QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-225

KIMBERLY-CLARK CORPORATION
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation)

P. O. Box 619100

Dallas, Texas

75261-9100

(Address of principal executive offices)

(Zip code)

(972) 281-1200

(Registrant's telephone number, including area code)

39-0394230
(I.R.S. Employer
Identification No.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Edgar Filing: KIMBERLY CLARK CORP - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of July 16, 2015, there were 364,275,024 shares of the Corporation's common stock outstanding.

KIMBERLY-CLARK CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1. Accounting Policies

Basis of Presentation

The accompanying unaudited Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all material adjustments which are of a normal and recurring nature necessary for a fair presentation of the results for the periods presented have been reflected. Dollar amounts are reported in millions, except per share dollar amounts, unless otherwise noted.

We completed the spin-off of our health care business on October 31, 2014. As a result, the health care business is presented as discontinued operations on the Consolidated Income Statement for all periods presented, and prior period Consolidated Income Statements and related disclosures have been recast accordingly. Segment results present net sales and operating profit by segment on a continuing operations basis. Other comprehensive income and cash flows of the health care business are included within our Consolidated Statement of Comprehensive Income and Consolidated Cash Flow Statement, respectively, for the three and six months ended June 30, 2014, as applicable. For further information, refer to the Consolidated Financial Statements and footnotes included in our Annual Report on Form 10-K for the year ended December 31, 2014. The terms "Corporation," "Kimberly-Clark," "K-C," "we," "our" and "us" refer to Kimberly-Clark Corporation and its consolidated subsidiaries.

Highly Inflationary Accounting for Venezuelan Operations

We account for our operations in Venezuela using highly inflationary accounting. Since February 2013, the Central Bank of Venezuela's regulated currency exchange system rate has been 6.3 bolivars per U.S. dollar. During March 2013, the Venezuelan government announced a complementary currency exchange system, SICAD. In February 2014, the president of Venezuela announced that another floating rate exchange system (referred to as SICAD II) would be initiated. On February 10, 2015, the Venezuelan government announced the addition of a new foreign currency exchange system referred to as the Marginal Currency System, or SIMADI, along with the elimination of the SICAD II system.

We have historically measured results in Venezuela at the rate in which we transact our business. We have qualified for access to the official exchange rate because we manufacture and sell price-controlled products. Since March 2013, exchange transactions have taken place through letters of credit which resulted in an effective exchange rate of 6.3 bolivars per U.S. dollar and through approved transactions using the regulated currency exchange system, which were also at a 6.3 exchange rate. To date, we have not been invited to participate in SICAD, and we did not seek exchange at SICAD II or SIMADI because we qualify for the more favorable official 6.3 rate and have chosen to pursue exchange at that rate.

We continue to manufacture and sell products in Venezuela as well as import raw materials and finished goods under approved foreign exchange transactions. We continued to measure results at the 6.3 rate through December 31, 2014, however, given the level of uncertainty and lack of liquidity in Venezuela, in part due to declines and volatility in the price of oil, we remeasured our local currency-denominated balance sheet as of December 31, 2014 at the year-end floating SICAD II exchange rate of 50 bolivars per U.S. dollar as we believed this was the most accessible rate available in the absence of exchange at 6.3 bolivars per U.S. dollar. This remeasurement resulted in a non-deductible charge of \$462 in the Consolidated Income Statement for the year ended December 31, 2014.

With the elimination of SICAD II in February 2015, we remeasured our local currency-denominated balance sheet during the first quarter of 2015 at the applicable floating SIMADI exchange rate as we believe this is the most accessible rate available to us in the absence of exchange at 6.3 bolivars per U.S. dollar. This remeasurement resulted

in a non-deductible charge of \$45 in the Consolidated Income Statement for the three months ended March 31, 2015, with \$5 recorded in cost of products sold and \$40 recorded in other (income) and expense, net. Remeasurement charges during the three months ended June 30, 2015 were not material. The SIMADI exchange rate at June 30, 2015 was 197 bolivars per U.S. dollar. At June 30, 2015, our net investment in K-C Venezuela was \$105, and the bolivar-denominated net monetary asset position was not significant. Net sales of K-C Venezuela represented less than 1 percent and 3 percent of consolidated net sales for the six months ended June 30, 2015 and 2014, respectively.

7

New Accounting Standards

In May 2014, the Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers, which provides a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and will supersede most current revenue recognition guidance. The standard is effective for public entities for annual and interim periods beginning after December 15, 2017. Early adoption is permitted as of one year prior to the current effective date. The guidance permits two implementation approaches, one requiring retrospective application of the new standard with restatement of prior years and one requiring prospective application of the new standard with disclosure of results under old standards. The effects of this standard on our financial position, results of operations and cash flows are not yet known.

Note 2. 2014 Organization Restructuring

In October 2014, we initiated a restructuring plan in order to improve organization efficiency and offset the impact of stranded overhead costs resulting from the spin-off of our health care business. The restructuring is intended to improve our underlying profitability and increase our flexibility to invest in targeted growth initiatives, brand building and other capabilities critical to delivering future growth. The plan is expected to be completed by the end of 2016, with total costs, primarily severance, anticipated to be \$130 to \$160 after tax (\$190 to \$230 pre-tax). Cash costs are projected to be approximately 80 percent of the total charges. The restructuring is expected to impact all of our business segments and our organizations in all major geographies.

