FORM N-CSR

CERTIFIED SHAREHOLDER REPORT OF  
REGISTERED MANAGEMENT INVESTMENT COMPANIES

Investment Company Act file number 811-21211

Nuveen Insured New York Tax-Free Advantage Municipal Fund  
(Exact name of registrant as specified in charter)

Nuveen Investments  
333 West Wacker Drive  
Chicago, IL 60606  
(Address of principal executive offices) (Zip code)

Kevin J. McCarthy  
Nuveen Investments  
333 West Wacker Drive  
Chicago, IL 60606  
(Name and address of agent for service)

Registrant's telephone number, including area code: (312) 917-7700

Date of fiscal year end: September 30

Date of reporting period: September 30, 2010

Form N-CSR is to be used by management investment companies to file reports with the Commission not later than 10 days after the transmission to stockholders of any report that is required to be transmitted to stockholders under Rule 30e-1 under the Investment Company Act of 1940 (17 CFR 270.30e-1). The Commission may use the information provided on Form N-CSR in its regulatory, disclosure review, inspection, and policymaking roles.

A registrant is required to disclose the information specified by Form N-CSR, and the Commission will make this information public. A registrant is not required to respond to the collection of information contained in Form N-CSR unless the Form displays a currently valid Office of Management and Budget ("OMB") control number. Please direct comments concerning the accuracy of the information collection burden estimate and any suggestions for reducing the burden to Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. The OMB has reviewed this collection of information under the clearance requirements of 44 U.S.C. ss. 3507.

ITEM 1. REPORTS TO STOCKHOLDERS.

---

## NUVEEN INVESTMENTS ANNOUNCES STRATEGIC COMBINATION WITH FAF ADVISORS

On July 29, 2010, Nuveen Investments announced that U.S. Bancorp will receive a 9.5% stake in Nuveen Investments and cash consideration in exchange for the long-term asset business of U.S. Bancorp's FAF Advisors. Nuveen Investments is the parent of Nuveen Asset Management (NAM), the investment adviser for the Funds included in this report.

FAF Advisors, which currently manages about \$25 billion of long-term assets and serves as the advisor of the First American Funds, will be combined with NAM, which currently manages about \$75 billion in municipal fixed income assets. Upon completion of the transaction, Nuveen Investments, which currently manages about \$160 billion of assets across several high-quality affiliates, will manage a combined total of about \$185 billion in institutional and retail assets.

This combination will not affect the investment objectives, strategies or policies of the Funds in this report. Over time, Nuveen Investments expects that the combination will provide even more ways to meet the needs of investors who work with financial advisors and consultants by enhancing the multi-boutique model of Nuveen Investments, which also includes highly respected investment teams at Hyde Park, NWQ Investment Management, Santa Barbara Asset Management, Symphony Asset Management, Tradewinds Global Investors and Winslow Capital.

The transaction is expected to close late in 2010, subject to customary conditions.

---

Chairman's

Letter to Shareholders

Dear Shareholder,

Recent months have revealed the fragility and disparity of the global economic recovery. In the U.S., the rate of economic growth has slowed as various stimulus programs wind down, exposing weakness in the underlying economy. In contrast, many emerging market countries are experiencing a return to comparatively high rates of growth. Confidence in global financial markets has been undermined by concerns about high sovereign debt levels in Europe and the U.S. Until these countries can begin credible programs to reduce their budgetary deficits, market unease and hesitation will remain. On a more encouraging note, while the global recovery is expanding existing trade imbalances, policy makers in the leading economies are making a sustained effort to create a global framework through which various countries can take complimentary actions that should reduce those imbalances over time.

The U.S. economy is subject to unusually high levels of uncertainty as it struggles to recover from a devastating financial crisis. Unemployment remains stubbornly high, due to what appears to be both cyclical and structural forces. Federal Reserve policy makers are implementing another round of quantitative easing, a novel approach to provide support to the economy. However, the high levels of debt owed both by U.S. consumers and the U.S. government limit the Fed's ability to engineer a stronger economic recovery.

The U.S. financial markets reflect the crosscurrents now impacting the U.S. economy. Today's historically low interest rates reflect the Fed's intervention in the financial markets and the demand for U.S. government debt by U.S. and overseas investors looking for a safe haven for investment. The continued corporate earnings recovery and recent electoral results are giving a boost to equity markets. Encouragingly, financial institutions are rebuilding their balance sheets and the financial reform legislation enacted last summer has the potential to address many of the most significant contributors to the financial crisis, although the details still have to be worked out.

In this difficult environment your Nuveen investment team continues to seek sustainable investment opportunities and, at the same time, remains alert for potential risks that may result from a recovery still facing many headwinds. As your representative, the Nuveen Fund Board monitors the activities of each investment team to assure that all maintain their investment disciplines. As always, I encourage you to contact your financial consultant if you have any questions about your investment in a Nuveen Fund.

On behalf of the other members of your Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Robert P. Bremner  
Chairman of the Board  
November 22, 2010

## Portfolio Manager's Comments

Nuveen New York Investment Quality Municipal Fund, Inc. (NQN)  
Nuveen New York Select Quality Municipal Fund, Inc. (NVN)  
Nuveen New York Quality Income Municipal Fund, Inc. (NUN)  
Nuveen Insured New York Premium Income Municipal Fund, Inc. (NNF)  
Nuveen Insured New York Dividend Advantage Municipal Fund (NKO)  
Nuveen Insured New York Tax-Free Advantage Municipal Fund (NRK)

Portfolio manager Cathryn Steeves reviews economic and municipal market conditions at both the national and state levels, key investment strategies, and the performance of these Funds for the twelve-month period ended September 30, 2010. Cathryn, who joined Nuveen in 1996, assumed portfolio management responsibility for these six Funds in 2006.

What factors affected the U.S. economy and municipal market during the twelve-month reporting period ended September 30, 2010?

During this reporting period, the U.S. economy remained under considerable stress, and both the Federal Reserve (Fed) and the federal government continued their efforts to improve the overall economic environment. For its part, the Fed held the benchmark fed funds rate in a target range of zero to 0.25% after cutting it to this record low level in December 2008. At its September 2010 meeting, the central bank renewed its commitment to keep the fed funds rate at "exceptionally low levels" for an "extended period." The Fed also stated that it was "prepared to take further policy actions as needed" to support economic recovery. The federal government continued to focus on implementing the economic stimulus package passed early in 2009 that was intended to provide job creation, tax relief, fiscal assistance to state and local governments, and expand unemployment benefits and other federal social welfare programs.

These and other measures produced some signs of economic improvement. In the third quarter of 2010, the U.S. gross domestic product achieved a preliminary growth rate of 2.0% on an annualized basis, the fifth consecutive quarter of positive growth and the first time this has been achieved since 2007-2008. The housing market also saw some improvement, with the average home price in the Standard & Poor's (S&P)/Case-Shiller Index rising 1.7% over the twelve months ended August 2010 (the most recent data available at the time this report was produced). This put home prices nationally up 6.7% from their low point in April 2009 and back to levels on par with those of late 2003. At the same time, inflation remained relatively tame, as the Consumer Price Index rose just 1.1% year-over-year as of September 2010. However, unemployment remained at historically high levels. As of September 2010, the national unemployment rate was 9.6%, down from 9.8% in September 2009.

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio manager as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements, and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Any reference to credit ratings for portfolio holdings refers to the highest rating assigned by a Nationally Recognized Statistical Rating Organization (“NRSRO”) such as Standard & Poor’s, Moody’s, or Fitch. AAA, AA, A and BBB ratings are investment grade; BB, B, CCC, CC, C and D ratings are below investment grade. Holdings and ratings may change over time.

2 Nuveen Investments

---

Municipal bond prices generally rose during this period, as the combination of strong demand and tight supply of new tax-exempt issuance to create favorable conditions. The reduced issuance of tax-exempt municipal debt was due in part to the introduction of the Build America Bond program in 2009. This new class of taxable municipal debt, created as part of the February 2009 economic stimulus package, currently offers municipal issuers a federal subsidy equal to 35% of a bond's interest payments, providing issuers with an alternative to traditional tax-exempt debt that often proves to be lower in cost. During the twelve months ended September 30, 2010, taxable Build America Bonds issuance totaled \$100.9 billion, accounting for 25% of new bonds issued in the municipal market.

Over the twelve months ended September 30, 2010, municipal bond issuance nationwide—both tax-exempt and taxable—totaled \$403.9 billion, an increase of 12% compared with the twelve-month period ended September 30, 2009. However, if taxable Build America Bond issuance were removed from the equation, the supply of tax-exempt bonds alone fell more than 7%.

How were the economic and market environments in New York during this period?

