Chairman's Letter to Shareholders

Dear Shareholders,

These are perplexing times for investors. The global economy continues to struggle. The solutions being implemented in the eurozone to deal with the debt crises of many of its member countries are not yet seen as sufficient by the financial markets. The political paralysis in the U.S. has prevented the compromises necessary to deal with the fiscal imbalance and government spending priorities. The efforts by individual consumers, governments and financial institutions to reduce their debts are increasing savings but reducing demand for the goods and services that drive employment. These developments are undermining the rebuilding of confidence by consumers, corporations and investors that is so essential to a resumption of economic growth.

Although it is painfully slow, progress is being made. In Europe, the turnover of a number of national governments reflects the realization by politicians and voters alike that leaders who practiced business as usual had to be replaced by leaders willing to face problems and accept the hard choices needed to resolve them. The recent coordinated efforts by central banks in the U.S. and Europe to provide liquidity to the largest European banks indicates that these monetary authorities are committed to facilitating a recovery in the European banking sector.

In the U.S., the failure of the congressionally appointed Debt Reduction Committee was a blow to those who hoped for a bipartisan effort to finally begin addressing the looming fiscal crisis. Nevertheless, Congress and the administration cannot ignore the issue for long. The Bush era tax cuts are scheduled to expire on December 31, 2012, and six months later the \$1.2 trillion of mandatory across-the-board spending cuts under the Budget Control Act of 2011 begin to go into effect. Any legislative modification would require bipartisan support and the prospects for a bipartisan solution are unclear. The impact of these two developments would be a mixed blessing: a meaningful reduction in the annual budget deficit at the cost of slowing the economic recovery.

It is in these particularly volatile markets that professional investment management is most important. Skillful investment teams who have experienced challenging markets and remain committed to their investment disciplines are critical to the success of an investor's long-term objectives. In fact, many long-term investment track records are built during challenging markets when managers are able to protect investors against these economic crosscurrents. Experienced investment teams know that volatile markets put a premium on companies and investment ideas that will weather the short-term volatility and that compelling values and opportunities are opened up when markets overreact to negative developments. By maintaining appropriate time horizons, diversification and relying on practiced investment teams, we believe that investors can achieve their long-term investment objectives.

As always, I encourage you to contact your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of your Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Robert P. Bremner Chairman of the Board December 21, 2011

Portfolio Managers' Comments

Nuveen Municipal Value Fund, Inc. (NUV) Nuveen Municipal Value Fund 2 (NUW) Nuveen Municipal Income Fund, Inc. (NMI) Nuveen Enhanced Municipal Value Fund (NEV)

Portfolio managers Tom Spalding, Chris Drahn and Steve Hlavin review U.S. economic and municipal market conditions, key investment strategies and the twelve-month performance of these four national Funds. With 34 years of investment experience at Nuveen, Tom has managed NUV since its inception in 1987, adding NUW at its inception in 2009. Chris, who has 31 years of financial industry experience, assumed portfolio management responsibility for NMI in January 2011. An eight-year veteran of Nuveen, Steve has been involved in the management of NEV since its inception in 2009, taking on full portfolio management responsibility for this Fund in December 2010.

What factors affected the U.S. economy and municipal market during the twelve-month reporting period ended October 31, 2011?

During this period, the U.S. economy's recovery from recession remained slow. The Federal Reserve (Fed) maintained its efforts to improve the overall economic environment by continuing to hold the benchmark fed funds rate at the record low level of zero to 0.25% that it had established in December 2008. At its November 2011 meeting (shortly after the end of this reporting period), the central bank reaffirmed its opinion that economic conditions would likely warrant keeping this rate at "exceptionally low levels" at least through mid-2013. The Fed also said that it would continue its program to extend the average maturity of U.S Treasury holdings by purchasing \$400 billion of these securities with maturities of six to thirty years and selling an equal amount of U.S. Treasury securities with maturities of three years or less. The goals of this program, which the Fed expects to complete by the end of June 2012, are to lower longer-term interest rates, support a stronger economic recovery, and help ensure that inflation remains at levels consistent with the Fed's mandates of maximum employment and price stability.

In the third quarter of 2011, the U.S. economy, as measured by the U.S. gross domestic product (GDP), grew at an annualized rate of 2.0%, the best growth number since the fourth quarter of 2010 and the ninth consecutive quarter of positive growth. The Consumer Price Index (CPI) rose 3.5% year-over-year as of October 2011, while the core CPI (which excludes food and energy) increased 2.1%, edging just above the Fed's unofficial objective of 2.0% or lower for this inflation measure. Unemployment numbers remained high, as October 2011

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements, and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's Group, Moody's Investor Services, Inc. or Fitch, Inc. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below-investment grade ratings. Bonds backed by U.S. Government or agency securities are given an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by a national rating agency.

marked the seventh straight month with a national jobless number of 9.0% or higher. While the dip was a step in the right direction, it was partly due to a number of individuals dropping out of the hunt for work. The housing market also continued to be a major weak spot. For the twelve months ended September 2011 (the most recent data available at the time this report was prepared), the average home price in the Standard & Poor's/Case-Shiller Index lost 3.6% over the preceding twelve months, with 18 of the 20 major metropolitan areas reporting losses. In addition, the U.S. economic picture continued to be clouded by concerns about the European debt crisis and unsuccessful efforts to reduce the federal deficit, which led to S&P's downgrade of U.S. Treasury debt from AAA to AA+ in August 2011.