The following charges were incurred in connection with the restructuring:

	Three Months Ended June 30, 2015	Six Months Ended June 30, 2015
Cost of products sold	\$7	\$15
Marketing, research and general expenses	5	10
Provision for income taxes	(4) (12
Net charges	\$8	\$13

Through June 30, 2015, cumulative pre-tax charges for the restructuring were \$158 (\$108 after tax), including cumulative pre-tax cash charges of \$125. Cash payments during the six months ended June 30, 2015 related to the restructuring were \$49.

Note 3. Fair Value Information

The following fair value information is based on a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels in the hierarchy used to measure fair value are:

Level 1 – Unadjusted quoted prices in active markets accessible at the reporting date for identical assets and liabilities.

Level 2 – Quoted prices for similar assets or liabilities in active markets. Quoted prices for identical or similar assets and liabilities in markets that are not considered active or financial instruments for which all significant inputs are observable, either directly or indirectly.

Level 3 – Prices or valuations that require inputs that are significant to the valuation and are unobservable.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

During the six months ended June 30, 2015 and for the full year 2014, there were no significant transfers among level 1, 2, or 3 fair value determinations.

Company-owned life insurance ("COLI") assets and derivative assets and liabilities are measured on a recurring basis at fair value. COLI assets were \$59 and \$58 at June 30, 2015 and December 31, 2014, respectively. The COLI policies are a source of funding primarily for our nonqualified employee benefits and are included in other assets. The fair value of the COLI policies is considered a level 2 measurement and is derived from investments in a mix of money market, fixed income and equity funds managed by unrelated fund managers. At June 30, 2015 and December 31, 2014, derivative assets were \$93 and \$54, respectively, and derivative liabilities were \$63 and \$116, respectively. The fair values of derivatives used to manage interest rate risk and commodity price risk are based on LIBOR rates and

interest rate swap curves and NYMEX price quotations, respectively. The fair value of hedging instruments used to manage foreign currency risk is based on published quotations of spot currency rates and forward points, which are converted into implied forward currency rates. Measurement of our derivative assets and liabilities is considered a level 2 measurement. Additional information on our classification and use of derivative instruments is contained in Note 7.

8

The following table includes the fair value of our financial instruments for which disclosure of fair value is required:

	Fair Value Hierarchy Level	Carrying Amount June 30, 2015	Estimated Fair Value	Carrying Amount December 31, 2014	Estimated Fair Value
Assets					
Cash and cash equivalents ^(a)	1	\$603	\$603	\$789	\$789
Time deposits ^(b)	1	119	119	130	130
Liabilities and redeemable securities of subsidiaries					
Short-term debt ^(c)	2	955	955	777	777
Long-term debt ^(d)	2	6,644	7,198	6,179	6,963
Redeemable preferred securities of subsidiaries ^(e)	3	72	72	72	72

(a) Cash equivalents are composed of certificates of deposit, time deposits and other interest-bearing investments with original maturity dates of 90 days or less. Cash equivalents are recorded at cost, which approximates fair value.

(b) Time deposits are composed of deposits with original maturities of more than 90 days but less than one year and instruments with original maturities of greater than one year, included in other current assets or other assets in the Consolidated Balance Sheet, as appropriate. Time deposits are recorded at cost, which approximates fair value.

(c) Short-term debt is composed of U.S. commercial paper and/or other similar short-term debt issued by non-U.S. subsidiaries, all of which are recorded at cost, which approximates fair value.

(d) Long-term debt includes the current portion of these debt instruments. Fair values were estimated based on quoted prices for financial instruments for which all significant inputs were observable, either directly or indirectly.

(e) The redeemable preferred securities of subsidiaries are not traded in active markets. For certain instruments, fair values were calculated using a floating rate pricing model that compared the stated spread to the fair value spread to determine the price at which each of the financial instruments should trade. The model used the following inputs to calculate fair values: face value, current LIBOR rate, unobservable fair value credit spread, stated spread, maturity date and interest or dividend payment dates. Additionally, the fair value of the remaining redeemable securities was based on various inputs, including an independent third-party appraisal, adjusted for current market conditions.

Note 4. Employee Postretirement Benefits

The table below presents net periodic benefit cost information for defined benefit plans and other postretirement benefit plans:

	Pension Benefits		Other Benefits	
	Three Months Ended June 30			
	2015	2014	2015	2014
Service cost	\$9	\$13	\$2	\$2
Interest cost	45	71	9	9
Expected return on plan assets	(55)	(84)	—	—
Recognized net actuarial loss	19	26	(1)	—
Settlements	1,320	—	—	—
Other	(2)	—	—	—

Edgar Filing: KIMBERLY CLARK CORP - Form 10-Q

Settlements	1,329	—	—	—
Other	(7) 5	—	—
Net periodic benefit cost	\$1,368	\$52	\$22	\$24

9

Effective January 2015, the U.S. pension plan was amended to include a lump-sum pension benefit payout option for certain plan participants. In addition, in April 2015, the U.S. pension plan completed the purchase of group annuity contracts that transferred to two insurance companies the pension benefit obligations totaling \$2.5 billion for approximately 21,000 Kimberly-Clark retirees in the United States. As a result of these changes, we recognized pension settlement charges of \$0.8 billion after tax (\$1.3 billion pre-tax in other (income) and expense, net) during the six months ended June 30, 2015, mostly in the second quarter.

