management LLC ("Comcast") to purchase up to 1,086,957 shares (the "Warrant Shares") of our common stock. The cost of the Warrant is recognized as an offset to net sales over the respective performance period since the Warrant was issued to our customer in exchange for services.

We record a provision for estimated sales returns in the same period as the related sales are recorded. We base these estimates on historical sales returns and other known factors. Actual returns could be different from our estimates and current provisions for sales returns and allowances, resulting in future charges to earnings.

We record a provision for sales rebates in the same period as the related sales are recorded. These estimates are based on sales activity during the period. Actual rebates given could be different from our estimates and current provisions for sales rebates, resulting in future charges to earnings. The estimated sales rebates for sales activity during the period where there are no outstanding receivables are recorded within the condensed consolidated balance sheets under the heading of "Accrued liabilities." The portion of the estimated sales rebate where there are outstanding receivables is recorded within the condensed consolidated balance sheets as a reduction to accounts receivable.

We defer revenue recognition on shipment of products to certain customers, principally distributors, under agreements which provide for limited pricing credits or product return privileges, until these products are sold through to end users or the return privileges lapse. For sales subject to certain pricing credits or return privileges, the amount of future pricing credits or inventory returns cannot be reasonably estimated given the relatively long period in which a particular product may be held by the customer. Therefore, we have concluded that sales to customers under these agreements are not fixed and determinable at the date of the sale and revenue recognition has been deferred. We estimate the deferred gross margin on these sales by

applying an average gross margin to the actual gross sales. The average gross margin is calculated for each category of material using current standard costs. The estimated deferred gross margin on these sales, where there are no outstanding receivables, is recorded within the condensed consolidated balance sheets under the heading of "Deferred revenue." There were no significant impairments of deferred cost of revenues in the first nine months of fiscal years 2017 or 2016.

The following table summarizes the deferred revenue balance:

(in thousands)	October 30, January 31,	
	2016	2016
Deferred revenues	\$ 9,650	\$ 5,991
Deferred cost of revenues	(1,822)	(1,139)
Deferred revenue, net	7,828	4,852
Deferred product design and engineering recoveries	3,198	3,776
Total deferred revenue	\$ 11,026	\$ 8,628

Derivatives and Hedging Activities

Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 815, Derivatives and Hedging, provides the disclosure requirements for derivatives and hedging activities with the intent to provide users of financial statements with an enhanced understanding of: (a) how and why an entity uses derivative instruments, (b) how the entity accounts for derivative instruments and related hedged items, and (c) how derivative instruments and related hedged items affect an entity’s financial position, financial performance, and cash flows. Further, qualitative disclosures are required that explain our objectives and strategies for using derivatives, as well as quantitative disclosures about the fair value of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative instruments.

42

As required by ASC 815, we record all derivatives on the condensed consolidated balance sheets at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether we have elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. Derivatives designated and qualifying as a hedge of the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. Hedge accounting generally provides for the matching of the timing of gain or loss recognition on the hedging instrument with the recognition of the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk in a fair value hedge or the earnings effect of the hedged forecasted transactions in a cash flow hedge. We may enter into derivative contracts that are intended to economically hedge certain of our risks, even though hedge accounting does not apply or we elect not to apply hedge accounting. In accordance with the FASB's fair value measurement guidance, we have made an accounting policy election to measure the credit risk of our derivative financial instruments that are subject to master netting agreements on a net basis by counterparty portfolio.

Gross Profit

Gross profit is equal to our net sales less our cost of sales. Our cost of sales includes materials, depreciation on fixed assets used in the manufacturing process, shipping costs, direct labor and overhead. We determine the cost of inventory by the first-in, first-out method.

Operating Costs

Our operating costs and expenses generally consist of selling, general and administrative, product development and engineering costs, costs associated with acquisitions, restructuring charges, and other operating related charges.

Results of Operations

The following table sets forth, for the periods indicated, our unaudited condensed consolidated statements of income expressed as a percentage of revenues.

	Three Months Ended		Nine Months Ended	
	October 30,	October 25,	October 30,	October 25,
	2016	2015	2016	2015
Net sales	100.0 %	100.0 %	100.0 %	100.0 %
Cost of sales	40.9 %	39.9 %	40.3 %	39.8 %
Gross profit	59.1 %	60.1 %	59.7 %	60.2 %
Operating costs and expenses:				
Selling, general and administrative	25.6 %	26.5 %	25.1 %	27.6 %
Product development and engineering	18.7 %	23.2 %	19.1 %	22.8 %
Intangible amortization	4.6 %	5.4 %	4.7 %	5.0 %
Gain on disposition of business operations	(18.2)%	— %	(6.2)%	— %
Changes in the fair value of contingent earn-out obligations	— %	(12.2)%	— %	(3.7)%
Restructuring charge	— %	0.8 %	— %	1.2 %
Total operating costs and expenses	30.6 %	43.8 %	42.7 %	52.9 %
Operating income	28.5 %	16.3 %	17.0 %	7.2 %
Interest expense, net	(1.4)%	(1.7)%	(1.4)%	(1.5)%
Non-operating expense, net	(0.5)%	(0.7)%	(0.2)%	(0.3)%
Income before taxes	26.6 %	14.0 %	15.4 %	5.4 %
Provision for taxes	4.2 %	4.7 %	3.8 %	2.6 %
Net income	22.4 %	9.2 %	11.5 %	2.8 %

