2 SEMI ANNITAL DEDODT FERDLIADV 29, 2010	

#### Dear Shareholder

The past year marked a pivotal turning point for global markets as the Great Recession that started in December 2007 began to recede and give way to recov-

ery. The dramatic about-face could be attributed to a confluence of factors, most notably the extraordinary policy actions of global governments and central

banks, a resurgence in corporate profits and growing signs of stability and healing in world economies.

After reaching a trough in early March 2009, stocks galloped higher as investors were lured back into the markets by depressed valuations, desire for higher

yields and increasing confidence that all-out financial disaster had been averted. The result was a powerful upswing in global equities and other higher-risk

assets through the end of 2009. More recently, the combination of mixed economic data, lingering deflation issues (especially in Europe) and proposed fees

and levies on banks dampened investor conviction, resulting in a several-week bout of profit-taking. The selloff had a more pronounced negative effect on inter-

national and emerging market equities due primarily to concerns of higher interest rates in Asia and negative headlines out of Europe, particularly in Greece.

Generally speaking, investors renewed affinity for risk was notable in the fixed income markets as well, where non-Treasury assets made a robust recovery. One

of the major themes in 2009 was the reversal of the flight-to-quality trade. High yield, one of the most battered areas during the financial crisis, emerged as

the strongest-performing fixed income sector in both the taxable and tax-exempt space. Despite weak fundamentals, the municipal market produced solid

returns as technical conditions remained supportive of the asset class. Municipal bond mutual funds enjoyed strong inflows and tax-exempt issuance remained

low thanks to the ever-increasing popularity of the Build America Bond program. Nevertheless, state and local fiscal woes and bankruptcy fears remain firmly in

the spotlight, and bear close monitoring.

At the same time, yields on money market securities declined throughout the reporting period and remain near all-time lows, with the Federal Open Market

Committee reiterating that economic circumstances are likely to necessitate an accommodative interest rate stance for an extended period. Investor assets in

money market funds declined from the peak registered in early 2009, but remain above levels registered prior to the financial crisis that began in 2007.

Against this backdrop, the major market averages posted the following returns:

Total Returns as of February 28, 2010	6-month	12-month
US equities (S&P 500 Index)	9.32%	53.62%
Small cap US equities (Russell 2000 Index)	10.59	63.95
International equities (MSCI Europe, Australasia, Far East Index)	0.72	54.58
3-month Treasury bill (BofA Merrill Lynch 3-Month Treasury Bill Index)	0.07	0.20
US Treasury securities (BofA Merrill Lynch 10-Year US Treasury Index)	0.07	(1.54)
Taxable fixed income (Barclays Capital US Aggregate Bond Index)	3.19	9.32
Tax-exempt fixed income (Barclays Capital Municipal Bond Index)	4.13	9.98
High yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index)	13.86	55.20

Past performance is no guarantee of future results. Index performance shown for illustrative purposes only. You cannot invest directly in an index.

The market continues to show signs of improvement, but questions about the strength and sustainability of the recovery abound. Through periods of uncer-

tainty, BlackRock s full resources are dedicated to the management of our clients assets. For additional market perspective and investment insight, visit

www.blackrock.com/shareholdermagazine, where you II find the most recent issue of our award-winnin@hareholder® magazine, as well as its quarterly com-

panion newsletter, Shareholder Perspectives. As always, we thank you for entrusting BlackRock with your investments, and we look forward to your continued

partnership in the months and years ahead.

THIS PAGE NOT PART OF YOUR FUND REPORT 3

#### Fund Summary as of February 28, 2010 BlackRock Defined Opportunity Credit Trust

#### **Investment Objective**

BlackRock Defined Opportunity Credit Trust (BHL) (the Funds) eks high current income, with a secondary objective of long-term capital appreciation.

No assurance can be given that the Fund s investment objective will be achieved.

#### **Performance**

For the six months ended February 28, 2010, the Fund returned 17.73% based on market price and 9.88% based on net asset value ( NAV ). For the

same period, the Lipper Loan Participation Funds category posted an average return of 29.78% on a market price basis and 13.09% on a NAV basis. All

returns reflect reinvestment of dividends. The Fund s discount to NAV, which narrowed during the period, accounts for the difference between performance

based on price and performance based on NAV. During the period, we generally favored less economically sensitive sectors and higher-quality credits, which

detracted from results as they underperformed lower-rated issues and those sectors with greater economic sensitivity. In addition, the Fund maintained

relatively conservative levels of leverage (at period end, 16% of the Fund s total managed assets), which detracted from performance versus the Lipper

competitors, who maintained leverage closer to the 33 $^{1}$ / $_{3}$ % regulatory limit. On the positive side, approximately 13% of the portfolio was invested in high

yield, which aided performance as the sector performed well. Overweight positions in the automotive sector and a few special situation and distressed

credits also was additive.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

<sup>4</sup> SEMI-ANNUAL REPORT FEBRUARY 28, 2010

#### Fund Summary as of February 28, 2010 BlackRock Diversified Income Strategies Fund, Inc.

#### **Investment Objective**

BlackRock Diversified Income Strategies Fund, Inc. (DVF) (the Funds) eks to provide investors with a high current income by investing primarily in a

diversified portfolio of floating rate debt securities and instruments, including floating or variable rate loans, bonds, preferred securities (including convert-

ible preferred securities), notes or other debt securities or instruments that pay a floating rate of interest.

No assurance can be given that the Fund s investment objective will be achieved.

#### **Performance**

For the six months ended February 28, 2010, the Fund returned 26.89% based on market price and 23.33% based on NAV. For the same period, the

closed-end Lipper Loan Participation Funds category posted an average return of 29.78% on a market price basis and 13.09% on a NAV basis. All returns

reflect reinvestment of dividends. The Fund's premium to NAV, which widened during the period, accounts for the difference between performance based on

price and performance based on NAV. During the period, 66% of the Fund s portfolio was invested in floating rate loan interests and about 30% in high

yield bonds, with a portion of the allocation in floating rate notes and a portion swapped to floating rate. Both categories outperformed floating rate loan

interests during the six months, which benefited performance. The Fund s credit allocation has been biased towards lower-quality and nonrated credits,

which also aided results. On the other hand, the Fund maintained leverage in the low-teen range, which detracted from performance versus the Lipper com-

petitors, who maintained leverage closer to the 33  $^1$  /  $_3$  % regulatory limit.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT FEBRUARY 28, 2010 5

#### Fund Summary as of February 28, 2010 BlackRock Floating Rate Income Strategies Fund, Inc.

#### **Investment Objective**

BlackRock Floating Rate Income Strategies Fund, Inc. (FRA) (the Funds) eks high current income and such preservation of capital as is consistent with

investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments.

No assurance can be given that the Fund s investment objective will be achieved.

#### Performance

For the six months ended February 28, 2010, the Fund returned 32.19% based on market price and 14.12% based on NAV. For the same period, the

closed-end Lipper Loan Participation Funds category posted an average return of 29.78% on a market price basis and 13.09% on a NAV basis. The per-

formance of the Lipper category does not necessarily correlate to that of the Fund, as the Lipper group comprises both closed-end funds and unleveraged

continuously offered closed-end funds. All returns reflect reinvestment of dividends. The Fund moved from a discount to NAV to a premium by period end,

which accounts for the difference between performance based on price and performance based on NAV. During the period, slightly less than 20% of the

Fund was invested in high yield bonds, which contributed positively to performance as high yield outperformed floating rate loan interests. Overweight

positions in the automobiles sector and a few special situation and distressed credits also helped results, as did an underweight in health care. On the

other hand, the Fund generally favored less economically sensitive sectors and higher-quality credits, which detracted from performance as these issues

underperformed lower-rated issues and those sectors with greater economic sensitivity. In addition, the Fund maintained relatively conservative levels of

leverage (at period end, 15% of the Fund s total managed assets), which was a detractor versus the Lipper competitors, who maintained leverage closer to

the 33 $^{1}$ / $_{3}$ % regulatory limit.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

## Fund Summary as of February 28, 2010 BlackRock Limited Duration Income Trust

#### **Investment Objective**

BlackRock Limited Duration Income Trust (BLW) (the Funds\( \)eks to provide current income and capital appreciation.

No assurance can be given that the Fund s investment objective will be achieved.

#### Performance

For the six months ended February 28, 2010, the Fund returned 14.21% based on market price and 12.73% based on NAV. For the same period, the

closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 21.84% on a market price basis and 18.08% on a NAV basis.

All returns reflect reinvestment of dividends. The Fund's discount to NAV, which narrowed during the period, accounts for the difference between performance

based on price and performance based on NAV. The Fund s Lipper category is composed primarily of high yield funds. In addition to high yield bonds, the

Fund invests in high yield loans and investment-grade bonds, which hurt relative performance as these securities underperformed high yield. The Fund

tended to favor sectors less exposed to the economy, the consumer and housing, which detracted from results given the period s strong market perform-

ance. Conversely, overweights in the automobiles sector and a number of special situation and distressed credits (including automobiles) helped. During the

period, the Fund tended to hold low cash balances, although the cash position at period end was 6%. Given the market s positive performance, this cash

balance negatively impacted performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

#### Fund Summary as of February 28, 2010 BlackRock Senior Floating Rate Fund, Inc.

#### **Investment Objective**

BlackRock Senior Floating Rate Fund, Inc. (the Fundis) a continuously offered closed-end fund that seeks high current income and such preservation of

capital as is consistent with investment in senior collateralized corporate loans made by banks and other financial institutions.

No assurance can be given that the Fund s investment objective will be achieved.

#### **Performance**

For the six months ended February 28, 2010, the Fund returned 7.97% based on NAV. For the same period, the closed-end Lipper Loan Participation

Funds category posted an average return of 13.09% on a NAV basis. All returns reflect reinvestment of dividends. The Fund, through its investment in the

Master Senior Floating Rate LLC, maintained relatively conservative positioning (i.e., higher quality credits and loan structures) and no leverage, which hin-

dered performance in the strong market of the past six months versus its Lipper competitors, many of which employ leverage. We believe this positioning is

prudent for the medium term. Overweight positions in the automobiles sector and a few special situation and distressed credits helped results, as did an

underweight in health care. During the period, the Fund tended to hold low cash balances, although the cash position at period end was 8%. Given the

market s positive performance, this cash balance negatively impacted performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

<sup>&</sup>lt;sup>5</sup> Hypothetical 5% annual return before expenses is calculated by pro rating the number of days in the most recent fiscal half year divided by 365. See Disclosure of Expenses for Continuously Offered Closed-End Funds on page 11 for further information on how expenses were calculated.