For the six months ended June 30, 2015, we made cash contributions of \$435 to our pension trusts, of which \$410 relates to the changes above. In total we expect to contribute \$450 to \$500 to our defined benefit pension plans for the full year 2015. For the six months ended June 30, 2014, we made cash contributions of \$180 to our pension trusts.

Note 5. Earnings Per Share ("EPS")

There are no adjustments required to be made to net income for purposes of computing EPS. A reconciliation of the average number of common shares outstanding used in the basic and diluted EPS computations follows:

(Millions of shares)	Three Months Ended		Six Months Ended	
	June 30		June 30	
	2015	2014	2015	2014
Basic	364.3	375.8	364.7	377.4
Dilutive effect of stock options	0.9	1.2	1.0	1.3
Dilutive effect of restricted share and restricted share unit awards	1.5	1.4	1.6	1.6
Diluted	366.7	378.4	367.3	380.3

There were no significant outstanding stock-based awards excluded from the computation of diluted EPS during the three and six month periods ended June 30, 2015 and 2014.

The number of common shares outstanding as of June 30, 2015 and 2014 was 364.3 million and 374.0 million, respectively.

Note 6. Stockholders' Equity

Set forth below is a reconciliation for the six months ended June 30, 2015 of the carrying amount of total stockholders' equity from the beginning of the period to the end of the period.

	Stockholders' Equity	
	The Corporation	Noncontrolling Interests
Balance at December 31, 2014	\$729	\$270
Net Income	163	27
Other comprehensive income, net of tax		
Unrealized translation	(310)	(6)
Employee postretirement benefits	860	1
Other	(5)	—
Stock-based awards exercised or vested	82	—
Recognition of stock-based compensation	51	—
Income tax benefits on stock-based compensation	24	—
Shares repurchased	(332)	—
Dividends declared	(642)	(19)
Other	(104)	(45)
Balance at June 30, 2015	\$516	\$228

During the six months ended June 30, 2015, we repurchased 2.8 million shares at a total cost of \$300.

Net unrealized currency gains or losses resulting from the translation of assets and liabilities of foreign subsidiaries, except those in highly inflationary economies, are recorded in accumulated other comprehensive income ("AOCI").

For these operations, changes in exchange rates generally do not affect cash flows; therefore, unrealized translation is

recorded in AOCI rather than net income. Upon sale or substantially complete liquidation of any of these subsidiaries, the applicable unrealized translation would be removed from AOCI and reported as part of the gain or loss on the sale or liquidation.

Also included in unrealized translation are the effects of foreign exchange rate changes on intercompany balances of a long-term investment nature and transactions designated as hedges of net foreign investments.

The change in net unrealized currency translation for the six months ended June 30, 2015 was primarily due to the strengthening of the U.S. dollar versus most foreign currencies, including the Brazilian real, Euro and Australian dollar.

The changes in the components of AOCI attributable to Kimberly-Clark, net of tax, are as follows:

	Unrealized Translation	Defined Benefit Pension Plans	Other Postretirement Benefit Plans	Cash Flow Hedges and Other
Balance as of December 31, 2013	\$ (525)	\$(1,668)	\$ (15)	\$(34)
Other comprehensive income (loss) before reclassifications	155	(27)	20	(15)
(Income) loss reclassified from AOCI	—	33	(a) —	4
Net current period other comprehensive income (loss)	155	6	20	(11)
Balance as of June 30, 2014	\$ (370)	\$(1,662)	\$ 5	\$(45)
Balance as of December 31, 2014	\$ (1,335)	\$(1,924)	\$ (37)	\$(16)
Other comprehensive income (loss) before reclassifications	(310)	9	7	16
(Income) loss reclassified from AOCI	—	844	(a) —	(21)
Net current period other comprehensive income (loss)	(310)	853	7	(5)
Other	(12)	—	—	1
Balance as of June 30, 2015	\$ (1,657)	\$(1,071)	\$ (30)	\$(20)

(a) Included in computation of net periodic pension and postretirement benefits costs (see Note 4).

During the first quarter of 2015, we acquired the remaining 49.9 percent interest in our subsidiary in Israel, Hogla-Kimberly, Ltd., for \$151. As our subsidiary in Turkey was wholly-owned by our subsidiary in Israel, through this acquisition we also effectively acquired the remaining 49.9 percent interest in our subsidiary in Turkey, Kimberly-Clark Tuketim Mallari Sanayi ve Ticaret A.s. The acquisition was recorded as an equity transaction that reduced noncontrolling interests, AOCI and additional paid-in capital by \$45, \$12 and \$94, respectively.

The purchase of additional ownership in an already controlled subsidiary is treated as an equity transaction with no gain or loss recognized in consolidated net income or comprehensive income. The effect of the change in ownership interest is as follows:

	Six Months Ended June 30, 2015
Net Income attributable to Kimberly-Clark Corporation	\$163
Decrease in Kimberly-Clark Corporation's additional paid-in capital for acquisition	(94)
Change from net income attributable to Kimberly-Clark Corporation and transfers to noncontrolling interest	\$69

Note 7. Objectives and Strategies for Using Derivatives

As a multinational enterprise, we are exposed to financial risks, such as changes in foreign currency exchange rates, interest rates, and commodity prices. We employ a number of practices to manage these risks, including operating and financing activities and, where appropriate, the use of derivative instruments. We enter into derivative instruments to hedge a portion of forecasted cash flows denominated in foreign currencies for non-U.S. operations' purchases of raw materials, which are priced in U.S. dollars, and imports of intercompany finished goods and work-in-process priced predominantly in U.S. dollars and euros. The derivative instruments used to manage these exposures are designated and qualify as cash flow hedges. The foreign currency exposure on certain non-functional currency denominated monetary assets and liabilities, primarily intercompany loans and accounts payable, is hedged with primarily undesignated derivative instruments.

