**FLOW INTERNATIONAL CORPORATION**

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**For the Nine Months Ended January 31, 2002**

**(Unaudited)**

**1. Basis of Presentation**

In the opinion of the management of Flow International Corporation ("the Company"), the accompanying unaudited condensed consolidated financial statements contain all adjustments necessary to fairly present the financial position, results of operations and cash flows of the Company. These interim financial statements do not include all information and footnote disclosure normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America, and should be read in conjunction with the April 30, 2001 consolidated financial statements included in the Company's Annual Report filed with the Securities and Exchange Commission on Form 10-K. The Company adopted Staff Accounting Bulletin 101 ("SAB 101") during the third quarter of fiscal 2001. Accordingly, the results of operations for the three and nine months ended January 31, 2001 have been restated. Operating results for the three and nine months ended January 31, 2002 may not be indicative of future results.

## 2. Earnings Per Share

Basic earnings per share represents net income available to common stockholders divided by the weighted average number of shares outstanding during the period. Diluted earnings per share represents net income available to common stockholders divided by the weighted average number of shares outstanding including the potentially dilutive impact of stock options and warrants, where appropriate.

The table below summarizes the weighted average shares outstanding for the Company for the three and nine months ended January 31, 2002 and 2001:

	Three Months Ended January 31,	
	2002	2001
	(In Thousands)	
Weighted Average Basic Shares Outstanding	15,254	14,811
Potentially Dilutive Common Shares from Employee Stock Options		368
Potentially Dilutive Common Shares from Warrants		
Weighted Average Diluted Shares Outstanding	15,254	15,179

The impact of 258,000 shares from employee stock options as well as 860,000 shares from warrants has been excluded from shares outstanding for the three months ended January 31, 2002 due to their anti-dilutive nature. For the quarter ended January 31, 2001, there were no anti-dilutive shares.

	Nine Months Ended January 31,	
	2002	2001
	(In Thousands)	
Weighted Average Basic Shares Outstanding	15,221	14,775
Potentially Dilutive Common Shares from Employee Stock Options	297	344
Potentially Dilutive Common Shares from Warrants	766	
Weighted Average Diluted Shares Outstanding	16,284	15,119

## 3. Segment Information

Based upon a change in reporting structure, the Company is now comprised of two reportable segments, Ultrahigh Pressure Systems (UHP Systems) and Fresher Under Pressure®, as opposed to one segment previously. The UHP Systems sector includes cutting, cleaning and isostatic press operations, which are focused on providing total solutions for aerospace, automotive, job shop, surface preparation and paper industries. The Fresher Under Pressure sector is focused on providing food technology solutions for food producers. The accounting policies of the segments are the same as those described in the Summary of Significant Accounting Policies in Form 10-K. Segment operating results are measured based on operating income (loss). Comparative information for the new operating segments has been presented.

A summary of operations by reportable segment is as follows:

Three Months Ended January 31,	
2002	2001

**5. Inventories**

Inventories consist of the following:

	January 31, 2002	April 30, 2001
	(In Thousands)	
Raw Materials and Parts	\$ 23,157	\$ 25,230
Work in Process	12,217	17,393
Finished Goods	17,240	14,177
	\$ 52,614	\$ 56,800

**6. New Accounting Pronouncements**

Effective May 1, 2001, the Company adopted Statement of Financial Accounting Standards No. 133 ("FAS 133"), "Accounting for Derivative Instruments and Hedging Activities", which establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts for hedging activities. All derivatives, whether designated in hedging relationships or not, are required to be recorded on the balance sheet at fair value. If the derivative is designated as a fair value hedge, the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in earnings. If the derivative is designated as a cash flow hedge, the effective portions of changes in the fair value of the derivative are recorded in other comprehensive income (OCI) and are recognized in the statement of operations when the hedged item affects earnings. Ineffective portions of changes in the fair value of cash flow hedges are recognized in earnings.

The Company uses derivative instruments to manage exposures to foreign currency risks. The Company's objective for holding derivatives is to minimize foreign currency fluctuation risks using the most effective methods to eliminate or reduce the impacts of these exposures. The Company does not enter into speculative hedges.

Certain forecasted transactions and assets are exposed to foreign currency risk. The Company monitors its foreign currency exposures regularly to maximize the overall effectiveness of its foreign currency hedge positions. The currency hedged is the Swedish Crown. As of January 31, 2002, the Company has \$555,000 of unrealized losses on foreign currency cash flow hedges. The financial impact of these hedges is expected to be realized into earnings over the next twelve months when the associated transactions are recorded as revenue. The actual amounts realized will vary based on future changes in foreign currency rates.