## The Benefits and Risks of Leveraging

BlackRock Defined Opportunity Credit Trust, BlackRock Diversified Income Strategies Fund, Inc., BlackRock Floating Rate Income Strategies Fund, Inc. and BlackRock Limited Duration Income Trust (each a Fund and collectively, the Funds) may utilize leverage to seek to enhance the yield and NAV. However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage through borrowings or through entering into reverse repurchase agreements and dollar rolls. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund s shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund s capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Fund with assets received from the borrowings earn the income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Fund s long-term investments, and therefore Common Shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Fund pays interest expense on the higher short-term interest rates whereas the Fund s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Funds portfolio investments generally varies

inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Funds borrowings do not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Funds NAV positively or negatively in addition to the impact on Fund performance from leverage from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Funds and shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Funds NAV, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Funds net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Fund s net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. Each Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments which may cause a Fund to incur losses. The use of leverage may limit each Fund s ability to invest in certain types of securities or use certain types of hedging strategies. Each Fund will incur expenses in connection with the use of leverage, all of which are borne by common shareholders of each Fund and may reduce income to the Common Shares.

Under the Investment Company Act of 1940, the Funds are permitted to borrow through their credit facility up to 33  $^1$ / $_3$ % of their total managed assets. As of February 28, 2010, the Funds had outstanding leverage from borrowings as a percentage of their total managed assets as follows:

	Percent of
	Leverage
BHL	16%
DVF	17%
FRA	15%
BLW	2%

10 SEMI-ANNUAL REPORT FEBRUARY 28, 2010

#### **Derivative Financial Instruments**

The Funds may invest in various derivative instruments, including swaps, financial futures contracts, foreign currency exchange contracts and options, as specified in Note 2 of the Notes to Financial Statements, which constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, interest rate, credit, equity and/or foreign currency exchange rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative instrument. The Funds ability to

successfully use a derivative instrument depends on the investment advisor s ability to accurately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require the Funds to sell or purchase portfolio securities at inopportune times or for distressed values, may limit the amount of appreciation the Funds can realize on an investment or may cause the Funds to hold a security that they might otherwise sell. The Funds investments in these instruments are discussed in detail in the Notes to Financial Statements.

## Disclosure of Expenses for Continuously Offered Closed-End Funds

Shareholders of BlackRock Senior Floating Rate Fund, Inc. and BlackRock Senior Floating Rate Fund II, Inc. may incur the following charges: (a) expenses related to transactions, including early withdrawal fees; and (b) operating expenses, including administration fees, and other Fund expenses. The examples on the previous pages (which are based on a hypothetical investment of \$1,000 invested on September 1, 2009 and held through February 28, 2010) are intended to assist shareholders both in calculating expenses based on an investment in each Fund and in comparing these expenses with similar costs of investing in other mutual funds.

The tables provide information about actual account values and actual expenses. In order to estimate the expenses a shareholder paid during the period covered by this report, shareholders can divide their account value by \$1,000 and then multiply the result by the number corresponding to their Fund under the heading entitled Expenses Paid During the Period.

The tables also provide information about hypothetical account values and hypothetical expenses based on each Fund s actual expense ratio and an assumed rate of return of 5% per year before expenses. In order to assist shareholders in comparing the ongoing expenses of investing in these Funds and other funds, compare the 5% hypothetical example with the 5% hypothetical examples that appear in other funds shareholder reports.

The expenses shown in the tables are intended to highlight shareholders ongoing costs only and do not reflect any transactional expenses, such

as early withdrawal fees. Therefore, the hypothetical examples are useful in comparing ongoing expenses only, and will not help shareholders determine the relative total expenses of owning different funds. If these transactional expenses were included, shareholder expenses would have been higher.

SEMI-ANNUAL REPORT FEBRUARY 28, 2010 15

## Schedule of Investments (concluded) BlackRock Defined Opportunity Credit Trust (BHL)

- (a) Non-income producing security.
- (b) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) Variable rate security. Rate shown is as of report date.
- (d) Represents a payment-in-kind security which may pay interest /dividend in additional par/shares.
- (e) Issuer filed for bankruptcy and/or is in default of interest payments.
- (f) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.
- (g) Amount is less than \$1,000.
- (h) Investments in companies considered to be an affiliate of the Fund, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

	Net		
	Activity	Income	
BlackRock Liquidity Funds, TempFund,			
Institutional Class	\$ 2,618,127	\$ 2,405	

(i) Represents the current yield as of report date.

Foreign currency exchange contracts as of February 28, 2010 were as follows:

Currence	су		Currency		Set	tlement Appreciation
Purcha	sed		Sold	Counterparty		Date (Depreciation)
USD	11,196,400	EUR	7,798,500	Citibank NA	3/24/10 \$	578,030
GBP	810,500	USD	1,271,847	Citibank NA	4/21/10	(36,487)
USD	186,561	GBP	119,500	Citibank NA	4/21/10	4,420
USD	2,967,636	GBP	1,833,000	Morgan Stanley		
				Capital Services, Inc.	4/21/10	173,787
Total						\$ 719,750

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations inactive markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for

Unrealized

similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the face value of investments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and other significant accounting policies, please refer to the Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 28, 2010 in determining the fair valuation of the Fund's investments:

#### **Investments in Securities**

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Long-Term				
Investments:				
Common Stocks	\$ 262,430		\$	262,430
Corporate Bonds		\$ 25,814,800	\$ 12,923	25,827,723
Floating Rate				
Loan Interests		100,198,281	19,908,439	120,106,720
Other Interests			1,067,720	1,067,720
Short-Term				
Securities	2,618,127			2,618,127
Total	\$ 2,880,557	\$126,013,081	\$20,989,082	\$149,882,720
	Other Financial Inst	ruments <sup>1</sup>		
Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets		\$756,237	\$ 7,410 \$	763,647
Liabilities		(36,487)	(16,408)	(52,895)
Total		\$719,750	\$ (8,998) \$	710,752

Other financial instruments are foreign currency exchange contracts and

unfunded loan commitments, which are shown at the unrealized appreciation/

depreciation on the instrument.

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Inv	estments in
		Securities
	Floating	
Corporate	Rate	Other

	Loan			
	Bonds	Interests	Interests	Total
Balance, as of August 31, 2009		\$24,495,356		\$24,495,356
Accrued discounts/premiums				
Realized gain (loss)		295,974		295,974
Change in unrealized appreciation/depreciation <sup>2</sup>	\$ (70)	3,033,712		3,033,642
Net purchases (sales)		(4,905,004)		(4,905,004)
Net transfers in/out of Level 3	12,993	(3,011,599)	\$1,067,720	(1,930,886)
Balance, as of February 28, 2010	\$ 12,923	\$19,908,439	\$1,067,720	\$20,989,082

<sup>&</sup>lt;sup>2</sup> Included in the related net change in unrealized appreciation/depreciation on the Statements of Operations. The change in unrealized appreciation/depreciation on securities

still held at February 28, 2010 was \$859,867.

The following table is a reconciliation of Level 3 other financial instruments for which significant unobservable inputs were used to determine fair value:

	Other Financial Instruments <sup>3</sup>	
	Assets	Liabilities
Balance, as of August 31, 2009	\$ 60,517	
Accrued discounts/premiums		
Realized gain (loss)		
Change in unrealized appreciation/depreciation		
Net purchases (sales)		
Net transfers in/out of Level 3	(53,107)	\$ (16,408)
Balance as of February 28, 2010	\$ 7,410	\$ (16,408)

<sup>&</sup>lt;sup>3</sup> Other financial instruments are unfunded loan commitments.

See Notes to Financial Statements.

	SEMI-ANNUAL REPORT FEBRUARY 28, 2010 21		

## Schedule of Investments (continued) BlackRock Diversified Income Strategies Fund, Inc. (DVF)

\* The cost and unrealized appreciation (depreciation) of investments as of

February 28, 2010, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$182,793,594
Gross unrealized appreciation	\$ 4,887,935
Gross unrealized depreciation	(25,868,167)
Net unrealized depreciation	\$ (20,980,232)

- (a) Variable rate security. Rate shown is as of report date.
- (b) Security exempt from registration under Rule 144A of the Securities Act of 1933.
  These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (c) Non-income producing security.
- (d) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (e) Convertible security.
- (f) Represents a payment-in-kind security which may pay interest/dividends in additional face/shares.
- (g) Issuer filed for bankruptcy and/or is in default of interest payments.
- (h) All or a portion of security has been pledged as collateral in connection with swaps.
- (i) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.
- (j) Amount is less than \$1,000.
- (k) Warrants entitle the Fund to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date.
- (I) Investments in companies considered to be an affiliate of the Fund, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

	Net	
Affiliate	Activity	Income
BlackRock Liquidity Funds, TempFund,		
Institutional Class	\$ (756,457)	\$2,200

(m) Represents the current yield as of report date.

Foreign currency exchange contracts as of February 28, 2010 were as follows:

Junior Term

Loan

Using Standard & Poor s weighted average ratings of the underlying securities in the index.

<sup>3</sup> The maximum potential amount the Fund may pay should a negative credit

event take place under the terms of the agreement. See Note 2 of the Notes to Financial Statements.

4 Using Standard & Poor s rating of the issuer.

For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations inactive markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market- corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the face value of investments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and other significant accounting

policies, please refer to the Note 1 of the Notes to Financial Statements.

See Notes to Financial Statements.

22 SEMI-ANNUAL REPORT FEBRUARY 28, 2010

## Schedule of Investments (concluded) BlackRock Diversified Income Strategies Fund, Inc. (DVF)

The following tables summarize the inputs used as of February 28, 2010 in deter-

mining the fair valuation of the Fund s investments:

#### **Investments in Securities**

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Long-Term				
Investments:				
Asset-Backed				
Securities		\$	513,243	\$ 513,243

Gross unrealized depreciation (27,016,013)
Net unrealized depreciation \$(19,241,051)

- (a) Non-income producing security.
- (b) Security exempt from registration under Rule 144A of the Securities Act of 1933.

These securities may be resold in transactions exempt from registration to qualified

institutional investors.

- (c) Variable rate security. Rate shown is as of report date.
- (d) Represents a payment-in-kind security which may pay interest/dividends in addi-

tional face/shares.

- (e) Convertible security.
- (f) Issuer filed for bankruptcy and/or is in default of interest payments.

(g) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.

(h) Amount is less than \$1,000.

(i) Investments in companies considered to be an affiliate of the Fund, for purposes of

Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

	Net		
Affiliate	Activity	Income	
BlackRock Liquidity Funds, TempFund,			
Institutional Class	\$ (576,054)	\$ 3,046	

(j) Represents the current yield as of report date.

<sup>\*</sup> The cost and unrealized appreciation (depreciation) of investments as of

See Notes to Financial Statements.