Municipal bond prices ended this period generally unchanged versus the beginning of this reporting period masking a sell-off that commenced in the fourth quarter of 2010 as the result of investor concerns about inflation, the federal deficit, and its impact on demand for U.S. Treasuries. Adding to this situation was media coverage of the strained finances of many state and local governments, which failed to differentiate between gaps in these governments' operating budgets and their ability to meet their debt service obligations. (We should note that defaults and bankruptcies continue to be rare in the municipal market.) As a result, money flowed out of municipal mutual funds, yields rose, and valuations declined. As we moved into the second quarter of 2011, we saw the environment in the municipal market improve, as crossover buyers—including hedge funds and life insurance companies—were attracted by municipal bond prices and tax-exempt yields.

During the second part of this reporting period (i.e., May-October 2011), municipal bond prices generally rallied as yields declined across the municipal curve. The decline in yields was due in part to the continued depressed level of municipal bond issuance. Tax-exempt volume, which had been limited in 2010 by issuers' extensive use of taxable Build America Bonds (BABs), continued to drift lower in 2011. Even though BABs were no longer an option for issuers (the BAB program expired at the end of 2010), some borrowers had accelerated issuance into 2010 in order to take advantage of the program's favorable terms before its termination, fulfilling their capital program borrowing needs well into 2012. This reduced the need for many borrowers to come to market with new issues during this period. Over the twelve months ended October 31, 2011, municipal bond issuance nationwide totaled \$320.2 billion, a decrease of 23% compared with the issuance of the twelve-month period ended October 31, 2010. During the majority of this period, demand for municipal bonds remained very strong.

What key strategies were used to manage these Funds during this reporting period?

In an environment characterized by tighter municipal supply and relatively lower yields, we continued to take a bottom-up approach to discovering sectors and individual credits that we believed were undervalued and that had potential to perform well over the long term. During this period, NUV, NUW and NMI found value in a variety of sectors. For

example, NMI purchased health care and higher education bonds and took advantage of attractive valuation levels to add some tobacco credits. NMI also bought California redevelopment agency (RDA) bonds, which fund programs to improve economically depressed areas in the state. We remained very selective in our purchases in this area, evaluating bonds on a case by case basis and buying only those where our research indicated that we potentially would be compensated for taking on additional risk. In general, these three Funds focused on purchasing bonds with longer maturities in order to capitalize on opportunities to add more attractive yields at the longer end of the municipal yield curve. The purchase of longer bonds also helped maintain the Funds' duration (price sensitivity to interest rate movements) and yield curve positioning and enhanced call protection.

In NUV, NUW and NMI, cash for new purchases during this period was generated primarily by the proceeds from called and maturing bonds, which we worked to redeploy to keep the Funds fully invested. In NUV and NMI, in particular, bond calls provided a good source of liquidity. NMI also sold some bonds with short call dates as well as an industrial development revenue (IDR) bond to generate additional cash, which enabled the Fund to take advantage of attractive purchase candidates as they became available in the market. On the whole, however, selling in these three Funds was relatively limited, as the bonds in our portfolios generally offered higher yields than those available in the current marketplace.

In NEV, we continued to work to improve the Fund's yield and reduce its duration, bringing it more in line with its target. This period provided a unique opportunity to continue repositioning NEV and enhance its structure for the long term. As part of this, we executed a specific trading strategy that involved selling NEV's longer holdings with lower coupons and lower embedded yields and reinvesting the proceeds into bonds with shorter durations, higher coupons, and better yields. We also sold some of NEV's holdings of IDR bonds, which drew attractive bids from crossover buyers in early 2011, and diversified the Fund by reinvesting these proceeds into other sectors, specifically higher education and California RDA bonds, many of which were purchased in the secondary market. As a result of this activity, we enhanced NEV's yield curve positioning and maturity, average coupon, and embedded yield, which supports the Fund's dividend. Although this activity had the result of limiting NEV's upside potential in the short term, we believe it has enhanced the Fund's positioning and risk profile for the long term.

As of October 31, 2011, all of these Funds continued to use inverse floating rate securities. We employ inverse floaters for a variety of reasons, including duration management, income and total return enhancement, and—in NEV—as a form of leverage. During this period, NEV also invested in additional types of derivative instruments such as forward interest rates swaps, which are designed to help shorten its duration. During this period, we added to NEV's derivative positions, all of which remained in place at period end.

Nuveen Investments

7

How did the Funds perform?

Individual results for these Funds, as well as relevant index and peer group information, are presented in the accompanying table.