Over the period, New York showed signs of economic recovery as job growth in the state outpaced the national average. Hiring increased in professional and business services, health care, and the leisure and hospitality sectors. However, the state's financial sector continued to report job losses, as did construction and manufacturing, and state and local governments also continued to shed workers. With the uncertainty still surrounding the economic outlook combining with the impact of financial regulatory reform, some observers believe job growth in the financial sector may remain subdued for some time. As of September 2010, the unemployment rate in New York was 8.3%, down from 8.8% in September 2009 and below the U.S. average of 9.6%. News from the housing sector was also relatively positive. While housing prices in New York City rose a negligible 0.1% over the twelve months ended August 2010 (the most recent data available at the time this report was produced), the city was one of only eight major metropolitan areas to record positive annual growth rates for the period, according to the S&P/Case-Shiller Home Price Index. Because New York experienced relatively low rates of sub-prime lending during the housing boom, the state's percentage of homes in foreclosure remained well below the national average.

In August 2010, more than four months after the April 1st deadline, New York passed its budget for fiscal 2011. This represented an increase of 4% over fiscal 2010, closed a \$9.2 billion deficit through increased fees and taxes, and cut aid to schools. Current plans also call for laying off 1,000 state workers in early 2011. As of September 30, 2010, Moody's, S&P and Fitch rated New York general obligation debt at Aa2/AA/AA, respectively. For the twelve months ended September 30, 2010, municipal issuance in New York totaled \$42.2 billion, an increase of 15% from the previous twelve months. This ranked New York second among state issuers, behind California.

What key strategies were used to manage the Funds during this reporting period?

As previously mentioned, the supply of tax-exempt bonds declined nationally during this period, due in part to the issuance of taxable Build America Bonds. This program also impacted the availability of tax-exempt bonds in New York, which ranked second (after California) in terms of dollar amount of bonds issued under the Build America Bond program in 2010. For the twelve months ended September 30, 2010, Build America Bonds accounted for almost 29% of municipal supply in New York. Since interest payments from Build America Bonds represent taxable income, we do not view these bonds as good investment opportunities for the Funds.

Despite the constrained issuance of tax-exempt municipal bonds, we continued to find attractive value opportunities, taking a bottom-up approach to discovering undervalued sectors and individual credits with the potential to perform well over the long term. Our focus generally remained on premium coupon bonds with maturities between 20 and 30 years. During this period, we found value in several areas of the market, including health care, higher education, housing, utilities and transportation. With the investment policy changes that were implemented across the board in the Nuveen insured funds in early 2010, all of these Funds can now invest up to 20% of their net assets in uninsured investment-grade credits rated BBB- or higher. During the earlier part of this period, we found that bonds at the lower end of the quality spectrum offered value relative to historical credit spreads, and we took advantage of opportunities to add some of these uninsured bonds to NQN, NVN, NUN and NNF.

Some of our investment activity resulted from opportunities created by the provisions of the Build America Bond program. For example, tax-exempt supply was more plentiful in the health care and higher education sectors because, as 501(c)(3) (nonprofit) organizations, hospitals and private universities generally do not qualify for the Build America Bond program and must continue to issue bonds in the tax-exempt municipal market. Bonds with proceeds earmarked for refundings, working capital, and private activities also are not covered by the Build America Bond program, and this resulted in attractive opportunities in various other sectors of the market.

The impact of Build America Bonds also was evident in the area of longer-term issuance, as municipal issuers sought to take full advantage of the attractive financing terms offered by these bonds. Approximately 70% of Build America Bonds were issued with maturities of at least 30 years. Even though this significantly reduced the availability of tax-exempt credits with longer maturities, we continued to find good opportunities to purchase attractive longer-term bonds for these Funds.

Cash for new purchases during this period was generated primarily by the proceeds from bond calls and maturing bonds. On the whole, selling was relatively minimal, as the bonds in our portfolios generally offered higher yields than those available in the current marketplace.

As of September 30, 2010, all six of these Funds continued to use inverse floating rate securities.<sup>1</sup> We employ inverse floaters as a form of leverage for a variety of reasons, including duration management, income enhancement and total return enhancement.

1 An inverse floating rate security, also known as an inverse floater, is a financial instrument designed to pay long-term tax-exempt interest at a rate that varies inversely with a short-term tax-exempt interest rate index. For the Nuveen Funds, the index typically used is the Securities Industry and Financial Markets Association (SIFMA) Municipal Swap Index (previously referred to as the Bond Market Association Index or BMA). Inverse floaters, including those inverse floating rate securities in which the Funds invested during this reporting period, are further defined within the Notes to Financial Statements and Glossary of Terms Used in this Report sections of this report.

#### 4 Nuveen Investments

---

How did the Funds perform?

Individual results for these Funds, as well as relevant index and peer group information, are presented in the accompanying table.

Average Annual Total Returns on Common Share Net Asset

Value

For periods ended 9/30/10

Fund	1-Year	5-Year	10-Year
NQN	8.42%	5.25%	7.05%
NVN	8.18%	5.24%	6.95%
NUN	7.87%	5.11%	6.69%
NNF	7.96%	5.08%	6.65%
NKO	6.88%	5.02%	N/A
NRK	6.70%	5.41%	N/A
Standard & Poor's (S&P) New York Municipal Bond Index <sup>2</sup>	5.74%	5.13%	5.79%
Standard & Poor's (S&P) Insured Municipal Bond Index <sup>3</sup>	5.72%	4.90%	5.88%
Lipper Single-State Insured Municipal Debt Funds Average <sup>4</sup>	7.38%	4.95%	6.38%

For the twelve months ended September 30, 2010, the total returns on common share net asset value (NAV) for all six of these New York Funds exceeded the returns for the S&P Indexes. For this same period, NQN, NVN, NUN and NNF outperformed the average return for the Lipper Single-State Insured Municipal Debt Funds Average, while NKO and NRK lagged this measure.

Key management factors that influenced the Funds' returns during this period included duration and yield curve positioning, credit exposure and sector allocation. In addition, the use of structural leverage was an important positive factor affecting the Funds' performances over this period. The impact of structural leverage is discussed in more detail on page six.

During this period, municipal bonds with longer maturities generally outperformed those with shorter maturities, with credits at the shortest end of the municipal yield curve posting the weakest returns. The outperformance of longer term bonds was due in part to the decline in interest rates, particularly in the long intermediate and longer segments of the curve. The scarcity of tax-exempt bonds with longer maturities also drove up the prices of these bonds. Overall, duration and yield curve positioning proved positive for the performance of these Funds. All six of the Funds

benefited from their underweightings in bonds with shorter maturities and overweightings in the intermediate part of the yield curve, which performed well. Although the net impact of their duration and yield curve positioning was positive, NKO and NRK had relatively more exposure to the underperforming short end of the curve, which detracted from their performance compared with the other four Funds. This weighting differential was due to the fact that NKO and NRK have been able to invest up to 20% of their assets in uninsured investment-grade quality securities since their inceptions in 2002, while the other four Funds just recently gained this capability. During this period, when we were purchasing newer uninsured bonds with longer maturities for NQN, NVN, NUN and NNF and extending their durations, NKO and NRK had no additional room in their portfolios to add such bonds.

Credit exposure also played a role in performance. The demand for municipal bonds increased during this period driven by a variety of factors, including concerns about poten-

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

2The Standard & Poor's (S&P) New York Municipal Bond Index is an unleveraged, market value-weighted index designed to measure the performance of the tax-exempt, investment-grade New York municipal bond market. This index does not reflect any initial or ongoing expenses and is not available for direct investment.

3The Standard & Poor's (S&P) Insured Municipal Bond Index is an unleveraged, market value-weighted national index designed to measure the performance of the insured U.S. municipal bond market. This index does not reflect any initial or ongoing expenses and is not available for direct investment.

4The Lipper Single-State Insured Municipal Debt Funds Average is calculated using the returns of all closed-end funds in this category for each period as follows: 1-year, 44 funds; 5-year, 44 funds; and 10-year, 24 funds. The performance of the Lipper Single-State Insured Municipal Debt Funds Average represents the overall average of returns for funds from eight different states with a wide variety of municipal market conditions. Lipper returns account for the effects of management fees and assume reinvestment of dividends, but do not reflect any applicable sales charges. The Lipper average is not available for direct investment.

tial tax increases, the need to rebalance portfolio allocations and a growing appetite for additional risk. At the same time, the supply of new tax-exempt municipal paper declined, due largely to the Build America Bond program. As investors bid up municipal bond prices, bonds rated BBB or below and non-rated bonds generally outperformed those rated AAA. Credit exposure was especially positive in NQN, which had the smallest allocation of bonds rated AAA among these six Funds. While NKO and NRK had the heaviest weightings of bonds rated BBB or lower and non-rated bonds, their overall performances were hampered by their shorter durations, as explained above. In addition, NRK had the greatest exposure to the AAA category, which further detracted from its performance.