USD 3,479,242	GBP 2,149,000	Morgan Stanley		
		Capital Services, Inc.	4/21/10	203,747
Total				\$ 974,775

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations inactive markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market- corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the face value of investments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund s policy regarding valuation of investments and other significant accounting policies, please refer to the Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 28, 2010 in determining the fair valuation of the Fund s investments:

#### **Investments in Securities**

Valuation Inputs	Level 1	Level 2	Level 3	Total			
Assets:							
Long-Term							
Investments:							
Common Stocks	\$ 2,035,526	\$ 321,252 \$	62,123	\$ 2,418,901

\* The cost and unrealized appreciation (depreciation) of investments as of February 28,

2010, as computed for federal income tax purposes, were as follows:

Aggregate cost \$ 788,309,025
Gross unrealized appreciation \$ 18,987,503
Gross unrealized depreciation (47,542,203)
Net unrealized depreciation \$ (28,554,700)

- (a) Variable rate security. Rate shown is as of report date.
- (b) Non-income producing security.
- (c) Security exempt from registration under Rule 144A of the Securities Act of 1933.
  These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (d) Convertible security.
- (e) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (f) Represents a payment-in-kind security which may pay interest/dividends in additional face/shares.
- (g) Issuer filed for bankruptcy and/or is in default of interest payments.
- (h) All or a portion of security has been pledged as collateral in connection with TALF Program.
- (i) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.
- (j) Amount is less than \$1,000.
- (k) Security is perpetual in nature and has no stated maturity date.
- (I) Represents or includes a to-be-announced ( TBA ) transaction. Unsettled TBA transactions as of report date were as follows:

		Unrealized
Counterparty	Value	Appreciation
Goldman Sachs & Co.	\$ 127,354,002	\$ 182,315

- (m) All or a portion of security has been pledged as collateral in connection with open financial futures contracts.
- (n) Warrants entitle the Fund to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of

shares are subject to adjustment under certain conditions until the expiration date.

(o) Investments in companies considered to be an affiliate of the Fund, for purposes of

Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Net

Unrealized

Affiliate Activity Income

BlackRock Liquidity Funds, TempFund,

Institutional Class \$ (64,491,579) \$ 41,202

(p) Represents the current yield as of report date.

Foreign currency exchange contracts as of February 28, 2010 were as follows:

							Ulliealizeu

Total					\$ (1,031)

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations inactive markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market- corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund s own assumptions used in determining the face value of investments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund s policy regarding valuation of investments and other significant accounting policies, please refer to the Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 28, 2010 in determining the fair valuation of the Fund s investments:

#### Investments in Securities

Valuation Inputs Level 1 Level 2 Level 3 Total

#### Notes to Financial Statements (Unaudited)

#### 1. Organization and Significant Accounting Policies:

BlackRock Defined Opportunity Credit Trust (BHL), BlackRock Diversified Income Strategies Fund, Inc. ( DVF ), BlackRock Floating Rate Income Strategies Fund, Inc. (FRA), BlackRock Limited Duration Income Trust (BLW), BlackRock Senior Floating Rate Fund, Inc. (Senior Floating Rate) and BlackRock Senior Floating Rate Fund II, Inc. ( Senior Floating Rate II ) (collectively, referred to as the Funds or individually as the Fund ) are registered under the Investment Company Act of 1940, as amended (the 1940 Act ). BHL and BLW are organized as Delaware Statutory trusts. DVF, FRA, Senior Floating Rate and Senior Floating Rate II are organized as Maryland corporations. BHL, DVF, FRA and BLW are registered as diversified, closed-end management investment companies. Senior Floating Rate and Senior Floating Rate II are registered as continuously offered, nondiversified, closed-end management investment companies. The Funds financial statements are prepared in conformity with accounting principles generally accepted in the United States of America, which may require the use of management accruals and estimates. Actual results may differ from these estimates. The Boards of Directors and the Boards of Trustees of the Funds are referred to throughout this report as the Board of Directors or the Board. The Funds determine and make available for publication the net asset value of their shares on a daily basis.

Senior Floating Rate and Senior Floating Rate II seek to achieve their investment objectives by investing all their assets in the Master Senior Floating Rate LLC (the Master LLC), which has the same investment objective and strategies as these Funds. The value of each Fund s investment in the Master LLC reflects each Fund s proportionate interest in the net assets of the Master LLC. The performance of each Fund is directly affected by the performance of the Master LLC. The financial statements of the Master LLC, including the Schedule of Investments, are included elsewhere in this report and should be read in conjunction with Senior Floating Rate and Senior Floating Rate II s financial statements. The percentage of the Master LLC owned by Senior Floating Rate and Senior Floating Rate II at February 28, 2010 was 66% and 34%, respectively.

The following is a summary of significant accounting policies followed by the Funds:

Valuation: The Funds policy is to fair value their financial instruments at market value. The Funds value their bond investments on the basis of last available bid prices or current market quotations provided by dealers or pricing services selected under the supervision of each Fund s Board. Floating rate loan interests are valued at the mean between the last available bid prices from one or more brokers or dealers as obtained from a pricing service. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions

in comparable investments, various relationships observed in the market between investments and calculated yield measures based on valuation technology commonly employed in the market for such investments. Asset-backed and mortgage-backed securities are valued by independent pricing services using models that consider estimated cash flows of each tranche of the security, establishes a benchmark yield and develops an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. Financial futures contracts traded on exchanges

are valued at their last sale price. To be announced ( TBA ) commitments are valued at the current market value of the underlying securities. Swap agreements are valued utilizing quotes received daily by the Funds pricing service or through brokers, which are derived using daily swap curves and trades of underlying securities. Investments in open-end investment companies are valued at net asset value each business day. Short-term securities with remaining maturities of 60 days or less may be valued at amortized cost, which approximates fair value.

Certain Funds value their investment in BlackRock Liquidity Series, LLC Money Market Series (the "Money Market Series") at fair value, which is ordinarily based upon their pro rata ownership in the net assets of the underlying fund. The Money Market Series seeks current income consistent with maintaining liquidity and preserving capital. Although the Money Market Series is not registered under the 1940 Act, its investments will follow the parameters of investments by a money market fund that is subject to Rule 2a-7 promulgated by the Securities and Exchange Commission (SEC) under the 1940 Act. The Funds may withdraw up to 25% of their investment daily, although the manager of the Money Market Series, in its sole discretion, may permit an investor to withdraw more than 25% on any one day.

Equity investments traded on a recognized securities exchange or the NASDAQ Global Market System are valued at the last reported sale price that day or the NASDAQ official closing price, if applicable. For equity investments traded on more than one exchange, the last reported sale price on the exchange where the stock is primarily traded is used. Equity investments traded on a recognized exchange for which there were no sales on that day are valued at the last available bid price. If no bid price is available, the prior day s price will be used, unless it is determined that such prior day s price no longer reflects the fair value of the security.

Exchange-traded options are valued at the mean between the last bid and ask prices at the close of the options market in which the options trade. An exchange-traded option for which there is no mean price is valued at the last bid price. If no bid price is available, the prior day s price will be used, unless it is determined that such day s price no longer reflects the fair value of the option. Over-the-counter (OTC) options and swaptions are valued by an independent pricing service using a mathematical model which incorporates a number of market data factors, such as the trades and prices of the underlying instruments.

Securities and other assets and liabilities denominated in foreign currencies are translated into US dollars using exchange rates determined as of the close of business on the New York Stock Exchange (NYSE). Foreign currency exchange contracts are valued at the mid between the bid and ask prices and are determined as of the close of business on the NYSE. Interpolated values are derived when the settlement date of the contract is an interim date for which quotations are not available.

In the event that application of these methods of valuation results in a price for an investment which is deemed not to be representative of the market value of such investment or is not available, the investment will be valued by a method approved by each Fund s Board as reflecting fair value (Fair Value Assets). When determining the price for Fair Value Assets, the investment advisor and/or the sub-advisor seeks to determine the price

### Notes to Financial Statements (continued)

that each Fund might reasonably expect to receive from the current sale of that asset in an arm s-length transaction. Fair value determinations shall be based upon all available factors that the investment advisor and/or sub-advisor deems relevant. The pricing of all Fair Value Assets is subsequently reported to the Board or a committee thereof.

Generally, trading in foreign instruments is substantially completed each day at various times prior to the close of business on the NYSE. Occasionally, events affecting the values of such instruments may occur between the foreign market close and the close of business on the NYSE that may not be reflected in the computation of a Fund s net assets. If events (for example, a company announcement, market volatility or a natural disaster) occur during such periods that are expected to materially affect the value of such instruments, those instruments may be Fair Value Assets and be valued at their fair value, as determined in good faith by the Board or by the investment advisor using a pricing service and/or procedures approved by the Board.

Senior Floating Rate and Senior Floating Rate II record their investments in the Master LLC at fair value. Valuation of securities held by the Master LLC is discussed in Note 1 of the Master LLC s Notes to Financial Statements, which are included elsewhere in this report.

Fair Value Measurements: Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities.

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund s own assumptions used in determining the fair value of investments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

As of February 28, 2010, Senior Floating Rate and Senior Floating rate II s investment in the Master LLC was classified as level 2. More relevant disclosure regarding fair value measurements relates to the Master LLC, which

is disclosed in the Master LLC s Schedule of Investments included elsewhere in this report.

Foreign Currency Transactions: Foreign currency amounts are translated into United States dollars on the following basis: (i) market value of investment securities, assets and liabilities at the current rate of exchange; and (ii) purchases and sales of investment securities, income and expenses at the rates of exchange prevailing on the respective dates of such transactions.

The Funds report foreign currency related transactions as components of realized gains for financial reporting purposes, whereas such components are treated as ordinary income for federal income tax purposes.

Asset-Backed and Mortgaged-Backed Securities: Certain Funds may invest in asset-backed securities. Asset-backed securities are generally issued as pass-through certificates, which represent undivided fractional ownership interests in an underlying pool of assets, or as debt instruments, which are also known as collateralized obligations, and are generally issued as the debt of a special purpose entity organized solely for the purpose of owning such assets and issuing such debt. Asset-backed securities are often backed by a pool of assets representing the obligations of a number of different parties. The yield characteristics of certain asset-backed securities may differ from traditional debt securities. One such major difference is that all or a principal part of the obligations may be prepaid at any time because the underlying assets (i.e., loans) may be prepaid at any time. As a result, a decrease in interest rates in the market may result in increases in the level of prepayments as borrowers, particularly mortgagors, refinance and repay their loans. An increased prepayment rate with respect to an asset-backed security subject to such a prepayment feature will have the effect of shortening the maturity of the security. If a Fund has purchased such an asset-backed security at a premium, a faster than anticipated prepayment rate could result in a loss of principal to the extent of the premium paid.

Certain Funds may purchase certain mortgage pass-through securities. There are a number of important differences among the agencies and instrumentalities of the US Government that issue mortgage-related securities and among the securities that they issue. For example, mortgage-related securities guaranteed by the Government National Mortgage Association (GNMA) are guaranteed as to the timely payment of principal and interest by GNMA and such guarantee is backed by the full faith and credit of the United States. However, mortgage-related securities issued by the Federal Home Loan Mortgage Corporation (FHLMC) and Federal National Mortgage Association (FNMA), including FNMA guaranteed Mortgage Pass-Through Certificates which are solely the obligations of the FNMA, are not backed by or entitled to the full faith and credit of the United States and are supported by the right of the issuer to borrow from the Treasury.

Certain Funds invest a significant portion of their assets in securities

backed by commercial or residential mortgage loans or in issuers that hold mortgage and other asset-backed securities. Please see the Schedules of Investments for these securities. Changes in economic conditions, including delinquencies and/or defaults on assets underlying these securities, can affect the value, income and/or liquidity of such positions.

