Sidebar text: "A diversified portfolio can leave you well positioned to reduce overall investment risk."

In the aftermath of September 11, the financial markets have reacted with volatility and uncertainty as investors attempt to better understand how the U.S. and world economies are likely to perform in the months ahead. It's too soon to tell what the long-term impact will be on the markets or your Fund, but one thing that is increasingly clear to us is that a diversified portfolio that includes high quality municipal bonds can leave you well positioned to reduce overall investment volatility.

For example, during the period covered by this report, all of these Nuveen Funds continued to meet their primary objectives of providing attractive monthly income from a portfolio of high quality municipal bonds. Detailed information on your Fund's performance can be found in the Portfolio Managers' Comments and Performance Overview sections of this report. I urge you to take the time to read them.

In addition to providing you with steady tax-free income, your Nuveen Fund also features several characteristics that can help make it an essential part of your overall investment strategy. These include careful research, constant surveillance and judicious trading by Nuveen's seasoned portfolio management team, with every action designed to supplement income, improve Fund structure, better adapt to current market conditions or increase diversification. In turbulent times like these, prudent

investors understand the importance of diversification, balance, and risk management, all attributes your Nuveen Fund can bring to your portfolio.

For more than 100 years, Nuveen has specialized in offering quality investments such as these Nuveen Funds to those seeking to accumulate and preserve wealth and establish a lasting legacy. Our mission continues to be to assist you and your financial advisor by offering the investment services and products that can help you invest well and leave your mark for future generations. We thank you for continuing to choose Nuveen Investments as your partner as you work toward that goal.

Sincerely,

Portfolio Managers'
Comments

Portfolio managers Tom Spalding and Tom O'Shaughnessy review economic and market conditions, key strategies, and recent Fund performance. A 25-year veteran of Nuveen, Tom Spalding assumed portfolio management responsibility for NQJ, NNJ and NXJ in March 2001. Tom O'Shaughnessy, who has been with Nuveen since 1983, has managed NQP since 1991 and NPY since 1995, and added NXM upon its inception in March 2001.

WHAT FACTORS HAD THE GREATEST INFLUENCE ON THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

The two major forces at work during the twelve months ended December 31, 2001, were the continued slowdown in economic growth and the Federal Reserve's aggressive approach to easing short-term interest rates. While these two factors had a great impact over the entire period covered in this report, the tragic events of September 11 and their aftermath also have had a profound effect on the economy and the markets.

In January 2001, the Fed embarked on a series of interest rate cuts designed to stimulate the sluggish U.S. economy. As of December 31, 2001, the fed funds rate was 1.75%, its lowest level since 1961. The consensus among many market observers is that the Fed could decide to cut rates yet again if signs of a significant economic slowdown continue.

In the municipal market, the general environment of the past twelve months helped many fixed-income securities perform well. The Fed's interest rate cuts created favorable conditions for both new municipal issuance and refundings, resulting in the highest annual level of new municipal supply--\$286.3 billion--since 1993, and an increase of 43% over 2000. On the demand side, municipal bonds continued to be highly sought after by individual investors looking for diversification, tax-free income, quality, and an alternative to a volatile stock market. In addition to individuals, institutional investors also were active buyers in the new issue market during 2001.

HOW WAS THE ECONOMIC AND MARKET ENVIRONMENT IN NEW JERSEY AND PENNSYLVANIA?

TOM SPALDING: During 2001, both the national recession and the events of September 11 impacted New Jersey, resulting in a general economic slowdown in the state. While repercussions from the terrorist attacks led to increased business costs and reduced productivity in some areas, particularly the transportation and telecommunications sectors, real estate markets in New Jersey benefited from the relocation of businesses from New York City. Overall, the state saw its unemployment number rise to 4.9% in December 2001, up significantly from the 3.8% a year earlier. While many expect the New Jersey economy to begin a rebound in 2002, collection of income and sales taxes could

Edgar Filing: NUVEEN NEW JERSEY DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-30D

continue to slow, with some expecting the state to experience a budget deficit. During 2001, municipal issuance in New Jersey totaled \$9.68 billion, up 13% from 2000. This relatively tight supply compared with national levels helped to boost the price of New Jersey bonds. In the aftermath of September 11, New Jersey's credit quality ratings of Aa1/AA+/AA+ were affirmed by the three major rating agencies.

