**MEDICAL DISCOVERIES, INC. AND SUBSIDIARIES
(A Development Stage Company)
NOTES TO UNAUDITED FINANCIAL STATEMENTS
June 30, 2003**

Note 1. Basis of Presentation.

Unaudited Interim Financial Statements

The accompanying unaudited financial statements have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, all adjustments and disclosures necessary to a fair presentation of these financial statements have been included. These financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's 2002 Annual Report on Form 10-KSB for the year ended December 31, 2002, as filed with the Securities and Exchange Commission. Certain reclassifications and other corrections for rounding have been made in prior period financial statements to conform to the current period presentation. The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant inter-company transactions and balances have been eliminated in consolidation.

Stock Options

The Company has two incentive stock option plans wherein 6,000,000 shares of the Company's common stock can be issued. The Company did not issue any stock options during the quarter ended June 30, 2003. As of June 30, 2003, 1,417,000 shares of stock were available for future option grants. The Company accounts for its stock options under Accounting Principles Board (APB) Opinion No. 25 using the intrinsic value method. In accordance with Financial Accounting Standards (SFAS) No. 148, *Accounting for Stock-Based Compensation - Transition and Disclosure*, footnote disclosures of the pro forma effects if the fair value method had been adopted are required to be presented on a quarterly basis. During 2003 and 2002, there were no employee stock options granted and all previously granted employee stock options were fully vested. Therefore there were no differences in net income between the fair value and intrinsic value methods of accounting for stock options.

Note 2. Going Concern Considerations.

The Company's recurring losses from the Company's development-stage activities in current and prior years raise substantial doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments to reflect the possible effects on the recoverability and classification of assets or amounts and classifications of liabilities that may result from the possible inability of the Company to continue as a going concern. The Company is attempting to raise additional capital to sustain operations. However, there can be no assurance that these plans will be successful.

Note 3. Commitment Regarding Peregrine Stock.

Peregrine Properties, LLC, a Utah limited liability company (Peregrine), has entered into an agreement to provide \$500,000 to the Company to fund testing and research steps necessary to continue development of MDI-P. The studies are funded through an escrow agent. As of December 31, 2000, the Company had deposited in escrow a single certificate for 5.5 million shares of common stock for these purposes. Through June 30, 2003, Peregrine had funded \$275,800 to the escrow, of which \$272,700 had been disbursed and recorded as research and development expense on the financial statements of the Company. The remaining \$227,300 to be expended under the agreement has been recorded on the balance sheet in equity under the caption escrow receivable. As expenditures are made from the escrow for research and development, the expenses are recorded on the books of the Company with a corresponding reduction in the escrow receivable. Under the original agreement, upon completion of the studies, the escrow agent was to disburse the 5.5 million shares to Peregrine and to disburse the research results to the Company. On March 22, 2002, the parties entered into an agreement the result of which was to partially close the escrow agreement to the extent of Peregrine's funding to date. On that date, 3,143,800 shares were distributed to Peregrine

Table of Contents

and all research conducted to date was disbursed to the Company. Communications with Peregrine regarding the remaining funding commitment and related research are ongoing.

Note 4. Commitment to Issue Warrants.

The Company has committed to issuing warrants to a group of individuals as a replacement for previously expired warrants. Warrants to purchase 799,676 shares of common stock at \$0.10 per share, 832,995 shares of common stock at \$0.20 per share, and 33,334 shares of common stock at \$0.40 per share have been authorized for issuance. Upon issuance, the Company will record an expense equal to the fair market value of the warrants as calculated utilizing the Block-Scholes method, estimated to be approximately \$100,000.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The purpose of this section is to discuss and analyze our consolidated financial condition, liquidity and capital resources, and results of operations. This analysis should be read in conjunction with the financial statements and notes thereto at pages 2 through 8 and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-KSB for the year ended December 31, 2002 (the "2002 10-KSB").

This section contains certain forward-looking statements that involve risks and uncertainties, including statements regarding our plans, objectives, goals, strategies and financial performance. Our actual results could differ materially from the results anticipated in these forward-looking statements as a result of factors set forth under "Cautionary Statement for Forward-Looking Information and Factors Affecting Future Results" below and elsewhere in this report.

Overview

We are a development-stage bio-pharmaceutical research company engaged in the research, development and validation of a novel class of drugs, based upon our patented and proprietary electrolysis technologies. We seek to develop active anti-viral, anti-bacterial and anti-fungal agents for a variety of applications, including treatment of HIV/AIDS.