Percentages may not add precisely due to rounding.

Our regional mix of income (loss) from continuing operations before income taxes is as follows:

(in thousands)	Three Months Ended		Nine Months Ended	
	October 30, 2016	October 25, 2015	October 30, 2016	October 25, 2015
Domestic	\$937	\$21,146	\$(13,048)	\$3,785
Canada	31,385	2,440	49,302	16,494
United Kingdom	3,568	4,984	14,150	17,328
Switzerland	764	(13,411)	7,791	(5,063)
Japan	344	1,424	2,470	2,486
Other Foreign	(479)	(426)	1,401	(15,030)
Total	\$36,519	\$16,157	\$62,066	\$20,000

Domestic performance from continuing operations includes amortization of acquired intangible assets and higher levels of share-based compensation compared to foreign operations. Additionally, the impact of the Warrant is included in the domestic performance above.

Recent Accounting Pronouncements

In February 2016, the FASB issued Accounting Standards Update (“ASU”) No. 2016-02, Leases (Topic 842), which will require that substantially all leases be recognized by lessees on their balance sheet as a right-of-use asset and corresponding lease liability, including leases currently accounted for as operating leases. The new standard also will result in enhanced quantitative and qualitative disclosures, including significant judgments made by management, to provide greater insight into the extent of revenue and expense recognized and expected to be recognized from existing leases. The standard requires modified retrospective adoption and will be effective December 15, 2018, with early adoption permitted. We are currently assessing the basis of adoption and evaluating the impact of the adoption of the update on our consolidated financial statements.

In July 2015, the FASB issued ASU 2015-11, Inventory (Topic 330) Related to Simplifying the Measurement of Inventory which will apply to all inventory except inventory that is measured using last-in, first-out (“LIFO”) or the retail inventory method. Inventory measured using first-in, first-out or average cost is covered by the new amendments. Inventory within the scope of the new guidance should be measured at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. Subsequent measurement is unchanged for inventory measured using LIFO or the retail inventory method. The amendments will take effect for public business entities for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The new guidance should be applied prospectively, and earlier application is permitted as of the beginning of an interim or annual reporting period. We do not expect the adoption of this update to have a material impact on our consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which will require an entity to recognize revenue from the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance addresses, in particular, contracts with more than one performance obligation, as well as the accounting for some costs to obtain or fulfill a contract with a customer, and provides for additional disclosures with respect to revenues and cash flows arising from contracts with customers. Public entities are required to apply the amendments on either a full- or modified-retrospective basis for annual periods beginning after December 15, 2017 and for interim periods within those annual periods. This update will be effective beginning in the first quarter of fiscal year 2019. Early adoption is not permitted. We are currently assessing the basis of adoption and evaluating the impact of the adoption of the update on our consolidated financial statements.

Comparison of the Three Months Ended October 30, 2016 and October 25, 2015

All periods presented in the following summary of sales by major end-market reflect our current classification methodology (see Note 1 to our unaudited condensed consolidated financial statements in this Quarterly Report for a description of each market category):

(in thousands, except percentages)	Three Months Ended			
	October 30, 2016		October 25, 2015	
Enterprise Computing	\$37,239	27 %	\$31,700	27 %
Industrial	36,931	27 %	29,671	26 %
High-End Consumer (1)	41,924	31 %	31,088	27 %
Communications	24,760	18 %	23,351	20 %
Other: Warrant Shares	(3,669)	(3)%	—	— %
Total	\$137,185	100 %	\$115,810	100 %

Approximately \$11.4 million and \$7.4 million of our total net sales to Samsung Electronics (and affiliates) in the (1)third quarter of fiscal years 2017 and 2016, respectively, were for products that target the handheld market (which includes mobile phones). This activity is included in the high-end consumer end-market category.

Net Sales

Net sales for the third quarter of fiscal year 2017 were \$137.2 million, an increase of 18% compared to \$115.8 million for the third quarter of fiscal year 2016. During the third quarter of fiscal year 2017, we benefited from strong demand from hyper-scale datacenters for our optical transceiver products, growing demand for our LoRa® and proximity sensing products and demand for our Protection products for mobile devices. This strength was offset by lower sales of our passive optical network products and the \$3.7 million impact from the Warrant granted to Comcast which offset net sales.