Interest rate risk is managed using a portfolio of variable- and fixed-rate debt composed of short- and long-term instruments. Interest rate swap contracts may be used to facilitate the maintenance of the desired ratio of variable- and fixed-rate debt and are designated and qualify as fair value hedges. From time to time, we also hedge the anticipated issuance of fixed-rate debt, using forward-starting swaps, and these contracts are designated as cash flow hedges.

We use derivative instruments, such as forward swap contracts, to hedge a limited portion of our exposure to market risk arising from changes in prices of certain commodities. These derivatives are designated as cash flow hedges of specific quantities of the underlying commodity expected to be purchased in future months.

Translation adjustments result from translating foreign entities' financial statements into U.S. dollars from their functional currencies. The risk to any particular entity's net assets is reduced to the extent that the entity is financed with local currency borrowing. Translation exposure, which results from changes in translation rates between functional currencies and the U.S. dollar, generally is not hedged. However, consistent with other years, a portion of our net investment in our Mexican affiliate has been hedged. At June 30, 2015, we had in place net investment hedges of \$103 for a portion of our investment in our Mexican affiliate.

Set forth below is a summary of the total designated and undesignated fair values of our derivative instruments:

	Assets		Liabilities	
	June 30, 2015	December 31, 2014	June 30, 2015	December 31, 2014
Foreign currency exchange contracts	\$91	\$54	\$45	\$102
Interest rate contracts	2	—	4	4
Commodity price contracts	—	—	14	10
Total	\$93	\$54	\$63	\$116

The derivative assets are included in the Consolidated Balance Sheet in other current assets and other assets, as appropriate. The derivative liabilities are included in the Consolidated Balance Sheet in accrued expenses and other liabilities, as appropriate.

Derivative instruments that are designated and qualify as fair value hedges are predominantly used to manage interest rate risk. The fair values of these derivative instruments are recorded as an asset or liability, as appropriate, with the offset recorded in current earnings. The offset to the change in fair values of the related hedged items also is recorded in current earnings. Any realized gain or loss on the derivatives that hedge interest rate risk is amortized to interest expense over the life of the related debt. At June 30, 2015, the aggregate notional values of outstanding interest rate contracts designated as fair value hedges were \$250. Fair value hedges resulted in no significant ineffectiveness in the six months ended June 30, 2015 and 2014. For the three and six month periods ended June 30, 2015 and 2014, gains or losses recognized in interest expense for interest rate swaps were not significant. For the six month periods ended June 30, 2015 and 2014, no gain or loss was recognized in earnings as a result of a hedged firm commitment no longer qualifying as a fair value hedge.

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative instrument is initially recorded in AOCI, net of related income taxes, and recognized in earnings in the same period that the hedged exposure affects earnings. As of June 30, 2015, outstanding commodity forward contracts were in place to hedge a limited portion of our estimated requirements of the related underlying commodities in the remainder of 2015 and future periods. As of June 30, 2015, the aggregate notional values of outstanding foreign exchange and interest rate derivative contracts designated as cash flow hedges were \$830 and \$200, respectively. Cash flow hedges resulted in no significant ineffectiveness for the six months ended June 30, 2015 and 2014. For the six months ended June 30, 2015 and 2014, no gains or losses were reclassified into earnings as a result of the discontinuance of cash flow hedges due to the original forecasted transaction no longer being probable of occurring. At June 30, 2015, amounts to be reclassified from AOCI during the next twelve months are not expected to be material. The maximum maturity of cash flow hedges in place at June 30, 2015 is December 2017.

Gains or losses on undesignated foreign exchange hedging instruments are immediately recognized in other (income) and expense, net. Gains of \$74 and \$40 were recorded in the three month periods ended June 30, 2015 and 2014, respectively. Losses of \$81 and gains of \$53 were recorded in the six month periods ended June 30, 2015 and 2014, respectively. The effect on earnings from the use of these non-designated derivatives is substantially neutralized by the transactional gains and losses recorded on the underlying assets and liabilities. At June 30, 2015, the notional amount of these undesignated derivative instruments was \$2.5 billion.

Note 8. Business Segment Information

We are organized into operating segments based on product groupings. These operating segments have been aggregated into three reportable global business segments: Personal Care, Consumer Tissue and K-C Professional. The reportable segments were determined in accordance with how our executive managers develop and execute global strategies to drive growth and profitability. These strategies include global plans for branding and product positioning, technology, research and development programs, cost reductions including supply chain management, and capacity and capital investments for each of these businesses. Segment management is evaluated on several factors, including operating profit. Segment operating profit excludes other (income) and expense, net and income and expense not associated with the business segments.

The principal sources of revenue in each global business segment are described below:

Personal Care brands offer parents a trusted partner in caring for their families and deliver confidence, protection and discretion to adults through a wide variety of innovative solutions and products such as disposable diapers, training and youth pants, swimpants, baby wipes, feminine and incontinence care products, and other related products.

Products in this segment are sold under the Huggies, Pull-Ups, Little Swimmers, GoodNites, DryNites, Kotex, U by Kotex, Intimus, Depend, Plenitud, Poise and other brand names.

