FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number: 1-10945

---

OCEANEERING INTERNATIONAL, INC.

(Exact name of registrant as specified in its charter)

Delaware 95-2628227

(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

11911 FM 529 77041  
Houston, Texas

(Address of principal executive offices) (Zip Code)

(713) 329-4500

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed from last report)

---

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.  Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).  Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer

Non-accelerated filer  Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

Number of shares of Common Stock outstanding as of July 22, 2016: 98,060,433

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF MAJOR ACCOUNTING POLICIES

**Basis of Presentation.** We have prepared these unaudited consolidated financial statements pursuant to instructions for quarterly reports on Form 10-Q, which we are required to file with the U.S. Securities and Exchange Commission (the "SEC"). These financial statements do not include all information and footnotes normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP"). These financial statements reflect all adjustments that we believe are necessary to present fairly our financial position at June 30, 2016 and our results of operations and cash flows for the periods presented. Except as otherwise disclosed herein, all such adjustments are of a normal and recurring nature. These financial statements should be read in conjunction with the consolidated financial statements and related notes included in our annual report on Form 10-K for the year ended December 31, 2015. The results for interim periods are not necessarily indicative of annual results.

**Principles of Consolidation.** The consolidated financial statements include the accounts of Oceaneering International, Inc. and our 50% or more owned and controlled subsidiaries. We also consolidate entities that are determined to be variable interest entities if we determine that we are the primary beneficiary; otherwise, we account for those entities using the equity method of accounting. We use the equity method to account for our investments in unconsolidated affiliated companies of which we own an equity interest of between 20% and 50% and as to which we have significant influence, but not control, over operations. We use the cost method for all other long-term investments. Investments in entities that we do not consolidate are reflected on our balance sheet in Other non-current assets. All significant intercompany accounts and transactions have been eliminated.

**Use of Estimates.** The preparation of financial statements in conformity with U.S. GAAP requires that our management make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Actual results could differ from those estimates.

**Reclassifications.** Certain amounts from prior periods have been reclassified to conform with the current period presentation.

**Cash and Cash Equivalents.** Cash and cash equivalents include demand deposits and highly liquid investments with original maturities of three months or less from the date of investment.

**Accounts Receivable – Allowances for Doubtful Accounts.** We determine the need for allowances for doubtful accounts using the specific identification method. We do not generally require collateral from our customers.

**Inventory.** Inventory is valued at lower of cost or market. We determine cost using the weighted-average method.

**Property and Equipment and Long-Lived Intangible Assets.** We provide for depreciation of property and equipment on the straight-line method over their estimated useful lives. We charge the costs of repair and maintenance of property and equipment to operations as incurred, while we capitalize the costs of improvements that extend asset lives or functionality. Upon the disposition of property and equipment, the related cost and accumulated depreciation accounts are relieved and any resulting gain or loss is included as an adjustment to cost of services and products. Intangible assets, primarily acquired in connection with business combinations, include trade names, intellectual property and customer relationships and are being amortized over their estimated useful lives.

We capitalize interest on assets where the construction period is anticipated to be more than three months. We capitalized \$0.9 million and \$0.5 million of interest in the three-month periods ended June 30, 2016 and 2015, respectively, and \$1.8 million and \$1.1 million of interest in the six-month periods ended June 30, 2016 and 2015, respectively. We do not allocate general administrative costs to capital projects.

Our management periodically, and upon the occurrence of a triggering event, reviews the realizability of our property and equipment and long-lived intangible assets to determine whether any events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. For long-lived assets to be held and used, we base our evaluation on impairment indicators such as the nature of the assets, the future economic benefits of the assets, any historical or future profitability measurements and other external market conditions or factors that may be present. If such impairment indicators are present or other factors exist that

## Table of Contents

indicate that the carrying amount of an asset may not be recoverable, we determine whether an impairment has occurred through the use of an undiscounted cash flows analysis of the asset at the lowest level for which identifiable cash flows exist. If an impairment has occurred, we recognize a loss for the difference between the carrying amount and the fair value of the asset. For assets held for sale or disposal, the fair value of the asset is measured using fair market value less cost to sell. Assets are classified as held-for-sale when we have a plan for disposal of certain assets and those assets meet the held for sale criteria.

**Business Acquisitions.** We account for business combinations using the acquisition method of accounting, and we allocate the acquisition price to the assets acquired and liabilities assumed based on their fair market values at the date of acquisition.

In April 2015, we completed the acquisition of C & C Technologies, Inc. ("C&C"). C&C is a global provider of ocean-bottom mapping services in deepwater utilizing customized autonomous underwater vehicles and provides marine construction surveys for both surface and subsea assets, as well as satellite-based positioning services for drilling rigs and seismic and construction vessels. C&C also provides land and near-shore survey services along the U.S. Gulf Coast and in Mexico, and performs shallow water conventional geophysical surveys in the U.S. Gulf of Mexico. The acquisition price of approximately \$224 million was paid in cash. We have accounted for this acquisition by allocating the purchase price to the assets acquired and liabilities assumed based on their estimated fair values at the date of acquisition. We have included C&C's operations in our consolidated financial statements starting from the date of closing, and its operating results are reflected in our Subsea Projects segment. The acquisition of C&C did not have a material effect on our operating results, cash flows from operations or financial position.

**Goodwill.** In our annual evaluation of goodwill for impairment, we first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, we determine it is more likely than not that the fair value of a reporting unit is less than its carrying amount, we are required to perform the first step of the two-step impairment test. We tested the goodwill attributable to each of our reporting units for impairment as of December 31, 2015 and concluded that there was no impairment.

In addition to our annual evaluation of goodwill for impairment, upon the occurrence of a triggering event, we review our goodwill to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount.

**Foreign Currency Translation.** The functional currency for several of our foreign subsidiaries is the applicable local currency. Results of operations for foreign subsidiaries with functional currencies other than the U.S. dollar are translated into U.S. dollars using average exchange rates during the period. Assets and liabilities of these foreign subsidiaries are translated into U.S. dollars using the exchange rates in effect at the balance sheet date, and the resulting translation adjustments are recognized, net of tax, in accumulated other comprehensive income as a component of shareholders' equity. All foreign currency transaction gains and losses are recognized currently in the Consolidated Statements of Income.

**New Accounting Standards.** In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, "Revenue from Contracts with Customers." ASU 2014-09, as amended, completes the joint effort by the FASB and International Accounting Standards Board to improve financial reporting by creating common revenue recognition guidance for U.S. GAAP and International Financial Reporting Standards. ASU 2014-09 applies to all companies that enter into contracts with customers to transfer goods or services. ASU 2014-09 is effective for us for interim and annual reporting periods beginning after December 15, 2017. Early application is not permitted before periods beginning after December 15, 2016, and we have the choice to apply ASU 2014-09 either retrospectively to each reporting period presented or by recognizing the cumulative effect of applying

ASU 2014-09 at the date of initial application and not adjusting comparative information. We are currently evaluating the requirements of ASU 2014-09 and have not yet determined its impact on our consolidated financial statements.

In July 2015, the FASB issued ASU 2015-11, "Inventory – Simplifying the Measurement of Inventory." ASU 2015-11 requires companies to measure inventory at the lower of cost or net realizable value rather than at the lower of cost or market. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. This guidance is effective for our inventories beginning January 1, 2017. We do not anticipate that this update will have a material impact on our consolidated financial statements.