Forward Commitments and When-Issued Delayed Delivery Securities: Certain Funds may purchase securities on a when-issued basis and may purchase or sell securities on a forward commitment basis. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Funds may purchase securities under such conditions with the intention of actually acquiring them, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Funds may be required to pay more at settlement than

## Notes to Financial Statements (continued)

the security is worth. In addition, the purchaser is not entitled to any of the interest earned prior to settlement. When purchasing a security on a delayed delivery basis, the Funds assume the rights and risks of ownership of the security, including the risk of price and yield fluctuations. In the event of default by the counterparty, the Funds maximum amount of loss is the unrealized gain of the commitment, which is shown on the Schedules of Investments, if any.

Preferred Stock: Certain Funds may invest in preferred stocks. Preferred stock has a preference over common stock in liquidation (and generally in receiving dividends as well) but is subordinated to the liabilities of the issuer in all respects. As a general rule, the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics. Unlike interest payments on debt securities, preferred stock dividends are payable only if declared by the issuer s board of directors. Preferred stock also may be subject to optional or mandatory redemption provisions.

Floating Rate Loans: Certain Funds may invest in floating rate loans, which are generally non-investment grade, made by banks, other financial institutions, and privately and publicly offered corporations. Floating rate loans are senior in the debt structure of a corporation. Floating rate loans generally pay interest at rates that are periodically determined by reference to a base lending rate plus a premium. The base lending rates are generally (i) the lending rate offered by one or more European banks, such as LIBOR (London Inter Bank Offered Rate), (ii) the prime rate offered by one or more US banks or (iii) the certificate of deposit rate. The Funds consider these investments to be investments in debt securities for purposes of their investment policies.

The Funds earn and/or pay facility and other fees on floating rate loans. Other fees earned/paid include commitment, amendment, consent and prepayment penalty fees. Facility, commitment and amendment fees are typically amortized over the term of the loan. Consent fees and various other fees are recorded as income. Prepayment penalty fees are recorded as realized gains. When a Fund buys a floating rate loan it may receive a facility fee and when it sells a floating rate loan it may pay a facility fee. On an ongoing basis, the Funds may receive a commitment fee based on the undrawn portion of the underlying line of credit portion of a floating rate loan. In certain circumstances, the Funds may receive a prepayment penalty fee upon the prepayment of a floating rate loan by a borrower. Other fees received by the Funds may include covenant waiver fees and covenant modification fees.

The Funds may invest in multiple series or tranches of a loan. A different series or tranche may have varying terms and carry different associated risks.

Floating rate loans are usually freely callable at the issuer s option. The Funds may invest in such loans in the form of participations in loans ( Participations ) and assignments of all or a portion of loans from third

parties. Participations typically will result in the Funds having a contractual relationship only with the lender, not with the borrower. The Funds will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the Participation and only upon receipt by the lender of the payments from the borrower.

In connection with purchasing Participations, the Funds generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loans, nor any rights of offset against the borrower, and the Funds may not benefit directly from any collateral supporting the loan in which it has purchased the Participation.

As a result, the Funds will assume the credit risk of both the borrower and the lender that is selling the Participation. The Funds investments in loan participation interests involve the risk of insolvency of the financial intermediaries who are parties to the transactions. In the event of the insolvency of the lender selling the Participation, the Funds may be treated as a general creditor of the lender and may not benefit from any offset between the lender and the borrower.

Mortgage Dollar Roll Transactions: Certain Funds may sell mortgage-backed securities and simultaneously contract to repurchase substantially similar (same type, coupon and maturity) securities on a specific future date at an agreed-upon price. During the period between the sale and repurchase, the Funds will not be entitled to receive interest and principal payments on the securities sold. The Funds account for dollar roll transactions as purchases and sales and realize gains and losses on these transactions. Mortgage dollar rolls involve the risk that the market value of the securities that the Funds are required to purchase may decline below the agreed upon repurchase price of those securities.

Reverse Repurchase Agreements: Certain Funds may enter into reverse repurchase agreements with qualified third party broker-dealers. In a reverse repurchase agreement, the Funds sell securities to a bank or broker-dealer and agree to repurchase the securities at a mutually agreed upon date and price. Certain agreements have no stated maturity and can be terminated by either party at any time. Interest on the value of the reverse repurchase agreements issued and outstanding is based upon competitive market rates determined at the time of issuance. The Funds may utilize reverse repurchase agreements when it is anticipated that the interest income to be earned from the investment of the proceeds of the transaction is greater than the interest expense of the transaction. Reverse

repurchase agreements involve leverage risk and also the risk that the market value of the securities that the Funds are obligated to repurchase under the agreement may decline below the repurchase price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Funds use of the proceeds of the agreement may be restricted while the other party, or its trustee or receiver, determines whether or not to enforce the Funds obligation to repurchase the securities.

TBA Commitments: Certain Funds may enter into TBA commitments to purchase or sell securities for a fixed price at a future date. TBA commitments involve a risk of loss if the value of the security to be purchased or sold declines or increases prior to settlement date, which is in addition to the risk of decline in the value of the Funds other assets.

54 SEMI-ANNUAL REPORT FEBRUARY 28, 2010

### Notes to Financial Statements (continued)

Segregation and Collateralization: In cases in which the 1940 Act and the interpretive positions of the SEC require that the Funds either deliver collateral or segregate assets in connection with certain investments (e.g., dollar rolls, TBAs beyond normal settlement, financial futures contracts, foreign currency exchange contracts and swaps), or certain borrowings (e.g., reverse repurchase agreements and loan payable) each Fund will, consistent with SEC rules and/or certain interpretive letters issued by the SEC, segregate collateral or designate on its books and records cash or other liquid securities having a market value at least equal to the amount that would otherwise be required to be physically segregated. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, each party has requirements to deliver/deposit securities as collateral for certain investments.

Investment Transactions and Investment Income: For financial reporting purposes, investment transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on investment transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Dividends from foreign securities where the ex-dividend date may have passed are subsequently recorded when the Funds have determined the ex-dividend date. Interest income is recognized on the accrual basis. The Funds amortize all premiums and discounts on debt securities. Consent fees are compensation for agreeing to changes in the terms of debt instruments and are included in interest income in the Statements of Operations.

Senior Floating Rate and Senior Floating Rate II record daily their proportionate share of the Master LLC s income, expenses and realized and unrealized gains and losses. In addition, both Funds accrue their own expenses.

Dividends and Distributions: Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates. If the total dividends and distributions made in any tax year exceed net investment income and accumulated realized capital gains, a portion of the total distribution may be treated as a tax return of capital.

Income Taxes: It is each Fund s policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required. Under the applicable foreign tax laws, a withholding tax may be imposed on interest, dividends and capital gains at various rates.

Each Fund files US federal and various state and local tax returns. No income tax returns are currently under examination. The statute of limitations on the Funds US federal tax returns remains open for the two periods ended August 31, 2009 for BHL, the four years ended August 31, 2009

for DVF, FRA, Senior Floating Rate and Senior Floating Rate II, and the two years ended October 31, 2007 and the two periods ended August 31, 2009 for BLW. The statutes of limitations on the Funds state and local tax returns may remain open for an additional year depending upon the jurisdiction.

Recent Accounting Standards: In June 2009, amended guidance was issued by the Financial Accounting Standards Board (FASB) for transfers

of financial assets. This guidance is intended to improve the relevance, representational faithfulness and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor s continuing involvement, if any, in transferred financial assets. The amended guidance is effective for financial statements for fiscal years and interim periods beginning after November 15, 2009. Earlier application is prohibited. The recognition and measurement provisions of this guidance must be applied to transfers occurring on or after the effective date. Additionally, the enhanced disclosure provisions of the amended guidance should be applied to transfers that occurred both before and after the effective date of this guidance. The impact of this guidance on the Funds financial statements and disclosures, if any, is currently being assessed.

In January 2010, the FASB issued amended guidance to improve disclosure about fair value measurements which will require additional disclosures about transfers into and out of Levels 1 and 2 and separate disclosures about purchases, sales, issuances and settlements in the reconciliation for fair value measurements using significant unobservable inputs (Level 3). It also clarifies existing disclosure requirements relating to the levels of disaggregation for fair value measurement and inputs and valuation techniques used to measure fair value. The amended guidance is effective for financial statements for fiscal years and interim periods beginning after December 15, 2009 except for disclosures about purchases, sales, issuances and settlements in the rollforward of activity in Level 3 fair value measurements, which are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years. The impact of this guidance on the Funds financial statements and disclosures is currently being assessed.

Deferred Compensation and BlackRock Closed-End Share Equivalent Investment Plan: Under the deferred compensation plan approved by each Fund's Board, non-interested Directors (Independent Directors) may defer a portion of their annual complex-wide compensation. Deferred amounts earn an approximate return as though equivalent dollar amounts had been invested in common shares of other certain BlackRock Closed-End Funds selected by the Independent Directors. This has approximately the same economic effect for the Independent Directors as if the Independent Directors had invested the deferred amounts directly in other certain BlackRock Closed-End Funds.

The deferred compensation plan is not funded and obligations there under represent general unsecured claims against the general assets of each Fund. Each Fund may, however, elect to invest in common shares of other certain BlackRock Closed-End Funds selected by the Independent Directors in order to match its deferred compensation obligations. Investments to cover each Fund s deferred compensation liability, if any, are included in other assets in the Statements of Assets and Liabilities. Dividends and distributions from the BlackRock Closed-End Funds investments under the plan are included in income affiliated in the Statements of Operations.

Other: Expenses directly related to a Fund are charged to that Fund. Other operating expenses shared by several funds are pro rated among those funds on the basis of relative net assets or other appropriate methods. The Funds have an arrangement with the custodians whereby fees may be

SEMI-ANNUAL REPORT FEBRUARY 28, 2010 55

### Notes to Financial Statements (continued)

reduced by credits earned on uninvested cash balances, which if applicable are shown as fees paid indirectly in the Statements of Operations. The custodians impose fees on overdrawn cash balances, which can be offset by accumulated credits earned or may result in additional custody charges.

#### 2. Derivative Financial Instruments:

The Funds may engage in various portfolio investment strategies both to increase the returns of the Funds and to economically hedge, or protect, their exposure to certain risks such as credit risk, equity risk, interest rate risk and foreign currency exchange rate risk. Losses may arise if the value of the contract decreases due to an unfavorable change in the price of the underlying instrument or if the counterparty does not perform under the contract. The Funds may mitigate counterparty risk through master netting agreements included within an International Swap and Derivatives Association, Inc. ( ISDA ) Master Agreement between a Fund and each of its counterparties. The ISDA Master Agreement allows each Fund to offset with its counterparty certain derivative financial instrument s payables and/or receivables with collateral held with each counterparty. The amount of collateral moved to/from applicable counterparties is based upon minimum transfer amounts of up to \$500,000. To the extent amounts due to the Funds from their counterparties are not fully collateralized contractually or otherwise, the Funds bear the risk of loss from counterparty non-performance. See Note 1 Segregation and Collateralization for information with respect to collateral practices.