Average Annual Total Returns on Net Asset Value For periods ended 10/31/11

Fund	1-Year	5-Year	10-Year
NUV	3.53%	3.65%	4.73%
NUW	3.61%	N/A	N/A
NMI	4.73%	4.72%	5.12%
Standard & Poor's (S&P) National Municipal Bond Index**	3.75%	4.48%	4.95%
Lipper General and Insured Unleveraged Municipal Debt			
Funds Classification Average**	3.44%	3.56%	4.26%
NEV*	1.28%	N/A	N/A
Standard & Poor's (S&P) National Municipal Bond Index**	3.75%	4.48%	4.95%
Lipper General and Insured Leveraged Municipal Debt			
Funds Classification Average**	4.80%	4.20%	5.59%

For the twelve months ended October 31, 2011, the total return on net asset value (NAV) for NMI exceeded the return on the Standard & Poor's (S&P) National Municipal Bond Index. NUW and NUV trailed this index by a small margin. All three of these Funds outperformed the average return for the Lipper General and Insured Unleveraged Municipal Debt Funds Classification Average. For this same period, NEV underper-formed the S&P National Municipal Bond Index and the Lipper General and Insured Leveraged Municipal Debt Funds Classification Average.

Key management factors that influenced the Funds' returns during this period included duration and yield curve positioning, the use of derivatives, credit exposure and sector allocation. In addition, NEV's use of leverage was an important positive factor in its performance. The impact of leverage is discussed in more detail later in this report.

During this period, municipal bonds with intermediate and longer maturities tended to outperform the short maturity categories, with credits having maturities of seven years and longer generally outpacing the market. In general, the greater a Fund's exposure to the outperforming intermediate and longer part of the yield curve, the greater the positive impact on the Fund's return. Both NUW and NEV had the longer durations typically associated with newer Funds that have been recently invested. While this was positive for NUW's performance, NEV's use of forward interest rate swaps to reduce portfolio

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

NEV is a leveraged Fund through investments in inverse floating rate securities, as discussed on page seven and nine. The other three Funds in this report are unlever-aged and use inverse floating rate securities for duration management and both income and total return enhancement.

- ** Refer to Glossary of Terms Used in this Report for definitions.
- 8 Nuveen Investments

duration and moderate interest rate risk had a negative impact on NEV's total return performance, as these derivatives performed poorly during this period. As previously described, NEV also sold bonds with longer durations as part of its restructuring during this period in order to buy bonds that would better position the Fund for the long term. This also contributed to NEV's underperformance for this period.

Credit exposure also played a role in performance during these twelve months, as bonds rated A and AA typically outperformed the other credit quality categories. On the whole, bonds with higher levels of credit risk were not favored by the market during this period. The performance of the BBB category, in particular, was dragged down by poor returns in the tobacco bond sector. While NMI was overweighted in bonds rated BBB, many of the Fund's BBB holdings were IDR bonds with intermediate maturities, and the Fund's selection of individual securities in lower-rated credit categories generally performed well. NUW was overweighted in bonds rated A, which helped its performance. Overall, credit exposure was negative in NEV, due largely to the underperformance of its 2% exposure to bonds issued for an American Airlines project at Chicago's O'Hare International Airport. On November 29, 2011, after the close of this reporting period, American Airlines filed for bankruptcy protection.

Holdings that generally made positive contributions to the Funds' returns during this period included zero coupon bonds and housing, water and sewer and health care credits. General obligation and other tax-supported bonds also generally outpaced the overall municipal market return. All of these Funds, particularly NUW, had good exposure to the health care sector, which added to their performance. However, they tended to be somewhat underweighted in general obligation bonds, which limited their participation in the performance of this sector. NEV also received a positive contribution from its sector allocations, specifically single-family housing, higher education, and California RDA bonds. On the whole, some of the best performing bonds in the Funds' portfolios for this period were those purchased during the earlier part of this period before the market rallied, when yields were relatively higher and prices especially attractive.

In contrast, pre-refunded bonds, which are often backed by U.S. Treasury securities, were among the poorest performing market segments during this period. The under-performance of these bonds can be attributed primarily to their shorter effective maturities and higher credit quality. Although their exposure to pre-refunded bonds fell over this reporting period due to bond calls and sales, NUV continued to hold a slightly heavier weighting of pre-refunded bonds than NMI. As relatively new Funds, NUW held a negligible amount of pre-refunded bonds, while NEV did not hold any of these bonds as of period end.

Fund Leverage and Other Information

IMPACT OF LEVERAGE STRATEGY ON NEV'S PERFORMANCE

One important factor impacting the return of NEV relative to the comparative indexes was the Fund's use of effective leverage through investments in inverse floating rate securities. This Fund uses leverage because its manager believes that, over time, leveraging provides opportunities for additional income and total return for shareholders. However, use of leverage also can expose shareholders to additional volatility. For example, during periods when the prices of securities held by a Fund generally are declining, the negative impact of these valuation changes on net asset value and total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when securities held by a Fund are generally rising. Leverage made positive contribution to the performance of NEV over this report period.

