## Company and Product Overview

Lear Corporation is a leading Tier 1 supplier to the global automotive industry. We supply seating, electrical distribution systems and electronic modules, as well as related sub-systems, components and software, to all of the world's major automotive manufacturers. As of December 31, 2017, we had 257 manufacturing, engineering and administrative locations in 39 countries and are continuing to grow our business in all automotive producing regions of the world, both organically and through complementary acquisitions.

Our business is organized under two reporting segments: Seating and E-Systems. Each of these segments has a varied product and technology range across a number of component categories:

**Seating** — Our Seating segment consists of the design, development, engineering, just-in-time assembly and delivery of complete seat systems, as well as the design, development, engineering and manufacture of all major seat components, including seat covers and surface materials such as leather and fabric, seat structures and mechanisms, seat foam and headrests. Further, we have capabilities in active sensing and comfort for seats, utilizing electronically controlled sensor and adjustment systems and internally developed algorithms. We also offer seat heating and cooling capabilities through technology partnerships and design-integrated supplier solutions.

**E-Systems** — Our E-Systems segment consists of the design, development, engineering and manufacture of complete electrical distribution systems that route electrical signals and manage electrical power within the vehicle for traditional vehicle architectures, as well as high power and hybrid electric systems. Key components in the electrical distribution system include wire harnesses, terminals and connectors and junction boxes, including components and systems for high power battery electric vehicle and hybrid electric vehicle power management and distribution systems. We also design, develop, engineer and manufacture sophisticated electronic control modules that facilitate signal, data and power management within the vehicle, as well as associated software. We have electronic hardware and software capabilities in wireless communication and cybersecurity that securely process various signals to, from and within the vehicle, as well as capabilities to provide roadside modules that communicate real-time traffic information to vehicles in the area.

Our products are more fully described in our Annual Report, which can be accessed at: <https://www.lear.com/>.

Lear Corporation's policy on Conflict Minerals can be found at:  
[http://www.lear.com/site/suppliers/conflict-minerals.aspx?cat\\_id=20](http://www.lear.com/site/suppliers/conflict-minerals.aspx?cat_id=20)