The Fund s maximum risk of loss from counterparty credit risk on OTC derivatives is generally the aggregate unrealized gain in excess of any collateral pledged by the counterparty to the Funds. For OTC options purchased, the Funds bear the risk of loss in the amount of the premiums paid and change in market value of the options should the counterparty not perform under the contracts. Options written by the Funds do not give rise to counterparty credit risk, as options written obligate the Funds to perform and not the counterparty. Certain ISDA Master Agreements allow counterparties to OTC derivatives to terminate derivative contracts prior to maturity in the event a Fund s net assets decline by a stated percentage or a Fund fails to meet the terms of its ISDA Master Agreements, which would cause a Fund to accelerate payment of any net liability owed to the counterparty. Counterparty risk related to exchange-traded financial futures contracts and options is minimal because of the protection against defaults provided by the exchange on which they trade.

Financial Futures Contracts: The Funds may purchase or sell financial futures contracts and options on financial futures contracts to gain exposure to, or economically hedge against, changes in interest rates (interest rate risk) or foreign currencies (foreign currency exchange rate risk). Financial futures contracts are contracts for delayed delivery of securities or currencies at a specific future date and at a specific price or

yield. Pursuant to the contract, the Funds agree to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as margin variation and are recognized by the Funds as unrealized gains or losses. When the contract is closed, the Funds record a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The use of financial futures transactions involves the risk of an imperfect correlation in the movements in the price of finan-

cial futures contracts, interest or foreign currency exchange rates and the underlying assets.

Foreign Currency Exchange Contracts: The Funds may enter into foreign currency exchange contracts as an economic hedge against either specific transactions or portfolio positions (foreign currency exchange rate risk). A foreign currency exchange contract is an agreement between two parties to buy and sell a currency at a set exchange rate on a future date. Foreign currency exchange contracts, when used by the Funds, help to manage the overall exposure to the currency backing some of the investments held by the Funds. The contract is marked-to-market daily and the change in market value is recorded by the Funds as an unrealized gain or loss. When the contract is closed, the Funds record a realized gain or loss equal to the difference between the value at the time it was opened and the value at the time it was closed. The use of foreign currency exchange contracts involves the risk that counterparties may not meet the terms of the agreement or unfavorable movements in the value of a foreign currency relative to the US dollar.

Options: The Funds may purchase and write call and put options to increase or decrease their exposure to underlying instruments (equity risk) and/or, in the case of options written, to generate gains from options premiums. A call option gives the purchaser of the option the right (but not the obligation) to buy, and obligates the seller to sell (when the option is exercised), the underlying instrument at the exercise price at any time or at a specified time during the option period. A put option gives the holder the right to sell and obligates the writer to buy the underlying instrument at the exercise price at any time or at a specified time during the option period. When a Fund purchases (writes) an option, an amount equal to the premium paid (received) by a Fund is reflected as an asset (liability). The amount of the asset (liability) is subsequently marked-to-market to reflect the current market value of the option purchased (written). When an instrument is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the instrument acquired or deducted from (or added to) the proceeds of the instrument sold. When an option expires (or a Fund enters into a closing transaction), a Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium received or paid). When a Fund writes a call option, such option is covered, meaning that a Fund holds the underlying instrument subject to being called by the option counterparty, or cash in an amount sufficient to cover the obligation. When a Fund

writes a put option, such option is covered by cash in an amount sufficient to cover the obligation.

Options on swaps (swaptions) are similar to options on securities except that instead of selling or purchasing the right to buy or sell a security, the writer or purchaser of the swap option is granting or buying the right to enter into a previously agreed upon interest rate swap agreement at any time before the expiration of the option.

In purchasing and writing options, a Fund bears the risk of an unfavorable change in the value of the underlying instrument or the risk that a Fund may not be able to enter into a closing transaction due to an illiquid market. Exercise of an option written could result in a Fund purchasing or

56 SEMI-ANNUAL REPORT FEBRUARY 28, 2010

### Notes to Financial Statements (continued)

selling a security at a price different from the current market value. The Funds may execute transactions in both listed and OTC options.

Swaps: Each Fund may enter into swap agreements, in which a Fund and a counterparty agree to make periodic net payments on a specified notional amount. These periodic payments received or made by the Funds are recorded in the Statements of Operations as realized gains or losses, respectively. Any upfront fees paid are recorded as assets and any upfront fees received are recorded as liabilities and amortized over the term of the swap. Swaps are marked-to-market daily and changes in value are recorded as unrealized appreciation (depreciation). When the swap is terminated, the Fund will record a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund s basis in the contract, if any. Swap transactions involve, to varying degrees, elements of interest rate, credit and market risk in excess of the amounts recognized in the Statements of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavorable changes in interest rates and/or market values associated with these transactions.

Credit default swaps Each Fund may enter into credit default swaps to manage its exposure to the market or certain sectors of the market, to reduce its risk exposure to defaults of corporate and/or sovereign issuers or to create exposure to corporate and/or sovereign issuers to which it is not otherwise exposed (credit risk). The Funds enter into credit default agreements to provide a measure of protection against the default of an issuer (as buyer protection) and/or gain credit exposure to an issuer to which it is not otherwise exposed (as seller of protection). The Fund may either buy or sell (write) credit default swaps on single-name issuers (corporate or sovereign) or traded indexes. Credit default swaps on single-name issuers are agreements in which the buyer pays fixed periodic payments to the seller in consideration for a

guarantee from the seller to make a specific payment should a negative credit event take place (e.g., bankruptcy, failure to pay, obligation accelerators, repudiation, moratorium or restructuring). Credit default swaps on traded indexes are agreements in which the buyer pays fixed periodic payments to the seller in consideration for a guarantee from the seller to make a specific payment should a write-down, principal or interest shortfall or default of all or individual underlying securities included in the index occurs. As a buyer, if an underlying credit event occurs, a Fund will either receive from the seller an amount equal to the notional amount of the swap and deliver the referenced security or underlying securities comprising of an index or receive a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising of an index.

As a seller (writer), if an underlying credit event occurs, a Fund will either pay the buyer an amount equal to the notional amount of the swap and take delivery of the referenced security or underlying securities comprising of an index or pay a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising of an index.

Interest rate swaps Each Fund may enter into interest rate swaps to manage duration, the yield curve or interest rate risk by economically hedging the value of the fixed rate bonds which may decrease when interest rates rise (interest rate risk). Interest rate swaps are agreements in which one party pays a floating rate of interest on a notional principal amount and receives a fixed rate of interest on the same notional principal amount for a specified period of time. Interest rate floors, which are a type of interest rate swap, are agreements in which one party agrees to make payments to the other party to the extent that interest rates fall below a specified rate or floor in return for a premium. In more complex swaps, the notional principal amount may decline (or amortize) over time.

## 3. Investment Advisory Agreement and Other Transactions with Affiliates:

The PNC Financial Services Group, Inc. ("PNC"), Bank of America Corporation ("BAC") and Barclays Bank PLC ("Barclays") are the largest stockholders of BlackRock, Inc. ("BlackRock"). Due to the ownership structure, PNC is an affiliate for 1940 Act purposes, but BAC and Barclays are not.

BHL, DVF, FRA and BLW have entered into an Investment Advisory Agreement with BlackRock Advisors, LLC (the Manager ), the Funds investment advisor, an indirect, wholly owned subsidiary of BlackRock, to provide investment advisory and administration services.

The Manager is responsible for the management of each Fund s portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of each Fund. For such services, each Fund pays the Manager a monthly fee of each Fund s average daily value of its respective net assets plus the proceeds of any outstanding borrowings at the following annual rates:

BHL	1.00%
DVF	0.75%
FRA	0.75%

BLW 0.55%

The Manager has voluntarily agreed to waive its advisory fees by the amount of investment advisory fees each Fund pays to the Manager

58 SEMI-ANNUAL REPORT FEBRUARY 28, 2010

## Notes to Financial Statements (continued)

DVF

indirectly through its investment in affiliated money market funds; however, the Manager does not waive its advisory fees by the amount of investment advisory fees through its investment in other affiliated investment companies. These amounts are included in fees waived by advisor in the Statements of Operations. For the six months ended February 28, 2010, the amounts waived were as follows:

	Fees Waived
	by Manager
BHL	

FRA \$ 1,347

BLW \$18,003

The Manager, on behalf of BHL, DVF, FRA and BLW has entered into a separate sub-advisory agreement with BlackRock Financial Management, Inc. (BFM), an affiliate of the Manager, under which the Manager pays BFM for services it provides, a monthly fee that is a percentage of the investment advisory fee paid by each Fund to the Manager.

For the six months ended February 28, 2010, certain Funds reimbursed the Manager for certain accounting services, which are included in accounting services in the Statements of Operations.

	Accounting
	Services
BHL	\$1,453
DVF	\$1,289
FRA	\$2,415
BLW	\$5,260

Senior Floating Rate and Senior Floating Rate II have entered into an Administration Agreement with the Manager. The administration fee paid to the Manager is calculated daily and paid monthly based on an annual rate of 0.25% and 0.40%, respectively, of the average daily value of these Fund s net assets for the performance of administrative services (other than investment advice and related portfolio activities) necessary for the operation of these Funds.

Senior Floating Rate and Senior Floating Rate II entered into a separate Distribution Agreement and Distribution Plan with BlackRock Investments, LLC (BRIL), which is an affiliate of BlackRock.

\$1,051

\$ 976

For the six months ended February 28, 2010, BRIL received early with-drawal charges for Senior Floating Rate and Senior Floating Rate II in the amount of \$154,083 and \$22,869, respectively, relating to the tender of each Fund s shares.

PNC Global Investment Servicing (U.S.) Inc., an indirect, wholly owned subsidiary of PNC and an affiliate of the Manager, is the transfer agent and dividend disbursing agent for Senior Floating Rate and Senior Floating Rate II. Transfer agency fees borne by the Funds are comprised of those fees charged for all shareholder communications including mailing of shareholder reports, dividend and distribution notices, and proxy materials for shareholder meetings, as well as per account and per transaction fees related to servicing and maintenance of shareholder accounts, including the issuing, redeeming and transferring of shares, check writing, anti-money laundering services, and customer identification services.

Senior Floating Rate and Senior Floating Rate II may earn income on positive cash balances in demand deposit accounts that are maintained by the transfer agent on behalf of the Funds. These amounts are included in income affiliated in the Statements of Operations.

Certain officers and/or directors of the Funds are officers and/or directors of BlackRock or its affiliates. The Funds reimburse the Manager for compensation paid to the Funds Chief Compliance Officer.

#### 4. Investments:

Purchases and sales of investments (including paydowns and mortgage dollar roll transactions and excluding short-term securities and US government securities) for the six months ended February 28, 2010, were as follows:

	Purchases	Sales
BHL	\$ 79,601,150	\$ 80,273,519
DVF	\$ 100,130,378	\$ 86,983,707
FRA	\$ 167,412,050	\$ 155,107,562
BI W	\$1,149,665,741	\$1,049,052,368

For the six months ended February 28, 2010, sales of US government securities for BLW were \$3,482,797.

For the six months ended February 28, 2010, purchases and sales for BLW attributable to mortgage dollar rolls were \$966,354,141 and \$968,993,352, respectively.

