ICU MEDICAL, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Note 1: Basis of Presentation

The accompanying unaudited interim condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S.") and pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") and reflect all adjustments, consisting of only normal recurring adjustments, which are, in the opinion of management, necessary for a fair statement of the consolidated results for the interim periods presented. Results for the interim period are not necessarily indicative of results for the full year. Certain information and footnote disclosures normally included in annual consolidated financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. The condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Annual Report on Form 10-K of ICU Medical, Inc., a Delaware corporation, filed with the SEC for the year ended December 31, 2015.

We operate in one business segment engaged in the development, manufacturing and sale of innovative medical devices used in infusion therapy, critical care and oncology applications. We sell the majority of our products through our direct sales force and through independent distributors throughout the U. S. and internationally. Additionally, we sell our products on an original equipment manufacturer basis to other medical device manufacturers. All subsidiaries are wholly owned and are included in the condensed consolidated financial statements. All intercompany balances and transactions have been eliminated.

Note 2: New Accounting Pronouncements

Recently Adopted Accounting Standards

In March 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standard Update ("ASU") No. 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. The amendments address several aspects of the accounting for share-based payment award transactions, including income tax accounting consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The amendments in this update are effective for annual periods beginning after December 15, 2016. Early adoption is permitted for an entity in any interim or annual period. An entity that elects early adoption must adopt all of the amendments in the same period and any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. We early adopted this standard during the second quarter ended June 30, 2016. As a result of the adoption, we recognized a \$0.8 million and \$3.1 million tax benefit as a discrete item during the three and six months ended June 30, 2016, respectively. We elected to retrospectively adopt the presentation of excess tax benefits as an operating activity rather than as a financing activity on the statement of cash flows. Accordingly, the adoption resulted in a \$3.1 million and \$3.4 million increase in operating cash flows for the periods ended June 30, 2016 and 2015, respectively, and a corresponding \$3.1 million and \$3.4 million decrease in financing cash flows for the period ended June 30, 2016 and 2015, respectively. We elect to account for forfeitures as they occur.

In September 2015, the FASB issued ASU No. 2015-16, Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments. ASU 2015-16 requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined, including the cumulative effect of the change in provisional amount as if the accounting had been completed at the acquisition date. The adjustments related to previous reporting periods since the acquisition date must be disclosed by income statement line item either on the face of the income statement or in the notes. The

amendments are effective prospectively for the fiscal years, and interim reporting periods within those years, beginning on or after December 15, 2015. The adoption of this ASU did not have a material impact on our consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-12, Compensation - Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide that a Performance Target Could be Achieved after the Requisite Service Period. ASU 2014-12 requires that a performance target that affects vesting, and that could be achieved after the requisite service period, be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant date fair value of the award. This update further clarifies that compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. The amendments in ASU 2014-12 are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Entities

Table of Contents

may apply the amendments in ASU 2014-12 either: (a) prospectively to all awards granted or modified after the effective date; or (b) retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter. We adopted this ASU on a prospective basis. The adoption did not have a material impact on our consolidated financial statements.

Recently Issued Accounting Standards

In June 2016, the FASB issued ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. This update amends the FASB's guidance on the impairment of financial instruments by requiring timelier recording of credit losses on loans and other financial instruments. The ASU adds an impairment model that is based on expected losses rather than incurred losses. The ASU also amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. The amendments in this update will be effective for fiscal years beginning after December 15, 2019. Early adoption is permitted as of the fiscal years beginning after December 15, 2018. The updated guidance requires a modified retrospective adoption. We are currently evaluating the impact of this ASU on the consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842). The amendments in this update require an entity to recognize a right-of-use asset and lease liability for all leases with terms of more than 12 months. Recognition, measurement and presentation of expenses will depend on classification as finance or operating lease. The amendments also require certain quantitative and qualitative disclosures about leasing arrangements. The amendments in this update will be effective for fiscal years beginning after December 15, 2019. Early adoption is permitted. The updated guidance requires a modified retrospective adoption. We are currently evaluating the impact of this ASU on the consolidated financial statements and related disclosures.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities, which amends certain aspects of recognition, measurement, presentation and disclosure of financial instruments. This amendment requires all equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under the equity method of accounting or those that result in the consolidation of the investee). The amendments in this update will be effective for fiscal years beginning after December 15, 2017. Early adoption of the amendments is not permitted with the exception of the provision requiring the recognition in other comprehensive income the fair value change from instrument-specific credit risk measured using the fair value option for financial instruments. We are currently evaluating the impact of this ASU on the consolidated financial statements and related disclosures.

In July 2015, the FASB issued ASU No. 2015-11 Inventory (Topic 330): Simplifying the Measurement of Inventory. ASU 2015-11 changes the measurement of inventory from lower of cost or market to lower of cost and net realizable value. The amendments are effective prospectively for the fiscal years, and interim reporting periods within those years, beginning on or after December 15, 2016. We do not anticipate a material impact on our consolidated financial statements from the adoption of this ASU.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606). ASU 2014-09 removes inconsistencies and weaknesses in revenue requirements, provides a more robust framework for addressing revenue issues, improves comparability of revenue recognition practices across entities, industries, jurisdictions and capital markets, provides more useful information to users of financial statements through improved disclosure requirements and simplifies the preparation of financial statements by reducing the number of requirements to which an entity must refer. This guidance requires that an entity depict the consideration by applying a five-step analysis in determining when and how revenue is recognized. The new model will require revenue recognition to

depict the transfer of promised goods or services to customers in an amount that reflects the consideration a company expects to receive in exchange for those goods or services. On April 1, 2015, the FASB voted for a one-year deferral of the effective date of the new revenue recognition standard, ASU No. 2014-09. On July 15, 2015, the FASB affirmed these changes, which requires public entities to apply the amendments in ASU 2014-09 for annual reporting beginning after December 15, 2017. Early adoption is permitted beginning after December 31, 2016, the original effective date in ASU 2014-09. Subsequent to the issuance of this ASU, the FASB issued three amendments: ASU No. 2016-08 which clarifies principal versus agent considerations; ASU No. 2016-10 which clarifies guidance related to identifying performance obligations and licensing implementation; and ASU 2016-12 which provides narrow-scope improvements and practical expedients. All of the amendments have the same effective dates mentioned above. We do not anticipate a material impact on our consolidated financial statements from adoption of any of the above ASUs. We expect to adopt the full retrospective transition method when adopting this ASU.