RISK CONSIDERATIONS

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

Investment Risk. The possible loss of the entire principal amount that you invest.

Price Risk. Shares of closed-end investment companies like these Funds frequently trade at a discount to their NAV. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Leverage Risk. NEV's use of leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that NEV's leveraging strategy will be successful.

Tax Risk. The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

Issuer Credit Risk. This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

Interest Rate Risk. Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

Reinvestment Risk. If market interest rates decline, income earned from a Fund'sportfolio may be reinvested at rates below that of the original bond that generated the income.

Call Risk or Prepayment Risk. Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

Dividend and Share Price Information

During the twelve-month reporting period ended October 31, 2011, NEV had one monthly dividend increase, while the monthly dividends of NUV, NUW and NMI remained stable throughout the period.

Due to normal portfolio activity, shareholders of the following Funds received capital gains and/or net ordinary income distributions at the end of December 2010 as follows:

			Short-Term Capital
			Gains
			and/or Ordinary
	Long-Tern	n Capital Gains	Income
Fund		(per share)	(per share)
NUV	\$	0.0210 \$	0.0007
NUW	\$	0.0193 \$	0.0028

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of October 31, 2011, all four funds in this report had positive UNII balances for both tax and financial reporting purposes.

SHARE REPURCHASES AND PRICE INFORMATION

Since the inception of the Funds' repurchase programs, the Funds' have not repurchased any of their outstanding shares.

As of October 31, 2011, the Funds' share prices were trading at (+) premiums or (-) discounts to their NAVs as shown in the accompanying table.

	10/31/11	
	(+)Premium/(-)	12-Month Average
Fund	Discount	(-)Discount
NUV	(+)0.10%	(-)1.13%
NUW	(+)3.58%	(-)0.06%
NMI	(+)3.53%	(-)0.97%
NEV	(-)1.93%	(-)3.21%

SHELF EQUITY PROGRAM

On December 8, 2010, a registration statement filed by NUV with the Securities and Exchange Commission (SEC) became effective authorizing the Fund to issue an additional 19.6 million shares through a shelf offering. Under this shelf offering program, the Fund, subject to market conditions, may raise additional equity capital from time to time in varying amounts and offering methods at a net price at or above the Fund's NAV per share.

During the twelve-month reporting period, NUV sold shares through its shelf offering program at a weighted average premium to NAV per share as shown in the accompanying table.

	Shares Sold	Weighted Average
	through	Premium to NAV
Fund	Shelf Offering	Per Share Sold

Refer to the Glossary of Terms Used in this Report for further definition of the terms used within this Fund's Performance Overview page.

- 1 Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a federal income tax rate of 28%. When comparing this Fund to investments that generate qualified dividend income, this Taxable-Equivalent Yield is lower.
- 2 Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's Group, Moody's Investors Service, Inc. or Fitch, Inc. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below-investment grade ratings. Bonds backed by U.S. Government or agency securities are given an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by a national rating agency.
- 3 Holdings are subject to change.

Report of Independent Registered Public Accounting Firm

The Board of Directors/Trustees and Shareholders Nuveen Municipal Value Fund, Inc. Nuveen Municipal Value Fund 2 Nuveen Municipal Income Fund, Inc. Nuveen Enhanced Municipal Value Fund

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of Nuveen Municipal Value Fund, Inc., Nuveen Municipal Value Fund 2, Nuveen Municipal Income Fund, Inc., and Nuveen Enhanced Municipal Value Fund (the "Funds") as of October 31, 2011, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the Standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions of Nuveen Municipal Value Fund, Inc., Nuveen Municipal Value Fund 2, Nuveen Municipal Income Fund, Inc., and Nuveen Enhanced Municipal Value Fund at October 31, 2011, and the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the periods indicated therein in conformity with U.S. generally accepted accounting principles.

\$ 88,487,854

(1)	All percentages shown in the Portfolio of Investments are based on net assets.
(2)	Optional Call Provisions (not covered by the report of independent registered public accounting
	firm): Dates (month and year) and prices of the earliest optional call or redemption. There may be
	other call provisions at varying prices at later dates. Certain mortgage-backed securities may be
	subject to periodic principal paydowns.
(3)	Ratings (not covered by the report of independent registered public accounting firm): Using the
	highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or
	Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by
	Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of
	these national rating agencies.
(4)	Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency
	securities, which ensure the timely payment of principal and interest. Bonds backed by U.S.
	Government or agency securities are given an implied rating equal to the rating of such securities.
(5)	Investment, or portion of investment, has been pledged to collateralize the net payment obligations
	for investments in inverse floating rate transactions.
(6)	For fair value measurement disclosure purposes, investment categorized as Level 3. See Notes to
	Financial Statements, Footnote 1 – General Information and Significant Accounting Policies,
	Investment Valuation for more information.
(7)	At or subsequent to the end of the reporting period, this security is non-income producing.
	Non-income producing security, in the case of a bond, generally denotes that the issuer has (1)
	defaulted on the payment of principal or interest, (2) is under the protection of the Federal
	Bankruptcy Court or (3) the Fund's Adviser has concluded that the issue is not likely to meet its
	future interest payment obligations and has directed the Fund's custodian to cease accruing additional
	income on the Fund's records.
N/R	Not rated.
(ETM)	Escrowed to maturity.
(IF)	Inverse floating rate investment.
(UB)	Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to
	Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Inverse
	Floating Rate Securities for more information.

