Sasol hosts investor visit to Lake Charles Chemicals Project

Sasol will today be hosting a site visit for analysts and investors to its Lake Charles Chemicals Project (LCCP) in Louisiana.

The LCCP consists of a world-scale 1,5 million ton per year ethane cracker, and six downstream chemical units and is currently under construction near Lake Charles, Louisiana in the USA, adjacent to Sasol's existing chemical operations.

Once commissioned, this world-scale petrochemicals complex will roughly triple Sasol's chemical production capacity in the United States, enabling Sasol to further strengthen its position in a growing global chemicals market.

A supporting presentation and webcast will be available on the Company's website at www.sasol.com/investor-centre/lake-charles-chemicals-project and will begin between 09h30 and 10h00 (CST), 16h30 and 17h00 (SA), 14h30 and 15h00 (GMT).