Consumer Tissue offers a wide variety of innovative solutions and trusted brands that touch and improve people's lives every day. Products in this segment include facial and bathroom tissue, paper towels, napkins and related products, and are sold under the Kleenex, Scott, Cottonelle, Viva, Andrex, Scottex, Neve and other brand names.

K-C Professional helps transform workplaces for employees and patrons, making them healthier, safer and more productive, through a range of solutions and supporting products such as apparel, wipers, soaps, sanitizers, tissue and towels. Key brands in this segment include Kleenex, Scott, WypAll, Kimtech and Jackson Safety.

The following schedules present information concerning consolidated operations by business segment:

	Three Months Ended			Six Months Ended June

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction

This management's discussion and analysis of financial condition and results of operations is intended to provide investors with an understanding of our recent performance, financial condition and prospects. The following will be discussed and analyzed:

- Overview of Second Quarter 2015 Results
- Results of Operations and Related Information
- Liquidity and Capital Resources
- Legal Matters
- Business Outlook

Overview of Second Quarter 2015 Results

• Net sales of \$4.6 billion decreased 6 percent compared to the year-ago period, as changes in foreign currency exchange rates reduced net sales 10 percent.

• Operating profit and net income (loss) attributable to Kimberly-Clark Corporation decreased \$1,319 and \$814, respectively, compared to the prior year. The decrease includes pension settlement charges of \$813 after tax (\$1,322 pre-tax in other (income) and expense, net) primarily related to the purchase of group annuity contracts that transferred to two insurance companies certain pension benefit obligations. See Note 4 to the Consolidated Financial Statements for additional information. Excluding the pension settlement charges, operating profit and net income attributable to Kimberly-Clark Corporation were essentially even with the year-ago period.

• Diluted earnings per share were a loss of \$0.83 versus income of \$1.35 in the prior year. Excluding the pension settlement charges, diluted earnings per share for the second quarter 2015 were \$1.39.

Results of Operations and Related Information

This section presents a discussion and analysis of our second quarter 2015 net sales, operating profit and other information relevant to an understanding of the results of operations.

We completed the spin-off of our health care business (Halyard Health, Inc.) on October 31, 2014. As a result, the health care business is presented as discontinued operations on the Consolidated Income Statement for all periods presented, and prior period Consolidated Income Statements and related disclosures have been recast accordingly. Segment results present net sales and operating profit by segment on a continuing operations basis.

N.M. - Not Meaningful

Commentary - Second Quarter of 2015 Compared to Second Quarter of 2014 Consolidated

Net sales of \$4.6 billion in the second quarter of 2015 were down 6 percent compared to the year-ago period. Changes in foreign currency exchange rates reduced net sales 10 percent as a result of the weakening of most currencies relative to the U.S. dollar. Sales volumes increased 3 percent and product mix/other was favorable by 1 percent. Second quarter operating profit was a loss of \$544 in 2015 and profit of \$775 in 2014. Results in 2015 include \$1,322 of charges for pension settlements and \$12 of 2014 Organization Restructuring costs. The year-over-year operating profit comparison benefited from sales volume growth and improved product mix, \$105 in cost savings from the company's FORCE (Focused On Reducing Costs Everywhere) program and \$20 of savings from the 2014 Organization Restructuring. Input costs decreased \$40 overall, including \$35 of lower costs for raw materials other than fiber and \$5 of lower energy costs. Translation effects due to changes in foreign currency exchange rates lowered operating profit by \$80 and transaction effects also negatively impacted comparisons. The currency impacts were most significant in Latin America and Eastern Europe.

Other (income) and expense, net was expense of \$1,332 in 2015 and income of \$13 in 2014. Results in 2015 were driven by pension settlement charges and foreign currency transaction losses, while prior-period results benefited from a gain on an asset sale.

The second quarter 2015 loss before income taxes and equity interests of \$613 and the overall tax benefit of \$281 include pension settlement charges of \$1,322 and a corresponding tax benefit of \$509. Excluding the impact of the pension settlement charges, pre-tax earnings and the provision for income taxes were \$709 and \$228, respectively, resulting in an effective tax rate of 32.2 percent. The second quarter 2014 effective tax rate was 31.8 percent.

Kimberly-Clark's share of net income of equity companies in the second quarter of 2015 was \$39, even with the year-ago period. At Kimberly-Clark de Mexico, S.A.B. de C.V., results benefited from sales volume growth and higher net selling prices, lower input costs and cost savings, but were negatively impacted by a weaker Mexican peso. Second quarter net income attributable to noncontrolling interests was \$12 in 2015 and \$21 in 2014. The change was driven by the redemption of \$0.5 billion of preferred securities in December 2014.

Personal Care Segment

Second quarter net sales of \$2.3 billion decreased 6 percent. Currency rates were unfavorable by more than 10 percent. Volumes increased 3 percent and net selling prices and product mix each improved 1 percent. Second quarter operating profit of \$473 increased 4 percent. The comparison benefited from sales volume growth and higher net selling prices, cost savings and lower input costs, partially offset by unfavorable effects from changes in currency rates.

Net sales in North America decreased 2 percent. Currency was unfavorable 1 percent and the combined impact of changes in net selling prices and product mix reduced net sales 1 percent. Huggies baby wipes volumes rose double digits, including benefits from innovation and market share gains. Volumes in adult care, child care and Huggies diapers were all down slightly. Feminine care volumes were down high-single digits compared to mid-single digit growth in the year-ago period, with market shares down slightly.