Table of Contents

In September 2015, the FASB issued ASU 2015-16, "Business Combinations – Simplifying the Accounting for Measurement-Period Adjustments." This update requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The update requires that the acquirer record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. The update requires an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. ASU 2015-16 became effective for our financial statements January 1, 2016. This update has not had a material impact on our consolidated financial statements.

In November 2015, the FASB issued ASU 2015-17, "Balance Sheet Classification of Deferred Taxes." Current GAAP requires an entity to separate deferred income tax liabilities and assets into current and noncurrent amounts in a classified statement of financial position. The Update requires that deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. ASU 2015-17 is effective for our financial statements issued for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Earlier application is permitted. We do not anticipate that this update will have a material impact on our consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, "Leases." This update requires lessees to recognize for all leases, with the exception of short-term leases, a liability equal to the present value of lease payments and a corresponding right-of-use asset also based on the present value of lease payments. We are currently evaluating the requirements of ASU 2016-02 and have not yet determined its impact on our consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, "Compensation – Stock Compensation – Improvements to Employee Share-Based Payment Accounting." This update requires that all excess tax benefits and tax deficiencies (including tax benefits of dividends on share-based payment awards) should be recognized as income tax expense or benefit in the income statement. The tax effects of exercised or vested awards should be treated as discrete items in the reporting period in which they occur. An entity also should recognize excess tax benefits regardless of whether the benefit reduces taxes payable in the current period. Currently, an entity must determine, for each award, whether the difference between the deduction for tax purposes and the compensation cost recognized for financial reporting purposes results in either an excess tax benefit or a tax deficiency. Excess tax benefits are recognized in additional paid-in capital; tax deficiencies are recognized either as an offset to accumulated excess tax benefits, if any, or in the income statement. The amendments in this update are effective for us beginning January 1, 2017. We do not anticipate that this update will have a material effect on our consolidated financial statements.

## 2. INVENTORY

The following is information regarding our inventory:

(in thousands)	Jun 30, 2016	Dec 31, 2015
Inventory:		
Remotely operated vehicle parts and components	\$ 148,215	\$ 163,539
Other inventory, primarily raw materials	194,808	164,914
Total	\$ 343,023	\$ 328,453

Table of Contents

## 3. DEBT

Long-term Debt consisted of the following:

(in thousands)	Jun 30, 2016	Dec 31, 2015
4.650% Senior Notes due 2024:		
Principal of the Notes	\$ 500,000	\$ 500,000
Issuance costs, net of amortization	(5,730 )	(6,073 )
Fair value of interest rate swap on \$100 million of principal	8,068	1,909
Term Loan Facility	300,000	300,000
Revolving Credit Facility	—	—
Long-term Debt	\$ 802,338	\$ 795,836

In November 2014, we completed the public offering of \$500 million aggregate principal amount of 4.650% Senior Notes due 2024 (the "Senior Notes"). We pay interest on the Senior Notes on May 15 and November 15 of each year, and we made our first interest payment on May 15, 2015. The Senior Notes are scheduled to mature on November 15, 2024. We may redeem some or all of the Senior Notes prior to maturity at specified redemption prices. We used the net proceeds from the offering for general corporate purposes, including funding the C&C acquisition, other capital expenditures and repurchases of shares of our common stock.

In October 2014, we entered into a new credit agreement (as amended, the "Credit Agreement") with a group of banks to replace our prior principal credit agreement. The Credit Agreement provides for a \$300 million three-year term loan (the "Term Loan Facility") and a \$500 million five-year revolving credit facility (the "Revolving Credit Facility"). Subject to certain conditions, the aggregate commitments under the Revolving Credit Facility may be increased by up to \$300 million at any time upon agreement between us and existing or additional lenders. Borrowings under the Revolving Credit Facility and the Term Loan Facility may be used for general corporate purposes. Simultaneously with the execution of the Credit Agreement and pursuant to its terms, we repaid all amounts outstanding under, and terminated, our prior principal credit agreement.

In November 2015, we entered into an Agreement and Amendment No. 1 to Credit Agreement (the "Amendment") to the Credit Agreement. The Amendment amended the Credit Agreement to (1) replace the maximum leverage ratio financial covenant with a new financial covenant restricting the maximum total capitalization ratio (defined in the Amendment to be the ratio of consolidated debt to total capitalization) to 55% and (2) extend the maturities of the Term Loan Facility and the Revolving Credit Facility by one year each, to October 27, 2018 and October 25, 2020, respectively, with the extending Lenders, which represent 93.75% of the existing commitments of the Lenders, such that (a) the total commitments for the Revolving Credit Facility will be \$500 million until October 25, 2019 and thereafter \$468.75 million until October 25, 2020, and (b) the outstanding term loan advances pursuant to the Term Loan Facility will be \$300 million until October 27, 2017 and thereafter \$281.25 million until October 27, 2018.

Borrowings under the Credit Agreement bear interest at an Adjusted Base Rate or the Eurodollar Rate (both as defined in the Credit Agreement), at our option, plus an applicable margin based on our Leverage Ratio (as defined in the Credit Agreement) and, at our election, based on the ratings of our senior unsecured debt by designated ratings services, thereafter to be based on such debt ratings. The applicable margin varies: (1) in the case of advances bearing interest at the Adjusted Base Rate, from 0.125% to 0.750% for borrowings under the Revolving Credit Facility and from 0% to 0.500% for borrowings under the Term Loan Facility; and (2) in the case of advances bearing interest at the Eurodollar Rate, from 1.125% to 1.750% for borrowings under the Revolving Credit Facility and from 1.000% to 1.500% for borrowings under the Term Loan Facility. The Adjusted Base Rate is the highest of (1) the per annum rate

established by the administrative agent as its prime rate, (2) the federal funds rate plus 0.50% and (3) the daily one-month LIBOR plus 1%. We pay a commitment fee ranging from 0.125% to 0.300% on the unused portion of the Revolving Credit Facility, depending on our Leverage Ratio. The commitment fees are included as interest expense in our consolidated financial statements.

## Table of Contents

The Credit Agreement contains various covenants that we believe are customary for agreements of this nature, including, but not limited to, restrictions on our ability and the ability of each of our subsidiaries to incur debt, grant liens, make certain investments, make distributions, merge or consolidate, sell assets, enter into transactions with affiliates and enter into certain restrictive agreements. We are also subject to a maximum total capitalization ratio of 55%, as noted above. The Credit Agreement includes customary events of default and associated remedies. As of June 30, 2016, we were in compliance with all the covenants set forth in the Credit Agreement.

We incurred \$6.9 million of issuance costs related to the Senior Notes and \$2.2 million of new loan costs, including costs of the Amendment, related to the Credit Agreement. We are amortizing these costs, which are included on our balance sheet as a reduction of debt for the Senior Notes and as an other non-current asset for the Credit Agreement, to interest expense over ten years for the Senior Notes and over six years for the Credit Agreement.