Table of Contents

Note 3: Restructuring Charges

Restructuring Charges

During the year ended December 31, 2015, we incurred restructuring charges related to: (i) an agreement with Dr. Lopez, a member of our Board of Directors and a former employee in our research and development department, pursuant to which we bought out Dr. Lopez's right to employment under his then-existing employment agreement; (ii) the reorganization of our corporate infrastructure, resulting in one-time employee termination benefits and other associated costs; and (iii) a commitment to a plan to sell our Slovakia manufacturing facility. The assets of the manufacturing facility are classified as assets held for sale and are included as a separate line item in our condensed consolidated balance sheet. The sale is expected to be completed during the second half of 2016. The plan to close the facility resulted in a pre-tax restructuring charge for employee termination benefits, government incentive repayments and other associated costs. There was \$0.4 million in restructuring charges incurred for the three and six months ended June 30, 2016. Of these charges \$0.2 million were related to the closure of the Slovakian manufacturing facility and are included in the below table, and the other \$0.2 million was related to a one-time charge unrelated to the events disclosed above.

The following table summarizes the details of changes in our restructuring-related accrual for the period ending June 30, 2016 (in thousands):

	Accrued Balance December 31, 2015	Charges Incurred	Payments	Currency Translation	Other Adjustments	Accrued Balance June 30, 2016
Severance pay and benefits	\$ 2,505	\$ 25	\$(1,421)	\$ 69	\$ 172	\$ 1,350
Government incentive repayment	1,884	—	(1,769)	57	(172)	—
Employment agreement buyout	1,845	—	(188)	—	—	1,657
Other corporate restructuring	305	168	(251)	—	—	222
	\$ 6,539	\$ 193	\$(3,629)	\$ 126	\$ —	\$ 3,229

Note 4: Acquisition and Strategic Transaction Expenses

On April 4, 2016, we acquired all of the outstanding shares of Tangent Medical Technologies, Inc. ("Tangent") for \$2.6 million in cash. Tangent designs, develops, and commercializes intravenous catheters and associated products for the improvement of infusion therapy. Tangent's products enhance our infusion therapy product offering. As a result of the Tangent acquisition, we immediately recognized a \$1.1 million bargain purchase gain that represented the excess of the estimated fair market value of the identifiable tangible and intangible assets acquired, liabilities assumed and deferred tax assets over the total purchase consideration. The bargain purchase was driven by our ability to realize acquired deferred tax assets. The purchase price allocation is subject to further adjustment in order to account for final tax related matters such as filing of final tax return.

We incurred \$1.1 million in transaction costs during the three and six months ended June 30, 2016 related to our 2015 acquisition of EXC Holding Corp. and to our second quarter 2016 acquisition of Tangent mentioned above.

Note 5: Legal Settlements

On April 2, 2015, an arbitrator ruled on a breach of contract claim between us and a customer, Hospira, Inc., awarding Hospira \$8.2 million Canadian dollars (\$6.5 million U.S. dollars). The arbitrator also ruled that we pay 75% of

Hospira's legal fees and expenses, which were \$0.7 million U.S. dollars. During the six months ended June 30, 2015, we recorded an estimated total charge of \$7.1 million related to the settlement and associated fees, which is presented as a separate line item in our condensed consolidated income statement. These charges were fully paid during the second quarter of 2015.

Note 6: Fair Value Measurement

Our investment securities consist of certificates of deposit, corporate bonds, U.S. Treasury securities, commercial paper and federal tax-exempt state and municipal government debt. All investment securities are considered available-for-sale and are "investment grade", carried at fair value and there have been no gains or losses on their disposal. As of June 30, 2016, we had \$3.5 million of our investment securities as Level 1 assets, which are certificates of deposit and U.S. Treasury securities

Table of Contents

with quoted prices in active markets. As of June 30, 2016, we had \$24.2 million of our investment securities as Level 2 assets, which are pre-refunded municipal securities, corporate bonds and commercial paper and are valued using observable market based inputs such as quoted prices, interest rates and yield curves.

There were no transfers between Levels during the first half of 2016.

The following tables provide the assets and liabilities carried at fair value measured on a recurring basis for the periods indicated (in thousands):

Fair value measurements at June 30, 2016 using				
Total carrying value	Quoted prices in active markets for identical assets (level 1)	Significant other observable inputs (level 2)	Significant unobservable inputs (level 3)	
Available for sale securities	\$ 27,720	\$ 3,504	\$ 24,216	\$ —
	\$ 27,720	\$ 3,504	\$ 24,216	\$ —

Fair value measurements at December 31, 2015 using				
Total carrying value	Quoted prices in active markets for identical assets (level 1)	Significant other observable inputs (level 2)	Significant unobservable inputs (level 3)	
Available for sale securities	\$ 41,233	\$ 8,785	\$ 32,448	\$ —
	\$ 41,233	\$ 8,785	\$ 32,448	\$ —

In November 2015, our Board of Directors authorized the closure of our Vrabce, Slovakia manufacturing facility. As a result of the closure we reclassified the land and building related to the Slovakia facility as held for sale. Our assets held for sale are included as a separate line item in our condensed consolidated balance sheets. The initial fair value of our assets held for sale was estimated using the income approach and is based on critical estimates, judgments and assumptions derived from: analysis of market conditions; building condition; comparable properties; and rental income and expense (Level 3). Subsequent to the initial valuation, we evaluate the carrying value of our assets held for sale when circumstances indicate the carrying value of those assets may or may not be recoverable; there were no such indicators during the period ended June 30, 2016. The increase in our assets held for sale as of June 30, 2016, as compared to December 31, 2015, was due to currency translation.

The following tables provide the assets and liabilities carried at fair value on a non-recurring basis for the periods indicated (in thousands):

Fair value measurements at June 30, 2016 using				
Total carrying value	Quoted prices in active markets for identical assets (level 1)	Significant other observable inputs (level 2)	Significant unobservable inputs (level 3)	
Assets held for sale	\$ 4,209	\$ —	\$ —	\$ 4,209

Table of Contents

Note 7: Investment Securities

Our investment securities consist of certificates of deposit, corporate bonds, U.S. Treasury securities, commercial paper and federal tax-exempt state and municipal government debt. All investment securities are considered available-for-sale and are “investment grade”, carried at fair value, and there have been no gains or losses on their disposal. Unrealized gains and losses on available-for-sale securities, net of tax, are included in accumulated other comprehensive loss in the stockholders' equity section of our condensed consolidated balance sheets. We had no gross unrealized gains or losses on available-for-sale securities at June 30, 2016 or December 31, 2015. The scheduled maturities of the debt securities are between 2016 and 2036 and are all callable within one year.