Based on recent bookings trends and our backlog entering the quarter, we estimate net sales for the fourth quarter of fiscal year 2017 to be between \$133.2 million and \$141.2 million.

Gross Profit

In the third quarter of fiscal year 2017, gross profit increased to \$81.1 million from \$69.6 million in the third quarter of fiscal year 2016. Gross margins were 59.1% in the third quarter of fiscal year 2017 compared to 60.1% in the third quarter of fiscal year 2016. The gross margins in the third quarter of fiscal year 2017 were unfavorably impacted by the impact of the Warrant granted to Comcast.

In the fourth quarter of fiscal year 2017, we expect our gross margins to be similar in comparison to the third quarter of fiscal year 2017.

Operating Costs and Expenses

(in thousands, except percentages)	Three Months Ended				Change
	October 30, 2016		October 25, 2015		
Selling, general and administrative	\$35,116	84 %	\$30,747	61 %	14 %
Product development and engineering	25,600	61 %	26,855	53 %	(5)%
Intangible amortization	6,286	15 %	6,308	12 %	— %
Gain on disposition of business operations	(25,036)	(60)%	—	— %	100 %
Restructuring	—	— %	962	2 %	(100)%
Changes in the fair value of contingent earn-out obligations	—	— %	(14,186)	(28)%	(100)%
Total operating costs and expenses	\$41,966	100 %	\$50,686	100 %	(17)%

Selling, General and Administrative Expenses

Selling, general and administrative (“SG&A”) expenses increased by \$4.4 million in the third quarter of fiscal year 2017 compared to the same quarter of fiscal year 2016. SG&A expense in the third quarter of fiscal year 2017 was impacted by higher equity compensation expense and a \$2.1 million bad debt reserve for a customer that filed for bankruptcy.

Product Development and Engineering Expenses

Product development and engineering expenses decreased by \$1.3 million in the third quarter of fiscal year 2017 compared to the third quarter of fiscal year 2016 as a result of lower compensation expense and research and development spending, including cost savings associated with the divestiture of our Snowbush IP business. The levels of product development and engineering expenses reported in a fiscal period can be significantly impacted, and therefore experience period over period volatility, by the number of new product tape-outs and by the timing of recoveries from non-recurring engineering services which are typically recorded as a reduction to product development and engineering expense.

Intangible Amortization

Intangible amortization was \$6.3 million and \$6.3 million in the third quarter of fiscal years 2017 and 2016, respectively.

Gain on disposition of business operations

In the third quarter of fiscal year 2017, we completed our divestiture of Snowbush IP to Rambus. As a result, we recognized a gain of \$25.0 million on the disposition of this business in the third quarter of fiscal year 2017.

Interest Expense, Net

Interest and amortization of debt discount and expense was \$1.9 million and \$2.0 million in the third quarter of fiscal year 2017 and 2016, respectively. The decrease is primarily related to lower debt levels, partially offset by slightly higher interest rates associated with our elevated leverage ratios.

We expect the interest rate on our credit facility to decrease slightly in the fourth quarter of fiscal year 2017 as the benefit from lower leverage ratios is partially offset by the higher interest rate environment. See “Liquidity and Capital Resources.”

Income Taxes

In the third quarter of fiscal year 2017, we recorded an income tax provision of \$5.7 million compared to \$5.5 million in the third quarter of fiscal year 2016. The effective tax rates for the third quarter of fiscal years 2017 and 2016 were a provision of 15.7% and 33.8%, respectively. The effective tax rate in the third quarter of fiscal year 2016 was higher than the effective tax rate in third quarter of fiscal year 2017 due to higher levels of U.S. based losses for which no tax benefit is recognized. The performance of our U.S. operations has improved as a result of the restructuring activities that occurred in fiscal year 2016.

Our effective tax rate in the third quarter of fiscal year 2017 differs from the statutory federal income tax rate of 35% due primarily to a valuation reserve against our deferred tax assets and certain undistributed foreign earnings for which no U.S. taxes are provided. As a result of the valuation reserves that we maintain against our U.S. based deferred tax assets, our effective tax rate is subject to extreme volatility during periods when our U.S. operations experience significant losses in relation to total income from continuing operations before income taxes.

We intend to indefinitely reinvest all of our unremitted foreign earnings, and as a result, have not provided U.S. taxes on these earnings. We currently do not need these earnings to support our U.S. operations. If these unremitted foreign earnings are needed for our U.S. operations or can no longer be permanently reinvested outside the U.S., we would be required to accrue and pay U.S. taxes on these earnings.