Individual holdings that positively contributed to the Funds' returns during this period included health care and housing bonds. Revenue bonds as a whole performed well, with transportation, leasing, and education among the other sectors that outperformed the general municipal market. Zero coupon bonds also were among the strongest performers. All of these Funds tended to be overweighted in the health care sector relative to the overall municipal market, which generally benefited their performances. This was partially offset by their underweighting of the transportation sector.

In contrast, pre-refunded bonds, which are often backed by U.S. Treasury securities, continued to perform poorly during this period. While these securities continued to provide attractive tax-free income, the underperformance of these bonds can be attributed primarily to the price declines associated with their shorter effective maturities and higher credit quality. Among these Funds, NRK had the heaviest weighting of pre-refunded bonds, which detracted from its performance, while NQN held the fewest pre-refunded bonds. General obligation and other tax-supported bonds also struggled to keep pace with the municipal market return for the twelve months. All of these Funds were underweighted in tax-supported bonds, which lessened the impact of these holdings. Among the revenue sectors, resource recovery trailed the overall municipal market by the widest margin, and water and sewer bonds also turned in a weak performance. Bonds backed by the 1998 master tobacco settlement agreement also posted relatively poor returns. NKO and NRK, the only two of these Funds to hold lower-rated tobacco bonds, were underexposed to this sector, with allocations of approximately 2% each.

#### IMPACT OF THE FUNDS' LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of these Funds relative to the comparative indexes was the Funds' use of financial leverage. The Funds use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share net asset value and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. Leverage made a positive contribution to the performance of all these Funds over this reporting period.

#### RECENT DEVELOPMENTS REGARDING THE FUNDS' LEVERAGED CAPITAL STRUCTURE

Shortly after their inceptions, each of the Funds issued auction rate preferred shares (ARPS) to create financial leverage. As noted in past shareholder reports, the ARPS

6 Nuveen Investments

---

issued by many closed-end funds, including these Funds, have been hampered by a lack of liquidity since February 2008. Since that time, more ARPS have been submitted for sale in each of their regularly scheduled auctions than there have been offers to buy. In fact, offers to buy have been almost completely non-existent since late February 2008. This means that these auctions have “failed to clear,” and that many, or all, of the ARPS shareholders who wanted to sell their shares in these auctions were unable to do so. This lack of liquidity in ARPS did not lower the credit quality of these shares, and ARPS shareholders unable to sell their shares continued to receive distributions at the “maximum rate” applicable to failed auctions, as calculated in accordance with the pre-established terms of the ARPS. In the recent market, with short-term rates at multi-generational lows, those maximum rates also have been low.

One continuing implication for common shareholders from the auction failures is that each Fund’s cost of leverage likely has been incrementally higher at times than it otherwise might have been had the auctions continued to be successful. As a result, each Fund’s common share earnings likely have been incrementally lower at times than they otherwise might have been.

As noted in past shareholder reports, the Nuveen funds’ Board of Directors/Trustees authorized several methods to refinance a portion of the Nuveen funds’ outstanding ARPS. Some funds have utilized tender option bonds (TOBs), also known as inverse floating rate securities, for leverage purposes. The amount of TOBs that a fund may use varies according to the composition of each fund’s portfolio. Some funds have a greater ability to use TOBs than others. Some funds have issued Variable Rate Demand Preferred (VRDP) Shares, a floating rate form of preferred stock. Some funds have issued MuniFund Term Preferred (MTP) Shares, a fixed rate form of preferred stock with a mandatory redemption period of five years.

While all these efforts have reduced the total amount of outstanding ARPS issued by the Nuveen funds, the funds cannot provide any assurance on when the remaining outstanding ARPS might be redeemed.

During 2010, 33 Nuveen leveraged closed-end funds, (including NUN), received a demand letter from a law firm on behalf of purported holders of common shares of each such fund, alleging that Nuveen and the funds’ officers and Board of Directors/ Trustees breached their fiduciary duties related to the redemption at par of the funds’ ARPS. In response, the Board established an ad hoc Demand Committee consisting of certain of its disinterested and independent Board members to investigate the claims. The Demand Committee retained independent counsel to assist it in conducting an extensive investigation. Based upon its investigation, the Demand Committee found that it was not in the best interests of each fund or its shareholders to take the actions suggested in the demand letters, and recommended that the full Board reject the demands made in the demand letters. After reviewing the findings and recommendation of the Demand Committee, the full Board of each fund unanimously adopted the Demand Committee’s recommendation.

Subsequently, 26 of the funds that received demand letters (including NUN) were named as nominal defendants in a putative shareholder derivative action complaint captioned Safier and Smith v. Nuveen Asset Management, et al. that was filed in the Circuit Court of Cook County, Illinois, Chancery Division (the “Cook County Chancery Court”) on July 27, 2010. Three additional funds were named as nominal defendants in a similar complaint captioned Curbow v. Nuveen Asset Management, et al. filed in the Cook County Chancery Court on August 12, 2010, and three additional funds were named as nominal

Nuveen Investments 7

---

defendants in a similar complaint captioned *Beidler v. Nuveen Asset Management, et al.* filed in the Cook County Chancery Court on September 21, 2010 (collectively, the “Complaints”). The Complaints, filed on behalf of purported holders of each fund’s common shares, also name Nuveen Asset Management as a defendant, together with current and former Officers and interested Director/Trustees of each of the funds (together with the nominal defendants, collectively, the “Defendants”). The Complaints contain the same basic allegations contained in the demand letters. The suits seek a declaration that the Defendants have breached their fiduciary duties, an order directing the Defendants not to redeem any ARPS at their liquidation value using fund assets, indeterminate monetary damages in favor of the funds and an award of plaintiffs’ costs and disbursements in pursuing the action. Nuveen Asset Management believes that the Complaints are without merit, and intends to defend vigorously against these charges.

As of September 30, 2010, the amounts of ARPS redeemed by the Funds are as shown in the accompanying table.

Fund	Auction Rate Preferred Shares Redeemed	% of Original Auction Rate Preferred Shares
NQN	\$144,000,000	100.0%
NVN	\$193,000,000	100.0%
NUN	\$ 36,225,000	18.4%
NNF	\$ 14,650,000	22.5%
NKO	\$ 61,000,000	100.0%
NRK	\$ 27,000,000	100.0%

#### MTP

During the current reporting period, NRK completed the issuance of \$27.68 million of 2.55%, Series 2015 MTP. The net proceeds from this offering were used to refinance the Fund’s outstanding ARPS at par. The newly-issued MTP shares trade on the New York Stock Exchange (NYSE) under the symbol “NRK Pr C”. MTP is a fixed-rate form of preferred stock with a mandatory redemption period, in this case, of five years. By issuing MTP, the Fund seeks to take advantage of the current historically low interest rate environment to lock in an attractive federally tax-exempt cost of leverage for a period as long as the term of the MTP. The Fund’s managers believe that issuing MTP may help the Fund mitigate the risk of a significant increase in their cost of leverage should short term interest rates rise sharply in the coming years.

#### VRDP

During the current reporting period, NQN and NVN issued \$112.3 and \$164.8 million, respectively, of VRDP to redeem at par its remaining outstanding ARPS. As noted previously, VRDP is a newly-developed instrument that essentially replaces all or a portion of the ARPS used as leverage and potentially could be used to refinance all or a portion of the ARPS of other funds. VRDP shares include a liquidity feature that allows holders of VRDP to have their shares purchased by a liquidity provider in the event that sell orders have not been matched with purchase orders

Edgar Filing: NUVEEN INSURED NEW YORK TAX FREE ADVANTAGE MUNICIPAL FUND - Form N-CSR  
and successfully settled in a remarketing. VRDP is offered only to qualified institutional buyers, defined pursuant to Rule 144A under the Securities Act of 1933.

8 Nuveen Investments

---

Refer to Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies and Footnote 4 – Fund Shares for further details on MTP and VRDP Shares.

As of September 30, 2010, 83 out of the 84 Nuveen closed-end municipal funds that had issued ARPS have redeemed at par all or a portion of these shares. These redemptions bring the total amount of Nuveen’s municipal closed-end funds’ ARPS redemptions to approximately \$5.6 billion of the approximately \$11.0 billion outstanding.

For up-to-date information, please visit the Nuveen CEF Auction Rate Preferred Resource Center at: <http://www.nuveen.com/arps>.

#### RECENT CHANGES TO INVESTMENT POLICIES OF NUVEEN INSURED FUNDS

As a result of the “credit crunch” that began in 2007 and that led to the financial crisis that peaked in late 2008, the financial strength ratings assigned to most municipal bond insurers have been downgraded by the primary ratings agencies. These ratings downgrades generally have reduced, and any additional ratings downgrades may further reduce, the effective rating of many of the bonds insured by those bond insurers, including bonds held by the Funds. This in turn has sharply reduced, and in some cases may have eliminated, the value provided by such insurance. Nonetheless, the Fund’s holdings continue to be well diversified and on the whole, the underlying credit quality of its holdings are of medium to high quality. It is also important to note that municipal bonds historically have had a very low rate of default.