#### 5. Commitments:

Certain Funds may invest in floating rate loans. In connection with these

investments, the Funds may also enter into unfunded corporate loans (commitments). Commitments may obligate the Funds to furnish temporary financing to a borrower until permanent financing can be arranged. In connection with these commitments, the Funds earn a commitment fee, typically set as a percentage of the commitment amount. Such fee income, which is classified in the Statements of Operations as facility and other fees, is recognized ratably over the commitment period. As of February 28, 2010, the Funds had the following unfunded loan commitments:

#### **Borrower**

		Value of

2017			16,221,457	7,728,284
Total			\$282,849,718	\$ 37,618,235

#### 7. Market and Credit Risk:

In the normal course of business, the Funds invest in securities and enter into transactions where risks exist due to fluctuations in the market (market risk) or failure of the issuer of a security to meet all its obligations (credit risk). The value of securities held by the Funds may decline in response to certain events, including those directly involving the issuers whose securities are owned by the Funds; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency and interest rate and price fluctuations. Similar to credit risk, the Funds may be exposed to counterparty risk, or

the risk that an entity with which the Funds have unsettled or open transactions may default. Financial assets, which potentially expose the Funds to credit and counterparty risks, consist principally of investments and cash due from counterparties. The extent of the Funds exposure to credit and counterparty risks with respect to these financial assets is generally

approximated by their value recorded in the Funds Statements of Assets and Liabilities, less any collateral held by the Funds.

#### 8. Capital Share Transactions:

**Senior Floating Rate II** 

BHL and BLW are authorized to issue an unlimited number of shares, par value \$0.001, all of which were initially classified as Common Shares. DVF and FRA are authorized to issue 200 million shares, par value \$0.10, all of which were initially classified as Common Shares. The Board is authorized, however, to classify and reclassify any unissued shares without approval of Common Shareholders.

During the six months ended February 28, 2010 and the year ended August 31, 2009, the shares issued and outstanding increased by the following amounts as a result of dividend reinvestments:

	Six Months Ended	Year Ended
	February 28, 2010	August 31, 2009
BHL		84,923
DVF	15,929	129,277
FRA	34,797	31,791

Shares issued and outstanding remained constant during the six months ended February 28, 2010 and the year ended August 31, 2009 for BLW.

At February 28, 2010, the shares owned by affiliates of the Manager of the Funds were as follows:

	Shares
BHL	8,517
FRA	8,726
BLW	6,021

Transactions in capital shares, with respect to Senior Floating Rate and Senior Floating Rate II, were as follows:

	5	Six Months Ended	Year End	ed
	i	February 28, 2010	August 3	1, 2009

60 SEMI-ANNUAL REPORT FEBRUARY 28, 2010

## Notes to Financial Statements (concluded)

#### 9. Borrowings

On December 22, 2009, BLW borrowed under the Term Asset-Backed Securities Loan Facility ( TALF ). The TALF program was launched by the U.S. Department of Treasury and the Federal Reserve Board as a credit facility designed to restore liquidity to the market for asset-backed securities. The Federal Reserve Bank of New York ( FRBNY ) will provide up to \$1 trillion in non-recourse loans to support the issuance of certain AAA-rated asset-backed securities and commercial mortgage-backed securities ( Eligible Securities ). The Fund posted as collateral already-held Eligible Securities, which were all commercial mortgage-backed securities, in return for non-recourse, 5-year term loans ( TALF loans ) in an amount equal to approximately 85% of the value of such Eligible Securities. The TALF loans are shown as loan payable on the Statements of Assets and Liabilities. The following is a summary of the outstanding TALF loans and related information as of February 28, 2010:

	Aggregate				Value of
	Number	Amount	Maturity	Interest	Eligible
	of Loans	of Loans	Date(s)	Rates	Securities
BLW	1	\$12,744,165	12/22/14	3.62%	\$15,576,712

The non-recourse provision of the TALF loans allows the Fund to satisfy loan obligations with Eligible Securities, subject to certain conditions, even if the value of the Eligible Securities falls below the outstanding amount of the loan. The Fund can repay TALF loans prior to the maturity dates with no penalty. Principal and interest due on the loans will typically be paid with principal paydowns and interest received from the Eligible Securities. Credit agreements underlying each loan contain provisions to address instances in which interest payments on Eligible Securities fall short of amounts due to the FRBNY. The Fund paid to the FRBNY a one time administration fee of 0.20% of the amount borrowed, which was expensed as incurred in the current period by the Fund and is included in borrowing costs in the Statements of Operations. The Fund also pays a financing fee equal to the 5-year LIBOR swap rate plus 1.00% on the outstanding loan amount payable monthly, which is included in interest expense in the Statements of Operations.

Since the Fund has the ability to potentially satisfy TALF loan obligations by surrendering Eligible Securities, potential losses by the Fund associated with the TALF loans are limited to the difference between the amount of Eligible Securities posted at the time of loan initiation and the loan proceeds received by the Fund.

The Fund has elected to account for the outstanding TALF loans at fair value. The Fund elected to fair value its TALF loans to more closely align

changes in the value of the TALF loans with changes in the value of the Eligible Securities and to reduce the potential volatility in the Statements of Operations which could result if only the Eligible Securities were fair valued. In fair valuing TALF loans, the Fund considers various factors such as observable market transactions, if available, changes in the value of Eligible Securities, interest rate movements, and the potential likelihood and timing of loan repayments. Any change in unrealized gain or loss associated with fair valuing TALF loans will be reflected in the Statements of Operations. As of February 28, 2010, the fair value of the Fund s TALF loan obligation was determined to be equal to its face value and as a result there were no unrealized gains or losses recorded by the Fund.

On March 5, 2009, BHL, DVF, and FRA entered into a senior committed secured, 364-day revolving line of credit and a separate security agreement

(the SSB Agreement ) with State Street Bank and Trust Company (SSB). The Funds have granted a security interest in substantially all of their assets to SSB. The agreement allowed for the following maximum commitment amounts:

Communication Amount	
\$ 55,000,000	BHL
\$ 50,000,000	DVF
\$103,000,000	FRA

Advances are made by SSB to the Funds, at the Funds option (a) the higher of (i) 1.0% above the Fed Effective Rate and (ii) 1.0% above the Overnight LIBOR or (b) 1.0% above 7-day, 30-day, 60-day or 90-day LIBOR. In addition, the Funds pay a facility fee and a commitment fee based upon SSB s total commitment to the Funds. The fees associated with each of the agreements are included in the Statements of Operations as borrowing costs. Advances to the Funds as of February 28, 2010 are shown in the Statements of Assets and Liabilities as loan payable. The SSB Agreement was renewed for 364 days under substantially the same terms effective March 4, 2010. The SSB Agreement allows for the following maximum commitment amounts:

	Communent Amount
BHL	\$ 55,000,000
DVF	\$ 55,000,000
FRA	\$103,000,000

The Funds may not declare dividends or make other distributions on shares or purchase any such shares if, at the time of the declaration, distribution or purchase, asset coverage with respect to the outstanding short term borrowings is less than 300%.

Commitment Amount

Commitment Amount

For the six months ended February 28, 2010, the daily weighted average interest rates for funds with loans under the revolving credit agreements were as follows:

**Daily Weighted** 

**Average** 

**Interest Rate** 

BHL 1.20% DVF 1.20% FRA 1.20%

For the six months ended February 28, 2010, the daily weighted average interest rates for funds with reverse repurchase agreements were as follows:

**Daily Weighted** 

Average

**Interest Rate** 

0.18%

#### 10. Subsequent Events:

Management s evaluation of the impact of all subsequent events on the Funds financial statements was completed through the date the financial statements were issued and the following items were noted:

Each Fund paid a net investment income dividend on March 31, 2010 to Common Shareholders of record on March 15, 2010 as follows:

BHL \$0.0540 DVF \$0.0685 FRA \$0.0815 BLW \$0.0750

SEMI-ANNUAL REPORT FEBRUARY 28, 2010 67

## Schedule of Investments (concluded) Master Senior Floating Rate LLC

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations inactive markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market- corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Master LLC s own assumptions used in determining the face value of investments)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Master LLC s policy regarding valuation of investments and other significant accounting policies, please refer to the Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 28, 2010 in determining the fair valuation of the Master LLC s investments:

72 SEMI-ANNUAL REPORT FEBRUARY 28, 2010

## Notes to Financial Statements (Unaudited) Master Senior Floating Rate LLC

#### 1. Organization and Significant Accounting Policies:

Master Senior Floating Rate LLC (the Master LLC ) is registered under the Investment Company Act of 1940, as amended (the 1940 Act ), and is organized as a Delaware limited liability company. The Master LLC s Limited Liability Company Agreement permits the Board of Directors of the Master LLC (the Board ) to issue nontransferable interests, subject to certain limitations. The Master LLC s financial statements are prepared in conformity with accounting principles generally accepted in the United States of America, which may require the use of management accruals and estimates. Actual results may differ from these estimates.

The following is a summary of significant accounting policies followed by the Master LLC:

Valuation: The Master LLC s policy is to fair value its financial instruments at market value. The Master LLC values its bond investments on the basis of last available bid prices or current market quotations provided by dealers or pricing services selected under the supervision of the Master LLC s Board. Floating rate loan interests are valued at the mean between the last available bid prices from one or more brokers or dealers as obtained from a pricing service. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions in comparable investments, various relationships observed in the market between investments and calculated yield measures based on valuation technology commonly employed in the market for such investments. Swap agreements are valued utilizing quotes received daily by the Master LLC s pricing service or through brokers which are derived using daily swap curves and trades of underlying securities. Investments in openend investment companies are valued at net asset value each business day. Short-term securities with remaining maturities of 60 days or less may be valued at amortized cost, which approximates fair value.

Equity investments traded on a recognized securities exchange or the NASDAQ Global Market System are valued at the last reported sale price that day or the NASDAQ official closing price, if applicable. For equity investments traded on more than one exchange, the last reported sale price on the exchange where the stock is primarily traded is used. Equity investments traded on a recognized exchange for which there were no sales on that day are valued at the last available bid price. If no bid price is available, the prior day s price will be used, unless it is determined that such prior day s price no longer reflects the fair value of the security.

In the event that application of these methods of valuation results in a price for an investment which is deemed not to be representative of the market value of such investment or is not available, the investment will be valued by a method approved by the Master LLC s Board as reflecting

fair value (Fair Value Assets). When determining the price for Fair Value Assets, the investment advisor and/or the sub-advisor seeks to determine the price that the Master LLC might reasonably expect to receive from the current sale of that asset in an arm s-length transaction. Fair value determinations shall be based upon all available factors that the investment advisor and/or sub-advisor deems relevant. The pricing of all Fair Value Assets is subsequently reported to the Board or a committee thereof.

Generally, trading in foreign instruments is substantially completed each day at various times prior to the close of business on the NYSE. Occasionally, events affecting the values of such instruments may occur between the foreign market close and the close of business on the NYSE that may not be reflected in the computation of the Master LLC s net assets. If events (for example, a company announcement, market volatility or a natural disaster) occur during such periods that are expected to materially affet the value of such instruments, those instruments may be Fair Value Assets and be valued at their fair value, as determined in good faith by the Board or by the investment advisor using a pricing service and/or procedures approved by the Board.