Hedge ineffectiveness, determined in accordance with FAS 133, had no impact on earnings for the three and nine months ended January 31, 2002. No fair value hedges or cash flow hedges were derecognized or discontinued for the three and nine months ended January 31, 2002.

Derivative gains and losses included in OCI are reclassified into earnings each period as the related transactions are recognized into earnings. During the nine months ended January 31, 2002 the amount transferred from OCI to other income (expense), net, was not significant.

In July 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 141 ("FAS 141"), "Business Combinations" and Statement of Financial Accounting Standards No. 142 ("FAS 142"), "Goodwill and Other Intangible Assets." FAS 141 requires that all business combinations be accounted for under the purchase method only and that certain acquired intangibles in a business combination be recognized as assets separate from goodwill. FAS 142 requires ratable amortization of goodwill to be replaced with periodic tests of the goodwill's impairment and that intangible assets other than goodwill be amortized over their useful lives. FAS 141 is effective for all business combinations initiated after June 30, 2001 and for all business combinations

accounted for by the purchase method for which the date of acquisition is after June 30, 2001. The provisions of FAS 142 were effective for fiscal years beginning after December 15, 2001; however the Company elected to early adopt the provisions of FAS 142 effective May 1, 2001.

## Edgar Filing: FLOW INTERNATIONAL CORP - Form 10-Q

In November 2001, the Emerging Issues Task Force of the Financial Accounting Standards Board (EITF) issued Topic No. D-100 ("Topic D-100"), "Clarification of Paragraph 61(b) of FASB Statement No.141 and Paragraph 49(b) of FASB Statement No. 142" which provides guidance on the reporting and amortization of goodwill and other intangible assets acquired in a business combination. Topic D-100 clarifies that an entity should not reclassify from goodwill any intangible assets it had not identified and measured at fair value in the initial recording of a business combination prior to July 1, 2001 and subsequently accounted for separately from goodwill. Flow adopted FAS 141 and FAS 142 in its fiscal quarter ended July 31, 2001. In connection with the adoption of FAS 141 and FAS 142 and prior to the issuance of Topic D-100, the Company had analyzed its previous business combinations before July 1, 2001. This analysis resulted in the reclassification of all identifiable intangibles previously included with goodwill to identified intangibles as of May 1, 2001 and the subsequent amortization of these intangibles even though certain identifiable intangibles had not previously been accounted for separately from goodwill. The effect of applying the interpretative guidance in Topic D-100 is a reduction of amortization expense which is a component of General & Administrative Expenses in each of the first two quarters in fiscal year 2002.

The Company has discussed this reclassification with the Staff of the Securities and Exchange Commission. They agree that this change in accounting treatment is necessary to comply with the guidance in Topic D-100 even though the July 31, 2001 and the October 31, 2001 Forms 10-Q were prepared based on the appropriate guidance available at those times.

The following table shows the effects of the change in guidance for the two previous reporting periods during fiscal year 2002:

	First Quarter Ended July 31, 2001		Second Quarter Ended October 31, 2001	
	As Previously Reported	Revised	As Previously Reported	Revised
	(In Thousands, Except Per Share Amounts)			
Operating Income	\$ 2,883	\$ 3,086	\$ 2,781	\$ 2,962
Net Income	\$ 284	\$ 420	\$ 255	\$ 376
Amounts per Diluted Share:				
Operating Income	\$ .18	\$ .19	\$ .17	\$ .18
Net Income	\$ .02	\$ .03	\$ .02	\$ .02

Intangible assets consist of the following:

	January 31, 2002	
	Gross Carrying Amount	Accumulated Amortization
	(In Thousands)	
Patents	\$ 21,716	\$ 8,511

Aggregate amortization expense:

For the nine months ended January 31, 2002	\$ 709
--	--------

Estimated annual amortization expense is \$950,000 for each year through April 30, 2006.

In June 2001, the FASB issued Statement of Financial Accounting Standards No. 143 ("FAS 143"), "Accounting for Asset Retirement Obligations." This statement provides accounting and reporting standards for recognizing obligations related to asset retirement costs associated with the retirement of

tangible long-lived assets. Under this statement, legal obligations associated with the retirement of long-lived assets are to be recognized at their fair value in the period in which they are incurred if a reasonable estimate of fair value can be made. The fair value of the asset retirement costs is capitalized as part of the carrying amount of the long-lived asset and subsequently allocated to expense over the asset's useful life. Any subsequent changes to the fair value of the liability due to passage of time or changes in the amount or timing of estimated cash flows is recognized as an accretion expense. The Company will be required to adopt this statement no later than May 1, 2003. The Company is currently

assessing the impact of this statement on its financial position, results of operations and cash flows.