The investment securities consist of the following at June 30, 2016 and December 31, 2015 (in thousands):

	June 30, December 31,	
	2016	2015
Federal and municipal tax-exempt debt securities	\$8,143	\$ 4,951
Corporate bonds	15,374	25,400
U.S. Treasury securities	3,004	7,537
Commercial paper	699	2,097
Certificates of deposit	500	1,248
Total investment securities	\$27,720	\$ 41,233

Note 8: Inventories

Inventories consisted of the following (in thousands):

	June 30, December 31,	
	2016	2015
Raw material	\$27,265	\$ 24,681
Work in process	4,258	4,282
Finished goods	18,396	14,669
Total inventories	\$49,919	\$ 43,632

Note 9: Property and Equipment

Property and equipment consisted of the following (in thousands):

	June 30, December 31,	
	2016	2015
Machinery and equipment	\$99,259	\$ 96,909
Land, building and building improvements	60,107	56,716
Molds	37,452	36,436
Computer equipment and software	25,559	23,346
Furniture and fixtures	3,919	3,638
Construction in progress	10,918	6,003
Total property and equipment, cost	237,214	223,048
Accumulated depreciation	(157,510)	(148,728)
Property and equipment, net	\$79,704	\$ 74,320

Note 10: Net Income Per Share

Net income per share is computed by dividing net income by the weighted average number of common shares outstanding. Diluted net income per share is computed by dividing net income by the weighted average number of common shares outstanding plus dilutive securities. Dilutive securities are outstanding common stock options and restricted stock units

Table of Contents

(excluding stock options with an exercise price in excess of the average market value for the period), less the number of shares that could have been purchased with the proceeds from the exercise of the options, using the treasury stock method. Options that are anti-dilutive because their exercise price exceeded the average market price of the common stock for the period approximated 33,000 for the three months ended June 30, 2015 and 4,300 and 16,000 for the six months ended June 30, 2016 and 2015, respectively. There were no anti-dilutive options for the three months ended June 30, 2016.

The following table presents the calculation of net earnings per common share ("EPS") — basic and diluted (in thousands, except per share data):

	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015
Net income	\$16,606	\$13,570	\$34,766	\$23,256
Weighted average number of common shares outstanding (for basic calculation)	16,091	15,781	16,070	15,738
Dilutive securities ⁽¹⁾	909	571	894	564
Weighted average common and common equivalent shares outstanding (for diluted calculation)	17,000	16,352	16,964	16,302
EPS — basic	\$1.03	\$0.86	\$2.16	\$1.48
EPS — diluted	\$0.98	\$0.83	\$2.05	\$1.43

⁽¹⁾ During the second quarter of 2016, we early adopted ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting see Note 2, New Accounting Pronouncements, for more detail. Under this ASU, the assumed proceeds from applying the treasury stock method when computing earnings per share no longer includes the amount of excess tax benefits or deficiencies that used to be recognized as additional paid-in capital. This change in the treasury stock method was made on a prospective basis, with adjustments reflected as of the beginning of the 2016 fiscal year. The adoption of this ASU impacted weighted average common and common equivalent shares outstanding by 345,000 shares and 340,000 shares for the three and six months ended June 30, 2016, respectively.

Note 11: Major Customer

We had revenue equal to 10% or more of total revenue from one customer, Hospira, Inc. a subsidiary of Pfizer. Such revenues were 34% and 35% of total revenue for the three months ended June 30, 2016 and 2015, respectively and 34% and 36% of total revenue for the six months ended June 30, 2016 and 2015, respectively. As of June 30, 2016 and December 31, 2015, we had accounts receivable from Pfizer of 35% and 40% of consolidated accounts receivable, respectively.

Note 12: Income Taxes

Income taxes were accrued at an estimated effective tax rate of 28% and 27% for the six months ended June 30, 2016 and 2015, respectively. Those rates differ from that computed at the federal statutory rate of 35%.

The effective tax rate for the six months ended June 30, 2016 differs from the federal statutory rate of 35% principally because of the effect of foreign and state income taxes, tax credits, deductions for domestic production activities, and included material discrete tax benefits related to the adoption of ASU 2016-09, see below.

The effective tax rate during the six months ended June 30, 2016 included a material tax benefit of \$3.1 million related to the early adoption of ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to

Employee Share-Based Payment Accounting, which amends current accounting to now recognize all excess tax benefits and all tax deficiencies as income tax benefit or expense in the reporting period in which they occur. The income tax benefit was treated as a discrete item when determining the annual estimated effective tax rate see Note 2, New Accounting Pronouncements for further detail.

The effective tax rate for the six months ended June 30, 2015 differs from the federal statutory rate principally because of the effect of foreign and state income taxes, tax credits, deductions for domestic production activities and material discrete tax benefits related to the impact of changes in estimates of tax reserves related to uncertainties in income taxes as a result of the favorable conclusion of recent federal and state examinations.

Table of Contents

Note 13: Treasury Stock

In July 2010, our Board of Directors approved a common stock purchase plan to purchase up to \$40.0 million of our common stock. This plan has no expiration date. For the six months ended June 30, 2016 we purchased 174,885 shares of our common stock for \$15.4 million, including commissions. As of June 30, 2016, we had \$7.2 million remaining on this purchase plan. We expect to use the treasury stock to issue shares for stock option exercises, restricted stock grants and employee stock purchase plan stock purchases.

Additionally, for the six months ended June 30, 2016, we withheld 17,661 shares of our common stock from employee vested restricted stock units in consideration for \$1.6 million in payments made on the employee's behalf for their minimum statutory income tax withholding obligations.

Note 14: Commitments and Contingencies

From time to time, we are involved in various legal proceedings, most of which are routine litigation, in the normal course of business. Our management does not believe that the resolution of the unsettled legal proceedings that we are involved with will have a material adverse impact on our financial position or results of operations.

In the normal course of business, we have agreed to indemnify our officers and directors to the maximum extent permitted under Delaware law and to indemnify customers as to certain intellectual property matters or other matters related to sales of our products. There is no maximum limit on the indemnification that may be required under these agreements. Although we can provide no assurances, we have never incurred, nor do we expect to incur, any material liability for indemnification.

The following information should be read in conjunction with the condensed consolidated financial statements and accompanying notes in this Form 10-Q, as well as the audited consolidated financial statements and related notes for the fiscal year ended December 31, 2015 included in our Annual Report on Form 10-K.