Foreign Currency Transactions: Foreign currency amounts are translated into United States dollars on the following basis: (i) market value of investment securities, assets and liabilities at the current rate of exchange; and (ii) purchases and sales of investment securities, income and expenses at the rates of exchange prevailing on the respective dates of such transactions.

The Master LLC reports foreign currency related transactions as components of realized gains for financial reporting purposes, whereas such components are treated as ordinary income for federal income tax purposes.

Floating Rate Loans: The Master LLC may invest in floating rate loans, which are generally non-investment grade, made by banks, other financial institutions and privately and publicly offered corporations. Floating rate loans are senior in the debt structure of a corporation. Floating rate loans generally pay interest at rates that are periodically determined by reference to a base lending rate plus a premium. The base lending rates are generally (i) the lending rate offered by one or more European banks, such as LIBOR (London InterBank Offered Rate), (ii) the prime rate offered by one or more US banks or (iii) the certificate of deposit rate. The Master LLC considers these investments to be investments in debt securities for purposes of their investment policies.

The Master LLC earns and/or pays facility and other fees on floating rate loans. Other fees earned/paid include commitment, amendment, consent and prepayment penalty fees. Facility, commitment and amendment fees are typically amortized over the term of the loan. Consent fees and various other fees are recorded as income. Prepayment penalty fees are recorded as realized gains. When the Master LLC buys a floating rate loan it may receive a facility fee and when it sells a floating rate loan it may pay a facility fee. On an ongoing basis, the Master LLC may receive a commit-

ment fee based on the undrawn portion of the underlying line of credit portion of a floating rate loan. In certain circumstances, the Master LLC may receive a prepayment penalty fee upon the prepayment of a floating rate loan by a borrower. Other fees received by the Master LLC may include covenant waiver fees and covenant modification fees.

The Master LLC may invest in multiple series or tranches of a loan. A different series or tranche may have varying terms and carry different associated risks.

Floating rate loans are usually freely callable at the issuer s option. The Master LLC may invest in such loans in the form of participations in loans

SEMI-ANNUAL REPORT FEBRUARY 28, 2010 73

## Notes to Financial Statements (continued) Master Senior Floating Rate LLC

( Participations ) and assignments of all or a portion of loans from third parties. Participations typically will result in the Master LLC having a contractual relationship only with the lender, not with the borrower. The Master LLC will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the Participation and only upon receipt by the lender of the payments from the borrower.

In connection with purchasing Participations, the Master LLC generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loans, nor any rights of offset against the borrower, and the Master LLC may not benefit directly from any collateral supporting the loan in which it has purchased the Participation.

As a result, the Master LLC will assume the credit risk of both the borrower and the lender that is selling the Participation. The Master LLC s investments in loan participation interests involve the risk of insolvency of the financial intermediaries who are parties to the transactions. In the event of the insolvency of the lender selling the Participation, the Master LLC may be treated as a general creditor of the lender and may not benefit from any offset between the lender and the borrower.

Segregation and Collateralization: In cases in which the 1940 Act and the interpretive positions of the SEC require that the Master LLC either delivers collateral or segregates assets in connection with certain investments (e.g., swaps and foreign currency exchange contracts), the Master LLC will, consistent with SEC rules and/or certain interpretive letters issued by the SEC, segregate collateral or designate on its books and records cash or other liquid securities having a market value at least equal to the amount that would otherwise be required to be physically segregated. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, each party has requirements to deliver/deposit securities as collateral for certain investments.

Investment Transactions and Investment Income: For financial reporting purposes, investment transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on investment transactions are determined on the identified cost basis. Interest income is recognized on the accrual basis. The Master LLC amortizes all premiums and discounts on debt securities.

Income Taxes: The Master LLC is classified as a partnership for federal income tax purposes. As such, each investor in the Master LLC is treated as owner of its proportionate share of the net assets, income, expenses and realized and unrealized gains and losses of the Master LLC. Therefore, no federal income tax provision is required. It is intended that the Master LLC s assets will be managed so an investor in the Master LLC can satisfy the requirements of Subchapter M of the Internal Revenue Code.

The Master LLC files US federal and various state and local tax returns. No income tax returns are currently under examination. The statute of limitations on the Master LLC s US federal tax returns remains open for each of the four years ended August 31, 2009. The statutes of limitations on the Master LLC s state and local tax returns may remain open for an additional year depending upon the jurisdiction.

Recent Accounting Standards: In June 2009, amended guidance was issued by the Financial Accounting Standards Board (FASB) for transfers of financial assets. This guidance is intended to improve the relevance. representational faithfulness and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor s continuing involvement, if any, in transferred financial assets. The amended guidance is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2009. Earlier application is prohibited. The recognition and measurement provisions of this guidance must be applied to transfers occurring on or after the effective date. Additionally, the enhanced disclosure provisions of the amended guidance should be applied to transfers that occurred both before and after the effective date of this guidance. The impact of this guidance on the Master LLC s financial statements and disclosures, if any, is currently being assessed.

In January 2010, the FASB issued amended guidance to improve disclosure about fair value measurements which will require additional disclosures about transfers into and out of Levels 1 and 2 and separate disclosures about purchases, sales, issuances and settlements in the reconciliation for fair value measurements using significant unobservable inputs (Level 3). It also clarifies existing disclosure requirements relating to the levels of disaggregation for fair value measurement and inputs and valuation techniques used to measure fair value. The amended guidance is effective for financial statements for fiscal years and interim periods beginning after December 15, 2009 except for disclosures about purchases, sales, issuances and settlements in the rollforward of activity in Level 3 fair value measurements, which are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The impact of this guidance on the Master LLC s financial statements and disclosures is currently being assessed.

Other: Expenses directly related to the Master LLC are charged to the Master LLC. Other operating expenses shared by several funds are pro rated among those funds on the basis of relative net assets or other appropriate methods. The Master LLC has an arrangement with its custodian whereby fees may be reduced by credits earned on uninvested cash balances, which if applicable are shown as fees paid indirectly in the Statement of Operations. The custodian imposes fees on overdrawn cash balances, which can be offset by accumulated credits earned or may result in additional custody charges.

#### 2. Derivative Financial Instruments:

The Master LLC may engage in various portfolio investment strategies both to increase the return of the Master LLC and to economically hedge, or protect, its exposure to certain risks such as credit risk and foreign currency exchange rate risk. Losses may arise if the value of the contract decreases due to an unfavorable change in the price of the underlying instrument or if the counterparty does not perform under the contract. The Master LLC may mitigate counterparty risk through master netting agreements included within an International Swap and Derivatives Association, Inc. (ISDA) Master Agreement between the Master LLC and each of its counterparties. The ISDA Master Agreement allows the Master LLC to offset

74 SEMI-ANNUAL REPORT FEBRUARY 28, 2010

## Notes to Financial Statements (continued) Master Senior Floating Rate LLC

with its counterparty certain derivative financial instrument s payables and/or receivables with collateral held with each counterparty. The amount of collateral moved to/from applicable counterparties is based upon minimum transfer amounts of up to \$500,000. To the extent amounts due to the Master LLC from its counterparties are not fully collateralized contractually or otherwise, the Master LLC bears the risk of loss from counterparty non-performance. See Note 1 Segregation and Collateralization for information with respect to collateral practices.

The Master LLC s maximum risk of loss from counterparty credit risk on over-the counter (OTC) derivatives is generally the aggregate unrealized gain in excess of any collateral pledged by the counterparty to the Master LLC. Certain ISDA Master Agreements allow counterparties to OTC derivatives to terminate derivative contracts prior to maturity in the event the Master LLC s net assets decline by a stated percentage or the Master LLC fails to meet the terms of its ISDA Master Agreements, which would cause the Master LLC to accelerate payment of any net liability owed to the counterparty.

Foreign Currency Exchange Contracts: The Master LLC may enter into foreign currency exchange contracts as an economic hedge against either specific transactions or portfolio positions (foreign currency exchange rate risk). A foreign currency exchange contract is an agreement between two parties to buy and sell a currency at a set exchange rate on a future date. Foreign currency exchange contracts, when used by the Master LLC, help to manage the overall exposure to the foreign currency backing some of the investments held by the Master LLC. The contract is marked-to-market daily and the change in market value is recorded by the Master LLC as an unrealized gain or loss. When the contract is closed, the Master LLC records a realized gain or loss equal to the difference between the value at the time it was opened and the value at the time it was closed. The use of foreign currency exchange contracts involves the risk that counterparties may not meet the terms of the agreement or unfavorable movements in the value of a foreign currency relative to the US dollar.

Swaps: The Master LLC may enter into swap agreements, in which the Master LLC and a counterparty agree to make periodic net payments on a specified notional amount. These periodic payments received or made by the Master LLC are recorded in the Statement of Operations as realized gains or losses, respectively. Any upfront fees paid are recorded as assets and any upfront fees received are recorded as liabilities and amortized over the term of the swap. Swaps are marked-to-market daily and changes in value are recorded as unrealized appreciation (depreciation). When the swap is terminated, the Master LLC will record a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Master LLC s basis in the contract, if any. Swap transactions involve, to varying degrees, elements of interest rate, credit and market risk in excess of the amounts recognized in the Statement of Assets

and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavorable changes in interest rates and/or market values associated with these transactions.

Credit default swaps The Master LLC may enter into credit default swaps to manage its exposure to the market or certain sectors of the market, to reduce its risk exposure to defaults of corporate and/or sovereign issuers or to create exposure to corporate and/or sovereign issuers to which it is not otherwise exposed (credit risk). The Master LLC enters into credit default agreements to provide a measure of protection against the default of an issuer (as buyer protection) and/or gain credit exposure to an issuer to which it is not otherwise exposed (as seller of protection). The Master LLC may either buy or sell (write) credit default swaps on single-name issuers (corporate or sovereign) or traded indexes. Credit default swaps on single-name issuers are agreements in which the buyer pays fixed periodic payments to the seller in consideration for a guarantee from the seller to make a specific payment should a negative credit event take place (e.g., bankruptcy, failure to pay, obligation accelerators, repudiation, moratorium or restructuring). Credit default swaps on traded indexes are agreements in which the buyer pays fixed periodic payments to the seller in consideration for a guarantee from the seller to make a specific payment should a writedown, principal or interest shortfall or default of all or individual underlying securities included in the index occurs. As a buyer, if an underlying credit event occurs, the Master LLC will either receive from the seller an amount equal to the notional amount of the swap and deliver the referenced security or underlying securities comprising of an index or receive a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising of an index. As a seller (writer), if an underlying credit event occurs, the Master LLC will either pay the buyer an amount equal to the notional amount of the swap and take delivery of the referenced security or underlying securities comprising of an index or pay a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising of an index.

Average number of contracts US dollars sold	1
Average US dollar amounts purchased	\$28,717,937
Average US dollar amounts sold	\$ 1,128,656

3. Investment Advisory Agreements and Other Transactions with Affiliates:

The PNC Financial Services Group, Inc. ("PNC"), Bank of America Corporation ("BAC"), and Barclays Bank PLC ("Barclays") are the largest stockholders of BlackRock, Inc. ("BlackRock"). Due to the ownership structure, PNC is an affiliate for 1940 Act purposes, but BAC and Barclays are not.