See accompanying notes to financial statements.

(1)	All percentages shown in the Portfolio of Investments are based on net assets.
(2)	Optional Call Provisions (not covered by the report of independent registered public accounting
	firm): Dates (month and year) and prices of the earliest optional call or redemption. There may be
	other call provisions at varying prices at later dates. Certain mortgage-backed securities may be
	subject to periodic principal paydowns.
(3)	Ratings (not covered by the report of independent registered public accounting firm): Using the
	highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's")
	or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by
	Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any
	of these national rating agencies.
(4)	Investment, or portion of investment, has been pledged to collateralize the net payment obligations
	for investments in derivatives and/or inverse floating rate transactions.
(5)	

Investment valued at fair value using methods determined in good faith by, or at the discretion of, the Board of Trustees.

- (6) For fair value measurement disclosure purposes, investment categorized as Level 3. See Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Investment Valuation for more information.
- (7) At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing security, in the case of a bond, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund's Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income on the Fund's records.
- (8) Other Assets Less Liabilities includes the net Unrealized Appreciation (Depreciation) of derivative instruments as noted within Investments in Derivatives at October 31, 2011.
- (9) Effective date represents the date on which both the Fund and Counterparty commence interest payment accruals on each forward swap contract.
- N/R Not rated. (IF) Inverse floating rate investment.
- (UB)
 Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Inverse Floating Rate Securities for more information.
- 144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.
- USD-LIBOR United States Dollar-London Inter-Bank Offered Rate.

(a) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Net Asset Value is the combination of changes in net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

- (b) Ratios do not reflect the effect of custodian fee credits earned on the Fund's net cash on deposit with the custodian bank, where applicable.
- (c) The expense ratios reflect, among other things, the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund, where applicable, as described in Footnote 1 – General Information and Significant Accounting Policies, Inverse Floating Rate Securities as follows:

Notes to Financial Statements

1. General Information and Significant Accounting Policies

General Information

The funds covered in this report and their corresponding New York Stock Exchange ("NYSE") symbols are Nuveen Municipal Value Fund, Inc. (NUV), Nuveen Municipal Value Fund 2 (NUW), Nuveen Municipal Income Fund, Inc. (NMI) and Nuveen Enhanced Municipal Value Fund (NEV) (each a "Fund" and collectively, the "Funds"). The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end, registered investment companies.

Effective January 1, 2011, the Funds' adviser, Nuveen Asset Management, a wholly-owned subsidiary of Nuveen Investments, Inc. ("Nuveen"), changed its name to Nuveen Fund Advisors, Inc. (the "Adviser"). Concurrently, the Adviser formed a wholly-owned subsidiary, Nuveen Asset Management, LLC (the "Sub-Adviser"), to house its portfolio management capabilities and to serve as the Funds' sub-adviser, and the Funds' portfolio managers became employees of the Sub-Adviser. This allocation of responsibilities between the Adviser and the Sub-Adviser affects each of the Funds. The Adviser will compensate the Sub-Adviser for the portfolio management services it provides to the Funds from each Fund's management fee.

Each Fund's primary investment objective is to provide current income exempt from regular federal income tax by investing primarily in a portfolio of municipal obligations issued by state and local government authorities or certain U.S. territories.

Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles ("U.S. GAAP").

Investment Valuation

Prices of municipal bonds and forward swap contracts are provided by a pricing service approved by the Funds' Board of Directors/Trustees. These securities are generally classified as Level 2 for fair value measurement purposes. When price quotes are not readily available (which is usually the case for municipal bonds) the pricing service establishes a security's fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. In pricing certain securities, particularly less liquid and lower quality securities, the pricing service may consider information about a security, its issuer, or market activity provided by the Adviser. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Funds' Board of Directors/Trustees or its designee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund's net asset value (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security's

fair value. As a general principle, the fair value of a security would appear to be the amount that the owner might reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a particular security, all valuations are subject to review by the Funds' Board of Directors/Trustees or its designee.

Refer to Footnote 2 – Fair Value Measurements for further details on the leveling of securities held by the Funds as of the end of the reporting period.

Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method, which is the same basis used for federal income tax purposes. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At October 31, 2011, there were no such outstanding commitments in any of the Funds.

Investment Income

Investment income, which reflects the amortization of premiums and includes accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also includes paydown gains and losses, if any.