On May 3, 2010, the Nuveen funds’ Board of Directors/Trustees approved changes to the investment policies of all of the Nuveen insured municipal bond closed-end funds. The Board took this action in response to the continuing challenges faced by municipal bond insurers. The changes to each Fund’s investment policies are intended to increase the Fund’s investment flexibility in pursuing its investment objective, while retaining the insured nature of its portfolio.

The changes, which were effective immediately, provide that under normal circumstances, the Funds invest at least 80% of their net assets (as defined in Footnote 7—Management Fees and Other Transactions with Affiliates) in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. For purposes of this 80%, insurers must have a claims-paying ability rated at least BBB- at the time of purchase by at least one independent rating agency. In addition, each Fund invests at least 80% of its net assets in municipal securities that are rated at least BBB- at the time of purchase (based on the higher of the rating of the insurer, if any, or the underlying security) by at least one independent rating agency, or that are unrated but judged to be of similar credit quality by Nuveen Asset Management, or that are backed by an escrow or trust account containing sufficient U.S. government or U.S. government agency securities or U.S. Treasury-issued State and Local Government Series securities to ensure timely payment of principal and interest. Inverse floating rate securities with underlying bonds that are covered by insurance are included for purposes of the 80%. Each Fund may also invest up to 20% of its net assets in municipal securities that are rated at least BBB- (based on the higher of the rating of the insurer, if any, or the underlying bond) or that are unrated but judged to be of comparable quality by Nuveen Asset Management.

## Common Share Dividend and Share Price Information

During the twelve-month reporting period ended September 30, 2010, NVN, NUN and NNF each had three monthly dividend increases; NQN had two monthly increases; and NKO and NRK each had one monthly increase.

Due to normal portfolio activity, common shareholders of the following Funds received capital gains and/or net ordinary income distributions at the end of December 2009 as follows:

Fund	Long-Term Capital Gains (per share)	Short-Term Capital Gains and/or Ordinary Income (per share)
NKO	\$0.0019	\$0.0007
NRK	\$0.0407	\$0.0245

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of September 30, 2010, all of the Funds in this report had positive UNII balances for both tax and financial reporting purposes.

## COMMON SHARE REPURCHASES AND SHARE PRICE INFORMATION

As of September 30, 2010, and since the inception of the Funds' repurchase program, the Funds have cumulatively repurchased and retired their common shares as shown in the accompanying table.

Fund	Common Shares Repurchased and Retired	% of Outstanding Common Shares
NQN	105,600	0.6%
NVN	118,000	0.5%

NUN	159,800	0.7%
NNF	85,700	1.0%
NKO	27,000	0.3%
NRK	6,800	0.2%

10 Nuveen Investments

---

During the current reporting period, the following Funds repurchased and retired their common shares at a weighted average price and a weighted average discount per common share as shown in the accompanying table.

Fund	Common Shares Repurchased and Retired	Weighted Average Price Per Share Repurchased and Retired	Weighted Average Discount Per Share Repurchased and Retired
NUN	1,700	\$12.81	12.38%
NNF	12,700	\$13.02	11.83%

As of September 30, 2010, the Funds' common share prices were trading at (-) discounts to their common share NAVs as shown in the accompanying table.

Fund	9/30/10 (-) Discount	12-Month Average (-) Discount
NQN	-3.86%	-6.81%
NVN	-2.47%	-7.76%
NUN	-2.64%	-7.66%
NNF	-3.50%	-7.76%
NKO	-4.42%	-7.92%
NRK	-3.97%	-6.94%

Refer to the Glossary of Terms Used in this Report for further definition of the terms used within this Fund's Performance Overview page.

- 1 The Fund intends to invest at least 80% of its managed assets in municipal securities that are covered by insurance guaran- teeing the timely payment of principal and interest. See Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Insurance for more information. At the end of the reporting period, 91% of the Fund's total investments are invested in Insured securities.
- 2 Ratings shown are the highest of Standard & Poor's Group, Moody's Investor Service, Inc. or Fitch, Inc. AAA includes bonds with an implied AAA rating since they are backed by U.S. Government or agency securities. AAA, AA, A and BBB ratings are investment grade; BB, B, CCC, CC, C and D ratings are below-investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- 3 Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a combined federal and state income tax rate of 32.9%. When comparing this Fund to investments that generate qualified dividend income, the Taxable-Equivalent Yield is lower.
- 4 Holdings are subject to change.
- 5 MBIA's public finance subsidiary.

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of Nuveen New York Investment Quality Municipal Fund, Inc., New York Select Quality Municipal Fund, Inc., Nuveen New York Quality Income Municipal Fund, Inc., Nuveen Insured New York Premium Income Municipal Fund, Inc., Nuveen Insured New York Dividend Advantage Municipal Fund and Nuveen Insured New York Tax-Free Advantage Municipal Fund (the "Funds"), as of September 30, 2010, and the related statements of operations and cash flows for the year then ended, the statements of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of September 30, 2010, by correspondence with the custodian. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions of Nuveen New York Investment Quality Municipal Fund, Inc., Nuveen New York Select Quality Municipal Fund, Inc., Nuveen New York Quality Income Municipal Fund, Inc., Nuveen Insured New York Premium Income Municipal Fund, Inc., Nuveen Insured New York Dividend Advantage Municipal Fund and Nuveen Insured New York Tax-Free Advantage Municipal Fund at September 30, 2010, the results of their operations and cash flows for the year then ended, the changes in their net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended in conformity with U.S. generally accepted accounting principles.

The Fund intends to invest at least 80% of its managed assets in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. See Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Insurance for more information.

All percentages shown in the Portfolio of Investments are based on net assets applicable to Common  
(1) shares unless otherwise noted.

Optional Call Provisions (not covered by the report of independent registered public accounting firm):  
(2) Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.

Ratings (not covered by the report of independent registered public accounting firm): Using the highest of  
(3) Standard & Poor's Group ("Standard & Poor's"), Moody's Investor Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency  
(4) securities, which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.

Investment has a maturity of more than one year, but has variable rate and demand features which qualify  
(5) it as a short-term investment. The rate disclosed is that in effect at the end of the reporting period. This rate changes periodically based on market conditions or a specified market index.

Variable Rate Demand Preferred Shares, at Liquidation Value as a percentage of Total Investments is  
(6) 27.0%.

N/R Not rated.

(ETM) Escrowed to maturity.

(IF) Inverse floating rate investment.

Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to  
(UB) Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Inverse Floating Rate Securities for more information. See accompanying notes to financial statements.

	Total Investments (cost \$511,671,428) – 149.5%			547,610,674
	Floating Rate Obligations – (9.2%)			(33,510,000)
	Variable Rate Demand Preferred Shares, at Liquidation Value – (45.0)% (6)			(164,800,000)
	Other Assets Less Liabilities – 4.7%			16,896,356
	Net Assets Applicable to Common Shares – 100%			\$ 366,197,030

The Fund intends to invest at least 80% of its managed assets in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. See Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Insurance for more information.

All percentages shown in the Portfolio of Investments are based on net assets applicable to Common (1) shares unless otherwise noted.

Optional Call Provisions (not covered by the report of independent registered public accounting firm):  
(2) Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.

Ratings (not covered by the report of independent registered public accounting firm): Using the highest of  
(3) Standard & Poor's Group ("Standard & Poor's"), Moody's Investor Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency  
(4) securities, which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.

Investment has a maturity of more than one year, but has variable rate and demand features which qualify  
(5) it as a short-term investment. The rate disclosed is that in effect at the end of the reporting period. This rate changes periodically based on market conditions or a specified market index.

Variable Rate Demand Preferred Shares, at Liquidation Value as a percentage of Total Investments is  
(6) 30.1%.

N/R Not rated.

(ETM) Escrowed to maturity.

(IF) Inverse floating rate investment.

Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to  
(UB) Financial Statements, Footnote 1 – General Information  
and Significant Accounting Policies, Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.

	Net Assets Applicable to Common Shares – 100%			129,681,250

The Fund intends to invest at least 80% of its managed assets in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. See Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Insurance for more information.

All percentages shown in the Portfolio of Investments are based on net assets applicable to Common (1) shares unless otherwise noted.

Optional Call Provisions (not covered by the report of independent registered public accounting firm):  
(2) Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.

Ratings (not covered by the report of independent registered public accounting firm): Using the highest of  
(3) Standard & Poor's Group ("Standard & Poor's"), Moody's Investor Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency  
(4) securities, which ensure the timely payment of principal and interest. Such investments are normally considered to be equivalent to AAA rated securities.

Investment has a maturity of more than one year, but has variable rate and demand features which qualify  
(5) it as a short-term investment. The rate disclosed is that in effect at the end of the reporting period. This rate changes periodically based on market conditions or a specified market index.

(6) Auction Rate Preferred Shares, at Liquidation Value as a percentage of Total Investments is 26.0%.