TOM O'SHAUGHNESSY: Pennsylvania saw a much greater increase in municipal supply during 2001, with total issuance of \$13.2 billion, up almost 100% over 2000 levels. However, issuance was not evenly distributed throughout the year. The market experienced a large influx of supply in November and December in particular. In October 2001, Moody's upgraded Pennsylvania debt to Aa2 from Aa3, while both Standard & Poor's and Fitch maintained their AA ratings. Over the past twelve months, the commonwealth experienced economic slowing in several sectors, including retail trade, service industries, and construction. The Pennsylvania economy, with its high concentration of manufacturing jobs, has also been particularly hard-hit by the national recession in that sector. As of December 2001, Pennsylvania's unemployment rate was 5.1%, up from 4.4% in December 2000 but below the December 2001 national average of 5.8%. Despite a slowdown in the overall economy, the presence

of a highly skilled workforce enabled per capita income levels in Pennsylvania to remain above national averages during 2001. However, aging demographics, weakness in manufacturing, and a relatively low concentration of high-growth industries could limit Pennsylvania's prospects for long-term growth.

HOW DID THE NUVEEN FUNDS FOR NEW JERSEY AND PENNSYLVANIA PERFORM OVER THE PAST TWELVE MONTHS?

For the year ended December 31, 2001, the four older Nuveen Municipal Closed-End Exchange-Traded Funds covered in this report produced total annual returns on net asset value (NAV) as shown in the accompanying table. The annual returns for the Lehman Brothers Municipal Bond Index1 and relevant Lipper Peer Groups2 are also presented.

For additional information, see the individual Performance Overview for your Fund in this report.

Over the past twelve months, the Fed's change in interest rate easing, combined

with favorable market technicals, created a generally positive total return environment for municipal bonds. During the last two months of 2001, however, amid mixed signals about the potential strength of an economic recovery, bond market volatility increased, pushing municipal yields higher and eroding some of the gains made during the year. During 2001, the performance of these Nuveen Funds was influenced by market activity as well as by portfolio structure, including duration,⁴ and individual holdings.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

With the Fed's move to a policy of interest rate easing during 2001, the dividend-payment capabilities of these Funds benefited from the use of leverage, a strategy that can potentially enhance the dividends paid to common shareholders. This benefit is tied in part to the short-term rates these leveraged Funds pay their MuniPreferred(R) shareholders. For example, declining short-term rates can enable the Funds to reduce the amount of income they pay preferred shareholders, which can leave more earnings to support common share dividends.

During the year ended December 31, 2001, steady or falling short-term interest rates enabled us to implement four dividend increases in NPY and three increases in NNJ. Leverage also helped us maintain the dividends of NQJ over the past 38 months and of NQP for the past 19 months. NXJ and NXM, which were introduced in March 2001, began paying regular monthly dividends on schedule in June and are currently providing very attractive levels of tax-free income to shareholders. In coming months, the lower rates currently offered by municipal securities with shorter maturities may continue to benefit these Funds by further reducing the amount paid to MuniPreferred shareholders. However, this could be offset to some degree by the effect of bond calls on higher-yielding securities, especially if refundings increase as the result of lower rates. The level of short-term rates, the number of bond calls, and the interest rates at which we can reinvest the proceeds of any calls will all influence the dividends of these Nuveen Funds over the next twelve months.

Over the past year, as the stock market remained volatile and the bond market continued to perform well, many investors turned to tax-free fixed-income investments as a way to add balance to their portfolios and reduce overall risk (see the charts on the individual Performance Overview pages). As investors recognized the opportunity offered by these Funds, increased demand caused the discount (share price below NAV) on NQP to move to a premium (share price above NAV), while the discounts on NNJ and NPY narrowed significantly. NQJ continued to trade at a premium over the past twelve months. The two newer Funds - NXJ and NXM - also benefited from strong demand since their introductions in March 2001 and finished December trading at a premium.