## 4. COMMITMENTS AND CONTINGENCIES

**Litigation.** On June 17, 2014, a purported shareholder filed a derivative complaint against all of the then-current members of our board of directors and one of our former directors, as defendants, and our company, as nominal defendant, in the Court of Chancery of the State of Delaware. Through the complaint, the plaintiff is asserting, on behalf of our company, actions for breach of fiduciary duties and unjust enrichment in connection with prior determinations of our board of directors relating to nonexecutive director compensation. The plaintiff is seeking relief including disgorgement of payments made to the defendants, an award of unspecified damages and an award for attorneys' fees and other costs. We and the defendants filed a motion to dismiss the complaint and a supporting brief on September 5, 2014, asserting that the complaint failed to state a claim on which relief could be granted, and further that the plaintiff did not comply with procedural requirements necessary to allow him to commence litigation against certain directors on our behalf. The Court has not yet ruled on that motion. In any event, our company is only a nominal defendant in this litigation, and we do not expect the resolution of this matter to have a material adverse effect on our results of operations, cash flows or financial position.

In the ordinary course of business, we are subject to actions for damages alleging personal injury under the general maritime laws of the United States, including the Jones Act, for alleged negligence. We report actions for personal injury to our insurance carriers and believe that the settlement or disposition of those claims will not have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Various other actions and claims are pending against us, most of which are covered by insurance. Although we cannot predict the ultimate outcome of these matters, we believe that our ultimate liability, if any, that may result from these other actions and claims will not materially affect our results of operations, cash flows or financial position.

**Financial Instruments and Risk Concentration.** In the normal course of business, we manage risks associated with foreign exchange rates and interest rates through a variety of strategies, including the use of hedging transactions. As a matter of policy, we do not use derivative instruments unless we have an underlying exposure. Other financial instruments that potentially subject us to concentrations of credit risk are principally cash and cash equivalents and accounts receivable.

The carrying values of cash and cash equivalents approximate their fair values due to the short-term maturity of the underlying instruments. Accounts receivable are generated from a broad group of customers, primarily from within the energy industry, which is our major source of revenue. Due to their short-term nature, carrying values of our accounts receivable and accounts payable approximate fair market values. We had borrowings of \$300 million at June 30, 2016 under our Term Loan Facility. Due to the short-term nature of the associated interest rate periods, the carrying value of our debt under the Term Loan Facility approximates its fair value. This debt is classified as Level 2

in the fair value hierarchy under U.S. GAAP (inputs other than quoted prices in active markets for similar assets and liabilities that are observable or can be corroborated by observable market data for substantially the full term for the assets or liabilities).

We estimated the fair market value of the Senior Notes to be \$495 million at June 30, 2016 based on quoted prices. Since the market for the Senior Notes is not an active market, the fair value of the Senior Notes is classified within Level 2 in the fair value hierarchy under U.S. GAAP.

Table of Contents

We have an interest rate swap in place on \$100 million of the Senior Notes for the period from November 2014 to November 2024. The agreement swaps the fixed interest rate of 4.650% on \$100 million of the Senior Notes to the floating rate of one month LIBOR plus 2.426%. We estimate the fair value of the interest rate swap to be an asset of \$8.1 million at June 30, 2016, which is reflected on our balance sheet as a component of Other Long-term Assets, with the offset as an adjustment to the carrying value of Long-term Debt. This value was arrived at using a discounted cash flow model using Level 2 inputs.

Since the second quarter of 2015, the exchange rate for the Angolan kwanza relative to the U.S. dollar has been declining. As our functional currency in Angola is the U.S. dollar, we recorded foreign currency transaction losses related to the kwanza of \$1.2 million and \$8.9 million in the three-month periods ended June 30, 2016 and 2015, respectively, and \$8.2 million and \$9.9 million in the six-month periods ended June 30, 2016 and 2015, respectively, as a component of Other income (expense), net in our Consolidated Statements of Income for those respective periods. The foreign currency transaction losses related primarily to the remeasurement of our Angolan kwanza cash balances to U.S. dollars. Conversion of cash balances from kwanza to U.S. dollars is controlled by the central bank in Angola, and the central bank has slowed this process since mid-2015, causing our kwanza cash balances to increase. As of June 30, 2016, we had the equivalent of approximately \$34 million of cash in kwanza in Angola reflected on our balance sheet.

To mitigate our currency exposure risk in Angola, through June 30, 2016 we have used kwanza to purchase \$50 million equivalent Angolan central bank (Banco Nacional de Angola) bonds with various maturities during 2018. These bonds are denominated as U.S. dollar equivalents, so that, upon payment of semi-annual interest and principal upon maturity, payment is made in kwanza, equivalent to the respective U.S. dollars at the then-current exchange rate. We have classified \$40 million of these instruments as held-to-maturity, and have recorded the original cost on our balance sheet as other non-current assets. The remaining \$10 million are classified as available for sale and are recorded on our balance sheet as other current assets at fair market value at June 30, 2016, which approximated original cost. We estimated the fair market value of the Angolan bonds at June 30, 2016 using quoted prices. Since the market for the Angolan bonds is not an active market, the fair value of the Angolan bonds is classified within Level 2 in the fair value hierarchy under U.S. GAAP.

**5. EARNINGS PER SHARE, SHARE-BASED COMPENSATION AND SHARE REPURCHASE PLAN**

**Earnings per Share.** The table that follows presents our computation of weighted average basic and diluted shares outstanding, which we use in our earnings per share calculations. For each period presented, our net income allocable to both common shareholders and diluted common shareholders is the same as our net income in our consolidated statements of income.

	Three Months		Six Months	
	Ended Jun 30,		Ended Jun 30,	
(in thousands)	2016	2015	2016	2015
Basic shares outstanding	98,060	98,528	98,006	98,998
Effect of restricted stock units	364	365	349	403
Diluted shares outstanding	98,424	98,893	98,355	99,401

Our quarterly dividend to our common shareholders has been \$0.27 per share since the second quarter of 2014. Our latest \$0.27 per share quarterly dividend was declared in July 2016 and is payable in September 2016.

**Share-Based Compensation.** We have no outstanding stock options and, therefore, no share-based compensation to be recognized pursuant to stock option grants.

Through 2014, we granted restricted units of our common stock to certain of our key executives, key employees and Chairman of the Board. We also granted shares of restricted stock to our other non-employee directors. The restricted units granted to our key executives and key employees generally vest in full on the third anniversary of the award date, conditional on continued employment. The restricted stock unit grants, including those granted to our Chairman, can vest pro rata over three years, provided the individual meets certain age and years-of-service requirements. The shares of restricted common stock we grant to our other non-employee directors vest in full on the first anniversary of the award date, conditional upon continued service as a director. Each grantee of shares of restricted stock is deemed

to be the record owner of those shares during the restriction period, with the right to vote and receive any dividends on those shares. The restricted stock units outstanding have no voting or dividend rights. In 2015 and 2016, we made corresponding grants to those described above, except we granted restricted shares, rather than restricted stock units, to our Chairman.

Table of Contents

For each of the restricted stock units granted in 2014 through 2016, at the earlier of three years after grant or at termination of employment or service, the grantee will be issued one share of our common stock for each unit vested. As of June 30, 2016 and December 31, 2015, respective totals of 1,091,146 and 831,291 shares of restricted stock or restricted stock units were outstanding.

We estimate that stock-based compensation cost not yet recognized related to shares of restricted stock or restricted stock units, based on their grant-date fair values, was \$22 million at June 30, 2016. This expense is being recognized on a staged-vesting basis over three years for awards attributable to individuals meeting certain age and years-of-service requirements, and on a straight-line basis over the applicable vesting period of one or three years for the other awards.

