\*\* Variable rate demand notes are securities whose interest rates are reset periodically at market levels. These securities are often payable on demand and are shown at their current rates as of February 28, 2009.

\*\*\* Floating rate notes are securities whose yields vary with a designated market index or market rate, such as the coupon-equivalent of the US Treasury bill rate. These securities are shown at their current rate as of February 28, 2009. The cost for federal income tax purposes was \$839,030,681. At February 28, 2009, net unrealized depreciation for all securities based on tax cost was \$4,997,037. This consisted of aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost of \$25,326,191 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value of \$30,323,228.

(a) Bond is insured by one of these companies:

(b) Security incorporates a letter of credit from the bank listed.

(c) Securities represent the underlying municipal obligations of inverse floating rate obligations held by the Fund.

(d) Security forms part of the below tender option bond trust. Principal Amount and Value shown take into account the leverage factor. 144A: Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

AMT: Subject to alternative minimum tax.

ETM: Bonds bearing the description ETM (escrow to maturity) are collateralized usually by US Treasury securities which are held in escrow and used to pay principal and interest on bonds so designated.

Prerefunded: Bonds which are prerefunded are collateralized usually by US Treasury securities which are held in escrow and used to pay principal and interest on tax-exempt issues and to retire the bonds in full at the earliest refunding date.

### Fair Value Measurements

Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements, establishes a three-tier hierarchy for measuring fair value and requires additional disclosure about the classification of fair value measurements.

Various inputs are used in determining the value of the Fund's investments. These inputs are summarized in three broad levels. Level 1 includes quoted prices in active markets for identical securities. Level 2 includes other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, and credit risk). Level 3 includes significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of February 28, 2009 in valuing the Fund's investments. Please see below for information on the Fund's policy regarding valuation inputs, and their aggregate levels used in the table below:
