PART I

ITEM 1. DESCRIPTION OF THE BUSINESS

COMPANY BACKGROUND

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

OnCourse Technologies, Inc. (the "Company" or "OnCourse") is a Nevada corporation organized on May 28, 1998 to develop internet based business-to-business ("B2B") electronic-commerce sites for use in the procurement of raw materials and tooling for metalworking industries, to acquire specific other businesses, and to raise capital. Metalworking is defined as the process or art of shaping things out of metal. OnCourse currently has four wholly owned subsidiaries. OnCourse subsidiaries develop and or sell and distribute CAD/CAM/CAE software. Computer-Aided Engineering (CAE) is the integration of design and manufacturing into a system under the direct control of digital computers. Software systems written by "the subsidiaries" combine the use of computers in industrial-design work, computer-aided design (CAD), with their use in manufacturing operations, computer-aided manufacturing (CAM). This integrated process is commonly called CAD/CAM. CAD systems generally consist of a computer with one or more terminals featuring video monitors and interactive graphics-input devices; they can be used to design such things as machine parts, patterns for clothing, or integrated circuits. CAM Systems involve the use of numerically controlled machine tools. In a CAE system, drawings developed and revised during the design process are converted directly into instructions for the production machines using computer-assisted part programming that will manufacture the desired object. CAD/CAM systems can create or import the geometrical profile of a required component as, for example, a series of connected points. The position of each point, and the ways in which it can be reached by movements of the tool, is calculated by the computer. After calculating the necessary tool movements, the computer develops a complete machining program for the part to be manufactured on a computer numerical control (CNC) machine tool. CNC is when a computer is used as the controller in an NC (numerical control) machine tool with the program actuated from computer memory. CNC systems are controlled by dedicated mini- or microcomputers developed to enable machine tools to be readily adapted to different jobs by altering the control program or software.

Wholly-owned subsidiaries of OnCourse and the dates of their acquisition by OnCourse include: Micro Estimating Systems, Inc, a Wisconsin corporation ("Micro Estimating") - July 31, 1998; CAM Solutions, Inc., a Minnesota corporation ("CAM Solutions") - January 1, 1999; Cimtronics, Inc., an Arizona corporation ("Cimtronics") - October 1, 1999; and TekSoft, Inc, an Arizona corporation ("TekSoft") - January 31, 2000.

Micro Estimating designs, develops, and markets computer-aided-engineering ("CAE") software consisting of Windows-based estimating software products and services, including estimating, process planning and layout software for and to customers in diverse manufacturing businesses. Micro Estimating also distributes under an exclusive arrangement in the U.S.A. and Canada the AutoTAS tool management software of a Swedish developer and supplier.

CAM Solutions distributes computer-aided-design/computer-aided-manufacturing ("CAD/CAM") products developed by TekSoft and other CAD/CAM software developers; and Machine Shop Estimating, FabPlan and LayOut Pro products developed by Micro Estimating. CAM Solutions also sells and installs Direct Numerical Control ("DNC") systems for machine tools and systems integration between Micro Estimating's software and other manufacturing enterprise systems. A DNC system is another variation of a CNC system in that a DNC system involves sending part programs over telecommunications lines from a central computer to individual machine tools in the factory, thus eliminating the use of storing programs on the machines.

Cimtronics distributes CAD/CAM products developed by TekSoft and other CAD/CAM software developers; and Machine Shop Estimating, FabPlan and LayOut Pro products developed by Micro Estimating. Cimtronics also sells and installs DNC systems for machine tools and systems integration between Micro Estimating's software and other manufacturing enterprise systems.

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

TekSoft designs, develops and markets proprietary CAD/CAM software products used in metal manufacturing. TekSoft distributes its products using distributors both domestically as well as internationally. TekSoft's distributors include CAM Solutions and Cimtronics.

EMPLOYEES

OnCourse and Micro Estimating have headquarters in New Berlin, Wisconsin. Micro Estimating has a sales office in North Carolina and other subsidiaries have headquarters and operations in Arizona and Minnesota. The OnCourse organization has 44 full-time employees. In addition, TekSoft uses 10 full-time and one part-time contract programmers.

BUSINESS OF THE COMPANY

Subsidiaries of OnCourse have, for five years or more developed and or sold CAD/CAM/CAE software to the metalworking industries. TekSoft has developed and marketed CAD/CAM software since 1981. Micro Estimating has developed and marketed CAE software since 1982. CAM Solutions has been selling CAD/CAM/CAE software since 1989. Cimtronics has been selling CAD/CAM/CAE software since 1993. Both CAM Solutions and Cimtronics have had meaningful CAD/CAM/CAE sales since the years referenced above. The principal market for the subsidiaries' software products consists of an estimated 500,000 small to medium sized metalworking manufacturers. These manufacturers include but are not limited to, Original

Page 3

Equipment Manufacturers (OEM), independent machine shops, contract manufacturers, manufacturers of aerospace, automotive, appliance, and high technology equipment, electronics industry components, as well as other tool and die makers. Tool and die making is the industrial art of manufacturing stamping dies, plastics molds, and fixtures to be used in the mass production of solid objects. Sales are made by direct sales force and subsidiaries and through distributors. Sales made by direct sales force and subsidiaries were 45% and 66% for the years ended December 31, 2000 and 1999, respectively. Sales made by distributors were 55% and 34% for the years ended December 31, 2000 and 1999, respectively. Sales in North America and Europe for the years ended December 31, 2000 and 1999 were 87% and 7% and 98% and 2%, respectively.

PRINCIPAL PRODUCTS AND MARKETS

CAD/CAM

TekSoft develops and markets Windows and Windows-NT based, CAD/CAM software used in the metal working industries. This subsidiary's flagship CAD/CAM product, ProCAM, has a customer base in excess of 15,000 users in its nine available languages. TekSoft has a total of over 22,000 users for all its products installed at facilities serving the aerospace, computer, and automotive and mold-making industries, among others. According to the 2000 Software Market Assessment by CIMdata Inc., an independent research firm specializing in the NC industry, TekSoft is ranked in the top five based on installed users for CAM companies worldwide.

PROCAM

ProCAM is a CAD/CAM solution designed for use in manufacturing or machining products for the manufacturing industry. The ProCAM for Windows product provides a fully integrated solution for two dimension (2D) CAD/CAM applications and three dimension (3D) applications requiring complex surface modeling and machining. Based on past awards, ProCAM is one of the fastest, easiest to use CAD/CAM products on the market. For example, ProCAM received a 1998 Excellence

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

in Manufacturing Technology Achievement Award for "Innovation" in the software classification by the readers of American Machinist Magazine. ProCAM was also voted a year 2000 Excellence in Manufacturing Technology Achievement Award winner in the software classification titled "User Friendliness" by the readers of American Machinist Magazine. Since 1877, American Machinist has covered significant developments in manufacturing technology. The magazine is dedicated to serving the machine tool market completely and offers readers the most up-to-date information in the methods and practices of metalworking. American Machinist's has a monthly subscription base of 80,000 readers consisting of company management and manufacturing/production managers and engineers in the Metalworking industries.

CAMWORKS

CAMWorks is a CAM application that is seamlessly integrated into, and is operated from within a third party application called SolidWorks. According to SolidWorks' website, SolidWorks is a CAD package developed by the SolidWorks Corporation, a Dassault Systems S.A. (NASDAQ:DASTY) company. The SolidWorks Corporation develops and markets 3D mechanical design solutions. CAMWorks incorporates CAM technologies pioneered by TekSoft such as: Associative Machining which allows a user to change the CAD drawing of a part and automatically update the machining parameters without additional user input; and Knowledge Based Machining which allows users to edit or update a predefined set of operational instructions for machining a specific type of feature on a part. This allows the CAMWorks system to automatically select the correct machining parameters for a given feature on a part, therefore dramatically reducing the input required by the end user.

CAMWorks is currently available for Milling and Turning applications. CAMWorks addresses the needs of today's sophisticated manufacturing engineers by delivering CAM solutions critical to success. OnCourse believes it's the most advanced tool available for mainstream engineers to get products to market faster, efficiently and within budget.

CAE

Micro Estimating offers estimating and process planning software for a broad spectrum of the manufacturing industries.

MACHINE SHOP ESTIMATING ("MSE")

MSE is an engineering based cost estimating system for manufacturing companies. MSE calculates machining times and total product costs according to company specific estimating procedures. The software is comprised of 72 machine tool and operation specific software modules to emulate actual machine tool and production cycles. The machine emulation modules will produce calculations within 1% of true production time. The software provides process planning, machine process layouts and comprehensive management functions. It incorporates on-line supplier links, graphical reports, and interfaces seamlessly to numerous factory management and CAD/CAM programs. MSE libraries contain over 1,150 raw materials specifications and incorporate 2 million speeds and feed tooling combinations. The typical customer is a factory owner, estimator or an engineering department in a larger facility. MSE received a 1998 Excellence in Manufacturing Technology Achievement Award as "Readers Choice for User Friendliness" in the software classification by the readers of American Machinist Magazine.

Page 4

LAYOUT PRO ("LP")

LP serves as a process planning and machine process layout system, which

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

allows users to easily calculate machining or fabrication times for product production. LP offers users the same basic functionality of the MSE product without the pricing or quoting features. The typical customer is a process planning engineer or manufacturer of metal working equipment. LP is a subset of MSE and contains no manufacturing pricing functions, and is typically purchased by machine tool builders.

FABPLAN ("FP")

FabPlan is an engineering based cost estimating system designed for manufacturers that operate fabrication equipment. FP calculates fabrication times and total product costs according to company specific estimating procedures and shop equipment by simulating actual machine tool cycles. The software facilitates process planning and machine tool process layouts, which provides calculations for fabrication times used for production. The system incorporates supplier links, provides graphical reports, and interfaces with numerous factory management and CAD/CAM programs. The typical customer is a factory owner, estimator or an engineering department in a larger facility.

AUTOTAS

Micro Estimating is the exclusive U.S. and Canadian distributor and systems integrator for AutoTAS, a software product offered by Sandvik/Coromant of Sweden. AutoTAS is a tooling management program that was previously only available in Europe. Tool management software assists companies in the control and replenishment of tooling used in the manufacturing process.

NEW PRODUCTS AND SERVICES

On behalf of the Company, Micro Estimating has begun development of a business-to-business electronic-commerce service web site called Tools4Mfg.com. The Tools4Mfg.com world-wide-web site is the cornerstone in its strategy to offer the functionality of all the Company's proprietary software products to the world-wide metal working community.

The Company anticipates that electronic-commerce, primarily the Tools4Mfg.com web site, will expand revenues in the markets of electronic-commerce and supply chain management. Supply chain management software provides a system comprised of integrated networks to facilitate managing design, procurement, planning, sales, fulfillment, and service for manufacturing and sales by providing the technologies for communicating efficiently with customers, and suppliers. This primary electronic-commerce revenue generating activity will sell tangible consumable industrial products while providing the related electronic-transaction software. Tools4Mfg.com will be an Internet-based purchasing system for use by manufacturing firms involved in producing, processing, or purchasing custom fabricated and machined products. The target market of Tools4Mfg.com is the smaller manufacturer, which represents 75% of American manufacturers. These smaller manufacturers typically have not been able to implement the expensive and labor intensive supply chain enterprise systems used by firms like the big three automotive companies, and will therefore benefit most from this type of electronic-commerce program. The Company will be positioned as an electronic middleman fulfilling orders for component parts manufacturers.

The site's overall design is substantially complete with respect to the planned layout and functionality. The actual technological feasibility of the site is approximately 15% complete based on its current capabilities. Completed development on the site consists of basic site layout, a material calculation system and the development of a tool that will allow end users the ability to define a component part to the Tools4mfg.com site and then search for contract machining suppliers based on a specific geographical location. These capabilities are currently available on a non-fee basis. It is management's belief that the Tools4Mfg.com site's functionality, when completed, will fulfill

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

the objective set forth in this segment of the Company's business strategy. Neither the Company nor Micro Estimating have begun marketing or advertising any of the functionality of this site.

The Company believes that it will offer its existing customer base the capability to obtain raw material pricing and to place orders for raw materials over the Tools4mfg.com site during the third quarter of 2001. This will be funded internally by the Company. However, there is no certainty that the Company will be able to generate any revenues from this completed phase of the web site development.

The Company expects to continue to fund the development of the site from a combination of internally generated funds and capital contributed by industry partners. The time required for completion of the site will depend upon the Company's ability to generate funds for the remainder of the project. If the Company continues to develop the site without the aid of outside funding, the Company anticipates completing the site in the third quarter of 2002. However, the time line for the completion of the project could be reduced by three to six months if additional funding is secured during the second and third quarters of 2001. To date the Company has not received any capital contributions from its industry partners. Several revenue streams are projected from Tools4Mfg.com. Revenues will be derived from sales commissions on raw materials, component parts, and industrial tooling. The Company also expects to add transaction fees, subscription fees, and online sales of manufacturing software. However, there is significant risk in that the Company may not be able to generate any revenue from this business strategy upon completion of the web site.

Page 5

According to an article in the October 5, 2000 edition of Purchasing magazine, it is estimated that the annual market for production-grade and metalworking metals is at least \$900 billion. Net penetration is estimated at less than 1/100 of 1% of the estimated \$900 billion annual global marketplace for production-grade and metalworking metals. The management of OnCourse feels that even a very small percentage of this market earned as commissions and transactions cost would generate \$90 million of material transactions in which the Company would receive commissions and transaction fees. In addition, the Company also believes it will be able to generate revenues from tooling and auction sales as well.

The Company believes that revenues and transaction fees could exceed \$25 million annually within the next five years. The following table shows the revenue stream for the \$25 million of revenues and transaction fees based on management's belief. However, there is significant risk in that the Company may not be able to generate any revenue from this business strategy upon completion of the web site.

RAW MATERIAL AND PERISHABLE TOOLING REVENUES (MILLIONS)

Revenue Source	Total Estimated Market	Tools4mfg Captures 1/100% of the Market (.001%)	Average Transaction Fee of 2.75%
Raw Materials	\$900,000	\$900.0	\$24.8
Tooling	4,000	4.0	0.6
Total	\$904,000	\$904.0	\$25.4

RESEARCH AND DEVELOPMENT

During years ended December 31, 2000 and 1999, the subsidiaries have expended

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

\$593,000 and \$17,000, respectively, for research and development activities and purchased in-process research and development expenses as part of the TekSoft acquisition. The \$593,000 of research and development expended during the year ended December 31, 2000 includes \$270,000 for the purchased in-process research and development that was written off on January 31, 2000. In addition, the subsidiaries have expended \$1,268,000 and \$114,000 for its capitalized software during the years ended December 31, 2000 and 1999, respectively. There have been no material customer sponsored research activities or expenditures.

GOVERNMENTAL REGULATION AND APPROVAL

The subsidiaries do not require governmental approval for any of its activities and has incurred no cost or expense with respect to compliance with federal, state and local environmental laws. Some of the subsidiaries' customers may incur expenses for environmental compliance, but there has been no effect of any such compliance on the subsidiaries. No single supplier or customer has a material effect in the subsidiaries' operations.

TRADITIONAL METAL WORKING MANUFACTURERS AS THE SUBSIDIARIES'S SOFTWARE MARKET

Domestic manufacturers are estimated to conduct approximately \$3.8 trillion in annual business and these manufacturers employ 17 million people. According to the National Institute of Standards (NIST), 75% of manufacturers employ 50 people or less. OnCourse subsidiaries individually have up to 19 years providing that market with software to make job shops more efficient. The information referenced below provides historical summaries of the products sold by the OnCourse subsidiaries of Micro Estimating and TekSoft:

USERS SOLD SINCE SUBSIDIARY WAS ESTABLISHED (UNAUDITED)

Subsidiary	Year Established	Users Sold
TekSoft	1981	22,000
Micro Estimating	1982	2,600

Page 6

HISTORICAL SALES BY MICRO ESTIMATING AND TEKSOFT BY YEAR (UNAUDITED)

Subsidiary/Activity	1995	1996	1997	1998	1999	2000
Micro Estimating Revenues	\$1,123,225	\$1,517,953	\$1,580,905	\$1,851,151	\$1,716,246	\$1,770,000
New Micro Estimating Users	147	220	185	215	173	173
TekSoft Revenues	\$2,774,981	\$2,668,804	\$2,862,826	\$2,859,651	\$3,157,720	\$3,400,000
New TekSoft Users	2,157	2,074	2,225	2,539	2,460	2,460
Total Revenue	\$3,898,206	\$4,186,757	\$4,443,731	\$4,710,802	\$4,873,966	\$5,170,000
Total of New Users Added	2,304	2,294	2,410	2,754	2,633	2,633

CURRENT ENVIRONMENT IN THE SUBSIDIARIES'S SOFTWARE MARKET

A dramatic shift in supply chain management is underway in which manufacturers are looking to electronic-commerce solutions for sourcing and supply. Addressing those trends, the Company is developing an Internet-based purchasing system for use by manufacturing firms involved in producing, processing, or purchasing custom fabricated and machined products. The Tools4Mfg site will be positioned

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

as an electronic middleman fulfilling orders for component parts manufacturers. This electronic-commerce system will process electronic Requests for Quotes ("RFQ") and Electronic Purchase requisitions for raw materials, component parts, and related tooling products and ultimately be paid with electronic funds transfers. Coupling this trend with use of the Internet as a software delivery and maintenance mechanism will provide new opportunities and a more efficient means for OnCourse to increase its value to customers.

THE COMPANY'S BUSINESS STRATEGY

The OnCourse strategy is to build a recognized and respected brand name as the leader in providing software and services that make component manufacturers more efficient and profitable. The Company's products, such as the award winning software systems referenced above under the ProCAM and Machine Shop Estimating ("MSE") headings, are the base of this strategy and will be built upon to create a broader position.

Existing subsidiaries' product lines have demonstrated sales growth over the last five years. When including sales activity prior to OnCourse ownership, net sales for Micro Estimating's products and services has grown from \$1.12 million for the year ended December 31, 1995 to pre-consolidated net sales of \$1.77 million for the year ended December 31, 2000. When including sales activity prior to OnCourse ownership, net sales for TekSoft's products and services has grown from \$2.77 million for the year ended December 31, 1995 to pre-consolidated net sales of \$3.40 million for the year ended December 31, 2000. The Company believes that product sales and services will easily exceed the sales growth in terms of dollars and percentage increases that were realized over the previous five years.

In concert with OnCourse products is an electronic-commerce strategy. OnCourse is creating a business-to-business electronic-commerce site for the metals working industry to purchase products, services, and trade.

OnCourse will use the Internet as a key part of this strategy to deliver software, provide applications while providing a focused trading site to build a loyal customer base. Integrating OnCourse applications with the OnCourse Internet site will lead users to take advantage of the business-to-business electronic-commerce site. Four core internet concepts will be used:

o INTEGRATING APPLICATIONS WITH ONCOURSE PORTAL

OnCourse's subsidiaries products will have seamless interfaces to the web portal. One of the first integrations to be done will be with Micro Estimating's software. The MSE and FabPlan software can, via modem, dial out to a supplier of raw materials, access their database and receive current raw material pricing. The web portal is designed to perform this access via the Internet, access a supplier's database, and return current raw material pricing. When possible all OnCourse products will integrate with those areas of the portal that perform similar or complimentary tasks.

o DRAW CUSTOMERS WITH CONTENT

OnCourse will draw customers with content by offering current industrial news pertaining to the metal working industries, and by providing user forums to exchange manufacturing ideas and problems, post questions, create topics, check employment listings and find ideas for innovations and improvements. There also will be several databases developed by OnCourse allowing easy calculations and allowing the look up of common metal working information. Customers will also

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

be given the technology to easily exchange or share drawings and relevant manufacturing files. Customers will also be given the opportunity to create and use individual mailboxes and filing systems to organize any communications and file exchanges done through the site.

o VALUE ADDED TRADING SITE

The proposed value added functionality at the OnCourse portal, Tools4Mfg.com, is in several areas. There will be an online area for shopping for industry leading software and finding information about software companies serving the metal working industry. Online calculators will be provided that run in an internet browser that will simplify some routines and time consuming manufacturing calculations. Online databases will allow the look up of common metal working information. There will be an online auction for selling and buying both new and used manufacturing items. Customers will be able to shop online for the best prices and delivery from several raw material suppliers in real time. A facilities locator named The Machine Shop Selector allows for detailed and specific production facilities searches both geographically and by specific production capabilities and provides the communication technologies to contact multiple manufacturers for pricing or information. Manufacturer of custom components will have the ability to receive Requests for Quotations (RFQ's) pre-defined that match their capabilities and preferred type of work and online forums will allow the exchange of manufacturing ideas and problems.

RISK FACTORS THAT MAY IMPACT THE SHAREHOLDERS INVESTMENT

Shareholders of the Company should be aware that the ownership of the Company's shares involves certain investment considerations and risk factors, including those described below and elsewhere in this annual report, which could adversely affect the value of their holdings. Neither the Company nor any other person is authorized to make any representations as to the future market value of the Company's stock.

Any Forward-looking statements contained in this annual report should not be relied upon as predictions of future events. Such statements are necessarily dependent on assumptions, data or methods that may be incorrect or imprecise and that may be incapable of being realized. Investors are hereby notified that such information reflects the opinions of Company management as to the future. Investors should use their own judgment as to the significance of this information to their individual investment decisions.

Investment in the Company's Common Stock must be considered speculative due to a number of risk factors including, but not limited to, the limited history of trading in the Company's Common Stock in any Public Market.

CONTROL BY THE MANAGEMENT MIGHT LIMIT INDEPENDENT, PUBLIC SHAREHOLDER INFLUENCE

The Chief Executive Officer and the President of the Company beneficially own approximately 60% of the outstanding common stock of the Company. The remaining directors and other executive officers own approximately 32% of the outstanding common stock of the Company. Accordingly, the Chief Executive Officer and President together, or along with the Board of Directors and other executive officers, will exercise control over the Company, including control over the election of directors, the appointment of officers, and the business policies, investments and future acquisitions, if any, of the Company. Public shareholders' interests may not be fully represented alongside the differing interests of management shareholders, if any. The large percentage of shares owned by these persons will have a limiting effect on the number of shares available for trading in the secondary market, which could have an adverse effect on price and liquidity.

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

ABSENCE OF NECESSARY FINANCING COULD DISRUPT OPERATIONS, PRODUCT DEVELOPMENT, GROWTH PLANS

The Company intends to obtain the necessary interim and long-term financing necessary to continue operations, to fund present and future product development, and to maintain the competitive position of its software products in their manufacturing markets. There is no guarantee that the Company will have the financial ability to meet all of those goals. The Company expects to raise additional capital from time to time by private placements of the Company's securities and capital contributed by industry partners. To date the Company has not received any capital contributions from its industry partners. There can be no assurances that there will be any market for the Company's securities or that sufficient capital can be raised by any such private placements. If capital is not available, it may not be possible for the subsidiaries to develop new products, to grow existing product revenues or to operate profitably in any market. In such event, shareholders could lose their entire investment. See "MANAGEMENT'S DISCUSSION AND ANALYSIS AND RESULTS OF OPERATIONS - Liquidity and Capital Resources".

ANTICIPATED REVENUES FROM PURCHASED IN-PROCESS RESEARCH & DEVELOPMENT MAY NOT BE REALIZED

The Company acquired \$270,000 of CAMWorks in-process research and development as part of the TekSoft acquisition on January 31, 2000. It is possible that the Company may not complete the development related to the CAMWorks project ahead of its competition or before technology changes in the market place that may render the technology obsolete. As a result, the Company may not realize the expected revenues that management believes will result from this acquired in-process technology.

Page 8

COMPETITORS'S STRENGTHS COULD FORCE PRICE REDUCTIONS, DAMAGE PROFIT PROSPECTS

The markets for the subsidiaries' products are intensely competitive. The CAM industry for example has more than 200 competitors in which TekSoft is referenced as one of the top five worldwide software providers according to the above-mentioned CIMdata research. The estimating products offered by Micro Estimating have a dramatically different number of competitors. There is only one other competitor in the estimating field and that is Manufacturers Technologies, Inc. Limited information is available on this company as they are a privately held organization. Many of the subsidiaries' present or prospective competitors have or may have substantially greater financial, technical, marketing and sales resources than the Company. There can be no assurance that the subsidiaries will be able to compete effectively in the future. If the subsidiaries are unable to compete effectively, shareholders could have a lower return on their investment or lose their entire investment.

LIMITED PRIOR PUBLIC MARKET AND RESTRICTION ON FREE SALE OF STOCK MAY ADVERSELY AFFECT STOCK VALUE AND LIQUIDITY

There is presently a limited public market for the Company's common stock and there can be no assurance that an active market will develop. The prices at which the shares trade will be determined by the market place and could be subject to significant fluctuations in response to many factors, including, among others, variations in the Company's quarterly operating results, changing economic conditions in the industries in which the subsidiaries participate, and changes in government regulations. In addition, the general stock market has in recent years experienced significant price fluctuations, often unrelated to the operating performance of the specific companies whose stock is traded. Market fluctuations, as well as economic conditions, may adversely affect the market price of the Company common stock. In the event of declining stock values and

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

diminished liquidity, shareholders could lose their entire investment. See "MARKET FOR COMMON EQUITY AND RELATED SHAREHOLDER MATTERS."

DEPENDENCE ON OPERATING ENVIRONMENTS IMPOSES OBSOLESCENCE, DIMINISHED REVENUES AND PROFIT EXPOSURES

The subsidiaries' software is designed for use with computers running in the Microsoft Windows™ and Windows NT™ operating environments. The successful introduction of new operating systems or significant changes in existing operating systems could adversely affect the Company's operating results. Failure by the subsidiaries to develop new products for any such changed operating environments could result in the Company's inability to maintain sufficient margins in which to continue its business.

RAPID TECHNOLOGICAL CHANGE EXPOSES SUBSIDIARIES TO COMPETITIVE DISADVANTAGES, REDUCTIONS IN SALES, PROFITS, GROWTH RATES, MARKET ACCEPTANCE

The market for the subsidiaries' products is characterized by rapid technological advances, evolving industry standards, changes in end-user requirements and frequent new product introductions and enhancements. The introduction of hardware or software products embodying new technologies and the emergence of new standards could have an adverse effect on the subsidiaries' present products or any products under development. For instance, the Company believes that TekSoft's CAMWorks product is an example of rapid technological change. The CAMWorks product in the last two to three years has changed the way CAM is being done in the manufacturing community. CAMWorks' ability to analyze a solid model and generate machine code to produce the piece part automatically will change the way parts will be manufactured in the future. The subsidiaries' future success will depend upon its ability to enhance its present products as well as introduce new products that are responsive to technological developments and end-user requirements and development market appeal. Any failure by the subsidiaries to develop new products and enhancements in a timely manner will have an adverse effect on the results of the Company's operations and could result in the Company's failure and the loss of shareholders' investment.

ABSENCE OF A MARKET FOR THE COMPANY'S ELECTRONIC-COMMERCE PRODUCTS INCREASES RISKS OF LOSS ON INVESTMENT, FAILURE TO ACHIEVE GROWTH TARGETS, DIFFICULTING IN MEETING DEBT SERVICE REQUIREMENTS, DIMINISHED INVESTOR CONFIDENCE

A market for the Company's electronic-commerce and other business-to-business products may not develop. If a significant market for internet-based electronic-commerce and business-to-business products does not develop, the Company's business may not grow according to the Company's expectations and shareholder's prospects for capital gain will be diminished.

COMPETITIVE PRICING PRESSURES MAY INCREASE THE RISK OF LOSS OF INVESTMENT

Competitive pricing pressures might bring about a reduction in the average price of the subsidiaries' products, resulting in a decrease in revenues and gross margins. Changes in product mix and other factors might also influence prices. If price reductions occur, the Company's revenues will decline unless it is able to offset these decreases by increasing its sales volumes. In addition, in order to maintain its gross margins, the subsidiaries must develop and introduce new products and product enhancements, and it must continue to reduce the development and distribution costs of its products. There is no assurance that the Company will succeed in implementing corrective action if any of these declines occur. Failure by the subsidiaries to

implement successful pricing strategies and/or to develop new products to meet these competitive pressures and/or to increase unit volumes could result in the

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

Company's failure and the loss of shareholder's investment.

NEW PRODUCTS MAY CONTAIN UNDETECTED HARDWARE AND SOFTWARE ERRORS, INCREASE RISK OF LOSS OF INVESTMENT

New products the subsidiaries develop may contain undetected hardware and software errors, which could require significant expenditures of time and money to correct, harm its relationships with existing customers and negatively impact its reputation in the industry. In addition, the subsidiaries' products are combined with products from other vendors. If such problems occur, it may be difficult to identify the source of the problem. If such problems should occur, and if the Company is unable to rapidly correct any such problems, there may be consequences such as:

- o Delay or loss of market acceptance of the subsidiaries' products
- o Significant warranty or other liability claims
- o Diversion of engineering and other resources from product development efforts
- o Significant customer relations problems
- o Loss of credibility in the market
- o Inability to sell its products until any errors are corrected

Any one or any combination of these consequences could result in a significant loss in value of shareholders' investment.

QUARTERLY FLUCTUATIONS MAY PLACE ADDITIONAL BURDEN ON WORKING CAPITAL, NEED FOR ADDITIONAL INVESTMENT

Management believes that OnCourse's sales will fluctuate based on the manufacturing communities purchasing trends. The Company's quarterly revenues and operating results have varied significantly in the past and are likely to vary significantly in the future. For example using an average of the last six years sales activity, Micro Estimating's sales on a quarterly basis has ranged from approximately 19% of annual sales to as high as 30% of annual sales. TekSoft's average quarterly sales for the same six-year period have fluctuated from approximately 23% of annual sales to 27% of annual sales. A typical sales pattern will start the year with new budget spending through the first four months. Then there will be a three-month slowdown during the summer months, which reflects reduced production and plant shutdowns. This is then followed by an increase in sales volume through the end of the year as companies complete their fiscal years, typically spending remaining budgetary monies and in some cases, based on taxation issues, purchase smaller capital expenditures to reduce tax liabilities. Other factors that may affect quarterly results include the following:

- o The overall strength of the economy, timing, size and terms of customer orders
- o Changes in customer buying patterns
- o Uncertainties associated with the introduction of any new product or product enhancement
- o The timing of the announcement and introduction of new products by the subsidiaries or its competitors
- o The mix of products sold and the mix of distribution channels through which products are sold
- o Deferrals of customer orders in anticipation of new products, services or product enhancement introduced by the Company or its competitors
- o Technological developments affecting the electronic-commerce, business-to-business, and manufacturing software markets

Any failure by the Company to obtain sufficient lines of credit to support these quarterly fluctuations, if any, could result in a decline in profitability and a loss of shareholder value.

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

MANAGEMENT OF FUTURE ACQUISITIONS AND GROWTH WILL REQUIRE ADDITIONAL INVESTMENT, MAY EXCEED COMPANY'S ABILITY TO MANAGE THIS GROWTH

The Company has embarked upon an ambitious growth plan including the acquisition of one or more businesses and the accumulation of capital to finance existing and acquired businesses. It will be necessary for the subsidiaries to attract, hire and maintain new employees at many levels, including senior management in order to achieve and support growth. The Company expects to include the public market for its securities as a basis for the development of key employee incentive compensation, savings, investment and retirement plans. There can be no assurance that the Company will be successful in any of these efforts, the failure of which could result in slower growth, a decline in profitability and a loss of shareholder value. See "MARKET FOR COMMON EQUITY AND RELATED SHAREHOLDER MATTERS."

LOSS OF KEY PERSONNEL OR INABILITY TO HIRE ADDITIONAL QUALIFIED PERSONNEL MIGHT RESULT IN FAILURE OF THE COMPANY TO IMPLEMENT ITS PLANS

Loss of the services of key management employees or inability to attract and retain qualified personnel or delays in hiring required personnel, particularly programmers and sales personnel, could delay the development and introduction of, and

Page 10

negatively impact the subsidiaries' ability to sell its products. In addition to key management personnel, the Company's success depends on its ability to attract and retain highly skilled technical, managerial, marketing and other personnel. Competition for these personnel is intense. In recent years, there has been a strong demand for qualified skilled and unskilled employees in the Wisconsin, Minnesota and Arizona areas, where the subsidiaries' main operations are located, and in other areas where it operates. There is a risk that it will be unsuccessful in attracting and retaining the personnel it needs for its business. Failure to attract and retain such personnel could result in a decline in the Company's revenues and profits and a loss of investment by shareholders.

RELIANCE ON CONTRACT PROGRAMMERS FOR DEVELOPMENT OF SUBSIDIARIES' SOFTWARE PRODUCTS

The subsidiaries use domestic and foreign contract programmers to program its software products. Competition for these resources may cause a shortage of contract programmers or increase the cost of these services to the point where the Company's profitability declines. This decline in profitability could slow product development efforts which in turn could prevent the subsidiaries from being competitive in its markets.

RELIANCE ON DISTRIBUTION CHANNEL INCREASES EXPOSURE FROM COMPETITORS STRENGTHS, COMPANY'S FINANCIAL CONSTRAINTS

The Company relies on direct sales and independent distributors to sell its products. For the years ended December 31, 2000 and 1999, 55% and 34%, respectively, of the Company's total revenues were generated by its independent distributors when excluding sales of subsidiaries that were previously independent distributors. Distributors also represent other products that may either complement or compete directly with those of the subsidiaries. Independent choices by distributors concerning which products receive their principal attention, the development of new or enhanced products by competitors, the subsidiaries' relative ability to compete effectively with others in time-to-market comparisons and a large number of factors under the control of competitors and independent distributors may adversely effect the Company's

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

future operating results. Failure to attract and retain good distributors and/or to implement more direct marketing efforts could result in a decline in the Company's revenues and profits and a loss of investment by shareholders.

ASSET ENCUMBRANCES, OPERATING LOSSES, CONTINGENT STOCK ISSUANCES MIGHT INCREASE SHAREHOLDER DILUTION WHILE VALUES COULD DECLINE

Substantially all of the Company's assets are pledged to secure bank indebtedness subject to compliance with certain financial ratio tests. The Company's earned surplus deficit and continuing operating losses might reduce the availability of such credit facilities in the future under those ratio tests. At the same time, revenue and net income increases, if any, will obligate the Company to issue additional shares under acquisition agreements. Taken as a whole, these factors increase the risk of dilution in shareholder value and impose a risk of complete loss of shareholder value unless those trends are reversed or offset by the infusion of new capital.

COMPANY'S BANK INDEBTEDNESS HAS FLOATING INTEREST RATES

The Company's existing line of credit facility has interest rate pricing that fluctuates with changes in the bank's prime rate. Significant increases in the bank's prime interest rate could reduce the Company's operating profits. A reduction in profitability will make it more difficult to implement the Company's growth plans and to develop the products necessary to remain competitive.

YEAR 2000 COMPLIANCE

During 1999 the Company had analyzed the Year 2000 readiness issues related to its business systems. All systems critical to managing the business were Year 2000 compliant. As of the date of this annual report, the Company has not experienced any problems with Year 2000 Compliance.

FORWARD-LOOKING STATEMENTS

This annual report of OnCourse Technologies, Inc. includes forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 (the "1934 Act"). These statements are based on management's beliefs and assumptions, and on information currently available to management. Forward-looking statements include statements in which words such as "expect," "anticipate," "intend," "plan," "believe," "estimate," "consider," or similar expressions are used.

Forward-looking statements are not guarantees of future performance. They involve risks, uncertainties and assumptions. The Company's future results and stockholder values may differ materially from those expressed in these forward-looking statements. Many of the factors that will determine these results and values are beyond the Company's ability to control or predict. For these statements, the Company claims the protection of the safe harbor for forward-looking statements contained in Section 21E of the 1934 Act. This protection does not apply to statements made in an initial public offering.

Page 11

REPORTS TO SECURITY HOLDERS

The Company intends to provide all of its shareholders with an annual report of the Company's operations including comparative audited financial statements for the years ended December 31, 2000 and 1999.

The public may read and copy any materials that the Company has on file with the Securities and Exchange Commission ("SEC") at the SEC's Public Reference Room at

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

450 Fifth Street, NW, Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at (800) SEC-0330. The SEC maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The SEC's Internet site address is <http://www.sec.gov>.

The Company's Internet site address is <http://www.oncoursetechnologies.com>.

ITEM 2. DESCRIPTION OF PROPERTY

All of the operations of the Company and its subsidiaries are conducted from office space leased from non-related party landlords except as noted for TekSoft. TekSoft leases office space with a related party that is renewable in five-year increments for a period of twenty-five years. TekSoft subleases a significant portion of this related party lease as office space to other tenants. See "CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS."

The following table sets forth information concerning the operating facilities:

TENANT	SIZE IN SQUARE FEET	LEASE EXPIRES	MONTHLY RENT AS OF JANUARY 1, 2001
OnCourse Technologies, Inc./ Micro Estimating Systems, Inc. 3106 South 166th Street New Berlin, WI 53151	4,672	11/30/2002	\$3,335
CAM Solutions, Inc. (1) 1631 East 79th Street Suite 134 Bloomington, MN 55425	1,122	1/31/2003	\$1,311
CAM Solutions, Inc. (2) 2121 W. Army Trail Road Suite 102 Addison, IL 60101	413	7/16/2001	\$548
Cimtronics, Inc. 7434 East Stetson Drive Suite C-165 Scottsdale, AZ 85251	1,550	8/31/2004	\$2,196
TekSoft, Inc. 16121 North 78th Street Scottsdale, AZ 85260	8,800	7/14/2003	\$20,570

ITEM 3. LEGAL PROCEEDINGS

Neither the Company nor any of its subsidiaries are involved in any legal proceedings the resolution of which would have a material adverse effect on the business or financial condition of the Company.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted during the fourth quarter of the fiscal year covered by this report to a vote of security holders, through the solicitation of proxies or otherwise.

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

Page 12

PART II

ITEM 5. MARKET FOR COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

The Company's Common Stock, at the time of this filing, is traded only in the environment of the Pink Sheets under the OCTH symbol and has very limited trading volume or activity. The following table sets forth, for the fiscal quarters indicated and available, the high and low bid prices for the Company's Common Stock as reported by the Company's market maker. The quotations reflect inter-dealer prices without retail mark-up, markdown or commission, and may not represent actual transactions. The prices are adjusted for the 1 for 2 reverse stock split effective October 31, 1999. The Company intends to apply to have the Common Stock traded on the OTC Bulletin Board immediately upon the effectiveness of the 10-SB registration statement filed October 23, 2000, 10-SB Amendment No. 1 filed December 29, 2000, and 10-SB Amendment No. 2 filed March 6, 2001. No assurance can be given that such application will be approved and, if approved, that an active trading market for the Common Stock will be established or maintained.

	High	Low
	----	---
Year Ended December 31, 2000		
First Quarter	\$6.00	\$4.50
Second Quarter	6.00	2.25
Third Quarter	4.00	0.25
Fourth Quarter	1.75	0.60
Year Ended December 31, 1999		
July 2, 1999 (First Price Available)	\$5.50	\$5.50
Third Quarter	6.00	0.50
Fourth Quarter	6.00	0.50

None of the holders of any shares of Common Stock of the Company are entitled to any registration rights.

The Company has not paid any dividends on its Common Stock and intends to retain all earnings for use in its operations and to finance the development and the expansion of its business. It does not anticipate paying any dividends on the Common Stock in the foreseeable future. The payment of dividends is within the discretion of the Company's Board of Directors. Any future decision with respect to dividends will depend on future earnings, future capital needs and the Company's operation and financial condition, among other factors.

As of December 31, 2000, there were approximately 540 holders of record of the Company's common stock.

During the year ended December 31, 2000, the Company offered and issued on various dates 118,250 Units at a price of \$2.00 per unit and 10,000 Units at a

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

price of \$1.00 per unit. The units include one share of Company common stock and one Company Class A common stock purchase warrant expiring three years from the unit purchase date and one Company Class B common stock purchase warrant expiring five years from the unit purchase date. These units were issued and sold in a private placement to selected individuals deemed financially capable of making the investment. During the year ended December 31, 2000, the Company also offered and issued on various dates 13,484 Units at a price of \$2.00 per unit for services performed. The units were issued without registration under 1933 Act pursuant to the provisions of Section 505 of Regulation D promulgated by the SEC and appropriate filings with regulatory agencies of the states where the units were offered. All of the 349,878 combined Class A and Class B common stock purchase warrants sold during the years ended December 31, 2000 and 1999 are outstanding as of December 31, 2000.

On January 31, 2000, the Company acquired all of the stock of TekSoft, Inc., in exchange for 4,500,060 shares of Company common stock plus the contingent right to receive 1,500,000 additional shares during the next five years if certain revenue growth is achieved from TekSoft's CAM products. See "CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS". See Exhibit No. 8(d) "Agreement and Plan of Reorganization dated January 10, 2000 by and among the Company, TekSoft, and Gary F. Fulton" for details of this agreement. These shares were issued without registration under the 1933 Act pursuant to the exemption provided by Section 4(2) of that Act exempting transactions not involving a public offering. These sales were limited to a few persons who owned all the stock of the acquired companies. No brokers or dealers were involved.

In January 2000, the Company offered and issued 19,500 shares of Company common stock to the employees of TekSoft, Inc. as an incentive to continue employment following the Company's acquisition of TekSoft.

During the year ended December 31, 2000, 1,071 of the 400,000 Redeemable Common Stock Purchase Warrants issued in 1998 were exercised for a total consideration of \$1,607.

Page 13

In May 2000, the Company entered into a twelve-month contract with an unrelated professional services firm. The Company issued 300,000 shares of common stock at a value of \$2.00 per share for financial public relations and acquisition analysis services. Subsequent to December 31, 2000, the contract was extended to February 19, 2001 with no additional consideration given.

During the year ended December 31, 2000, the Company offered and issued 2,500 shares of Company common stock as payment for \$5,000 of outside programming services performed. The market price of the Company common stock was \$1.01 on the date of issuance.

During the year ended December 31, 2000, the Company offered and issued 5,000 shares of Company common stock to an employee as a hiring incentive. The market price of the Company common stock was \$1.50 on the date of issuance. In addition, the Company also awarded another employee 20,000 shares as part of that employee's compensation package at a value of \$2.00 per share.

All of the share certificates issued in the above-described transactions carry restrictive legends and are subject to stop transfer orders. Generally, securities issued without registration under the 1933 Act are restricted and therefore subject to limitations on the ability of the holder to resell. Restricted shares may be sold only upon registration under the 1933 Act, pursuant to the provisions of Rule 144 or under some other exemption.

In general, under Rule 144, a person (or persons) whose shares are aggregated who has beneficially owned his or her restricted shares for at least one year,

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

including persons who may be deemed "affiliates" of the Company, as that term is defined under the 1933 Act, would be entitled to sell within any three month period a number of shares that does not exceed the greater of 1% of the then outstanding shares of the Company's Common Stock or the average weekly trading volume in the over the counter market during the four calendar weeks preceding such sale. The sales also would be subject to the requirement that there be current information publicly available and that the issuer has filed all required reports under the 1934 Act. As a reporting company when the Company's 10-SB registration statement dated October 31, 2000, 10-SB Amendment No. 1 filed December 29, 2000, and 10-SB Amendment No. 2 dated March 6, 2001 becomes effective, the Company will satisfy this requirement. Equivalent information may be available through other sources (annual reports and press releases) prior to the time the Company's securities are registered. The sales must also be broker sales when the broker simply executes a sale, does not solicit offers to purchase and receives no more than the normal commission. In addition, a person who is deemed not to have been an affiliate of the Company at any time during the 90 days preceding a sale by such person, and who has owned his or her restricted shares for at least two years, would be entitled to sell such shares under Rule 144 at any time without regard to the volume limitations and availability of public information.

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

OVERVIEW

The following discussion and analysis should be read in conjunction with the Company's Consolidated Financial Statements and notes, thereto and the other financial information appearing elsewhere in this filing. In addition to historical information, the following discussion and other parts of this filing contain forward-looking information that involves risks and uncertainties. The Company's actual results could differ materially from those anticipated by such forward-looking information due to competitive factors, risks associated with the Company's expansion plans and other factors discussed herein.

Since the Company's incorporation on May 28, 1998, the Company's goal has been to become the collaborative business partner for the metal working industry by providing technology products and services that improve the profitability and efficiency of metal component manufacturers. This goal is carried out under three objectives consisting of: acquiring specific other businesses; developing Internet based, business-to-business electronic-commerce sites for use in the procurement of customer components, raw materials, and tooling for the metalworking industries; and raising capital and maximizing shareholder value. The Company is on course relative to these objectives by executing strategies that focus on a balance of three priorities: growth, profitability and liquidity.

During the years ended December 31, 2000 and 1999, the Company acquired three companies: TekSoft on January 31, 2000; Cimtronics on October 1, 1999; and CAM Solutions on January 1, 1999. Each of these acquisitions has moved the Company closer to its goal of becoming a business partner for the metal working industry. These acquisitions also helped complement its existing product offerings as well as broaden the base necessary for implementing its Internet strategy utilizing a business-to-business electronic-commerce site. The Company, through its Micro Estimating subsidiary, also forged an exclusive arrangement to be the U.S. and Canadian distributor and systems integrator for a tool management system offered by one of Europe's largest tooling manufacturers that enables companies to increase machine up-time and reduce inventory.

In addition to the above acquisitions, the subsidiaries have devoted significant management time and resources to upgrading its computer-aided-manufacturing and computer-aided-engineering products and developing its business-to-business electronic-commerce site. During the year ended December 31, 2000, the Company

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

invested over 35% of net sales or \$1,861,000 in the forms of capitalized software and purchased in-process and internally developed research and development activities. This is a

Page 14

significant increase over the approximate 5% of net sales that the Company invested during the year ended December 31, 1999. The percentage increase can be largely attributed to the \$1,752,000 investment level in internally developed research and development, purchased research and development, and capitalized software expenditures of \$323,000, \$270,000, and \$1,159,000, respectively, made by TekSoft since it was acquired on January 31, 2000.

The Company acquired both developed and in-process technologies as part of the TekSoft acquisition on January 31, 2000. An appraisal was performed on the TekSoft computer-aided-design and computer-aided-manufacturing software product lines: ProCAM 2000, CAMWorks 99 and CAMWorks 2000. The developed technology was valued at \$4,300,000. This was comprised of \$3,150,000 for the current completed ProCAM 2000 software and \$1,150,000 for the CAMWorks 1999 software. An estimated useful life of five years was determined to be reasonable for the TekSoft's developed technologies.

Generally, in-process research and development is distinguished from developed technology based upon whether "technological feasibility" has been achieved. The technological feasibility of a product is established when the enterprise has completed all planning, designing, testing, and sampling activities that are necessary to establish that the product can be produced to meet its design specifications including functions, applications, and technical performance requirements. The in-process technology was determined to be \$270,000 for the CAMWorks software. For approximately five months prior to the valuation date, the engineering staff had begun the work on the release of version CAMWorks 2000. At the date of acquisition, the release had not yet reached the beta stage.

At the date of acquisition, TekSoft planned the release of a new version of the CAMWorks software for May of 2000. Very little of the code base, comprising the existing basic infrastructure, would be rewritten for this release or for the next several releases. The next release is scheduled for early 2001. The 2001 release will be added to the then existing core code and, based on the historical pattern, will add an estimated 20% in features and functionality to the base. The CAMWorks 2000 project will include 90 or more enhancements.

The significant acquisition and product development activity during the years ended December 31, 2000 and 1999 generated significant changes in the results of operations when comparing the years ended December 31, 2000 and 1999.

RESULTS OF OPERATIONS

YEARS ENDED DECEMBER 31, 2000 AND 1999

The Company continued to focus on product development and sales growth during the year ended December 31, 2000. The two acquisitions made on October 1, 1999 (Cimtronics) and January 31, 2000 (TekSoft) helped to increase net sales by \$2,765,000 to \$5,248,000 for the year ended December 31, 2000 from \$2,483,000 for the same period in 1999. This represents an increase of 111%. In addition, the Company's deferred revenue of \$1,624,000 as of December 31, 2000 reflects an increase of \$668,000 over the combination of the deferred revenues of \$462,000 for OnCourse as of December 31, 1999 and the inclusion of TekSoft's \$494,000 deferred revenue as of January 31, 2000.

Cost of goods sold was \$1,699,000 or 32% of net sales for the year ended December 31, 2000 as compared to the \$636,000 or 26% of net sales for the year

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

ended December 31, 1999. The increase in cost of goods sold is largely related to the increased sales generated from the Cimtronics acquisition on October 1, 1999 and the TekSoft acquisition on January 31, 2000. The Company's gross margin as a percentage of net sales declined from the gross margin percentage for the year ending December 31, 1999 largely due to the acquisitions of TekSoft, and Cimtronics. TekSoft contributed to the decrease because of its significant capitalized software amortization. Cimtronics, which as a distributor has lower gross margins, had a full year of activity for the year ended December 31, 2000 as compared to only one quarter of activity in 1999.

Selling expenses increased to \$2,494,000 or 48% of net sales for the year ended December 31, 2000 as compared to the \$1,110,000 or 45% of net sales for the year ended December 31, 1999. The increase is largely related to the additional selling expenses for the Cimtronics and TekSoft businesses acquired. Total advertising expenses were \$342,000 for the year ended December 31, 2000 as compared to \$123,000 in 1999.

Total research and development expense was \$593,000 and \$17,000 for years ended December 31, 2000 and 1999, respectively. The increase is attributed to the research and development activities of TekSoft. Included in the \$593,000 was \$270,000 of purchased in-process research and development as part of the TekSoft acquisition. This non-recurring amount was written off immediately in accordance with APB No. 16, "Accounting for Business Combinations."

Goodwill and other intangible amortization were \$1,092,000 and \$26,000 for the years ended December 31, 2000 and 1999, respectively. The largest factor in the increase related to the TekSoft acquisition, which contributed to \$862,000 of the goodwill and \$141,000 of other intangible amortization for the year ended December 31, 2000. Other intangible amortization was comprised of amortization of the assembled workforce, trade names and distribution network intangible assets. The amortization of the Cimtronics goodwill also contributed to the increase as the year ended December 31, 2000 had a full year of amortization expense totaling \$84,000 compared to only one quarter of expense of \$21,000 for 1999.

Page 15

General and administrative expense increased to \$2,143,000 or 41% of net sales for the year ended December 31, 2000 compared to the \$928,000 or 37% of net sales for the year ended December 31, 1999. The increase can be mostly attributed to the general and administrative expenses of the Cimtronics and TekSoft businesses since acquisition. Also contributing to the increase is the addition of the Chief Financial Officer position and the legal and professional expenses incurred to manage the Company's acquisitions and the preparation and filing of the Company's 10-SB registration statement.

Operating expenses including purchased in-process research and development and goodwill and other intangible asset amortization, were \$6,322,000 for the year ended December 31, 2000 as compared to \$2,081,000 for the year ended December 31, 1999.

Interest expense increased from \$31,000 in 1999 to \$105,000 for the year ended December 31, 2000. This increase is attributed to the loans acquired in the TekSoft acquisition, rising interest rates during 2000 as well as an increase in additional borrowings to finance the Company's research and development and software development activities. This resulted in a pre-tax loss of \$2,879,000 for the year ended December 31, 2000 as compared to the \$265,000 pre-tax loss in 1999.

The net loss after tax benefits was \$2,312,000 and \$170,000 for the years ended December 31, 2000 and 1999, respectively.

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

LIQUIDITY AND CAPITAL RESOURCES

OnCourse has incurred losses over the last two years and has negative working capital. Based upon its current plans, the Company believes it has sufficient funds and borrowing availability to meet its operating expenses and capital requirements through fiscal year 2001 and into fiscal year 2002. However, the Company intends to seek such additional funding from equity offerings to existing shareholders or other third parties during 2001. There is no assurance that such additional funds will be available on acceptable terms, if at all. Should the plans contemplated by management not be consummated, the Company may have to seek alternative sources of capital, affect borrowing under its line of credit or reevaluate its operating plans.

The Company's cash position as of December 31, 2000 was approximately \$200,000 as compared to \$92,000 as of December 31, 1999. During the year ended December 31, 2000, net cash provided by operating activities was \$915,000 versus \$88,000 for the year ended December 31, 1999.

The Company's working capital as of December 31, 2000 was a negative \$971,000 as compared to the negative working capital of \$393,000 as of December 31, 1999. The \$578,000 decrease in working capital over the December 31, 1999 balance is largely attributed to increased deferred revenues, which increased from the \$462,000 balance as of December 31, 1999 to the \$1,624,000 balance as of December 31, 2000. Offsetting the deferred revenue increase were increases in accounts payable and accrued liabilities, which increased to \$1,031,000 as of December 31, 2000 from the \$394,000 as of December 31, 1999.

On October 9, 2000, the Company consolidated its bank debt by replacing the Micro Estimating and TekSoft lines of credit and substantially all of the existing bank term debt. The new debt facility consists of a \$400,000 term loan due on October 1, 2005 and a \$1,100,000 three-year revolving line of credit agreement due October 9, 2003, and as such, the term debt and revolving line of credit facilities are classified as long-term debt. The revolving line of credit is limited to a borrowing base calculated as a specified percentage of qualifying accounts receivable, property, plant and equipment and net capitalized software. The interest rate for the term loan and revolving line of credit is 9.25% and prime (9.5% at December 31, 2000), respectively. The new debt facility is secured by all of the assets of the Company and its subsidiaries. Management believes that the new debt facility will support its working capital needs throughout 2001.

In addition to the above mentioned lines of credit and term debt as of December 31, 2000, the Company has several notes payable due to current and former shareholders and employees of the Company and its subsidiaries totaling \$161,000 with a current portion of \$155,000 as of December 31, 2000. These notes have interest rates that range from 7% to 16.5%. The principal and interest payment structures vary for these notes. Please refer to the accompanying consolidated financial statements and footnotes for details.

Shareholder's Equity increased to \$10,742,000 as of December 31, 2000 compared to \$476,000 as of December 31, 1999. The increase in Shareholder's Equity since December 31, 1999 is attributed to the acquisition of TekSoft for \$11,650,000, which includes \$895,000 of contingent shares earned during the year ended December 31, 2000, the \$203,000 of additional proceeds from the sale of common stock, \$629,000 of common stock issued for services, and \$94,000 of common stock issued for employee compensation. Offsetting these increases for the year ending December 31, 2000 was the \$2,312,000 loss incurred for the year ended December 31, 2000.

In addition, the Company recorded a \$273,000 reduction to retained earnings with an offsetting increase to additional paid-in capital to reflect the accounting treatment for extending the expiration date of the 1998 warrants from March 31,

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

2000 to September 30, 2000. The same warrants were further extended to June 30, 2001 on September 12, 2000. Generally accepted accounting principles required that the warrants be classified as equity and accreted to the estimated redemption value based on the terms of the warrants. At the time of original issuance the warrants were not assigned an initial value or any accretion as their estimated fair market value approximated zero.

Page 16

The extension resulted in a new measurement date and the incremental value of the warrants was accounted for as a dividend to the shareholders. The value of the remeasured warrants was determined using the Black-Scholes pricing model.

The Company invested \$1,268,000 in capitalized software for the year ended December 31, 2000. This compares to \$114,000 for the year ended December 31, 1999. The significant investment during the year ended December 31, 2000 can be mostly attributed to feature enhancements to TekSoft's computer-aided-manufacturing software. The Company also made expenditures for plant and equipment and other assets during the year ended December 31, 2000 of \$138,000 and \$141,000, respectively, compared to the \$81,000 and \$2,000 for the year ended December 31, 1999. The increase in other assets is largely related to license fees for third-party technology used in TekSoft's CAM software products.

The Company intends on financing future expenditures for property and equipment, capitalized software and sales growth using internally generated cash flows from operations. The Company has approximately \$312,000 available as of December 31, 2000 under its revolving line of credit facility. Additional sales of common stock, if any, through private placement activities will help supplement internally generated cash flows in meeting its operating and growth needs.

ITEM 7. FINANCIAL STATEMENTS

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

To the Board of Directors and Shareholders of
OnCourse Technologies, Inc.:

We have audited the accompanying consolidated balance sheets of OnCourse Technologies, Inc. (a Nevada Corporation) and subsidiaries as of December 31,

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

2000 and 1999, and the related consolidated statements of operations, shareholders' equity (deficit) and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of OnCourse Technologies, Inc. and subsidiaries as of December 31, 2000 and 1999, and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States.

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

ONCOURSE TECHNOLOGIES, INC. AND SUBSIDIARIES

Consolidated Notes to Financial Statements
December 31, 2000 and 1999

(1) Description of Merger and Acquisitions-

OnCourse Technologies, Inc. ("OnCourse") was incorporated in Nevada on May 28, 1998 as a subsidiary of Innovation International, Inc. ("Innovation"). On June 12, 1998, Innovation caused OnCourse to distribute Innovation's 800,000 common shares of OnCourse and common stock purchase warrants of OnCourse to Innovation's shareholders as a dividend-in-kind. These shares were subject to a unilateral right of return through June 12, 1999, and not reflected as being issued and outstanding until the expiration of the right of return. Effective June 12, 1998, as a result of that distribution ("spin-off"), OnCourse became separate from and was no longer a subsidiary of Innovation.

Following completion of the spin-off, OnCourse entered into an agreement with the shareholders of Micro Estimating Systems, Inc. ("Micro Estimating") pursuant to which Micro Estimating was merged into a newly organized subsidiary, Micro Acquisition Corporation ("Acquisition"), which immediately thereafter changed its name to Micro Estimating Systems, Inc. Consideration for the merger included the issuance of 9,866,500 shares to the former shareholders of Micro Estimating, plus the potential for an additional 2,000,000 shares if certain sales growth contingencies are met as defined in the agreement. This entire transaction became effective on July 31, 1998.

Acquisitions and Pro Forma Information-

CAM Solutions, Inc.-

On January 1, 1999, OnCourse entered into an agreement with the shareholder of CAM Solutions, Inc. ("CAM Solutions") pursuant to which CAM Solutions was acquired as a 100% owned subsidiary of OnCourse. Consideration for the acquisition included the issuance of 150,000 shares of OnCourse stock to the former shareholder of CAM Solutions. In addition, the former shareholder of CAM Solutions may receive up to 150,000 additional shares of OnCourse stock over the next five years if net income, as defined per the agreement, increases. The acquisition was accounted for using the purchase method of accounting. The purchase price was approximately \$50,000, and resulted in goodwill of approximately \$32,000.