Share Repurchase Plan. In December 2014, our Board of Directors approved a plan to repurchase up to 10 million shares of our common stock. Under this plan, we had repurchased 2.0 million shares of our common stock for \$100 million through December 31, 2015. We did not repurchase any shares under the plan during the six-month period ended June 30, 2016. We account for the shares we hold in treasury under the cost method, at average cost.

## 6. INCOME TAXES

During interim periods, we provide for income taxes based on our current estimated annual effective tax rate using assumptions as to (1) earnings and other factors that would affect the tax provision for the remainder of the year and (2) the operations of foreign branches and subsidiaries that are subject to local income and withholding taxes. We conduct business through several foreign subsidiaries and, although we expect our consolidated operations to be profitable, there is no assurance that profits will be earned in entities or jurisdictions that have net operating loss carryforwards available. The primary difference between our effective tax rates of 31.3% in the periods ended June 30, 2016 and the federal statutory rate of 35% reflects our intention to continue to indefinitely reinvest in certain of our international operations. As a result, we do not provide for U.S. taxes on that portion of our foreign earnings. We conduct our international operations in a number of locations that have varying laws and regulations with regard to income and other taxes, some of which are subject to interpretation. We recognize the benefit for a tax position if the benefit is more likely than not to be sustainable upon audit by the applicable taxing authority. If this threshold is met, the tax benefit is then measured and recognized at the largest amount that we believe is greater than 50% likely of being realized upon ultimate settlement. We do not believe that the total of unrecognized tax benefits will significantly increase or decrease in the next 12 months.

We account for any applicable interest and penalties on uncertain tax positions as a component of our provision for income taxes on our financial statements. Including associated foreign tax credits and penalties and interest, we have accrued a net total of \$6.5 million in Other Long-term Liabilities on our balance sheet for unrecognized tax benefits at June 30, 2016. All additions or reductions to those liabilities would affect our effective income tax rate in the periods of change.

Table of Contents

Our tax returns are subject to audit by taxing authorities in multiple jurisdictions. These audits often take years to complete and settle. The following lists the earliest tax years open to examination by tax authorities where we have significant operations:

Jurisdiction	Periods
United States	2012
United Kingdom	2012
Norway	2006
Angola	2010
Brazil	2010
Australia	2011

## 7. BUSINESS SEGMENT INFORMATION

We are a global oilfield provider of engineered services and products, primarily to the offshore oil and gas industry, with a focus on deepwater applications. Through the use of our applied technology expertise, we also serve the defense, aerospace and commercial theme park industries. Our Oilfield business consists of Remotely Operated Vehicles ("ROVs"), Subsea Products, Subsea Projects and Asset Integrity. Our ROV segment provides submersible vehicles operated from the surface to support offshore oil and gas exploration, development, production and decommissioning activities. Our Subsea Products segment supplies a variety of specialty subsea hardware and related services. To improve operational efficiency, we have reorganized our Subsea Products segment into two business units – (1) manufactured products and (2) service and rentals. Manufactured products include production control umbilicals and specialty subsea hardware, while our service and rentals include tooling, subsea work systems and installation and workover control systems. This internal reorganization does not affect our segment reporting structure or the historical comparability of our segment results. Our Subsea Projects segment provides multiservice subsea support vessels and oilfield diving and support vessel operations, primarily for inspection, maintenance and repair and installation activities. Since April 2015, we have also provided survey, autonomous underwater vehicle ("AUV") and satellite-positioning services. Our Asset Integrity segment provides asset integrity management and assessment services and nondestructive testing and inspection. Our Advanced Technologies business provides project management, engineering services and equipment for applications in non-oilfield markets. Unallocated Expenses are those not associated with a specific business segment. These consist of expenses related to our incentive and deferred compensation plans, including restricted stock and bonuses, as well as other general expenses, including corporate administrative expenses.

There are no differences in the basis of segmentation or in the basis of measurement of segment profit or loss from those used in our consolidated financial statements for the year ended December 31, 2015.

Table of Contents

The table that follows presents Revenue and Income (Loss) from Operations by business segment for each of the periods indicated.

(in thousands)	Three Months Ended			Six Months Ended

Total	\$ 59,979	\$ 63,483	\$ 59,781	\$ 119,760	\$ 121,486

We determine income (loss) from operations for each business segment before interest income or expense, other income (expense) and provision for income taxes. We do not consider an allocation of these items to be practical. Our equity in earnings (losses) of unconsolidated affiliates is part of our Subsea Projects segment.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Certain statements we make in this quarterly report on Form 10-Q are forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements include, without limitation, statements regarding our expectations about:

- third quarter, second half and the full year of 2016 operating results and earnings per share, and the contributions from our segments to those results (including anticipated revenue, operating income and utilization information);
- demand and business activity levels;
- our plans for future operations (including planned additions to and retirements from our remotely operated vehicle ("ROV") fleet, our intent regarding the new multiservice subsea support vessel scheduled for delivery in the second quarter of 2017, and other capital expenditures);
- our intent for use of the Ocean Intervention IV after its charter expires in July 2016;
- our future cash flows;
- the adequacy of our liquidity and capital resources;
- our expectations regarding shares to be repurchased under our share repurchase plan;
- our anticipated tax rates and underlying assumptions;
- seasonality; and
- industry conditions.

These forward-looking statements are subject to various risks, uncertainties and assumptions, including those we have referred to under the headings "Risk Factors" and "Cautionary Statement Concerning Forward-Looking Statements" in Part I of our annual report on Form 10-K for the year ended December 31, 2015. Although we believe that the expectations reflected in such forward-looking statements are reasonable, because of the inherent limitations in the forecasting process, as well as the relatively volatile nature of the industries in which we operate, we can give no assurance that those expectations will prove to have been correct. Accordingly, evaluation of our future prospects must be made with caution when relying on forward-looking information.

The following discussion should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in our annual report on Form 10-K for the year ended December 31, 2015.

Executive Overview

We project our 2016 diluted earnings per share to be significantly less than our 2015 diluted earnings per share of \$2.34. With our limited market visibility resulting from the uncertain energy market, we are not providing specific earnings guidance for either the third quarter or the full year 2016. For the remainder of 2016, we anticipate lower global demand for deepwater drilling, field development, and inspection, maintenance and repair activities, as uncertain and lower commodity prices have led our customers to substantially reduce spending, resulting in decreased demand. Compared to 2015, in 2016 we are forecasting substantial decreases in each of our oilfield operating business segments, most notably:

- ROVs, on lower days on hire and reduced revenue per day;
- Subsea Products, on lower pricing and demand to support field development projects; and
- Subsea Projects, on lower pricing and demand, for both deepwater vessels and diving.

In the three- and six-month periods ended June 30, 2016, we incurred foreign exchange losses of \$1.2 million and \$7.1 million, respectively. These foreign exchange losses primarily related to Angola and its declining exchange rate

relative to the U.S. dollar. Our foreign exchange losses are reflected in Other income (expense), net.

We added five new ROVs to our fleet during the six months ended June 30, 2016 and retired two, resulting in a total of 318 ROVs in our ROV segment fleet. For 2016, we currently plan to add new ROVs only to meet contractual commitments. On average, we expect to retire 4% to 5% of our fleet on an annual basis.

We forecast our third quarter 2016 operating income to be lower than that of the second quarter, primarily from reduced volume and lower margins in Subsea Products. We anticipate our other operating segments to be relatively flat.