N/R Not rated.

(ETM) Escrowed to maturity.

(IF) Inverse floating rate investment.

Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to  
(UB) Financial Statements, Footnote 1 – General Information  
and Significant Accounting Policies, Inverse Floating Rate Securities for more information.  
See accompanying notes to financial statements.

The Fund intends to invest at least 80% of its managed assets in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. See Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Insurance for more information.

All percentages shown in the Portfolio of Investments are based on net assets applicable to Common (1) shares unless otherwise noted.

Optional Call Provisions (not covered by the report of independent registered public accounting firm):  
(2) Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.

Ratings (not covered by the report of independent registered public accounting firm): Using the highest of  
(3) Standard & Poor’s Group (“Standard & Poor’s”), Moody’s Investor Service, Inc. (“Moody’s”) or Fitch, Inc. (“Fitch”) rating. Ratings below BBB by Standard & Poor’s, Baa by Moody’s or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency  
(4) securities, which ensure the timely payment of principal and interest.

Variable Rate Demand Preferred Shares, at Liquidation Value as a percentage of Total Investments is  
(5) 28.0%.

N/R Not rated.

(ETM) Escrowed to maturity.

(IF) Inverse floating rate investment.

Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to  
(UB) Financial Statements, Footnote 1 – General Information  
and Significant Accounting Policies, Inverse Floating Rate Securities for more information.  
See accompanying notes to financial statements.

### 1. General Information and Significant Accounting Policies

The funds covered in this report and their corresponding Common share stock exchange symbols are Nuveen New York Investment Quality Municipal Fund, Inc. (NQN), Nuveen New York Select Quality Municipal Fund, Inc. (NVN), Nuveen New York Quality Income Municipal Fund, Inc. (NUN), Nuveen Insured New York Premium Income Municipal Fund, Inc. (NNF), Nuveen Insured New York Dividend Advantage Municipal Fund (NKO) and Nuveen Insured New York Tax-Free Advantage Municipal Fund (NRK) (collectively, the “Funds”). Common shares of New York Investment Quality (NQN), New York Select Quality (NVN), New York Quality Income (NUN) and Insured New York Premium Income (NNF) are traded on the New York Stock Exchange (“NYSE”) while Common shares of Insured New York Dividend Advantage (NKO) and Insured New York Tax-Free Advantage (NRK) are traded on the NYSE Amex. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end registered investment companies.

Each Fund seeks to provide current income exempt from both regular federal and New York state income taxes, and in the case of Insured New York Tax-Free Advantage (NRK) the alternative minimum tax applicable to individuals, by investing primarily in a portfolio of municipal obligations issued by state and local government authorities within the state of New York or certain U.S. territories.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”).

#### Investment Valuation

Prices of fixed-income securities are provided by a pricing service approved by the Funds’ Board of Directors/Trustees. These securities are generally classified as Level 2. Prices of fixed-income securities are based on the mean between the bid and asked price. When price quotes are not readily available (which is usually the case for municipal bonds) the pricing service establishes a security’s fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor’s credit characteristics considered relevant. The pricing service may employ electronic data processing techniques and/or a matrix system to determine valuations. In pricing certain securities, particularly less liquid and lower quality securities, the pricing service may consider information provided by Nuveen Asset Management (the “Adviser”), a wholly-owned subsidiary of Nuveen Investments, Inc. (“Nuveen”) in establishing a fair valuation of the security. These securities are generally classified as Level 2 or Level 3.

Futures contracts are valued using the closing settlement price or, in the absence of such a price, at the mean of the bid and ask prices. These securities are generally classified as Level 1.

Temporary investments in securities that have variable rate and demand features qualifying them as short-term investments are valued at amortized cost, which approximates market value. These securities are generally classified as Level 1 or Level 2.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Funds’ Board of Directors/Trustees or its designee at fair value. These securities

generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund's net asset value (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security's fair value. As a general principle, the fair value of a security would appear to be the amount that the owner might reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a particular security, all valuations are subject to review by the Funds' Board of Directors/Trustees or its designee.

Refer to Footnote 2 – Fair Value Measurements for further details on the leveling of securities held by the Funds as of the end of the reporting period.

Nuveen Investments 65

---

Notes to

Financial Statements (continued)

#### Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At September 30, 2010, there were no such outstanding purchase commitments in any of the Funds.

#### Investment Income

Interest income, which reflects the amortization of premiums and includes accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also reflects paydown gains and losses, if any.

#### Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions that will enable interest from municipal securities, which is exempt from regular federal and New York state income taxes, and in the case of Insured New York Tax-Free Advantage (NRK) the alternative minimum tax applicable to individuals, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

#### Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

#### Auction Rate Preferred Shares

The following Funds have issued and outstanding Auction Rate Preferred Shares ("ARPS"), \$25,000 stated value per share, which approximates market value, as a means of effecting financial leverage. Each Fund's ARPS are issued in

one or more Series. The dividend rate paid by the Funds on each Series is determined every seven days, pursuant to a dutch auction process overseen by the auction agent, and is payable at the end of each rate period. As of September 30, 2010, the number of ARPS outstanding, by Series and in total, for each Fund is as follows:

	New York Quality Income (NUN)	Insured New York Premium Income (NNF)
Number of shares:		
Series M	1,794	1,022
Series T	—	992
Series W	1,796	—
Series TH	1,959	—
Series F	882	—
Total	6,431	2,014

Beginning in February 2008, more shares for sale were submitted in the regularly scheduled auctions for the ARPS issued by the Funds than there were offers to buy. This meant that these auctions “failed to clear,” and that many ARPS shareholders who wanted to sell their shares in these auctions were unable to do so. ARPS shareholders unable to sell their shares received distributions at the “maximum rate” applicable to failed auctions as

calculated in accordance with the pre-established terms of the ARPS. As of September 30, 2010, the aggregate amount of outstanding ARPS redeemed by each Fund is as follows:

	New York Investment Quality (NQN)	New York Select Quality (NVN)	New York Quality Income (NUN)	Insured New York Premium Income (NNF)	Insured New York Dividend Advantage (NKO)	Insured New York Tax-Free Advantage (NRK)
ARPS redeemed, at liquidation value	\$144,000,000	\$193,000,000	\$36,225,000	\$14,650,000	\$61,000,000	\$27,000,000

During the fiscal year ended September 30, 2010, lawsuits pursuing claims made in a demand letter alleging that New York Quality Income's (NUN) Board of Directors breached their fiduciary duties related to the redemption at par of its ARPS had been filed on behalf of shareholders of New York Quality Income (NUN), against the Adviser, the Nuveen holding company, the majority owner of the holding company, the lone interested trustee, and current and former officers of New York Quality Income (NUN). Nuveen and the other named defendants believe these lawsuits to be without merit, and all named parties intend to defend themselves vigorously. New York Quality Income (NUN) believes that these lawsuits will not have a material effect on it or on the Adviser's ability to serve as investment adviser to it.

#### MuniFund Term Preferred Shares

Insured New York Tax-Free Advantage (NRK) has issued and outstanding \$27,680,000, of 2.55%, Series 2015 MuniFund Term Preferred ("MTP") Shares, with a \$10 stated value per share. Proceeds from the issuance of MTP Shares, net of offering expenses, were used to redeem all of the Fund's outstanding ARPS. Dividends, which are recognized as interest expense for financial reporting purposes, are paid monthly at a fixed annual rate of 2.55%, subject to adjustment in certain circumstances.

The Fund is obligated to redeem its MTP Shares on May 1, 2015, unless earlier redeemed or repurchased by the Fund. MTP Shares are subject to optional and mandatory redemption in certain circumstances. As of May 1, 2011, the MTP Shares will be subject to redemption at the option of the Fund, subject to payment of a premium until April 31, 2012, and at par thereafter. The MTP Shares also will be subject to redemption, at the option of the Fund, at par in the event of certain changes in the credit rating of the MTP Shares. The Fund may be obligated to redeem certain of the MTP Shares if the Fund fails to maintain certain asset coverage and leverage ratio requirements and such failures are not cured by the applicable cure date. The redemption price per share is equal to the sum of the liquidation value per share plus any accumulated but unpaid dividends. The MTP Shares trade on NYSE under the ticker symbol "NRK Pr C."

During the period from April 14, 2010 (issuance date of shares) through September 30, 2010, Insured New York Tax-Free Advantage (NRK) had all \$27,680,000 of its MTP Shares outstanding.

For financial reporting purposes only, the liquidation value of MTP Shares is recorded as a liability on the Statement of Assets and Liabilities. Unpaid dividends on MTP Shares are recognized as "Interest payable" on the Statement of Assets and Liabilities. Dividends paid on MTP Shares are recognized as a component of "Interest expense and amortization of offering costs" on the Statement of Operations.