As a global organization, we are subject to audit by taxing authorities in various jurisdictions. To the extent that an audit, or the closure of a statute of limitations, results in our adjusting our reserves for uncertain tax positions, our effective tax rate could experience extreme volatility since any adjustment would be recorded as a discrete item in the period of adjustment.

Comparison of the Nine Months Ended October 30, 2016 and October 25, 2015

All periods presented in the following summary of sales by major end-market reflect our current classification methodology (see Note 1 to our unaudited condensed consolidated financial statements in this Quarterly Report for a description of each market category):

(in thousands, except percentages)	Nine Months Ended					
	October 30, 2016			October 25, 2015		
Enterprise Computing	\$126,952	31 %		\$101,266	27 %	
Industrial	104,281	26 %		96,103	26 %	
High-End Consumer (1)	103,644	26 %		99,386	27 %	
Communications	73,033	18 %		74,855	20 %	
Other: Warrant Shares	(3,669)	(1)%		—	— %	
Total	\$404,241	100 %		\$371,610	100 %	

Approximately \$29.8 million and \$24.2 million of our total net sales to Samsung Electronics (and affiliates) in the (1) first nine months of fiscal years 2017 and 2016, respectively, were for products that target the handheld market (which includes mobile phones). This activity is included in the high-end consumer end-market category.

Net Sales

Net sales for the first nine months of fiscal year 2017 were \$404.2 million, an increase of 9% compared to \$371.6 million for the first nine months of fiscal year 2016. Sales in the first nine months of fiscal year 2017, benefited from hyper-scale datacenters for our optical transceiver products solutions and stronger sales of our LoRa® products. This strength was offset by lower sales of high-end consumer product into the printer and LCD display markets and lower sales into the China smart phone market and the \$3.7 million impact of the Warrant granted to Comcast.

Gross Profit

In the first nine months of fiscal year 2017, gross profit increased to \$241.4 million from \$223.6 million in the first nine months of fiscal year 2016. Gross margins were 59.7% in the first nine months of fiscal year 2017 compared to 60.2% in the first nine months of fiscal year 2016. The gross margins in the first nine months of fiscal year 2017 were unfavorably impacted by the impact of the Warrant granted to Comcast.

Operating Costs and Expenses

(in thousands, except percentages)	Nine Months Ended						Change
	October 30, 2016			October 25, 2015			
Selling, general and administrative	\$101,654	59 %		\$102,383	52 %	(1)%	
Product development and engineering	77,097	45 %		84,771	44 %	(9)%	
Intangible amortization	19,017	11 %		18,648	9 %	2 %	
Gain on disposition of business operations	(25,036)	(15)%		—	— %	100 %	
Restructuring	—	— %		4,526	2 %	(100)%	
Changes in the fair value of contingent earn-out obligations	(162)	— %		(13,618)	(7)%	(99)%	
Total operating costs and expenses	\$172,570	100 %		\$196,710	100 %	(12)%	

Selling, General and Administrative Expenses

Selling, general and administrative (“SG&A”) expenses decreased by \$0.7 million in the first nine months of fiscal year 2017 compared to the first nine months of fiscal year 2016. SG&A expense for the first nine months of fiscal year 2017 benefited from the non-reoccurrence of costs associated with our ERP system that was placed into service in the first quarter of fiscal year 2016 and the benefit of cost reduction actions taken during fiscal year 2016. These cost savings were partially offset by higher compensation expense, including a \$6.0 million increase in share-based compensation. Share-based compensation expense in the second quarter of fiscal year 2016 benefited from the re-measurement of value for awards accounted for as liability awards, higher levels of forfeitures associated with restructuring activities and changes to performance assumptions related to awards with performance vesting conditions.

Product Development and Engineering Expenses

Product development and engineering expenses decreased by \$7.7 million in the first nine months of fiscal year 2017 compared to the first nine months of fiscal year 2016 as a result of lower compensation expense and research and development spending, including cost savings associated with the restructuring activities undertaken in the past year. These savings were partially offset by development costs associated with our acquisitions of EnVerv, Inc. (“EnVerv”) and Triune Systems, L.L.C. (“Triune”).

Intangible Amortization

Intangible amortization was \$19.0 million and \$18.6 million in the first nine months of fiscal years 2017 and 2016, respectively. The higher amortization expense in the first nine months of fiscal year 2017 related to in-process research and development that was reclassified from infinite lived to finite lived in the third quarter of fiscal year 2016.

Gain on disposition of business operations

In the third quarter of fiscal year 2017, the Company completed its divestiture of Snowbush IP to Rambus. As a result, the Company recognized a gain of \$25.0 million on the disposition of this business in the first nine months of fiscal year 2017, which is recorded in “Gain on disposition of business operations” within the unaudited condensed consolidated statements of income.