Professional Fees

Professional fees presented on the Statement of Operations consist of legal fees incurred in the normal course of operations, audit fees, tax consulting fees and, in some cases, workout expenditures. Workout expenditures are incurred in an attempt to protect or enhance an investment, or to pursue other claims or legal actions on behalf of Fund shareholders.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions that will enable interest from municipal securities, which is exempt from regular federal income tax, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Dividends and Distributions to Shareholders

Dividends from net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to shareholders of net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

Shelf Offering and Shelf Offering Costs

During the fiscal year ended October 31, 2011, Municipal Value (NUV) filed a registration statement with the Securities and Exchange Commission ("SEC") authorizing the Fund to issue an additional 19.6 million shares through a shelf offering, which became effective with the SEC on December 8, 2010. Under this equity shelf program, the Fund, subject to market conditions, may raise additional capital from time to time in varying amounts and offering methods at a net price at or above the Fund's net asset value per share.

During the fiscal year ended October 31, 2011, Municipal Value (NUV) issued 253,486 shares, receiving offering proceeds, net of offering costs of \$2,306,239. Initial costs incurred by Municipal Value (NUV) in connection with the shelf offering of its shares are recorded as a deferred charge, which are amortized over the period such additional shares are sold not to exceed the one-year life of the shelf offering period. Ongoing shelf offering costs incurred by the Fund are expensed as incurred.

During the fiscal year ended October 31, 2011, Nuveen Securities, LLC, the Fund's broker-dealer and a wholly-owned subsidiary of Nuveen, received commissions of \$4,664, related to the sale of shares as a result of the Municipal Value (NUV) shelf offering.

Inverse Floating Rate Securities

Each Fund is authorized to invest in inverse floating rate securities. An inverse floating rate security is created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. In turn, this trust (a) issues floating rate certificates, in face amounts equal to some fraction of the deposited bond's par amount or market value, that typically pay short-term tax-exempt interest rates to third parties, and (b) issues to a long-term investor (such as one of the Funds) an inverse floating rate certificate (sometimes referred to as an "inverse floater") that represents all remaining or residual interest in the trust. The income received by the inverse floater holder varies inversely with the short-term rate paid to the floating rate certificates' holders, and in most circumstances the inverse floater holder bears substantially all of the underlying bond's value. The price of an inverse floating rate security will be more volatile than that of the underlying bond because the interest rate is dependent on not only the fixed coupon rate of the

Notes to Financial Statements (continued)

underlying bond but also on the short-term interest paid on the floating rate certificates, and because the inverse floating rate security essentially bears the risk of loss of the greater face value of the underlying bond.

A Fund may purchase an inverse floating rate security in a secondary market transaction without first owning the underlying bond (referred to as an "externally-deposited inverse floater"), or instead by first selling a fixed-rate bond to a broker-dealer for deposit into the special purpose trust and receiving in turn the residual interest in the trust (referred to as a "self-deposited inverse floater"). The inverse floater held by a Fund gives the Fund the right (a) to cause the holders of the floating rate certificates to tender their notes at par, and (b) to have the broker transfer the fixed-rate bond held by the trust to the Fund, thereby collapsing the trust. An investment in an externally-deposited inverse floater is identified in the Portfolio of Investments as "(IF) – Inverse floating rate investment." An investment in a self-deposited inverse floater is identified in the Portfolio of Investments as "(IB) – Underlying bond of an inverse floating rate trust reflected as a financing transaction," with the Fund accounting for the short-term floating rate certificates is sued by the trust as "Floating rate obligations" on the Statement of Assets and Liabilities. In addition, the Fund reflects in "Investment Income" the entire earnings of the underlying bond and recognizes the related interest paid to the holders of the short-term floating rate certificates as a component of "Interest expense" on the Statement of Operations.

During the fiscal year ended October 31, 2011, each Fund invested in externally-deposited inverse floaters and/or self-deposited inverse floaters.

Each Fund may also enter into shortfall and forbearance agreements (sometimes referred to as a "recourse trust" or "credit recovery swap") (such agreements referred to herein as "Recourse Trusts") with a broker-dealer by which a Fund agrees to reimburse the broker-dealer, in certain circumstances, for the difference between the liquidation value of the fixed-rate bond held by the trust and the liquidation value of the floating rate certificates issued by the trust plus any shortfalls in interest cash flows. Under these agreements, a Fund's potential exposure to losses related to or on inverse floaters may increase beyond the value of a Fund's inverse floater investments as a Fund may potentially be liable to fulfill all amounts owed to holders of the floating rate certificates. At period end, any such shortfall is recognized as "Unrealized depreciation on Recourse Trusts" on the Statement of Assets and Liabilities.

At October 31, 2011, each Fund's maximum exposure to externally-deposited Recourse Trusts was as follows:

							Enhanced	
		Municipal		Municipal		Municipal	Municipal	
				Value 2		Income		
		Value (NUV)		(NUW)		(NMI)	Value (NEV)	
Maximum exposure to Recourse Trusts	\$	7,500,000	\$	23,665,000	\$	6,005,000	\$ 152,485,000	

The average floating rate obligations outstanding and average annual interest rate and fees related to self-deposited inverse floaters during the fiscal year ended October 31, 2011, were as follows:

	Enhance	ed
Municipal	Municipal Municipa	al
	Income	
Value (NUV)	(NMI) Value (NE	V)
\$ 38,250,000 \$	3,335,000 \$ 13,594,52	21

Average floating rate obligations			
outstanding			
Average annual interest rate and fees	.44%	.39%	.69%

Forward Swap Contracts

Each Fund is authorized to enter into forward interest rate swap contracts consistent with their investment objectives and policies to reduce, increase or otherwise alter its risk profile or to alter its portfolio characteristics (i.e. duration, yield curve positioning and credit quality).