Net amounts earned by Nuveen as underwriter of the Fund's MTP Share offering are recorded as reductions of offering costs recognized by the Fund. During the fiscal year ended September 30, 2010, there was no amounts earned by Insured New York Tax-Free Advantage (NRK).

## Variable Rate Demand Preferred Shares

The following funds have issued and outstanding Variable Rate Demand Preferred (“VRDP”) Shares, with a \$100,000 liquidation value per share. New York Investment Quality (NQN), New York Select Quality (NVN) and Insured New York Dividend Advantage (NKO) issued their VRDP Shares in a privately negotiated offering during August 2010, August 2010 and August 2008, respectively. Concurrent with renewing agreements with the liquidity provider for its VRDP Shares in June 2010, Insured New York Dividend Advantage (NKO) exchanged all its 500 Series 1 VRDP Shares for 500 Series 2 VRDP Shares. The principal difference in terms between Series 1 and Series 2 VRDP Shares is the requirement that the Fund redeem VRDP Shares owned by the liquidity provider if the VRDP Shares have been owned by the liquidity provider through six months of continuous, unsuccessful remarketing. Proceeds of each Fund’s offering were used to redeem all, or a portion of, each Fund’s outstanding ARPS. The VRDP Shares were offered to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933. As of September 30, 2010, the number of VRDP Shares outstanding and maturity date for each Fund are as follows:

	New York Investment Quality (NQN)	New York Select Quality (NVN)	Insured New York Dividend Advantage (NKO)
Series	1	1	2
Shares outstanding	1,123	1,648	500
Maturity	August 1, 2040	August 1, 2040	June 1, 2040

Nuveen Investments 67

---

Notes to

Financial Statements (continued)

VRDP Shares include a liquidity feature that allows VRDP shareholders to have their shares purchased by a liquidity provider with whom each Fund has contracted in the event that purchase orders for VRDP Shares in a remarketing are not sufficient in number to be matched with the sale orders in that remarketing. Each Fund is required to redeem any VRDP Shares that are still owned by the liquidity provider after six months of continuous, unsuccessful remarketing.

Dividends on the VRDP Shares (which are treated as interest payments for financial reporting purposes) are set weekly at a rate established by a remarketing agent; therefore, the market value of the VRDP Shares is expected to approximate its liquidation value. If remarketings for VRDP Shares are continuously unsuccessful for six months, the maximum rate is designed to escalate according to a specified schedule in order to enhance the remarketing agent's ability to successfully remarket the VRDP Shares.

Subject to certain conditions, VRDP Shares may be redeemed, in whole or in part, at any time at the option of each Fund. Each Fund may also redeem certain of the VRDP Shares if the Fund fails to maintain certain asset coverage requirements and such failures are not cured by the applicable cure date. The redemption price per share is equal to the sum of the liquidation value per share plus any accumulated but unpaid dividends.

The average liquidation value outstanding and average annual dividend rate of VRDP Shares for each Fund during the fiscal year ended September 30, 2010, were as follows:

	New York* Investment Quality (NQN)	New York* Select Quality (NVN)	Insured New York Dividend Advantage (NKO)
Average liquidation value outstanding	112,300,000	164,800,000	50,000,000
Average annual dividend rate	0.57%	0.53%	0.32%

\* For the period August 19, 2010 through September 30, 2010.

For financial reporting purposes only, the liquidation value of VRDP Shares is recognized as a liability on the Statement of Assets and Liabilities. Unpaid dividends on VRDP Shares are recognized as a component of "Interest payable" on the Statement of Assets and Liabilities. Dividends paid on the VRDP Shares are recognized as a component of "Interest expense and amortization of offering costs" on the Statement of Operations. In addition to interest expense, each Fund also pays a per annum liquidity fee to the liquidity provider, which is recognized as "Liquidity fees" on the Statement of Operations.

#### Insurance

Under normal circumstances, and during the period October 1, 2009 through May 2, 2010, the Funds' investment policies provided that each Fund would invest at least 80% of their managed assets (as defined in Footnote 7 – Management Fees and Other Transactions with Affiliates) in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. For purposes of this 80%, insurers must have a claims paying ability rated at least "A" at the time of purchase by at least one independent rating agency. In addition, each Fund

would invest at least 80% of its net assets in municipal securities that are rated at least “AA” at the time of purchase (based on the higher of the rating of the insurer, if any, or the underlying security) by at least one independent rating agency, or are unrated but judged to be of similar credit quality by the Adviser, or are backed by an escrow or trust account containing sufficient U.S. Government or U.S. Government agency securities or U.S. Treasury-issued State and Local Government Series securities to ensure timely payment of principal and interest. Inverse floating rate securities whose underlying bonds are covered by insurance are included for purposes of the 80%. Each Fund may have also invested up to 20% of its net assets in municipal securities rated at least “BBB” (based on the higher rating of the insurer, if any, or the underlying bond) or are unrated but judged to be of comparable quality by the Adviser.

Since 2007, the financial status of most major municipal bond insurers has deteriorated substantially, and some insurers have gone out of business, rendering worthless the insurance policies they had written. On May 3, 2010, the Funds’ Board of Directors/Trustees approved changes to each Fund’s insurance investment policies in response to the continuing challenges faced by municipal bond insurers. The changes to each Fund’s investment policies are intended to increase the Funds’ investment flexibility in pursuing their investment objective, while retaining the insured nature of their portfolios. The changes, which were effective immediately, provide that under normal circumstances, each Fund invests at least 80% of its managed assets in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. In addition, the municipal securities in each Fund invests will be investment grade at the time of purchase (including (i) bonds insured by investment grade rated insurers or are rated investment grade; (ii) unrated bonds that are judged to be investment grade by the Adviser; and (iii) escrowed bonds). Ratings below BBB are considered to be below investment grade.

Each insured municipal security is covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance. Assuming that the insurer remains creditworthy, the insurance feature of a municipal security guarantees the full payment of principal and interest when due through the life of an insured obligation. Such insurance does not guarantee the market value of the insured obligation or the value of the Fund’s Common shares. Original Issue Insurance and Secondary Market Insurance remain in effect as long as the municipal securities covered thereby remain outstanding and the insurer remains in business, regardless of whether the Funds ultimately dispose of such municipal securities. Consequently, the market value of the municipal securities covered by Original Issue Insurance or Secondary Market Insurance may reflect value attributable to the insurance. Portfolio

Insurance, in contrast, is effective only while the municipal securities are held by the Funds and is reflected as an expense over the term of the policy. Accordingly, neither the prices used in determining the market value of the underlying municipal securities nor the Common share net asset value of the Funds include value, if any, attributable to the Portfolio Insurance. Each policy of the Portfolio Insurance does, however, give the Funds the right to obtain permanent insurance with respect to the municipal security covered by the Portfolio Insurance policy at the time of its sale.

#### Inverse Floating Rate Securities

Each Fund is authorized to invest in inverse floating rate securities. An inverse floating rate security is created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. In turn, this trust (a) issues floating rate certificates, in face amounts equal to some fraction of the deposited bond's par amount or market value, that typically pay short-term tax-exempt interest rates to third parties, and (b) issues to a long-term investor (such as one of the Funds) an inverse floating rate certificate (sometimes referred to as an "inverse floater") that represents all remaining or residual interest in the trust. The income received by the inverse floater holder varies inversely with the short-term rate paid to the floating rate certificates' holders, and in most circumstances the inverse floater holder bears substantially all of the underlying bond's downside investment risk and also benefits disproportionately from any potential appreciation of the underlying bond's value. The price of an inverse floating rate security will be more volatile than that of the underlying bond because the interest rate is dependent on not only the fixed coupon rate of the underlying bond but also on the short-term interest paid on the floating rate certificates, and because the inverse floating rate security essentially bears the risk of loss of the greater face value of the underlying bond.

A Fund may purchase an inverse floating rate security in a secondary market transaction without first owning the underlying bond (referred to as an "externally-deposited inverse floater"), or instead by first selling a fixed-rate bond to a broker-dealer for deposit into the special purpose trust and receiving in turn the residual interest in the trust (referred to as a "self-deposited inverse floater"). The inverse floater held by a Fund gives the Fund the right (a) to cause the holders of the floating rate certificates to tender their notes at par, and (b) to have the broker transfer the fixed-rate bond held by the trust to the Fund, thereby collapsing the trust. An investment in an externally-deposited inverse floater is identified in the Portfolio of Investments as "(IF) – Inverse floating rate investment." An investment in a self-deposited inverse floater is accounted for as a financing transaction. In such instances, a fixed-rate bond deposited into a special purpose trust is identified in the Portfolio of Investments as "(UB) – Underlying bond of an inverse floating rate trust reflected as a financing transaction," with the Fund accounting for the short-term floating rate certificates issued by the trust as "Floating rate obligations" on the Statement of Assets and Liabilities. In addition, the Fund reflects in "Investment Income" the entire earnings of the underlying bond and recognizes the related interest paid to the holders of the short-term floating rate certificates as a component of "Interest expense and amortization of offering costs" on the Statement of Operations.