Cimtronics, Inc.-

On October 1, 1999, OnCourse entered into an agreement with the shareholder of Cimtronics, Inc. ("Cimtronics") pursuant to which Cimtronics was acquired as a 100% owned subsidiary of OnCourse. Consideration for the acquisition included the issuance of 153,846 shares of OnCourse Stock to the former shareholder of Cimtronics. In addition, the former shareholder of Cimtronics may receive up to 153,846 additional shares of OnCourse stock over the next five years if net income, as defined per the agreement, increases. The acquisition was accounted for using the purchase method of accounting and accordingly the accompanying consolidated financial statements include the results of operations of Cimtronics subsequent to the acquisition date. The purchase price was approximately \$625,000, and

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

resulted in goodwill of approximately \$591,000.

F-8

Page 25

The following unaudited pro forma information presents the results of operations of OnCourse as if the acquisition had taken place on January 1, 1999. The pro forma information includes an adjustment for amortization expense as a result of goodwill. The pro forma information is not necessarily indicative of the results of operations that would have occurred had the purchase been made at the beginning of the periods presented or the future results of the combined operations had the acquisition of Cimtronics taken place.

	Year Ended December 31, 1999 (Unaudited) -----
Net Sales	\$3,099,480
Net Loss	(138,286)
Basic and Diluted Loss Per Share	\$(0.01)
TekSoft, Inc.- -----	

On January 31, 2000, OnCourse acquired TekSoft, Inc. ("TekSoft"), for approximately 4,500,000 shares of common stock. In addition, the former shareholders of TekSoft may receive up to 1,500,000 in additional shares over the next five years if sales, as defined in the agreement, increase.

The acquisition was accounted for as a purchase and, accordingly, the accompanying consolidated financial statements include the results of operations of TekSoft subsequent to the acquisition date. The total purchase price of \$10,755,000 was allocated to the assets and liabilities of TekSoft based upon their respective fair value, with the remainder allocated to goodwill. The purchase price paid plus the liabilities assumed exceeded the fair value of the tangible and other intangible assets purchased by \$5,702,000 based on the appraisal performed by an independent appraisal firm. The final allocation of the purchase price was as follows:

Current Assets	\$1,034,000
Capitalized Software	4,300,000
Property and Equipment	167,000
Other Assets	51,000
Liabilities Assumed	(2,139,000)
Intangible--Assembled Work Force	220,000
Intangible--Trade Names	550,000
Intangible--Distribution Network	600,000
Acquired In-Process Research and Development	270,000
Intangible--Goodwill	5,702,000

	\$10,755,000

The classification of complete and incomplete technology is in compliance with SFAS No. 2 "Accounting for Research and Development Costs" and SFAS No. 86 "Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed." Generally, in-process research and development is

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

distinguished from developed technology based upon whether "technological feasibility" has been achieved. The technological feasibility of a product is established when the enterprise has completed all planning, designing, testing, and sampling activities that are necessary to establish that the product can be produced to meet its design specifications including functions, applications, and technical performance requirements. The in-process technology was determined to be \$270,000 of which all was attributed to the CAMWorks 2000 software. For approximately five months prior to the valuation date, the engineering staff had been at work on the release version CAMWorks 2000. At the date of acquisition, the release had not yet reached the beta

F-9

Page 26

stage. Significant assumptions were made in order to determine the value of the above-mentioned assets. The net cash flows inflows from significant projects were assumed to start in the first year given the stage of the in-process product technology. Historical pricing, product margins and expense levels were released based on the unaudited years ended October 31, 1995 through October 31, 1999. The overall weighted average cost of capital was estimated to be approximately 20% based on a weighting of 10% debt and 90% equity capital structure. The cost of equity capital estimated at 21% was based on using the capital asset pricing model which reflects the risk-free rate of return plus risk premiums. The cost of debt estimated at 9.9% was based on the yield of BB-rated corporate debt as of the valuation date.

The following unaudited pro forma information presents the results of operations of the Company as if the acquisition of TekSoft had taken place on January 1, 1999. The pro forma information includes an adjustment for amortization expense as a result of goodwill and other intangible assets. The pro forma information is not necessarily indicative of the results of operations that would have occurred had the purchase been made at the beginning of the periods presented or the future results of the combined operations had the acquisition of TekSoft taken place.

	Pro Forma Year Ended December 31, 2000 (Unaudited)	Pro Forma Year Ended December 31, 1999 (Unaudited)
	-----	-----
Net Sales	\$5,513,092	\$5,333,967
Net Loss	(2,083,194)	(1,653,882)
Basic and Diluted Loss Per Share	\$(0.12)	\$(0.10)

OnCourse and its subsidiaries, Micro Estimating, CAM Solutions, Cimtronics and TekSoft are hereafter referred to as the "Company".

Consolidated Pro Formas for 1999-

The following unaudited pro forma information presents the results of operations of the Company as if the acquisitions of Cimtronics and TekSoft had taken place on January 1, 1999. The pro forma information includes an adjustment for amortization expense as a result of goodwill and other intangible assets and the write-off of the purchased in-process research and development. The pro forma information is not necessarily indicative of the results of operations that would have occurred had the purchase been made at the beginning of the periods presented or the future results of the combined operations had the acquisitions of Cimtronics and TekSoft taken

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

place.

Page 27

The adjustments to TekSoft and Cimtronics' net sales and cost of sales represent the intercompany sales and purchases between OnCourse and TekSoft and Cimtronics during the year ended December 31, 1999. The adjustment for the TekSoft amortization of goodwill and other intangibles is comprised of adding twelve months of amortization expense for the goodwill and other intangible assets resulting from the TekSoft purchase price allocation and the acquisition expenses incurred by the Company. The adjustment for the Cimtronics amortization of goodwill is comprised of adding nine months of amortization expense for the goodwill resulting from the Cimtronic's purchase price allocation.

Consolidated Pro Forma for 2000-

The following unaudited pro forma information presents the results of operations of the Company for the year ended December 31, 2000, as if the acquisition of TekSoft had taken place on January 1, 1999. The pro forma information includes an adjustment for amortization expense as a result of goodwill and other intangible assets and the write-off of the purchased in-process research and development as part of the TekSoft acquisition. The pro forma information is not necessarily indicative of the results of operations that would have occurred had the purchase been made at the beginning of the periods presented or the future results of the combined operations had the acquisition of TekSoft taken place.

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

	Consolidated Year Ended December 31, 2000	TekSoft One Month Ended January 31, 2000	Pro Forma Adjustments TekSoft	Pro Forma Revised Consolidated Year Ended December 31, 2000

The adjustments to net sales and cost of sales represent the intercompany sales and purchases between OnCourse and TekSoft during the year ended December 31, 2000. The adjustment for the TekSoft amortization of goodwill and other intangibles is comprised of adding one month of amortization expense for the goodwill and other intangible assets resulting from the TekSoft purchase price allocation and the acquisition expenses incurred by the Company. The reduction of in-process research and development was made since the above presentation is as if the acquisition was made as of January 1, 1999 and the \$270,000 write-off of the in-process research and development was already reflected in the presentation for the year ended December 31, 1999.

F-11

Page 28

(2) Nature of Operations-

The Company develops, produces and markets computer-aided design/computer-aided manufacturing ("CAD/CAM"), estimating, layout, routing and direct numerical control ("DNC") software for job shops and the machining industry. The principal markets for the Company's software and support services are North America and Europe. For the year ended December 31, 2000, sales in North America and Europe were 87% and 7%, respectively. For the year ended December 31, 1999, sales in North America and Europe were 98% and 2%, respectively.

Sales to one customer totaled 14% of consolidated net sales, including those sales deferred at December 31, 2000. There were no customers that had sales greater than 10% of the Company's net sales for the year ended December 31, 1999.

(3) Liquidity-

OnCourse has incurred losses over the last two years and has negative working capital. Based upon its current plans, the Company believes it has sufficient funds and borrowing availability to meet its operating expenses and capital requirements through fiscal year 2001 and into fiscal year 2002. However, the Company intends to seek such additional funding from equity offerings to existing shareholders or other third parties during 2001. There is no assurance that such additional funds will be available on acceptable terms, if at all. Should the plans contemplated by management not be consummated, the Company may have to seek alternative sources of capital, affect borrowing under its line of credit or reevaluate its operating plans.

(4) Summary of Significant Accounting Policies-

(a) Basis of Presentation-

The consolidated financial statements include the accounts of OnCourse and its wholly owned subsidiaries. All transactions for Cimtronics and TekSoft subsequent to the acquisition dates are included in the consolidated financial statements. All intercompany transactions and accounts have been eliminated in consolidation.

(b) Revenue Recognition-

Revenue from product sales is recognized upon customer acceptance and delivery of the product provided that no significant contractual obligations remain. Customer acceptance is realized after either the customer pays for the software or upon receiving a document from the customer stating that the product has been accepted by the customer. Included in deferred revenues as of December 31, 2000 is approximately \$684,000 of products which have been delivered and invoiced but for which the Company has not been notified of customer acceptance.

Revenues also include separate maintenance fees whereby the Company provides ongoing customer support and product upgrades. Such contracts are reflected as deferred revenue and amortized ratably over the term of the maintenance period ranging from 12 to 36 months, which begins after the expiration of the one-year of free support included with the initial purchase of the software for some of the Company's products.

(c) Inventories-

The Company expenses as incurred various materials (compact disks and manuals) and supplies used to produce, package and ship its products. The value of supplies on hand at year-end is not material in relation to the overall financial statements.

F-12

Page 29

(d) Software Development Costs-

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

Software development costs incurred in the research and development of new software products and enhancements to existing software products are expensed as incurred until technological feasibility of the product is established. From the time technological feasibility is established until the product is released, all software costs are capitalized. In addition, capitalized software as of December 31, 2000 includes software acquired in the acquisition of TekSoft (see Note 1). Capitalized costs are reported at the lower of unamortized costs or net realizable value. The costs are amortized over the greater of the amount computed using (a) the ratio that current gross revenues for the product bear to the total of current and anticipated future gross revenues for that product or (b) the straight-line method over the remaining estimated economic life of the product. During 2000 and 1999, the Company amortized the capital software costs straight line over five years.

Costs incurred up to technological feasibility are considered research and development costs. These costs are expensed as incurred. Research and development costs were approximately \$323,000 and \$17,000 in 2000 and 1999, respectively. In addition, the \$270,000 of acquired in-process research and development resulting from the TekSoft acquisition was written off as of January 31, 2000.

Computer software development costs capitalized in 2000 and 1999 were approximately \$1,268,000 and \$114,000, respectively. Amortization expense for the years ended December 31, 2000 and 1999 of approximately \$921,000 and \$159,000, respectively, is included in cost of sales in the consolidated statements of operations.

(e) Property and Equipment-

Property and equipment, which consist primarily of office and computer equipment, is stated at cost and is depreciated over the estimated useful lives of the assets (3 to 7 years) over straight-line and accelerated depreciation methods.

Maintenance and repair costs are expensed as incurred. Improvements that extend the useful life of the assets are capitalized to plant and equipment accounts and amortized over the remaining useful life.

(f) Earnings per Share-

Basic earnings per share ("EPS") is calculated using net income (loss) available to common shareholders divided by the weighted average number of common shares outstanding during the year. Diluted EPS is similar to basic EPS except that the weighted average number of common shares outstanding is increased to include the number of additional shares that would have been outstanding if the dilutive potential common shares had been issued and the contingent shares earned in the current year are adjusted as if they were outstanding the entire year.

	2000 -----	1999 -----
Weighted Average Shares		
Outstanding--Basic EPS	16,379,120	11,306,104
Incremental Shares from		
Outstanding Warrants	68,490	302,678
Contingent Shares Earned	808,170	400,000

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

	-----	-----
Weighted Average Shares		
Outstanding--Dilutive EPS	17,255,780	12,008,782
	-----	-----
	-----	-----

For the years ended December 31, 2000 and 1999, the computation of basic and diluted EPS are the same due to operating losses.