- 1 The Funds' performances are compared with that of the Lehman Brothers Municipal Bond Index, a national unleveraged index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The total returns of NQJ and NNJ are compared with the average annualized return of the eight funds in the Lipper New Jersey Municipal Debt Funds category, while the total returns of NQP and NPY are compared with the average annualized return of the nine funds in the Lipper Pennsylvania Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a federal income tax rate of 30.5% plus the

applicable state income tax rate. The combined federal and state tax rates used in this report are as follows: New Jersey 35% and Pennsylvania 32.5%.

- 4 Duration is a measure of a fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. Unless otherwise noted, references to duration in this commentary are intended to indicate Fund duration.

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE NUVEEN FUNDS DURING THE YEAR ENDED DECEMBER 31, 2001?

Over the past twelve months, we focused on finding attractive bonds with the potential to support the Funds' long-term dividend-payment capabilities, enhance total return potential, and add value and diversification. Among the sectors where we found value were those regarded as providers of essential services, including healthcare, education, and water and sewer bonds.

Looking specifically at the Nuveen New Jersey Funds, tighter supply in the New Jersey market kept trading activity relatively low over the past twelve months. As bonds were called from NQJ and NNJ, we purchased some territorial credits, with Puerto Rico bonds offering particularly attractive yields. We may replace these territorial bonds in NQJ and NNJ as well as in NXJ with in-state paper if and when New Jersey issuance improves and provides more attractive options.

The New Jersey Funds also had some exposure to issues and sectors affected by the events of September 11, including bonds issued by the Port Authority of New York and New Jersey, the owner of the World Trade Center, and by the New Jersey Economic Development Authority for a Continental Airlines project at Newark Airport. Although the majority of these bonds experienced a decline immediately after the terrorist attacks, their valuations have since improved. Many of these holdings were insured and, in general, have not impacted the Funds' performance. The destruction of the World Trade Center was covered to a large degree by insurance and reserves, and the Port Authority's financial strength and the diverse scope of its operations should help to ease the financial burden precipitated by September 11. While Standard & Poor's placed major air carriers and North American airports on credit watch following September 11, Moody's current median rating for airports is A2, which is solidly investment grade. The federal government's commitment to the air transportation sector was demonstrated by the approval of a \$15 billion airline aid package of grants and loan guarantees. Overall, airline traffic appears to be improving, and we continue to be positive about the long-term prospects of this sector.

In Pennsylvania, we took advantage of increased issuance in the state's municipal market to sell some bonds approaching call dates from the portfolios of NQP and NPY. We reinvested the proceeds in credits that we believed would improve the structure and diversification of these two Funds. The ample supply of Pennsylvania bonds over the past twelve months also ensured that we were able to invest the new NXM Fund in attractive, quality bonds. Overall, our focus was on keeping the Pennsylvania Funds fully invested and adding bonds that would help the Funds achieve a balance between their dividend and total return objectives. We found many of these bonds in the essential services sectors, purchasing high-quality issues with attractive yields from smaller school districts, water and sewer facilities, and transportation projects. While we also added several BBB issues to NXM over the past six months in order to enhance its yield potential, we plan to gradually reduce our allocation to this credit sector across all three Funds through attrition and sales in order to gravitate to higher quality issues.

All of the New Jersey and Pennsylvania Funds continue to offer excellent credit

quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 70% in NXM to 88% in NQP as of December 31, 2001. All of the Funds also had a portion of their assets invested in BBB and non-rated bonds, which serve to enhance the Funds' income streams. The allocations to this credit sector ranged from 3% in NNJ to 21% in NXM.

In terms of bond calls, NNJ, NXJ, NQP, and NXM offer excellent levels of call protection in 2002 and 2003, with call exposure ranging from 1% in NXJ to 18% in NNJ over the next 24 months. NQJ, which marked the ten-year anniversary of its inception in 2001, and NPY, which reaches that point in 2003, are both facing that part of their life cycles that often are associated with increased call activity. These two Funds could potentially see as much as 29-33% of their portfolios called in 2002 and 2003. The number of actual calls experienced by the Funds will depend largely on market interest rates over this time.