The Master LLC has entered into an Investment Advisory Agreement with BlackRock Advisors, LLC (the Manager ), the Master LLC s investment advisor, an indirect, wholly owned subsidiary of BlackRock, to provide investment advisory and administration services.

The Manager is responsible for the management of the Master LLC s portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Master LLC. For such services, the Master LLC pays the Manager a monthly fee at an annual rate of 0.95% of the average daily value of the Master LLC s net assets.

The Manager has entered into a separate sub-advisory agreement with BlackRock Financial Management, Inc. (BFM), an affiliate of the Manager, under which the Manager pays BFM for services it provides, a monthly fee that is a percentage of the investment advisory fees paid by the Master LLC to the Manager.

The Manager has voluntarily agreed to waive its advisory fees by the amount of investment advisory fees the Master LLC pays to the Manager indirectly through its investment in affiliated money market funds; however, the Manager does not waive its advisory fees by the amount of investment

advisory fees through its investment in other affiliated investment companies. This amount is shown as fees waived by advisor in the Statement of Operations.

For the six months ended February 28, 2010, the Master LLC reimbursed the Manager \$3,951 for certain accounting services, which is included in accounting services in the Statement of Operations.

Certain officers and/or directors of the Master LLC are officers and/or directors of BlackBock or its affiliates.

#### 4. Investments:

Purchases and sales of investments, including paydowns and excluding short-term securities, for the six months ended February 28, 2010 were \$253,714,452 and \$271,526,468, respectively.

#### 5. Borrowings:

The Master LLC, along with certain other funds managed by the Manager and its affiliates, is a party to a \$500 million credit agreement with a group of lenders, which was renewed until November 2010. The Master LLC may borrow under the credit agreement to fund shareholder redemptions and for other lawful purposes other than for leverage. The Master LLC may borrow up to the maximum amount allowable under the Master LLC s current Prospectus and Statement of Additional Information, subject to various other legal, regulatory or contractual limits. Prior to its renewal the credit agreement had the following terms: 0.02% upfront fee on the aggregate commitment amount which was allocated to the Master LLC based on its net assets as of October 31, 2008; a commitment fee of 0.08% per annum based on the Master LLC s pro rata share of the unused portion of the credit agreement, which is included in miscellaneous in the Statement of Operations, and interest at a rate equal to the higher of the (a) federal funds effective rate and (b) reserve adjusted one-month LIBOR, plus, in each case, the higher of (i) 1.50% and (ii) 50% of the CDX Index (as defined in the credit agreement) on amounts borrowed. Effective November 2009, the credit agreement was renewed with the following terms: 0.02% upfront fee on the aggregate commitment amount which was allocated to the Master LLC based on its net assets as of October 31, 2009, a commitment fee of 0.10% per annum on the Master LLC s pro rata share of the unused portion of the credit agreement and interest at a rate equal to the higher of the (a) one-month LIBOR plus 1.25% per annum and (b) the Fed Funds rate plus 1.25% per annum on amounts borrowed. For the six months ended February 28, 2010, the daily average weighted interest rate was 1.54%.

#### 6. Market and Credit Risk:

In the normal course of business, the Master LLC invests in securities and enters into transactions where risks exist due to fluctuations in the market (market risk) or failure of the issuer of a security to meet all its obligations

(credit risk). The value of securities held by the Master LLC may decline in response to certain events, including those directly involving the issuers whose securities are owned by the Master LLC; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency and interest rate and price fluctuations. Similar to credit risk, the Master LLC may be exposed to counterparty risk, or the risk that an entity with which the Master LLC has unsettled or open transactions may default. Financial assets, which potentially expose the Master LLC to credit and counterparty risks, consist principally of investments and cash due from counterparties. The extent of the Master LLC s exposure to credit and counterparty risks with respect to these financial assets is generally approximated by their value recorded in the Master LLC s Statement of Assets and Liabilities, less any collateral held by the Master LLC.

76 SEMI-ANNUAL REPORT FEBRUARY 28, 2010

## Notes to Financial Statements (concluded) Master Senior Floating Rate LLC

#### 7. Commitments:

The Master LLC may invest in floating rate loans. In connection with these investments, the Mater LLC may also enter into unfunded corporate loans (commitments). Commitments may obligate the Master LLC to furnish temporary financing to a borrower until permanent financing can be arranged. In connection with these commitments, the Master LLC earns a commitment fee, typically set as a percentage of the commitment amount.

Such fee income, which is classified in the Statement of Operations as facility and other fees, is recognized ratably over the commitment period. As of February 28, 2010, the Master LLC had the following unfunded loan commitments:

		Value of
	Unfunded	Underlying
	Commitment	Loan
Borrower	(000)	(000)
New Vision	\$2,185	\$2,082
Vought Aircraft Industries, Inc	\$ 40	\$ 42

#### 8. Subsequent Events:

Management has evaluated the impact of all subsequent events on the Master LLC through the date that the financial statements were issued and has determined that there were no subsequent events requiring adjustment or additional disclosure in the financial statements.

The Funds Board of Directors wishes both Mr. Dixon and Mr. Beckwith well.

SEMI-ANNUAL REPORT FEBRUARY 28, 2010 77

## Additional Information

#### **Dividend Policy**

The Funds dividend policy is to distribute all or a portion of their net investment income to its shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the Funds may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any particular month pay out such accumulated but undistributed income in addition to

net investment income earned in that month. As a result, the dividends paid by the Funds for any particular month may be more or less than the amount of net investment income earned by the Funds during such month. The Funds current accumulated but undistributed net investment income, if any, is disclosed in the Statements of Assets and Liabilities, which comprises part of the financial information included in this report.

#### **General Information**

#### **Electronic Delivery**

Electronic copies of most financial reports are available on the Funds websites or shareholders can sign up for e-mail notifications of quarterly statements, annual and semi-annual reports by enrolling in the Funds electronic delivery program.

Shareholders Who Hold Accounts with Investment Advisors, Banks or Brokerages:

Please contact your financial advisor to enroll. Please note that not all investment advisors, banks or brokerages may offer this service.

#### Householding

The Funds will mail only one copy of shareholder documents, including annual and semi-annual reports and proxy statements, to shareholders with multiple accounts at the same address. This practice is commonly called householding and is intended to reduce expenses and eliminate duplicate mailings of shareholder documents. Mailings of your shareholder documents may be householded indefinitely unless you instruct us otherwise. If you do not want the mailing of these documents to be combined with those for other members of your household, please call (800) 441-7762.

Availability of Quarterly Schedule of Investments

Each Fund/Master LLC files its complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year on Form N-Q. The Funds /Master LLC s Forms

N-Q are available on the SEC s website at http://www.sec.gov and may also be reviewed and copied at the SEC s Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling (202) 551-8090. Each Fund s/Master LLC s Forms N-Q may also be obtained upon request and without charge by calling (800) 441-7762.

Availability of Proxy Voting Policies and Procedures

A description of the policies and procedures that each Fund/Master LLC uses to determine how to vote proxies relating to portfolio securities is available (1) without charge, upon request, by calling (800) 441-7762; (2) at www.blackrock.com; and (3) on the SEC s website at http://www.sec.gov.

Availability of Proxy Voting Record

Information about how the Funds/Master LLC voted proxies relating to securities held in each Fund s/Master LLC s portfolio during the most recent 12-month period ended June 30 is available upon request and without charge (1) at www.blackrock.com or by calling (800) 441-7762 and (2) on the SEC s website at http://www.sec.gov.

78 SEMI-ANNUAL REPORT FEBRUARY 28, 2010

## Additional Information (concluded)

#### Section 19(a) Notices

These reported amounts and sources of distributions are estimates and are not provided for tax reporting purposes. The actual amounts and sources for tax

reporting purposes will depend upon each Fund s investment results during the year and may be subject to changes based on tax regulations. Each Fund

will provide a Form 1099-DIV for the calendar year that will explain the character of these dividends and distributions for federal income tax purposes.

#### February 28, 2010

	Total Cumulative Distributions for the Fiscal				% Breakdown of the Total Cumulative  Distributions for the Fiscal Year-to-Date			
	Year-to-Date Net				Net			
	Net	Realized		Total Per	Net	Realized		Total Per
							Return	
	Investment	Capital	Return of	Common	Investment	Capital	of	Common
	Income	Gains	Capital	Share	Income	Gains	Capital	Share
BHL	\$0.34200			\$0.34200	100%			100%
DVF	\$0.37571		\$0.06529	\$0.44100	85%		15%	100%
FRA	\$0.42400		\$0.06500	\$0.48900	87%		13%	100%
BLW	\$0.42000			\$0.42000	100%			100%

Each Fund estimates that it has distributed more than the amount of earned income and net realized gains; therefore, a portion of the distribution may be

a return of capital. A return of capital may occur, for example, when some or all of the shareholder s investment in a Fund is returned to the shareholder.

A return of capital does not necessarily reflect a Fund s investment performance and should not be confused with yield or income.

#### **BlackRock Privacy Principles**

BlackRock is committed to maintaining the privacy of its current and former fund investors and individual clients (collectively, Clients) and to safeguarding their non-public personal information. The following information is provided to help you understand what personal information BlackRock collects, how we protect that information and why in certain cases we share such information with select parties.

If you are located in a jurisdiction where specific laws, rules or regulations require BlackRock to provide you with additional or different privacy-related rights beyond what is set forth below, then BlackRock will comply with those specific laws, rules or regulations.

BlackRock obtains or verifies personal non-public information from and about you from different sources, including the following: (i) information we

receive from you or, if applicable, your financial intermediary, on applications, forms or other documents; (ii) information about your transactions with us, our affiliates, or others; (iii) information we receive from a consumer reporting agency; and (iv) from visits to our websites.

BlackRock does not sell or disclose to non-affiliated third parties any non-public personal information about its Clients, except as permitted by law or as is necessary to respond to regulatory requests or to service Client accounts. These non-affiliated third parties are required to protect the confidentiality and security of this information and to use it only for its intended purpose.

We may share information with our affiliates to service your account or to provide you with information about other BlackRock products or services that may be of interest to you. In addition, BlackRock restricts access to non-public personal information about its Clients to those BlackRock employees with a legitimate business need for the information. BlackRock maintains physical, electronic and procedural safeguards that are designed to protect the non-public personal information of its Clients, including procedures relating to the proper storage and disposal of such information.

SEMI-ANNUAL REPORT FEBRUARY 28, 2010 79

This report is transmitted to shareholders only. It is not a prospectus. Past performance results shown in this report should not be considered a represen-

tation of future performance. BlackRock Defined Opportunity Credit Trust, BlackRock Diversified Income Strategies Fund, Inc., BlackRock Floating Rate

Income Strategies Fund, Inc., BlackRock Limited Duration Income Trust, BlackRock Senior Floating Rate Fund, Inc. and BlackRock Senior Floating Rate

Fund II, Inc. leverage their Common Shares, which creates risk for Common Shareholders, including the likelihood of greater volatility of net asset value and

market price of the Common Shares, and the risk that fluctuations in short-term interest rates may reduce the Common Shares yield. Statements and

other information herein are as dated and are subject to change.