F-13

Page 30

(g) Offering Costs-

Costs associated with stock offerings have been recorded as a reduction to shareholders' equity (deficit) as these costs were netted against the proceeds of the stock offering in the period the costs were incurred. All costs associated with aborted stock offerings have been expensed.

(h) Advertising Costs-

All advertising costs are expensed the first time the advertising takes place. Advertising expenses for the years ended December 31, 2000 and 1999 were approximately \$342,000 and \$123,000, respectively.

(i) Other Assets-

Included in Other Assets are licenses for the right to use certain third party software in the Company's products. These licenses range from three to five years and are amortized over the terms of these licenses on a straight-line basis. The Company periodically evaluates the realizability of these assets in relation to the software products that they are used in.

(j) Use of Estimates-

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(k) Reclassification-

Certain amounts have been reclassified in the 1999 financial statements to be consistent with the 2000 financial statement presentation.

(5) Note Receivable from Shareholder-

The note receivable is due from a shareholder of the Company. The note earns interest at 8% and is due on April 15, 2002.

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

(6) Goodwill and Other Intangibles-

Goodwill consisting of excess of cost over fair value of the assets acquired in the transactions described in Note 1, is being amortized on a straight-line basis over seven years.

The Company reviews long-lived assets and certain identifiable intangibles for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Goodwill associated with the assets reviewed will be included in determining the recoverability based on the future undiscounted cash flows expected to be generated from those assets. In the event that impairment exists, goodwill shall be eliminated before reducing the carrying amount of the impaired long-lived assets and identifiable intangibles.

Goodwill amortization for the years ended December 31, 2000 and 1999 was approximately \$951,000 and \$26,000, respectively.

F-14

Page 31

The purchase price allocation relating to the assets acquired in the January 31, 2000 acquisition of TekSoft resulted in several intangible assets as described in Note 1. The purchase price allocation resulted in \$220,000 for Assembled Workforce, \$550,000 for Trade Names and \$600,000 for Distribution Network. The amortization of the Assembled Workforce and Distribution Network assets is being provided utilizing the straight-line method over the estimated useful life of seven years. The amortization of the Trade Names asset is on a straight-line basis over the estimated useful life of fifteen years. Total amortization expense relating to these intangible assets for the year ended December 31, 2000 was approximately \$141,000.

(7) Note Payable to Shareholders and Employees-

As of December 31, 2000 and 1999, the Company has a non-interest bearing \$10,000 demand note payable to one of its shareholders. The Company is accruing interest expense at 7% per year. Interest has not been paid on this note since its inception. The Company has accrued approximately \$1,500 of interest reflected as a component of Accrued Wages and Other Liabilities on the balance sheet as of December 31, 2000. This note is classified as a current liability.

As of December 31, 2000, the Company has several notes payable and loans to the former shareholders and employees of TekSoft. The notes bear interest of 16.5% and are payable monthly and mature at various dates up to April 2002. These notes are secured by substantially all of TekSoft's property and equipment. The balance of these notes totaled \$119,705 as of December 31, 2000. These notes are classified as long-term liabilities with a current portion of \$112,948 as of December 31, 2000.

The Company has a note payable to former TekSoft shareholders and current Company shareholders who loaned money to TekSoft under a line of credit agreement to finance the operations. This loan bears an annual interest rate of 16.5%. This loan totaled \$31,639 at December 31, 2000. This note is due October 15, 2001.

(8) Lines of Credit-

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

The Company replaced its line of credit agreements and substantially all of its bank debt (see Note 9) on October 9, 2000. The new debt facility with a bank consists of a \$400,000 term loan due on October 1, 2005 and a \$1,100,000 three-year revolving line of credit agreement due October 9, 2003. The revolving line of credit is limited to a borrowing base calculated as a specified percentage of qualifying accounts receivable, property and equipment and net capitalized software. The interest rate for the revolving line of credit is at prime (9.5% at December 31, 2000). The revolving line of credit agreement will be classified as long-term debt as no payments are due until the end of the three-year period. The debt facility is secured by all assets of the Company and its subsidiaries. Borrowings under the line of credit were approximately \$788,000 as of December 31, 2000.

The Company had an additional line of credit agreement at the end of 1999 with a bank that provided for borrowings up to \$225,000. The Company had borrowings under the line of approximately \$183,000 as of December 31, 1999. The outstanding liability was paid as of October 9, 2000.

F-15

Page 32

(9) Debt-

Long-term debt as of December 31, 2000 and 1999 consists of the following:

	December 31, 2000	December 31, 1999
	-----	-----
Line of Credit (see Note 8)	\$787,818	\$ -
Note payable to bank, 9.25% interest, due in monthly installments of \$6,500 including interest, through October 1, 2005, secured by all assets of the Company and its subsidiaries.	392,414	-
Note payable to bank, prime (8.5% at December 31, 1999) plus 1.0% interest; paid on October 9, 2000.	-	146,296
Auto loan, 8.5% interest, due in monthly installments of \$458 including interest, through November 18, 2004, secured by auto	18,266	22,016
Auto loan, 8.9% interest, due in monthly installments of \$543 including interest, through January 1, 2004, secured by auto	17,552	21,800
	-----	-----
Total Long-Term Debt	1,216,050	190,112
Less- Current Maturities	(52,318)	(17,200)
	-----	-----
	\$1,163,732	\$172,912
	-----	-----

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

Approximate principle payments on long-term debt as of December 31, 2000 are as follows:

2001	\$52,300
2002	57,300
2003	850,700
2004	62,300
2005	193,500
Thereafter	-

(10) Lease Commitments-

The Company leases all of its office and warehouse space under operating leases. One of these leases is with a related party (see Note 15) that is renewable in five-year increments for a period of twenty-five years. The Company subleases a portion of this related party lease as office space to other tenants on a year-to-year lease. In addition, the Company also leases an automobile and computer equipment. Total rent expense, net of sublease payments, was approximately \$218,600 and \$59,100 for the years ended December 31, 2000 and 1999, respectively.

Property under capital leases is included in property and equipment as follows:

	December 31, 2000	December 31, 1999
	-----	-----
Computer Equipment	\$27,014	\$10,162
Less- Accumulated Depreciation	(5,897)	(1,016)
	-----	-----
Net Capital Lease Assets	\$21,117	\$9,146
	-----	-----

F-16

Page 33

Approximate minimum annual rental commitments as of December 31, 2000 are as follows:

For the Year Ending December 31:	Capital Leases	Operating Leases
	-----	-----
2001	\$15,000	\$340,300
2002	4,897	339,200
2003	-	153,600
2004	-	18,600
2005	-	-
Thereafter	-	-
	-----	-----
Total Minimum Lease Payments	19,897	\$851,700

Less Amount Representing Interest-	2,079	

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

Present Value of Minimum Lease Payments	\$17,818

Current Portion	\$13,060

(11) Warrants-

In connection with the issuance of stock during the year ended December 31, 2000, the Company issued 141,734 Class A stock purchase warrants and 141,734 Class B stock purchase warrants. The warrants were issued with initial estimated values (based on the Black-Scholes valuation model) ranging from \$1.07 to \$5.19 per Class A Warrant and \$1.27 to \$5.56 per Class B Warrant. Each warrant represents the right to purchase one share of the Company's common stock at an exercise price of \$2.25. The Class A Warrants expire in 2003, three years from the date of issuance. The Class B Warrants expire in 2005, five years from the date of issuance. As of December 31, 2000, all warrants issued during the year were outstanding.

In connection with the issuance of stock during 1999, the Company issued 33,205 Class A stock purchase warrants and 33,205 Class B stock purchase warrants. The warrants were issued with initial values ranging from \$1.49 to \$5.19 per Class A Warrant and \$1.73 to \$5.57 per Class B Warrant (based on the Black-Scholes valuation model). Each warrant represents the right to purchase one share of the Company's common stock at an exercise price of \$2.25. The Class A Warrants expire in 2002, three years from the date of issuance. The Class B Warrants expire in 2004, five years from the date of issuance. As of December 31, 2000 and 1999, all warrants issued in 1999 were outstanding.

In connection with the spin-off of OnCourse by Innovation (see Note 1), the Company granted 400,000 common stock purchase warrants to Innovation's shareholders as a dividend in-kind. The warrants are redeemable for \$.05 per warrant only at the discretion of the Company. The warrants originally entitled the holder to purchase, on or before December 31, 1999 one share of Company common stock per warrant at an exercise price of \$1.50. On December 23, 1999, the expiration date for these common stock purchase warrants was extended to March 31, 2000. On March 27, 2000, the expiration date was extended a second time to September 30, 2000. On September 12, 2000, the expiration date was extended a third time to June 20, 2001. Generally accepted accounting principals required that the warrants be classified as equity and accreted to the estimated redemption value based on the terms of the warrants. At the time of original issuance the warrants were not assigned an initial value or any accretion as their estimated fair market value approximated zero. Under the guidelines of FASB 123, "Accounting for Stock Based Compensation," a change in the characteristics of the warrant, such as an extension of the expiration date, triggers a remeasurement point. Each of the extensions resulted in a new measurement date and the incremental value of the warrants was accounted for as a dividend to the shareholders. The incremental value reflected as a dividend was calculated as the difference between the value of the new warrants given by the Company, i.e., extended warrants, less the remaining value of the warrants given up by the Shareholders, i.e., the cancelled warrants. The value of the warrants at each remeasurement point was determined using the Black-Scholes pricing model. A dividend was recorded for approximately \$273,000 and \$1,814,000 for the years ended December 31, 2000 and 1999, respectively. During the years ended December 31, 2000 and 1999, 1,071 and 105, respectively, of the 400,000 warrants were exercised.

The table below summarizes the transactions related to the Company's warrants to purchase common stock:

	Number of Warrants	Weighted-Average Exercise Price
	-----	-----
Balance at December 31, 1997	-	\$ -
Warrants Issued	400,000	1.50
	-----	-----
Balance at December 31, 1998	400,000	1.50
Warrants Sold	66,410	2.25
Warrants Exercised	(105)	1.50
	-----	-----
Balance at December 31, 1999	466,305	\$1.61
Warrants Sold	283,468	2.25
Warrants Exercised	(1,071)	1.50
	-----	-----
Balance at December 31, 2000	748,702	\$1.85
	-----	-----
	-----	-----

All warrants are exercisable as of December 31, 2000.

(12) Reverse Stock Split-

Effective October 31, 1999, OnCourse exercised a 1-for-2 stock split by amending the Articles of Incorporation of OnCourse so that each two (2) authorized common shares with par value of one-tenth of one cent (\$.001) per share of the Company be converted into one (1) common share with par value of one-tenth of one cent (\$.001) per share. Effective the same date, OnCourse reduced the total authorized shares from 100,000,000 to 50,000,000. This resulted in reducing the shares outstanding as of October 31, 1999 from 22,861,602 shares to 11,430,801 shares. All shares and per share data have been restated to reflect the impact of the split for all periods presented.

(13) Shareholders' Equity-

Consideration for the TekSoft acquisition included the issuance of approximately 4,500,000 shares to the former shareholders of TekSoft. In addition, under the terms specified in the purchase agreement, the former shareholders of TekSoft may receive up to 1,500,000 additional shares over the next five years if net sales, as defined in the agreement, increases. For the year ended December 31, 2000, the net sales increase resulted in an additional 511,206 shares being issued to the former shareholders of TekSoft. The shares were earned as of December 31, 2000 at a value of \$1.75 per share. An additional \$894,611 was allocated to goodwill which will be amortized over its remaining useful life.

Consideration for the CAM Solutions acquisition included the issuance of 150,000 shares to the former shareholder of CAM Solutions. In addition, under the terms specified in the purchase agreement the former shareholder of CAM Solutions may receive up to 150,000 additional shares over the next five years if net income, as defined in the agreement, increases. There were no shares earned during 2000 and 1999 under the purchase agreement net income criteria.