During the fiscal year ended September 30, 2010, each Fund invested in externally-deposited inverse floaters and/or self-deposited inverse floaters.

Each Fund may also enter into shortfall and forbearance agreements (sometimes referred to as a "recourse trust" or "credit recovery swap") (such agreements referred to herein as "Recourse Trusts") with a broker-dealer by which a Fund agrees to reimburse the broker-dealer, in certain circumstances, for the difference between the liquidation value of the fixed-rate bond held by the trust and the liquidation value of the floating rate certificates issued by the trust plus any shortfalls in interest cash flows. Under these agreements, a Fund's potential exposure to losses related to or on inverse floaters may increase beyond the value of a Fund's inverse floater investments as a Fund may potentially be liable to fulfill all amounts owed to holders of the floating rate certificates. At period end, any such shortfall is recognized as "Unrealized depreciation on Recourse Trusts" on the Statement of Assets and Liabilities.

At September 30, 2010, each Fund's maximum exposure to externally-deposited Recourse Trusts is as follows:

	New York Investment Quality (NQN)	New York Select Quality (NVN)	New York Quality Income (NUN)	Insured New York Premium Income (NNF)	Insured New York Dividend Advantage (NKO)	Insured New York Tax-Free Advantage (NRK)
Maximum exposure to Recourse Trusts	\$7,790,000	\$9,585,000	\$9,700,000	\$3,420,000	\$610,000	\$560,000

The average floating rate obligations outstanding and average annual interest rate and fees related to self-deposited inverse floaters during the fiscal year ended September 30, 2010, were as follows:

	New York Investment Quality (NQN)	New York Select Quality (NVN)	New York Quality Income (NUN)	Insured New York Premium Income (NNF)	Insured New York Dividend Advantage (NKO)	Insured New York Tax-Free Advantage (NRK)
Average floating rate obligations outstanding	\$37,145,000	\$33,510,000	\$40,245,000	\$16,600,000	\$11,620,000	\$2,390,000
Average annual interest rate and fees	0.68%	0.64%	0.68%	0.68%	0.65%	0.60%

Notes to

Financial Statements (continued)

#### Futures Contracts

Each Fund is authorized to invest in futures contracts. Upon entering into a futures contract, a Fund is required to deposit with the broker an amount of cash or liquid securities equal to a specified percentage of the contract amount. This is known as the “initial margin.” Cash held by the broker to cover initial margin requirements on open futures contracts, if any, is recognized as “Deposits with brokers for open futures contracts” on the Statement of Assets and Liabilities. Subsequent payments (“variation margin”) are made or received by a Fund each day, depending on the daily fluctuation of the value of the contract. Variation margin is recognized as a receivable or payable for “Variation margin on futures contracts” on the Statement of Assets and Liabilities, when applicable.

During the period the futures contract is open, changes in the value of the contract are recorded as an unrealized gain or loss by “marking-to-market” on a daily basis to reflect the changes in market value of the contract and is recognized as “Change in net unrealized appreciation (depreciation) of futures contracts” on the Statement of Operations. When the contract is closed or expired, a Fund records a realized gain or loss equal to the difference between the value of the contract on the closing date and value of the contract when originally entered into, which is recognized as “Net realized gain (loss) from futures contracts” on the Statement of Operations.

Risks of investments in futures contracts include the possible adverse movement in the price of the securities or indices underlying the contracts, the possibility that there may not be a liquid secondary market for the contracts and/or that a change in the value of the contract may not correlate with a change in the value of the underlying securities or indices. The Funds did not enter into futures contracts during the fiscal year ended September 30, 2010.

#### Market and Counterparty Credit Risk

In the normal course of business each Fund may invest in financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to the transaction to perform (counterparty credit risk). The potential loss could exceed the value of the financial assets recorded on the financial statements. Financial assets, which potentially expose each Fund to counterparty credit risk, consist principally of cash due from counterparties on forward, option and swap transactions, when applicable. The extent of each Fund’s exposure to counterparty credit risk in respect to these financial assets approximates their carrying value as recorded on the Statement of Assets and Liabilities. Futures contracts, when applicable, expose a Fund to minimal counterparty credit risk as they are exchange traded and the exchange’s clearinghouse, which is counterparty to all exchange traded futures, guarantees the futures contracts against default.

Each Fund helps manage counterparty credit risk by entering into agreements only with counterparties the Adviser believes have the financial resources to honor their obligations and by having the Adviser monitor the financial stability of the counterparties. Additionally, counterparties may be required to pledge collateral daily (based on the daily valuation of the financial asset) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when each Fund has an unrealized loss, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the valuations fluctuate, either up or down, by at least the predetermined threshold amount.

#### Zero Coupon Securities

Each Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Tax-exempt income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

#### Offering Costs

Costs incurred by Insured New York Tax-Free Advantage (NRK) in connection with its offering of MTP Shares (\$670,200) were recorded as a deferred charge, which will be amortized over the 5-year life of the shares. Costs incurred by New York Investment Quality (NQN), New York Select Quality (NVN) and Insured New York Dividend Advantage (NKO) in connection with their offerings of VRDP Shares (\$700,750, \$852,000 and \$675,000, respectively) were recorded as deferred charges which will be amortized over the 30-year life of the shares. Each Fund's amortized deferred charges are recognized as a component of "Interest expense and amortization of offering costs" on the Statement of Operations.

#### Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which a Fund overdraws its account at the custodian bank.

### Indemnifications

Under the Funds' organizational documents, their officers and directors/trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

### Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

## 2. Fair Value Measurements

In determining the value of each Fund's investments, various inputs are used. These inputs are summarized in the three broad levels listed below:

Level 1 – Quoted prices in active markets for identical securities.

Level 2 – Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 – Significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of September 30, 2010:

New York Investment Quality (NQN)	Level 1	Level 2	Level 3	Total
Investments:				
Municipal Bonds	\$ —	\$ 411,653,250	\$ —	\$ 411,653,250

Investments:				
Municipal Bonds	\$ —	\$ 82,966,088	\$ —	\$ 82,966,088

### 3. Derivative Instruments and Hedging Activities

The Funds record derivative instruments at fair value, with changes in fair value recognized on the Statement of Operations, when applicable. Even though the Funds' investments in derivatives may represent economic hedges, they are not considered to be hedge transactions for financial reporting purposes. The Funds did not invest in derivative instruments during the fiscal year ended September 30, 2010.

During the fiscal year ended September 30, 2010, Insured New York Dividend Advantage (NKO) completed a private exchange offer in which all of its 500 Series 1 VRDP Shares were exchanged for 500 Series 2 VRDP Shares.

## 5. Investment Transactions

Purchases and sales (including maturities but excluding short-term investments) during the fiscal year ended September 30, 2010, were as follows:

	New York Investment Quality (NQN)	New York Select Quality (NVN)	New York Quality Income (NUN)	Insured New York Premium Income (NNF)	Insured New York Dividend Advantage (NKO)	Insured New York Tax-Free Advantage (NRK)
Purchases	\$45,500,224	\$56,785,949	\$33,792,327	\$15,851,740	\$7,377,108	\$9,883,346
Sales and maturities	21,921,600	42,732,824	34,916,254	7,413,850	3,340,750	3,352,268

## 6. Income Tax Information

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the timing differences in recognizing taxable market discount, timing differences in recognizing certain gains and losses on investment transactions and the treatment of investments in inverse floating rate securities reflected as financing transactions, if any. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts as detailed below. Temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset values of the Funds.

Nuveen Investments 73

---

Notes to  
Financial Statements (continued)

At September 30, 2010, the cost and unrealized appreciation (depreciation) of investments, as determined on a federal income tax basis, were as follows:

	New York Investment Quality (NQN)	New York Select Quality (NVN)	New York Quality Income (NUN)	Insured New York Premium Income (NNF)	Insured New York Dividend Advantage (NKO)	Insured New York Tax-Free Advantage (NRK)
Cost of investments	\$ 358,075,565	\$ 478,217,267	\$ 473,298,354	\$ 166,024,041	\$ 158,512,007	\$ 76,442,279
Gross unrealized:						
Appreciation	\$ 25,016,311	\$ 40,852,494	\$ 37,990,733	\$ 12,403,683	\$ 10,051,924	\$ 4,700,260
Depreciation	(3,591,042 )	(4,978,461 )	(5,555,362 )	(1,728,565 )	(1,378,124 )	(568,567 )
Net unrealized appreciation (depreciation) of investments	\$ 21,425,269	\$ 35,874,033	\$ 32,435,371	\$ 10,675,118	\$ 8,673,800	\$ 4,131,693

Permanent differences, primarily due to federal taxes paid, taxable market discount and distribution character reclassifications, resulted in reclassifications among the Funds' components of Common share net assets at September 30, 2010, the Funds' tax year end, as follows:

	New York Investment Quality (NQN)	New York Select Quality (NVN)	New York Quality Income (NUN)	Insured New York Premium Income (NNF)	Insured New York Dividend Advantage (NKO)	Insured New York Tax-Free Advantage (NRK)
Paid-in-surplus	\$(2,754 )	\$(2,872 )	\$—	\$—	\$(255,231 )	\$(62,299 )
Undistributed (Over-distribution of) net investment income	2,754	(40,477 )	(39,845 )	(166 )	255,738	61,642
Accumulated net realized gain (loss)	—	43,349	39,845	166	(507 )	657

The tax components of undistributed net tax-exempt income, net ordinary income and net long-term capital gains at September 30, 2010, the Funds' tax year end, were as follows:

	New York Investment Quality (NQN)	New York Select Quality (NVN)	New York Quality Income (NUN)	Insured New York Premium Income (NNF)	Insured New York Dividend Advantage (NKO)	Insured New York Tax-Free Advantage (NRK)
--	--	--	--	---	---	---

Undistributed net tax-exempt income *	\$4,344,606	\$6,075,147	\$6,348,177	\$2,050,491	\$1,504,602	\$606,810
Undistributed net ordinary income **	8,786	6,619	—	—	—	235
Undistributed net long-term capital gains	901,589	688,765	106,704	—	—	1,273

\* Undistributed net tax-exempt income (on a tax basis) has not been reduced for the dividend declared on September 1, 2010, paid on October 1, 2010.

\*\* Net ordinary income consists of taxable market discount income and net short-term capital gains, if any.

The tax character of distributions paid during the Funds' tax years ended September 30, 2010 and September 30, 2009, was designated for purposes of the dividends paid deduction as follows:

	New York Investment Quality (NQN)	New York Select Quality (NVN)	New York Quality Income (NUN)	Insured New York Premium Income (NNF)	Insured New York Dividend Advantage (NKO)	Insured New York Tax-Free Advantage (NRK)

Distributions from net tax-exempt income	\$13,431,568	\$18,097,482	\$18,074,822	\$5,923,448	\$5,941,189	\$2,684,765
Distributions from net ordinary income **	—	—	—	—	—	—
Distributions from net long-term capital gains	—	—	—	—	269,487	39,310

\*\* Net ordinary income consists of taxable market discount income and net short-term capital gains, if any.

\*\*\* The Funds hereby designate these amounts paid during the fiscal year ended September 30, 2010, as Exempt Interest Dividends.

\*\*\*\* The Funds designated as a long-term capital gain dividend, pursuant to the Internal Revenue Code Section 852(b)(3), the amount necessary to reduce earnings and profits of the Funds related to net capital gain to zero for the tax year ended September 30, 2010.

At September 30, 2010, the Funds' tax year end, the following Funds had unused capital loss carryforwards available for federal income tax purposes to be applied against future capital gains, if any. If not applied, the carryforwards will expire as follows:

Expiration:	Insured New York Premium Income (NNF)	Insured New York Dividend Advantage (NKO)
September 30, 2016	\$10,016	\$—
September 30, 2018	—	4,774
Total	\$10,016	\$4,774

During tax year ended September 30, 2010, the following Funds utilized capital loss carryforwards as follows:

	New York Investment Quality (NQN)	New York Select Quality (NVN)	New York Quality Income (NUN)	Insured New York Premium Income (NNF)
Utilized capital loss carryforwards	\$205,863	\$174,040	\$505,047	\$64,101

## 7. Management Fees and Other Transactions with Affiliates

Each Fund's management fee is separated into two components – a fund-level fee, based only on the amount of assets within each individual Fund, and a complex-level fee, based on the aggregate amount of all fund assets managed by

the Adviser. This pricing structure enables each Fund's shareholders to benefit from growth in the assets within their respective Fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual fund-level fee for each Fund, payable monthly, is calculated according to the following schedule:

Average Daily Managed Assets*	Fund-Level Fee Rate
For the first \$125 million	.4500%
For the next \$125 million	.4375
For the next \$250 million	.4250
For the next \$500 million	.4125
For the next \$1 billion	.4000
For the next \$3 billion	.3875
For managed assets over \$5 billion	.3750

Nuveen Investments 75

Notes to  
Financial Statements (continued)

	Insured New York Dividend Advantage (NKO) Insured New York Tax-Free Advantage (NRK) Fund-Level Fee Rate
Average Daily Managed Assets*	
For the first \$125 million	.4500%
For the next \$125 million	.4375
For the next \$250 million	.4250
For the next \$500 million	.4125
For the next \$1 billion	.4000
For managed assets over \$2 billion	.3750

The annual complex-level fee for each Fund, payable monthly, is calculated according to the following schedule:

Complex-Level Managed Asset Breakpoint Level*	Effective Rate at Breakpoint Level
\$55 billion	.2000%
\$56 billion	.1996
\$57 billion	.1989
\$60 billion	.1961
\$63 billion	.1931
\$66 billion	.1900
\$71 billion	.1851
\$76 billion	.1806
\$80 billion	.1773
\$91 billion	.1691
\$125 billion	.1599
\$200 billion	.1505
\$250 billion	.1469
\$300 billion	.1445

\* For the fund-level and complex-level fees, managed assets include closed-end fund assets managed by the Adviser that are attributable to financial leverage. For these purposes, financial leverage includes the funds' use of preferred stock and borrowings and certain investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by the trust's issuance of floating rate securities, subject to an agreement by the Adviser as to certain funds to limit the amount of such assets for determining managed assets in certain circumstances. The complex-level fee is calculated based upon the aggregate daily managed assets of all Nuveen funds, with such daily managed assets defined separately for each fund in its management agreement, but excluding assets attributable to investments in other Nuveen funds. As of September 30, 2010, the complex-level fee rate was .1822%.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its directors/trustees who are affiliated with the Adviser or to its officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Directors/Trustees has adopted a deferred compensation plan for independent directors/trustees that enables directors/trustees to elect to defer receipt of all or a portion of the annual compensation

they are entitled to receive from certain Nuveen advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised funds.

For the first ten years of Insured New York Dividend Advantage's (NKO) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily managed assets, for fees and expenses in the amounts and for the time periods set forth below:

Year Ending March 31,		Year Ending March 31,	
2002*	.30%	2008	.25%
2003	.30	2009	.20
2004	.30	2010	.15
2005	.30	2011	.10
2006	.30	2012	.05
2007	.30		

\* From the commencement of operations.

The Adviser has not agreed to reimburse Insured New York Dividend Advantage (NKO) for any portion of its fees and expenses beyond March 31, 2012.

76 Nuveen Investments

For the first eight years of Insured New York Tax-Free Advantage's (NRK) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily managed assets, for fees and expenses in the amounts and for the time periods set forth below:

Year Ending November 30,		Year Ending November 30,	
2002*	.32%	2007	.32%
2003	.32	2008	.24
2004	.32	2009	.16
2005	.32	2010	.08
2006	.32		

\* From the commencement of operations.

The Adviser has not agreed to reimburse Insured New York Tax-Free Advantage (NRK) for any portion of its fees and expenses beyond November 30, 2010.

As a result of certain trading errors that occurred during the fiscal year ended September 30, 2010, Insured New York Tax-Free Advantage (NRK) was reimbursed \$35,020 by the Adviser to offset losses realized on the disposal of investments in violation of investment guidelines.

## 8. New Accounting Standards

### Fair Value Measurements

On January 21, 2010, Financial Accounting Standards Board issued changes to the authoritative guidance under U.S. GAAP for fair value measurements. The objective of which is to provide guidance on how investment assets and liabilities are to be valued and disclosed. Specifically, the amendment requires reporting entities disclose Level 3 activity for purchases, sales, issuances and settlements in the Level 3 roll-forward on a gross basis rather than as one net number. The effective date of the amendment is for interim and annual periods beginning after December 15, 2010. At this time, management is evaluating the implications of this guidance and the impact it will have to the financial statement amounts and footnote disclosures, if any.

4.53		4.10		361,945	1.20		1.20		6.03		15	

- (a) The amounts shown are based on Common share equivalents.
- (b) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.
- Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.
- (c) Ratios do not reflect the effect of dividend payments to Auction Rate Preferred shareholders; Net Investment Income ratios reflect income earned and expenses incurred on assets attributable to Auction Rate Preferred shares and/or Variable Rate Demand Preferred shares, where applicable.
- (d) Ratios do not reflect the effect of custodian fee credits earned on the Fund's net cash on deposit with the custodian bank, where applicable.
- (e) The expense ratios reflect, among other things, payments to Variable Rate Demand Preferred shareholders and/or the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund, where applicable, both as described in

Footnote 1 – General Information and Significant Accounting Policies, Variable Rate Demand Preferred Shares and Inverse Floating Rate Securities, respectively.

\* Rounds to less than \$.01 per share.