In October 2001, the FASB issued Statement of Financial Accounting Standards No. 144 ("FAS 144"), "Accounting for the Impairment or Disposal of Long-Lived Assets", which is effective for fiscal years beginning after December 15, 2001. This statement supercedes FAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of." However, it retains the fundamental provisions of FAS No. 121 for the recognition and measurement of the impairment of long-lived assets to be held and used and the measurement of long-lived assets to be disposed of by sale. Impairment of goodwill is not included in the scope of FAS 144 and will be treated in accordance with FAS 142. According to FAS 144, long-lived assets are to be measured at the lower of carrying amount or fair value less cost to sell, whether reported in continuing or discontinued operations. The statement applies to all long-lived assets, including discontinued operations, and replaces the provisions of APB Opinion No. 30, "Reporting the Results of Operations Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions", for the disposal of segments of a business. The Company will be required to adopt this statement no later than May 1, 2002. The Company is currently assessing the impact of this statement on its financial position, results of operations and cash flows.

## 7. Long-Term Obligations

During the first quarter of fiscal 2002, the Company signed a \$35 million subordinated debt agreement with The John Hancock Life Insurance Company ("Hancock"). The agreement requires semi-annual interest only payments at 13% and two equal principal payments due on April 30, 2007, and April 30, 2008. In addition, the Company issued 859,523 warrants to purchase Flow common stock at \$.01 per share to Hancock. The warrants have been valued at \$9.3 million and have been recorded as a discount to the carrying value of the Long-Term Obligations in the accompanying Consolidated Balance Sheets and increase to Capital in Excess of Par. The warrants vest immediately and expire on April 30, 2008.

As of January 31, 2002, the Company is in compliance with all previously amended covenants. Covenant requirements include compliance with minimum tangible net worth values, funded debt ratios and debt to net worth ratios as well as minimum debt coverage ratios.

## 8. Reclassifications

Certain fiscal 2001 amounts have been reclassified to conform with the fiscal 2002 presentation.

---

## FLOW INTERNATIONAL CORPORATION

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Revenues for Flow International Corporation ("Flow" or the "Company") for the three months ended January 31, 2002 were \$41.5 million, a decrease of \$8.9 million (18%) from the prior year same quarter, primarily due to a decline in Ultrahigh Pressure ("UHP") systems business. UHP Systems revenue decreased \$9.4 million to \$38.5 million for the three months ended January 31, 2002 as compared to the prior year same quarter while Fresher Under Pressure® revenues posted an increase of \$533,000 to \$3.0 million for the same periods. Revenue for the nine months ended January 31, 2002 was \$132.3 million, a decrease of \$21.0 million (14%), as compared to the prior year period. For the nine months ended January 31, 2002, Ultrahigh Pressure and Fresher Under Pressure revenues experienced a decline of 12% to \$125.3 million and 32% to \$7.0 million, respectively, as compared to the prior year same period.

Geographically, domestic cutting revenues amounted to \$21.1 million and \$71.8 million for the three and nine months ended January 31, 2002, respectively. This represents a decrease of 22% and 12% as compared to the prior year same periods, respectively. This compares with the United States machine cutting tool market as a whole, which decreased 44% and 35% for the three and nine months ended December 31, 2001, respectively, as published in the Association for Manufacturing Technology's December 2001 report. The softening economy has caused decreased buying levels in the aerospace and automotive sectors which, combined with the events of September 11, 2001, has impacted domestic cutting revenues.

Total European revenue rose compared to the prior year, posting increases of \$1.5 million (12%) and \$7.9 million (25%) for the three and nine months ended January 31, 2002, respectively. Revenue amounted to \$13.5 million and \$39.2 million for the three and nine months ended January 31, 2002, respectively, accounting for 33% and 30% of total revenues, respectively. This increase resulted from higher manufacturing

## Edgar Filing: FLOW INTERNATIONAL CORP - Form 10-Q

activity levels for several new isostatic press orders. Asian revenue was \$3.7 million and \$11.8 million for the three and nine months ended January 31, 2002, respectively, an increase of \$831,000 (29%) and a decrease of \$1.9 million (14%) as compared to the prior year same periods. As a percentage of revenue, Asia accounted for 9% for both the three and nine months ended January 31, 2002.