Business Overview

Our products are used in acute care hospitals and ambulatory clinics in more than 60 countries throughout the world.

	Three months ended June 30,						Six months ended June 30,						Fiscal year ended					
	2016			2015			2016			2015			2015			2014		
	\$	% of Revenue		\$	% of Revenue		\$	% of Revenue		\$	% of Revenue		\$	% of Revenue		\$	% of Revenue

Table of Contents

The following table sets forth, for the periods indicated, total revenue by product line as a percentage of total revenue:

Product line	Three months ended June 30,		Six months ended June 30,		Fiscal year ended	
	2016	2015	2016	2015	2015	2014
Infusion therapy	73 %	69 %	73 %	71 %	72 %	70 %
Critical care	14 %	18 %	14 %	17 %	16 %	18 %
Oncology	13 %	13 %	13 %	12 %	12 %	12 %
	100 %	100 %	100 %	100 %	100 %	100 %

We currently sell our products through direct channels, which include distributors and the end users of our products and as an original equipment manufacturer ("OEM") supplier. Most of our independent distributors handle the full line of our products.

Our largest customer is Hospira, Inc. a subsidiary of Pfizer, to which we distribute our products as an OEM supplier. Pfizer accounted for 34%, 36% and 36% of our worldwide revenue in the first six months of 2016 and each of the years ended 2015 and 2014, respectively. We began this relationship in 1995 with Hospira, which was acquired by Pfizer in September 2015. Our related agreements extend through December 2018. Our agreements with Pfizer provide them with conditional rights to distribute certain of our Clave family and other products to certain categories of customers both in the United States ("U.S.") and foreign countries. Depending on the product and category of customer, these rights may be exclusive or nonexclusive. Pfizer purchases Clave products both as finished goods end-products for distribution to healthcare providers and in bulk for assembly into Pfizer infusion disposable products. The MicroClave, MicroClave Clear, ChemoClave CSTD and pre-pierced connector products are purchased and packaged separately as finished good end products. We also serve as the exclusive manufacturer for certain custom intravenous products that are sold by the same subsidiary. These products are promoted under the name SetSource. Our relationship with Pfizer has been and will continue to be important for our growth. We expect revenue from infusion therapy products and new product sales to Pfizer to remain a significant percentage of our revenue. An adverse change in our relationship with Pfizer, or a deterioration of Pfizer's position in the market, could have an adverse effect on us.

We believe that as healthcare providers continue to either consolidate or join major buying organizations, the success of our products will depend, in part, on our ability, either independently or through strategic relationships such as our Pfizer relationship, to secure long-term contracts with large healthcare providers and major buying organizations. As a result of this marketing and distribution strategy we derive most of our revenue from a relatively small number of distributors and manufacturers. The loss of a strategic relationship with a customer or a decline in demand for manufacturing customers' products could have a material adverse effect on our operating results.

We believe that achievement of our growth objectives worldwide will require increased efforts by us in sales and marketing and product acquisition and development; however, there is no assurance that we will be successful in implementing our growth strategy. Product development or acquisition efforts may not succeed, and even if we do develop or acquire additional products, there is no assurance that we will achieve profitable sales of such products. Increased expenditures for sales and marketing and product acquisition and development may not yield desired results when expected, or at all. While we have taken steps to control these risks, there are certain risks that may be outside of our control, and there is no assurance that steps we have taken will succeed.

Seasonality/Quarterly Results

The healthcare business in the U.S. is subject to quarterly fluctuations due to frequency of illness during the seasons, elective procedures, and over the last few years, the economy. In Europe, the healthcare business generally slows down in the summer months due to vacations resulting in fewer elective surgeries. In addition, we can experience fluctuations in net sales as a result of variations in the ordering patterns of our largest customers, which may be driven more by production scheduling and their inventory levels, and less by seasonality. Our expenses often do not fluctuate in the same manner as net sales, which may cause fluctuations in operating income that are disproportionate to fluctuations in our revenue.

Table of Contents

Acquisition

On April 4, 2016, we acquired all of the outstanding shares of Tangent Medical Technologies, Inc. ("Tangent") for \$2.6 million in cash. Tangent designs, develops, and commercializes intravenous catheters and associated products for the improvement of infusion therapy. Tangent's products enhance our infusion therapy product offering. We do not expect any significant commercial results from this product line over the next eighteen to twenty-four months while we make changes to this product.

Consolidated Results of Operations

We present income statement data in Part I, Item 1 - Financial Statements. The following table shows, for the three and six months ended June 30, 2016 and 2015, respectively, and the year ended December 31, 2015, the percentages of each income statement caption in relation to total revenue:

	Three months ended June 30,		Six Months Ended June 30,		Fiscal year ended
	2016	2015	2016	2015	2015
Total revenue	100 %	100 %	100 %	100 %	100 %
Gross margin	52 %	52 %	53 %	52 %	53 %
Selling, general and administrative expenses	23 %	24 %	24 %	25 %	24 %
Research and development expenses	3 %	4 %	3 %	4 %	5 %
Restructuring and strategic transaction	2 %	— %	1 %	— %	2 %
Legal settlements	— %	— %	— %	4 %	1 %
Impairment of assets held for sale	— %	— %	— %	— %	1 %
Total operating expenses	28 %	28 %	28 %	33 %	33 %
Income from operations	24 %	24 %	25 %	19 %	20 %
Bargain purchase gain	1 %	— %	1 %	— %	— %
Other income, net	— %	— %	— %	— %	— %
Income before income taxes	25 %	24 %	26 %	19 %	20 %
Income taxes	8 %	8 %	7 %	5 %	7 %
Net income	17 %	16 %	19 %	14 %	13 %

Infusion Therapy Revenue

The following table summarizes our total infusion therapy revenue by direct and OEM distribution channels (in millions):

	Three months ended June 30,				Six months ended June 30,			
	2016	2015	\$	%	2016	2015	\$	%
			Change	Change			Change	Change
Direct	\$38.5	\$31.5	\$ 7.0	22.2 %	\$74.1	\$62.6	\$ 11.5	18.4 %
OEM	32.1	26.7	5.4	20.2 %	61.5	54.3	7.2	13.3 %
Total Infusion Therapy Revenue	\$70.6	\$58.2	\$ 12.4	21.3 %	\$135.6	\$116.9	\$ 18.7	16.0 %

Direct infusion therapy sales increased for the three and six months ended June 30, 2016, as compared to the same period in the prior year, primarily due to sales of our SwabCap product-line, which was acquired through an acquisition in October 2015, and our Clave product-lines as a result of new customer sales and an increase in sales to

existing customers. Partially offsetting these period increases was a decrease in sales of other infusion products.