Net sales in developing and emerging markets decreased 7 percent, including a 20 percent negative impact from changes in currency rates. Volumes increased 7 percent, net selling prices improved 5 percent and product mix advanced 1 percent. The volume growth included gains in China and most of Latin America, led by Argentina, Brazil and Peru. The higher net selling prices were driven by increases in Eastern Europe and Latin America in response to weaker currency rates.

Net sales in developed markets outside North America (Australia, South Korea and Western/Central Europe) decreased 12 percent. Currency rates were unfavorable by 11 percent and net selling prices and volumes were both down slightly.

Consumer Tissue Segment

Second quarter net sales of \$1.5 billion decreased 8 percent. Currency rates were unfavorable by 9 percent and net selling prices were down 2 percent, while volumes were up 3 percent. Second quarter operating profit of \$260 increased 8 percent. The comparison benefited from cost savings, lower manufacturing-related costs and reduced marketing, research and general expenses, partially offset by unfavorable currencies and lower net selling prices.

Net sales in North America were even with the year-ago period. Volumes increased 5 percent. Net selling prices were off 4 percent, including the impact of increased promotion activity, and product mix was unfavorable 1 percent. Volumes rose high-single digits in bathroom tissue, with benefits from increased promotion shipments on Cottonelle. Volumes increased low-single digits in facial tissue and paper towels.

Net sales in developing and emerging markets decreased 20 percent, including a 23 point negative impact from currency rates. Net selling prices increased 2 percent and volumes advanced 1 percent.

Net sales in developed markets outside North America decreased 13 percent, driven by unfavorable currency rates.

K-C Professional ("KCP") Segment

Second quarter net sales of \$0.8 billion decreased 4 percent. Changes in currency rates reduced net sales 9 percent and net selling prices were down 1 percent. Volumes rose 3 percent and product mix/other was favorable by 3 percent, including sales of nonwovens to Halyard Health, Inc. in conjunction with a near-term supply agreement. Second quarter operating profit of \$145 decreased 5 percent. The comparison was negatively impacted by unfavorable currency effects, partially offset by benefits from higher volumes, cost savings and lower input costs.

Net sales in North America increased 1 percent. Volumes rose 3 percent. The combined impact of changes in net selling prices and product mix reduced sales 1 percent and currency was unfavorable 1 percent. Volumes were up mid-single digits in wipers and safety products and low-single digits in washroom products.

Net sales in developing and emerging markets decreased 13 percent, including a 21 point negative impact from currency rates. Volumes rose 4 percent, net selling prices improved 3 percent and product mix advanced 1 percent. The volume growth was driven by increases in Latin America and Asia.

Net sales in developed markets outside North America were down 16 percent. Changes in currency rates reduced net sales 15 percent. Net selling prices were off 3 percent, mostly in Western/Central Europe, while overall volumes increased 2 percent.

First Six Months of 2015 Compared to First Six Months of 2014

For the first six months of 2015, net sales of \$9.3 billion decreased 5 percent compared to the year-ago period, as changes in foreign currency exchange rates reduced net sales 9 percent. Sales volumes increased 3 percent and product mix/other was favorable by 1 percent.

Year-to-date operating profit was \$204 in 2015 versus \$1,486 in 2014. Results in 2015 include \$1,331 of charges for pension settlements, \$25 of 2014 Organization Restructuring costs and a charge of \$45 related to the remeasurement of the Venezuelan balance sheet. Results in 2014 include \$12 of restructuring costs for European strategic changes and a charge of \$39 related to a regulatory dispute in the Middle East. Operating profit comparisons benefited from sales volume growth, FORCE cost savings of \$195 and \$30 of savings from the 2014 Organization Restructuring. In addition, input costs overall were \$55 lower. Translation effects due to changes in foreign currency exchange rates lowered operating profit by \$160 and transaction effects also negatively impacted the operating profit comparisons. Other (income) and expense, net was expense of \$1,394 in 2015 and \$45 in 2014. Results in 2015 were driven by pension settlement charges, while prior-period results were driven by a charge related to the regulatory dispute in the Middle East.

Through six months, diluted earnings per share were \$0.44 in 2015 compared to diluted earnings per share from continuing operations of \$2.58 in 2014. Excluding the pension settlement charges, earnings per share in 2015 were \$2.67. The 9 cent increase was driven by higher operating profit and a lower share count, partially offset by a higher effective tax rate.

2014 Organization Restructuring

In October 2014, we initiated a restructuring plan in order to improve organization efficiency and offset the impact of stranded overhead costs resulting from the spin-off of our health care business. The restructuring is intended to improve underlying profitability and increase flexibility to invest in targeted growth initiatives, brand building and other capabilities critical to delivering future growth.

The restructuring is expected to be completed by the end of 2016, with total costs, primarily severance, anticipated to be \$130 to \$160 after tax (\$190 to \$230 pre-tax). Cash costs are projected to be approximately 80 percent of the total charges. Cumulative pre-tax savings from the restructuring are expected to be \$120 to \$140 by the end of 2017, and were \$35 through June 30, 2015. The restructuring is expected to impact all of our business segments and our organizations in all major geographies.

Charges of \$8 after tax (\$12 pre-tax) and \$13 after tax (\$25 pre-tax) were recognized during the three and six months ended June 30, 2015, respectively, for the restructuring.