Interest Expense, Net

Interest and amortization of debt discount and expense was \$5.9 million and \$5.7 million in the first nine months of fiscal years 2017 and 2016, respectively. The increase is primarily related to slightly higher interest rates associated with our elevated leverage ratios, partially offset by lower debt levels.

Income Taxes

In the first nine months of fiscal year 2017, we recorded an income tax provision of \$15.4 million compared to \$9.8 million in the first nine months of fiscal year 2016. The effective tax rates for the first nine months of fiscal years 2017 and 2016 were a provision of 24.9% and 48.8%, respectively. The effective tax rate in the first nine months of fiscal year 2016 was higher than the effective tax rate in the first nine months of fiscal year 2017 due to higher levels of U.S. based losses for which no tax benefit is recognized. The performance of our U.S. operations has improved as a result of the restructuring activities that occurred during fiscal year 2016.

Our effective tax rate differs from the statutory federal income tax rate of 35% due primarily to a valuation reserve against our deferred tax assets and certain undistributed foreign earnings for which no U.S. taxes are provided. As a result of the valuation reserves that we maintain against our U.S. based deferred tax assets, our effective tax rate is subject to extreme volatility during periods when our U.S. operations experience significant losses in relation to total income from continuing operations before income taxes.

Liquidity and Capital Resources

Our capital requirements depend on a variety of factors, including the rate of increase or decrease in our existing business base; the success, timing and amount of investment required to bring new products to market; revenue growth or decline; and potential acquisitions. We believe that we have the financial resources necessary to meet our liquidity and capital requirements for the next 12 months, including funds needed for working capital.

As of October 30, 2016, our total stockholders’ equity was \$585.9 million. At that date we also had approximately \$297.9 million in cash and cash equivalents, and \$247.9 million of borrowings, net of debt discount.

Our primary sources and uses of cash for the corresponding periods are presented below:

(in millions)	Nine Months Ended	
	October 30, 2016	October 25, 2015
Sources of Cash		
Operating activities	\$84.7	\$ 67.6
Proceeds from exercise of stock options	1.7	4.0
Proceeds from disposition of business operations	32.0	—
Proceeds from sale of investments	0.6	5.3
Borrowings under line of credit	—	35.0
	\$119.0	\$ 111.9
Uses of Cash		
Capital expenditures on property, plant and equipment, net of sale proceeds	(13.8)	(10.7)
Purchases of other investments	(3.3)	(5.2)
Payment for employee share-based compensation payroll taxes	(5.9)	(6.1)
Acquisitions, net of cash acquired	—	(44.4)
Payment of long-term debt	(9.4)	(26.1)
Repurchase of common stock	(0.5)	(57.3)
	\$(32.9)	\$(149.8)
Effect of exchange rate increase on cash and cash equivalents	—	—
Net increase (decrease) in cash and cash equivalents	\$86.1	\$ (37.9)

We incur significant expenditures in order to fund the development, design, and manufacture of new products. We intend to continue to focus on those areas that have shown potential for viable and profitable market opportunities, which may require additional investment in equipment and the hiring of additional design and application engineers aimed at developing new products. Certain of these expenditures, particularly the addition of design engineers, do not generate significant payback in the short-term. We plan to finance these expenditures with cash generated by our operations and our existing cash balances.

A meaningful portion of our capital resources, and the liquidity they represent, are held by our foreign subsidiaries. As of October 30, 2016, our foreign subsidiaries held approximately \$228.7 million of cash and cash equivalents compared to \$170.7 million at January 31, 2016. Earnings previously taxed in the U.S. of \$18.1 million can be repatriated subject only to a 5% withholding tax, as we do not assert permanent reinvestment of earnings previously taxed in the U.S. As of October 30, 2016, our foreign subsidiaries had \$588.2 million of unremitted earnings for which no Federal or state taxes have been provided. Those historical earnings have been and are expected to continue to be permanently reinvested.

One of our primary goals is to improve the cash flows from our existing business activities. Additionally, we will continue to seek to maintain and improve our existing business performance with capital expenditures and, potentially, acquisitions and other investments that support achievement of our business strategies. Acquisitions may be made for either cash or stock consideration, or a combination of both.

Operating Activities

Net cash provided by operating activities is primarily due to net income adjusted for non-cash items plus fluctuations in operating assets and liabilities.

Operating cash flow for the first nine months of fiscal year 2017 was impacted by a \$13.0 million prepayment to a strategic supplier to ensure capacity at its fabrication facility and a \$25.0 million gain from the disposal of Snowbush IP. Operating cash flow for this period was also impacted by several significant non-cash transaction related items including \$35.5 million of depreciation and amortization expense and \$21.2 million of share-based compensation expense.