OEM infusion therapy sales increased for the three and six months ended June 30, 2016, as compared to the same period in the prior year, primarily a result of the sales of our OEM SwabCap product and sales of our Clave product lines.

Table of Contents

Critical Care Revenue

The following table summarizes our total critical care revenue by direct and OEM distribution channels (in millions):

	Three months ended June 30,				Six months ended June 30,			
	2016	2015	\$ Change	% Change	2016	2015	\$ Change	% Change
Direct	\$13.2	\$14.9	\$ (1.7)	(11.4)%	\$26.2	\$28.5	\$ (2.3)	(8.1)%
OEM	—	0.2	(0.2)	(100.0)%	—	0.2	(0.2)	(100.0)%
Total Critical Care Revenue	\$13.2	\$15.1	\$ (1.9)	(12.6)%	\$26.2	\$28.7	\$ (2.5)	(8.7)%

Direct critical care sales decreased for the three and six months ended June 30, 2016, as compared to the same period in the prior year, primarily due to a decline of both international and U.S. sales of both our hemodynamic monitoring and our closed blood sampling and conservation system products.

Oncology Revenue

The following table summarizes our total oncology revenue by direct and OEM distribution channels (in millions):

	Three months ended June 30,				Six months ended June 30,			
	2016	2015	\$ Change	% Change	2016	2015	\$ Change	% Change
Direct	\$8.9	\$6.0	\$ 2.9	48.3 %	\$17.3	\$12.0	\$ 5.3	44.2 %
OEM	3.8	4.2	(0.4)	(9.5)%	7.0	6.9	0.1	1.4 %
Total Oncology Revenue	\$12.7	\$10.2	\$ 2.5	24.5 %	\$24.3	\$18.9	\$ 5.4	28.6 %

Direct oncology sales increased for the three and six months ended June 30, 2016, as compared to the same period in the prior year, primarily due to increased direct sales in the U.S. These increases were a result of new customer sales and an increase in sales to existing customers of our ChemoLock and ChemoClave product.

OEM oncology sales marginally decreased during the three months ended June 30, 2016, as compared to the prior year comparable period due to a decrease in U.S. sales of our ChemoClave product, partially offset by an increase in international sales of the same product.

OEM oncology sales marginally increased during the six months ended June 30, 2016, as compared to the prior year comparable period due to an increase in international orders of the ChemoClave product mostly offset by a decrease in U.S. sales.

Gross margins

For the three and six months ended June 30, 2016 gross margins were 51.8% and 53.3%, respectively, as compared to 52.2% for the three and six months ended June 30, 2015. The 40 basis point decrease in gross margin for the three months ended June 30, 2016, as compared to the same period in the prior year was primarily due to certain manufacturing constraints, which caused higher cost for products manufactured in the first quarter that were sold in the second quarter. The 110 basis point increase in gross margin for the six months ended June 30, 2016, as compared to the same period in the prior year was primarily due to favorable foreign exchange rates on our operations expenses due to the decline in the Mexican Peso and favorable product mix partially offset by the impact of certain manufacturing constraints, mentioned above.

Table of Contents

Selling, general and administrative (“SG&A”) expenses

Three months ended June 30,					Six months ended June 30,				
2016	2015	\$	%		2016	2015	\$	%	
		Change	Change	%			Change	Change	%
SG&A	\$22.5	\$20.3	\$ 2.2	10.8 %	\$44.5	\$40.5	\$ 4.0	9.9 %	

SG&A expenses increased for the three months ended June 30, 2016, as compared to the same period in the prior year, primarily due to an increase of \$1.5 million in compensation, \$0.7 million in dealer fees and \$0.3 million in commissions, partially offset by \$0.5 million in lower medical device excise taxes and \$0.4 million in lower legal expenses. The increase in compensation is in part due to filling positions that were open during 2015, additional employees retained as part of the acquired SwabCap product line, the general hiring and recruitment of new employees and increases in stock-based compensation issued to attract these employees. The increases in dealer fees and commissions were related to an increase in revenue on which they are calculated. The decrease in medical device excise tax expense was due to the elimination of the tax in the current period due to Congress temporarily suspending this tax for the 2016-2017 two-year period. The decrease in legal expenses was due to less litigation.

SG&A expenses increased for the six months ended June 30, 2016, as compared to the same period in the prior year primarily due to an increase of \$3.3 million in compensation, \$0.7 million in higher dealer fees, and \$0.5 million in commissions partially offset by \$0.9 million in lower legal expenses and \$0.9 million in lower medical device excise taxes. The reasons for the changes are the same as indicated above with respect to the three months ended June 30, 2016.

Research and development (“R&D”)

Three months ended June 30,					Six months ended June 30,				
2016	2015	\$	%		2016	2015	\$	%	
		Change	Change	%			Change	Change	%
R&D	\$3.3	\$3.1	\$ 0.2	6.5 %	\$6.7	\$7.4	\$ (0.7)	(9.5)%	

R&D expenses increased for the three months ended June 30, 2016, as compared to the same period in the prior year primarily due to higher R&D project expenses partially offset by a decrease in project costs related to our Cogent™ 2-in-1 hemodynamic monitoring system, which received FDA 510(k) clearance during the second quarter of 2016.

R&D expenses decreased for the six months ended June 30, 2016, as compared to the same period in the prior year primarily due to lower stock based compensation and lower R&D project expenses year-to-date related to our Cogent 2-in-1 hemodynamic monitoring system.

Legal settlement charges

Legal settlement charges were \$7.1 million, or 4.0% of revenue for the six months ended June 30, 2015. On April 2, 2015, an arbitrator ruled on a breach of contract claim between us and Hospira, awarding Hospira \$8.2 million Canadian dollars (\$6.5 million U.S. dollars). The arbitrator also ruled that we pay 75% of Hospira's legal fees and expenses, which were \$0.7 million dollars. We have fully paid the above mentioned legal fees and expenses.

Table of Contents

Restructuring and strategic transaction

Restructuring and strategic transaction expenses were \$1.5 million for each of the three and six months ended June 30, 2016. Restructuring charges of \$0.2 million were related to residual expenses for the closure of our Slovakian manufacturing facility and we incurred \$0.2 million related to other restructuring activities. We incurred \$1.1 million in transaction costs related to our 2015 acquisition of EXC Holding Corp. ("EXC") and to our second quarter 2016 acquisition of Tangent.