## Table of Contents

Historically, we have generated approximately 90% of our revenue and substantially all of our operating income before Unallocated Expenses from our services and products provided to the oil and gas industry, particularly in the deepwater sector of the offshore market. Consequently, the levels of our customers' capital and operational spending on deepwater exploration, development and production have a significant impact on the demand for many of our services and products.

### Critical Accounting Policies and Estimates

For information about our Critical Accounting Policies and Estimates, please refer to the discussion in our annual report on Form 10-K for the year ended December 31, 2015 under the heading "Critical Accounting Policies and Estimates" in Item 7 – "Management's Discussion and Analysis of Financial Condition and Results of Operations."

### Liquidity and Capital Resources

At June 30, 2016, we had working capital of \$918 million, including \$393 million of cash and cash equivalents. Additionally, we had \$500 million of remaining borrowing capacity available under our revolving credit facility under a credit agreement with a group of banks (the "Credit Agreement"). The Credit Agreement includes a \$300 million, three-year term loan and a \$500 million, five-year, revolving credit facility. We consider our liquidity and capital resources to be adequate to support our existing operations, capital commitments and anticipated dividends.

Our capital expenditures were \$53 million during the first six months of 2016, as compared to \$325 million during the first six months of last year. Of the \$53 million of capital expenditures in 2016, \$28 million was invested in our ROV segment and \$12 million was invested in our Subsea Products segment. We added five new ROVs to our fleet during the six months ended June 30, 2016 and retired two, resulting in a total of 318 ROVs in our ROV segment fleet. We currently estimate our capital expenditures for 2016, excluding business acquisitions, will be approximately \$100 million to \$150 million, including \$19 million of construction progress payments in the second half of 2016 for the new multiservice subsea support vessel, to be named the Ocean Evolution, discussed below, which is scheduled for delivery in the second quarter of 2017. Of the \$325 million of capital expenditures in the first six months of 2015, \$230 million related to the acquisition of C & C Technologies, Inc. ("C&C"), \$39 million was invested in our ROV segment and \$36 million was invested in our Subsea Products segment.

During the third quarter of 2013, we signed an agreement with a shipyard for the construction of a subsea support vessel, to be named the Ocean Evolution. We expect to take delivery of that vessel in the second quarter of 2017. We intend for the vessel to be U.S.-flagged and documented with a coastwise endorsement by the U.S. Coast Guard. It is expected to have an overall length of 353 feet, a Class 2 dynamic positioning system, accommodations for 110 personnel, a helideck, a 250-ton active heave-compensated crane, and a working moonpool. We expect to outfit the vessel with two of our high specification work-class ROVs. The vessel will also be equipped with a satellite communications system capable of transmitting streaming video for real-time work observation by shore personnel. We anticipate the vessel will be used to augment our ability to provide subsea intervention services in the ultra-deep waters of the U.S. Gulf of Mexico. These services are required to perform inspection, maintenance and repair projects and hardware installations.

In 2012, we chartered a deepwater vessel, the Ocean Intervention III, for two years, with extension options for up to three additional years, and which we have extended to January 2017. We have also chartered an additional deepwater vessel, the Olympic Intervention IV, for an initial term of five years, which began in the third quarter of 2008, and which we have extended to July 2016. After the Olympic Intervention IV charter term expiration in July, we have an arrangement to continue to market the vessel with our services. We will pay the vessel owner at prevailing spot market rates only for the days the vessel is used on the projects we are awarded, thereby lowering our fixed vessel costs. We outfitted each of these deepwater vessels with two of our high-specification work-class ROVs, and we have

been utilizing these vessels to perform subsea hardware installation and inspection, maintenance and repair projects, and to conduct well intervention services in the U.S. Gulf of Mexico and offshore Angola. In 2012, we moved the Ocean Intervention III to Angola and also chartered the Bourbon Oceanteam 101 to work on a three-year field support contract for a unit of BP plc. We had extended the charter of the Bourbon Oceanteam 101 to January 2017. However, in early 2016, the customer exercised its right, under the field support services contract, to terminate its use of the Bourbon Oceanteam 101 at the end of May 2016. Under the terms of the contract, the costs incurred by us associated with the early release and demobilization of the vessel were reimbursed by the customer. Following the release of the vessel, we redelivered it to the vessel supplier. Under the field support services contract, we are continuing to supply project management, engineering and the Ocean

Table of Contents

Intervention III. We also provide ROV tooling, asset integrity services and installation and workover control system services. We have also provided other chartered vessels and a barge on an as-requested basis from the customer.

In March 2013, we commenced a five-year charter with five one-year extension options for the use of the Ocean Alliance, a Jones Act-compliant multiservice subsea support vessel. We have outfitted the vessel with two of our high specification work-class ROVs. In January 2015, we commenced a two-year multiservice vessel time charter agreement with a customer for the use of the Ocean Alliance in the U.S. Gulf of Mexico.

In December 2013, we commenced a three-year charter for the Normand Flower, a multi-service subsea marine support vessel. We have made modifications to the vessel, including reconfiguration to accommodate two of our high-specification work-class ROVs, and have used the vessel in the U.S. Gulf of Mexico to perform inspection, maintenance and repair projects and hardware installations. Unless we choose to exercise one of our options to extend the charter for up to three additional years or we negotiate new terms, the charter for the Normand Flower will expire in December 2016.

In November 2015, we commenced a two-year charter for the use of the Island Pride, a multiservice subsea marine support vessel. We have modified the vessel to enhance its service capabilities, including a reconfiguration to accommodate two of our high-specification work-class ROVs. We are using the vessel under a two-year contract to provide field support services off the coast of India for an oil and gas customer based in India. We have options to extend the charter for up to two additional years.

We also charter or lease vessels on a short-term basis as necessary to augment our fleet.

At June 30, 2016, we had long-term debt in the principal amount of \$800 million outstanding and \$500 million available under our revolving credit facility provided under the Credit Agreement.

In October 2014, we entered into the Credit Agreement with a group of banks to replace our prior principal credit agreement. The Credit Agreement provides for a \$300 million three-year term loan (the "Term Loan Facility") and a \$500 million five-year revolving credit facility (the "Revolving Credit Facility"). Subject to certain conditions, the aggregate commitments under the Revolving Credit Facility may be increased by up to \$300 million at any time upon agreement between us and existing or additional lenders. Borrowings under the Revolving Credit Facility and the Term Loan Facility may be used for general corporate purposes. Simultaneously with the execution of the Credit Agreement and pursuant to its terms, we repaid all amounts outstanding under, and terminated, our prior principal credit agreement.

In November 2015, we entered into an Agreement and Amendment No. 1 to Credit Agreement (the "Amendment") to the Credit Agreement. The Amendment amended the Credit Agreement to (1) replace the maximum leverage ratio financial covenant with a new financial covenant restricting the maximum total capitalization ratio (defined in the Amendment to be the ratio of consolidated debt to total capitalization) to 55% and (2) extend the maturities of the Term Loan Facility and the Revolving Credit Facility by one year each, to October 27, 2018 and October 25, 2020, respectively, with the extending Lenders, which represent 93.75% of the existing commitments of the Lenders, such that (a) the total commitments for the Revolving Credit Facility will be \$500 million until October 25, 2019 and thereafter \$468.75 million until October 25, 2020, and (b) the outstanding term loan advances pursuant to the Term Loan Facility will be \$300 million until October 27, 2017 and thereafter \$281.25 million until October 27, 2018.