The Company also segregates its revenues between systems sales and consumables sales. In general, a system sale is comprised of a pump along with the robotics or articulation to move the cutting head, and may also include automation capabilities. Also included in systems sales are Fresher Under Pressure revenues and sales of isostatic and flexform press systems. Consumables represent parts used by the pump and cutting head during operation. Systems revenues for the three and nine months ended January 31, 2002 were \$30.8 million and \$96.8 million, respectively, a decrease of \$6.3 million (17%) and \$14.8 million (13%), respectively, compared to the prior year same periods. Consumables revenues were \$10.6 million and \$35.6 million for the three and nine months ended January 31, 2002, respectively, a \$2.6 million (20%) and \$6.2 million (15%) decrease, respectively, compared to the prior year same periods.

The newest UHP market opportunity is UHP food processing, using the Company's Fresher Under Pressure technology. By exposing foods to pressures up to 100,000 pounds per square inch for a short time period, typically 30 seconds to slightly more than two minutes, UHP achieves the effects of pasteurization without heat. Not only are spoilage microorganisms destroyed, the process also destroys harmful pathogens such as E. coli, listeria and salmonella, thus increasing shelf life while ensuring a safe, healthy product. Unlike thermal treatment (pasteurization) or other methods such as irradiation, UHP processing does not destroy or alter the nutritional qualities, taste, texture or color of the food. In fact, in many cases, it improves the taste and flavor.

There are two patented processing techniques used in Fresher Under Pressure. First is a "continuous flow" process whereby pumpable foods such as juices, salsas, guacamole, liquid eggs and salad dressings are pumped into pressure chambers, pressurized and then pumped into the next stage

13

---

of the process, such as bottling. This continuous flow process is fully automated and requires just a single operator. The Company anticipates leasing the continuous flow systems, rather than selling them. The leases have a fixed monthly charge, plus a per gallon or per pound usage fee. Lease revenue is recognized monthly based on throughput and is currently less than ten percent of revenues.

Second, for solid foods such as meats, fruits, vegetables and seafood, the Company manufactures a system utilizing a patented large pressure vessel batch system technology. Revenue for the batch systems, in most cases, is recognized on the percentage of completion method. Flow is the only supplier of complete UHP systems to the food industry.

The largest emerging market for UHP technology is the ready-to-eat processed industry. The USA produces in excess of 20 billion pounds of ready-to-eat meats annually and the industry is experiencing increased regulatory and consumer pressure to reduce risks associated with listeria monocytogenes. Management expects to capture a significant portion of this market with its post-packaging UHP process.

Comparison of gross margin rates is dependent on the mix of sales revenue types, which includes special system, standard system and consumables sales. Gross profit for the three and nine months ended January 31, 2002 was \$17.7 million and \$55.0 million, a decrease of \$3.0 million (14%) and \$10.2 million (16%) over the prior year same periods, respectively. This decrease in gross margin dollar amounts is a function of decreased revenues during the current fiscal quarter. Gross profit expressed as a percentage of revenues (gross margin) was 43% for the quarter, up from 41% in the comparable prior year quarter, due to cost control measures. For the nine months ended January 31, 2002, gross margin decreased slightly to 42% from 43% from the comparable prior year period. Systems typically carry lower gross margin rates than the Company's consumable parts. Additionally, special systems are generally custom designed and carry lower margins than the Company's standard systems such as the Bengal , Integrated Flying Bridge , Husky , and Waterjet Machining Center .

Operating expenses of \$16.1 million and \$47.4 million decreased \$2.0 million (11%) and \$5.8 million (11%) for the three and nine months ended January 31, 2002, compared to the prior year same periods. This reduction is attributable to the Company's continuing focus on cost reduction, through headcount reduction, facility consolidation and product rationalization, as well as the result of the discontinuation of intangible asset amortization. Marketing expenses decreased \$386,000 (5%) and \$883,000 (4%) for the three and nine months ended January 31, 2002 as compared to the prior year same periods. Expressed as a percentage of revenue, marketing expense was 19% and 18% for the three and nine months ended January 31, 2002, compared to the prior year periods of 17% and 16%, respectively. Research and engineering expenses decreased \$472,000 (11%) and \$2.2 million (16%) for the three and nine months ended January 31, 2002 as compared to the prior year same periods. Expressed as a percentage of revenue, research and engineering expenses were 10% and 9% for the three and nine months ended January 31, 2002, compared to both prior year periods of 9%. General and administrative expenses decreased \$1.1 million (22%) and \$2.8 million (18%) for the three and nine months ended January 31, 2002, as compared to the prior year same periods. A significant portion of the decrease is attributable to the revisions made to the accounting for amortization of intangibles per Note 6 in the Notes to Condensed