Bargain purchase gain

As a result of the Tangent acquisition, we immediately recognized a \$1.1 million bargain purchase gain that represented the excess of the estimated fair market value of the identifiable tangible and intangible assets acquired and liabilities assumed, net of deferred tax attributes over the total purchase consideration. The bargain purchase was driven by our ability to realize acquired deferred tax assets.

Other income

Other income was \$0.1 million and \$0.2 million for the three and six months ended June 30, 2016, as compared to \$0.2 million and \$0.8 million for the three and six months ended June 30, 2015.

Income taxes

Income taxes were accrued at an estimated effective tax rate of 31% and 28% for the three and six months ended June 30, 2016, respectively, as compared to 34% and 27% for the three and six months ended June 30, 2015, respectively.

The effective tax rate for the three and six months ended June 30, 2016 differs from the federal statutory rate principally because of the effect of foreign and state income taxes, tax credits, deductions for domestic production activities, and included material discrete tax benefits related to the adoption of ASU 2016-09, see below.

The effective tax rate during the three and six months ended June 30, 2016 included a material discrete tax benefit of \$0.8 million and \$3.1 million, respectively, related to the adoption of Accounting Standard Update ("ASU") 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting during the second quarter of 2016. The income tax benefit was treated as a discrete item when determining the annual estimated effective tax rate. See Note 2, New Accounting Pronouncements for further detail.

The effective tax rates for the three and six months ended 2015 differs from the federal statutory rate principally because of the effect of foreign and state income taxes, tax credits, deductions for domestic production activities and material discrete tax benefits related to the impact of changes in estimates of tax reserves related to uncertainties in income taxes as a result of the favorable conclusion of recent federal and state examinations.

Liquidity and Capital Resources

During the first six months of 2016, our cash, cash equivalents and investment securities increased by \$23.2 million from \$377.4 million at December 31, 2015 to \$400.6 million at June 30, 2016.

Cash Flows from Operating Activities

Our cash provided by operations for the six months ended June 30, 2016 was \$41.8 million. Net income plus adjustments for non-cash net expenses contributed \$51.0 million to cash provided by operations, and cash used by

changes in operating assets and liabilities was \$9.2 million. The changes in operating assets and liabilities included a \$6.0 million decrease in accrued liabilities, a \$5.5 million increase in inventories, a \$3.8 million increase in prepaid expenses and other assets, and a \$2.5 million increase in accounts receivable, partially offset by \$4.8 million in net changes to income taxes and deferred income taxes and a \$3.8 million increase in accounts payable. The decrease in accrued liabilities was primarily due to the pay-out of fiscal year 2015 accrued bonuses in February of 2016, the payment of accrued restructuring charges related to the closure of our Slovakian manufacturing facility and the payment of acquisition-related accruals from our 2015 EXC acquisition. The increase in inventories was primarily due to building finished good safety stock, to support better customer deliveries, raw materials related to our Slovakia plant closure, and related transfer to our Mexico plant, and inventory associated with the acquired SwabCap product-line. The increase in prepaid expenses and other assets was primarily due to amounts owed by employees for the exercise of their stock options partially offset by a decrease in prepaid insurance due to amortization. The increase in accounts receivable was due to an increase in revenue. The net changes in income taxes was a result of the timing

Table of Contents

of payments for cash tax purposes, which includes true-ups for 2015 overpayment and 2016 estimated taxes. The increase in accounts payable was a result of timing.

Our cash provided by operations for the six months ended June 30, 2015 was \$29.2 million, which includes a retrospective adjustment to include \$3.4 million in excess tax benefits as an operating item due to the implementation of ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting during the second quarter of 2016, see Note 2 for more details. Net income plus adjustments for non-cash net expenses contributed \$39.5 million to cash provided by operations, which was partially offset by a \$10.3 million decrease in cash provided by operating assets and liabilities, retrospectively, adjusted for the impact of the aforementioned ASU. The \$5.5 million increase in accounts receivable was the largest change in operating assets and liabilities. The increase in accounts receivable is primarily due to higher revenue in the second quarter of 2015 compared to the fourth quarter of 2014.

Cash Flows from Investing Activities

The following table summarizes the changes in our investing cash flows (in thousands):

	Six Months Ended		
	June 30,		
	2016	2015	Change
Investing Cash Flows:			
Purchases of property and equipment	\$(9,112)	\$(5,005)	\$(4,107) ⁽¹⁾
Proceeds from sale of assets	1	34	(33)
Business acquisitions, net of cash acquired	(2,606)	—	(2,606) ⁽²⁾
Intangible asset additions	(513)	(440)	(73)
Purchases of investment securities	(18,106)	(17,092)	(1,014)
Proceeds from sale of investment securities	31,765	49,555	(17,790) ⁽³⁾
Net cash provided by investing activities	\$1,429	\$27,052	\$(25,623)

(1) Our purchases of property and equipment will vary from period to period based on additional investments needed to support new and existing products and expansion of our manufacturing facilities.

Our business acquisitions will vary from period to period based upon our current growth strategy and our ability to

(2) execute on desirable target companies. During the second quarter of 2016 we acquired Tangent for \$2.6 million in cash.

(3) Net proceeds from the sale of our investment securities decreased during the six months of 2016, as compared to the comparable prior year period, due to certain corporate bonds that had larger investment balances and maturity dates within the first six months ended June 30, 2015.

While we can provide no assurances, we estimate that our capital expenditures in 2016 will approximate \$18.0 million to \$20.0 million. We anticipate making additional investments in molds, machinery and equipment in our manufacturing operations in the U.S. and Mexico to support new and existing products and in IT to benefit world-wide operations. Additionally, we are in the process of expanding our Mexico manufacturing plant for the anticipated increase in operations as a result of our Slovakian plant closure. We expect to use our cash and investments to fund our capital purchases. These planned amounts of spending are estimates and actual spending may substantially differ from these amounts.

Table of Contents

Cash Flows from Financing Activities

The following table summarizes the changes in our financing cash flows (in thousands):

	Six Months Ended June 30,		
	2016	2015	Change
Financing Cash Flows:			
Proceeds from exercise of stock options	\$7,796	\$5,797	\$1,999 ⁽¹⁾
Proceeds from employee stock purchase plan	1,197	1,041	156
Purchase of treasury stock	(16,911)	(1,435)	(15,476) ⁽²⁾
Net cash (used in) provided by financing activities	\$(7,918)	\$5,403	\$(13,321)

⁽¹⁾ Proceeds from the exercise of stock options will vary from period to period based on the volume of options exercised and the exercise price of the specific options exercised.