Investing Activities

Cash from investing activities is primarily influenced by acquisitions, proceeds from asset disposition, capital expenditures and other equity or cost method investments.

On March 4, 2015 we acquired Triune, a privately-held supplier of wireless charging and power management platforms targeted at, among other things, high and low power, high-efficiency applications. Under the terms of the purchase agreement the Company acquired all of the outstanding equity interest in Triune for a guaranteed minimum purchase price of \$45.0 million which consisted of \$35.0 million in cash paid at closing and \$10.0 million to be paid at a future date (“Deferred Payment”). To fund the Triune acquisition, we borrowed \$35.0 million under our prior revolving line of credit in March 2015. In September 2015, we paid \$9.5 million of the Deferred Payment with the remaining \$0.5 million being paid in the second quarter of fiscal year 2017. Subject to achieving certain future financial goals (“Triune Earn-out”), up to \$70.0 million of contingent consideration will be paid over the next two years if certain net revenue targets are achieved in each of the fiscal years 2017 and 2018. An additional payment of up to \$16.0 million will be paid after fiscal year 2018 if certain cumulative net revenue and contribution margin targets are achieved. We do not expect the Triune Earn-out targets to be achieved and we do not expect to pay any associated contingent consideration.

Capital expenditures were \$13.8 million for the first nine months of fiscal year 2017 compared to \$10.7 million for the first nine months of fiscal year 2016. The decrease was due to deferred equipment purchases. We expect our capital spending in the fourth quarter of fiscal year 2017 to include \$7.0 million to expand our test capacity in support of engineering and manufacturing functions. Additionally, on November 4, 2016, we entered into an agreement to acquire the facility we are currently leasing in Burlington, Canada for approximately \$12.0 million. The transaction is expected to close in December 2016. We expect to use available cash on hand to fund this purchase.

Financing Activities

Cash provided by financing activities is primarily attributable to borrowings under our revolving line of credit offset by principal and interest payments related to our long-term debt and repurchase of outstanding common stock.

On May 2, 2013, we entered into a credit agreement with certain lenders (the “Lenders”) and HSBC Bank USA, National Association, as administrative agent and as swing line lender and letter of credit issuer (the “Credit Agreement”). In accordance with this Credit Agreement, the Lenders provided us with senior secured first lien credit facilities in an aggregate principal amount of \$400.0 million, consisting of term loans in an aggregate principal amount of \$150.0 million and revolving line of credit commitments in an aggregate principal amount of \$250.0 million. Payments of long-term debt in the first nine months of fiscal years 2017 and 2016 included \$9.4 million and \$14.0 million of scheduled principal payments. As of October 30, 2016, we have \$67.8 million outstanding under our term loans and \$181.0 million outstanding under the revolving line of credit.

On November 15, 2016 (the “Closing Date”), we entered into an Amended and Restated Credit Agreement (the “New Credit Agreement”) with the lenders referred to therein (the “New Lenders”), and HSBC Bank USA, National Association, as administrative agent (in such capacity, the “Administrative Agent”) and as swing line lender and letter of credit issuer to refinance our existing Credit Agreement. Pursuant to the New Credit Agreement, the New Lenders provided us with senior secured first lien credit facilities in an aggregate principal amount of \$400.0 million (the “Facilities”), consisting of term loans in an aggregate principal amount of \$150.0 million (the “Term Loans”) and revolving commitments in an aggregate principal amount of \$250.0 million (the “Revolving Commitments”). Up to \$40.0 million of the Revolving Commitments may be used to obtain letters of credit, up to \$25.0 million of the Revolving Commitments may be used to obtain swing line loans, and up to \$40.0 million of the Revolving Commitments may be used to obtain revolving loans and letters of credit in certain currencies other than U.S. Dollars (“Alternative Currencies”). Each of the Term Loans and the Revolving Commitments is scheduled to mature on November 12, 2021.

The New Credit Agreement refinanced our existing \$400.0 million senior secured first lien credit facilities. All of the proceeds of the new Term Loans were used to repay in full all of the obligations outstanding under our existing Credit Agreement and to pay transaction costs in connection with such refinancing and the New Credit Agreement. As of November 15, 2016, approximately \$153.0 million of the new Revolving Commitments were undrawn. The proceeds of the new revolving credit facility may be used by us for capital expenditures, permitted acquisitions, permitted

dividends, working capital and general corporate purposes.

The New Credit Agreement provides that, subject to certain conditions, we may request, at any time and from time to time, the establishment of one or more additional term loan facilities and/or increases to the Revolving Commitments in an aggregate principal amount not to exceed the sum of (a) \$150.0 million and (b) the aggregate principal amount of all voluntary prepayments of Term Loans made prior to the date of incurrence of such additional term loan facilities and/or increases to the Revolving Commitments; however, the New Lenders are not required to provide such increase upon our request.