Defined Benefit Pension Plan Changes

Effective January 2015, the U.S. pension plan was amended to include a lump-sum pension benefit payout option for certain plan participants. In addition, in April 2015, the U.S. pension plan completed the purchase of group annuity contracts that transferred to two insurance companies the pension benefit obligations totaling \$2.5 billion for approximately 21,000 Kimberly-Clark retirees in the United States. As a result of these changes, we recognized pension settlement charges of \$0.8 billion after tax (\$1.3 billion pre-tax in other (income) and expense, net) during the six months ended June 30, 2015, mostly in the second quarter.

For the six months ended June 30, 2015, we made cash contributions of \$435 to our pension trusts, of which \$410 relates to the changes above. In total we expect to contribute \$450 to \$500 to our defined benefit pension plans for the

full year 2015. For the six months ended June 30, 2014, we made cash contributions of \$180 to our pension trusts.

Liquidity and Capital Resources

Cash Provided by Operations

Cash provided by operations was \$0.8 billion for the first six months of 2015, compared to \$1.3 billion in the prior year. The comparison was affected by the higher pension contributions, increased operating working capital and the spin-off of the health care business in the fourth quarter of 2014.

Investing

During the first six months of 2015, our capital spending was \$527 compared to \$439 in the prior year. We anticipate that full-year 2015 capital spending will be \$950 to \$1,050.

Financing

On February 27, 2015, we issued \$250 aggregate principal amount of 1.85% notes due March 1, 2020 and \$250 aggregate principal amount of 2.65% notes due March 1, 2025. Proceeds from the offering were used for general corporate purposes, including pension contribution payments.

Our short-term debt, which consists of U.S. commercial paper with original maturities up to 90 days and/or other similar short-term debt issued by non-U.S. subsidiaries, was \$955 as of June 30, 2015 (included in debt payable within one year on the Consolidated Balance Sheet). The average month-end balance of short-term debt for the second quarter of 2015 was \$1,121. These short-term borrowings provide supplemental funding for supporting our operations. The level of short-term debt generally fluctuates depending upon the amount of operating cash flows and the timing of customer receipts and payments for items such as pension contributions, dividends and income taxes.

At June 30, 2015, total debt was \$7.6 billion compared to \$7.0 billion at December 31, 2014.

We maintain a \$2.0 billion revolving credit facility which expires in 2019. This facility, currently unused, supports our commercial paper program, and would provide liquidity in the event our access to the commercial paper markets is unavailable for any reason.

We repurchase shares of Kimberly-Clark common stock from time to time pursuant to publicly announced share repurchase programs. During the first six months of 2015, we repurchased 2.8 million shares of our common stock at a cost of \$300 through a broker in the open market. In addition, we acquired the remaining interest in our subsidiary in Israel for \$151. We are targeting full-year 2015 share repurchases of \$700 to \$900, subject to market conditions.

We account for our operations in Venezuela using highly inflationary accounting. We have historically measured results in Venezuela at the rate in which we transact our business, which was 6.3 bolivars per U.S. dollar until December 31, 2014. Given the level of uncertainty and lack of liquidity in Venezuela, in part due to declines and volatility in the price of oil, we remeasured our local currency-denominated balance sheet as of December 31, 2014 at the year-end floating SICAD II exchange rate of 50 bolivars per U.S. dollar, as we believed this was the most accessible rate available in the absence of exchange at 6.3 bolivars per U.S. dollar. This remeasurement resulted in a non-deductible charge of \$462 in the Consolidated Income Statement for the year ended December 31, 2014.

On February 10, 2015, the Venezuelan government announced the addition of a new foreign currency exchange system referred to as the Marginal Currency System, or SIMADI, along with the elimination of the SICAD II system. With the elimination of SICAD II in February 2015, we remeasured our local currency-denominated balance sheet during the first quarter of 2015 at the applicable floating SIMADI exchange rate as we believe this is the most accessible rate available to us in the absence of exchange at 6.3 bolivars per U.S. dollar. This remeasurement resulted in a non-deductible charge of \$45 in the Consolidated Income Statement for the three months ended March 31, 2015. Remeasurement charges during the three months ended June 30, 2015 were not material. The SIMADI exchange rate at June 30, 2015 was 197 bolivars per U.S. dollar. At June 30, 2015, our net investment in K-C Venezuela was \$105, and the bolivar-denominated net monetary asset position was not significant. Net sales of K-C Venezuela represented less than 1 percent and 3 percent of consolidated net sales for the six months ended June 30, 2015 and 2014, respectively.

Legal Matters

We believe that the ultimate disposition of litigation or compliance obligations with environmental protections laws and regulations, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, results of operations or liquidity.

Business Outlook

In 2015, we plan to continue to execute our Global Business Plan strategies, which include a focus on targeted growth initiatives, innovation and brand building, cost savings programs and shareholder-friendly capital allocation.

Growth in volume, net selling prices and product mix is expected to be in the combined 3 to 5 percent target range, with a focus on Personal Care and KCP in developing and emerging markets.

We expect net sales to be negatively impacted by unfavorable foreign currency exchange rates at the high end of the previously provided 9 to 10 percent range, including an approximate 3 percent impact from exchange rate changes in Venezuela. We also expect unfavorable foreign currency translation effects to negatively impact operating profit growth at the high end of the previously communicated 10 to 11 percent range, including an approximate 4 percent decrease from exchange rate changes in Venezuela. Currency transaction effects are also anticipated to negatively impact operating profit.

• We anticipate commodity cost deflation of \$100 to \$200.

