ITEM 2.02 RESULTS OF OPERATIONS AND FINANCIAL CONDITION

On February 19, 2019, Interface, Inc. (the “Company”) issued a press release reporting its financial results for the fourth quarter and full year of 2018 (the “Earnings Release”). A copy of the Earnings Release is included as Exhibit 99.1 hereto and hereby incorporated by reference. The information set forth in this Item 2.02, including the exhibit hereto, shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933, except as shall be expressly set forth by specific reference in such filing.

Non-GAAP Financial Measures in the Earnings Release

The Earnings Release includes, as additional information for investors, the Company’s adjusted net income, adjusted earnings per share, adjusted operating income, adjusted gross profit margin, adjusted selling, general and administrative (“SG&A”) expenses, adjusted earnings before interest taxes, depreciation and amortization (“EBITDA”), organic sales and organic sales growth. These measures are not in accordance with financial measures calculated in accordance with generally accepted accounting principles in the United States (“GAAP”) and may be different from similarly titled non-GAAP financial measures used by other companies. Non-GAAP financial measures should not be used as a substitute for, or considered superior to, GAAP financial measures.

Adjusted income and gross profit measures exclude (1) restructuring and asset impairment charges; and (2) purchase price accounting amortization and transaction related expenses in connection with the Company’s acquisition of nora systems. Adjusted SG&A expenses also exclude transaction costs related to the nora acquisition. Adjusted EBITDA is GAAP net income excluding interest expense, taxes on income, depreciation and amortization, restructuring and asset impairment charges incurred in the first quarter of 2017 and fourth quarter of 2018, stock compensation amortization, and nora transaction related expenses such as purchase price accounting amortization, transaction expenses, and transaction-related other expenses.

Organic sales and organic sales growth exclude: (1) sales from the Company’s exited FLOR specialty retail store business; (2) foreign currency fluctuations; and (3) sales from the recently acquired nora business.

The Company excludes the FLOR specialty retail stores from adjusted measures because it believes the Company’s exit from the FLOR specialty retail stores is an uncommon and one-time event and does not arise from or constitute normal ongoing operations. Similarly, since the Company engages in acquisitions only episodically, and not as an everyday matter, the Company believes presenting certain measures excluding the effects of acquisitions facilitates focus on normal ongoing operations.

In addition, since FLOR specialty retail sales will not be a material part of sales going forward, the Company believes presenting organic sales information without historical FLOR specialty retail sales presents meaningful additional information on core ongoing operations. The Company also believes presenting sales information absent the effect of foreign currency exchange rate fluctuations facilitates comparison of the Company’s operational performance between periods.

Since the Company engages in acquisitions only episodically, and not as an everyday matter, the Company believes presenting certain measures excluding the effects of acquisitions facilitates focus on normal ongoing operations. The Company generally believes reporting its adjusted results helps investors’ understanding of historical operating trends, because it facilitates comparison to prior periods during which unique events affecting more recent results may not

have occurred. The Company also believes that adjusted results provide supplemental information for comparisons to other companies which may not have experienced the same events underlying the adjustments. Furthermore, the Company uses adjusted results internally as supplemental information to evaluate its own performance, for planning purposes and in connection with its compensation programs.

The Earnings Release also includes certain forward-looking non-GAAP information—specifically, projected organic sales growth, adjusted gross profit margin and adjusted SG&A expense. Due to the high variability and difficulty in making accurate forecasts and projections of some of the information excluded from these estimates, together with some of the excluded information not being ascertainable or accessible, the Company is unable to quantify certain amounts that would be required to be included in the most directly comparable GAAP financial measures without unreasonable efforts. Consequently, no disclosure of estimated comparable GAAP measures is included and no reconciliation of the forward-looking non-GAAP financial measures is included, although the majority of the difference is expected to be due to effects from the nora systems acquisition.