50

Interest on loans made under the New Credit Agreement in U.S. Dollars accrues, at our option, at a rate per annum equal to (1) the Base Rate (as defined below) plus a margin ranging from 0.25% to 1.25% depending upon Semtech's consolidated leverage ratio or (2) LIBOR (determined with respect to deposits in U.S. Dollars) for an interest period to be selected by us plus a margin ranging from 1.25% to 2.25% depending upon our consolidated leverage ratio (such margin, the "Applicable Margin"). The initial interest margin will be 2.00% for Base Rate loans and 1.00% for LIBOR rate loans, applicable until 2 business days following delivery of a compliance certificate by us to the Administrative Agent with respect to the first fiscal period ending after the Closing Date. The "Base Rate" is equal to a fluctuating rate equal to the highest of (a) the prime rate of the Administrative Agent, (b) ½ of 1% above the federal funds effective rate published by the Federal Reserve Bank of New York and (c) one-month LIBOR (determined with respect to deposits in U.S. Dollars) plus 1.00%.

Interest on loans made under the New Credit Agreement in Alternative Currencies accrues at a rate per annum equal to LIBOR (determined with respect to deposits in the applicable Alternative Currency) (other than loans made in Canadian Dollars, for which a special reference rate for Canadian Dollars applies) for an interest period to be selected by us plus the Applicable Margin.

The outstanding principal balance of the Term Loans will be subject to repayment in equal quarterly installments beginning on the last day of our fiscal quarter ending closest to January 31, 2017 in an amount equal to 10.0% per annum of the original principal amount of the Term Loans on the Closing Date in the first two years after such date, 12.5% per annum in years three and four after such date, and 15.0% per annum in year five after such date, with the balance being due at maturity on November 12, 2021. No amortization is required with respect to the revolving credit facility. We may voluntarily prepay borrowings under the new credit facilities at any time and from time to time, without premium or penalty, other than customary "breakage costs" and fees for LIBOR-based loans.

The Term Loans must be mandatorily prepaid using the proceeds of certain dispositions of assets and receipt of insurance proceeds, subject to agreed upon thresholds and exceptions and customary reinvestment rights.

We currently have in effect a stock repurchase program. This program represents one of our principal efforts to return value to our stockholders. We repurchased 23,968 shares under this program in the first nine months of fiscal year 2017 for \$0.5 million. In the first nine months of fiscal year 2016, we repurchased 2,681,476 shares under this program for \$57.3 million. We currently have \$62.2 million available under this program that may be used for future repurchases.

In the first nine months of fiscal year 2017, we received \$1.7 million in proceeds from the exercise of stock options compared to \$4.0 million in the first nine months of fiscal year 2016.

We do not directly control the timing of the exercise of stock options. Such exercises are independent decisions made by grantees and are influenced most directly by the stock price and the expiration dates of stock option awards. Such proceeds are difficult to forecast, resulting from several factors which are outside our control. We believe that such proceeds will remain a nominal source of cash in the future.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements, as those arrangements are defined by the SEC, that are reasonably likely to have a material effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

We do not have any unconsolidated subsidiaries or affiliated entities. We have no special purpose or limited purpose entities that provide off-balance sheet financing, liquidity or market or credit risk support. We do not engage in leasing, hedging, research and development services, or other relationships that expose us to liability that is not reflected on the face of the financial statements.

Contractual Obligations

There were no material changes in our contractual obligations during the first nine months of fiscal year 2017 from those disclosed in "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in Item 7 of our Annual Report on Form 10-K for the fiscal year ended January 31, 2016 filed with the SEC on March 31, 2016.

Inflation

Inflationary factors have not had a significant effect on our performance over the past several years. A significant increase in inflation would affect our future performance.

Available Information

General information about us can be found on our website at www.semtech.com. The information on our website is for informational purposes only and should not be relied on for investment purposes. The information on our website is not

51

incorporated by reference into this Quarterly Report and should not be considered part of this or any other report filed with the SEC.

We make available free of charge, either by direct access on our website or by a link to the SEC website, our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or as soon as reasonably practicable after such reports are electronically filed with, or furnished to, the SEC. Our reports filed with, or furnished to, the SEC are also available directly at the SEC’s website at www.sec.gov.

52

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

We are subject to a variety of market risks, including commodity risk and the risks related to foreign currency, interest rates and market performance that are discussed in Item 7A of our Annual Report on Form 10-K for fiscal year 2016 that ended on January 31, 2016 filed with the SEC on March 31, 2016. Many of the factors that can have an impact on our market risk are external to us, and so we are unable to fully predict them.