• We plan to achieve cost savings of at least \$350 from our FORCE program, and \$60 to \$80 from the 2014 Organization Restructuring.

• We anticipate that advertising spending will increase somewhat as a percentage of net sales to support targeted growth initiatives, brand building and innovation activities.

• Our share of net income from equity companies is expected to be down somewhat due to lower earnings at Kimberly-Clark de Mexico, S.A.B. de C.V., driven by a weaker Mexican peso.

• We anticipate capital spending to be in a \$950 to \$1,050 range and share repurchases to total \$700 to \$900, subject to market conditions.

• We expect to contribute \$450 to \$500 to our defined benefit pension plans for the full year 2015.

• We increased our quarterly dividend 4.8 percent effective April 2015.

• Charges related to the 2014 Organization Restructuring are expected to be \$30 to \$50 after tax.

Information Concerning Forward-Looking Statements

Certain matters contained in this report concerning the business outlook, including the anticipated costs, scope, timing and financial and other effects of the 2014 Organization Restructuring, cash flow and uses of cash, growth initiatives, innovations, marketing and other spending, cost savings and reductions, net sales, anticipated currency rates and exchange risks, raw material, energy and other input costs, contingencies and anticipated transactions of Kimberly-Clark, including dividends, share repurchases and pension contributions, constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and are based upon management's expectations and beliefs concerning future events impacting Kimberly-Clark. There can be no assurance that these future events will occur as anticipated or that our results will be as estimated. Forward-looking statements speak only as of the date they were made, and we undertake no obligation to publicly update them.

The assumptions used as a basis for the forward-looking statements include many estimates that, among other things, depend on the achievement of future cost savings and projected volume increases. In addition, many factors outside our control, including fluctuations in foreign currency exchange rates, the prices and availability of our raw materials, potential competitive pressures on selling prices for our products, energy costs and retail trade customer actions, as well as general economic and political conditions globally and in the markets in which we do business, could affect the realization of these estimates.

For a description of certain factors that could cause our future results to differ from those expressed in these forward-looking statements, see Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2014 entitled "Risk Factors." Other factors not presently known to us or that we presently consider immaterial could also affect our business operations and financial results.

Item 4. Controls and Procedures

As of June 30, 2015, an evaluation was performed under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, management, including the Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective as of June 30, 2015.

There were no changes in our internal control over financial reporting during the quarter covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

We repurchase shares of Kimberly-Clark common stock from time to time pursuant to publicly announced share repurchase programs. All our share repurchases during the second quarter of 2015 were made through a broker in the open market.

The following table contains information for shares repurchased during the second quarter of 2015. None of the shares in this table were repurchased directly from any of our officers or directors.

Period (2015)	Total Number of Shares Purchased ^(a)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs ^(b)
April 1 to April 30	517,300	\$108.23	49,027,811	40,972,189
May 1 to May 31	188,000	110.69	49,215,811	40,784,189
June 1 to June 30	216,000	107.43	49,431,811	40,568,189
Total	921,300			

Share repurchases were made pursuant to a share repurchase program authorized by our Board of Directors on (a) January 21, 2011. This program allows for the repurchase of 50 million shares in an amount not to exceed \$5 billion (the "2011 Program").

Includes shares available under the 2011 Program, as well as shares available under a share repurchase program (b) authorized by our Board of Directors on November 13, 2014 that allows for the repurchase of 40 million shares in an amount not to exceed \$5 billion.

Item 6. Exhibits

(a) Exhibits

Exhibit No. (2)b. Definitive Purchase Agreement by and among the Corporation, The Prudential Insurance Company of America, Prudential Financial, Inc., and State Street Bank and Trust Company, as Independent Fiduciary of the Kimberly-Clark Corporation Pension Plan, dated as of February 23, 2015, filed herewith.*

Exhibit No. (2)c. Definitive Purchase Agreement by and among the Corporation, Massachusetts Mutual Life Insurance Company, and State Street Bank and Trust Company, as Independent Fiduciary of the Kimberly-Clark Corporation Pension Plan, dated as of February 23, 2015, filed herewith.*

Exhibit No. (3)a. Amended and Restated Certificate of Incorporation, dated April 30, 2009, incorporated by reference to Exhibit No. (3)a of the Corporation's Current Report on Form 8-K dated May 1, 2009.

Exhibit No. (3)b. By-Laws, as amended April 30, 2009, incorporated by reference to Exhibit No. (3)b of the Corporation's Current Report on Form 8-K dated May 1, 2009.

Exhibit No. (4). Copies of instruments defining the rights of holders of long-term debt will be furnished to the Securities and Exchange Commission on request.

Exhibit No. (10)n. Form of Award Agreements under 2011 Equity Participation Plan, filed herewith.

Exhibit No. (31)a. Certification of Chief Executive Officer required by Rule 13a-14(a) or Rule 15d-14(a) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), filed herewith.

Exhibit No. (31)b. Certification of Chief Financial Officer required by Rule 13a-14(a) or Rule 15d-14(a) of the Exchange Act, filed herewith.

Exhibit No. (32)a. Certification of Chief Executive Officer required by Rule 13a-14(b) or Rule 15d-14(b) of the Exchange Act and Section 1350 of Chapter 63 of Title 18 of the United States Code, furnished herewith.

Exhibit No. (32)b. Certification of Chief Financial Officer required by Rule 13a-14(b) or Rule 15d-14(b) of the Exchange Act and Section 1350 of Chapter 63 of Title 18 of the United States Code, furnished herewith.