Borrowings under the Credit Agreement bear interest at an Adjusted Base Rate or the Eurodollar Rate (both as defined in the Credit Agreement), at our option, plus an applicable margin initially based on our Leverage Ratio (as defined in the Credit Agreement) and, at our election, based on ratings of our senior unsecured debt by designated ratings services, thereafter to be based on such debt ratings. The applicable margin varies: (1) in the case of advances bearing

interest at the Adjusted Base Rate, from 0.125% to 0.750% for borrowings under the Revolving Credit Facility and from 0% to 0.500% for borrowings under the Term Loan Facility; and (2) in the case of advances bearing interest at the Eurodollar Rate, from 1.125% to 1.750% for borrowings under the Revolving Credit Facility and from 1.000% to 1.500% for borrowings under the Term Loan Facility. The Adjusted Base Rate is the highest of (1) the per annum rate established by the administrative agent as its prime rate, (2) the federal funds rate plus 0.50% and (3) the daily one-month LIBOR plus 1%. We pay a commitment fee ranging from 0.125% to 0.300% on the unused portion of the Revolving Credit Facility, depending on our Leverage Ratio. The commitment fees are included as interest expense in our consolidated financial statements.

Table of Contents

The Credit Agreement contains various covenants that we believe are customary for agreements of this nature, including, but not limited to, restrictions on our ability and the ability of each of our subsidiaries to incur debt, grant liens, make certain investments, make distributions, merge or consolidate, sell assets, enter into transactions with affiliates and enter into certain restrictive agreements. We are also subject to a maximum total capitalization ratio of 55%, as noted above. The Credit Agreement includes customary events of default and associated remedies. As of June 30, 2016, we were in compliance with all the covenants set forth in the Credit Agreement.

In November 2014, we completed the public offering of \$500 million aggregate principal amount of 4.650% Senior Notes due 2024 (the "Senior Notes"). We pay interest on the Senior Notes on May 15 and November 15 of each year. The Senior Notes are scheduled to mature on November 15, 2024. We may redeem some or all of the Senior Notes prior to maturity at specified redemption prices. We used the net proceeds from the offering for general corporate purposes, including funding an acquisition, other capital expenditures and repurchases of shares of our common stock.

Our principal source of cash from operating activities is our net income, adjusted for the non-cash effects of, among other things, depreciation and amortization, deferred income taxes and noncash compensation under our share-based compensation plans. Our \$146 million and \$200 million of cash provided from operating activities in the six-month periods ended June 30, 2016 and 2015, respectively, were principally affected by cash increases (decreases) of:

\$66 million and \$5 million, respectively, from changes in accounts receivable;  
\$49 million and \$(27) million, respectively, from changes in other operating assets; and  
\$(121) million and \$(41) million, respectively, from changes in current liabilities.

We had an increase in cash related to accounts receivable in the six months ended June 30, 2016, as we had lower revenue in the quarter ended June 30, 2016 as compared to the fourth quarter of 2015, so, combined with our cash collections, our overall accounts receivable balances decreased. The 2016 increase in cash related to changes in other operating assets was largely attributable to a prepayment we made during 2015 to a steel tube vendor for material we received in 2016 for a steel tube umbilical contract. The 2015 decrease in cash related to changes in other operating assets was largely attributable to the prepayment, which we made in exchange for more favorable pricing from the vendor. Each of the 2016 and 2015 decreases in cash related to current liabilities reflected lower business levels than we had during the fourth quarter of the respective immediately preceding fiscal year, and in 2016 we decreased our accruals for incentive compensation.

In the six months ended June 30, 2016, we used \$77 million of cash in investing activities. The cash used in investing activities largely related to capital expenditures of \$53 million and other investments of \$30 million. The other investments were primarily for the purchase of bonds in Angola for the purpose of mitigating our Angolan currency risk. We also used \$56 million in financing activities, primarily for the payment of cash dividends of \$53 million. In the six months ended June 30, 2015, we used \$323 million of cash in investing activities. The cash used in investing activities related to the capital expenditures, including the C&C acquisition described above. We also used \$105 million in financing activities, which included uses of cash for repurchases of 2.0 million shares of our common stock for \$100 million, the payment of cash dividends of \$54 million, and borrowing the final \$50 million under our term loan facility.

We have not guaranteed any debt not reflected on our consolidated balance sheet, and we do not have any off-balance sheet arrangements, as defined by SEC rules.

In December 2014, our Board of Directors approved a plan to repurchase up to 10 million shares of our common stock. Under this plan, we had repurchased 2.0 million shares of our common stock for \$100 million through June 30, 2016, all during 2015. We account for the shares we hold in treasury under the cost method, at average cost. The timing and amount of any future repurchases will be determined by our management. We expect that any additional

shares repurchased under the plan will be held as treasury stock for possible future use. The plan does not obligate us to repurchase any particular number of shares.

In the second quarter of 2014, we raised our dividend to our common shareholders to the current rate of \$0.27 per share. Our latest \$0.27 per share quarterly dividend was declared in July 2016 and is payable in September 2016.

Table of Contents

## Results of Operations

We operate in five business segments. The segments are contained within two businesses — services and products provided to the oil and gas industry ("Oilfield") and all other services and products ("Advanced Technologies"). Our Unallocated Expenses are those not associated with a specific business segment.

Consolidated revenue and profitability information is as follows:

Three Months Ended			Six Months Ended		
(dollars in thousands)	Jun 30, 2016	Jun 30, 2015	Mar 31, 2016	Jun 30, 2016	Jun 30, 2015
Revenue	\$625,539	\$810,303	\$608,344	\$1,233,883	\$1,597,075
Gross Margin	95,233	167,545	97,480	192,713	330,994
Gross Margin %	% 21	% 16	% 16	% 21	%
Operating Income	38,380	107,940	48,099	86,479	214,590
Operating Income %	% 13	% 8	% 7	% 13	%

We generate a material amount of our consolidated revenue from contracts for services in the U.S. Gulf of Mexico in our Subsea Projects segment, which is usually more active from April through October, as compared to the rest of the year. The European operations of our Asset Integrity segment are also typically seasonally more active in the second and third quarters; however, the reduced customer spending levels in the current commodity price environment have substantially obscured this seasonality since mid-2014. Revenue in our ROV segment is generally subject to seasonal variations in demand, with our first quarter being the low quarter of the year. The level of our ROV seasonality primarily depends on the number of ROVs we have engaged in vessel-based subsea infrastructure inspection, maintenance, repair and installation, which is more seasonal than drilling support. Periods since mid-2014 reflect an exception, as there has been a general decline in offshore activity, which caused a decrease in our ROV days on hire and utilization during each sequential quarter from September 2014 through March 2016. In the second quarter of 2016, our ROV days on hire were relatively flat compared to the first quarter of 2016, instead of the usual seasonal increase, and ROV quarterly revenue declined due to lower average revenue per day on hire as a result of a geographical shift in the number of days worked, and lower pricing. Revenue in our Subsea Products and Advanced Technologies segments has generally not been seasonal.