In general, we believe the call exposure of all of these Funds is very manageable, and we foresee no problems in working through it. Given the current level of rates and the scarcity of supply in the New Jersey municipal market, our general approach in the New Jersey Funds has been to hold higher-yielding bonds as long as possible to help support the Funds' dividends, while we look for attractive replacement opportunities. Higher supply in Pennsylvania, on the other hand, has enabled us to take advantage of the attractive rates being paid on the short end of the curve to sell our pre-refunded holdings before they are called from our portfolios. This approach also allows us to trade when we find interesting replacement opportunities (e.g., higher-yielding, longer call protection), rather than being locked into market offerings on a specific date.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THESE NUVEEN FUNDS IN PARTICULAR?

In general, our outlook for the fixed-income markets over the next twelve months remains positive. While the long-term economic effects of September 11 are still being determined, we think the U.S. economy appears to be headed for a recovery, although it may be one characterized by a slower pace of growth. We think inflation and interest rates will remain low over the near term. Nationally, new municipal issuance should continue to be strong, and we expect to see issuance in New Jersey and Pennsylvania approximately at 2001 levels. At the same time, demand for tax-exempt municipal bonds should remain robust, as investors continue to look for ways to rebalance their portfolios and reduce risk.

In New Jersey, one of the developments we will be watching in 2002 is the state's recent adoption of a \$1.1 billion plan to refinance solid-waste facility revenue bonds issued by a number of New Jersey counties in the early 1990s. The plan calls for the refinanced debt to be issued by the New Jersey Economic Development Authority, with the counties and state splitting debt service payments. This should alleviate the problems encountered by the counties when the revenue from operation of the solid-waste facilities was insufficient to cover the debt service on previously issued bonds. To fill the gap, New Jersey has been making emergency payments of up to \$70 million annually to the counties. The restructuring, which we anticipate will be completed by early fall 2002, will benefit each of the Nuveen New Jersey Funds by improving the credit quality of our solid-waste facility holdings, which we think will result in improving prices for these securities. The state is also expected to benefit, with estimated savings of \$95 million in financing costs.

We also continue to keep tabs on the consequences of the federal government's decision to discontinue the 30-year Treasury bond. This action removed one of the pricing benchmarks for the municipal market, which could result in some pricing uncertainty and create more opportunities to add value for shareholders. Overall, we continue to carefully monitor the fixed-income markets, especially those sectors that were directly impacted by the events of September 11 or that

Edgar Filing: NUVEEN NEW JERSEY DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-30D

would be affected by any further deceleration in the economy. We believe the Nuveen Funds covered in this report are currently well diversified and well positioned for the market environment ahead, and we will continue to respond to events as appropriate.

Over the next six months, we plan to remain focused on strategies that add value for our shareholders, provide support for the Funds' dividends and total returns, and fully utilize Nuveen's experience and research expertise to adjust to any shifts in market conditions. One of our priorities will be managing portfolio structure, including duration and credit quality, to strategically position the Funds for a potential economic recovery. We will also continue to work to improve call protection, especially in NQJ and NPY, and to find bonds with the potential to enhance the Funds' total returns. One of our areas of focus in this regard will be the essential services sectors. Overall, we believe the Nuveen Funds for New Jersey and Pennsylvania will continue to play an important role in investors' long-range financial programs, providing balance and diversification, dependable tax-free income, quality investments, and a measure of security in uncertain times such as these.

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state Funds (the "Funds") covered in this report and their corresponding stock exchange symbols are Nuveen New Jersey Investment Quality Municipal Fund, Inc. (NQJ), Nuveen New Jersey Premium Income Municipal Fund, Inc. (NNJ), Nuveen New Jersey Dividend Advantage Municipal Fund (NXJ), Nuveen Pennsylvania Investment Quality Municipal Fund (NQP), Nuveen Pennsylvania Premium Income Municipal Fund 2 (NPY) and Nuveen Pennsylvania Dividend Advantage Municipal Fund (NXM). New Jersey Investment Quality (NQJ), New Jersey Premium Income (NNJ), Pennsylvania Investment Quality (NQJ) and Pennsylvania Premium Income (NPY) are traded on the New York Stock Exchange while New Jersey Dividend Advantage (NXJ) and Pennsylvania Dividend Advantage (NXM) are traded on the American Stock Exchange. Prior to the commencement of operations of New Jersey Dividend Advantage (NXJ) and Pennsylvania Dividend Advantage (NXM), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of The John Nuveen Company and the recording of the organizational expenses (\$15,000) and their reimbursement by Nuveen Investments, also a wholly owned subsidiary of The John Nuveen Company.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state. The Funds are registered under the Investment Company Act of 1940 as closed-end management investment companies.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors/Trustees of the Funds may

establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At December 31, 2001, New Jersey Investment Quality (NQJ), New Jersey Premium Income (NNJ), Pennsylvania Investment Quality (NQP), Pennsylvania Premium Income (NPY) and Pennsylvania Dividend Advantage (NXM) had outstanding when-issued and/or delayed delivery purchase commitments of \$8,474,837, \$4,085,888, \$9,592,200, \$2,494,510 and \$3,152,044, respectively. There were no such outstanding purchase commitments in New Jersey Dividend Advantage (NXJ).

Investment Income

Interest income is determined on the basis of interest accrued, adjusted for amortization of premiums and accretion of discounts on long-term debt securities for financial reporting purposes.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and applicable state and local income taxes, to retain such tax-exempt status when distributed to the shareholders of the Funds.

Notes to

Financial Statements (Unaudited) (continued)

Dividends and Distributions to Shareholders

Tax-exempt net investment income is declared monthly as a dividend and payment is made or reinvestment is credited to shareholder accounts on the first business day after month end. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount are recorded on the ex-dividend date. The amount and timing of such distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series may change every seven days, as set by the auction agent. The

Edgar Filing: NUVEEN NEW JERSEY DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-30D

number of shares outstanding, by Series and in total, are as follows:

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the six months ended December 31, 2001.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments has agreed to pay all offering costs (other than the sales load) that exceed \$.03 per Common share for New Jersey Dividend Advantage (NXJ) and Pennsylvania Dividend Advantage (NXM). New Jersey Dividend Advantage's (NXJ) and Pennsylvania Dividend Advantage's (NXM) share of offering costs (\$196,200 and \$98,667, respectively) were recorded as a reduction of the proceeds from the sale of common shares.

Costs incurred by New Jersey Dividend Advantage (NXJ) and Pennsylvania Dividend Advantage (NXM) in connection with their offering of Preferred shares (\$636,500 and \$390,750, respectively) were recorded as a reduction of the proceeds from the sale of the Preferred shares.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

Change in Accounting Policy

As required, effective July 1, 2001, the Funds have adopted the provisions of the new AICPA Audit and Accounting Guide for Investment Companies and began accreting taxable market discount on debt securities. Prior to July 1, 2001, the Funds did not accrete taxable market discounts on debt securities until they

Edgar Filing: NUVEEN NEW JERSEY DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-30D

were sold. The cumulative effect of this accounting change had no impact on the total net assets or the net asset values of the Funds, but resulted in an increase in the cost of securities and a corresponding decrease in net unrealized appreciation or an increase in net unrealized depreciation based on securities held by the Funds on July 1, 2001, as follows:

NEW JERSEY INVESTMENT QUALITY (NQJ)	NEW JERSEY PREMIUM INCOME (NNJ)	NEW JERSEY DIVIDEND ADVANTAGE (NXJ)	PENNSYLVANIA INVESTMENT QUALITY (NQP)	PENNSYLVANIA PREMIUM INCOME 2 (NPY)	PENN A
\$52,665	\$256,719	\$--	\$61,327	\$263,040	

The effect of this change for the period ended December 31, 2001, was to increase net investment income with a corresponding decrease in net unrealized appreciation or an increase in net unrealized depreciation as follows:

NEW JERSEY INVESTMENT QUALITY (NQJ)	NEW JERSEY PREMIUM INCOME (NNJ)	NEW JERSEY DIVIDEND ADVANTAGE (NXJ)	PENNSYLVANIA INVESTMENT QUALITY (NQP)	PENNSYLVANIA PREMIUM INCOME 2 (NPY)	PENN A

Build Your Wealth
Automatically

Sidebar text: Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

NUVEEN EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares. By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time,

Edgar Filing: NUVEEN NEW JERSEY DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-30D

should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.