## Edgar Filing: FLOW INTERNATIONAL CORP - Form 10-Q

Consolidated Financial Statements which reduced the three and nine months ended January 31, 2002 expenses by \$582,000 and \$1.7 million, respectively. Expressed as a percentage of revenue, general and administrative expenses were 10% and 9% for the three and nine months ended January 31, 2002, compared to both prior year same periods of 10%, respectively.

Operating income of \$1.6 million and \$7.6 million decreased \$1.0 million (38%) and \$4.3 million (36%) for the three and nine months ended January 31, 2002, respectively, compared to the prior year same periods.

Current quarter and year-to-date net interest expense increased \$350,000 (19%) and \$1.3 million (24%), respectively, versus the prior year same periods due to a higher average debt level associated with Fresher Under Pressure development costs.

Based upon the expected tax position of the Company for fiscal 2002, taxes for the three and nine months ended January 31, 2002 have been provided at 33% of pre-tax income. The increased rate of

14

---

33% in fiscal 2002 as compared to the fiscal 2001 rate of 30% is reflective of the projected change in mix of pre-tax income to higher taxing jurisdictions. The income tax rate was lower than the statutory rate in both the current and prior year due primarily to lower foreign tax rates and benefits from the foreign sales corporation.

The Company recorded a net loss in the third quarter of fiscal 2002 of \$505,000, or \$.03 basic and diluted loss per share as compared to net income of \$563,000, or \$.04 basic and diluted earnings per share in prior year period. Year-to-date, the Company recorded net income of \$291,000, or \$.02 per basic and diluted share versus \$1.8 million, or \$.12 basic and diluted earnings per share in the prior year period.

### ***Business Segment Review***

The UHP Systems sector includes cutting, cleaning and isostatic press operations, which are focused on providing total solutions for aerospace, automotive, job shop, surface preparation and paper industries. Revenue for the UHP Systems sector for the three and nine months ended January 31, 2002 was \$38.5 million and \$125.3 million, respectively. This represents a decrease of \$9.4 million (20%) and a decrease of \$17.7 million (12%) as compared to the respective prior year same periods due to the softened economy. Operating income for UHP Systems was \$3.4 million and \$13.9 million for the third quarter and year-to-date fiscal 2002, respectively, as compared to \$6.2 million and \$19.7 million in the prior year same periods. Net income was \$1.9 million and \$4.1 million for the three months ended January 31, 2002 and 2001, respectively, while nine month net income for fiscal 2002 decreased \$1.8 million (19%) to \$7.8 million as compared to the prior year period. Diluted earnings per share was \$.12 and \$.48 for UHP Systems for the three and nine months ended January 31, 2002, respectively, as compared to \$.27 and \$.63 in the prior year same periods.

The Fresher Under Pressure sector is focused on providing food safety solutions for food producers. Revenue for the Fresher Under Pressure segment was \$3.0 million and \$7.0 million for the three and nine months ended January 31, 2002, an increase of \$533,000 (22%) and a decrease of \$3.3 million (32%), respectively, compared to the prior year same periods. The primary reason for the year-to-date decline is the introduction during the second quarter of a new Fresher Under Pressure management team as well as the initiation of a reorganization, including comprehensive product evaluation and a program to focus on specific markets within the food industry. Management has used estimates to determine the allocable costs of the consolidated operations to Fresher Under Pressure results of operations. Based on these estimates, the operating loss for the Fresher Under Pressure sector was \$1.8 million and \$6.2 million in the second quarter and year-to-date fiscal 2002, respectively, as compared to \$3.6 million and \$7.8 million in the prior year periods. Diluted loss per share was \$.15 and \$.46 for Fresher Under Pressure for the three and nine months ended January 31, 2002, respectively, as compared to a diluted loss per share of \$.23 and \$.51 in the prior year same periods.