We have developed a product, (hereafter MDI-P), which appears to have the ability to destroy certain viruses and bacteria, including the HIV virus. MDI-P may also have the ability to kill other infectious agents, possibly including pathogenic fungi and parasites. MDI-P may possibly be used in non-pharmaceutical applications such as a sterilizing agent for medical and dental instruments. MDI-P may also potentially be used to remove or inactivate infectious agents in human and animal blood-derived products such as plasma and gamma globulin. We are committed to the pursuit of establishing MDI-P as an effective anti-bacterial, anti-viral and anti-fungal pharmaceutical for in-vitro and in-vivo applications and to developing MDI-P as an effective liquid chemical sterilant for a variety of applications.

Our highest priority is to develop and commercialize MDI-P as a pharmaceutical for the treatment of HIV/AIDS. Subject to additional funding, we are in the process of completing preparatory testing and steps necessary to seek approval of the Food and Drug Administration (FDA) for MDI-P as an HIV/AIDS treatment. We have completed in-vitro efficacy testing and toxicity testing on animals. We next seek to test MDI-P in a controlled, independent off-shore clinical trial of human AIDS patients. If that clinical testing is successful, we intend to submit an Investigatory New Drug (IND) application with the FDA, the approval of which would allow us to begin human clinical testing of MDI-P in the United States. Our ultimate objective for MDI-P's pharmaceutical applications is to co-develop MDI-P with or out-license or sell the technology to a member of the global pharmaceutical industry at some point following the approval of our IND application.

To date, we have not generated significant revenues from operations or realized a profit. Through June 30, 2003, we had incurred a cumulative net loss since inception of \$13,675,019. We are currently attempting to secure capital commitments to finance our pre-IND testing of MDI-P as an HIV/AIDS pharmaceutical and to otherwise continue research and testing of our technologies in order to secure required approvals to bring products to market. In that we are a development stage company, we will increasingly require additional funding to continue the development of

Table of Contents

our technology and to finance submittal of our testing and trials to the appropriate regulatory agencies in order to secure approvals for product development and sales.

Recent Events

We recently engaged Dr. Emil Chi to continue our animal studies on MDI-P. Dr. Chi's work will study efficacy and toxicology of MDI-P in mice and rabbit populations with certain infectious diseases. We anticipate the result of this work will assist us in establishing dose curves, pharmacokinetic information and mechanism of action data for our IND application to the FDA and to respond to the FDA's pre-IND open file questions. Dr. Chi, a Ph.D. biochemist, is the Director of the Department of Histopathology at the University of Washington Medical School and is an international expert on pulmonary infections and inflammation. He has published more than 200 scientific articles and has developed a mouse model of asthma currently adopted by most major pharmaceutical companies to test developmental compounds on pulmonary inflammation.

Results of Operations

Revenues and Gross Profit. We did not book any revenue for the quarters or the six-month periods ended June 30, 2003 or June 30, 2002. We do not anticipate booking significant revenues in the near future as we continue to focus on getting products to market.

Operating Expenses and Operating Loss. We did not spend any funds on research and development for the six months ended June 30, 2003, nor were any such funds expended during the same period of 2002. Our general and administrative expenses were \$211,132 during the second quarter of 2003, as compared to \$385,347 during the quarter ended June 30, 2002. For the six months ended June 30, 2003, our general and administrative expenses were \$358,333, as compared with \$679,709 for the same period of 2002. As a result of the foregoing, we sustained an operating loss of \$211,132 for the quarter ended June 30, 2003, and an operating loss of \$358,333 for the six months ended June 30, 2003, as compared with operating losses of \$385,347 and \$679,709, respectively, for the same periods of 2002.

Other Income/Expense and Net Loss. We booked no other income and incurred interest expenses of \$68,933 for the quarter ended June 30, 2003, as compared with \$500 of other income and \$121,317 in interest expenses for the same period of 2002. For the six months ended June 30, 2003, we booked no other income and incurred interest expense of \$126,966, as compared with \$500 in other income and \$143,422 in interest expense for the six months ended June 30, 2002. In sum, our net loss for the second quarter of 2003 was \$280,065 or a loss of less than \$0.01 per fully diluted share and our net loss for the six months ended June 30, 2003 was \$485,299, also a loss of less than \$0.01 per fully diluted share. For the quarter and six months ended June 30, 2002, we incurred net losses of \$506,164 and \$822,631, respectively, or losses of \$0.01 and \$0.02, respectively, per fully diluted share.

Future Expectations. We expect to operate at a loss for several more years while we continue to study, gain regulatory approval of and commercialize our technologies. If we are successful in raising additional capital, we will likely spend more during the remainder of 2003 in research and development and general and administrative expenses, and thereby sustain greater resulting losses, than we have in recent years.