⁽²⁾ During the six months ended June 30, 2016, we purchased 174,885 shares of our common stock under our share purchase plan on the open market for \$15.3 million. Additionally, our employees surrendered 17,661 shares of our common stock from vested restricted stock awards as consideration for approximately \$1.6 million in minimum statutory withholding obligations paid on their behalf.

In July 2010, our Board of Directors approved a share purchase plan to purchase up to \$40.0 million of our common stock. As of June 30, 2016, we had purchased \$32.8 million of our common stock pursuant to this plan, leaving a balance of \$7.2 million available for future purchases. This plan has no expiration date. We may purchase additional shares in future quarters and expect we would use our cash and investments to fund the share purchases.

We have a substantial cash and investment security position generated from profitable operations and stock sales, principally from the exercise of employee stock options. We maintain this position to fund our growth, meet increasing working capital requirements, fund capital expenditures, buy back our common stock on an opportunistic basis and to take advantage of acquisition opportunities that may arise. Our primary investment goal is capital preservation.

As of June 30, 2016, we had \$20.6 million of cash and cash equivalents held in local currency by our foreign subsidiaries. If these funds were needed for our operations in the U.S., we would be required to accrue and pay U.S. taxes for a portion of any repatriated funds. However, we expect to permanently reinvest these funds outside of the U.S. and, based on our current plans, we do not presently anticipate a need to repatriate them to fund our U.S. operations.

We believe that our existing cash, cash equivalents and investment securities along with funds expected to be generated from future operations will provide us with sufficient funds to finance our current operations for the next twelve months. In the event that we experience illiquidity in our investment securities, downturns or cyclical fluctuations in our business that are more severe or longer than anticipated or if we fail to achieve anticipated revenue and expense levels, we may need to obtain or seek alternative sources of capital or financing, and we can provide no assurances that the terms of such capital or financing will be available to us on favorable terms, if at all.

Off Balance Sheet Arrangements

In the normal course of business, we have agreed to indemnify our officers and directors to the maximum extent permitted under Delaware law and to indemnify customers as to certain intellectual property matters related to sales of our products. There is no maximum limit on the indemnification that may be required under these agreements. Although we can provide no assurances, we have never incurred, nor do we expect to incur, any material liability for

indemnification.

21

Contractual Obligations

As of June 30, 2016, there were no material changes to our contractual obligations from the amounts reported in our 2015 Form 10-K, except with respect to our purchase obligations as follows (in thousands):

Contractual Obligations	2016
Purchase obligations	\$5,104
	\$5,104

Critical Accounting Policies

In our Annual Report on Form 10-K for the year ended December 31, 2015, we identified the critical accounting policies which affect our more significant estimates and assumptions used in preparing our consolidated financial statements. We have not changed these policies from those previously disclosed in our Annual Report.

New Accounting Pronouncements

See Note 2 to Part I, Item 1. Financial Statements.

Forward Looking Statements

Various portions of this Quarterly Report on Form 10-Q, including this Management's Discussion and Analysis of Financial Condition and Results of Operations, and documents referenced herein, describe trends in our business and finances that we perceive and state some of our expectations and beliefs about our future. These statements about the future are "forward looking statements," within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and we identify them by using words such as "anticipate," "believe," "expect," "estimate," "intend," "plan," "will," "continue," "could," "may," and by similar expressions and statements about aims, goals and plans. The forward looking statements are based on the best information currently available to us and assumptions that we believe are reasonable, but we do not intend the statements to be representations as to future results. They include, without limitation, statements about:

future growth; future operating results and various elements of operating results, including future expenditures and effects with respect to sales and marketing and product development and acquisition efforts; future sales and unit volumes of products; expected increases and decreases in sales; deferred revenue; accruals for restructuring charges, future license, royalty and revenue share income; production costs; gross margins; litigation expense; future SG&A and R&D expenses; manufacturing expenses; future costs of expanding our business; income; losses; cash flow; amortization; source of funds for capital purchases and operations; future tax rates; alternative sources of capital or financing; changes in working capital items such as receivables and inventory; selling prices; and income taxes;

factors affecting operating results, such as shipments to specific customers; reduced dependence on current proprietary products; loss of a strategic relationship; change in demand; domestic and international sales; expansion in international markets, selling prices; future increases or decreases in sales of certain products and in certain markets and distribution channels; maintaining strategic relationships and securing long-term and multi-product contracts with large healthcare providers and major buying organizations; increases in systems capabilities; introduction, development and sales of new products, acquisition and integration of businesses and product lines, including SwabCap (EXC) and Tangent; benefits of our products over competing systems; qualification of our new products for the expedited Section 510(k) clearance procedure; possibility of lengthier clearance process for new products; planned increases in marketing; warranty claims; rebates; product returns; bad debt expense; amortization expense; inventory requirements; lives of property and equipment; manufacturing efficiencies and cost savings; unit manufacturing costs; establishment or expansion of production facilities inside or outside of the U. S.; planned new orders for machinery

and equipment; adequacy of production capacity; results of R&D; our plans to repurchase shares of our common stock; asset impairment losses; relocation of manufacturing facilities and personnel and plans to sell our Slovakia manufacturing facility; effect of expansion of manufacturing facilities on production efficiencies and resolution of production inefficiencies; the effect of costs to customers and delivery times; business

Table of Contents

seasonality and fluctuations in quarterly results; customer ordering patterns and the effects of new accounting pronouncements; and

new or extended contracts with manufacturers and buying organizations; dependence on a small number of customers; loss of larger distributors and the ability to locate other distributors; the impact of the Pfizer acquisition of Hospira; future sales to and revenue from Pfizer and the importance of Pfizer to our growth; effect of the current relationship with Pfizer and the settlement with Hospira, including its effect on future revenue and our positioning with respect to new product introductions and market share; growth of our products in future years; design features of Clave products; the outcome of our strategic initiatives; regulatory approvals and compliance; outcome and impact of litigation; patent protection and intellectual property landscape; patent infringement claims and the impact of newly issued patents on other medical devices; competitive and market factors, including continuing development of competing products by other manufacturers; improved production processes and higher volume production; innovation requirements; consolidation of the healthcare provider market and downward pressure on selling prices; distribution or financial capabilities of competitors; healthcare reform legislation; use of treasury stock; working capital requirements; liquidity and realizable value of our investment securities; future investment alternatives; foreign currency denominated financial instruments; foreign exchange risk; commodity price risk; our expectations regarding liquidity and capital resources over the next twelve months; plans to convert existing space; capital expenditures; our planned reinvestment of cash and cash equivalents held by our foreign subsidiaries; acquisitions of other businesses or product lines, indemnification liabilities and contractual liabilities.