We do not engage in the trading of derivative financial instruments in the normal course of business to mitigate our risk related to interest rates. In the event interest rates were to increase 100 basis points and holding all other variables constant, annual net income and cash flows for the following year would decrease by approximately \$2.3 million as a result of our variable-rate debt. The effect of the 100 basis points increase would not be expected to significantly impact the fair value of our variable-rate debt.

We are subject to risks related to changes in foreign currency exchange rates as we experience expenses denominated in foreign currencies. As a result, changes in exchange rate fluctuations may positively or negatively affect results of operations. We enter into forward contracts to hedge anticipated foreign currency denominated transactions generally expected to occur in the current and subsequent fiscal years. All data relating to our derivative positions is presented in accordance with authoritative guidance. Accordingly, these cash flow hedges are designated for hedge accounting treatment and gains and losses on these contracts are recorded in accumulated other comprehensive income in stockholder's equity and reclassified into earnings at the time that the related transactions being hedged are recognized in earnings. Please see Note 19 to our unaudited condensed consolidated financial statements in Part I, Item 1 of this report for further discussion of our derivative instruments.

A 10% appreciation of the U.S. Dollar against foreign currencies that we hedge would result in an increase of approximately \$0.6 million in the fair value of our foreign currency forward contracts. A 10% depreciation of the U.S. Dollar against these foreign currencies would result in a decrease of approximately \$0.5 million in the fair value of our foreign currency forward contracts.

ITEM 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, which are designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), as appropriate to allow timely decisions regarding required disclosure. Our management, with the participation of our CEO and CFO, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report. Based on that evaluation, our CEO and CFO concluded that, our disclosure controls and procedures were effective as of October 30, 2016.

Changes in Internal Controls

There have been no changes to our internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. Legal Proceedings

Information about legal proceedings is set forth in Note 12 to the unaudited condensed consolidated financial statements included in Part I, Item 1 of this Quarterly Report.

ITEM 1A. Risk Factors

Please carefully consider and evaluate all of the information in this Quarterly Report and the risk factors set forth in our Annual Report on Form 10-K for the fiscal year ended January 31, 2016 filed with the SEC on March 31, 2016. The risks set forth in our Annual Report on Form 10-K are not the only ones we face. Additional risks not now known to us or that we currently deem immaterial may also impair our business operations. If any of these risks actually occur, our business could be materially harmed. If our business is harmed, the trading price of our common stock could decline.

The risk factors associated with our business have not materially changed, as compared to the risk factors disclosed in our Annual Report on Form 10-K for the fiscal year ended January 31, 2016 filed with the SEC on March 31, 2016.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

Recent Sales of Unregistered Securities

The issuance of the Warrant and the underlying 1,086,957 Warrant Shares to Comcast on October 5, 2016 were not registered under the Securities Act of 1933, as amended (the “Securities Act”). The Warrant and the underlying Warrant Shares were issued in a private placement exempt from the registration requirements of the Securities Act, in reliance on the exemptions set forth in Section 4(a)(2) of the Securities Act. We did not make any other sales of unregistered securities during the third quarter of fiscal year 2017.

Issuer Purchase of Equity Securities

This table provides information with respect to purchases by us of shares of our common stock during the third quarter of fiscal year 2017.

Fiscal Month/Year	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares That May Yet Be Purchased Under The Program (1)
August 2017 (08/01/16-08/28/16)	—	\$ —	—	\$ 62.2 million
September 2017 (08/29/16-09/25/16)	—	—	—	\$ 62.2 million
October 2017 (09/26/16-10/30/16)	—	—	—	\$ 62.2 million
Total activity	—	\$ —	—	—

We maintain an active stock repurchasing program which was approved by our Board of Directors in March 2008. (1) The stock repurchase program does not have an expiration date and our Board of Directors has authorized expansion of the program over the years.

As of October 30, 2016, we had repurchased \$136.2 million in shares of our common stock under the program since inception and the current remaining authorization under our stock repurchase program is \$62.2 million. Under our stock repurchase program, we may repurchase our common stock at any time or from time to time, without prior notice, subject to market conditions and other considerations. Our repurchases may be made through Rule 10b5-1 or other trading plans, open market purchases, privately negotiated transactions, block purchases or other transactions. We intend to fund repurchases under the program from cash on hand. We have no obligation to repurchase any shares under the stock repurchase program and may suspend or discontinue it at any time.

ITEM 3. Defaults Upon Senior Securities

None.

ITEM 4. Mine Safety Disclosures

Not applicable.

ITEM 5. Other Information

None.

55

ITEM 6. Exhibits

Documents that are not physically filed with this report are incorporated herein by reference to the location indicated.

Exhibit No.	Description	Location