Liquidity and Capital Resources

As of June 30, 2003, we had only \$19,438 in cash and had a working capital deficit of \$4,074,967. Since our inception, we have financed our operations primarily through private sales of equity and the issuance of convertible and non-convertible notes. We will require significant additional funding to continue to develop, research and seek regulatory approval of our technologies. In addition, we cannot survive, even in the near term, without immediate additional funding for operations. We do not currently generate any cash from operations and have no credit facilities in place or available. Currently, we are funding operations through short-term loans from shareholders and others.

We are seeking to raise substantial additional funds in private stock offerings in order to meet our near-term and mid-term funding requirements. While we are optimistic that we can raise such funds, we have not always been successful in doing so in recent years. Given that we are still in an early development stage and do not have revenues

Table of Contents

from operations, raising equity financing is difficult. In addition, any additional equity financing will have a substantial dilutive effect to our current shareholders.

Pursuant to our commercialization strategy, we estimate we will need to expend \$805,000 in research and development to file an IND application with the FDA for MDI-P as an HIV/AIDS therapy. (See Description of Business - Commercialization Strategy in the 2002 10-KSB.) In addition, we estimate we will need to expend an additional \$900,000 to \$1,100,000 in debt service and general and administrative costs between now and when we hope to file the IND in June 2004. Therefore, we have a need for between \$1.7 and \$1.9 million to advance our highest priority target, HIV/AIDS, to the next development milestone.

Once our IND application is submitted, and assuming it is approved, we will need additional capital to initiate Phase I clinical trials and progress through FDA clinical testing toward the end of a drug that is approved for marketing and sales. We estimate the cost to complete Phase I and Phase II clinical trials to be several million dollars and the cost to complete Phase III testing and obtain approval of an NDA to be in the tens of millions of dollars.

While our ability to obtain financing may improve in the event our IND application is approved, we cannot give assurances that we will have the access to the significant capital required to take a drug through regulatory approvals and to market. We think it is more likely that at some point following approval of an IND application we will seek a partner in the global pharmaceutical industry to help us co-develop, license, or even purchase some or all of our technologies.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements as defined in Item 303(c) of Regulation S-B.

Cautionary Statement for Forward Looking Information

Certain information set forth in this report contains forward-looking statements within the meaning of federal securities laws. Forward looking statements include statements concerning our plans, objectives, goals, strategies, future events, future revenues or performance, capital expenditures, and financing needs and other information that is not historical information. When used in this report, the words estimates, expects, anticipates, forecasts, plans, intends, believes and variations of such words or similar expressions are intended to identify forward-looking statements. Additional forward-looking statements may be made by us from time to time. All such subsequent forward-looking statements, whether written or oral and whether made by us or on our behalf, are also expressly qualified by these cautionary statements.

Our forward-looking statements are based upon our current expectations and various assumptions. Our expectations, beliefs and projections are expressed in good faith and are believed by us to have a reasonable basis, including without limitation, our examination of historical operating trends, data contained in our records and other data available from third parties, but there can be no assurance that our expectations, beliefs and projections will result or be achieved or accomplished. Our forward-looking statements apply only as of the date made. We undertake no obligation to publicly update or revise forward-looking statements which may be made to reflect events or circumstances after the date made or to reflect the occurrence of unanticipated events.

There are a number of risks and uncertainties that could cause actual results to differ materially from those set forth in, contemplated by or underlying the forward-looking statements contained in this report. Those risks and uncertainties include, but are not limited to, our lack of significant operating revenues and lack of profit to date, our need for substantial and immediate additional capital, the fact that we may dilute existing shareholders through additional stock issuances, the extensive governmental regulation to which we are subject, the fact that our technologies remain unproven, the intense competition we face from other companies and other products, and our reliance upon potentially inadequate intellectual property. Those risks and certain other uncertainties are discussed in more detail in the 2002 10-KSB. There may also be other factors, including those discussed elsewhere in this report, that may cause our actual results to differ from the forward-looking statements. Any forward-looking statements made by us or on our behalf should be considered in light of these factors.

Table of Contents

ITEM 3. CONTROLS AND PROCEDURES

(a) Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-14(c) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act), as of June 30, 2003. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of June 30, 2003.

(b) There have been no significant changes (including corrective actions with regard to significant deficiencies or material weaknesses) in our internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation referenced in paragraph (a) above.

**PART II
OTHER INFORMATION**

ITEM 2. CHANGES IN SECURITIES

(c) We sold the following unregistered securities during the period covered by this report. None of the sales involved an underwriter. We believe these sales were exempt from registration pursuant to Section 4(2) of the Securities Act of 1933 because the sales did not involve a public offering.

300,000 shares of restricted common stock at \$0.04 per share.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K