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

Consideration for the Cimtronics acquisition included the issuance of 153,846 shares to the former shareholders of Cimtronics. In addition, the former shareholders of Cimtronics may receive up to 153,846 additional shares over the next five years if net income, as defined in the agreement, increases. There were no shares earned during 2000 and 1999 under the purchase agreement net income criteria.

Consideration in the 1998 reverse triangular merger included the issuance of 9,866,500 shares to the former shareholders of Micro Estimating. Accordingly, shares issued and outstanding, all historical weighted average share and per share amounts and activity from prior periods in the consolidated statements of shareholders' equity have been retroactively restated. In addition, the former shareholders of Micro Estimating may receive up to a total of 2,000,000 additional shares through 2003 if certain targeted net sales increases, as defined, are achieved. The targeted increase in net sales, as defined, was achieved for the years ended December 31, 2000 and 1999,

F-18

Page 35

and as a result, an additional 400,000 shares each year have been allocated to the former shareholders of Micro Estimating. As of December 31, 2000, 1,200,000 of the 2,000,000 additional shares have been allocated to the former shareholders of Micro Estimating since the merger.

The 800,000 shares of common stock issued to Innovation's shareholders on June 12, 1998 provided for a one-year right-of-return as defined per the merger agreement. These shares were not reflected on the consolidated statements of shareholders' equity until the right-of-return expired in 1999. No shares were returned to the Company during 1999.

During 2000 and 1999, the Company offered and issued on various dates Units in a private placement to selected individuals deemed financially capable of making the investment. The units include one share of Company common stock and one Class A common stock purchase warrant and one Class B common stock purchase warrant. The Company issued and sold 118,250 units at \$2.00 per unit and 10,000 units at \$1.00 per unit during 2000. During 1999, the Company issued and sold approximately 33,000 units at \$2.00 per unit.

In May 2000, the Company entered into a twelve-month contract with a professional services firm for consulting services. The Company issued 300,000 shares of common stock for these services at a value of \$2.00 per share. The cost associated with this contract is being amortized over the term of the agreement. Approximately \$375,000 was amortized during the year ended December 31, 2000. The balance of \$225,000 is reflected as a component of Prepaids and Other Assets on the balance sheet as of December 31, 2000. Subsequent to year end, this agreement was extended an additional nine months to February, 2002. The unamortized balance will be amortized over the remaining term of the agreement.

During 2000, the Company offered and issued 2,500 shares of Company common stock as payment for \$5,000 of outside programming services performed. The market price of the company common stock was \$1.01 on the date of issuance. These services were related to software development and were capitalized.

During 2000, the Company offered and issued 13,484 shares of Company common stock as payment of \$26,968 in professional services. In addition to the common stock being issued, 13,484 Class A stock purchase warrants and 13,484 Class B stock purchase warrants were issued. The warrants were issued with initial estimated values (based on the Black-Scholes valuation

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

model) of \$5.19 for each Class A warrant and \$5.56 for each Class B warrant (see Note 11).

During 2000, the Company offered and issued 19,500 shares of Company common stock to the employees of TekSoft as an incentive to continue employment following the Company's acquisition of TekSoft. The Company also offered and issued 5,000 shares of Company common stock to an employee as a hiring incentive. In addition, the Company awarded another employee 20,000 shares as a part of that employee's compensation package. The Company recorded total compensation expense of \$94,105 for these transactions.

(14) Supplemental Disclosure of Cash Flow Information-

	Years Ended December 31,	
	2000	1999
Approximate Cash Paid for:		
Interest	\$122,500	\$30,700
Income Taxes	4,500	13,300
Noncash Transactions:		
Capital Leases	14,100	10,200
Compensation to Employees	94,100	-
Warrants Issued as Dividends	273,400	1,814,400
Common Stock Issued for Services (see Note 13)	404,500	-

(15) Related Party Transactions-

Certain owners and employees of the Company have notes and loans with the Company (see Note 7).

A subsidiary's building that the Company occupies and leases is owned and operated by a partnership, consisting of two former principal owners of a subsidiary (and current Company shareholders) and a previous employee of the subsidiary (see Note 10). The lease expense, net of sublease was \$126,200 for the year ended December 31, 2000.

The Company also has a consulting agreement with a shareholder to provide expert advice to the company concerning business strategies. The agreement became effective December 1, 1999 and expires December 1, 2004. The Company pays the shareholder \$4,167 per month for these services.

(16) Income Taxes-

The provision for income taxes for the years ended December 31 consists of:

	2000	1999
Current-		
Federal	\$(1,106,110)	\$(71,700)
State	(232,885)	(16,200)
Total Current	(1,338,995)	(87,900)

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

Deferred Income Taxes	772,371	(6,732)
	-----	-----
Total Income Tax Benefit	\$ (566,624)	\$ (94,632)
	-----	-----

A reconciliation of the statutory Federal income tax rate to the consolidated effective income tax rate is as follows:

	Years Ended December 31,	
	2000	1999
	-----	-----
Statutory Federal Income Tax Rate	(35)%	(35)%
State Income Taxes, Net of Federal Income Tax Benefit	(5)	(6)
Goodwill Amortization	12	4
Other	8	1
	-----	-----
Effective Income Tax Rate	(20)%	(36)%
	-----	-----

F-20

Page 37

Temporary differences which give rise to the deferred income tax asset and liability at December 31 are as follows:

	2000	1999
	-----	-----
Deferred Revenue	\$359,452	\$200,155
Other	30,218	5,038
	-----	-----
Current Deferred Income Tax Asset	389,670	205,193
Capitalized Software Costs	(1,988,049)	(98,256)
Book Versus Tax Depreciation Methods	(31,829)	(32,786)
Net Operating Loss Carryforwards	1,073,877	54,477
Other	(96,769)	49,769
	-----	-----
Long-Term Deferred Income Tax Liability	(1,042,770)	(26,796)
	-----	-----
Net Deferred Income Tax Asset (Liability)	\$ (653,100)	\$178,397
	-----	-----

The Company generated net operating losses ("NOL") of approximately \$1,683,000 and \$189,000 in 2000 and 1999, respectively. The Company also acquired net operating losses of approximately \$753,000 relating to the acquisition of TekSoft. The annual use of the NOL carryforwards acquired with TekSoft is limited to the lesser of the Company's taxable income or the amount of the IRS imposed limitation pursuant to the "change in ownership" provisions of the Tax Reform Act of 1986. These NOL

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

carryforwards will expire at various dates beginning in 2018 through 2020. As of December 31, 2000, the Company has remaining NOL carryforwards of approximately \$2,481,000 and \$2,553,000 available for future use against Federal and State income tax liabilities, respectively.

(17) Deferred Savings Plan-

TekSoft has a 401(k) deferred savings plan with a discretionary matching feature covering substantially all employees of TekSoft. During the year ended December 31, 2000, none of the employee's contributions to the plan was matched by the Company.

Effective April 1, 2001, the Company will implement a 401(k) deferred savings plan with discretionary profit sharing and matching features covering substantially all employees of the Company's subsidiaries. This plan will replace the TekSoft 401(k) deferred savings plan.

(18) Subsequent Events-

Subsequent to year end, certain of the Company's vendors agreed to take common stock and warrants in settlement of approximately \$28,000 in payables outstanding at December 31, 2000. The Company anticipates issuing approximately 25,000 shares of Company common stock, 25,000 Class A Warrants and 25,000 Class B Warrants. The weighted average exercise price on the warrants is \$1.90 for both classes. The Company estimated the value of warrants issued to be from \$0.85 to \$1.72 for each Class A warrant and from \$0.95 to \$1.90 for each Class B warrant.

Subsequent to year end, the Company also offered and issued 100,000 units in a private placement to selected individuals deemed financially capable of making the investment. Units include one share of Company common stock and one Class A common stock purchase warrant and one Class B common stock purchase warrant. The units were sold for \$1.00 per unit. The exercise price on the warrants is \$1.75 for both classes. The Company estimated the value of warrants issued to be \$0.85 for each Class A warrant and \$0.95 for each Class B warrant.

Craig M. Hoffman	Vice President of Micro Estimating	34	-	-
Michael Zaworski	President of Cimtronics	58	-	-
Gary L. Fulton	Director of OnCourse, and President of TekSoft	49	2000	2001
Scott R. Fulton	Vice President of TekSoft	43	-	-
Sky Carver	Director of OnCourse, and Consultant to TekSoft	44	2000	2001
William C. Brown	Chief Financial Officer of OnCourse and Micro Estimating	41	-	-

All Directors' terms of office extend until the annual meeting of the Company's shareholders following their election and until successors are elected and qualified. Executive officers of the Company are elected annually and hold office until their respective successors have been elected and qualified or until death, resignation or removal by the Board of Directors. The only family relationship between any of the Directors and executive officers is that the Messrs. Fulton are brothers, and there are no agreements or understandings pursuant to which any Director or executive officer is elected.

The following is a brief description of the business experience of the directors and executive officers of the Company:

BERNARD A. WOODS, III

CEO of OnCourse and Micro Estimating: In 1988 he purchased Micro Estimating from its founder. From 1981 to 1994 he was Owner and officer of a precision machine shop located in Pennsylvania.

CHARLES W. BEYER

President of OnCourse and Micro Estimating: Engaged as General Sales Manager in September 1989; promoted to V.P., General Manager 1990, promoted to President 1997. From 1981 - 1989 employed as sales and service manager for midsize manufacturing firms.

GARY L. FULTON

President of TekSoft, Inc.: Founded TekSoft, Inc. in 1982. Prior to founding TekSoft, he was system manager of a large southwestern manufacturer.

Edgar Filing: ONCOURSE TECHNOLOGIES INC - Form 10KSB

SCOTT R. FULTON

Vice President of TekSoft, Inc.: Co-founder of TekSoft in 1982. Currently a senior programmer, systems analyst and product strategist.

SKY CARVER

Consultant to TekSoft, Private Investor, and Director of OnCourse: Prior experience includes President of Burton Carver and Company, Inc., a transportation company (1982 to 1985) with 200 employees and \$7.5 million in sales. He owned and was President of Peninsula Sanitation Co., Inc. (1985-1998), a waste management company. He is currently the owner and President of Spine Therapy Center (started in January 1996), which specializes in treatment of lower back pain.

KEVIN L. BORK

President of Cam Solutions: Self-employed. Founded Cam Solutions as a start-up in 1989 to \$600,000 in sales.

CRAIG M. HOFFMANN

VP - Product Development of Micro Estimating: Employee of Micro Estimating since 1986.

MICHAEL ZAWORSKI

President of Cimtronics: Self-employed. Founded Cimtronics as a start-up in 1993 to \$900,000 in sales.

WILLIAM C. BROWN

CPA, Chief Financial Officer of OnCourse and Micro Estimating since February 2000: Over the last five years, he was controller of Howard Johnson's Enterprises, Inc. (1990 to 1997), a \$32 million formulator of lawn and garden and ice melter products distributed throughout the U.S., and most recently, the Chief Financial Officer of Herker Industries, Inc. (1997 to 2000), a \$25 million precision metal turning and assembly company. Manages all financial, treasury, risk and benefits administration for the Company including the subsidiaries' financial systems and activities.

BOARD COMMITTEES

The Board of Directors presently has no standing committees. The Board acts as a whole on all matters coming before it.

COMPENSATION OF DIRECTORS

The Company presently does not compensate its Board of Directors for any services provided as a director.

ITEM 10. EXECUTIVE COMPENSATION

The following table sets forth information concerning the paid or granted compensation to the Chief Executive Officer and President of the Company as well as other executive officers of the Company and its subsidiaries whose annual pay equals or exceeds \$100,000. There are no other executive officers of the Company or its subsidiaries that had an aggregate salary and bonus that will or have exceeded \$100,000 in fiscal years ended December 31, 2000 and 1999.

SUMMARY COMPENSATION TABLE

NAME AND PRINCIPAL POSITION	YEAR	ANNUAL SALARY	OTHER ANNUAL COMPENSATION	EMPLOYMENT CONTRACTS (2)