### ***Liquidity and Capital Resources***

The Company used cash in operations of \$2.4 million during the nine months ended January 31, 2002 compared to \$3.8 million during the nine months ended January 31, 2001. At January 31, 2002, the Company had \$12.4 million in completed continuous feed Fresher Under Pressure units as well as work in progress and stores inventory. Of this amount, \$7.1 million is classified as a long-term asset in equipment held for lease and property and equipment and the remaining \$5.3 million is included in inventory on the Consolidated Balance Sheets. The Company's Credit Agreement and Private Placement require the Company to comply with certain previously amended financial covenants. As of January 31, 2002, the Company was in compliance with all covenants. Covenant requirements include compliance with minimum tangible net worth values, funded debt ratios and debt to net worth ratios as well as minimum debt coverage ratios.

## Edgar Filing: FLOW INTERNATIONAL CORP - Form 10-Q

On May 31, 2001, the Company signed and funded a \$35 million subordinated debt agreement with The John Hancock Life Insurance Company ("Hancock"). The agreement requires semi-annual interest only payments of 13% and two equal principal payments due on April 30, 2007 and April 30,

15

2008. In addition, the Company issued to Hancock warrants for 859,523 shares of Flow common stock exercisable at \$.01 per share. The warrants have been valued at \$9.3 million.

Receivables, net are comprised of trade accounts and unbilled revenues. At January 31, 2002 this receivable balance increased \$5.3 million (8%) from April 30, 2001. This change represented a decrease in Trade Accounts Receivable of \$15.4 million (31%), offset by an increase in Unbilled Revenues of \$20.6 million (141%). Receivables can be negatively impacted by the traditionally longer payment cycle outside the United States and the timing of billings and payments on large special system orders. The Company's management does not believe these timing issues will present a material adverse impact on the Company's short-term liquidity requirements.

Inventories at January 31, 2002 decreased \$4.2 million (7%) from April 30, 2001 due to concentrated efforts on inventory management to mitigate reduced sales.

Management believes available funds will be sufficient to meet operating needs.

### ***New Accounting Pronouncements***

In June 2001, the FASB issued Statement of Financial Accounting Standards No. 143 ("FAS 143"), "Accounting for Asset Retirement Obligations." The statement provides accounting and reporting standards for recognizing obligations related to asset retirement costs associated with the retirement of tangible long-lived assets. Under this statement, legal obligations associated with the retirement of long-lived assets are to be recognized at their fair value in the period in which they are incurred if a reasonable estimate of fair value can be made. The fair value of the asset retirement costs is capitalized as part of the carrying amount of the long-lived asset and subsequently allocated to expense over the asset's useful life. Any subsequent changes to the fair value of the liability due to passage of time or changes in the amount or timing of estimated cash flows is recognized as an accretion expense. The Company will be required to adopt this statement no later than May 1, 2003. The Company is currently assessing the impact of this statement on its financial position, results of operations and cash flows.

In October 2001, the FASB issued Statement of Financial Accounting Standards No. 144 ("FAS 144"), "Accounting for the Impairment or Disposal of Long-Lived Assets", which is effective for fiscal years beginning after December 15, 2001. This statement supersedes FAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of." However, it retains the fundamental provisions of FAS No. 121 for the recognition and measurement of the impairment of long-lived assets to be held and used and the measurement of long-lived assets to be disposed of by sale. Impairment of goodwill is not included in the scope of FAS No. 144 and will be treated in accordance with FAS No. 142, Goodwill and Other Intangible Assets." According to FAS No. 144, long-lived assets are to be measured at the lower of carrying amount or fair value less cost to sell, whether reported in continuing or discontinued operations. The statement applies to all long-lived assets, including discontinued operations, and replaces the provisions of APB Opinion No. 30, "Reporting the Results of Operations Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions", for the disposal of segments of a business. The Company will be required to adopt this statement no later than May 1, 2002. The Company is currently assessing the impact of this statement on its financial position, results of operations and cash flows.

### **Item 3. Quantitative and Qualitative Disclosures About Market Risk**

There have been no material changes in the Company's market risk during the nine months ended January 31, 2002. For additional information, refer to Management's Discussion and Analysis of Financial Condition and Results of Operations as presented in the fiscal 2001 Form 10-K as filed with the SEC.

#### ***SAFE HARBOR STATEMENT:***

*Statements in this report that are not strictly historical are "forward-looking" statements which should be considered as subject to the many uncertainties that exist in the Company's operations and business environment. These uncertainties, which include economic and currency conditions, market demand and pricing, competitive and cost factors, and the like, are set forth in the Flow International Corporation Form 10-K report for 2001 filed with the Securities and Exchange Commission.*