Each Fund is subject to interest rate risk in the normal course of pursuing its investment objectives. Each Fund's use of forward interest rate swap transactions is intended to help the Fund manage its overall interest rate sensitivity, either shorter or longer, generally to more closely align the Fund's interest rate sensitivity with that of the broader market. Forward interest rate swap transactions involve a Fund's agreement with a counterparty to pay, in the future, a fixed or variable rate payment in exchange for the counterparty paying a Fund a variable or fixed rate payment, the accruals for which would begin at a specified date in the future (the "effective date"). The amount of the payment obligation is based on the notional amount of the swap contract and the termination date of the swap (which is akin to a bond's maturity). The value of a Fund's swap commitment would increase or decrease based primarily on the extent to which long-term interest rates for bonds having a maturity of the swap's termination date increases or decreases. Forward interest rate swap contracts are valued daily. The net amount recorded on these transactions for each counterparty is recognized on the Statement of Assets and Liabilities as a component of "Unrealized appreciation or depreciation on forward swaps" with the change during the fiscal period recognized on the Statement of Operations as a component of "Change in net unrealized appreciation (depreciation) of forward swaps."

Each Fund may terminate a swap contract prior to the effective date, at which point a realized gain or loss is recognized. When a forward swap is terminated, it ordinarily does not involve the delivery of securities or other underlying assets or principal, but rather is settled in cash on a net basis. Net realized gains and losses during the fiscal period are recognized on the Statement of Operations as a component of "Net realized gain (loss) from forward swaps." Each Fund intends, but is not obligated, to terminate its forward swaps before the effective date. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the credit risk associated with a counterparty failing to honor its commitment to pay any realized gain to the Fund upon termination.

During the fiscal year ended October 31, 2011, Enhanced Municipal Value (NEV) entered into forward interest rate swap contracts to reduce the duration of the Fund's portfolio. The average notional amount of forward interest rate swap contracts outstanding during the fiscal year ended October 31, 2011, was as follows:

	Enhanced
	Municipal
	Value (NEV)
Average notional amount of forward interest rate swap contracts outstanding*	\$ 16,750,000

* The average notional amount is calculated based on the outstanding notional at the beginning of the fiscal year and at the end of each fiscal quarter within the current fiscal year.

Market and Counterparty Credit Risk

In the normal course of business each Fund may invest in financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to the transaction to perform (counterparty credit risk). The potential loss could exceed the value of the financial assets recorded on the financial statements. Financial assets, which potentially expose each Fund to counterparty credit risk, consist principally of cash due from counterparty credit risk in respect to these financial assets approximates their carrying value as recorded on the Statement of Assets and Liabilities. Futures contracts, when applicable, expose a Fund to minimal counterparty credit risk as they are exchange traded and the exchange's clearinghouse, which is counterparty to all exchange traded futures, guarantees the futures contracts against default.

Each Fund helps manage counterparty credit risk by entering into agreements only with counterparties the Adviser believes have the financial resources to honor their obligations and by having the Adviser monitor the financial stability of the counterparties. Additionally, counterparties may be required to pledge collateral daily (based on the daily valuation of the financial asset) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when each Fund has an unrealized loss, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the valuations fluctuate, either up or down, by at least the predetermined threshold amount.

Zero Coupon Securities

Each Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Tax-exempt income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which a Fund overdraws its account at the custodian bank.

Indemnifications

Under the Funds' organizational documents, their officers and directors/trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under

these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

Notes to Financial Statements (continued)

2. Fair Value Measurements

Fair value is defined as the price that the Funds would receive upon selling an investment or transferring a liability in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment. A three-tier hierarchy is used to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes.

Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

Level Quoted prices in active markets for identical securities.

1 –

Level 20ther significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3Significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of October 31, 2011:

Municipal Value (NUV) Investments:	Level 1	Level 2	Level 3	Total
Municipal Bonds	\$ —\$ 1	1,911,014,275	\$ 1,562,400	\$1,912,576,675

* Represents net unrealized appreciation (depreciation) as reported in the Fund's Portfolio of Investments.