Table of Contents

## Oilfield

The following table sets forth the revenues and margins for our Oilfield business segments for the periods indicated. In the ROV section of the table that follows, "Days available" includes all days from the first day that an ROV is placed into service until the ROV is retired. All days during this period are considered available days, including periods when an ROV is undergoing maintenance or repairs. Our ROVs do not have scheduled maintenance or repair that requires significant time when the ROVs are not available for utilization.

In general, our Oilfield business focuses on supplying services and products to the deepwater sector of the offshore market. For 2016, we have experienced, and expect to continue to experience, lower global demand for deepwater drilling, field development, and inspection, maintenance and repair activities due to the decline in oil prices since June 2014. As a result, we are forecasting substantial decreases in each of our oilfield operating business segments for the

year 2016 as compared to 2015.

20

---

Table of Contents

We believe we are the world's largest provider of ROV services, and this business segment historically, but not currently, has been the largest contributor to our Oilfield business operating income. Our ROV segment revenue reflects the utilization percentages, fleet sizes and average pricing of the respective periods. Our ROV operating margins have declined during periods of lower utilization and pricing as depreciation becomes a higher percentage of revenue. In the full year of 2014, ROV depreciation and amortization was 14% of ROV revenue; in the full year of 2015, it was 18% of ROV revenue and in the first half of 2016 it was 24% of ROV revenue. Our ROV operating income decreased in the three- and six-month periods ended June 30, 2016 compared to the corresponding periods of the prior year, as a result of lower days on hire and lower average revenue per day-on-hire. Our decrease in ROV operating income in the second quarter of 2016 compared to the immediately preceding quarter was the result of lower average revenue per day on hire as a result of a geographical shift in the number of days worked, and lower pricing. We added five new ROVs to our fleet during the six months ended June 30, 2016 to meet contractual commitments and retired two, resulting in a total of 318 ROVs in our ROV segment fleet. We expect our second half 2016 ROV operating income to decrease from that of the first half, due to decreases in days on hire and average revenue per day-on-hire.

To improve operational efficiency, we have reorganized our Subsea Products segment into two business units – (1) manufactured products and (2) service and rentals. Manufactured products include production control umbilicals and specialty subsea hardware, while our service and rentals include tooling, subsea work systems and installation and workover control systems. This internal reorganization does not affect our segment reporting structure or the historical comparability of our segment results. The following table presents revenue from manufactured products and service and rentals as their respective percentages of total Subsea Products revenue:

Three Months Ended			Six Months Ended		
Jun 30, 2016	Jun 30, 2015	Mar 31, 2016	Jun 30, 2016	Jun 30, 2015	
68%	58%	65%	66%	60%	Manufactured products
32%	42%	35%	34%	40%	Service and rentals

Our Subsea Products revenue and operating income were lower in the three-month period ended June 30, 2016 compared to the corresponding period of the prior year, due to lower demand and pricing, most notably in service and rentals. The second quarter of 2015 included a write down of inventory of \$9.0 million, as we decided to cease manufacturing subsea BOP control systems due to deteriorating demand prospects. Subsea Products operating income in the second quarter of 2016 was lower than that of the immediately preceding quarter due to lower demand and pricing in service and rentals and lower margins on manufactured products, as we processed backlog and new orders with lower pricing. Our Subsea Products backlog was \$503 million at June 30, 2016 compared to \$652 million at December 31, 2015. The backlog decline was primarily in manufactured products. For the six months ended June 30, 2016 our Subsea Products revenue and operating income decreased from that of the corresponding period of the prior year across both business units, most notably due to lower demand for and pricing of service and rentals. We expect Subsea Products operating income to be considerably lower in the second half of 2016 compared to the first half, due to lower throughput and margins below 10%.

Our Subsea Projects operating income was lower in the three-month period ended June 30, 2016 compared to the corresponding period of the prior year, as a result of generally lower vessel demand and pricing, and the release in

May 2016 of the Bourbon Oceanteam 101, which serviced the field support vessel services contract offshore Angola. Our Subsea Projects operating income was higher in the three-month period ended June 30, 2016 compared to the immediately preceding quarter, as we drydocked the Ocean Alliance for regulatory inspection during the first quarter. For the six months ended June 30, 2016, our Subsea Projects revenue and operating income decreased from that of the corresponding period of the prior year, as a result of decreased demand and lower pricing for deepwater vessel services, including the completion during April 2015 of work associated with the Bourbon Evolution 803, a vessel we chartered on a short-term basis for use associated with our contract for field support vessel services offshore Angola. In the second half of 2016, we expect some seasonal increase in Gulf of Mexico activity, and a reduction of our vessel fixed costs when the Olympic Intervention IV charter obligation expires in July. These factors, however are not expected to be enough to offset our reduced scope of work in Angola, including the early release of the Bourbon Oceanteam 101 from its field support services contract with BP at the end of May.

Table of Contents

For the three-month period ended June 30, 2016, our Asset Integrity segment generated an operating loss, compared to operating income for the corresponding period of the prior year, as a result of lower demand and pricing, principally in the U.K. and Norway, and a bad debt expense of \$3.3 million in the second quarter of 2016. Compared to the immediately preceding quarter, Asset Integrity's operating results were lower due to the bad debt expense. For the six months ended June 30, 2016, our Asset Integrity revenue and operating income decreased from that of the corresponding period of the prior year across most of our operating areas due to decreased demand and pricing, as customers continue to defer both capital and maintenance expenditures. For the second half of 2016, we expect Asset Integrity to generate a small amount of operating income.

## Advanced Technologies

Revenue and margin information was as follows:

	Three Months Ended			Six Months Ended	
(dollars in 2016 thousands)	Jun 30, 2015	Mar 31, 2016	Jun 30, 2016	Jun 30, 2015	
Revenue	\$82,475	\$66,889	\$149,364	\$160,518	
Gross Margin	10,945	5,827	16,427	20,345	
Operating Income	6,267	593	6,121	11,287	
Operating Income %	% 7	% 1	% 4	% 7	%

Advanced Technologies operating income for the three-month period ended June 30, 2016 was higher than that of the immediately preceding quarter, as a result of an increase in engineering services and support for the U.S. Navy. For the six months ended June 30, 2016, Advanced Technologies operating income was lower than that of the corresponding period of 2015, due to continuing low margins on certain now-completed commercial programs and theme park projects resulting from execution and contracting issues. We expect an improvement in our Advanced Technologies operating income in the second half of 2016 compared to the first half of 2016, with the comparative increase due to expected better results on subsequent theme park projects and increased activity.

## Unallocated Expenses

Our Unallocated Expenses, i.e., those not associated with a specific business segment, within gross profit consist of expenses related to our incentive and deferred compensation plans, including restricted stock units, performance units and bonuses, as well as other general expenses. Our Unallocated Expenses within operating income consist of those expenses within gross profit plus general and administrative expenses related to corporate functions.

The following table sets forth our Unallocated Expenses for the periods indicated.

	Three Months Ended			Six Months Ended	
(dollars in 2016 thousands)	Jun 30, 2015	Mar 31, 2016	Jun 30, 2016	Jun 30, 2015	
Gross margin expenses	\$9,433	\$18,657	\$28,090	\$51,464	
	19,721	27,344	47,065	74,957	

Operating  
income  
expenses  
%  
of 3  
revenue

% 5      % 4      % 4      % 5      %

Our Unallocated Expenses were lower in the three- and six-month periods ended June 30, 2016 compared to the corresponding periods of the prior year, primarily due to lower estimated expenses related to incentive compensation from our performance units and bonuses and ongoing cost reduction initiatives. Our Unallocated Expenses for the second quarter of 2016 decreased from those of the immediately preceding quarter, primarily due to lower estimated expenses related to incentive compensation from our performance units and bonuses. For the second half of 2016, we expect Unallocated Expenses to be slightly higher than the first half of 2016.