Forward-looking statements involve certain risks and uncertainties, which may cause actual results to differ materially from those discussed in each such statement. First, one should consider the factors and risks described in the statements themselves or otherwise discussed herein. Those factors are uncertain, and if one or more of them turn out differently than we currently expect, our operating results may differ materially from our current expectations.

Second, investors should read the forward looking statements in conjunction with the Risk Factors discussed in Part I, Item 1A of our Annual Report on Form 10-K with the SEC for the year ended December 31, 2015 and our other reports and registration statements filed with the SEC. Also, actual future operating results are subject to other important factors and risks that we cannot predict or control, including without limitation, the following:

• general economic and business conditions, both in the U.S. and internationally;

- unexpected changes in our arrangements with Pfizer or our other large customers;

- outcome of litigation;

- fluctuations in foreign exchange rates and other risks of doing business internationally;

- increases in labor costs or competition for skilled workers;

- increases in costs or availability of the raw materials need to manufacture our products;

- the effect of price and safety considerations on the healthcare industry;

- competitive factors, such as product innovation, new technologies, marketing and distribution strength and price erosion;

- the successful development and marketing of new products;

- unanticipated market shifts and trends;
- the impact of legislation affecting government reimbursement of healthcare costs;
- changes by our major customers and independent distributors in their strategies that might affect their efforts to market our products;
- the effects of additional governmental regulations;

Table of Contents

- unanticipated production problems; and
- the availability of patent protection and the cost of enforcing and of defending patent claims.

The forward-looking statements in this report are subject to additional risks and uncertainties, including those detailed from time to time in our other filings with the Securities and Exchange Commission. These forward-looking statements are made only as of the date hereof and, except as required by law, we undertake no obligation to update or revise any of them, whether as a result of new information, future events or otherwise.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Financial Market Risk

We had a portfolio of government bonds, corporate bonds, U.S. Treasury securities, commercial paper and certificates of deposit of \$27.7 million as of June 30, 2016. The securities are all “investment grade”, comprised of \$8.1 million of pre-refunded municipal securities, \$15.4 million of corporate bonds, \$3.0 million of U.S. Treasury securities, \$0.7 million of commercial paper and \$0.5 million of certificates of deposit. The pre-refunded municipal securities are fully escrowed by U.S. government Treasury bills with low market risk.

Our future earnings are subject to potential increase or decrease because of changes in short-term interest rates. Generally, each one-percentage point change in the discount rate will cause our overall yield to change by two-thirds to three-quarters of a percentage point, depending upon the relative mix of our portfolio and market conditions specific to the securities in which we invest. Two-thirds to three-quarters of a percentage point change in our earnings on investment securities would create a change of approximately \$0.3 million to investment income based on the investment securities balance at June 30, 2016.

Foreign Exchange Risk

We have foreign currency exchange risk related to foreign-denominated cash, short-term investments, accounts receivable and accounts payable. In our European operations, our net Euro asset position at June 30, 2016 was approximately €17.8 million. We also have approximately €79.6 million in Euro denominated cash and investment accounts

held by our corporate entity. A 10% change in the conversion of the Euro to the U.S. dollar for our cash and investments,

accounts receivable, accounts payable and accrued liabilities from the June 30, 2016 spot rate would impact our consolidated amounts on these balance sheet items by approximately \$10.8 million, or 2.7% of these consolidated net assets. We expect that in the future, with the growth of our European distribution operations, net Euro denominated instruments will continue to increase. We currently do not hedge our foreign currency exposures.

Sales from the U.S. to foreign distributors are denominated in U.S. dollars, Euros, South African Rand and Australian dollars. We have manufacturing, sales and distribution facilities in several countries and we conduct business transactions denominated in various foreign currencies, although principally the Euro and Mexican Peso. A 10% change in the conversion of the Mexican Peso to the U.S. dollar from the average exchange rate we experienced in 2016 and our manufacturing spending from 2016 would have impacted 2016 cost of goods sold by approximately \$0.6 million. To date, the change in the conversion of the Euro to the U.S. dollar has not had a material impact to our operating earnings.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Our principal executive officer and principal financial officer have concluded, based on their evaluation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934), as of the end of the period covered by this Report, that our disclosure controls and procedures are effective to ensure that the information we are required to disclose in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure and that such information is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC.

There was no change in our internal control over financial reporting during the quarter ended June 30, 2016 that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.

Table of Contents

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

We are from time to time involved in various other legal proceedings, either as a defendant or plaintiff, most of which are routine litigation in the normal course of business. We believe that the resolution of the legal proceedings in which we are involved will not have a material adverse effect on our financial position or results of operations.

Item 1A. Risk Factors

In evaluating an investment in our common stock, investors should consider carefully, among other things, the risk factors previously disclosed in Part I, Item 1A of our Annual Report on Form 10-K filed with the SEC for the year ended December 31, 2015, as well as the information contained in this Quarterly Report and our other reports and registration statements filed with the SEC. There have been no material changes in the risk factors as previously disclosed under “Risk Factors” in Part I, Item 1A of our Annual Report on Form 10-K with the SEC for the year ended December 31, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In July 2010, our Board of Directors approved a common stock purchase plan to purchase \$40.0 million of our common stock. This plan has no expiration date. We are not obligated to make any purchases under our stock purchase program. Subject to applicable state and federal corporate and securities laws, purchases under a stock purchase program may be made at such times and in such amounts as we deem appropriate. Purchases made under our stock purchase program can be discontinued at any time we feel additional purchases are not warranted.

The following is a summary of our stock repurchasing activity during the second quarter of 2016:

Period	Shares purchased ⁽¹⁾	Average price paid per share	Shares purchased as part of a publicly announced program	Approximate dollar value that may yet be purchased under the program
04/01/2016 — 04/30/2016	—	\$ —	—	\$ 7,169,000
05/01/2016 — 05/31/2016	—	\$ —	—	\$ 7,169,000
06/01/2016 — 06/30/2016	133	\$ 106.94	—	\$ 7,169,000
Second quarter of 2016 total	133	\$ 106.94	—	\$ 7,169,000

(1) Represents shares of our common stock that were surrendered to us in June 2016 by employees to satisfy minimum statutory income tax withholding obligations in connection with the vesting of their restricted stock units.