The following is a reconciliation of the Funds' Level 3 investments held at the beginning and end of the measurement period:

				Enhanced
	Municipal	Municipal		Municipal
	Value (NUV)	Income (NMI)		Value (NEV)
	Level 3	Level 3		Level 3
	Municipal	Municipal		Municipal
	Bonds	Bonds		Bonds
Balance at the beginning of year	\$ —\$	26,021	\$	189,235
Gains (losses):				
Net realized gains (losses)		(18,646)		
Net change in unrealized appreciation (depreciation)		29,675		(109,070)
Purchases at cost			-	40,689
Sales at proceeds			-	
Net discounts (premiums)			-	
Transfers in to	1,562,400		-	570,000
Transfers out of			-	
Balance at the end of year	\$ 1,562,400 \$	37,050	\$	690,854
Change in net unrealized appreciation (depreciation) during				
the year of Level 3 securities held as of October 31, 2011	\$ (686,704) \$	29,675	\$	(666,638)

During the fiscal year ended October 31, 2011, the Funds recognized no significant transfers to or from Level 1 or Level 2. Transfers in and/or out of Level 3 are shown using end of period values.

3. Derivative Instruments and Hedging Activities

The Funds record derivative instruments at fair value, with changes in fair value recognized on the Statement of Operations, when applicable. Even though the Funds' investments in derivatives may represent economic hedges, they are not considered to be hedge transactions for financial reporting purposes. For additional information on the derivative instruments in which each Fund was invested during and at the end of the reporting period, refer to the Portfolios of Investments, Financial Statements and Footnote 1 - General Information and Significant Accounting Policies.

The following table presents the fair value of all derivative instruments held by the Funds as of October 31, 2011, the location of these instruments on the Statement of Assets and Liabilities and the primary underlying risk exposure. Enhanced Municipal Value (NEV) invested in derivative instruments during the fiscal year ended October 31, 2011.

Enhanced Municipal Value (NEV)

Location on the Statement of Assets and Liabilities								
Underlying	Derivative	Asset D	erivatives		Liabilit	ty Derivat	tives	
Risk Exposure	Instrument	Location		Value	Location		Value	
Interest Rate	terest Rate Forward Unrealized			Unrealized				
	Swaps	appreciation			depreciation

Notes to Financial Statements (continued)

5. Investment Transactions

Purchases and sales (including maturities but excluding short-term investments and derivative transactions, where applicable) during the fiscal year ended October 31, 2011, were as follows:

	Municipal	Municipal	Municipal	Municipal
	Value	Value 2	Income	Value
	(NUV)	(NUW)	(NMI)	(NEV)
Purchases	\$188,420,521	\$ 1,959,613	\$14,151,478	\$106,464,479
Sales and maturities	219,615,129	5,729,160	13,834,649	88,507,660

6. Income Tax Information

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing taxable market discount, timing differences in recognizing certain gains and losses on investment transactions and the treatment of investments in inverse floating rate securities reflected as financing transactions, if any. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts as detailed below. Temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset values of the Funds.

At October 31, 2011, the cost and unrealized appreciation (depreciation) of investments (excluding investments in derivatives, where applicable), as determined on a federal income tax basis, were as follows:

×						Enhanced
		Municipal	Municipal	Municipal		Municipal
		Value	Value 2	Income		Value
		(NUV)	(NUW)	(NMI)		(NEV)
Cost of investments	\$ 1	1,851,048,385	\$ 177,088,714	\$ 83,445,274	\$2	250,274,280
Gross unrealized:						
Appreciation	\$	114,961,406	\$ 28,734,569	\$ 4,930,319	\$	20,929,854
Depreciation		(91,683,192)	(314,782)	(1,355,449)		(5,343,650)
Net unrealized appreciation (depreciation) of						
investments	\$	23,278,214	\$ 28,419,787	\$ 3,574,870	\$	15,586,204

Permanent differences, primarily due to expiration of capital loss carryforwards, federal taxes paid, taxable market discount and distribution character reclassifications, resulted in reclassifications among the Funds' components of net assets at October 31, 2011, the Funds' tax year-end, as follows:

]	Municipal Value (NUV)	Municipal Value 2 (NUW)	Municipal Income (NMI)	Enhanced Municipal Value (NEV)
Paid-in-surplus	\$	-\$	()	\$ (6,468,523)	\$ 5,739
Undistributed (Over-distribution of) net investment income		(423,904)	(2,992)	(42,679)	(23,670)

 Accumulated net realized gain (loss)
 423,904
 437
 6,511,203
 17,931

The tax components of undistributed net tax-exempt income, net ordinary income and net long-term capital gains at October 31, 2011, the Funds' tax year-end, were as follows:

				Enhanced
	Municipal	Municipal	Municipal	Municipal
	Value	Value 2	Income	Value
	(NUV)	(NUW)	(NMI)	(NEV)
Undistributed net tax-exempt income *	\$ 14,403,774 \$	450,823 \$	1,212,659 \$	3,878,477
Undistributed net ordinary income **	2,218,088	49	5,089	39,926
Undistributed net long-term capital gains	10,779,851			

* Undistributed net tax-exempt income (on a tax basis) has not been reduced for the dividend declared on October 3, 2011, paid on November 1, 2011.

** Net ordinary income consists of taxable market discount income and net short-term capital gains, if any.

The tax character of distributions paid during the Funds' tax years ended October 31, 2011 and October 31, 2010, was designated for purposes of the dividends paid deduction as follows:

Municipal Municipal

Enhanced