Table of Contents

## Other

The following table sets forth our significant financial statement items below the income from operations line.

	Three Months Ended		Six Months Ended	
(in thousands)	Jun 30, 2015	Jun 30, 2016	Jun 30, 2016	Jun 30, 2015
Interest income	\$ 1,442	\$ 51	\$ 295	\$ 1,737
Interest expense, net of amounts capitalized	(6,207)	(6,212)	(6,392)	(12,599)
Equity in income of unconsolidated affiliates	1	526	789	(254)
Other income (expense), net	(1,405)	(6,484)	(5,988)	(7,393)
Provision for income taxes	10,164	29,828	11,437	21,601
				61,492

In addition to interest on borrowings, interest expense includes amortization of loan costs, fees for lender commitments under our revolving credit agreement and fees for standby letters of credit and bank guarantees that banks issue on our behalf for performance bonds, bid bonds and self-insurance requirements.

Foreign currency transaction gains and losses is the principal component of Other income (expense), net. In the six months ended June 30, 2016, we incurred foreign currency transaction losses of \$7.1 million, primarily related to Angola and its currency's declining exchange rate relative to the U.S. dollar. The foreign currency transaction losses related primarily to our cash balances in Angola. Conversion of cash balances from Angolan kwanza to U.S. dollars is controlled by the central bank in Angola, and the central bank slowed this process starting in mid-2015, causing our cash balances in kwanza to increase.

The provisions for income taxes were related to U.S. income taxes that we provided at estimated annual effective rates using assumptions as to earnings and other factors that would affect the tax provision for the remainder of the year, and to the operations of foreign branches and subsidiaries that were subject to local income and withholding taxes. We currently anticipate our effective tax rate for 2016 will be 31.3%. Factors that could affect our estimate of this rate include our profitability levels in general and the geographic mix in the sources of our results. The primary difference between our current 2016 estimated effective tax rate of 31.3% and the federal statutory tax rate of 35% reflects our

intention to continue to indefinitely reinvest in certain of our international operations. As a result, we do not provide for U.S. taxes on that portion of our foreign earnings.

Table of Contents

## Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are currently exposed to certain market risks arising from transactions we have entered into in the normal course of business. These risks relate to interest rate changes and fluctuations in foreign exchange rates. We do not believe these risks are material. We have not entered into any market risk sensitive instruments for speculative or trading purposes. When we have a significant amount of borrowings, we typically manage our exposure to interest rate changes through the use of a combination of fixed- and floating-rate debt. See Note 3 of Notes to Consolidated Financial Statements included in this report for a description of our revolving credit facility and interest rates on our borrowings. We have an interest rate swap in place on \$100 million in principal amount of our 4.650% Senior Notes due 2024 for the period from November 2014 to November 2024. The agreement swaps the fixed interest rate of 4.650% on \$100 million of the Senior Notes to the floating rate of one month LIBOR plus 2.426%. We believe significant interest rate changes would not have a material near-term impact on our future earnings or cash flows. Because we operate in various oil and gas exploration and production regions in the world, we conduct a portion of our business in currencies other than the U.S. dollar. The functional currency for several of our international operations is the applicable local currency. A stronger U.S. dollar against the U.K. pound sterling, the Norwegian kroner and the Brazilian real may result in lower operating income. We manage our exposure to changes in foreign exchange rates principally through arranging compensation in U.S. dollars or freely convertible currency and, to the extent possible, by limiting compensation received in other currencies to amounts necessary to meet obligations denominated in those currencies. We use the exchange rates in effect as of the balance sheet date to translate assets and liabilities as to which the functional currency is the local currency, resulting in translation adjustments that we reflect as accumulated other comprehensive income or loss in the shareholders' equity section of our Consolidated Balance Sheets. We recorded net adjustments to our equity accounts of \$(20) million and \$17 million in the three-month periods ended June 30, 2016 and 2015, respectively. Negative adjustments reflect the net impact of the strengthening of the U.S. dollar against various foreign currencies for locations where the functional currency is not the U.S. dollar. Conversely, positive adjustments reflect the effect of a weakening U.S. dollar.

We recorded foreign currency transaction losses of \$1.2 million and \$7.1 million in the three- and six-month periods ended June 30, 2016, and \$6.0 million and \$5.3 million in the three- and six-month periods ended June 30, 2015, respectively, that are included in Other expense, net in our Consolidated Statements of Income in those respective periods. Since the second quarter of 2015, the exchange rate for the Angolan kwanza relative to the U.S. dollar has been declining. As our functional currency in Angola is the U.S. dollar, included within our foreign currency translation losses are foreign currency transaction losses related to the kwanza of \$1.2 million and \$8.2 million in the three- and six-month periods ended June 30, 2016. These foreign currency transaction losses related primarily to the remeasurement of our Angolan kwanza cash balances to U.S. dollars. Conversion of cash balances from kwanza to U.S. dollars is controlled by the central bank in Angola, and the central bank has slowed this process since mid-2015, causing our kwanza cash balances to increase. As of June 30, 2016, we had the equivalent of approximately \$34 million of cash in kwanza in Angola reflected on our balance sheet.

To mitigate our currency exposure risk in Angola, through June 30, 2016 we have used kwanza to purchase \$50 million equivalent Angolan central bank (Banco Nacional de Angola) bonds with various maturities during 2018. These bonds are denominated as U.S. dollar equivalents, so that, upon payment of semi-annual interest and principal upon maturity, payment is made in kwanza, equivalent to the respective U.S. dollars at the then-current exchange rate. We have classified \$40 million of these instruments as held-to-maturity, and have recorded the original cost on our balance sheet as other non-current assets. The remaining \$10 million are classified as available for sale and are recorded on our balance sheet as other current assets at original cost, which approximated market value at June 30, 2016.

Table of Contents

Item 4. Controls and Procedures.

In accordance with Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), we carried out an evaluation, under the supervision and with the participation of management, including our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based on that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of June 30, 2016 to provide reasonable assurance that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

There has been no change in our internal control over financial reporting that occurred during the three months ended June 30, 2016 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II – OTHER INFORMATION

Item 1. Legal Proceedings.

On June 17, 2014, Peter L. Jacobs, a purported shareholder, filed a derivative complaint against all of the then-current members of our board of directors (John R. Huff, T. Jay Collins, Jerold J. DesRoche, D. Michael Hughes, Harris J. Pappas, Paul B. Murphy and M. Kevin McEvoy) and one of our former directors (David S. Hooker), as defendants, and our company, as nominal defendant, in the Court of Chancery of the State of Delaware. Through the complaint, the plaintiff is asserting, on behalf of our company, actions for breach of fiduciary duties and unjust enrichment in connection with prior determinations of our board of directors relating to nonexecutive director compensation. The plaintiff is seeking relief including disgorgement of payments made to the defendants, an award of unspecified damages and an award for attorneys' fees and other costs. We and the defendants filed a motion to dismiss the complaint and a supporting brief
